

**SITE SPECIFIC AGREEMENT – RE: UNITS 5 & 6, PHASE 2 OF ASH TREE  
PROPERTIES, III (104 LOTS)**

This Site Specific Agreement (the "Agreement") is made and entered into July \_\_\_\_, 2018 by and among LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT, hereinafter "LFUCG"; JESSAMINE-SOUTH ELKHORN WATER DISTRICT, hereinafter "JSEWD"; CITY OF NICHOLASVILLE, KENTUCKY; hereinafter "CITY"; and BALL HOMES, LLC, hereinafter "BALL".

**W I T N E S S E T H:**

**WHEREAS**, BALL currently owns real estate located in Jessamine County, Kentucky, identified as Ash Tree Unit 5 and 6, Phase 2 as more particularly described on Sheet 1 of Exhibit "A", attached hereto (the "Property" ); and

**WHEREAS**, the parties acknowledge that there is limited sanitary sewer capacity available; and

**WHEREAS**, the parties further acknowledge the importance of and the interrelationship of storm water as it may impact sanitary sewer collection and conveyance; and

**WHEREAS**, conditioned upon the agreement of BALL to comply with and subject to the terms and conditions of this Agreement, JSEWD and LFUCG are willing to provide sanitary sewer service to the Property.

**NOW, THEREFORE**, for and in consideration of the premises, the mutual undertakings and agreements herein contained and assumed, BALL, JSEWD and LFUCG hereby covenant and agree as follows:

1. **Sewer Capacity**. The parties agree that the sanitary sewer capacity needed to provide service to the Property shall not exceed **19,968** gallons per day (average daily flow) for sewage collection and conveyance.

2. **Agreement to Serve**. Conditioned upon BALL's full compliance with the LFUCG'S Code of Ordinances, including but not limited to Chapter 16, all administrative regulations, rules, practices and procedures of the LFUCG Department of Environmental Quality and Public Works (i.e. Procedures Manuals for Infrastructure Development, Sanitary Sewers and Pump Stations), and the rates, rules and regulations of JSEWD and Jessamine County relating to operation and use of the sanitary sewer system, as may be amended from time to time, (all entities' regulations hereinafter referred to as the "Code") and subject to the terms and conditions of this Agreement, upon the completion of the construction of the sanitary sewer facilities by BALL, JSEWD and LFUCG agree to permit connection of the sanitary sewer facilities installed by BALL to the existing facilities of LFUCG and JSEWD, if any, and to provide sanitary sewer utility service to

the Property. BALL expressly agrees that the constructed sanitary sewer facilities shall be conveyed to JSEWD upon completion of construction and approval for acceptance. Although it is expressly acknowledged by BALL that JSEWD may require that there be connections to the Property sanitary sewer system provided to adjoining properties, BALL expressly agrees that it shall not make any agreements with (relative to capacity reservation or otherwise) or permit any adjoining property owner access to or use of the sanitary sewer or storm water facilities to be constructed without the prior written authorization from JSEWD and LFUCG.

It is understood and agreed by the parties that this Agreement shall in no way constitute, nor shall be construed to be, a reservation of sanitary sewer treatment capacity for BALL by JSEWD or LFUCG, or an agreement by JSEWD and LFUCG to collect, convey, treat or in any way manage storm water. In order to secure a reservation of sanitary sewer capacity for the improvements shown in Exhibit "A", BALL must meet all terms and conditions of the Code, more specifically LFUCG Code of Ordinances Chapter 16, Article XIII, Sanitary Sewer Capacity Assurance Program (CAP). Furthermore, the parties hereto agree that in the event BALL fails to complete all requirements under this Agreement within 730 days from the date of same, this agreement shall automatically expire and become a nullity, but only as to facilities not constructed and connections not made.

**3. Connection Fees.** BALL agrees to pay the sum approved by the Kentucky Public Service Commission and, in addition, the amount of LFUCG sewer connection fees provided in the Code to JSEWD ("Connection Fees"). Said Fees are in consideration for the sewage collection, conveyance and treatment by JSEWD and LFUCG. The Connection Fees shall be paid as building permits are issued for each of the lots on the Property. In the event Ball does not construct the homes on all of the lots, then any successor in title to said lots shall be responsible for the Connection Fee at the time the building permit is issued.

**4. Additional Fees.** In addition to the Connection Fees heretofore referenced, BALL agrees to pay the full cost of sewer service to the Property, including, but not limited to the following additional charges and fees (the "Additional Fees"):

- (a) BALL shall have paid all reasonable charges assessed by JSEWD and LFUCG for plan review, construction inspection, testing, and other services of JSEWD and/or LFUCG in any way related to the sanitary sewer system.
- (b) BALL shall pay all sanitary sewer use fees ("Sewer User Fee") as provided in the Code, as may be amended from time to time. The Sewer User Fee is generally based on water consumption and BALL agrees to have the local water company which provides water to the Property, or any part thereof, provide duplicate billings to JSEWD, P.O. Box 731, Nicholasville, Kentucky 40340-0731. JSEWD will calculate and bill BALL or the appropriate user for such Sewer User Fees, which shall be due and payable as set forth in the Code. All unpaid Sewer User Fees shall

be subject to a late penalty and interest as set forth in the Code. Further, JSEWD shall be entitled to recover all its costs of collection of same, including reasonable attorney fees.

