PROJECT PLAN ELEMENTS

- 1) ***DEVELOP ENVIRONMENTAL EDUCATION MATERIALS:*** Develop new and build upon existing curricula that focuses on water quality, stormwater issues, and water conservation. See 2) below for details on each program. Additional educational materials focusing on water quality and quantity that are to be developed include:
 - Printed teacher lesson plans and best practices for implementation in classrooms.
 - E-tips added to LASC web and Facebook sites.
- 2) ***INCORPORATE WATER QUALITY CURRICULA INTO EXISTING LASC PROGRAMS:*** Each of the established programs will have an area of focus on water quality, including:
 - a) ***Wonders on Wheels (WOW) – Wonderful Water:*** This program provides in-school, hands-on presentations. With funding from previous Stormwater Quality Incentive Grant programs, LASC was able to create “*Wonderful Water – the Chemistry, Cycles, and Conservation of Water*”, a presentation to take into the schools and with further development, will be presented as a part of this grant program. Activities will focus on Core Content in the sciences through presentations that are taken into schools, libraries and community centers within Fayette County. Title One schools will receive first opportunity to take advantage of these programs.
 - b) ***Science Explorers:*** This 12 week after school program is to be five Fayette County Elementary Schools. The lesson will focus on water for sustaining life, water sampling, testing, conservation and animal habitats as part of this program.
 - c) ***Urban Ecology:*** This five day program provided to 4th graders in four elementary schools will focus on the concepts in Kentucky’s Core Content for Science. Issues of conservation and water quality are taught through interactive games and hands on activities such as “stream in a bottle”, an activity which demonstrates the effects of pollution in a freshwater stream.
 - d) ***Family Fun Day:*** This program is a free day of hands-on art and science activities. The event is designed for the entire family to participate in art-making and science demonstrations. LASC anticipates it will present stormwater demonstrations on the Enviroscape and tours of urban rain gardens, stormwater cistern, and other areas.
 - e) ***Classes and Workshops:*** Throughout the year, the LASC offers classes for students from 18 months through adulthood. The classes are all structured in a variety of ways – from one day workshops to multi-session classes throughout the summer – and provide an avenue for many to learn more in a hands-on and participatory way.
 - f) ***Ongoing educational displays within LASC:*** LASC displays educational content throughout its building each year. These semi-permanent displays showcase a wide range of educational content for visitors to the LASC including three aquariums on display for public education.

PROJECT SUSTAINABILITY

- 1) The curricula and new program elements developed with this grant will be used in LASC programming for years to come.
- 2) LASC has dedicated personnel to plan and coordinate existing and future programs.

PROJECT SUCCESS MEASURES

- 1) LASC has established “full capacity” participation levels for each program and will track the numbers of participants in each program and event. LASC anticipates reaching over 6,000 children directly through WOW, Science Explorers, Family Fun Day, Urban Ecology, and regular classes and workshops. LASC also anticipates reaching an additional 12,000 to 15,000 through field trips and activities at LASC, website, and handouts.

- 2) Teachers involved with WOW, Science Explorers, Urban Ecology, and Professional Development will be provided program evaluations which will be reviewed and utilized for future program planning.
