

# Company Overview & Project Summary Lexington Jobs Fund

Summit Biosciences is a specialty pharmaceutical company focused on developing, manufacturing and commercializing generic and innovative nasal spray drug products. In addition to developing our own products, we provide contract development and manufacturing services to our partners and to our clients for a wide variety of nasally delivered drug products and delivery systems.

Our headquarters and FDA approved manufacturing plant are located in Lexington, Kentucky on the University of Kentucky's Coldstream Research Campus. Our facility contains a cGMP laboratory, cGMP manufacturing and warehousing areas, offices and utility areas to support commercial manufacturing operations. Our manufacturing facility is dedicated to the formulation, filling, assembly, packaging and testing operations of nasal spray drug products. Our cleanrooms and equipment are designed to enable us to fill aseptically or terminally sterilize our products. The manufacturing facility, associated systems and equipment have been designed to be in full compliance with FDA cGMPs. Security systems and controls in compliance with DEA regulations have been installed, inspected and approved by the DEA.

We have recently leased approx. 3,500 square feet of warehouse space also located on the University of Kentucky's Coldstream Research Campus. We currently employ 28 full time people and 6 part time people.

We currently have two products, which we partnered with Lannett Company, under review with the FDA. We anticipate approval of these two products later this year or early 2015. We also have several multimillion dollar development and manufacturing contracts with two mid-sized pharmaceutical companies. We anticipate manufacturing at a commercial scale for both of these pharmaceutical companies once their products are developed and approved for sale by the FDA.

Because of our growing business, we need to expand our manufacturing and lab facilities. We are actively looking to buy, lease or build a building of approximately 35,000 square feet in the Lexington, KY area for our expansion. We are applying for a \$100,000 grant with the Lexington Jobs Fund with the proceeds to cover rent, payroll and other operating costs related to the new building. We are not requesting funds for construction of a building. We anticipate that within two years of the project, we will have created 9 new jobs with an average hourly rate of \$42.31 as a result of our expansion. The expansion will allow us to generate millions of dollars of revenue from the manufacturing of the two nasal products currently under review with the FDA and from our growing contract manufacturing business.

Please call me (859.254.0180) with any question on our company or our planned expansion.

Sincerely,

Greg Plucinski

Chief Operating Officer

# **Independent Auditors' Report**

To the Board of Directors Summit Biosciences Inc. Lexington, Kentucky

#### Report on the Financial Statements

We have audited the accompanying financial statements of Summit Biosciences Inc. (the "Company"), which comprise the balance sheets as of December 31, 2013 and 2012, and the related statements of operations, stockholders' deficit, and cash flows for the years then ended, and the related notes to financial statements.

# Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

# **Auditors' Responsibility**

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

www.strothman.com

# **Opinion**

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2013 and 2012, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

#### Summit Biosciences Inc.

December 31, 2013 and 2012

# **Note A--Description of Business**

Summit Biosciences Inc. (the "Company") is a Delaware corporation. The Company is a specialty pharmaceutical company located in Lexington, Kentucky and is focused on developing, manufacturing and commercializing generic and innovative nasal spray drug products distributed throughout the United States.

The Company's goal is to become a leader in the field of intranasal pharmaceutical drug product development and manufacturing. The Company intends to accomplish this by applying its unique formulation and manufacturing expertise and by leveraging its low cost, state-of-the-art cGMP manufacturing and packaging equipment to address a high-growth, niche market.

For the period of inception (October 22, 2009) through December 31, 2012, the Company was a development stage company. During the year ended December 31, 2013, the Company began to generate significant revenues and principal operations commenced related to intranasal pharmaceutical drug products. Therefore, effective January 1, 2013, Company was no longer a development stage company.

#### Note B-Summary of Significant Accounting Policies

The Company follows generally accepted accounting principles as outlined in the Financial Accounting Standards Board's Accounting Standards Codification. Significant accounting policies are as follows:

<u>Accounts Receivable</u>--Accounts receivable consists of fees from customers for contract manufacturing services. The Company has not experienced any bad debts to date and has not recorded an allowance for doubtful accounts as of December 31, 2013 and 2012.

Inventories -- Inventories are stated at the lower of cost (first-in, first-out method) or market.

