## **DOCUMENTATION REQUIRED FOR GOOD FAITH EFFORTS AND OUTREACH PLANS**

As affirmed in Resolution Number 272-2024, the Urban County Council has adopted an annual aspirational goal of utilizing at least seventeen percent (17%) of public funds spend from certain discretionary agreements with certified Minority Business Enterprises (MBEs) and certified Woman Business Enterprises (WBEs); utilizing at least three percent (3%) of public funds from certain discretionary agreements with Certified Veteran-Owned Small Business and Certified Service-Disabled Veteran-Owned Small Businesses (VOSBs); and utilizing Disadvantaged Business Enterprises (DBEs) where applicable. Bidders should make every effort to achieve these goals.

Therefore, as an element of the responsiveness of the bid, all Bidders are required to submit documentation of their good faith and outreach efforts to ensure all businesses, including small and disadvantaged businesses such as minority-, woman-, and veteran-owned businesses, have an equal opportunity to compete for and participate in the performance of any subcontracts resulting from this procurement. Examples of good faith and outreach efforts that satisfy this requirement to encourage the participation of, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs include:

1. Advertised opportunities to participate in the contract in at least two (2) publications of general circulation media; trade and professional association publications; small and minority business or trade publications; and publications or trades targeting minority, women, and disadvantaged businesses not less than fifteen (15) days prior to the deadline for submission of bids to allow, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs to participate.
2. Attended LFUCG Procurement Economic Inclusion Outreach event(s) within the past year to meet new small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs to partner with on LFUCG contracts and procurements.
3. Attended pre-bid/pre-proposal meetings that were scheduled by LFUCG to inform small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs of subcontracting opportunities.
4. Sponsored Economic Inclusion event to provide networking opportunities for prime contractors and small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs.
5. Requested a list of certified small, DBE, MBE, WBE, VOSB and/or SDVOSB subcontractors or suppliers from LFUCG and showed evidence of contacting the companies on the list(s).
6. Contacted organizations that work with small, DBE, MBE, WBE, and VOSB companies for assistance in finding certified DBEs, MBEs, WBEs, VOSB and/or SDVOSBs to work on this project. Those contacted and their responses must be a part of the bidder's outreach efforts documentation.
7. Sent written notices, by certified mail, email, or facsimile, to qualified, certified small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs soliciting their participation in the contract not less than seven (7) days prior to the deadline for submission of bids to allow them to participate effectively.
8. Followed up initial solicitations by contacting small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs via tailored communications to determine their level of interest.

9. Provided the interested small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs with adequate and timely information about the plans, specifications, and requirements of the contract.
10. Selected portions of the work to be performed by small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs in order to increase the likelihood of subcontracting participation. This includes, where appropriate, breaking out contract work items into economically feasible units to facilitate small, DBE, MBE, WBE, VOSB and/or SDVOSB participation, even when the prime contractor may otherwise perform these work items with its own workforce.
11. Negotiated in good faith with interested small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs, not rejecting them as unqualified without sound reasons based on a thorough investigation of their capabilities. Any rejection must be so noted in writing with a description as to why an agreement could not be reached.
12. Included documentation of quotations received from interested small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs that were not used due to uncompetitive pricing or were rejected as unacceptable and/or copies of responses from firms indicating that they would not be submitting a bid.
  - a. Bidder has to submit sound reasons why the quotations were considered unacceptable. The fact that the bidder has the ability and/or desire to perform the contract work with its own forces will not be considered a sound reason for rejecting a small business', DBE's MBE's, WBE's, VOSB's and/or SDVOSB's quote. Nothing in this provision shall be construed to require the bidder to accept unreasonable quotes in order to satisfy the participation goals.
13. Made an effort to offer assistance to or refer interested small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs to obtain the necessary equipment, supplies, materials, insurance and/or bonding to satisfy the work requirements of the bid proposal.
14. Made efforts to expand the search for small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs beyond the usual geographic boundaries.
15. Other – any other evidence that the bidder submits that may demonstrate that the bidder has made reasonable efforts to include small, DBE, MBE, WBE, VOSB and/or SDVOSB participation.

Bidder must document, with specificity, each of the efforts it made to include small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs as subcontractors in the procurement, including the date on which each effort was made, the medium through which each effort was made, and the outcome of each effort.