- (c) If required, BALL shall pay a surcharge for odor control chemicals on a monthly or less frequent basis as determined by JSEWD. LFUCG retains, in perpetuity, the right to approve or disapprove the use of any odor control chemical for the Property. .
- (d) Pre-treatment permit fees/ Extra strength fees (when applicable) shall be paid to LFUCG in accordance with the Code, Section 16-46 and Schedule B of Section 16-59.

**5. Lien To Secure Payment of Connection Fees and Additional Fees.** JSEWD shall have a lien against the Property to secure the payment of all Connection Fees and Additional Fees, interest, penalties and the costs of collection, including reasonable attorney fees. The lien shall attach to the Property, or applicable part thereof, as the Connection Fees and/or Additional Fees become past due without necessity of filing any lien statement by JSEWD.

**6. Sanitary Sewer and Storm Water Management Installations.** To induce JSEWD and LFUCG to provide sanitary sewer service to the Property, BALL agrees to construct, according to the plans and specifications approved by JSEWD and LFUCG as reflected in Exhibit "A", all on-site and off-site installations and facilities required by LFUCG to connect to the existing facilities of LFUCG and JSEWD, if any, to provide sanitary sewer service to the Property, including but not limited to all equipment, fixtures, pumps, lines, mains, manholes, lift stations, pumping stations, laterals, service connections, and to obtain appurtenances thereto together with all real property, easements and rights of way as necessary. To also induce JSEWD and LFUCG to provide sanitary sewer service to the Property, BALL shall size and construct, at its sole cost and expense, the proposed sanitary sewer facilities in a manner that provides the sanitary sewer capacity necessary to service all 1) developed/un-served upstream properties; 2) undeveloped upstream properties in accordance with JSEWD'S Sanitary Sewer Master Plan, LFUCG Watershed, North Jessamine County, Kentucky, Jessamine-South Elkhorn Water District, March 2006. The construction of infrastructure to serve developed/unserved and undeveloped upstream properties is in no way an approval or endorsement by LFUCG to provide future sanitary sewer service to those properties. Future developers of properties upstream of the Property may be required to improve downstream LFUCG infrastructure in order to secure a Site Specific Agreement for those properties. To further induce JSEWD and LFUCG to provide sanitary sewer service to the Property, BALL agrees to construct, according to the plans and specifications approved by the CITY, JSEWD, LFUCG and the Kentucky Division of Water as reflected in Exhibit "A", all on-site storm water facilities. The procedures for the design and construction of the storm water system shall comply with the same procedures outlined in numerical paragraph seven (7) herein for sanitary sewer systems, except that the applicable regulations for storm water management installations shall be substituted for those applicable to sanitary sewers and the appropriate authority exercising control over storm water management (City of Nicholasville) shall inspect and accept the storm water management installations. The

foregoing improvements, both sanitary and storm water systems, may be referred to as the "Improvements" and Exhibit "A" may be referred to as the "Plans".

If the Improvements will require a pump station, the peak discharge into the JSEWD and/or LFUCG gravity system shall be specified by JSEWD and LFUCG. Design of the pump station shall include a meter capable of recording all flow discharging from the pump station and telemetry equipment as specified by JSEWD. Odor control facilities shall be constructed as directed by JSEWD and LFUCG. LFUCG retains, in perpetuity, the right to approve or disapprove the use of any odor control chemical for the Property. If any pump stations are classified as "temporary" on the Plans, BALL will, at its own cost and secured by a bond or a letter of credit, connect to the gravity line as same becomes available and shall remove such "temporary" stations.

**7. Procedures for the Property Sewer System.** BALL agrees that the design and construction of the Improvements shall be subject to and in accordance with the Code and all administrative regulations, rules, practices and procedures of the LFUCG Department of Environmental Quality and Public Works, Jessamine County and JSEWD relating to the Improvements, and the following requirements, whether or not these requirements are contained in the foregoing ordinances, regulations, administrative rules, practices and procedures:

- (a) During construction of the Improvements, Jessamine County, JSEWD and LFUCG shall have the right to inspect such installations, including but not limited to the materials, equipment, piping, and connections to determine compliance with the approved Plans and JSEWD shall also have the right to halt construction, if necessary, in the event of non-compliance by BALL. BALL shall also provide JSEWD and LFUCG with periodic written certifications by BALL's engineer that all construction is in full compliance with the approved Plans and any applicable permits or other requirements.
- (b) Upon substantial completion of construction of the Improvements (as defined in the SSA) or any part thereof, BALL's engineer may deliver a signed certificate of substantial completion to JSEWD certifying to JSEWD and LFUCG that the construction is substantially completed, that the construction has been done thus far in accordance with all permits, approved Plans (as defined in the SSA) and any applicable legal requirements, and as constructed it will function for the purpose for which it was designed. Upon receipt of the above, payment of all fees due at the time and the posting of the Warranty Work and Punch List Sureties (as defined in attached exhibits), BALL may apply for tap-on permits from JSEWD at the time when building permits are issued for that portion of the project substantially completed, but there shall be no physical tap-on to the sewer main until and unless the entire project is completed, accepted by JSEWD and conveyed by BALL to JSEWD. Upon substantial completion and BALL's provision of the Punch List Surety and the Warranty Work Sureties (as described in Paragraph 9i below), and

BALL's compliance with the other terms and conditions of this SSA, JSEWD will sign-off on and approve BALL's final record plat for the Property.