<u>Property and Equipment</u>—The Company's policy is to capitalize asset purchases exceeding \$1,000 with a useful life greater than one year. Property and equipment are stated at cost less accumulated depreciation and amortization. Depreciation and amortization expense is calculated on the straight-line method. Depreciation and amortization expense for the years ended December 31, 2013 and 2012 is \$87,034 and \$92,464, respectively. The estimated useful lives of the assets, as follows:

Computer equipment 3 years
Equipment 2 – 5 years
Manufacturing equipment 10 years

Continued

#### Summit Biosciences Inc.

December 31, 2013 and 2012

# Note B.-Summary of Significant Accounting Policies--Continued

Impairment of Long-Lived Assets—Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that full recoverability is questionable. Management evaluates the recoverability of equipment using several factors in the valuation including, but not limited to, management's plans for future operations, recent operating results and projected cash flows. Impairment losses are recognized when the fair value of the assets is less than their carrying amount. Management has determined there were no charges for impairment during the years ended December 31, 2013 and 2012.

Intangible Assets--During 2012, the Company filed a patent related to substance and alcohol abuse treatment under development. This patent is stated at cost less accumulated amortization. Amortization expense is calculated on the straight-line method over the life of the patent. As of December 31, 2012, the patent was in the process of being filed and the associated legal fees had been included in the accompanying balance sheet. The Company had not received award notification of the patent before December 31, 2012; therefore, no amortization expense was recorded in the accompanying financial statements. As of December 31, 2013, the Company determined that the patent did not have any economic feasibility. Therefore, the patent was expensed as of December 31, 2013 and the related legal fees are included as professional fees on the accompanying statements of operations.

Revenue Recognition—The Company recognizes revenues from customers when the products have been shipped to the customers. The Company recognizes revenue from milestone contracts when the performance obligations have been met by the Company.

<u>Income Taxes</u>—The Company is taxed as a corporation under the Internal Revenue Code. Accordingly, federal and state income taxes are imposed on the Company in the accompanying statements of operations.

Deferred income taxes are recognized for temporary differences between income for financial statement purposes and income for tax purposes. The difference between the financial statement and tax bases of assets and liabilities is determined annually. Deferred income tax assets and liabilities are computed for those differences that have future tax consequences using the currently enacted tax laws and rates that apply to the periods in which they are expected to affect taxable income. Valuation allowances are established, if necessary, to reduce the deferred tax assets to the amounts that will more likely than not be realized. Income tax expense is the current tax payable or refundable for the period plus or minus the net change in the deferred tax assets and liabilities.

Certain transactions of the Company may be subject to accounting methods for federal income tax purposes which differ significantly from the accounting methods used in preparing the consolidated financial statements in accordance with generally accepted accounting principles. Accordingly, the net income of the Company reported for federal income tax purposes may differ from net income in these financial statements.

Continued

#### Summit Biosciences Inc.

December 31, 2013 and 2012

# Note B--Summary of Significant Accounting Policies--Continued

Accounting for Uncertain Tax Positions--The Company accounts for uncertain income tax positions in accordance with generally accepted accounting principles, which prescribe a comprehensive model for how a company should measure, recognize, present, and disclose in its financial statements uncertain tax positions that the company has taken or expects to take on a tax return. The Company recognizes the tax benefits from uncertain tax positions only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such positions are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement.

It is the Company's policy to expense any interest and penalties associated with uncertain income tax positions in the year that the tax position is taken on the tax return. Interest is reported as interest expense and penalties are reported as other expenses.

For the years ended December 31, 2013 and 2012, the Company determined it did not have any uncertain tax positions and the Company did not incur or accrue any associated interest or penalties related to those positions.

The Company's open audit periods are 2010 through 2013. In evaluating the Company's tax provisions and accruals, future taxable income, the reversal of temporary differences, interpretations, and tax planning strategies are considered. The Company believes their estimates are appropriate based on current facts and circumstances.

Research and Development Costs--Research and development costs are expensed as incurred.

<u>Fair Value of Financial Instruments</u>--The carrying amounts for cash, accounts receivable, accounts payable and accrued expenses approximate their fair value due to their short maturity and variable rates of interest.

<u>Use of Estimates</u>—The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

<u>Subsequent Events</u>—In preparing these financial statements, the Company has evaluated events and transactions for potential recognition or disclosure through June 5, 2014, the date the financial statements were available to be issued.

