Title

Approval of March 18, 2025, Committee Summary

Budget, Finance & Economic Development Committee

March 18, 2025

Summary and Motions

Chair James Brown called the meeting to order at 1:02 p.m. Vice Mayor Dan Wu and Council Members Chuck Ellinger, Shayla Lynch, Hannah LeGris, Liz Sheehan, Denise Gray, and Dave Sevigny were in attendance. Council Members Whitney Baxter and Jennifer Reynolds were absent. Council Members Tyler Morton, Emma Curtis and Amy Beasley were also present as non-voting members.

I. Approval of February 18, 2025 Committee Summary

A motion by Gray to approve the February 18, 2025, Committee Summary, seconded by Ellinger, the motion passed without dissent.

II. Monthly Financial Update – February 2025

Revenue Director Holbrook began the financial presentation. Revenue collections are slightly exceeding budget through the first 8 months of the fiscal year with a positive variance of 1.8%. Revenues have trended closer to budget over the past five months, showing a tightening of the revenue variance. Budgeting Director Lueker presented the expenses. Personnel is running within 3% of budget through the first eight months. All debt service savings are expected to be expended by the end of the fiscal year. Budget staff continue to monitor operating variances. Even under budget, we are exceeding expenditures from FY24.

Commissioner Hensley presented an update on the urban services, sanitary sewer, water quality, and landfill funds. The urban services fund was established to account for refuse collection, streetlight, and street cleaning services. The fund revenue is primarily derived from an ad valorem tax established for each district estimated at \$53,916,840 for FY25. The majority of this fund's revenue is collected by December 31st from property taxes. Revenue for the first six months is below budget with a -6.4% variance and expenses are below budget with a 21.2% variance.

Sanitary sewer funds are for the expenses associated with the operation of the sewer treatment plants, maintenance of pump stations, rehabilitation and maintenance of sewer lines, and physical improvements of the system. This fund provides for the general operating, maintenance, and debt service costs of the sanitary sewer system. Other expenses include the administrative costs of operating the system such as insurance, revenue collection costs, personnel hiring, accounting, payroll processing, and legal fees. The revenue for this fund comes from sewer user fees. Revenue for the first six months is below budget with a -7.1% variance and expenses are also under budget with a 21.6% variance.

The water quality management fund accounts for the water quality management fee. This fee allows Lexington to better maintain its storm water infrastructure and provide funding for projects to improve water quality in creeks and streams. This fee was mandated by a consent decree between Lexington and the federal Environmental Protection Agency (EPA). The water quality construction fund accounts for construction projects that include improvements to storm water infrastructure, water quality and flooding problems. The revenue for the first six months of the fiscal year is exceeding budget with a variance of 15.7% and expenses are under budget with a variance of 13.2%.

The Landfill fund was established to account for revenues and expenses associated with capping and closure of the landfill in Fayette County and the ongoing costs of refuse disposal. State and federal statutes and regulations have mandated significant changes in the requirements for designing, constructing, operating, managing, maintaining, and closing landfills. The revised requirements have imposed extraordinary expenses on landfill operations. For the first six months of the fiscal year, revenue is below budget with a variance of -5.4% and expenses are under budget with a variance of 49.8%.

No action was taken on this item.

III. Parks Sustainable Funding

Parks and Recreation Director, Monica Conrad, presented on the Parks Sustainable Funding policy. The Park Fund is a dedicated source of funding for the improvement and development of Lexington's parks, greenspaces, and associated infrastructure. It is levied through a percentage of local taxes, specifically earmarked for parks purposes. This Parks Fund program policy reflects Lexington's commitment to create parks and recreational spaces that are accessible, well-designed, and responsive to the diverse needs of our community. The primary principles of this policy are accessibility, engagement, and accountability.

The goal of accessibility is to ensure access to parks and recreational amenities for all residents, regardless of race, ability, income, or neighborhood. Capital investment will be prioritized using the Parks Master Plan Social Needs Index, composite service area analysis, and other data driven tools to identify neighborhoods with greatest need. Projects will be designed with the goal of being accessible to people of all ages, abilities, and backgrounds. All new parks will meet or exceed Americans with Disabilities Act (ADA) standards. In addition, prioritizing spaces that cater to diverse age groups and family needs and projects that respect and celebrate historical and cultural diversity in Lexington will be prioritized.

The goal of engagement is to involve the community in decision making process to ensure park development meets the needs and desires of residents. Lexington Parks and Recreation will engage residents through public meetings and surveys to gather input regarding capital projects. The Chair of the Parks Advisory Board will appoint a strategic planning subcommittee

from the Parks Board and community members to serve as an advisory committee. Parks and Recreation will also collaborate with local community organizations, schools, civic organizations and will collect community engagement in the form of workshops, surveys, community conversations, and focus group discussions.

