RE: Citation Boulevard Phase III-A Fayette County, Kentucky

Dear Mr. Grunwald:

Please find enclosed our scope and fee proposal for providing engineering and related services for the subject project.

The project Contract Scoping Meeting was held at the LFUCG Engineering Conference Room on November 15, 2017. Services to be provided generally include field survey and utility coordination, roadway engineering design, meetings, sub-consultant oversight and coordination, public involvement and bidding assistance.

Sincerely,

Joseph Cochran, P.E. Project Manager

Joseph D. Calle

#### **Negotiation Minutes**

February 23, 2018

#### Participants:

Andrew Grunwald – LFUCG, Mark Feibes - LFUCG Joe Cochran – HDR, Ben Edelen – HDR, Jonathan West - HDR

All negotiations were held by e-mail transmittals, telephone and meeting at the LFUCG office. General comments from the negotiations included:

- 1. The general project scope was discussed during the Contract Scoping Meeting conducted at the LFUCG Engineering Conference Room on November 15, 2017.
- 2. The following summarizes negotiations with LFUCG:

<u>Date</u>	<u>Discussion</u>
11/2/17	HDR received notice of selection from LFUCG.
11/15/17	Scoping meeting held at LFUCG.
12/13/17	HDR submitted (via email) draft scope/units to LFCUG for review.
1/2/18	LFUCG accepted scope/units.
1/23/18	HDR and LFUCG agreed to include scope for terrain verification (under survey).
1/23/18	HDR submitted (via email) a Fee Proposal to LFUCG.
2/9/18	LFUCG provided (via email) comments on the Fee Proposal.
2/21-23/18	HDR met with LFUCG to discuss proposed scope and man-hours. Items included
	the removal of Right-of-Way Acquisition services, and adjustments to survey,
	preliminary line and grade, right-of-way plans and final plans.

#### 3. Production Hour Negotiations

#### MEMORANDUM

TO: Eric Pelfrey, Director

Division of Professional Services

FROM: Michael Coffey, Audit Manager CC 8/2/17

External Audit Branch

DATE: August 2, 2017

SUBJECT: HDR Engineering, Inc. and Subsidiaries

Acceptance of Cognizant Rate

We have received a cognizant letter for HDR Engineering, Inc. and Subsidiaries' (Company) year ended December 31, 2016 Statement of Direct Labor, Fringe Benefits, and General Overhead and Schedule of Facilities Capital Cost of Money Prepared in Accordance with the Federal Acquisition Regulation Part 31 from the State of Nebraska Department of Roads.

We have verified the Company's pay rates per classification to their payroll register dated as of July 14, 2017 and noted the pay rate in the attachment.

We recommend the Kentucky Transportation Cabinet use the following rates:

#### Contracts signed before 6/24/14:

Combined Indirect Cost Rate	157.28%
Facilities Capital Cost of Money	0.3537%

#### Contracts signed on or after 6/24/14:

Combined Indirect Cost Rate 156.48% Facilities Capital Cost of Money 0.3537%

This memorandum is intended solely for the use and information of the Company and the Kentucky Transportation Cabinet related to contracts employing the cost principles of the Federal Acquisition Regulations and should not be used for any other purpose.

Report No. 2017-116

HDR Engineering, Inc. and Subsidiaries 8404 Indian Hills Drive Omaha, NE 68114

Quint English, Company Controller:

Subject: Review of FYE December 31, 2016 Indirect Cost Rate Audit performed by Ernst & Young, LLP.

We have completed a cognizant review of the independent Certified Public Accountant (CPA) audit and supporting work papers of the Indirect Cost Rates of HDR Engineering, Inc. and Subsidiaries for the year ended December 31, 2016. This review was conducted in accordance with our role as Cognizant Agency as defined in 23 U.S.C. 112(b)(2)(c) and 23 CFR 172.3 and 172.7.

Our review consisted of discussions with HDR officials and a review of Ernst & Young LLP's (E-Y) audit report and audit working papers to ensure that the indirect cost rate was calculated in accordance with Government Auditing Standards, and that the schedule of indirect costs was prepared in accordance with accounting practices prescribed in 48 CFR Part 31 of the Federal Acquisition Regulations. Our cognizant review was performed in accordance with the AASHTO Review Program for CPA Audits of Consulting Engineers' Indirect Cost Rates.