#### Note C-Inventories

Inventories at December 31, 2013 and 2012 consist of \$9,500 in raw component materials for manufacturing intranasal pharmaceutical products.

# Summit Biosciences Inc.

December 31, 2013 and 2012

# Note D-Notes Payable

Notes payable consist of the following:

	December 31			31
		2013		2012
Note payable to a government agency, due in four annual installments of \$62,500 unless certain employment requirements have been met, then payments are waived. The note bears no interest and matures on June 30, 2015 and is collateralized by a letter of credit.	\$	125,000	\$	187,500
Notes payable repaid during current year			<del></del>	105
Less current maturities		125,000 (62,500)		187,605 (62,605)
	\$	62,500	\$	125,000

During the years ended December 31, 2013 and 2012, the Company paid \$348 and \$2,232, respectively, for not achieving the required employment targets related to this note payable. The portion of this note payable that was forgiven by the government agency is included in forgiveness of debt income on the accompanying statements of operations.

If the employment criteria discussed above is not met, future maturities of notes payable are as follows:

2014 2015	<u>\$</u>	62,500 62,500
	\$	125,000

# Note E--Letter of Credit

The Company has an unused letter of credit for the years ended December 31, 2013 and 2012 in the amounts of \$125,000 and \$187,500, respectively. The letter of credit was established for collateral on the unpaid principal balance of the note payable listed above to a government agency.

# Summit Biosciences Inc.

December 31, 2013 and 2012

# Note F-Capital Lease Obligations

The Company leases certain equipment under terms that are classified as capital leases. Capital lease obligations consist of the following:

		December 31		
		2013		2012
Capital lease obligation payable to a lease financing company with interest at 10.99%; monthly principal and interest payments of \$1,004 through February 2015; collateralized by equipment	\$	12,131	\$	23,134
Capital lease obligation repaid during current year		· <del></del>	********	1,047
Less current maturities		12,131 (11,154)	-	24,181 (11,046)
Total Long-Term Capital Lease Obligations	\$	977	\$	13,135
The following is a schedule of future minimum capital lease paymen	ts as c	of December	31, 20	13:
2014 2015			\$	12,048 2,008

Present value net minimum lease payments Less current portion			halinda/hanki/a	12,131 (11,154)
Lon	g-Ter	m Portion	\$	977

Equipment acquired under capital leases included in the balance sheets consists of the following:

	Year Ended December 31			
		2013		2012
Equipment Less accumulated amortization	\$	60,850 (49,519)	\$	60,850 (38,890)
	\$	11,331	\$	21,960

#### Summit Biosciences Inc.

December 31, 2013 and 2012

# Note G--Preferred Stock

The Company authorized 12,800,000 shares of \$0.0001 par value common stock and 7,200,000 shares of \$0.0001 par value preferred stock. During the years ended December 31, 2013 and 2012, 405,000 and 675,000 shares of preferred stock were issued for \$431,650 and \$675,000, respectively. Stock warrants were attached to preferred stock shares issued during 2013 for a total of 190,000 shares. Of which, 165,000 warrants were exercised for \$1,650 and were included in the preferred stock totals above. No such warrants were issued for 2012.

A cumulative dividend of 6% of the original issue price, as defined in the First Amended and Restated Certificate of Incorporation, is payable upon declaration of the dividend by the Board of Directors. As of December 31, 2013 and 2012, no dividends have been declared and the accrued dividends included in the accompanying balance sheets of \$608,037 and \$361,389, respectively, have been earned by the preferred stockholders. Under the terms of the First Amended and Restated Certificate of Incorporation, the Company may be required to redeem shares of the preferred stock on or after June 30, 2017, if requested by the holders of a majority of the outstanding shares of preferred stock. The redemption price would be the greater of the original issue price plus any unpaid dividends or the fair market value of the shares as of the redemption date.

The issued and outstanding shares of preferred stock contain voting rights equal to its equivalent shares of common stock and are convertible into shares of common stock based upon a formula stated in the Amended Articles of Incorporation.

The preferred stock agreement contains a number of provisions designed to protect the holders. These include, among other things, the following:

- The Company may not declare or pay any dividends to common stock holders until all accrued preferred stock dividends have been paid in full.
- The Company may not repurchase, exchange or redeem any common stock until all accrued preferred stock dividends have been paid in full.
- Liquidation preference of the original issue price of each share plus any accrued but unpaid dividends on each share.