The final goal is to ensure accountability in the allocation, management, and spending of parks funds. Parks and Recreation will provide an annual capital spending plan, present the requested capital improvement plan through the annual budget approval process, and project statuses will be shared with the public through neighborhood and stakeholder's meetings, Parks Advisory Board meetings, and online reporting. An annual report will be created and published annually for the previous fiscal year. LFUCG internal audit will review the spending of the Parks Fund and ensure they are being used in accordance with the Park Fund ballot language, the Park Fund Program Policy, and other applicable policies. The Parks Fund website will be updated with project statuses and will be interactive and engaging.

Ineligible expenses for the Parks Fund will be personnel costs and benefits, programming, operating, and land acquisition. Project prioritization and selection will focus on capital construction, repair, and replacement projects. In addition, life safety, code compliance, stewardship, the Parks master plan, and emerging opportunities will be used to prioritize projects. A contingency of up to 10% of the total annual Parks Fund revenue will be set aside for unassigned repairs, unexpected capital failures and costs overruns on previously approved projects. Year 1 proposed parks projects consist of 14 projects at a value of \$7.1 million with an additional \$800,000 budgeted for contingency.

No action was taken on this item.

IV. Facilities and Fleet Maintenance Planning

General Services Commissioner, Chris Ford, presented on facilities and fleet management planning. Capital Improvement Planning (CIP) refers to identifying, prioritizing, and funding of publicly owned assets and holdings. The primary goals of CIP planning are to preserve assets, sustainability and continuation of services, and planning for future needs for the expansion of services and infrastructure as the community grows.

Fundamentals of CIP are the identification and project scope determination, estimated overall costs of projects, estimated operational and maintenance costs, estimated project timelines, potential revenue impact, budgetary commitment and funding sources, project prioritization, and maintaining an up-to-date list of projects.

Facilities maintenance is responsible for small to medium sized projects primarily involving repair and maintenance activities as well as major repairs and systems upgrades. Site inventories include 44 structures and buildings, totaling 1.2 million square feet with an estimated value of \$500 million. Fleet services provide CIP services for the entire LFUCG operation in planning, recommendation, and implementation of fleet replacement activities for

more than 2,000 vehicles and 800 pieces of equipment. The replacement value of the vehicles is estimated at \$164 million.

The Capital Project Management (CPM) team is responsible for all facets of LFUCG capital projects from inception to completion. During the past few years, the charge has expanded beyond the Division of Facilities and Fleet management and has included services to Fire, Corrections, Police, Waste Management, Social Services, and Parks and Recreation. Currently CPM team is managing a portfolio of 11 projects totaling \$43.3 million. Challenges Fleet Services is encountering are escalation of costs by 15 – 30%, limited availability of inventory, and long lead times for specialty vehicles. Present opportunities for Fleet Services is the upgrading of the current legacy fleet software to a more robust, supported, cloud-based system.

LFUCG is responsible for all major repairs and CIP expenses for the Fayette County Circuit and District Courthouses. The Administrative Office of the Courts (AOC) reimburses LFUCG for 93.5% of all expenses. LFUCG is responsible for all the remaining operational expenses on the courthouse campus. The FY24 reimbursement from AOC to LFUCG was \$1.5 million. A major upcoming CIP project is the replacement of both courthouse roofs. LFUCG has budgeted \$200,000 for the design phase of the project in FY2025. The funding for construction phase will be included in the Department of General Services FY26 budget request. The anticipated construction cost is \$3 - \$3.5 million.

No action was taken on this item.

V. United for ALICE

National Director of ALICE, Kieran Gardioso, presented on United for ALICE (Asset Limited, Income Constrained, Employed). In 2009, United Way of New Jersey revealed a struggling demographic of all ages and ethnicities, hidden in plain sight. Demand for services did not align with poverty statistics. ALICE highlights the workers powering our economy who can't afford basic needs. Nearly one-third of U.S. households earn above the federal poverty level, making them ineligible for most assistance.

ALICE is an alternate measure of economic wellbeing and are individuals who have income above the federal poverty level, below the cost of basics in the county where they live, often working in essential jobs, and with little to no savings for emergencies or future investments. United for ALICE was founded and has been powered by United Way of Northern New Jersey since 2009. By 2025, United Way has United for ALICE partners in 35 states. United for ALICE provides comprehensive measures of financial hardship, data for all 3,000+ counties in the U.S and accessible data for all.

