RE: VisionCMS™ Upgrade

The Division of Computer Services is requesting a sole source purchase of VisionCMS™ upgrade. This upgrade, through Vision Internet, will provide the city with the newest version of the Vision Content Management System™, content migration, graphic redesign and navigation redesign. Vision Internet is the only vendor that supports Vision CMS.

Continuing to use the current provider will allow for the content currently on the LFUCG website to be migrated to the new site. This will not only prohibit duplication of work by all divisions of the UCG but more importantly, will not hinder the government's transparency mission for the taxpayers. Additionally, website liaisons will not have to be retrained in another content management system as they are already familiar with this system.

The upgrade is fully budgeted within the Division of Computer Services.