# Note H.-Stock Options

The Company has adopted the Summit Biosciences Inc. 2009 Stock Plan (the "Plan") under which 1,690,000 shares of common stock have been reserved for the granting of options to the employees of the Company. The employees become vested in their option rights at a rate of 25% on the first anniversary date of the vesting start date with the remainder vesting in equal monthly installments over the three year period following the first anniversary of the vesting start date. The options are fully vested four years from the vesting start date. Vested options may be exercised at any time before the expiration of ten years from the date of the grant.

# Summit Biosciences Inc.

December 31, 2013 and 2012

# Note H--Stock Options--Continued

The Company accounts for stock awards using the calculated value method. The Company recognizes compensation expense for options granted. Using the Black-Sholes option pricing model, management has determined that the options issued have a calculated value of \$1.00 per share.

The Company recognized compensation expense of \$65,059 and \$38,730 in the personnel expense in the accompanying statements of operations related to these stock options for the years ended December 31, 2013 and 2012, respectively. The Company has also recorded an increase in additional paid-in capital for the compensation expense related to these stock options.

The assumptions used and the weighted average calculated value of options are as follows:

	 December 31			
	 2013	<del></del>	2012	
Weighted average calculated value of options granted	\$ 1.000	\$	1.000	
Expected dividend yield	-		-	
Risk free interest rate	2.35%		1.80%	
Expected volatility	80.00%		80.00%	
Expected term of options in years	10		10	

The following is a summary of the option transactions:

		Shares	E	Veighted Average Exercise Price er Share
Outstanding at January 1	, 2012	660,828		
Granted - options		465,655	\$	1.0000
Expired/forfeited		(77,134)		1.0000
	Balance at December 31, 2012	1,049,349	\$	0.7443
Granted - options		69,350		1.0000
Expired/forfeited		(31,055)		1.0000
	Balance at December 31, 2013	1,087,644	\$	0.7547

#### Summit Biosciences Inc.

December 31, 2013 and 2012

#### Note i-Income Taxes

The provision for income tax expense (benefit) consists of the following for 2013:

Total Income Tax Benefit	\$ (97,400)
Deferred income tax benefit	 2,600 (100,000)
Benefit of net operating loss carryforward	 (20,000)
State and local	2,600
Federal	\$ 20,000
Current	

There was no income tax expense (benefit) for 2012.

The Company has generated net operating loss carryforwards totaling approximately \$3,720,000, which will expire through 2030.

A valuation allowance is provided when it is more likely than not that some portion of the deferred tax assets will not be realized. Based on management's estimates of future taxable income, a valuation allowance was provided to reduce the deferred tax assets based on the expected level of future taxable income.

The amount that would be obtained by applying tax rates to the income (loss) reported in the financial statements differs from the income tax reported. The 2013 net income before income taxes did not result in a current income tax expense as the Company reduced its valuation allowance. The \$161,000 decrease in the valuation allowance during 2013 reflects use of net operating loss carryforwards in 2013 plus an estimate of the benefit of net operating loss carryforwards that can be reasonably estimated to be used in the future. The Company continues to recognize a \$1,055,000 valuation allowance related to its remaining unused net operating loss carryforward because of the uncertainty about its realization. Changes in the estimated tax benefit that will be realized from the remaining net operating loss carryforwards will be recognized in the financial statements in the years in which those changes occur.

The tax effect of each temporary difference that results in significant deferred tax assets (liabilities) is as follows:

	December 31			
		2013		2012
Accelerated methods of depreciation	\$	(42,000)	\$	(29,000)
Various accruals and reserves		(66,000)		(77,000)
Net operating loss carryforwards		1,263,000		1,322,000
Valuation allowance	***************************************	(1,055,000)		(1,216,000)
	\$	100,000	\$	40

#### Summit Biosciences Inc.

December 31, 2013 and 2012

#### Note J--Leases

The Company leases its operating facility under an operating lease that expires in May 2015 with five options to renew for a period of one year each. Total lease expense was \$195,833 and \$187,917 for the years ended December 31, 2013 and 2012, respectively.

