Laws and Regulations

All applicable state laws, ordinances and resolutions (including but not limited to Section 2-33 (Discrimination due to sexual orientation or gender identity) and Chapter 13 (Licenses and Regulations) of the Lexington-Fayette Urban County Government Code of Ordinances, and Resolution No. 484-17 (Minority, Women, and Veteran-Owned Businesses)) and the regulations of all authorities having jurisdiction over the project shall apply to the contract, and shall be deemed to be incorporated herein by reference.

Equal Employment Opportunity

The Entity (regardless of whether construction contractor, non-construction contractor or supplier) agrees to provide equal opportunity in employment for all qualified persons, to prohibit discrimination in employment because of race, color, religion, sex (including pregnancy, sexual orientation or gender identity), national origin, disability, age, genetic information, political affiliation, or veteran status, and to promote equal employment through a positive, continuing program from itself and each of its sub-contracting agents. This program of equal employment opportunity shall apply to every aspect of its employment policies and practices.

Kentucky Equal Employment Opportunity Act

The Kentucky Equal Employment Opportunity Act of 1978 (KRS 45.560-45.640) requires that any "county, city, town, school district, water district, hospital district, or other political subdivision of the state shall include in directly or indirectly publicly funded contracts for supplies, materials, services, or equipment hereinafter entered into the following provisions:

"During the performance of this contract, the contractor agrees as follows:

- (1) The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, age, or national origin;
- (2) The contractor will state in all solicitations or advertisements for employees placed by or on behalf of the contractors that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, age, or national origin;
- (3) The contractor will post notices in conspicuous places, available to employees and applicants for employment, setting forth the provision of the nondiscrimination clauses required by this section; and
- (4) The contractor will send a notice to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding advising the labor union or workers' representative of the contractor's commitments under the nondiscrimination clauses."

The Act further provides:

"KRS 45.610. Hiring minorities -- Information required

- (1) For the length of the contract, each contractor shall hire minorities from other sources within the drawing area, should the union with which he has collective bargaining agreements be unwilling to supply sufficient minorities to satisfy the agreed upon goals and timetables.
- (2) Each contractor shall, for the length of the contract, furnish such information as required by KRS 45.560 to KRS 45.640 and by such rules, regulations and orders issued pursuant thereto and will permit access to all books and records pertaining to his employment practices and work sites by the contracting agency and the department for purposes of investigation to ascertain compliance with KRS 45.560 to 45.640 and such rules, regulations and orders issued pursuant thereto.

KRS 45.620. Action against contractor -- Hiring of minority contractor or subcontractor

(1) If any contractor is found by the department to have engaged in an unlawful practice under this chapter during the course of performing under a contract or subcontract covered under KRS 45.560 to 45.640, the department shall so certify to the contracting agency and such certification shall be binding upon the contracting agency unless it is reversed in the course of judicial review.

(2) If the contractor is found to have committed an unlawful practice under KRS 45.560 to 45.640, the contracting agency may cancel or terminate the contract, conditioned upon a program for future compliance approved by the contracting agency and the department. The contracting agency may declare such a contractor ineligible to bid on further contracts with that agency until such time as the contractor complies in full with the requirements of KRS 45.560 to 45.640.

(3) The equal employment provisions of KRS 45.560 to 45.640 may be met in part by a contractor by subcontracting to a minority contractor or subcontractor. For the provisions of KRS 45.560 to 45.640, a minority contractor or subcontractor shall mean a business that is owned and controlled by one or more persons disadvantaged by racial or ethnic circumstances.

KRS 45.630 Termination of existing employee not required, when

Any provision of KRS 45.560 to 45.640 notwithstanding, no contractor shall be required to terminate an existing employee upon proof that employee was employed prior to the date of the contract.

KRS 45.640 Minimum skills

Nothing in KRS 45.560 to 45.640 shall require a contractor to hire anyone who fails to demonstrate the minimum skills required to perform a particular job."

It is recommended that all of the provisions above quoted be included as special conditions in each contract. In the case of a contract exceeding \$250,000, the contractor is required to furnish evidence that his workforce in Kentucky is representative of the available workforce in the area from which he draws employees, or to supply an Affirmative Action plan which will achieve such representation during the life of the contract.

LFUCG Non-Appropriation Clause

Contractor acknowledges that the LFUCG is a governmental entity, and the contract validity is based upon the availability of public funding under the authority of its statutory mandate.