- (c) At least seven (7) days prior to final inspection by JSEWD and LFUCG, BALL shall provide JSEWD and LFUCG with three sets of digital (AutoCAD) of the "as-built" plans, prepared by BALL's engineer, showing the location of all installations related to the Improvements as constructed. BALL shall provide JSEWD five (5) sets of as-built paving and storm water drainage plans, two (2) copies of the recorded subdivision plat of the Property and three (3) copies (DVD and inspection log) of a TV inspection of the sanitary sewer system. BALL shall also deliver to JSEWD, seven (7) days prior to final inspection, its engineer's certification and test results of the Improvements.
- (d) Upon completion of construction of the Improvements or any part thereof, BALL's engineer shall deliver a signed certificate of completion to JSEWD certifying to JSEWD and LFUCG that the construction is completed, that the construction has been completed in accordance with all permits, approved Plans, and any applicable legal requirements, and as constructed it will function for the purpose for which it was designed. BALL shall provide proof satisfactory to JSEWD that all contractors, sub-contractors, materialmen and laborers have been paid in full. Upon receipt of all of the above, payment of all fees, a deed of conveyance of the sanitary sewer system, and final inspection by JSEWD and LFUCG of the Property sanitary sewer and stormwater conveyance system, a letter of acceptance of the Property sanitary sewer system shall be delivered to BALL by JSEWD.

**8. Use of Property Sanitary Sewer System.** The use of the Property sanitary sewer system shall be subject to full compliance with the Code. All connections of any building constructed on the Property, or any part thereof, to the Property sanitary sewer system shall require a tap-on permit and approval by the JSEWD and LFUCG. Any connection of a building to the Property sanitary sewer system without a tap-on permit, inspection and approval may result in immediate disconnection by JSEWD.

**9. Representation and Warranties of BALL.** In order to induce JSEWD and LFUCG to enter into this Agreement, BALL hereby represents and warrants to JSEWD and LFUCG as follows:

- (a) BALL is duly organized, validly existing, and in good standing under the laws of the Commonwealth of Kentucky. BALL has all requisite power and authority to enter into and perform the obligations contemplated by this Agreement. The execution and delivery of this Agreement and the performance of the obligations contemplated hereby have been duly

authorized by all necessary action on the part of BALL. This Agreement has been duly executed and delivered by BALL and constitutes the legal, valid and binding obligation of BALL enforceable against it in accordance with its terms.

- (b) The execution and delivery of this Agreement does not, and the performance of the obligations contemplated herein will not conflict with or result in any violation of, or default under any provision of, BALL's organizational documents, or any other agreement to which BALL is a party.
- (c) BALL covenants to obtain any consent, approval or authorization of any third party required in connection with BALL's execution and delivery of this Agreement or the performance by BALL of the obligations contemplated herein has been obtained.
- (d) BALL has good, valid and marketable title to the Property, free and clear of all liens, encumbrances, leases, restrictions, or other agreements which would conflict with this Agreement.
- (e) There are no: (i) Hazardous Materials (as defined below) located on the Property or which have been released into the environment, or discharged, placed or disposed of at on or under the Property in violation of any. Environmental Laws (defined below); (ii) underground storage tanks which have been located on or under the Property.

The term "Hazardous Materials" means and includes, without limitation:

(i) Those substances included within the definitions of "hazardous substances", "hazardous materials", "toxic substances" or "solid waste" in any of the Environmental Laws (defined below);

(ii) Those substances listed in the U. S. Department of Transportation Table or amendments thereto (49 CFR 172.101) or by the U.S. Environmental Protection Agency (or any successor agency) as hazardous substances (40 CFR Part 302 and any amendments thereto);

(iii) Those other substances, materials and wastes which are or become classified as hazardous or toxic by any such law, regulation or ordinance; and

(iv) Any material, waste or substance which is any of the following: (A) asbestos-containing material; (B) polychlorinated biphenyls; (C) radon gas; (D) urea formaldehyde foam insulation; (E)

petroleum, petroleum. product or derivation thereof; (F) designated or listed as a "hazardous substance" pursuant to section 311 or section 307 of the Clean Water Act (U.S.C. section 1251 at set seq.); (G) explosive; or (H) radioactive.

