DOCUMENTATION REQUIRED FOR GOOD FAITH EFFORTS AND OUTREACH PLANS

As affirmed in Resolution Number 272-2024, the Urban County Council has adopted an annual aspirational goal of utilizing at least seventeen percent (17%) of public funds spend from certain discretionary agreements with certified Minority Business Enterprises (MBEs) and certified Woman Business Enterprises (WBEs); utilizing at least three percent (3%) of public funds from certain discretionary agreements with Certified Veteran-Owned Small Business and Certified Service-Disabled Veteran-Owned Small Businesses (VOSBs); and utilizing Disadvantaged Business Enterprises (DBEs) where applicable. Bidders should make every effort to achieve these goals.

Therefore, as an element of the responsiveness of the bid, all Bidders are required to submit documentation of their good faith and outreach efforts to ensure all businesses, including small and disadvantaged businesses such as minority-, woman-, and veteran-owned businesses, have an equal opportunity to compete for and participate in the performance of any subcontracts resulting from this procurement. Examples of good faith and outreach efforts that satisfy this requirement to encourage the participation of, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs include:

1. Advertised opportunities to participate in the contract in at least two (2) publications of general circulation media; trade and professional association publications; small and minority business or trade publications; and publications or trades targeting minority, women, and disadvantaged businesses not less than fifteen (15) days prior to the deadline for submission of bids to allow, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs to participate.
2. Attended LFUCG Procurement Economic Inclusion Outreach event(s) within the past year to meet new small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs to partner with on LFUCG contracts and procurements.
3. Attended pre-bid/pre-proposal meetings that were scheduled by LFUCG to inform small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs of subcontracting opportunities.
4. Sponsored Economic Inclusion event to provide networking opportunities for prime contractors and small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs.
5. Requested a list of certified small, DBE, MBE, WBE, VOSB and/or SDVOSB subcontractors or suppliers from LFUCG and showed evidence of contacting the companies on the list(s).
6. Contacted organizations that work with small, DBE, MBE, WBE, and VOSB companies for assistance in finding certified DBEs, MBEs, WBEs, VOSB and/or SDVOSBs to work on this project. Those contacted and their responses must be a part of the bidder's outreach efforts documentation.
7. Sent written notices, by certified mail, email, or facsimile, to qualified, certified small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs soliciting their participation in the contract not less than seven (7) days prior to the deadline for submission of bids to allow them to participate effectively.
8. Followed up initial solicitations by contacting small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs via tailored communications to determine their level of interest.

9. Provided the interested small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs with adequate and timely information about the plans, specifications, and requirements of the contract.
10. Selected portions of the work to be performed by small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs in order to increase the likelihood of subcontracting participation. This includes, where appropriate, breaking out contract work items into economically feasible units to facilitate small, DBE, MBE, WBE, VOSB and/or SDVOSB participation, even when the prime contractor may otherwise perform these work items with its own workforce.
11. Negotiated in good faith with interested small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs, not rejecting them as unqualified without sound reasons based on a thorough investigation of their capabilities. Any rejection must be so noted in writing with a description as to why an agreement could not be reached.
12. Included documentation of quotations received from interested small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs that were not used due to uncompetitive pricing or were rejected as unacceptable and/or copies of responses from firms indicating that they would not be submitting a bid.
 - a. Bidder has to submit sound reasons why the quotations were considered unacceptable. The fact that the bidder has the ability and/or desire to perform the contract work with its own forces will not be considered a sound reason for rejecting a small business', DBE's MBE's, WBE's, VOSB's and/or SDVOSB's quote. Nothing in this provision shall be construed to require the bidder to accept unreasonable quotes in order to satisfy the participation goals.
13. Made an effort to offer assistance to or refer interested small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs to obtain the necessary equipment, supplies, materials, insurance and/or bonding to satisfy the work requirements of the bid proposal.

Bidder must document, with specificity, each of the efforts it made to include small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs as subcontractors in the procurement, including the date on which each effort was made, the medium through which each effort was made, and the outcome of each effort.

Note: Failure to submit the documentation requested in this section may be cause for rejection of bid. Bidders may include any other documentation deemed relevant to this requirement which is subject to review by the MBE Liaison. Documentation of Good Faith and Outreach Efforts must be submitted with the Bid, regardless of the proposed level of small, DBE, MBE, WBE, VOSB and/or SDVOSB participation in the procurement. If the Good Faith and Outreach Effort documentation is not submitted with the bid response, the bid may be rejected.

10.0 Interstate AM Radio Signs Troubleshooting and Maintenance

10.1 Signals fail to operate, follow these troubleshooting procedures:

10.1a at the Control Point:

- Verify the activation sequences.
 - Verify that the sequences are appropriate to operate the FAS6000(s).
- 10.1b at the FAS6000PV Site:
- Determine if any damage has occurred to the system or sign structure.
 - Check for debris, snow or excessive shading from nearby foliage. Remove any obstruction. Determine if the photovoltaic panel is still facing south. If it is not, reposition it. Allow the battery to charge for 3-7 days without use and test it again at that time.
 - Make sure the conduit and beacons appear to be undamaged. Repair if necessary.
 - In the Security Enclosure if none of the component indicator lights are on, check the battery fuse with an ohmmeter. Replace with a 10-amp AGC fuse if necessary.
- 10.2 Activate the system via the command center or a hand held transceiver. The ALERT LED on the TAR will begin to flash and an audible alarm should sound. If the LED beacons are not flashing, proceed to the next troubleshooting step.
- 10.3 If the SS6L Controller "Load Disconnect" LED is on, disconnect the battery and measure its charge with a voltmeter. If the battery voltage is below 12.6 volts, it might be that insufficient solar radiation has been gathered for operation. It also might be that the beacons have operated for a length of time sufficient to discharge the battery below 11.5 volts. Allow the system to recharge for 3 days without use and test it again.
- 10.4 If the battery voltage is above 12 volts, one of the load components might be damaged. Or there could be an electrical short in the wiring. Scan the wiring for obvious crossed polarities, and refer to the wiring diagram for repair. If the wiring is not at fault, disconnect power from each component and observe the "Load Disconnect" LED. Do this one component at a time. If the
- 10.5 "Load Disconnect" LED goes out, the problem lies within the last component you disconnected. Send it to ISS for service or replacement.
- 10.6 If none of the above tests produce positive results, test the beacon operation by pressing the test switch. The LED beacons should flash. If the beacons do not flash, then the ASFC Controller might need servicing, or the problem lies in the beacons.
- 10.7 Make a visual inspection. Look for insects and other pests that might have entered the transmitter enclosure. If there is physical damage to the system lightning damage to the antenna, solar panel and other external components, look for dark marks or other obvious damage, cables or wires that might have become damaged, loose, or corroded at connection points. Replace or reconnect and use silicone to prevent weathering, dust and dirt. Clean it from the surfaces of panels and components with a damp cloth or spray cleaner.
- 10.8 Check voltage or battery in your system. If the positive lead going to the battery or battery pack has an in line fuse or breaker first remove the fuse or turn OFF the breaker to isolate the batteries from the charger system that maintains them. If there is no fuse just slide the positive lead from the positive terminal of the battery to accomplish this.
- 10.9 Test each battery with a volt-ohm meter set to measure DC voltage. Your batteries had standing voltages of about 12.8 volts when new. If healthy they will show a charge of great than 12 volts. Replace batteries that do not meet 12 volts.
