Faith Pharmacy, Collaborating Agency

Program Name: Health Services with In-House Navigation and Pharmacy

LFUCG Extended Social Resource Grant Program FY16 Funding: \$61,187

Program Summary: Kentucky CancerLink, Faith Pharmacy, and Mission Lexington will work together to expand the number of patients that receive health care, improve the quality of care that is delivered, and decrease the rate of missed screening appointments. This program will serve at least 926 uninsured adult residents of Lexington who earn up to 185% of the poverty line.

Mission Lexington offers free clinics that provide medical, dental, and mental health care. Kentucky CancerLink provides patient navigation services for those in need of cancer screenings and support after a diagnosis of cancer. Faith Pharmacy provides free medications to uninsured patients who live below the poverty line. These three organizations will collaborate in a pilot project that will merge Faith Pharmacy with Mission Lexington and bring navigation services on-site, where the primary care services are being provided. Mission Lexington will also provide on-site office space for Kentucky CancerLink's experienced health navigators and language interpreter.

Faith Pharmacy will provide medications, free of charge, to patients who cannot afford them, until pharmaceutical companies' assistance programs can assist.

Kentucky CancerLink will provide colon, breast, lung, and pelvic cancer screenings, outreach to potential patients, in-person and call-in language interpretation, and on-site identification and navigation of barriers to keeping appointments including childcare and transportation. Evidence-based cancer screenings will be provided at no cost to low-income patients-- including mammograms, colon kits, pap smears, and lung cancer screenings.

Long-Term Program Goals:

1. to provide primary medical, mental health, medicinal, and dental care to more residents of Lexington who are not currently being reached;
2. increase the number of individuals who receive the preventative cancer screenings they need;
3. decrease the number of missed appointments;
4. improve the quality of care patients receive with help surmounting language barriers;
5. and help patients overcome the hurdles that prevent patients from receiving the medical care they need.