Products designed to empower partners include ALICE in the Crosscurrents, ALICE economic viability dashboard, ALICE essentials index, and United for ALICE wage tool. The ALICE data reflects county-level costs of a household survival budget. This budget includes basic needs like

housing, food, childcare, health care, a smartphone, and transportation. On the national stage the ALICE movement has built strong momentum. ALICE has been covered in media outlets like the Wall Street Journal, CBS News, Business Insider, and the Washington Post. The ALICE founder was also invited to testify during a Congressional roundtable about food insecurity and the benefits cliff.

The ALICE movement has launched innovative programs to secure equity for low-income households. United in Care aims to make quality childcare accessible to ALICE families in New Jersey. United for ALICE At Work collaborates with employers on workforce strategies, while the national ALICE Advisory Council leads broader policy change and community impact.

No action was taken on this item.

VI. Adjournment

A motion by Chair Brown to adjourn at 2:52pm, seconded by Wu, the motion passed without dissent.

LEXINGTON

MONTHLY FINANCIAL UPDATE FY2025 - MAY

*Urban County Council
Budget, Finance and Economic Development Committee
June 24, 2025*

11 Month Performance Review (Actuals)

May FY25	
Revenues	\$466,959,305
Expenses	(\$431,353,772)
Transfers	(\$ 28,780,083)
One-Year Surplus/(Deficit)	\$ 6,825,450

	JUL	AUG	SEP	OCT	NOV	DEC	JAN	FEB	MAR	APR	MAY
Revenues	\$32.61M	\$36.58M	\$39.71M	\$37.47M	\$61.20M	\$38.09M	\$33.17M	\$47.57M	\$38.51M	\$57.2M	\$44.9M
Exp/Xfers	\$28.13M	\$52.91M	\$43.65M	\$46.28M	\$35.36M	\$52.73M	\$56.23M	\$30.13M	\$41.50M	\$37.1M	\$36.2M

FY2025 Adopted Budget

Factors to Consider

- Revenue collections in May were higher than expected, following a slower than anticipated April. Through May, revenue collections are 1.4% above budget. Budget Amendments passed in June for prefunding will adjust this variance.
- Personnel is running within 4% of budget, showing little change in variance from April reporting.
- Operating savings will be less than reported due to open purchase orders that will be paid out in the next fiscal year. Additionally, Budget Amendments passed in June for prefunding will adjust this variance.

2025 Fiscal Year – Cash Flow Variance Revenue (Actual to Budget)

Funding Overview by ARPA Expenditure Category

Total Grant Budget

1. Public Health \$ 1,084,388

• Eligible projects include services and programs to contain and mitigate COVID-19 spread and services to address behavioral healthcare needs exacerbated by the pandemic.

2. Negative Economic Impacts \$ 36,404,308

• Eligible projects include those that address the negative impacts caused by the public health emergency including assistance to workers; small business support; speeding the recovery of tourism, travel, and hospitality sectors; and rebuilding public sector and non-profit capacity. This category also includes programs and projects that support long-term housing security and promote strong, healthy communities.

3. Economic Impact: Public Sector/Health Capacity \$ 6,791,327

• Eligible projects include expenses for payroll, rehiring, enhanced service delivery, and administrative needs for public sector health, safety, or human services workers.

4. Premium Pay \$12,954,007

• ARPA funding provides resources to local government to recognize the heroic contributions of essential workers. Eligible workers include a broad range of essential workers who must be physically present at their job.

5. Infrastructure \$ -

• Eligible projects include necessary improvements in water, sewer, and broadband infrastructure

6. Revenue Replacement for General Government \$ 62,614,351

• Local governments facing budget shortfalls are permitted to use funding to replace lost revenue for the purpose of providing governmental services. These services may include recreation, transportation, economic development, and other general government services.

7. Administration \$ 1,329,677

• Local governments are permitted to use funding for administering ARPA funds, including costs of in-house staff or consultants to support effective oversight and ensuring compliance with legal, regulatory, and other requirements. A project contingency is also held in this Expenditure Category. Less than 1.2% of all ARPA funds received were used for administration.

Digital Accessibility

DIGITAL ACCESSIBILITY FOR LEXINGTON

Troy Black, Administrative Specialist

Office of the Mayor

Budget, Finance & Economic Development Committee

June 24, 2025

- Congress passed the Digital Equity Act in 2021 as part of the Bipartisan Infrastructure Law. This act, also known as the Infrastructure Investment and Jobs Act, included \$2.75 billion for programs aimed at closing the digital divide and ensuring all communities have the technology and skills needed to participate in the digital economy.
- Digital Equity is when individuals and communities have the information technology resources they need to participate fully in the economy and society. This includes access to information, education, job opportunities, healthcare, and civic engagement platforms.
- Kentucky's Digital Equity Plan was presented in early 2024, and the state was awarded federal funding to implement the plan. The plan was developed in collaboration with Kentuckians to address issues like internet affordability, digital literacy, and access to devices.

