PROPERTY DEFINITIONS

Actual Cash Value: This valuation method pays for the cost to repair or replace damaged property with like kind and quality, less reasonable deductions for wear and tear, deterioration, and economic obsolescence.

Agreed Value: This coverage is used to remove the coinsurance requirement for covered property. With it your company agrees that the amount of coverage purchased is adequate, and any coinsurance requirements are waived if the limit of insurance equals the agreed value.

Basic Cause of Loss: This coverage is used to provide protection for the following causes of loss: fire, lightning, explosion, windstorm, hail, smoke (except from agricultural smudging or industrial operations), aircraft, vehicles, riot, civil commotion, vandalism, sprinkler leakage, sinkhole collapse, and volcanic action.

Broad Cause of Loss: This coverage is used to provide protection for the following causes of loss: fire, lightning, explosion, windstorm, hail, smoke (except from agricultural smudging or industrial operations), aircraft or vehicles, riot, civil commotion, vandalism, sprinkler leakage, sinkhole collapse, volcanic action, breakage of glass, falling objects, weight of snow, ice or sleet (except for damage to gutters, downspouts or personal property outside of buildings), and limited water damage.

Business Income: This coverage is used to insure against loss of income that you experience because of a suspension of your business when insured property has been damaged by a "covered" peril. If indicated on the proposal, it may also include additional expenses needed to continue business. Refer to the specific Business Income form for any set "period of restoration" limitations.

Coinsurance: A policy may contain a coinsurance clause requiring that the limit of coverage be a minimum percentage (usually 80%) of the insurable value of your property. If the amount of insurance carried is less than what is required by this clause, any claim payment may be reduced by the same percentage as the deficiency. For example, covered property worth \$100,000 may require a minimum of 80%, or \$80,000, of coverage for compliance with the policy's coinsurance requirement. If only \$60,000 of coverage is carried (25% less than the required \$80,000), then any loss payment would be reduced by 25%.

Earthquake: This coverage is used to provide protection for loss due to earth movement including earthquake shocks and volcanic eruption.

Flood: This coverage is used to provide coverage against loss due to water damage arising from flooding, surface water, tides, tidal waves, and the overflow of any body of water.

Functional Replacement Cost: This valuation method is used in situations where replacing damaged or destroyed property is impractical, impossible, or unnecessary. It affords you the ability to substitute property which is substantially different in value or cost from the original property. Consequently, you are allowed to carry policy limits lower than what would normally be required.

Guaranteed Replacement Cost: When added to your policy, this endorsement guarantees to repair or rebuild a covered building even if the reconstruction costs are greater than the amount of coverage specified for that building.

Replacement Cost: This valuation method pays for the cost to repair or replace damaged items with like kind and quality without deduction for depreciation. This is important since you could face a substantial loss if you must replace property at today's prices but receive only the depreciated value of the property that was destroyed.

Special Cause of Loss: This coverage will protect covered property against direct physical loss arising from any cause not specifically "excluded". Example of exclusions are flood, earthquake, rust, corrosion, fungi, mold, damage to property being worked on, artificially generated electrical currents, damage by rain, snow, or sleet to property in the open. Refer to the special cause of loss form for additional exclusions.

Vacancy: All property policies include a condition that limits or reduces coverage when a building is vacant or considered vacant as defined by the insurance policy. For certain causes of loss, coverage is completely eliminated. The policy can include wording that defines a building as considered vacant beyond a certain period of time or a certain percentage of the square footage of the building is not used to conduct customary operations. In most cases, policies or coverage forms that apply to commercial property require additional premium and endorsement in order for insurance coverage to continue during a period of vacancy.
