JUSTIFICATION FOR CHANGE

PROJECT: Senior Citizen Center Construction

CONTRACT NO. 227-2014

CHANGE ORDER NO. 41

1. Necessity for change: Roofing contractor has recommended changing the material for roof coping above the stone walls from composite to aluminum for a better installation. PR 62 & 63 call for ice/water shield membranes to be added in two locations and additional flashing at gutters. These changes cancel each other out from a cost perspective. Grading issues are causing the manhole adjacent to the pickleball court to be raised. This will impact the pickleball court which will have to be partially cut out and patched.
2. Is proposed change an alternate bid? ___ Yes X No
3. Will proposed change alter the physical size of the project? ___ Yes X No
If "Yes", explain.
4. Effect of this change on other prime contractors: N/A
5. Has consent of surety been obtained? ___ Yes X Not Necessary
6. Will this change affect expiration or extent of insurance coverage? ___ Yes X No
If "Yes", will the policies be extended? ___ Yes ___ No
7. Effect on operation and maintenance costs: Aluminum coping above stone walls will create a more sound roof coping assembly.
8. Effect on contract completion date: 0 working days

Aluminum Fabricated Coping Cap Breakdown

To: Travis Harris
Project Site Manager
Marrillia Design And Construction
259 West Short Street , Suite # 325
Lexington, Ky 40507

Re: Proposed Change orders Versus PR- 062 & PR-0 63 Breakdowns

I met with the owners and the architect Thursday morning April 7, 2016. I discussed the two ASI's mentioned above and my (3) proposed change orders regarding additional metal flashings at the back gutter to direct flow of roofing water to gutters and add ice & water shield self adhering underlayment on walls at grid line 6.5 , 1.5 & 3. For PR 0.62 request.

Originally the Englert Company representative (Sean Castleberry) met with all of us at a progress meeting way back last Spring . He recommended using sheet metal coping cap fabricated from 0.040" thick pre finished aluminum (Silversmith color) same profiles shown on the drawings. The concern he had using composite materials were : The composite coping (cap) has not been tested for a high wind up lift . Wall coping using a 0.040 " thick aluminum has is more suited for wall copings necessary for the application shown for this project (See accompanying information from Jeff Barnard with the Englert Company regarding the use of sheet metal coping) given to Harding at our meeting. . Per this on site meeting I agreed with Harding Dowell , Joyce and Jessica (The owners representatives) to provide the three proposed change orders at no added cost to the owners. It was also agreed that we could fabricate copings from the 0.040" thick aluminum in which I was directed to furnish ASAP. I have ordered the 0.040" thick " Silversmith aluminum and have proceeded to fabricate the required coping cap at the exterior stone wall areas. Below is our breakdown for the cost to fabricate this material to compare cost using the 0.40 " pre finished aluminum " Silversmith versus using the composite wall coping per Englert, Inc. written quote.

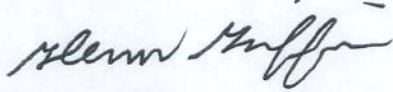

The Englert Company quote using the Composite metal materials: (See attached quote) for \$ 10,900

Using 0.040" thick aluminum "Silversmith Coping	
(18) sheets 0.040" thick aluminum coping	\$ 1,933.92
Set-Up Charge	312.50
State Sales Tax	116.04
Freight	468.75
Sealant/Rivets/Plates	993.75
Labor Fabrication : (3) Men 32 Hrs. Each @ 45.00	\$ 4,320.00
Labor Installation Same as other	0
Total to fabricate the 0.040" thick " Silversmith " Coping	\$ 8,144.96
Add credit for the (3) proposed change orders incorporated in the work	\$ 3,173.07

Total cost to Fabricate 0.040" thick aluminum coping plus the (3) proposed
Change order credits

\$ 11,318.03

Hello Jack and Glenn,

Please find the attached FM 1-49 publication regarding perimeter flashing attachment, as we discussed. Paragraph 2.2.11 specifies #10 screws at 20" O. C. maximum to develop an FM Class 1-90 rating.