**Note: Failure to submit the documentation requested in this section may be cause for rejection of bid. Bidders may include any other documentation deemed relevant to this requirement which is subject to review by the MBE Liaison. Documentation of Good Faith and Outreach Efforts must be submitted with the Bid, regardless of the proposed level of small, DBE, MBE, WBE, VOSB and/or SDVOSB participation in the procurement. If the Good Faith and Outreach Effort documentation is not submitted with the bid response, the bid may be rejected.**

#### OUTREACH EFFORTS EVALUATION

Outreach efforts demonstrated by the bidder or respondent will be evaluated on a pass/fail basis.

## **A. GENERAL INFORMATION**

- Work detailed in this Request for Bid is under the management of Lexington-Fayette Urban County Government's (LFUCG's) Division of Environmental Services (DES). The contact information for the DES Project Manager will be provided at the time of contract approval.
- Please note budget constraints, weather, sale of property, or other factors may occur at any time during a mowing season, which could cause a mowing area to be removed from a bid package or number of mows reduced. Conversely, sale or change in use of property may add or increase area to a bid package.
- This Request for Bid includes mowing of road rights-of-way (ROW), medians, lots, facilities, and water quality lots (including greenways).
- The scope of this work includes: (a) removing litter and debris; (b) mowing (turf and brush cut); (c) string trimming of slopes, fence lines, trees (where applicable), concrete medians, and other hardscapes; (d) edging; (e) removing grass/leaves from hardscapes via blowing, raking, or sweeping; (f) removing clippings blown into landscaped areas; and (g) removing excessively clumped vegetation (clippings and leaves) from vegetated areas.
- This scope of work does NOT include use of herbicide.
- Each of the nine (9) bid packages is a stand-alone package to be awarded separately. It is not LFUCG's intent to split any of the bid packages; however, LFUCG reserves that right should it be in the government's best interest.
- Bidders may choose to bid on one, some, or all of the nine (9) bid packages.
- Review the Mowing Specifications carefully. Failure to follow these specifications may result in delay of payment and/or contract cancellation.
- Review the Bid Package Detail Information and the provided Mowing Maps for valuable detail on the work locations. Bidders are encouraged to visit locations to view the work areas. NOTE: LFUCG will provide a notebook containing one hard copy set of detailed color maps to the Contractor selected for each bid package prior to the start of mowing.

## **B. MOWING SPECIFICATIONS**

### **B.1 Administrative**

- B.1.1 The mowing season will begin April 1<sup>st</sup> and end November 30<sup>th</sup>. These dates may be altered at the discretion of the Division of Environmental Services.
- B.1.2 This agreement shall be for a period of two (2) years with an option to renew for two (2) annual renewals if mutually agreed upon by both parties.

- B.1.3 The Contractor hereby agrees to indemnify and hold harmless LFUCG, its employees, and its agents, from any claims or demands whatsoever arising from the Contractor's performance under this contract.
- B.1.4 The Contractor shall keep in force at all times liability insurance in amounts specified herein. The Contractor hereby accepts responsibility for any loss or damage to property owned by LFUCG or the general public caused by the Contractor's employees or agents. Contractor shall replace or repair same at their own cost and expense in like kind and at the direction of the Division of Environmental Services. If damaged property resulting from the Contractor's operations must be repaired or replaced by LFUCG, the cost of such work shall be deducted from the Contractor's payment. Failure to maintain such insurance shall be cause for cancellation of this contract without notice.
- B.1.5 In the event that any trees, shrubs, or other landscaping is hit or damaged by activities associated with this contract, LFUCG's arborist shall inspect for damage and determine the impact to the plant's health. Should the arborist determine the tree or landscaping is damaged beyond repair, the estimated replacement value of the trees, shrubs, or landscaping shall be deducted from the Contractor's payment.
- B.1.6 This contract may be cancelled by either party by delivering written notice of intent to cancel to the other party not less than 30 days before the proposed date of termination. Written notice to LFUCG should be sent to the Division of Procurement.
- B.1.7 LFUCG may cancel this contract without notice if the Contractor fails to perform the services herein. In the event of such cancellation, LFUCG may make arrangements as it deems necessary to secure the services specified.
- B.1.8 LFUCG reserves the right to remove a mowing area from a Contractor with five (5) days notice. The bid amount for the package will be reduced by the Contractor's Price per Acre (from the Price Sheet) multiplied by the area removed.
- B.1.9 The failure of either party to insist on strict performance of any of the terms or conditions of this contract shall not be construed as a waiver of the right to insist upon strict enforcement of such provisions in the future.
- B.1.10 LFUCG reserves the right to either offer Contractors additional mowing acreage on existing bid packages based upon geographic location (e.g., North, Southwest, etc.) or seek services from available contractors on the approved list. Pricing shall be computed based upon the Contractor's Price per Acre for that bid package.
- B.1.11 Acreages provided in the bid package information are calculated by delineating areas on LFUCG's Geographic Information System (GIS) and shown on the attached maps. It is the responsibility of the Contractor to review each location

