Exhibit 1

Amendment to the Environmental Education Coordination Scope of Work

Agreement with Kentucky Association, Resolution #232-2021 / RFP #04-2021

Addition of Sustainability

Beginning in FY23 and extending through FY24, new units of study for each of the grade bands (K-1, 2-3, 4-5, middle school and high school) will be added to support and promote the city's sustainability efforts. Development of those lessons will begin in FY23. Following approval by the Public Information and Engagement Senior Program Manager, along with the Senior Program Manager for Sustainability, the lessons will be implemented beginning in the 2023-2024 school year.

Sustainability will also be incorporated in the Teachers' Environmental Academies planned for the summer of 2023 and anticipated in the summer of 2024.

Expansion of Transportation

Beginning in FY23 and extending through FY24, the education coordination contract will include expanded transportation outreach efforts. Specific examples include youth summer bike safety camps plus bike safety lessons at schools starting in the 2023-2024 year. Safety City will continue to be an important partner, though the nature of that partnership may evolve.