- City Officials held a series of internal meetings and discussions to determine the best course of action to support the Digital Equity Act of 2021 and the Kentucky Digital Equity Plan. It was determined that we need a local Digital Accessibility Plan that incorporates community voices, identifies services and gaps, informs policy, and guides access to resources.
- August 2024 Digital Accessibility for Lexington item referred to the Urban County Council's Budget, Finance & Economic Development (BFED) Committee. Councilmember James Brown, in coordination with Chief Development Officer Kevin Atkins' office, formed the Lexington Digital Accessibility Workgroup to develop a Digital Accessibility Roadmap for Lexington.

WORKGROUP Members

LEXINGTON

Troy Black – LFUCG (Office of the Mayor)

Liz Rodgers – LFUCG (CIO)

Amy Glasscock – LFUCG (Workforce Development)

Ciara Coleman – LFUCG (Office of the Mayor)

James Brown – Councilmember At-Large

Joseph Hale – Councilmember District 7

Kristi Stambaugh – LFUCG (Division of Aging)

Hilary Angelucci – LFUCG (Office of CAO)

Tatum Dale – Office of Congressman Andy Barr

Jason Keller – Spectrum Communications

Lafe Taylor – The Ignite Project

Cheryl Klever – Commerce Lexington

Heather Gate – Connected Nations

Jamie Rodgers – Accenture

Mason King – Jubilee Jobs

Vision Statement

- A thriving Lexington where every resident, regardless of age, background, or location, has access to affordable broadband, reliable devices, and the skills to navigate the digital world. By leveraging technology and collaborative partnerships, we aim to unlock new economic opportunities, improve health outcomes, and enhance educational experiences.

Goals

- Organize outreach efforts to identify current providers and available services
- Determine service gaps and match potential contributors to gap opportunities
- Gather community feedback to determine the efficacy of services and/or messaging
- Create and publish an online inventory of Digital Accessibility resources in Fayette County
- Cultivate collaboration among partners to broaden reach and improve access to available funding
- Develop a Digital Accessibility Plan (Roadmap) for Lexington

Timeline

LEXINGTON

Efforts

- The workgroup has convened meetings at four different partner locations across Lexington that offer digital accessibility resources.
- The workgroup has worked to promote the Kentucky Asset Inventory Survey within our networks, encouraging participation and contributing to a noticeable increase in the number of businesses listed as offering digital accessibility services in Lexington.
- These meetings generated valuable feedback from our partners, which has helped refine our vision statement and expand the reach of our digital accessibility initiatives by using their networks to help spread awareness.

Local Survey

- Gather community feedback to determine the efficacy of services and/or messaging
- Organize outreach efforts to identify current providers and available services
- Feedback we receive from the surveys at the event will help shape our digital accessibility roadmap.

Get Connected Lex – A Digital Accessibility Expo

- Opportunity for community members to gather and learn about Lexington-Fayette County's digital future and raise awareness about digital resources available in Lexington-Fayette County.
- Guest speakers will host sessions providing information on topics such as Internet Safety, Education and Workforce, AI, Resources, Devices, and Healthcare.
- Exhibitors will share information about their organizations and the services they offer to the community.
- Saturday, June 28, from 10 a.m. to 2 p.m. at the Lexington Senior Center, 195 Life Lane. Open to the public. Lunch provided.
- #GetConnectedLex