visually prior to submitting a bid to verify mowing area, topography, site constraints, etc. The Contractor is responsible to mow and maintain all of the area listed on the tables and shown on the attached maps (except as described in B.3.10 or B.3.13). Bid package acreages are computed based upon these maps. Delineated areas are based upon GIS parcel line data and visible fence lines. Typically, fence lines provide a visual boundary for ROW mowing. In areas with no fence, the shaded map areas serve as a guide for helping determine the extent of the ROW. This is particularly important on slopes or at bridges, which may be located in wide ROW areas. In some cases, "no mow zones" are accounted for on the maps, but in other locations, "no mow zones" are not accounted for on the maps and must be located in the field.

B.1.12 Selected contractors shall be prepared to meet the following mowing schedule, evenly staggered to minimize excessive clumping, and provide for a manicured look. Weather conditions may affect the scheduled mows (i.e., dry weather in the summer will likely result in skipped cuts, while wet weather in the spring may require weekly cuts). Funding impacts types of areas differently. Contractors should only bid on packages for which they have adequate resources to meet this schedule and for which they can handle the longer than optimal time periods between mows due to budget constraints.

**Estimated Number of Cuts by Portion of Growing Season**

Activity	April - June	July - November	Notes
Turf Mowing	9 mows	10 mows	Depends upon budget constraints, funding source, and weather conditions

B.1.13 The estimated number of cuts per season provided in the above table is not a guarantee of work. Number of cuts is variable and will be determined by the Division of Environmental Services each month depending upon weather and budgetary constraints. A contractor shall not exceed the number of agreed upon mows. LFUCG shall not pay for unauthorized cuts.

B.1.14 LFUCG may request additional cuts due to special events or other unforeseen circumstances. Contractor is to respond to additional cut requests as soon as possible but no longer than 48 hours. Verified weather conditions at mowing locations may extend contractor response time.

B.1.15 Bidders shall include with their proposal all of the requested information listed in Section E.

B.1.16 Bidders shall allow personnel from the Division of Environmental Services and/or the Division of Procurement to inspect the Contractor's equipment and signage prior to the contract being awarded. The Contractor's equipment must be well maintained to operate safely on public property with all appropriate safety guards. If the Division of Environmental Services and/or the Division of Procurement

substantiates that a Contractor's equipment and/or signage does not meet the specification requirements, the Contractor will be eliminated from the bidding process. Inspection results that vary from the submittal information may result in modification (loss or gain) to assigned bid packages.

- B.1.17 The equipment and signage resources, references of past experience with the bidder, previous experience in past mowing contracts with LFUCG, and bidder personnel resources will all be factored into the placement of a contractor with each bid package. The number of bid packages any given contractor receives will be based on bids as well as the level of resources (i.e., equipment and personnel) of each low bidder. Work shall be allocated commensurate with bidders' resources.
- B.1.18 This contract may not be sub-contracted in whole or in part without approval of LFUCG. A copy of any proposed sub-contract shall be submitted, prior to its execution, to LFUCG's Divisions of Procurement and Environmental Services for approval. The Contractor shall remain responsible for the performance of the contract and the Contractor shall be liable for compliance by any sub-contractor with the terms of this contract. If a sub-contractor is terminated by the Contractor, the DES Project Manager shall be notified immediately.

