RE: 2021 CPSC Fire Safety Grant Final Report

Dear Ms. Martinez,

The Lexington (KY) Fire Department's 2021 CPSC Fire Safety Grant Program is coming to a close! I am happy to report that, despite several obstacles presented by the COVID-19 pandemic, the program was a great success! During our assigned period of performance of March 26, 2021 through August 30, 2021, we were able to finally meet face-to-face with 685 total people through a variety of seminars, classes, events, and activities. During those encounters, we provided them with the educational materials that were provided by CPSC. Please see the list of events below and the attached rosters that correspond to each event as verification that each event took place.

The educational material provided by CPSC served as a valuable resource for the members of our community. For instance, the "Smoke Alarms – Why, Where, and Which?" document helped reiterate our home fire safety messages that we use as part of our free smoke alarm installation program. It gave homeowners important information related to the smoke alarms that we were installing in their home. Similarly, the informational pamphlet about the dangers of carbon monoxide and the postcard related to generator use go hand-in-hand! They served as timely education during the recent stormy season.

As a result of our interaction with the community through seminars, classes, events, and more, we were able to speak to many citizens who come from diverse backgrounds. Because our community continues to experience fire-related injuries and fatalities, our goal in the Community Services Bureau is to provide education with the hope of reducing (or even eliminating) those tragic events. The material you provided has relevant graphics that are easy to understand, and we will use them long after this grant program is over. Thank you for allowing the Lexington (KY) Fire Department to participate in the 2021 CPSC Fire Safety Grant Program!

Please do not hesitate to let me know if you have any questions, comments, or concerns related to this final program report.

Respectfully,

Jordan Saas
Battalion Chief