GET CONNECTED LEX

Title

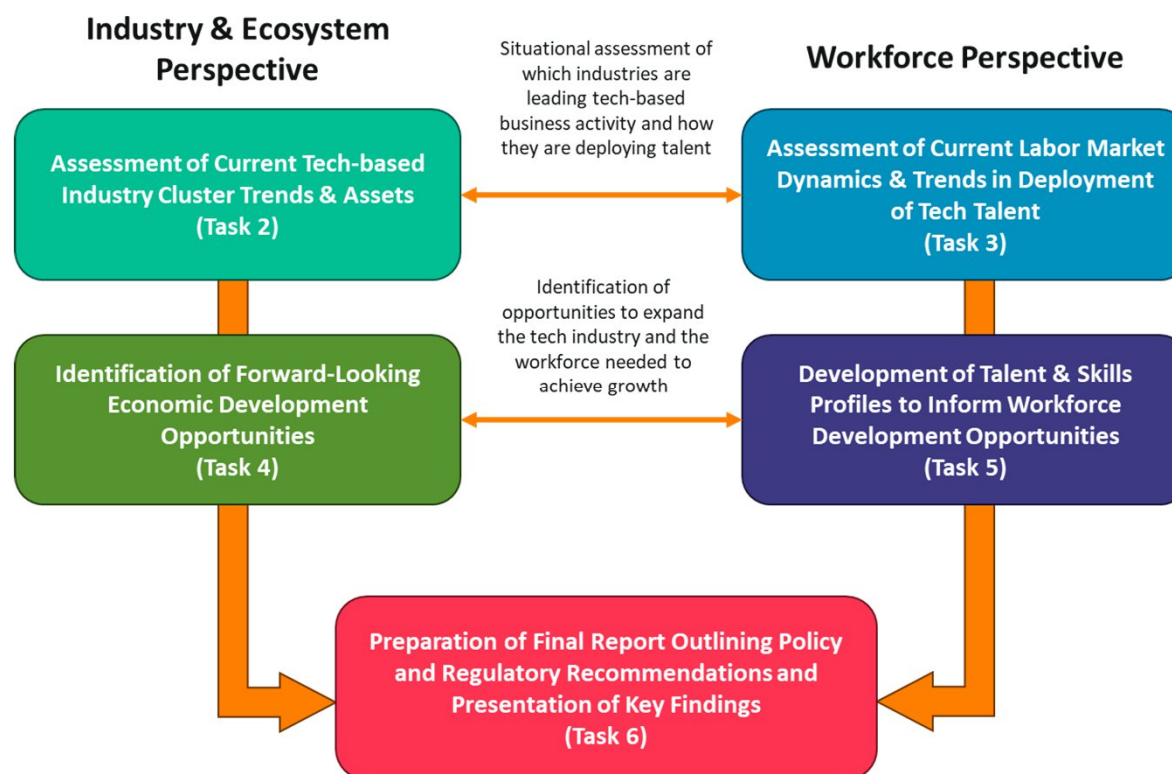

Technology Ecosystem Development (TEconomy)

Tech-Driven Workforce and Economic Development Opportunities for Lexington-Fayette Urban County Government

Presentation of Final Recommendations

June 2025

Outline of TEconomy's Project Approach

Key Findings From TEconomy's Analyses

- While traditional core tech industries such as IT and computing have experienced flat growth, several other leading clusters in Fayette County have emerged as major areas of deployment of tech talent.
- Despite a growing tech workforce, demand is outpacing supply across both tech- and tech-enabled roles.
- While the need for software developers and other core tech roles remains important, Fayette County's high-demand, high-priority occupations are driven by significant demand for "embedded" roles.
- Lexington is well-positioned to pursue technology-enabled growth across five key opportunity areas: AgTech, "Hard Tech" (advanced manufacturing and materials), Health Tech, Biotech, and Digital Business Services and SaaS.
- Demand from industry persists despite significant talent pipeline, suggesting need for retention strategies and skills alignment.
- Forward-looking demand indicates need for hybrid skillsets that combine domain knowledge with deep competencies in data and software tools.

Lexington-Fayette County's workforce development activities should target several sets of key roles and skills to align with forward-looking market trends.

<u>Tech Area</u>	<u>Ag Tech</u>	<u>"Hard Tech"</u>	<u>Health Tech</u>	<u>Biotech</u>	<u>Business Services and SaaS</u>
<u>Key Roles</u>	Precision agriculture technologists, ag data analysts, remote sensing specialists	Materials scientists, process engineers, automation specialists, systems integrators	Health data analysts, clinical informatics, digital health product managers	Computational biologists, genomic data analysts, bioprocess engineers, QA/QC techs	Full-stack devs, cloud engineers, DevOps, product managers
<u>Skills</u>	GIS, Python, agronomy, UAV operation, agricultural informatics	CAD/CAM, PLC, digital twin, mechatronics, IoT	SQL, EHR systems, HIPAA/FHIR, clinical informatics tools	Bioinformatics software, GMP, lab automation, regulatory compliance	JavaScript, Python, Go, AWS/Azure, agile, microservices, cybersecurity
<u>Education</u>	Associate/bachelor's in ag engineering or biosystems	Engineering degrees, certifications	Health informatics, biomedical engineering, public health degrees; CPHIMS/RHIA certifications	Biotech, chemical and molecular bio degrees; QA/QC/regulatory certifications	CS/MIS degrees, bootcamps, certificates
<u>Trends</u>	AI-driven yield, livestock monitoring, climate-resilient tech	Lightweight materials, battery systems, AI-optimized production	Predictive analytics, remote monitoring, hybrid clinical-tech talent	Continuous manufacturing, personalized therapeutics	Secure, customizable platforms, SaaS-driven economy

TEconomy recommends a strategic framework that focuses on aggregating activities across the economic and workforce development ecosystem.