- (v) The term "Environmental Laws" means all federal laws, state and local environmental, land use, zoning, health, chemical use, safety and sanitation laws, statutes, ordinances and codes related to the protection of the environment and government and/or governing the use, storage, treatment, generation, transportation, processing, handling, production or disposal of Hazardous Materials in the rules, regulation, policies, guidelines, interpretations, permits, decisions, orders and directives or federal, state, and local governmental agencies and authorities with respect thereto.
- (f) BALL is designated as the party that is responsible for compliance with all erosion/sediment control measures (Best Management Practices) during construction.
- (g) That neither JSEWD, nor LFUCG have made any representation or guarantee that any sanitary sewer capacity has been reserved for the undeveloped portion of BALL's property as described Phases 3 and 4 on Sheet 1C of Exhibit "A" or otherwise and that the capacity approved is for the area to be served as described on Sheet 1 of Exhibit "A".
- (h) BALL hereby represents and warrants to JSEWD and LFUCG that the Improvements will be repaired, constructed and installed in accordance with the Plans (Exhibit A) and that all materials, supplies and equipment incorporated into the work will be new and free from any and all defects, whether latent or patent, in workmanship. BALL agrees to repair and replace, at its own expense, all of the work which may prove to be defective, for a period of three (3) years after the date of acceptance by JSEWD, relative to the sanitary sewer system, and for a period of one (1) year after the date of BALL's engineer's certification of completion relative to the storm sewer system. The sanitary sewer and storm sewer warranty and punch list obligations above shall be secured by separate warranty bonds or letters of credits, acceptable to JSEWD, posted for the time periods above made in favor of JSEWD by BALL - one bond or letter of credit for the sanitary sewer system warranty work and punch list items and another bond or letter of credit for the storm sewer warranty work and punch list items. Each of the above bonds or letters of credits shall not be released in part or whole without prior written approval of JSEWD and LFUCG, which approval shall not be unreasonably withheld.

10. Easement. BALL hereby grants to JSEWD, subject to the terms of this Agreement, the right to maintain and operate the sanitary sewer system. BALL agrees to provide a note on any subdivision plat related to the Property referencing dedication of the sanitary sewer system to JSEWD which reads that it is specifically subject to the terms and conditions of this Agreement. Upon request, BALL further agrees to execute and deliver a separate deed of easement or encroachment permit in a form reasonably acceptable to JSEWD, in its sole discretion, for all facilities, on-site and off-site, related to the portions of the sanitary sewer system, for which JSEWD will accept dedication and conveyance except for pump stations and access routes thereto, which, upon request, BALL agrees to convey in fee simple absolute to JSEWD by deed in a form acceptable to JSEWD, in its sole discretion. BALL hereby further agrees that the foregoing grant includes the right of ingress and egress to any part of the Property for the purpose of maintenance and operation of the sanitary sewer system. BALL and JSEWD agree to assign to LFUCG a right of access and ingress and egress to the sanitary sewer system and to the Property.

11. Mortgage Liens. Mortgagees, if any, holding prior liens on the Property, or any part thereof, shall be required to subordinate their rights to the rights of JSEWD under this Agreement and the easement dedication herein contemplated.

12. Notices. All notices, demands or requests provided for or permitted to be given pursuant to this Agreement must be in writing. All notices, demands and requests to be sent to either party shall be deemed to have been properly given or served by personal delivery or by depositing same in the United States mail, addressed to such party, postage paid and registered or certified with return receipt requested at the following address:

13. **Indemnification.** BALL shall indemnify and reimburse JSEWD, the City and LFUCG for any and all claims, losses, liabilities, damages (including without limitation, fines, penalties, criminal or civil judgments and settlements), costs (including without limitation, court costs); and expenses (including without limitation, attorneys, engineers and accountants fees), (hereinafter "Loss" or "Losses") suffered or incurred by JSEWD and LFUCG, as a result of, or with respect to or arising from (a) any breach or inaccuracy of any representation or warranty of BALL herein; (b) any breach of or noncompliance by BALL with any covenant or agreement of BALL contained in this Agreement; (c) any negligent or wrongful act of BALL, its agents, employees, affiliates; and (d) Hazardous Materials or underground storage tanks that are located on or under the Property.

14. **Compliance with Law.** BALL agrees to comply with all federal, state and local laws, statutes, ordinances, regulations, and requirements. BALL agrees that the Property is subject to the Code and all regulations, administrative rules, practices and procedures of the LFUCG Department of Environmental Quality and Public Works, the JSEWD, and the City relating to sanitary and storm water management systems as set forth herein and agrees to fully comply with same.

15. **Exhibit Incorporation by Reference.** Exhibits "A" and "B" attached hereto are hereby incorporated by reference as if set out fully herein.

16. **Binding Effect, Assignment.** This Agreement shall be binding upon and inure to the benefit of the parties hereto, their successors, assigns, transferees, tenants, heirs, and personal representatives. BALL's rights hereunder shall not be assignable to any other person, except by a deed of conveyance whereby the Property, or a part thereof, is conveyed to such person.

17. **Costs and Attorney's Fees.** JSEWD and LFUCG shall be entitled to recover all costs and reasonable attorney fees incurred connected with the collection of Connection Fees or Additional Fees.

18. **Amendment/Waiver.** No modification, termination, assignment or amendment of this Agreement may be made, except by written agreement. Failure by any party to insist upon strict performance of any covenant, duty, agreement or condition in this Agreement or to exercise any right or remedy or a breach thereof shall not constitute a waiver of any breach or any such covenant, agreement, term or condition. Any party hereto, by notice and only by notice as provided in this Agreement, may, but shall be under no obligation to, waive any of its rights or any conditions to its obligations hereunder, or any duty, obligation or covenant of any other party hereto. No waiver shall affect or alter this Agreement but each and every covenant, agreement, term and condition of this Agreement shall continue in full force and effect with respect to any other then existing or subsequent breach thereof.

