Program Name: Innovative Transitions with Homeless Emergency Department Patients

LFUCG Extended Social Resource Grant Program FY18 Funding: \$21,000 (\$10,500 per FY)

Program Summary: KY Appalachian Transition Services (KATS) began providing nurse transitions for patients at UK HealthCare that were at risk of readmitting to the hospital within 30-days of discharge in February 2015. The program’s success led to an expansion to UK Gill Heart Institute, Good Samaritan Hospital, UK Stroke Service and in June 2016 to UK Emergency Medicine (ED).

KATS is targeting frequent homeless ED users with medical and behavioral diagnoses to transition out of the ED and back into the community. The goal is to assist them with managing their health care conditions and psychosocial issues to prevent ED within 30-days of discharge. Although there are clinics and health services in the community for the homeless, KATS ensures a coordinated effort to improve health outcomes and reduce avoidable ED utilization.

Desired Outcomes for Clients: The KATS evidenced-based models of nurse transitions improves health outcomes, prevents avoidable hospitalizations and ED usage, enhances patient satisfaction and decreases healthcare costs. The KATS transition interventions are time limited for at-risk populations as they move from one level of care to another across multiple settings. The transition models emphasize coordination and continuity of care, prevention and avoidance of complications, improve individual management of their health care and setting interventions to achieve patient specific goals. The philosophy of the transition interventions is to empower patients to manage their health and behavioral conditions to reach positive outcomes. Coordinating care between the hospital, shelter and community agencies benefits the individual and prevents avoidable ED/hospital admissions.