Minimum future rental payments under noncancellable operating leases are as follows:

# Year Ending December 31

2014 2015		\$ 200,000 83,333
	Total Minimum Future Rental Payments	\$ 283,333

#### Note K--Retirement Plan

The Company has a defined contribution retirement plan (under Section 401(k) of the Internal Revenue Code) that covers all employees 21 years of age and have completed one hour of service. At its discretion, the Company may match employee contributions and may contribute an additional profit sharing piece at the end of the year. For the years ended December 31, 2013 and 2012, no such contributions were made.

# Note L--Concentrations

The Company receives a significant portion of their revenues, 99% (2013) and 98% (2012), from three customers.

#### Note M-Research and Development Contracts

The Company entered into a master supply agreement ("MSA") with a mid-sized generic pharmaceutical manufacturing company ("Customer"), on June 9, 2009. The terms of the agreement include the development, manufacturing and supply of pharmaceutical products for the Customer's use, distribution and sale. The term of the agreement is three years from the date on which the Customer receives Food and Drug Administration ("FDA") approval to use, distribute and sell the product and may be extended, for additional terms of one year. The Company is recognizing revenue from all products as part of this MSA using the milestone method as milestones are being met. Under the MSA, the Company receives \$350,000 per product in milestone payments during product development and recognizes the associated revenues starting with the signing of the MSA and other substantive milestones through the approval of the Abbreviated New Drug Application ("ANDA"). There are five products covered by the MSA agreement.

#### Continued

# Summit Biosciences Inc.

December 31, 2013 and 2012

# Note M--Research and Development Contracts-Continued

During commercial manufacturing, the Company will be reimbursed for the fully burdened cost per unit. The Company will also be paid a royalty of 50% on net sales dollars for each product. During 2013, there was \$50,000 in revenue related to this agreement recognized and no revenue was recognized during 2012. An additional \$450,000 was received from the customer during 2013 that is not directly related to this contract, and is included in other revenues on the statements of operations. The costs associated with this agreement for the years ended December 31, 2013 and 2012 were approximately \$1,011,000 and \$839,000, respectively.

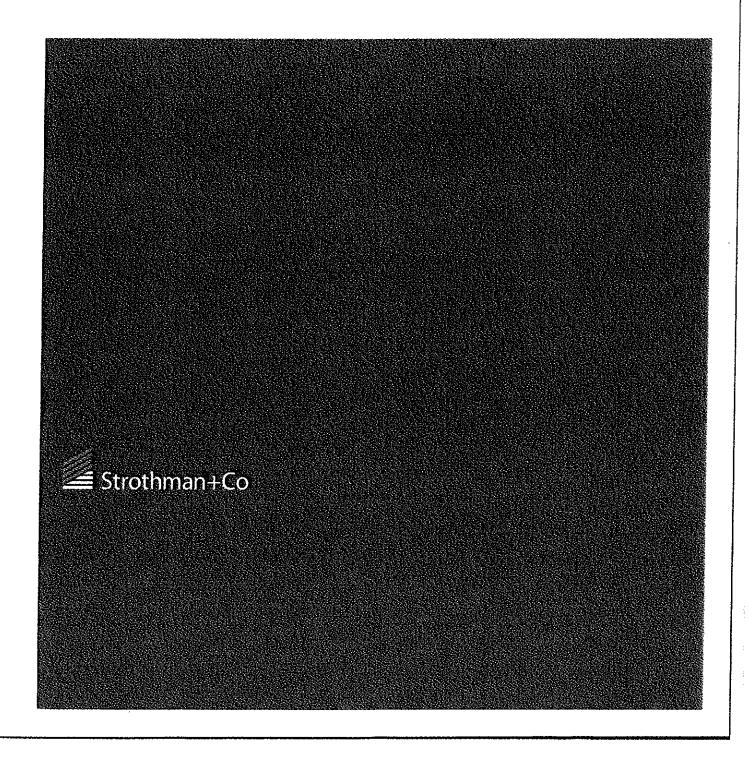

If the Customer chooses to not extend the term of the MSA for any developed products, the Company has the option to purchase all rights to manufacture the product, including access to the Customer's ANDA, regulatory filings and all related documentation for a sum equal to the technology transfer fee of \$350,000 per product. Following full payment to the Customer, all rights shall transfer to and become property of the Company.