## **B.2 Types of Mowing and Definitions**

- B.2.1 Turf mowing with a finishing (i.e., lawn) mower shall be used for the vast majority of the work in this scope. Turf mowing shall provide a clean cut to a **height of 3-4 inches**.
- B.2.2 Brush cut mowing may be used in the bottoms of detention basins or wet greenway areas, in areas where honeysuckle stumps exist, or on roadside sections (i.e., not medians or within 10 feet of sidewalk) of the Citation-Iron Works Bid Package. Brush cut mowing shall provide a clean cut to a **height of 4-5 inches unless requested otherwise**.
- B.2.3 String trimming / weed-eating shall consist of using a string trimmer to cut slopes, around hardscapes, concrete joints, gutter lines, fence lines, and areas that a mower cannot maintain due to stumps or other obstructions.
- B.2.4 Edging shall consist of using a stick edger or string trimmer to create a vertical edge of grass at a curb line or a sidewalk or parking lot edge.
- B.2.5 Terms:
- Hardscapes - any asphalt or concrete surface including but not limited to sidewalks, curbs, gutters, parking lots, roads, etc.
  - Litter / Debris - items that have been discarded, washed, or blown into a work area such as tires, plastic, paper, metal, glass, cans, bottles, etc. Includes

fallen or disposed of brush or limbs up to 6” in diameter. Also includes large rocks and broken off pieces of asphalt or concrete.

- No Mow Zones - areas along streams and drainage areas that will not be mowed. Most of these areas have been planted with native riparian species and are maintained by horticultural contractors. These areas are not to be mowed. Most no mow zones are denoted by green or white thin vertical stakes marked with “stream buffer” or “no mow zone” or by the placement of large rocks or logs at the edge of the zone.
- Obstacles - any objects that stand in the way or holds up the mowing process. This may include but is not limited to, sign posts, light posts, fences, guard rails, headwalls, utility boxes, bridge end abutments, trees, and landscape plantings.
- Rights-of-Way (ROW) - for the purposes of this scope, ROW refers to the public areas along the sides of roads, as a way to differentiate from medians.

### **B.3 Specifications for Mowing**

- B.3.1 Practice safety first. All safety measures, equipment, guards, and chutes shall be in place while mowing. Always mow with the safety of the operator, others, vehicles, and property in mind. Contractors are required to follow OSHA and Department of Transportation regulations regarding employee safety.
- B.3.2 All mowing along roadways shall follow all requirements for traffic control and traffic control devices of the MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (MUTCD), published by the Federal Highway Administration.
- B.3.3 Contractor employees must wear HI VISIBILITY clothing (i.e., vest, shirt, or jacket) and proper attire remaining fully dressed during the performance of all work under this contract, whether in a roadway or not. Working without HI VISIBILITY clothing, a shirt, or appropriate closed toe protective footwear is strictly prohibited. Violations of this policy may result in temporary suspension of mowing operations, removal from bid packages, and/or cancelling of the contract.
- B.3.4 Public roads, walkways, and sidewalks shall not be blocked to vehicular or pedestrian traffic while performing mowing operations.
- B.3.5 All mowers used for mowing ROW and medians shall be fitted with mulching blades with the discharge pointing down AND chutes blocked to eliminate projection of grass or debris onto streets. No mowers shall be used on medians and ROW that do not have these protections in place. Blowing grass and debris into the road is a hazard for people and property and will not be tolerated.

B.3.6 All mowing associated with this contract, except areas listed in B.3.7, shall be turf mowing to a grass height between 3 and 4 inches. Cutting too short is prohibited. Scalping shall be avoided.

B.3.7 Brush cut mowing or string trimming may be used instead of turf mowing in the bottom areas of detention basins, in areas where honeysuckle stumps exist, on steep slopes, or on roadside sections (i.e., not medians or within 10 feet of sidewalks) of the Citation-Iron Works Bid Package. Brush cut hog mowing shall provide a clean cut to a height of 4 to 5 inches.

B.3.8 Edging is required to varying degrees depending upon location, as follows:

- Curb lines and sidewalks on Lots, Water Quality Lots, and Facilities shall be initially edged with a stick edger or similar device, and the edge kept clean over time by use of a string trimmer or edger as needed to prevent grass/weeds from growing across the curb or sidewalk.
- Curb lines and sidewalks on Medians and ROW shall be kept clean by string trimming or edging to eliminate grass/weeds growing horizontally across the curb or sidewalk.