19. **Covenants Running with Land.** BALL, and its successors in title agree that all portions of the Property, whether designated as separate lots or otherwise, shall be required to

comply with the terms of this Agreement and shall use the Improvements in accordance with the terms of this Agreement, which covenant shall be deemed a "Covenant Running with the Land", and reference shall be made to this Agreement, on any plat of the Property or any part thereof.

**20. Undertakings.** The parties will act reasonably when undertaking any submittal, review, approval, acceptance, or inspection required under this Agreement, provided, however, with respect to any review, approval, acceptance, or inspection of JSEWD or the LFUCG which would be required under the law had the Property been located entirely in Fayette County, the standard practice of the LFUCG shall be deemed reasonable. Further by review, approval, acceptance or inspection, the JSEWD, the City, and LFUCG shall not assume responsibility for design, construction or installation of the Improvements and shall in no way be deemed to waive any rights available to JSEWD, City of Nicholasville, and LFUCG related to defects, omissions or failures in design, construction or installation.

**21. Governing Law.** This Agreement has been entered into and shall be interpreted under and governed by the laws of the Commonwealth of Kentucky. Further, the parties agree that any litigation related to the terms of this Agreement shall be brought in the Jessamine Circuit Court, Nicholasville, Kentucky and the parties acknowledge that venue shall be proper in such court.

If any court of proper jurisdiction finds or construes any provision contained herein to be unenforceable or invalid, then, and in that event, such finding or construction shall not invalidate the entire Agreement.

**22. Captions.** The captions of each section herein are for convenience only and shall not affect the construction hereof.

**23. Multiple Copies.** This Agreement may be signed in multiple copies, each of which shall be considered an original and entire document.

**24. Entire Agreement.** This Agreement contains the entire agreement and understanding between the parties hereto and incorporates and supersedes all oral agreements and understandings and it shall not be changed or supplemented unless done in a writing signed by all parties hereto.

**IN WITNESS WHEREOF** the parties have caused this document to be executed on the date and year first written.

SHEET  
9E

## A. SITE DESCRIPTION

The project known as ASHTRIE, UNIT 5-6, PHASE 2, is a 29 acre residential development located south of the Jessamine/Fayette County line near the end of existing East Brannon Road. The project will involve the disturbance of approximately 23 acres. Originally the site was a farm and approximately 85% of the development is covered in trees and brush. Runoff from the site discharges via ditches and storm sewer into a detention basin No. 1 adjacent to East Brannon Road or detention basin No. 2 south of the Street J cut-de-sac. Surface ditches have silt checks and surface inlets and catch basins are protected by silt checks. All erosion control features shall be regularly maintained and shall remain in place until 85% of the upstream development is completed.

## B. SEDIMENT AND EROSION CONTROL MEASURES

1) Prior to mobilization, all tree protection fences and silt fences shall be installed.

2) Silt fences shall comply with detail shown on Sheet II unless otherwise specified.

3) The construction entrance(s) shall be constructed during the first phases of the mobilization.

4) The Detention Basin and silt checks shall be installed according to the details shown on the grading and erosion control plans. These structures shall be installed prior to the beginning of construction.

5) All materials resulting from the clearing and grubbing operations shall be disposed of by the contractor. The material shall not be buried within the site, right-of-way or designated greenways. Burning pits shall be located as directed by the Engineer and approved by the Fire Marshal.

6) Additional erosion control measures, in addition to those shown on the plans, may be required. The measures may include seeding, mulching, silt fence, straw bales, stone silt checks, and armoring of silt fence as necessary to prevent soil erosion.

7) The existing vegetation shall be preserved where possible.

8) All disturbed areas shall be stabilized. Permanent stabilization shall begin within 14 days of completion of activities. Temporary stabilization shall be provided in any portion of the site that remains inactive for more than 14 days. Stabilization practices shall include seeding, mulching, planting sod, planting trees or shrubs, and using geotextile fabrics and other appropriate measures.

9) If grading occurs during the winter months, the use of winter wheat or other recommended seed should be considered. When seasonal conditions prohibit the application of temporary or permanent seeding, non-vegetative soil stabilization practices such as mulching and netting shall be used until such times as conditions permit.

10) Upon completion of the downstream segments of the storm sewer system, the stone silt checks shown at the outlets shall be constructed.

11) All surface inlets in the yard areas shall be protected from sediment using the modified silt check as shown on the plans. The modified silt checks shall be installed when the grading around the surface inlets is complete.

12) The performance of the erosion control plan shall be monitored weekly and following each significant rainfall in excess of 1/2". The silt control devices are to be inspected, cleaned, and repaired, if necessary.

13) All erosion control features shall be cleaned and maintained so that they remain functional throughout the project.

14) Silt fence shall be cleaned out/repared when silt buildup reaches 1/3 of the fence height.

15) Topsoil stockpiles and borrow sites shall be surrounded by silt fences, re-seeded, and placed where soil erosion will not leave the site.

