EQUAL OPPORTUNITY AGREEMENT

The Law

- Title VII of the Civil Rights Act of 1964 (amended 1972) states that it is unlawful for an employer to discriminate in employment because of race, color, religion, sex, age (40-70 years) or national origin.
- Executive Order No. 11246 on Nondiscrimination under Federal contract prohibits employment discrimination by contractor and sub-contractor doing business with the Federal Government or recipients of Federal funds. This order was later amended by Executive Order No. 11375 to prohibit discrimination on the basis of sex.
- Section 503 of the Rehabilitation Act of 1973 states:

The Contractor will not discriminate against any employee or applicant for employment because of physical or mental disability.

- Section 2012 of the Vietnam Era Veterans Readjustment Act of 1973 requires Affirmative Action on behalf of disabled veterans and veterans of the Vietnam Era by contractors having Federal contracts.
- Section 206(A) of Executive Order 12086, Consolidation of Contract Compliance Functions for Equal Employment Opportunity, states:

The Secretary of Labor may investigate the employment practices of any Government contractor or sub-contractor to determine whether or not the contractual provisions specified in Section 202 of this order have been violated.

The Lexington-Fayette Urban County Government practices Equal Opportunity in recruiting, hiring and promoting. It is the Government's intent to affirmatively provide employment opportunities for those individuals who have previously not been allowed to enter into the mainstream of society. Because of its importance to the local Government, this policy carries the full endorsement of the Mayor, Commissioners, Directors and all supervisory personnel. In following this commitment to Equal Employment Opportunity and because the Government is the benefactor of the Federal funds, it is both against the Urban County Government policy and illegal for the Government to let contracts to companies which knowingly or unknowingly practice discrimination in their employment practices. Violation of the above mentioned ordinances may cause a contract to be canceled and the contractors may be declared ineligible for future consideration.

Please sign this statement in the appropriate space acknowledging that you have read and understand the provisions contained herein. Return this document as part of your application packet.

The data is not warranted to be either complete or correct, and the CONTRACTOR shall assume all risks resulting from the conditions arising from the approximations shown.

The CONTRACTOR shall confer with the utility companies to inform them of the proposed construction schedule, verify the location and elevation of existing utilities and arrange for the relocation and adjustment of any facilities to avoid interference with the proposed construction. All such activities are to be performed under the direction of and with the approval of the ENGINEER.

When the various utility owners find it necessary to make adjustments to their lines where the CONTRACTOR is presently working, the CONTRACTOR is to move his operations to another area of Work so as not to interfere in any way with the utility company's Work.

Any utilities covered up or lost by the construction operations of the CONTRACTOR shall be uncovered and found by the CONTRACTOR and the new construction repaired and/or replaced as directed by the ENGINEER. No additional compensation will be allowed for such Work nor shall any additional payment be allowed for the relocation and adjusting of any utility but shall be considered incidental to other Work.

The CONTRACTOR shall make a concerted effort to prevent any disruption of utility services, and if an unintended disruption occurs, the CONTRACTOR shall immediately and safely restore service. If disruption of any of the utility services covered in this section is unavoidable, it will be the responsibility of the CONTRACTOR to notify affected property owners. The CONTRACTOR shall also make every effort to restore said services before quitting Work for the day. In the event this cannot be done, the CONTRACTOR shall provide temporary service to the property owners until permanent service can be restored.

A.7 TESTING

From time to time during the progress of the Work, the PROJECT MANAGER may require that testing be performed to determine the materials provided meet the specified requirements. The Lexington-Fayette Urban County Government will select a testing laboratory to perform the testing services. The cost of such services shall be the responsibility of the OWNER. If testing reveals defective materials or Work, the cost of said testing will become the responsibility of the CONTRACTOR.

B. Aggregate Surface Topping:

The aggregate shall meet the requirements in Table 2. The high friction aggregate shall be clean, dry, and free from foreign matter. The aggregate on the installed system shall produce a skid resistant reading of 69 SRV (Skid Resistant Value) as tested with a lock wheel testing apparatus. The skid

testing shall be conducted within 90 days of the completed project installation. Surface applications, not meeting average minimum skid test results of 65 SRV, shall be removed and replaced. The installed system shall be tested for skid resistance at approximately six month intervals or when the LFUCG Department of Streets and Roads deems it necessary for a one year period after the installation. If the skid resistance readings are less than 65 SRV, the installation shall be removed and replaced at no cost to the LFUCG.