B.3.9 This contract requires the Contractor to maintain a clean manicured appearance within the entire mowing area including steep slopes, and includes cutting of weeds and grass via string trimming at the base of fence lines, in joints and cracks, and around obstacles such as utility poles, guardrails, fences, buildings, steps, and headwalls. This includes string trimming and/or blowing or brooming (reminder: no herbicide shall be used) to remove sediment and vegetation growing in:

- gutter lines (i.e., the 90 degree angle where the vertical curb ends and the gutter begins),
- gutter joints (i.e., the joint between the concrete gutter and the road asphalt pavement), and
- joints and cracks on concrete medians, sidewalks, and parking lots.

Care shall be taken not to mar obstacles or damage concrete joints or further damage failing concrete/asphalt. In such areas, the Contractor may ask for assistance from LFUCG in controlling weeds.

B.3.10 There are some areas of ROW that currently have overgrowth of honeysuckle or invasive pear trees which prevent mowing. These invasive shrubs/trees are in the process of being removed by DES staff from all mowing areas in this contract. Areas which have had these invasives removed or cut to the ground shall be mowed as part of this contract starting with the first mow in April. **In general, stumps are cut to 1-3" from the ground, but higher stumps could remain. The Contractor is required to string trim or brush cut mow these areas.** To control re-growth, any sprouts growing from previously cut stumps are to be mowed. In addition, the Contractor is required to immediately begin mowing

areas once shrubs/trees are removed going forward throughout the period of the contract. The bid package areas are computed based assuming all honeysuckle/pears have been removed and the entire corridor or lot is mowable from fence to fence. (Note: This primarily applies to detention basins, and corridors such as Man O War Blvd, Alumni Drive, Citation Blvd, and Armstrong Mill, where honeysuckle removal operations are currently ongoing, but other areas may also be affected over the course of the contract. If a corridor has honeysuckle, bidders should expect that this condition will occur at some point during this contract.) In areas where the honeysuckle is yet to be removed, the Contractor shall mow up to the edge of the shrubs.

B.3.11 All mowing shall be performed to minimize and/or eliminate projection of grass onto hardscapes, sidewalks, trails, or gutters. All grass clippings shall be removed from hardscapes, including out of gutter lines, by blower, broom, rake, etc., prior to leaving the work site. Shred and spread all excess clumps of grass. Reduce mowing speeds to reduce clumping of grass. Mowing blades are to be sharp to prevent tearing of grass and minimize clumping. In the case of excessive grass clippings or other material which could kill the grass underneath, or cause a stormwater blockage or other potential problem, the Contractor shall remove it from the site and properly dispose of it.

B.3.12 At no time shall the Contractor allow mowed clippings or litter or debris to be blown, swept, or raked into any planting bed, tree mulch ring, gutter, storm drain, yard inlet, curb inlet, drainageway, swale, or creek.

B.3.13 All designated "no mow zones" shall be off limits to mowing and string trimming. No Mow Zone locations are denoted in Section C. The Contractor will be informed if additional No Mow Zones are added.

B.3.14 Trees, shrubs, and landscaping shall be protected at all times.

- ROW and Medians: Most, if not all, planted trees in these areas will have been protectively mulched by the Division of Environmental Services prior to the start of mowing operations. This mulch is placed in part to keep mowing equipment from coming too close to the trees and to eliminate the need for string trimming. Contractors shall mow to the edge of the mulch (i.e., no grass left uncut next to the mulch). If there are trees that are not mulched, the Contractor shall stay two feet (2') away from the tree trunks to avoid hitting the trees or branches. No string trimming is required around these planted trees on ROW and medians; DES will maintain these areas. Volunteer (i.e., not planted) trees along roadways shall be carefully string-trimmed around to reduce unsightly high vegetation. In such cases, avoid nicking trees or removing bark.
- Lots and Water Quality Lots/Greenways: The Contractor shall keep mowing operations two feet (2') away from landscaping and mulched and/or smaller trees. All Contractor employees must be trained in the proper methods of

string trimming without hitting tree trunks and branches. The Contractor shall carefully string trim around larger (> 8" diameter), established trees in these areas to a height of 6-8" only to knock down high weeds/grass to maintain a clean appearance. (It is LFUCG's preference to leave some higher grass around a tree rather than damage a tree.) String trimming should be done in a fashion that avoids nicking trees or removing bark. If there are trees that the Contractor is concerned about damaging, they should contact the Project Manager. String trim up to mulched areas or clearly defined planting beds or trees maintained by others.