16) Silt traps shall be cleaned out when 1/3 of the volume within the trap has been lost. Material removed from the silt trap shall be placed in a location which is protected by silt fence.

17) Upon completion of the project, the catch basin inlets shall be protected by the Owner. Once house construction is complete and lawns are established on 85% of the upstream watershed, the storm sewers can be flushed and the silt checks and traps at the outlets removed. The silt checks and traps shall remain in place until the flushing is completed and approved by the Engineer.

18) All erosion control measures shall remain in place until house construction is complete and lawns are established on 85% of the upstream watershed.

## C. Storm Water Management Devices

1) All storm water runoff leaving the paved portions of the site shall be collected in the storm sewer system.

2) The discharge from the site shall be controlled by a retention basin, located onsite. The runoff basin shall also serve as a sedimentation/water quality basin. The basin shall be monitored yearly. Silt removed from the basin shall be stockpiled and protected with silt fence to ensure it does not re-enter the site basin.

3) Upon complete build out of the upstream watershed, the sedimentation/water quality basin shall be cleaned out to its original value.

## D. OTHER CONTROL MEASURES

1) No solids, including building materials, shall be allowed to discharge into waters of the Commonwealth.

2) Sediment from vehicles tracking onto pavement and from dust generated onsite shall be minimized. All mud tracked onto adjoining roadways shall be cleaned immediately.

3) Sanitary and waste disposal shall comply with the project specifications, or applicable state or local regulations.

4) An area shall be designated for employee parking and storage of materials. The area shall be maintained throughout the project and, if necessary, be covered with stone to prevent erosion.

## E. OTHER STATE OR LOCAL PLANS

1) All work shall be performed in accordance with the Lexington-Fayette Urban County Government, the City of Nicholasville and Jessamine South Elkhorn Water District's requirements with respect to storm water management and erosion control.

2) All work within the existing streams and wetlands shall be performed in accordance with the Corp of Engineers Permit and the Water Quality Certification issued by the Kentucky Division of Water.

3) All work within the sedimentation basin shall be conducted in accordance with the permit issued by the Kentucky Division of Water.

## F. MAINTENANCE

Refer to Section 8 for discussion of maintenance of the sediment control features.

## G. INSPECTION

1) Refer to Section 8 for discussion of inspections of the sediment control features.

2) The inspections shall be performed by qualified representatives of the Engineer or the Developer.

3) The findings of the inspections shall be hand delivered or faxed to the Contractor or Developer.

4) Revisions to the Best Management Practices Plan based on the results of an inspection shall be implemented within 17 seven days.

5) Control measures shall be inspected to ensure correct operation. Accessible discharge locations shall be inspected to insure that velocity dissipation devices are effective in preventing significant impacts to receiving waters.

6) Disturbed areas and material storage areas that are exposed to precipitation shall be inspected for evidence of, or the potential for, pollutants entering the drainage system.

7) Reports of the inspections including the scope, notes and qualifications of personnel or persons making the inspection, the date of the inspection, major observations relating to the implementation of the Best Management Practices Plan, and any corrective actions taken shall be made and kept for a period of three (3) years or until one (1) year after the permit ends.

8) The inspection reports shall be provided to the Engineer for incorporation into the Best Management Practices Plan. The Engineer shall provide copies of all inspection reports to the City of Nicholasville and the Jessamine South Elkhorn Water District.

## H. NON-STORM WATER DISCHARGES

1) The site shall be maintained in a manner such that non-storm water discharges including leakages/spills (i.e. hydraulic fluid, antifreeze, brake fluid, oil, etc.) are prevented from entering the retention basin or ultimately leaving the site. All non-stormwater fluids shall be maintained in accordance with DEEM, Division of Water and the Ball Blows, LLC HAZMAT booklet.

2) Should a non-stormwater spill, accident, release or discharge occur, the DEEM and Division of Water shall be notified within 24 hours of discovery.

3) The only non-storm water discharges which are permitted are those from fire fighting activities, fire hydrant flushing, potable water sources, water line flushing, irrigation or lawn watering, detergent free building or pavement washing where spills or leaks of toxic materials have not yet occurred or have been completely removed, air conditioning condensation, natural springs, and uncontaminated ground water sources.

## I. CONTRACTORS AND SUBCONTRACTORS

The general contractor or developer shall furnish the Engineer with the contractor or subcontractor that is responsible for implementing and maintaining each portion of the sediment control measures shown on the plans or outlined in this Best Management Practices Plan.

All contractors and subcontractors shall sign a copy of the certification statement below before conducting any professional service at the site:

"I certify under penalty of law that I understand the terms and conditions of the general National Pollutant Discharge Elimination System (NPDES) permit that authorizes the storm water discharges associated with industrial activity from the construction site identified as part of this certification."

Copies of the certifications shall be submitted to the Engineer for inclusion in the Best Management Practices Plan. The Engineer shall furnish a copy of the contractor/sub-contractor responsibility list and a copy of each executed certification sheet to the City of Nicholasville and to the Jessamine South Elkhorn Water District prior to construction.