Dedicate pooled resources to develop core functions that address gaps through improved coordination.

Connections and Coordination

Education and Workforce

Innovation and Entrepreneurship

Storytelling and Marketing

Engage with talent and research initiatives and link with collaborators at scale.

Coordinate services and entrepreneurial support providers through single access points.

Serve as key coordination and networking “umbrella” for initiatives and groups focused on specific tech applications verticals.

Business-Tech

Ag-Tech

Bio-Tech

Health-Tech

Hard-Tech

TEconomy recommends four strategies for growing Lexington-Fayette County's tech and tech-enabled workforce to support economic development.

1

Create and elevate a Lexington Tech Council as the centralized convener of Lexington's tech-based ecosystem.

2

Grow tech employment by prioritizing connections among educational institutions, students, workers, and employers.

3

Support Lexington's innovation and entrepreneurial capacity by building on high-growth opportunities.

4

Accelerate the marketing, branding, and storytelling of Lexington's tech ecosystem by focusing on tech-enabled industries.

Each recommended strategy is accompanied with a series of actions for growing Lexington-Fayette County's tech and tech-enabled workforce.

1

Create and elevate a Lexington Tech Council as the centralized convener of Lexington's tech-based ecosystem.

- Action 1.1: Provide resources to build out a fully-fledged tech council similarly to models seen in other successful metro areas.
- Action 1.2: Empower industry-led working groups aligned with Lexington's key technology clusters to guide the council's strategic approach.
- Action 1.3: Support UK's efforts to develop an Innovation District to help attract and retain tech talent.

2

Grow tech employment by prioritizing connections among educational institutions, students, workers, and employers.

- Action 2.1: Boost linkages between employers and college students in technology-oriented fields to help retain talent.
- Action 2.2: Scale Lexington's tech talent retention initiatives.
- Action 2.3: Identify opportunities to encourage experiential learning programs for high school students to learn about tech- and tech-enabled career opportunities.
- Action 2.4: Develop pathways for incumbent workers to "upskill" into tech careers.
- Action 2.5: Design new approaches for mid-career professionals in tech-related industries to develop leadership and entrepreneurial skills.
- Action 2.6: Catalyze the alignment of workforce initiatives with long-term industrial talent demand.

3

Support Lexington's innovation and entrepreneurial capacity by building on high-growth opportunities.

- Action 3.1: Elevate role of tech council from convening organization into full-scale entrepreneurial support organization.
- Action 3.2: Provide funding to scale entrepreneurial programs from locally serving events to those with national credibility and focus.
- Action 3.3: Leverage existing LFUCG programs to support companies who are outgrowing local incubators and accelerators.
- Action 3.4: Develop a First Customer program that helps support local entrepreneurs by linking them with established companies.

4

Accelerate the marketing, branding, and storytelling of Lexington's tech ecosystem by focusing on tech-enabled industries.

- Action 4.1: Provide funding to support economic development across priority tech-related verticals.
- Action 4.2: Plant a flag in AgTech by continuing to support the Bluegrass AgTech Development Corp.
- Action 4.3: Develop a marketing and branding campaign that communicates Lexington's tech-enabled value proposition in a single voice.

Estimated Costing of Recommended Actions

Strategy	Estimated Costing per Year for Various Actions
Strategy 1: Create and elevate a Lexington Tech Council as a centralized convener of Lexington's tech-based ecosystem.	\$300,000 in first year to support alongside a schedule for the organization to achieve financial sustainability over 5 years, with public funding decreasing each year in a transparent manner.
Strategy 2: Grow tech employment by prioritizing connections among educational institutions, students, workers, and employers.	\$90,000 to support career awareness and experiential learning.
Strategy 3: Support Lexington's innovation and entrepreneurial capacity by building on high-growth opportunities.	\$100,000 to scale existing entrepreneurial programs, support startups, and connect companies to first customers through direct assistance.
Strategy 4: Accelerate the marketing, branding, and storytelling of Lexington's tech ecosystem by focusing on tech-enabled applications industries.	\$140,000 to continue supporting tech applications vertical BRE efforts such as Bluegrass AgTech and develop new marketing/branding around tech-enabled verticals.
Total, 4 Strategies and 16 Actions	\$630,000 in total new funding to encourage tech-based economic and workforce development.