- Facilities: The Contractor shall keep mowing operations two feet (2') away from landscaping and trees. The Contractor shall carefully string trim, only if needed, around trees or landscaping in these areas to a height of approximately 6" to address unsightly high grass/weeds. String trimming should be done in a fashion that avoids nicking trees or removing bark. If there are trees that the Contractor is concerned about damaging, they should contact the Project Manager. The Contractor shall carefully string trim around landscaping and trees, avoiding hitting them with the string.
- The Contractor shall not blow grass clippings onto planter beds, landscaping, or mulch rings.

B.3.15 In some locations, abutting property owners may mow parts of a bid package. In those locations, the Contractor may skip over these areas as long as they are being maintained meeting the quality of this scope. If a Contractor notices a location in a bid package (e.g., a stand-alone median) that is clearly being maintained by someone else, the Contractor is obligated to inform the Project Manager for consideration for removal from the contract mowing list.

B.3.16 The following activities are **not** included in this contract and will be handled by others:

- Weed pulling / maintenance of landscaping beds, trees, and mulched areas
- Use of herbicide

#### **B.4 Litter and Debris Removal**

B.4.1 This operation shall include the **removal** of **all** litter, yard signs, and/or debris from all designated mowing areas including landscaped areas, hardscapes, curbs and gutters, and storm drain inlets **prior to mowing**. **No litter, grass, leaves, or debris shall be placed, pushed, or blown into storm drains.** Failure to remove litter, etc. prior to mowing; failure to remove mowed-over trash; and/or placing trash/grass in a storm drain is a violation of this contract and may result in removal from bid packages and/or cancelling of the contract. Contractor shall track the number of trash bags collected during each mowing cycle per bid package and submit this information with each invoice.

- B.4.2 The Contractor shall be responsible to remove and dispose of limbs smaller than six inches (6") in diameter. Contact the Project Manager to remove larger limbs. Contact the Project Manager to pick up litter/debris clearly resulting from dumping or larger items such as shopping carts or furniture.
- B.4.3 If the Contractor comes across any debris that appears to be illegal in nature (e.g., weapons, drugs, explosive devices, etc.), leave in place and immediately contact 911 and the Project Manager. If the Contractor comes across a chemical or other illicit spill, leave in place and immediately contact the Project Manager who will forward the request for investigation to the Division of Water Quality.
- B.4.4 Contractors shall ensure all staff working on this contract are fully trained in OSHA regulations and guidelines related to mobile meth labs, blood-borne pathogens, and proper procedures when encountering discarded needles or blood-soaked materials. All litter crew vehicles shall keep a Sharps Disposal Container marked as Biohazard. Needles or similar items shall be placed in Sharps Disposal Containers and properly disposed of as Biomedical/Biohazard waste following all local, state, and federal laws and regulations.

### **B.5 Specifications for KYTC Mowing**

The city serves as a contract mower for the Kentucky Transportation Cabinet (KYTC). These areas are designated as "KYTC" in the tables. Specifications of the KYTC for mowing in these areas are listed below and apply to mowing in all KYTC areas. Failure to meet the following traffic control requirements of KYTC when mowing in their areas is equivalent to failure to meet the specifications of this contract, and may result in removal of the area and/or termination of the contract.

- Perform Right-of-Way Mowing and Trimming Operations in accordance to these Terms and Conditions for traffic control. Maintain traffic and furnish all traffic control devices and all materials that conform to these Terms and Conditions and the Manual on Uniform Traffic Control Devices (MUTCD), the Standard Drawings or Sepia Drawings, Current Editions, and the Standard Specifications for Road and Bridge Construction, Current Edition.
- A link to the Manual on Uniform Traffic Control Devices can be found at: <http://mutcd.fhwa.dot.gov>
- A link to the Standard Drawings can be found at: <http://transportation.ky.gov/Highway-Design/Pages/2012-Standard-Drawings.aspx>
- A link to the Standard Specifications can be found at: <http://transportation.ky.gov/Construction/Pages/Kentucky-Standard-Specifications.aspx>
- All temporary traffic control devices and retrofitted equipment required for execution of services for this project shall comply with MUTCD standards.