**ENCASMENT PIPE AND SPACER**  
SCALE: NTA

- TYPICAL ROAD CROSSING NOTES**
1. ALL JOINTS SHALL BE SOLIDLY WELDED. END OF CARRIER SHALL BE SEALED AFTER LINE HAS BEEN INSTALLED AND TESTED.
  2. FLOWING CARRIER MAY INCREASE IN AREAS WHICH REQUIRE HIGHWAY SEPARATION FROM OTHER FACILITIES.
  3. OTHER THROUGH ROADS CANNOT BE THE DITCH LINE OR THE FILL FROM THE EDGE OF THE PAVEMENT OR AS DIRECTED BY STATE COUNTY OR MUNICIPAL SPECIFICATIONS.
  4. UNDESIRABLE CROSSINGS SHALL UTILIZE STEEL CARRIER PIPE. STEEL CARRIER PIPES 2" AND LARGER SHALL BE REINFORCED AS SPACER. CARRIER PIPES LARGER THAN 2" AND UP TO 36" SHALL HAVE PROPER WALL THICKNESS OF 0.30".
  5. ALL BORED AND JACDED ENCASMENT PIPE SHALL BE INSTALLED IN BORE HOLE NO LARGER THAN THE OUTSIDE DIAMETER OF THE ENCASMENT PIPE.
  6. STEEL CARRIER PIPE SHALL CONFORM TO ASTM A 53 GRADE 1 OR ASTM A 53 GRADE B.
  7. MORE STRINGENT REQUIREMENTS STATED IN ANY RELEVANT PERMIT SHALL PREVAIL.
  8. CARRIER SPACERS SHALL BE FUSION OR FIBER CIP PE SPACERS AS MANUFACTURED BY CIP PIPELINE SYSTEMS.
  9. STEEL CARRIER PIPE 36" AND LARGER SHALL BE IN ACCORDANCE WITH THE CHART BELOW.

CARRIER PIPE NOMINAL DIAMETER (INCHES)									
INCHES	30	36	42	48	54	60	66	72	78
0.300	0.300	0.300	0.300	0.300	0.300	0.300	0.300	0.300	0.300

- NOTES:**
1. CONTRACTOR MUST WAIT 7 DAYS TO ALLOW THE PIPE TO SET AND ADJUSTING AND FOR CONCRETE CURE STRENGTH BEFORE MAKING THE CONNECTION.
  2. ON INITIAL FILL OF NEW PIPE, FILL AT AN EXTREME LOW FLOW RATE TO AVOID CENTRALIZATION EFFECT (PIPE BOWING).
  3. THIS PIPE CONNECTION REQUIRED ON BOTH SIDES OF HOPE.
  4. REINFORCED JOINT PVC PIPE CAN BE USED AS AN ALTERNATE.

