The requested zone change to the Highway Services Business (B-3) zone and the Planned neighborhood Residential (R-3) zone is in agreement with the 2018 Comprehensive Plan, for the following reasons:

1. The requested zone change would allow for infill of a vacant property or underutilized site by adding residential and commercial land uses, which will also include pocket parks for use by future residential properties. This supports Theme A, Goal #2, Objective a, to identify areas for infill, and Objective c, to incorporate adequate greenspace and open space into the development for the intended population.
2. The requested zone change will create connectivity between residential and commercial developments both by pedestrian and vehicular access that connect to a major corridor. This supports

Theme A, Goal #3, Objective b, to strive for positive and safe social interaction, including connections for pedestrians and various modes of transportation; and Theme A, Goal #4, Objective c, to establish and promote road network connections in order to reduce police, fire and EMS response time. Connections between adjacent land uses are also supported by Theme D, Goal #1 to work to achieve an effective and comprehensive transportation system.

3. The requested zone change creates additional single family homes, townhomes and commercial businesses on a property that previously only contained one home, connects the neighborhood to the new commercial development, and will provide goods and services both to the nearby residential neighborhoods and for commuters along the Harrodsburg Road corridor. This supports Theme E, Goal #1 Objective c, to emphasize redevelopment of under-utilized corridors and Objective d, to maximize development of vacant land within the Urban Service Area.
4. The proposed development is context sensitive to the adjoining properties because it creates a transition in the intensity of land use, with the most intense commercial uses along the Harrodsburg Road corridor and the lower density single family dwelling units adjacent to the existing single family homes in the Palomar Hills neighborhood, which supports Density Policy #2 (A-DN2). The proposed commercial area will continue the existing neighborhood-serving commercial development along Harrodsburg Road, which supports Design Policy #12 (A-DS12).