- Provide flags that are fluorescent red/orange in color, 24 inches by 24 inches in size, and that are made of a heavy-duty nylon reinforced coated vinyl material that has weighted edges (See Drawings).
- Provide warning signs that conform to Section 112.02.04 of the Standard Specifications.
- Furnish all traffic control devices in new or in like new condition at the beginning of the work and maintain the devices in like new condition until the completion of the work.
- Require employees to wear safety vests that conform to OSHA regulations on the job site at all times.
- Maintain the flow of traffic in all lanes at all times. The Department will not allow lane closures for the performance of right-of-way mowing on this contract project; however, mobile lane closures will be allowed for tramming mowing equipment across bridges. Perform mowing operations with the flow of traffic when operating within twenty feet of the edge of the pavement (edge-line of the driving lane).
- Do not perform mowing operations with a mowing unit attachment extending past the unit into a traffic lane or onto a paved shoulder. When moving mowing equipment (tramming) from one location to another within the project limits, operate the equipment with the flow of traffic on the shoulder or in the median. However, where the shoulder on a bridge is not full-width and any other method of passage across the bridge is impractical, mobile lane closures will be allowed for tramming the mowing equipment across the bridge. Use extreme caution when utilizing mobile lane closures to cross highway bridges.
- Perform all work only during daylight hours (one-half hour after dawn to one-half hour before dusk). Do not perform work when headlights would interfere with the normal flow of roadway traffic. Failure to comply with this requirement will result in an immediate suspension of all work operations. Operations will remain suspended until approval has been given by the Department for work operations to continue.
- Do not tram (move from one location to another) mowing equipment on the pavement or on the shoulder surface from one contract project to a second contract project on a fully controlled access highway facility (i.e., interstate or parkway route). Any occurrence of this action is in violation of state statute, and if observed, will result in an immediate suspension of the tramming operation. Operations will remain suspended until an alternative method of transporting the mowing equipment is secured and approval is given by the Department for the equipment to be moved by the alternative method.
- Provide warning signs that are 48 inches by 48 inches in size, diamond shaped with black Series "C" letters 8 inches in height on an orange background with a black border. Place warning signs with the message "Begin Mowing Zone" four of each and with the

message "End Mowing Zone" four of each to designate a mowing work zone on a multi-lane median divided highway facility.

- Where the highway facility is not median divided place two each of "Begin Mowing Zone" signs and two each of "End Mowing Zone" signs to designate the mowing work zone.
- Establish a designated work zone(s) for mowing that is a maximum of two miles in length. Place the warning signs 750 feet prior to the beginning of the work zone and 750 feet beyond the end of the work zone.
- Establish additional two-mile work zones adjacent to the initial work zone to a maximum distance of eight (8) miles, provided work is being performed in each adjacent work zone. As an option, place a supplemental plate with the message NEXT [2, 4, 6, or 8] MILES below the initial warning sign, or with a message to correspond with the length of the work zone that has been established.
- Place warning signs on a median divided highway facility in a dual manner, one on the outside shoulder and one in the median, or inside shoulder of the roadway at both the beginning and ending points of the designated work zone for both directions of travel.
- Where the roadway is not a median divided highway facility, place warning signs on the right and left shoulders of the roadway at both the beginning and ending points of the designated work zone for both directions of travel.
- Place warning signs on the entrance ramp of any interchange or roadway intersection that is located within a designated work zone and place the signs on the right shoulder of the ramp or side road 500 feet prior to the beginning of the merge area or intersection. Where the length of the entrance ramp is less than 500 feet, place the warning signs at the beginning of the ramp.
- Mount warning signs on multi-leg stands in a secure and visible manner such that the signs will be a minimum of eighteen inches (18") above the shoulder or roadway pavement.
- Where the paved shoulder area adjacent to a median barrier wall on a multi-lane median divided highway facility is not of sufficient width to place warning signs in a proper manner, place the warning signs atop the median barrier wall for both directions of travel. Achieve this placement by using a clamping device approved by the Department. Do not attach warning signs to other roadway appurtenances that exist on the project such as signposts, delineator posts, or guardrail end treatments.
- Use a full complement of warning signs at all times. Place the warning signs to designate a work zone on the job site at the beginning of each workday prior to the beginning of work operations. Move the warning signs and re-establish a work zone as

work operations progress. Remove warning signs from the job site after work operations cease at the end of each workday.