In the event that public funds are unavailable and not appropriated for the performance of the LFUCG's obligations under this contract, then this contract shall automatically expire without penalty to the LFUCG thirty (30) days after written notice to Contractor of the unavailability and non-appropriation of public funds. It is expressly agreed that the LFUCG shall not activate this non-appropriation provision for its convenience or to circumvent the requirements of this contract, but only as an emergency fiscal measure during a substantial fiscal crisis, which affects generally its governmental operations.

In the event of a change in the LFUCG's statutory authority, mandate and mandated functions, by state and federal legislative or regulatory action, which adversely affects the LFUCG's authority to continue its obligations under this contract, then this contract shall automatically terminate without penalty to the LFUCG upon written notice to Contractor of such limitation or change in the LFUCG's legal authority.

EQUAL OPPORTUNITY AGREEMENT

The Law

- Title VII of the Civil Rights Act of 1964 (amended 1972) states that it is unlawful for an employer to discriminate in employment because of race, color, religion, sex, age (40-70 years) or national origin.
- Executive Order No. 11246 on Nondiscrimination under Federal contract prohibits employment discrimination by contractor and sub-contractor doing business with the Federal Government or recipients of Federal funds. This order was later amended by Executive Order No. 11375 to prohibit discrimination on the basis of sex.
- Section 503 of the Rehabilitation Act of 1973 states:

The Contractor will not discriminate against any employee or applicant for employment because of physical or mental disability.

- Section 2012 of the Vietnam Era Veterans Readjustment Act of 1973 requires Affirmative Action on behalf of disabled veterans and veterans of the Vietnam Era by contractors having Federal contracts.
- Section 206(A) of Executive Order 12086, Consolidation of Contract Compliance Functions for Equal Employment Opportunity, states:

The Secretary of Labor may investigate the employment practices of any Government contractor or sub-contractor to determine whether or not the contractual provisions specified in Section 202 of this order have been violated.

The Lexington-Fayette Urban County Government practices Equal Opportunity in recruiting, hiring and promoting. It is the Government's intent to affirmatively provide employment opportunities for those individuals who have previously not been allowed to enter into the mainstream of society. Because of its importance to the local Government, this policy carries the full endorsement of the Mayor, Commissioners, Directors and all supervisory personnel. In following this commitment to Equal Employment Opportunity and because the Government is the benefactor of the Federal funds, it is both against the Urban County Government policy and illegal for the Government to let contracts to companies which knowingly or unknowingly practice discrimination in their employment practices. Violation of the above mentioned ordinances may cause a contract to be canceled and the contractors may be declared ineligible for future consideration.

Please sign this statement in the appropriate space acknowledging that you have read and understand the provisions contained herein. Return this document as part of your application packet.

Bluegrass Council of the Blind Computer System Upgrade Project

Section 1

The Bluegrass Council of the Blind (BCB) is the only nonprofit exclusively serving the needs of adults who are blind or visually impaired in Fayette County. BCB services are free of charge and available to anyone affected by vision loss. BCB has been a Lexington-based organization since 1978. We are in good standing with the Kentucky Secretary of State and have a GuideStar Gold Seal of Transparency. BCB's mission is *to increase independence, security and quality of life for Kentuckians affected by vision loss through peer support, technology, training and additional resources.* We do this through two main programs: Peer Support (PS) and Assistive Technology & Training (AT). BCB's AT Program introduces people with vision impairment to devices, accessibility features, tools and solutions for achieving tasks nearly impossible for those with low or no vision, such as reading, writing checks and balancing a checkbook, identifying currency, following a recipe, monitoring health and dozens of other activities people with full sight take for granted. BCB offers the only Assistive Technology Access Center in Kentucky, which offers state-of-the-art devices for hands-on trials, lending, distribution and training. This program offers access and training on both specialized and "every-day" devices that can be adapted for persons with low to no vision, giving them tools and skills to maximize their independence, safety and productivity. Devices include magnifiers, computer screen readers, kitchen aids, smart phone apps and others. BCB's PS Program offers peer counseling and support to combat the fear, isolation and depression that can accompany vision loss. This program provides opportunities for interaction with others who can share what it's like to meet the challenges of vision impairment, helping individuals and family members gain

