

2019 Firefighting Support Grant Program

Deadline is Friday, October 18, 2019 at 5 p.m.

PLEASE COMPLETE

Contact Name & Title: Captain Jessica Bowman

Organization: Lexington Fire Department

Address: 219 E 3rd St. Lexington, KY 40508

Phone: (859) 231-5662 E-mail rashj@lexingtonky.gov

Project Name: Project Protect

Project Timeline: Continuous + On-Going

Kentucky American Water area served: Fayette County

Amount Requested: \$500 (not to exceed \$500)

REQUIRED DESCRIPTION OF ORGANIZATION AND NEED FOR FUNDS

On an attached sheet, provide a brief description of the organization seeking support and a description of how grant funds will be used. (One to two pages is sufficient.)

W-9 FORM

Please complete a W-9 form (provided) if your organization has not received funding from Kentucky American Water previously, and include it with your application.

WATER USAGE REPORTS

Successful applicants must be current in providing monthly water usage reports to Kentucky American Water of the past 12 months.

Return this application form and all attachments by 5 p.m. on October 18, 2019 to:

Kentucky American Water
ATTN: Patricia Lee
External Affairs
2300 Richmond Road
Lexington, KY 40502

All mailed applications must be postmarked no later than October 18, 2019

OR

E-mail application form and all attachments to patricia.a.lee@amwater.com by 5 p.m. Friday, October 18, 2019. **(NO FAXED APPLICATIONS ACCEPTED.)**

Grant Proposal

Please provide a brief description of the organization seeking support:

Lexington is the second largest city in Kentucky and has a merged City/County government with Fayette County. Located in the beautiful Bluegrass Region of the state, we are known as the Horse Capital of the World. Our population of 321,959 continues to trend upwards at a rate of 1-2% annually. Our 285 square mile response area is comprised of an urban core surrounded by suburban and rural areas. Agricultural areas mainly involve the horse industry. Our climate, culture, geography and diverse local and regional attractions bring around 2.7 million tourists annually.

The Lexington Fire Department is the largest fire department in the Commonwealth and is a progressive all hazards department. We have an authorized strength of 597 firefighters and we are fully staffed. We have 24 fire stations and a variety of support services. Our firefighters are all certified IFSAC I/II, EMT-B, and HazMat Ops. We provide full time fire prevention, education, investigation, and community paramedicine programs, as well as structural and ARFF firefighting, ALS EMS, hazardous materials, and technical rescue services. Our Advanced Life Support EMS service is comprised of 247 paramedics riding 12 EC units and 12 paramedic engines. Special Operations Command includes 214 HazMat Technicians or Specialists, 84 Technical Rescue Technicians, 107 ARFF personnel, and 32 Public Safety Divers.

During the past five years, we responded to over 270,000 local emergencies. As the key resource for the regional Bluegrass Emergency Response Team (BERT), we are involved in state wide emergency response planning and preparedness. We are also the largest contingent of immediately available and sustainable Special Operations resources in the state. We have hosted the Kentucky State Fire School for 89 years. We collaborate and train with a diverse array of regional, state, federal fire, law enforcement, EMS, public utilities, and non-governmental organizations throughout the year. Our training infrastructure is made available to assist any requester at no cost to them.

Provide a brief description on how the funds will be used:

The health and safety of our members is our highest priority. Since 2015, we have experienced three firefighter deaths due to job related cancer. In 2016, our Fire Chief announced a new LFD

strategic goal of enhancing our health, safety, and fitness standards to ensure we are able to live long enough to enjoy the retirement we have worked so hard to earn. To that end, we have made a series of changes to better protect our members at a cost of \$1,573,123. Changes were based on industry best practices and recommendations from our safety committee. We call these changes, Project Protect.

Included in this project is the Hood Swap Program. Firefighters wear fire resistant hoods as a part of our basic compliment of personal protective equipment. These hoods protect a firefighter's head, face, and neck from heat and contaminants.

While hoods have always been of vital importance, its role is growing. An increased role means an increased liability if it fails. A line of duty death or disabling injury represent a significant cost to the department and community. In addition to wages and benefits, the LFD invests thousands of dollars into training new recruits as FFs, EMTs, and paramedics. When a firefighter is taken off-line due to injury or death, even more costs are incurred. Workers comp claims, backfilled overtime, litigation to defend against wrongful death, long-term disability payments, to name a few.

It is impossible to put a price on the value of human life, but it is possible to put a price on safety measures available to protect that life. Project Protect focuses on intentional efforts to eliminate preventable death, like job related cancer. New hoods are critical to this plan.

Historically, firefighters wore the same hood year round with as few as two cleanings a year. However, as we learn more about the risks of our profession, we are in a better position to protect ourselves against them. Now, we know how important it is to wash a firefighter's hood after every fire. All LFD members should have two hoods. The Hood Swap Program requires members to swap their soiled/dirty hoods for clean ones, and allows for routine cleaning and inspection of hoods. A firefighter can only take on the risks of this job if they know the risks are tempered. To that end, we are requesting \$500 to purchase new hoods at the rate of \$20 per hood. The hoods will be put into the Personal Protective Equipment (PPE) Quartermaster System to replace damaged or old PPE hoods declared Out of Service (OOS).