The coping in question is shown in architectural Detail A4/A4.18. And as a custom fabricated .040" aluminum coping it would be covered under Section 076200 of the project specifications in my opinion.

Additionally, the industry standard SMACNA Architectural Sheet Metal Manual 5th Edition states that .040" aluminum coping with a top width greater than 18" shall use a joint type of J5-J9 or J12. SMACNA also addresses fastener spacing for metal copings specifying 24" O. C.

I hope this information is helpful.

Please let me know if there are any questions or concerns.

Thanks,

Jeff

Requested Response

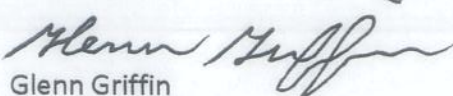

To: Travis Harris
Marrillia Design & Construction
259 West Short Street, Suite 325
Lexington, KY 40507

RE: Composite Coping Cap & .040 Coping Cap Design Like Composite.

Travis,

The composite coping cap will still apply at all composite wall panel locations. The .040 silversmith aluminum coping cap designed to look like the composite coping cap over the stone walls ONLY. (Detail 1 on A414 & detail C2 on A412 on the west and east wall). The .040 silversmith aluminum coping cap at the top of the stone walls approx. 170 LF is what we gave you the credit back on for PR – 062 & 063 & grid line (6.5, A) at the north west corner. Hope this helps clarify any confusion.

RE: Lexington Senior Center - PR-065
Asphalt Paving Quote

ATS Construction is pleased to quote the following pricing for the project referenced above as detailed in RFP-065 and referencing plans developed by EOP Architecture / Interiors, Sheet L10.0 and as further defined in the scope of work listed below:

Scope of Work:

A. PICKEL BALL COURT - ASPHALT PAVING FOR MAN HOLE REPAIR **22 SY**

- 1) Place 6" DGA Base
- 2) Place 2" Asphalt Base
- 3) Place 0.5" Asphalt Surface

LUMP SUM PRICE: \$1,980.00
\$90.00 / SY

LABOR: \$806.24
EQUIPMENT: \$489.71
MATERIAL: \$684.05

NOTES:

- ATS Construction is OMITTING the following items: Site layout / Staking, Excavation / Backfill, Manhole and related items, seeding / erosion control, and any other item not listed under scope of work.
- ATS Construction is quoting the above as a UNIT PRICE PACKAGE.
- The above prices does not include performance and payment bond, add 3/4 of 1 percent performance and payment bond, if required.
- ATS Construction is quoting the above prices based on prevailing wages as found in the project specifications.
- ATS Construction BID QUOTATION LETTER shall be made a part of subcontract agreement.
- Any alterations or deviations from the above specified scope of work involving extra work will be

Page 1 of 2

Equal Opportunity Employer

3009 Atkinson Ave. Suite 400 Lexington, KY 40509
Phone (859) 223 - 7001 Fax (859) 231 - 0946

executed only upon written orders and will be at an extra charge over and above the Lump Sum Price as quoted.

- ATS Construction proposes to furnish all materials, labor, and equipment to complete the work as described above.
- Grading and compaction of the sub grade is the responsibility of others. The site contractor shall place the sub grade to +/- 0.05' from the planned sub grade elevations. Grade errors or poor density conditions shall be corrected prior to start of work by ATS Construction.
- All traffic control shall be the responsibility of others with the exception of flagger personnel during the placement of the items listed in the scope of work above.
- All work will be completed in a workmanlike manner according to the standards of practice.
- All corrective work required for work performed by ATS Construction and damaged by others shall be considered extra work and become an extra charge to the LUMP SUM PRICE.
- All materials and workmanship is guaranteed for a period of one year. Acts of nature are not warranted. Acts of nature include, but are not limited to, damage from earthquakes, tornadoes, floods, uncontrolled vegetation, and cracks caused by hot and dry conditions.
- Payment is due upon completion, net 30. Projects requiring more than 30 days will be invoiced on a percentage of completion basis.
- ATS Construction is a pre-qualified contractor with the Kentucky Transportation Cabinet.
- Quote is good for 30 days beyond the date of this quote letter.