A new applicable benchmark compensation cap was established by the Bipartisan Budget Act of 2013 (BBA) that set executive compensation at \$487,000, applicable for contracts awarded on or after June 24, 2014. As a result HDR submitted a dual rate for 2016, one rate for work performed on contracts signed before 6/24/14 and a second rate for work performed on contracts signed on or after 6/24/14. With regards to the balance of the results of the E-Y audit, nothing came to our attention that caused us to believe that the examination and supporting workpapers for the Indirect Cost Rates and the related Accountant's Report we reviewed did not conform in all material respects to the aforementioned regulations and auditing standards.

NDOR, in consultation with HDR, made mutually agreed-upon adjustments to the submitted overhead costs. These adjustments are identified in the enclosed overhead rate schedule.

Accordingly, we recommend acceptance of the following rates:

#### Contracts signed before 6/24/14

Combined Indirect Cost Rate

157.28%

Facilities Capital Cost of Money

.3537%

#### Contracts signed on or after 6/24/14

Combined Indirect Cost Rate

156.48%

Facilities Capital Cost of Money

.3537%

The accepted overhead rate schedules have been included with this letter.

Tim Baker, CICA Audit Supervisor

Re: Citation Boulevard Phase III-A Lexington, Kentucky Proposal for Engineering Services

Dear Mr. Cochran,

Thank you for the opportunity to submit this proposal for engineering services for design of Citation Boulevard Phase III-A, Lexington, KY. Per our understanding of the project. Vision Engineering shall prepare drainage analysis for the Line/ Grade and Final Plan as per attached spreadsheet.

- Line & Grade for a total of 48 hours at \$135/hour
- Final Grade for a total of 247 hours at \$135/hour

Vision Engineering scope of services consists of the following.

- Attend meetings
- Prepare drainage maps
- Prepare drainage calculation for the ditches, inlet spreads, and storm system.
- Prepare drainage calculation for the culverts.
- Assemble preliminary and final drainage folder.
- Coordination with KDOW/FEMA

We appreciate the opportunity to submit this proposal, upon approval and a notice to proceed; we can begin the process immediately. Rich Newton, PLS will manage this project. Should you have any questions or need additional information, please do not hesitate to call.

Sincerely,

Jihad Hallany

Jihad A. Hallany, P.E.

## LFUCG Citation Boulevard Phase III-A

## **Geotechnical Engineering and Material Testing**

HDR has the in-house ability to perform subsurface investigations, laboratory testing programs and provide geotechnical engineering services for transportation projects. Geotechnical engineering services provided by HDR include: Drilling & Sampling, Laboratory Testing & Analysis, Shallow Foundation Design, Deep Foundation Design, Slope Stability Analysis, Settlement Analysis, Seismic Mitigation & Ground Improvement Design, Pavement Design, Retaining Wall Analysis, Load & Resistance Factor Design (LRFD), Instrumentation Installation & Monitoring, Crosshole Sonic Logging (CSL), Seepage Analysis and Slide Repair & Mitigation. HDR's Materials Laboratory testing facilities include state of the art testing equipment and is certified by the AASHTO Materials Reference Laboratory and validated by USACE.

#### **Craig Barnett, PE** – Geotechnical Section Manager

Mr. Barnett serves as the Geotechnical Section Manager for the Lexington, KY office and is responsible for various geotechnical and structural projects including slope stability analyses; settlement analyses; external retaining wall analyses; rock cut slope design; deep and shallow foundation analyses. In addition, his experience includes development of geotechnical reports for railroads, roadways and structures designed in various geologic regions. His responsibilities include management, design, and quality control of various projects including geotechnical investigations involving structures including bridges, buildings, roadways and dams. He also has field experience in geotechnical exploration, field crew management, and exploratory foundation excavations.

#### **Lyndsie Janbakhsh, PE** – Geotechnical Engineer

Lyndsie has over seven years of professional experience in analysis, design, and construction of deep foundations for bridges, retaining walls, railroad track-beds and bridge approaches, building structures, embankment fills, earth dams, flood control levees, pavements, rock-fall catchments, subgrade stabilization, slope and excavation stability, and preparation of geotechnical reports, project specifications, construction plans and cost estimates.