confidence, offer and receive support, and learn and share ideas and techniques. PS services include intake/info/referral, Lunch & Learn presentations, community outings to increase orientation & mobility skills and promote inclusion, small group mentoring, advocacy and connection through our national membership, and monthly supplemental food distribution. These services increase access to resources, and often result in improved physical and mental health. BCB is a positive spin on the old saying, "the blind LEADING the blind." The majority of our staff, board and regular volunteers are impacted by vision impairment, so we know firsthand the challenges of living in a sighted world and have a passion for helping others overcome the barriers of sight loss to live their best lives. We use our personal experiences to support, educate, encourage, train and empower others with similar challenges. This creates a unique opportunity for peer-to-peer learning, mentoring and setting a positive example of how people can live, share and learn with vision loss. 2017 Census data shows nearly 7,500 adults with vision impairments in Fayette County. The CDC reports vision loss takes a substantial social and economic toll, including significant suffering, disability, loss of productivity, and diminished quality of life; people with vision impairments are more likely to report depression, falls, cognitive decline, and premature death; decreased ability to see can lead to the inability to drive, read, keep accounts, and travel in unfamiliar places – substantially compromising employability and quality of life. The National Federation of the Blind reports more than 70% of this population are unemployed, leaving most in poverty. BCB is the only nonprofit in Fayette County exclusively serving this vulnerable and underserved population at risk for isolation, depression, poor health and dependency on others.

Section 2

Eight of our 9 staff members are legally blind. To do our jobs each day, we rely on assistive technology such as screen-reading software, e.g., JAWS, ZoomText, and Fusion, which require massive amounts of RAM and more powerful processors to function along with other office programs or work with Internet browsers. Without the RAM and processors it takes to run the assistive software, our staff battles constant lagging and frozen computers. For persons who need to magnify the screen larger than 2x or 3x, an HD screen or higher quality monitor can make a huge difference on eye strain and making out letters and graphics when enlarged.

In addition, one of BCB's main services is training on assistive technology. BCB offers group and one-on-one training to consumers experiencing vision loss as a regular service to our consumers, and we have recently become the preferred vendor to OVR for assistive technology training for their clients as well.

The funding from this grant would be used to purchase desperately needed high-RAM lap and desktop computers with high-speed processors and high-definition screens that would enable our staff to experience seamless, quick and productive workdays with the accessible tools they need, along with the RAM and screen quality necessary to successfully demonstrate and train others on these various types of accessible programs.

The high system specifications of the specific computer systems being requested will allow us to meet the current industry standards. As assistive technology advances, it is necessary for BCB to stay as up to date as possible. When our clients reach out to us for help, we need to know about the accessible platforms that work best and which tools

they can use to accomplish their goals. Being able to use the same tools we recommend to our clients is imperative for our staff to perform their duties.

Without the requested systems our staff and consumers experience the following challenges:

- system performance degradation, often to the point of being unusable, especially when using multiple applications. This can be especially true when using Outlook, Excel and Word. Using these applications together with accessible software – even at minimum or even recommended specifications – can cause the system to become unresponsive, crash or shutdown. When a person who is visually impaired can't see the screen and the reader locks up, he/she is completely helpless without the assistance of a sighted person to read the pop-ups created by issues or determine the reason for the lack of speech output.
- Speech becomes erratic and can lag to the point that the user can't be sure whether speech is following where you are on the screen.

These issues can dramatically impact someone's ability to perform their work and duties, not to mention the frustration and stress it brings to those who face this loss of productivity and independence. It can have a seriously negative impact on a person's attitude, motivation and self-esteem. The ability to work with high-capacity systems will not only encourage our clients but also help us more fully empower our staff, both in the office and on the go.

Section 3

The Bluegrass Council of the Blind has been managing grants and grant reporting for decades. Our Executive Director has 10 years of successful grant writing and management experience here at BCB, and our Deputy Director has almost 3 years' experience successfully managing our organization's grants, including those from the United Way of the Bluegrass, LFUCG ESR grant program, Linda Neville, Blue Grass Community Foundation and more. Over the last 10 years, our team has grown the BCB budget from \$69,000 in 2012 to over \$220,000 in 2022, allowing us to continue to increase employees, programs and people served. Grants make up 70% of our agency budget. As an organization, we approach grants and grant reporting from a team perspective with everyone on staff understanding what we are proposing in a grant, what our numbers are, how we are tracking them and what each of their responsibilities are to ensure that we achieve and track those numbers and outcomes.

