The Law

- Title VII of the Civil Rights Act of 1964 (amended 1972) states that it is unlawful for an employer to discriminate in employment because of race, color, religion, sex, age (40-70 years) or national origin.
- Executive Order No. 11246 on Nondiscrimination under Federal contract prohibits employment discrimination by contractor and sub-contractor doing business with the Federal Government or recipients of Federal funds. This order was later amended by Executive Order No. 11375 to prohibit discrimination on the basis of sex.
- Section 503 of the Rehabilitation Act of 1973 states:

The Contractor will not discriminate against any employee or applicant for employment because of physical or mental handicap.

- Section 2012 of the Vietnam Era Veterans Readjustment Act of 1973 requires Affirmative Action on behalf of disabled veterans and veterans of the Vietnam Era by contractors having Federal contracts.
- Section 206(A) of Executive Order 12086, Consolidation of Contract Compliance Functions for Equal Employment Opportunity, states:

The Secretary of Labor may investigate the employment practices of any Government contractor or sub-contractor to determine whether or not the contractual provisions specified in Section 202 of this order have been violated.

The Lexington-Fayette Urban County Government practices Equal Opportunity in recruiting, hiring and promoting. It is the Government's intent to affirmatively provide employment opportunities for those individuals who have previously not been allowed to enter into the mainstream of society. Because of its importance to the local Government, this policy carries the full endorsement of the Mayor, Commissioners, Directors and all supervisory personnel. In following this commitment to Equal Employment Opportunity and because the Government is the benefactor of the Federal funds, it is both against the Urban County Government policy and illegal for the Government to let contracts to companies which knowingly or unknowingly practice discrimination in their employment practices. Violation of the above mentioned ordinances may cause a contract to be canceled and the contractors may be declared ineligible for future consideration.

**NOTICE TO CONSULTANT ENGINEERS
LEXINGTON AREA METROPOLITAN PLANNING ORGANIZATION (LAMPO)
REGIONAL INTELLIGENT TRANSPORTATION SYSTEM (ITS) ARCHITECTURE
STUDY**

REQUEST FOR PROPOSALS

The Lexington Area Metropolitan Planning Organization (LAMPO) seeks to retain the services of a professional consultant engineering firm to provide an update to the Regional Intelligent Transportation System (ITS) Architecture Study for the Lexington-Fayette and Jessamine County areas. The update is being funded by the Federal Surface Transportation Program Metropolitan Lexington (SLX) through the MAP-21 (Moving Ahead for Progress in the 21st Century), in cooperation with the FHWA and Kentucky Transportation Cabinet. The rapid pace of ITS technology development makes it essential that transportation stakeholders examine the regional and statewide framework to determine appropriate goals for ITS and the objectives it must meet in the future. Additionally, the National ITS Architecture has been revised many times since the Bluegrass Intelligent Transportation System (BITS) Technical Memorandum was developed in 2004.

http://www.lexareampo.org/images/stories/DocumentLibrary_PDFs/ITS/bluegrass_intelligent_transportation_architecture_tech_memo_combined.pdf

This study update requires experience and expertise in the development of Intelligent Transportation Systems and the supporting documentation required by the Federal Highway Administration (FHWA) for federally funded projects; specifically, the Final FHWA 23 CFR 940 and Federal Transit Administration Policy on ITS Architecture and Standards. Re: RFP #37-2014 LAMPO Regional ITS Architecture Study

URS Corporation is pleased to submit this proposal to support the Lexington Area Metropolitan Planning Organization (LAMPO) with updating the 2004 Bluegrass Intelligent Transportation System (BITS) Technical Memorandum. The URS Team provides both local and national expertise, resources, and experience necessary to develop an effective ITS Architecture for the LAMPO. We have assembled a strong and dynamic team, specifically tailored to meet all project requirements. The URS Team includes committed key individuals who have performed significant ITS strategic planning and architecture projects as well as, local transportation planning and traffic operations projects. This Project Team brings invaluable local knowledge of the existing operations as well as experience from past ITS projects across the country.

URS is a recognized leader in all aspects of ITS, including planning, design, implementation, operations, maintenance, and program management. We have extensive experience in ITS Architecture, having been involved in the development or updating of over 30 regional or state ITS Architectures across the country. URS is also well acquainted with the transportation stakeholders and needs in the Lexington area from its involvement in the US 27 Access Management Plan and the Lexington Signal Retiming Project. URS has a prominent footprint with transportation in the Bluegrass Region. We recently completed the LFUCG Traffic Signal Retiming project encompassing four of Lexington's major routes; we have held the KYTC District 7 Traffic Engineering Services contract since its inception in 2007; and a few of our engineers regularly attend and participate in the bimonthly Congestion Management Committee meetings. Our partner Integrated Engineering (DBE) is a local multidisciplinary planning and engineering firm that will assist with GIS and stakeholder involvement activities.