#### **Project Approach**

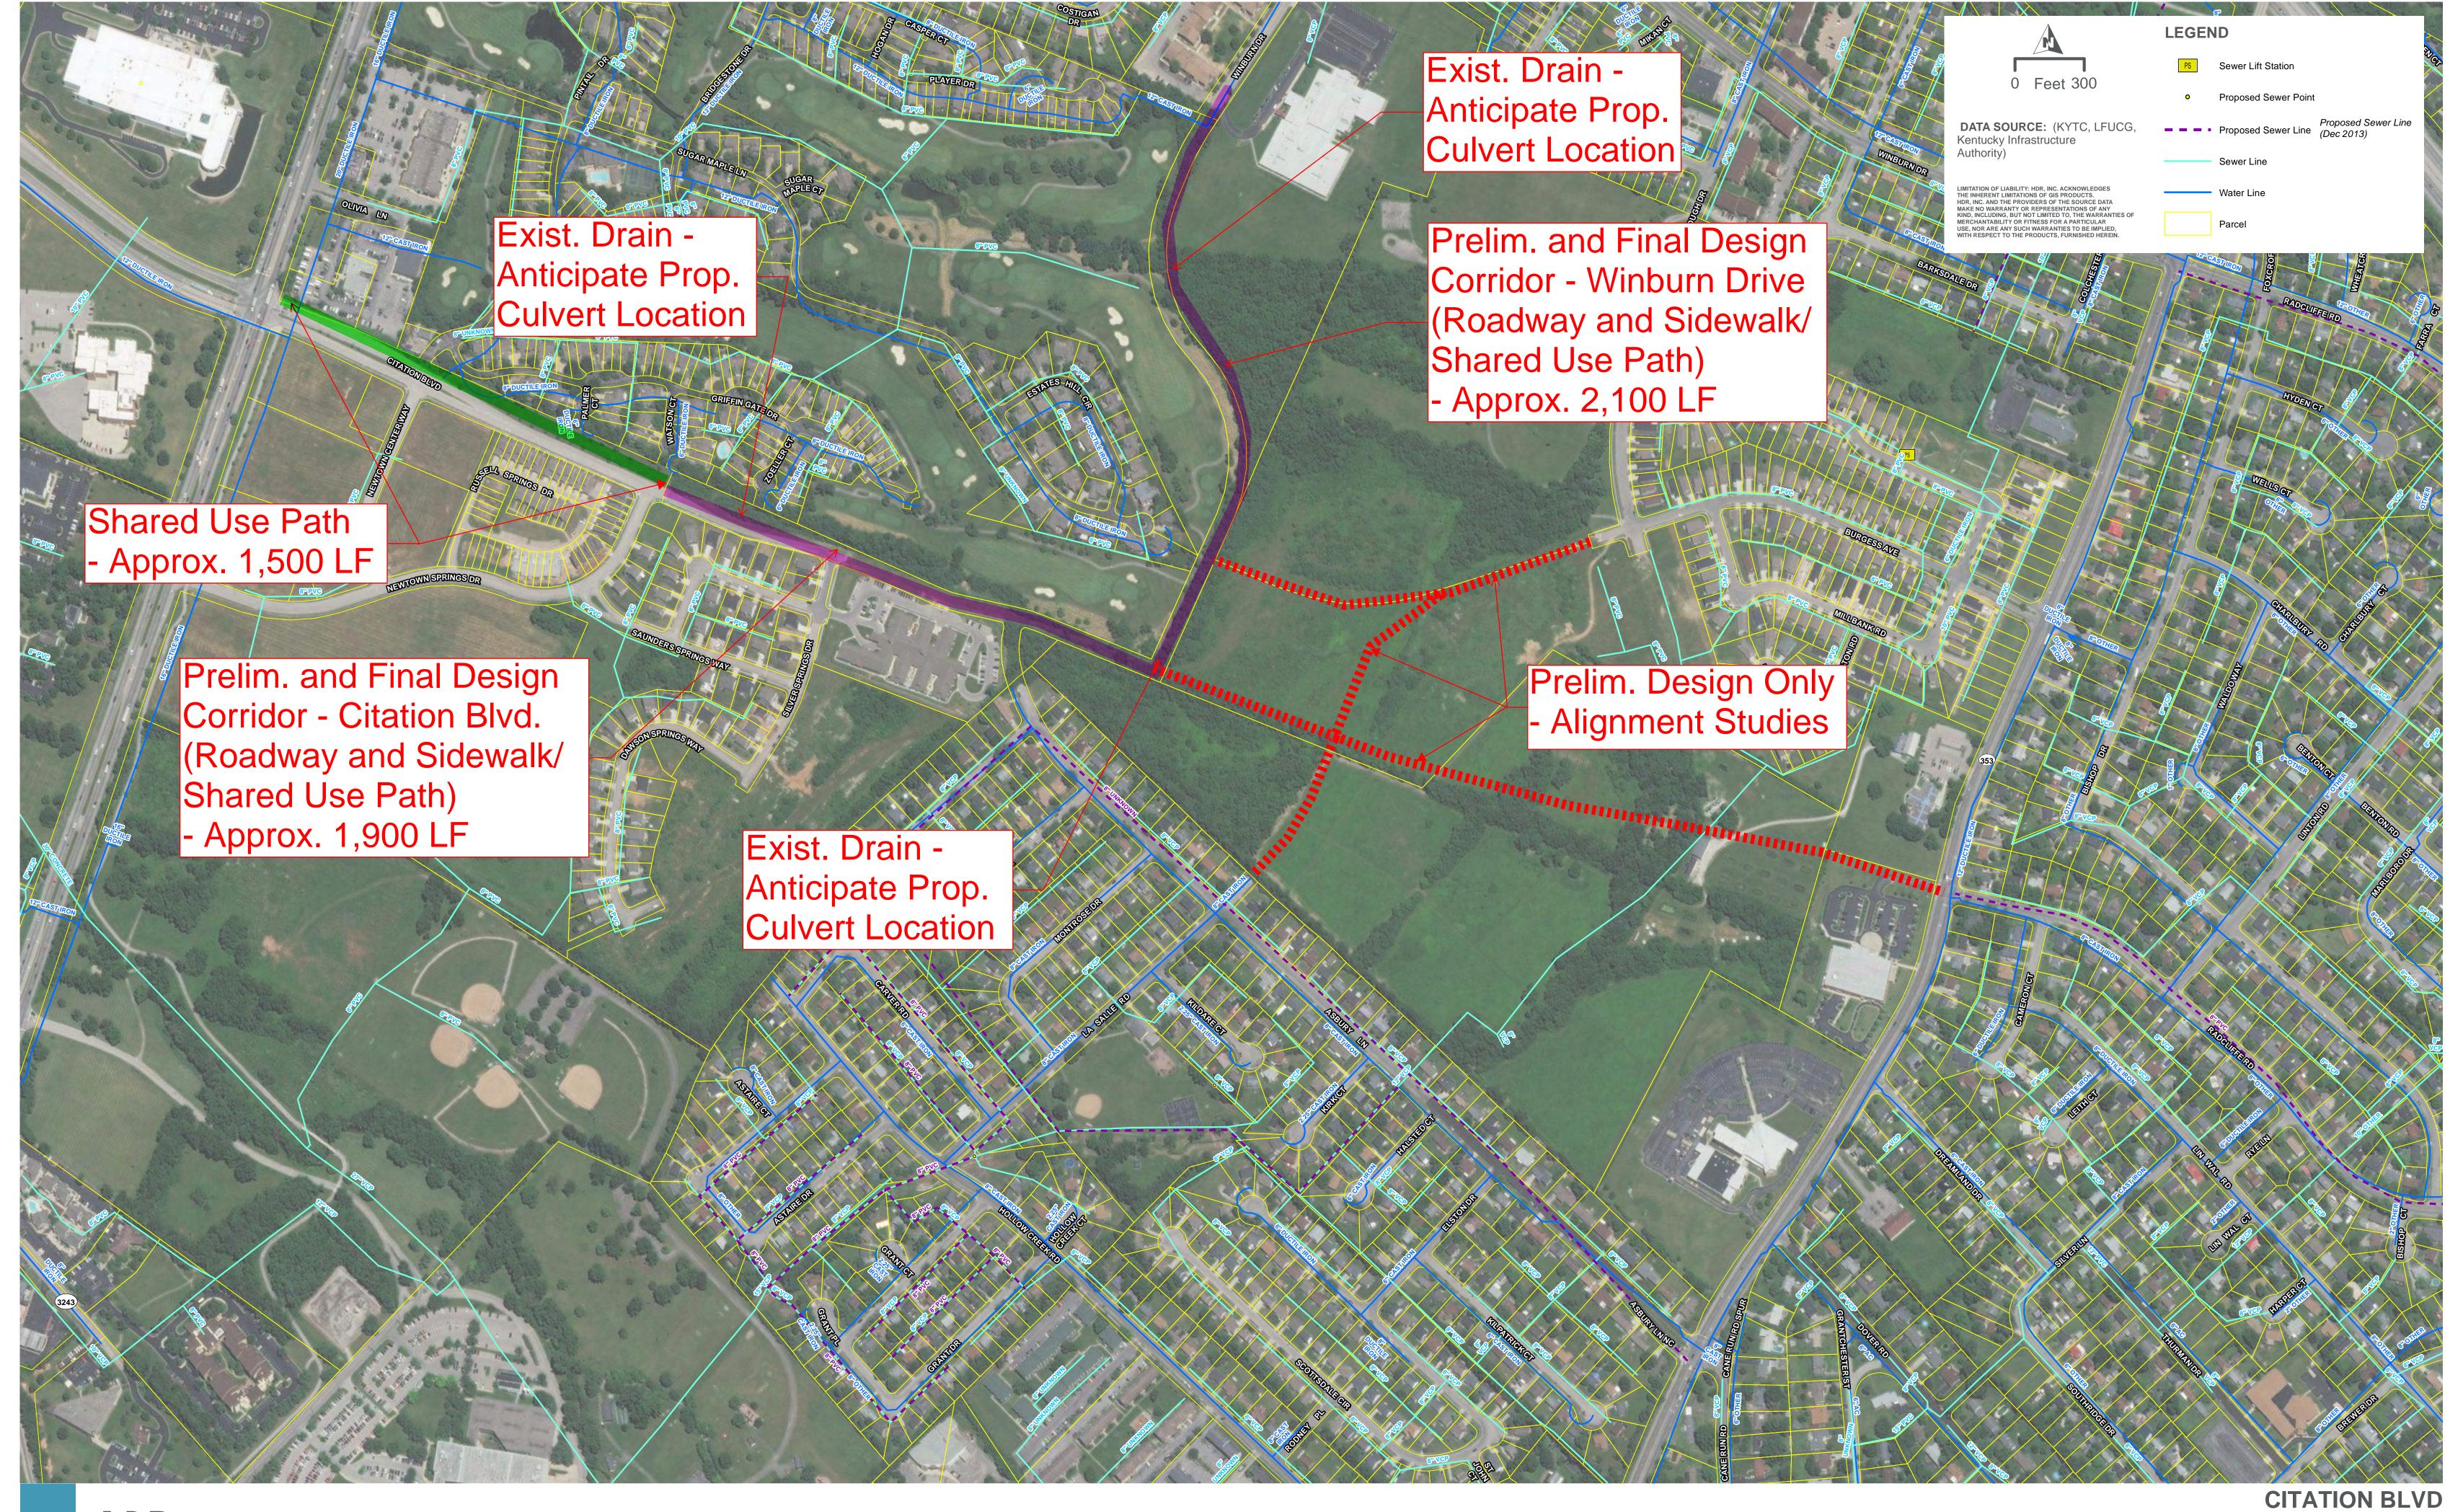

After receiving the notice to proceed on a project, HDR will assign a project engineer to the project. The project engineer will examine the project plans and data and prepare or review, as applicable, the proposed boring plan for the project. The project engineer will monitor drilling operations and provide instructions to ensure adequate samples are collected and appropriate field testing is performed. Soil and rock samples will be analyzed in our materials laboratory in Paducah, KY.

Laboratory testing and analysis will be performed in accordance with applicable AASHTO, ASTM and Kentucky methods, as specified in the current LFUCG geotechnical manual. Subsurface data will also be presented in the format specified in the LFUCG geotechnical manual.

Engineer's analyses and recommendations will include recommendations for pavement design, embankment stability analysis, foundation analysis for box culverts including settlement analysis and bearing capacity analysis. These operations will be conducted in accordance with current LFUCG procedures, manuals, specifications and protocols, as applicable.

# **Scope Includes:**

- 4 soundings +/- proposed roadway extensions
- 2 borings for cut/fill sections
- 1 boring for culvert
- 2 pavement cores
- Assumed bedrock depth is 15'