## STANDARD DETAILS

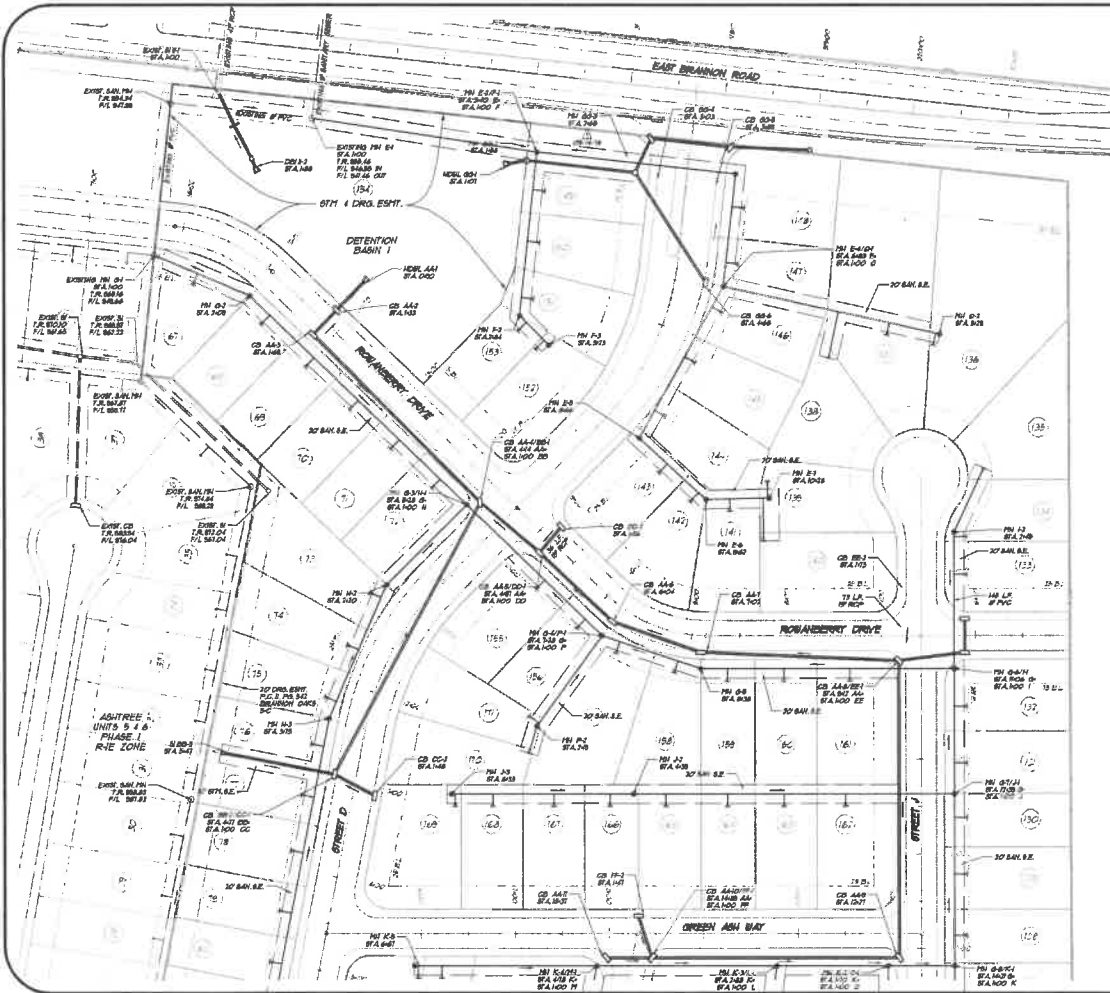

SD5

1. No water will be provided by JCWD1 to any development until the District's standard development contract is executed and returned to the District and all costs incurred by the District have been reconciled by the Developer.
2. The Developer's Contractor shall notify JCWD1 a minimum of 48 hours prior to the start of construction.
3. JCWD1 shall install all customer services and appurtenances from the water main to, and including, the meter and meter box. The Developer's Contractor is to install the water main and appurtenances only.
4. JCWD1 has assumed the water line shall be laid in either a dedicated utility easement (20') and/or public right-of-way where the District has permission to cut the street to make repairs. If this is not the case, the proposed water line shall be moved to the utility easement (20').
5. The bacteriological testing will be coordinated by JCWD1 and will be charged to the Developer. JCWD1 personnel will take all samples. Disinfection of the lines must be performed by the Contractor under the direct supervision of the District. The Contractor may not open any valve to the District's system. Copies of all lab reports must be presented to the District for review.
6. Pressure testing of the water lines and appurtenances shall be performed by the Contractor and must be observed by JCWD1 personnel. The Contractor may not open any valves to the District's system.
7. Installed water main shall be tested at 50 PSI above the rated working pressure of the pipe for a minimum of two (2) hours, with no more than 5 PSI pressure loss over the duration of the test. JCWD1 personnel shall witness the test preparation and record gage readings at the beginning and end of the pressure test. Not more than 3500 feet of pipe may be tested at any one time.
8. A two-year warranty period is required on all portions of the work. The Developer is responsible for all maintenance and repair costs during this timeframe.
9. Record Drawings, including a construction cost estimate and detailed quantity breakdown, are to be provided to the District by the Developer/Owner, or his Engineer, when construction is complete. Both a paper copy and electronic copy (georeferenced AutoCAD format and PDF) of Record Drawings are required to be submitted to the District.
10. The Developer's Engineer must certify to the District, the City and CDW that the fire hydrants installed meet all City and State requirements.
11. JCWD1 shall repair all connections to existing water lines. The Developer's Contractor must coordinate all connections with the District.
12. The Developer must submit contracts requesting service. No deposit is required if the Developer is supervising bidding and construction of the work.
13. The Developer and/or his Engineer must provide sufficient construction observation services for the project so that the construction can be certified by the Developer's Engineer to the DOW with no qualifications when construction is completed.
14. Periodic Project Inspection shall be performed by the District, at the Developer's or the Contractor's expense. The amount of inspection services and costs may be estimated prior to the start of the work, at the Developer's request. The Developer's Engineer shall provide adequate inspection to certify the completed project to the DOW without qualification or exception.
15. DOW must approve the final plans and their approval letter must be submitted to Jessamine County Water District No. 1 prior to construction.
16. All water line trenches must be of sufficient width to allow any subsequent maintenance to be practically performed. Required width shall be determined by the District's representative.
17. #10 AWG THWN insulated copper wire shall be installed along all water main. All splices of tracer wire shall be fully encapsulated within gaskets.

18. Standard utility marking tape shall be installed in the trench directly over all water mains at a depth of approximately 18 inches.
19. Installed water main joint deflection may not exceed 4" per 20-foot stick of pipe as measured from bell to spigot in relation to what would be a true and straight installation extending along the length of the preceding joint of pipe.
20. All installed water main must be seated in accordance with manufacturer recommendations and may not be over or under inserted under any circumstances.
21. Backfill around catch basins must be tightly compacted to prevent shifting of water main towards any catch basin.
22. The Developer shall submit Shop Drawings/construction materials submittals to the District for review prior to beginning construction.
23. The Contractor shall perform rough cleanup daily, with no ditches left open overnight and all construction debris disposed of daily.
24. More stringent requirements of any applicable permit shall apply to the Work.
25. Any water main installed in public right-of-way shall be a minimum of 36" deep. State maintained roadway crossings shall be a minimum of 42" deep measured from the lowest point in the right-of-way. Water main installed parallel to roadways and within the right-of-way shall be a minimum of 36" deep unless installed in the ditch, where it shall be a minimum of 42" deep.
