EQUAL OPPORTUNITY AGREEMENT

The Law

Title VII of the Civil Rights Act of 1964 (amended 1972) states that it is unlawful for an employer to discriminate in employment because of race, color, religion, sex, age (40-70 years) or national origin.

Executive Order No. 11246 on Nondiscrimination under Federal contract prohibits employment discrimination by contractor and sub-contractor doing business with the Federal Government or recipients of Federal funds. This order was later amended by Executive Order No. 11375 to prohibit discrimination on the basis of sex.

Section 503 of the Rehabilitation Act of 1973 states:

The Contractor will not discriminate against any employee or applicant for employment because of physical or mental handicap.

Section 2012 of the Vietnam Era Veterans Readjustment Act of 1973 requires Affirmative Action on behalf of disabled veterans and veterans of the Vietnam Era by contractors having Federal contracts.

Section 206(A) of Executive Order 12086, Consolidation of Contract Compliance Functions for Equal Employment Opportunity, states:

The Secretary of Labor may investigate the employment practices of any Government contractor or sub-contractor to determine whether or not the contractual provisions specified in Section 202 of this order have been violated.

The Lexington-Fayette Urban County Government practices Equal Opportunity in recruiting, hiring and promoting. It is the Government's intent to affirmatively provide employment opportunities for those individuals who have previously not been allowed to enter into the mainstream of society. Because of its importance to the local Government, this policy carries the full endorsement of the Mayor, Commissioners, Directors and all supervisory personnel. In following this commitment to Equal Employment Opportunity and because the Government is the benefactor of the Federal funds, it is both against the Urban County Government policy and illegal for the Government to let contracts to companies which knowingly or unknowingly practice discrimination in their employment practices. Violation of the above mentioned ordinances may cause a contract to be canceled and the contractors may be declared ineligible for future consideration.

Please sign this statement in the appropriate space acknowledging that you have read and understand the provisions contained herein. Return this document as part of your application packet.

Bidders

I/We agree to comply with the Civil Rights Laws listed above that govern employment rights of minorities, women, Vietnam veterans, handicapped and aged persons.

PRIVACY FENCING

Work for this section consists of furnishing and installing wood privacy fencing (type as specified by the Purchase Order) and shall match existing privacy fencing as closely as possible, and shall include all labor, materials, equipment and incidentals necessary to complete the work.

Materials: All materials shall be treated wood, or wood of natural resistance to decay and shall be construction grade 2 or better.

1. Fence posts for a five to 6 $\frac{1}{2}$ foot fence shall be a four inch by four inch wood post. Fence posts shall consist be spaced on a maximum of eight feet on center. Fence posts for a fence over 6 $\frac{1}{2}$ feet to eight feet shall be spaced a maximum of six feet on center. If a four inch by six inch post is used then spacing can be eight feet on center.
2. Four inch by four inch wood fence posts shall be set in a minimum ten inch diameter concrete pier, extending two feet deep. Four inch by six inch posts shall be set in a minimum 12 inch diameter concrete pier, again extending a minimum of two feet deep.
3. Any wooden stockade style fence five feet to 6 $\frac{1}{2}$ feet that is visually nontransparent shall have a minimum of three two-inch by four inch rails. Any

wooden stockade style fence over 6 ½ feet to eight feet that is visually nontransparent will have a minimum of four two-inch by four-inch rails.

4. Vertical wooden fence boards or pickets shall be a minimum of one inch in thickness and all pickets shall be spaced such that a sphere four inches in diameter cannot pass through.
5. All measurements for fence materials are nominal measurements in accordance with generally accepted industry standards.
6. The exposed framing for a single sided fence should face the interior of the yard. This prevents others from climbing up the fence rails to view or access enclosed property. Rails should be attached to post with at least two minimum 5/16 diameter by 3.5 inch length bolts at each connection point. The use of bolts instead of nails increases the likelihood that the rails will remain in place.
7. Wooden fence boards or pickets should be attached with at least two minimum 1.5 inch length screws at each rail, per board or picket. While nails tend to come loose over time, screws tend to remain in place, thus lessening the time spent making fence repairs.
8. Fence posts must be set in a concrete pier. It is recommended that the concrete extend from the fence post to finish grade and have a sufficient pitch to shed water away from the post. It is also recommended that the wood post extend three inches from the bottom of the pier into gravel or sand fill to allow the moisture to escape.

ROCK CLAUSE

For Parks and Recreation Projects

When performing installation of fence for the Division of Parks and Recreation, if rock is encountered for which removal will necessitate special equipment or additional labor, the Contractor shall notify Owner immediately and request an inspection of the site.

At that time, Owner and Contractor shall probe remaining holes to develop a reasonable estimate of the total amount of rock likely to be encountered on the project.

Within 24 hours, Owner will advise Contractor whether remainder of rock is to be removed, if holes depth is to be modified (and concrete added to shallower footers) or if fence location is to be adjusted.

If instructed to proceed with remove rock, Contractor shall continue work but must leave all holes claimed to contain rock unfilled and all debris removed next to each hole until Owner inspects and verifies the number of holes with rock.