- Place warning signs that are 24 inches by 48 inches with black Series “C” letters eight inches in height on an orange background with a black border on vehicles designated as work zone support vehicles. Provide the designated message “Watch for Sudden Stop” on the signs.
- Failure to place warning signs in a manner consistent with these Traffic Control Terms and Conditions will result in a suspension of work operations. Operations will remain suspended until signing consistent with the Traffic Control Terms and Conditions are achieved and approval is given by the Department for work operations to resume.
- Move Contractor Vehicles and Contractor Employee Vehicles with the flow of traffic at all times. Enter and leave work areas in a manner that will not be hazardous to or interfere with the normal flow of traffic. Do not park or stop vehicles except within designated work areas as approved by the Department. Prohibit vehicles from crossing the roadway. Limit all employee pedestrian movement on the roadway to the protected work zone areas. Park personal vehicles only in areas within the right-of-way as designated by the Department.
- Coordinate the work with other projects that may be in progress within or in the near vicinity of this project. The traffic control of those projects may affect this project and the traffic control of this project may affect those projects. Coordinate the work on this project with the work of the other contractors. The Department will determine the relative priority to give to work phasing on the various projects when there is a conflict.
- Designate a Traffic Control Coordinator in accordance to Section 112.03.12 of the Standards Specifications.

## **B.6 Invoicing, Inspection, and Tracking**

B.6.1 Payment Terms are Net 30 from date of invoice.

B.6.2 Invoices must list the full Contractor name and address, LFUCG address and contact, locations serviced, date or date range of service, # of trash bags collected, and reference the purchase order number. Because roads, water quality areas, and facilities are paid with different accounts, these should be listed out separately. The mow number(s) for the season shall be listed on the invoice for each line (e.g. Mow #1 KYTC, Mow #1 Local Roads, Mow #1 WQ, Mow #1 Facilities). Invoices can be for a single cut, multiple cuts, or monthly. DES will provide an invoice template upon request.

B.6.3 Invoices must be sent separately for each Purchase Order (if there are multiple purchase orders).

- B.6.4 Failure to meet the requirements of the scope specifications, including string trimming, edging, blowing off hardscapes, picking up litter, etc. will result in delay of payment until all work is completed to the satisfaction of LFUCG. Recurring issues with partially completed work will not be tolerated and will result in reduction of mowing area, removal from bid packages, and/or cancelling of the contract.
- B.6.5 Invoices shall be emailed to the Project Manager for review, inspection, and processing.

Please include invoice # and area in subject line of emails. Please follow the following naming convention for invoices and email attachments:

Company Name\_Invoice#\_Bid Pkg  
Ex.: HR Mowing\_1105\_North 1

- B.6.6 Work sites will be inspected by LFUCG personnel prior to approval of invoices for processing.
- B.6.7 The Contractor shall create a mowing route for each bid package. The Contractor shall track mow dates on a spreadsheet that lists each location in the bid package and the date mowing occurred. This table shall be emailed to the Project Manager on a weekly basis upon request.

### **B.7 Insurance - See Attached Risk Management Provisions**

- B.7.1 The Contractor shall be required to submit a Certificate of Insurance coverage as required by the Risk Management Provisions.
- B.7.2 Submission Requirements:  
The Contractor shall furnish before the contract is awarded a Certificate of Insurance to the Division of Procurement. The Contractor shall also be required to submit updated insurance certificates quarterly to the Project Manager or Program Manager Sr. for compliance purposes. Valid Certificates of Insurance shall be maintained by the Contractor throughout the term of this Contract and any renewal thereof. Original copies of the insurance policy, with all endorsements, shall be provided upon request. Failure to comply with this Section shall constitute an event of default under this contract.