### Independent Auditors' Report

To the Board of Directors Summit Biosciences Inc. Lexington, Kentucky

#### Report on the Financial Statements

We have audited the accompanying financial statements of Summit Biosciences Inc. (the "Company"), a development stage company, which comprise the balance sheet as of December 31, 2012, and the related statements of operations, stockholders' deficit, and cash flows for the period from inception (October 22, 2009) through December 31, 2012 and for the year ended December 31, 2012, and the related notes to the financial statements.

# Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

# Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

www.strothman.com

### Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2012 and the results of its operations and its cash flows for the period from inception (October 22, 2009) through December 31, 2012 and for the year ended December 31, 2012 in accordance with accounting principles generally accepted in the United States of America.

# Emphasis of a Matter Regarding Going Concern

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note C to the financial statements, the Company's significant operating losses from development stage activities raise substantial doubt about its ability to continue as a going concern unless adequate additional financing or capital is obtained. The financial statements do not include any adjustments that might result from the outcome of this uncertainty. Our opinion is not modified with respect to that matter.

Notes to Financial Statements

Summit Biosciences Inc.
(A Development Stage Company)

December 31, 2012

### Note A--Description of Business

Summit Biosciences Inc. (the "Company") is a Delaware corporation. The Company is a specialty pharmaceutical company focused on developing, manufacturing and commercializing generic and innovative nasal spray drug products.

The Company's goal is to become a leader in the field of intranasal pharmaceutical drug product development and manufacturing. The Company intends to accomplish this by applying its unique formulation and manufacturing expertise and by leveraging its low cost, state-of-the-art cGMP manufacturing and packaging equipment to address a high-growth, niche market.

The Company has invested a significant amount of its effort and cash in research and development activities. The Company is subject to risks common to technology-based companies including, but not limited to, the development of new technology, development of markets and distribution channels, dependence on key personnel and the ability to obtain additional capital as needed to meet its product plans.

### Note B--Summary of Significant Accounting Policies

The Company follows generally accepted accounting principles as outlined in the Financial Accounting Standards Board's Accounting Standards Codification ("ASC"). Significant accounting policies are as follows:

Accounts Receivable—Accounts receivable consists of fees from customers for contract manufacturing services. The Company has not experienced any bad debts to date and has not recorded an allowance for doubtful accounts as of December 31, 2012.

Inventories--Inventories are stated at the lower of cost (first-in, first-out method) or market.

<u>Property and Equipment</u>—The Company's policy is to capitalize asset purchases exceeding \$1,000 with a useful life greater than one year. Property and equipment are stated at cost less accumulated depreciation. Depreciation expense is calculated on the straight-line method over the estimated useful lives of the assets, as follows:

Computer equipment 3 years
Equipment 2 - 5 years
Manufacturing equipment 10 years

Impairment of Long-Lived Assets—The Company reviews for the impairment of long-lived assets whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. An impairment loss would be recognized when estimated future cash flows expected to result from the use of the asset and its eventual disposition are less than its carrying amount. There were no charges for impairments of long-lived assets during the year.

Continued

Summit Biosciences Inc. (A Development Stage Company)

December 31, 2012

## Note B-Summary of Significant Accounting Policies--Continued

Revenue Recognition—The Company recognizes revenues from customers when the products have been shipped to the customers. The Company recognizes revenue from milestones when the performance obligations have been met by the Company.

<u>Income Taxes</u>—The Company is taxed as a corporation under the Internal Revenue Code. Accordingly, federal and state income taxes are imposed on the Company in the accompanying statements of operations.

Deferred income taxes are recognized for temporary differences between income for financial statement purposes and Income for tax purposes. The difference between the financial statement and tax bases of assets and liabilities is determined annually. Deferred income tax assets and liabilities are computed for those differences that have future tax consequences using the currently enacted tax laws and rates that apply to the periods in which they are expected to affect taxable income. Valuation allowances are established, if necessary, to reduce the deferred tax assets to the amounts that will more likely than not be realized. Income tax expense is the current tax payable or refundable for the period plus or minus the net change in the deferred tax assets and liabilities.

Accounting for Uncertain Tax Positions—The Company recognizes the tax benefits from uncertain tax positions only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such positions are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement.

It is the Company's policy to expense any interest and penalties associated with uncertain income tax positions in the year that the tax position is taken on the tax return. Interest is reported as interest expense and penalties are reported as other expenses.