Innovating Tomorrow's Economic Landscape

TEconomy Partners is a global leader in research, analysis and strategy for innovation-based economic development. Today we're helping nations, states, regions, universities, and industries blueprint their future and translate knowledge into prosperity.

Strategy 1: Create and elevate a Lexington Tech Council as a centralized convener of Lexington's tech-based ecosystem.

Recommended Action	Recommended Strategic Approach	Estimated Resources Required
Action 1.1: Provide resources to build out a fully-fledged tech council similarly to models seen in other successful metro areas.	<ul style="list-style-type: none"> Identify a pathway to sustainability that would utilize initial public funding to "jump start" efforts, with increased private sector and other funding support over time. Have a dedicated and professional staff of multiple individuals. Establish a governance system that positions the organization for success. 	\$300,000 for first year funding. LFUCG should provide a 'runway' for the organization to achieve financial sustainability, <u>with public funding decreasing each year in a transparent manner</u> (e.g., \$200,000 in Y2, \$150,000 in Y3, \$100,000 in Y4, and any ongoing funding levels to be evaluated in later years).
Action 1.2: Empower industry-led working groups aligned with Lexington's key technology clusters to guide the council's strategic approach.	<ul style="list-style-type: none"> Identify industry leaders to help lead and guide the formation of a working group. Leverage industry-led groups to develop programs or initiatives around shared challenges. Facilitate collaboration with policymakers and educational institutions. Continuously adapt initiatives based on ongoing industry feedback. 	Included in above.
Action 1.3: Support UK's efforts to develop an Innovation District to help attract and retain tech talent.	<ul style="list-style-type: none"> Develop an innovation district that could serve as Lexington's central entry point for tech entrepreneurs and companies. Empower the tech council to provide ongoing engagement with UK's strategic planning and land use planning process. Connect the new innovation district development with other technology spaces throughout Lexington. Explore demand for shared use facilities that could be housed at a physical hub that has the potential to attract more tech-intensive companies and support emerging entrepreneurs. 	Included in above – tech council leadership to provide ongoing engagement with UK's strategic planning and land use planning processes.

Strategy 2: Grow tech employment by prioritizing connections among educational institutions, students, workers, and employers.

Recommended Action	Recommended Strategic Approach	Estimated Resources Required
Action 2.1: Boost linkages between employers and college students in technology-oriented fields to help retain talent.	<ul style="list-style-type: none"> Explore development of a new tech-focused internship program. Scale up and seek to develop worksites for tech jobs through LFUCG's existing Summer Youth Job Training Program (SYJTP) and explore offering options for college students. Offer various networking/educational activities to link students to Lexington and its offerings for young professional. 	<p>Part of role of organization outlined in Strategy 1, developing and expanding partnerships that be part of goals for director and would leverage private funding from industry partners.</p> <p>Up to an additional \$40,000 to scale tech-focused SYJTP job site programming and begin targeting college students (not just high schoolers).</p>
Action 2.2: Scale Lexington's tech talent retention initiatives.	<ul style="list-style-type: none"> Provide financial, organizational, marketing, and other resources to expand existing tech retention and attraction initiatives. Create a virtual talent retention event that could reach students at other Kentucky universities. Develop a mentorship and engagement initiative for early-career tech professionals. 	\$25,000 to scale the event, including increasing the frequency, offering a virtual option, and improving awareness for both students and employers.
Action 2.3: Identify opportunities to encourage experiential learning programs for high school students to learn about tech- and tech-enabled career opportunities.	<ul style="list-style-type: none"> Leverage Lexington's employer network and other stakeholders to serve as corporate partners for experiential learning. Increase student participation in STEM-focused summer camps at UK and other locations. 	\$25,000 for organizational support to help increase student participation in STEM-focused summer camps at UK and other locations.
Action 2.4: Develop pathways for incumbent workers to "upskill" into tech careers.	<ul style="list-style-type: none"> Assess current workforce skills and identify tech career gaps. Partner with local educational institutions and tech employers. Develop structured training aligned with industry demands. Establish clear articulation and credentialing pathways. Provide wraparound support services for participants. 	While the coordinating organization proposed in Strategy 1 would manage these efforts, the model must actively engage private industry not only as end-users of talent but as financial stakeholders in talent development outcomes.
Action 2.5: Design new approaches for mid-career professionals in tech-related industries to develop leadership and entrepreneurial skills.	<ul style="list-style-type: none"> Engage executive sponsors in tech-related industry functions and secure leadership buy-in. Deliver interactive, experiential learning experiences. 	
Action 2.6: Catalyze the alignment of workforce initiatives with long-term industrial talent demand.	<ul style="list-style-type: none"> Host quarterly roundtables with regional employers to map emerging skill needs. Develop modular, employer-driven training modules for in-demand technical and leadership skills. Establish tech talent pipeline metrics and reporting with real-time workforce and job market analytics. 	