Table 2. Bauxite Aggregate Requirements

SRV	Skid Resistance Value Test 65 ASTM E303
PSV	Polished Stone Value 70 ASTM E660

C. Certification:

The installer shall submit a list of projects with the owner’s contact information on which a minimum of 4,000 square yards of high friction surface treatment has been placed within the past three years demonstrating a friction reading of 65 SRV.

III. CONSTRUCTION METHODS

A. Safety Provisions

Personnel shall be thoroughly trained in the safe handling of materials in accordance with the Manufacturer's recommendations.

B. Storage of Materials

Materials shall be stored in accordance within the requirements of the manufactures recommendations. MSDS and other information pertaining to the safe practices for the storage, handling and disposal of the materials, and to their health hazards shall be obtained from the manufacturer and posted at storage areas. A copy of such information shall be provided to the LFUCG Department of Streets and Roads.

C. Application Conditions:

Do not apply the epoxy binder on a wet surface or when the ambient temperature is below 40oF or when the anticipated weather conditions would prevent the proper application of the surface treatment as determined by the manufacturer's representative.

D. Surface Preparation:

Surfaces shall be clean, dry, and free of all dust, oil, debris and any other material that might interfere with the bond between the epoxy resin binder material and existing surfaces. Adequate cleaning of all surfaces will be determined by the manufacturer's representative. Utilities, drainage structures, curbs and any other structure within or adjacent to the treatment location shall be protected from the application of the surface treatment materials. Cover and protect all existing pavement markings that are adjacent to the application as directed by the Project Manager. Pavement markings that conflict with the surface application shall be removed by grinding and the surface shall be swept clean prior to the epoxy binder application.

Pre-treat joints and cracks greater than 1/4 inch in width and depth with the mixed epoxy specified herein. Once the epoxy in the pre-treated areas has gelled, the epoxy binder and aggregate topping installation may proceed.

For applications on new asphalt, a mandatory 30 day cure period shall take place prior to the installation of the epoxy binder and high friction bauxite aggregate. On new concrete surfaces, all curing compounds shall be completely removed prior to installation.

E. Equipment: Automated Continuous Application

The applicator vehicle shall heat, continuously mix, meter, monitor and apply the epoxy binder and high friction aggregate in one continuous pass.

The applicator vehicle shall be equipped with an inbuilt data management unit which is capable of producing real time data flow showing the volume of resin, the resin mil thickness on average throughout the application width, the volume of aggregate applied throughout the application width, the temperature of the heated resin and the ambient temperature. The automated continuous application vehicle will have continuous pumping and portioning devices that blend the epoxy binder within a controlled sealed system. The epoxy binder shall be blended and mixed in the ratio per the manufacturer's specification (+/- 2% by volume); the epoxy binder shall be continuously applied once blended. The application vehicle should be capable of a minimum epoxy binder application rate of 10 gal/per minute with a minimum uniform application thickness of 50 mils.

The high friction aggregate shall be applied by the same automated continuous application vehicle that applies the resin binder to the pavement section. The automatic aggregate spreader shall be capable of applying up to a continuous 12 foot width application. The high friction aggregate shall be applied onto the wet uncured resin from a minimum height of 12 inches from above the pavement section surface, at minimum continuous rate of 11 lbs per square yard of coverage. The use of chip spreaders, vehicle tires, rollers, vibratory compactors or devices that throw loose aggregate onto any part of the live roadway lanes shall not be allowed to apply the high friction aggregate onto the wet uncured resin.

The automated continuous applicator vehicle should be capable of the uniform application of the high friction aggregate treatment at a minimum continuous application rate of 2,300 square yards per hour. No exposed wet spots of the epoxy binder shall be visible once the aggregate is installed. The operations should proceed in such a manner that will not allow the mixed material to separate, cure, dry, be exposed or otherwise harden in such a way as to impair retention and bonding of the high friction surfacing aggregate, walking, standing or any form of contact or contamination with the wet uncured resin will result in that section of resin being removed and replaced at the installers expense.

The excess aggregate can be reused; the aggregate shall be reclaimed by a suction sweeper, the recovered aggregate must be clean, uncontaminated and dry.