The Company's open audit periods are 2010 and 2011. The Company determined they did not have any uncertain tax positions and the Company did not incur or accrue any associated interest or penalties related to those positions.

Research and Development Costs--Research and development costs are expensed as incurred.

<u>Fair Value of Financial Instruments</u>--The carrying amounts for cash, accounts receivable, accounts payable and accrued expenses approximate their fair value due to their short maturity and variable rates of interest.

<u>Use of Estimates</u>—The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Continued

Summit Biosciences Inc. (A Development Stage Company)

December 31, 2012

## Note B--Summary of Significant Accounting Policies-Continued

Intangible Assets—The Company has filed a patent related to substance and alcohol abuse treatment under development. This patent is stated at cost less accumulated amortization. Amortization expense is calculated on the straight-line method over the life of the patent. As of December 31, 2012, the patent was in the process of being filed and the associated legal fees have been included in the accompanying balance sheet. The Company had not received award notification of the patent before December 31, 2012; therefore, no amortization expense is recorded in the accompanying financial statements.

<u>Subsequent Events</u>—In preparing these financial statements, the Company has evaluated events and transactions for potential recognition or disclosure through June 25, 2013, the date the financial statements were available to be issued.

### Note C-Going Concern

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. The Company incurred a net operating loss of approximately \$718,000 for the year ended December 31, 2012 and has a deficit accumulated during the development stage of approximately \$4.9 million at December 31, 2012. Operating losses are expected to continue in 2013. The uncertainty related to the Company's ability to raise additional funds along with the Company's continued operating losses raises substantial doubt about the Company's ability to continue as a going concern. The financial statements do not include any adjustments related to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. Management believes that additional funding can be raised through contract manufacturing agreements, pharmaceutical licensing agreements, new equity financing or additional funding from existing investors. In addition, management would adjust operating expenses for cost containment purposes.

### Note D--Inventories

Inventories at December 31, 2012 consist of \$9,500 in raw component materials for manufacturing intranasal pharmaceutical products.

### Summit Biosciences Inc.

(A Development Stage Company)

Summit Biosciences Inc. (A Development Stage Company)

December 31, 2012

#### Note G--Preferred Stock

The Company authorized 12,800,000 shares of \$0.0001 par value common stock and 7,200,000 shares of \$0.0001 par value preferred stock. During the year ended December 31, 2012, 675,000 shares of preferred stock were issued for \$675,000. A cumulative dividend of 6% is payable upon declaration of the dividend by the Board of Directors. Under the terms of the First Amended and Restated Certificate of Incorporation, the Company may be required to redeem shares of the preferred stock on or after June 30, 2017, if requested by the holders of a majority of the outstanding shares of preferred stock. The redemption price would be the greater of the original issue price plus any unpaid dividends or the fair market value of the shares as of the redemption date.

The issued and outstanding shares of preferred stock contain voting rights equal to its equivalent shares of common stock and are convertible into shares of common stock based upon a formula stated in the Amended Articles of Incorporation.

The preferred stock agreement contains a number of provisions designed to protect the holders. These include, among other things, the following:

- The Company may not declare or pay any dividends to common stock holders until all accrued preferred stock dividends have been paid in full.
- The Company may not repurchase, exchange or redeem any common stock until all accrued preferred stock dividends have been paid in full.
- Liquidation preference of the original issue price of each share plus any accrued but unpaid dividends on each share.

#### Note H--Stock Options

The Company has adopted the Summit Biosciences Inc. 2009 Stock Plan (the "Plan") under which 1,690,000 shares have been reserved for the granting of options to the employees of the Company. The employees become vested in their option rights at a rate of 25% on the first anniversary date of the vesting start date with the remainder vesting in equal monthly installments over the three year period following the first anniversary of the vesting start date. The options are fully vested four years from the vesting start date. Vested options may be exercised at any time before the expiration of ten years from the date of the grant.

The Company accounts for stock awards using the calculated value method. The Company recognizes compensation expense for options granted. Using the Black-Sholes option pricing model, management has determined that the options issued have a calculated value of \$1.00 per share.

During 2012, the Company has recognized compensation expense of \$38,730 in the personnel expense in the accompanying statement of operations related to these stock options. The Company has also recorded an increase in additional paid-in capital for the compensation expense related to these stock options.