Strategy 3: Support Lexington's innovation and entrepreneurial capacity by building on high-growth opportunities.

Recommended Action	Recommended Strategic Approach	Estimated Resources Required
Action 3.1: Elevate role of tech council from convening organization into full-scale entrepreneurial support organization.	<ul style="list-style-type: none"> Identify approaches to coordinate services and entrepreneurial support providers through single access point. Offer direct services to entrepreneurs, including through grant funding and other competitions. Empower the council's Executive Director to function as a "navigator" for startups. 	It is recommended that the funding for Action 3.1 be included as part of Action 1.1's overall funding stream, with the tech council's executive director ideally functioning as a "navigator" for startups.
Action 3.2: Provide funding to scale entrepreneurial programs from locally serving events to those with national credibility and focus.	<ul style="list-style-type: none"> Build connections with investors, successful entrepreneurs, and industry experts with national reputations. Offer pathways to larger platforms, such as state funding or accelerator programs. Showcase local innovation stories nationally in partnership with media groups. Create an Ag-Tech focused event around startup weekend. 	<p>\$30,000 to provide matching grants for each year's 5 Across Winners (6x per year at \$5,000).</p> <p>\$30,000 to support Lexington's Startup Week, which could include a signature 5 Across Event that helps elevate the tech ecosystem.</p>
Action 3.3: Leverage existing LFUCG programs to support companies who are outgrowing local incubators and accelerators.	<ul style="list-style-type: none"> Explore offering enhanced grants (e.g., 20–30 percent higher) for firms conducting R&D, focusing on commercializing patented technologies, or receiving SBIR/STTR awards. Explore the development of a pilot program for a rent-stipend program covering 15–25 percent of lease costs for startups in certified innovation zones (such as a new innovation district, as noted in Action 1.3). Explore the development of a matching grant program to help SBIR/STTR companies grow and scale their operations. 	<p>Continued support for JOBS fund encourage small businesses to locate in Lexington at various 'graduation spaces' for tech companies, connecting companies with this and other similar programs would be part of role of organization outlined in Strategy 1.</p> <p>Potential to expand specific JOBS funding for tech firms to further support rent stipends for the signing of multi-year leases.</p>
Action 3.4: Develop a First Customer program that helps support local entrepreneurs by linking them with established companies.	<ul style="list-style-type: none"> Leverage new and existing cluster networks. Integrate training and one-on-one support. Facilitate pilot and procurement opportunities with local institutions. 	Up to \$40,000 to support a first customer program operated by the tech council that helps connect entrepreneurs with established companies.

Strategy 4: Accelerate the marketing, branding, and storytelling of Lexington's tech ecosystem by focusing on tech-enabled industries.

Recommended Action	Recommended Strategic Approach	Estimated Resources Required
Action 4.1: Provide funding to support economic development across priority tech-related verticals.	<ul style="list-style-type: none"> TEconomy's analysis identifies AgTech, BioTech, HealthTech, "HardTech" (e.g., minerals, materials, manufacturing), and Business Process/Support Tech as leading tech-enabled verticals. Continue to support business retention, expansion, and attraction efforts, with an emphasis on scaling and connecting companies around these areas of tech-enabled development. 	\$100,000 in increased support for BRE or marketing activities in target tech applications-related verticals.
Action 4.2: Plant a flag in AgTech by continuing to support the Bluegrass AgTech Development Corp.	<ul style="list-style-type: none"> Emphasizing the business attraction elements of the grant. Focusing on subsegments of AgTech where Lexington-Fayette County have competitive advantages. Targeting international companies for "soft landings." Expanding industry partnerships to support the program. 	Ongoing budget support for the Bluegrass AgTech Development Corp. and its technology challenge to scale the program internationally.
Action 4.3: Develop a marketing and branding campaign that communicates Lexington's tech-enabled value proposition in a single voice.	<ul style="list-style-type: none"> Create a branding strategy around tech in market it locally and within the state. Align the brand with Lexington's strength in tech-enabled industries. Develop an External Marketing Campaign that showcases Lexington's unique strengths in tech-enabled industries to a national/international audience. Participate in relevant trade shows focusing on tech-enabled verticals. 	Up to \$40,000 to support a marketing, branding, and storytelling campaign that emphasizes Lexington's strengths in tech-enabled industries.