Our strength is in our team of subject matter experts. Paul Slone, the Project Manager, is one of the top traffic operations engineers in Kentucky. Earlier in his career, Paul both lived in and worked for Lexington as the Traffic Signal Systems Manager, supervising the day-to-day operation of several traffic signal systems. This experience gives him unique knowledge and familiarity with the operations within the LFUCG, one of the largest ITS stakeholders in the LAMPO area. Paul will be supported by URS' national expert on ITS Architecture Dr. Ming- Shiun Lee, PhD, PE. Ming has led the development of over 30 regional and statewide ITS Architecture plans.

With the selection of URS, LAMPO will receive the benefits of working with a project manager that you and many of the area stakeholders know well. Supported by the best ITS Architecture professionals URS has to offer, we will deliver a solid product that will satisfy FHWA requirements and chart the course for future ITS projects in the LAMPO area. Thank you for your consideration.

Sincerely,

Paul A. Slone, PE, PTOE
Project Manager

SPECIALIZED EXPERIENCE AND TECHNICAL COMPETENCE

URS ITS PLANNING AND ARCHITECTURE DEVELOPMENT EXPERIENCE

URS has lead more than sixty ITS planning efforts and over thirty ITS architecture projects around the nation including the development of strategic plans/architectures and program management for large and small urban and rural areas. Our approach to ITS planning and architecture development emphasizes the important role of stakeholder involvement, agency coordination, cooperation and consensus building. This key emphasis on outreach, communication and coalition building has been the cornerstone in URS' proven success in developing ITS architectures throughout the nation.

URS has assisted state, regional, and local agencies with developing vision, goals, objectives, and performance measures for their ITS programs. The performance methods are S.M.A.R.T. (Specific, Measurable, Agreed, Realistic, and Time-Bound) metrics as recommended in the FHWA publication *Advancing Metropolitan Planning for Operations: The Building Blocks of a Model Transportation Plan Incorporating Operations*.

The Figure below illustrates URS' experience in developing ITS Architectures across the country. Many of those ITS Architecture efforts included the development of ITS strategic deployment plans.

The URS Team is excited to support the Lexington Area Metropolitan Planning Organization (LAMPO) in updating the Regional Intelligent Transportation Systems (ITS) Architecture. We understand the importance of establishing a shared vision by multiple agencies that describes how various information technology systems work together to share information and resources; thus providing a safer, more efficient and effective transportation system for all travelers, and enhancing the vitality of the region. The URS Team also recognizes the significance of incorporating policies and directions from multiple strategic planning documents, such as the LAMPO Transportation Improvement Plan, into a broad strategic vision to serve as a roadmap for future ITS investments.

The URS Team will take a systems-level approach to updating the 2004 Bluegrass Intelligent Transportation System (BITS) Technical Memorandum. The outcome of this effort will be a living, actionable document that will present how transportation resources integrate with varying programs, including congestion management, transit, homeland security, and emergency management. The architecture will establish the processes by which ITS assets are leveraged for multimodal and intermodal mobility within the region and across the region's borders.

THE URS TEAM

The URS Team possesses the subject matter expertise, relevant experience, and strong, proven approach necessary to successfully support the LAMPO, LFUCG Department of Public Works, Kentucky Transportation Cabinet (KYTC), and other stakeholders in updating the Regional ITS Architecture. The URS Team includes URS Corporation and Integrated Engineering, Inc. (IE). IE is a certified Disadvantaged Business Enterprise (DBE) with KYTC. URS Team's DBE participation for this project is expected to be 10 to 15%.

Our team brings a unique blend of local knowledge and national ITS Architecture expertise to this project. We will lead the stakeholders through a process to update the architecture, and tie it into statewide, regional and local transportation goals, objectives, and needs. Our organizational approach, proven on other local projects such as the US 27 Access Management Study, provides the LAMPO and stakeholders with the necessary information to make effective decisions for this policy document. Our familiarity with many of the stakeholders will greatly benefit the project process. Our project manager, Paul Slone, will lead the stakeholder meetings. He has developed an educational presentation style in which he delivers technical information in a relaxed, comprehensible format, providing stakeholders the knowledge base to understand the technologies, deployments and benefits of ITS.

A charter member of ITS America, URS has led hundreds of ITS planning, design and/or deployment efforts around the nation. Our Midwest offices offer a combined staff of over 5,000 personnel, including planners, engineers, environmental scientists, and economists with proven expertise in the areas of ITS planning, system design, communications, and deployment and operations.

URS understands the interactions between transportation planning and transportation operations. We have direct, hands-on experience applying Federal Highway Administration (FHWA) guidance on developing an objectives-driven, performance based approach to incorporating the ITS architecture update and planning for operations.

Locally and nationally, URS caters to a diverse clientele that includes governmental agencies at local, county, state, and federal levels as well as private and corporate entities. We take great pride in our reputation as an industry leader in ITS, known for providing innovative and