### Note H-Stock Options-Continued

The assumptions used and the weighted average calculated value of options are as follows for the year ended December 31, 2012:

Weighted average calculated value of options granted	\$ 1.000
Expected dividend yield	-
Risk free interest rate	1.80%
Expected volatility	80.00%
Expected term of options in years	10

The following is a summary of the option transactions:

	Shares	E	Weighted Average Exercise Price Per Share	
Outstanding at December 31, 2011	660,828			
Granted - options	465,655	\$	1.0000	
Expired/forfeited	(77,134)		1.0000	
Exercised				
Balance at December 31, 2012	1,049,349	\$	0.7443	

## Note I-Income Taxes

The Company has generated net operating loss carryforwards totaling approximately \$4,105,000, which will expire through 2030.

A valuation allowance is provided when it is more likely than not that some portion of the deferred tax assets will not be realized. During the year ended December 31, 2012 and based on management's estimates of future taxable income, a valuation allowance was provided to reduce the deferred tax asset, based on the expected level of future taxable income. The Company determined that a valuation allowance of \$1,216,000 was needed as of December 31, 2012.

#### Summit Biosciences Inc.

(A Development Stage Company)

#### Note I-Income Taxes--Continued

The tax effect of each temporary difference that results in significant deferred tax assets (liabilities) is as follows as of December 31, 2012:

Accelerated methods of depreciation	\$ (29,000)
Various accruals and reserves	(77,000)
Net operating loss carryforwards	1,322,000
Valuation allowance	(1,216,000)
	\$ -

The Company is currently disputing disallowed costs related to an audit by the Internal Revenue Service ("IRS") during 2011. The Company received a Qualifying Therapeutic Discovery Project ("QTDP") Program grant during 2010, and the IRS auditor has raised informal questions regarding the allowability of approximately \$73,000 of expenditures made with grant funds. If the IRS were to ultimately determine that such expenditures were unallowable under QTDP Program guidelines, that amount might have to be repaid. Management currently believes they will prevail on this issue, however, there is an accrual in the full amount included in accrued expenses on the accompanying balance sheet as of December 31, 2012.

### **Note J--Leases**

The Company leases its operating facility under an operating lease that expires in May 2015 with five options to renew for a period of one year each. Total lease expense was \$187,917 for 2012.

Minimum future rental payments under noncancellable operating leases are as follows:

### Year Ending December 31

2013 2014 2015		\$ 195,833 200,000 83,333
	Total Minimum Future Rental Payments	\$ 479,166

## Note K--Retirement Plan

The Company has a defined contribution retirement plan (under Section 401(k) of the Internal Revenue Code) that covers all employees 21 years of age and have completed one hour of service. At its discretion, the Company may match employee contributions and may contribute an additional profit sharing piece at the end of the year. For the year ended December 31, 2012, no such contributions were made.

Summit Biosciences Inc. (A Development Stage Company)

December 31, 2012

### Note L--Research and Development Contracts

The Company entered into a master supply agreement ("MSA") with a mid-sized generic pharmaceutical manufacturing company ("Customer"), on June 9, 2009. The terms of the agreement include the development, manufacturing and supply of pharmaceutical products for the Customer's use, distribution and sale. The term of the agreement is three years from the date on which the Customer receives Food and Drug Administration ("FDA") approval to use, distribute and sell the product and may be extended, for additional terms of one year. The Company is recognizing revenue from all products as part of this MSA using the milestone method as milestones are being met. Under the MSA, the Company receives \$350,000 per product in milestone payments during product development and recognizes the associated revenues starting with the signing of the MSA and other substantive milestones through the approval of the Abbreviated New Drug Application ("ANDA"). There are five products covered by the MSA agreement.

During commercial manufacturing, the Company will be reimbursed for the fully burdened cost per unit. The Company will also be paid a royalty of 50% on net sales dollars for each product. During 2012, there was no revenue related to this agreement recognized. The costs associated with this agreement for the year ended December 31, 2012 and for the period from inception (October 22, 2009) through December 31, 2012 were approximately \$839,000 and \$2,536,000, respectively.

If the Customer chooses to not extend the term of the MSA for any developed products, the Company has the option to purchase all rights to manufacture the product, including access to the Customer's ANDA, regulatory filings and all related documentation for a sum equal to the technology transfer fee of \$350,000 per product. Following full payment to the Customer, all rights shall transfer to and become property of the Company.