As this project is mainly sourcing, buying, installing and networking computer equipment, BCB's Information Technology/Cybersecurity Manager Richard Sizemore will be carrying out the purchasing, installation and management of the technology purchased with funds from this grant. Richard has more than 20 years' experience as a computer and accessibility consultant, including 8+ years' experience in technology training for the blind/visually impaired and individuals with multiple disabilities at organizations such as the Office of Vocational Rehabilitation, the Kentucky School for the Blind and Independence Place. He is a Novell Certified Systems Administrator, a CIW-certified web developer and CIW Web Foundations certified Associate, a CompTIA IT Operations Specialist, a Microsoft Certified Professional, and is CompTIA A+

certified, CompTIA Network+ certified, CompTIA Project+ certified, JAWS and ZoomText certified, and ITIL 4 certified. He will be Security+ certified within the next 6 months and is currently working on a Bachelor of Science in cybersecurity and information assurance.

BCB has a sound fiscal history, demonstrating cash flow that maintains sufficient funds to cover several months of expenses along with additional emergency reserves that would ensure stability for at least six months of expenses, if needed.

We acknowledge that we have read and agree to comply with all ARPA Requirements as listed in the RFP as they pertain to this project.

Section 4:

Because this grant is based on reimbursement, we plan to purchase the equipment in two stages. Upon notification that we have been awarded the grant, we will start the purchasing process in the following order: 1. desktop computer equipment (computers, connectivity, keyboards, monitors, mice, accessible software); 2. Laptop computers.

In our request for estimates, we asked that each vendor give us assurances that prices and availability would remain consistent through April 2023, to the best of their ability.

All purchases will be finalized by April 2023, and we estimate the project will take 4 additional months after all equipment is inhouse to complete all installation and networking, which would put the project finish date at end of August 2023.

This project has a team of four: BCB's IT/Cybersecurity manager will manage the purchases and installation of the items and systems; our office manager will assist with record keeping and project organization; and our deputy director will manage the reporting. BCB's executive director will oversee and guide the project overall.

The staff will be paid as part of their regular hours. BCB's IT/Cybersecurity manager is currently part time; we have budgeted for him to come on full time as of July 1, 2022.

Our deputy director has also had additional hours budgeted for the 2022/2023 Fiscal year.

Should this project need additional funding, we would contribute funds we acquire from our annual fundraising campaigns and corporate solicitations.

Section 5:

We requested estimates from eight companies and received three estimates by the deadline (see attached estimates):

Computers Plus Repair in Lexington was the lowest estimate at \$59,495.97 for BCB's computer upgrade project. Zetta Code, LLC, also in Lexington, came in a close second at \$61,670.89. The third estimate, from Newegg.com, a well-known national technology company was several thousand higher and did not include FUSION software or keyboards – an additional \$10,000 cost (see newegg combined estimate attached). If we are awarded the grant for this project, Computers Plus Repair would be the winning estimate.

Because managing and implementing this project will be part of regular job expectations for the staff involved, there are no other costs other than equipment purchases for this project. Thus, the total cost of this project would be \$59,495.97 in equipment purchases.

Section 2

Our current security system is inadequate and outdated. The camera images are grainy at best and there is no sound. We also do not have the capability to save the footage.

The need for updating BCB's Security System Project is twofold:

- 1) The people BCB serves are a vulnerable population. The majority of the people who come into our offices to receive services are people who are blind or visually impaired. Many are older, frail and/or live with other disabilities. Eight of our 9 staff members, seven of our 9 board members and most of our regular volunteers are also blind or visually impaired. We need to update our security system to provide an environment in which our consumers, staff, board and volunteers feel protected, safe and comfortable. Risk management is of utmost importance for our organization and for the people we serve. We feel this is a necessary step to protect our staff, clients and assets and reduce risk.
- 2) We have been the grateful recipient of many grants that pay for high-tech devices for training and distribution, such as iPads, Amazon Echo devices, and expensive magnification equipment. We take our responsibility for those devices very seriously. An updated security system is necessary to help us responsibly maintain and protect that equipment, especially with a staff with low to no vision and an office that is open to walk-ins.

Using the configuration we have requested in the estimates will allow us great flexibility and the ability for:

- storage of security camera footage
- storage of recordings from our zoom meetings

- storage of recordings from our phone conversations.

The above recordings will be used for archival purposes and to assist us in developing our training programs further. It will also serve as a security and auditing tool. The large capacity is necessary to manage the large file sizes generated by the recordings listed above.

We are proposing this unit be configured in a RAID five with a dual redundancy configuration. This will allow for persistent continual backup of all our data including the recordings. This unit also:

- offers the ability to provide backup services to office 365.
- provides data storage and backup services in a manner that reduces the risk of data loss.
- will replace our existing file server and allow us plenty of room for growth and future projects.
- This security system/fileserver system is the best of both worlds allowing us to maintain accurate observations of interactions with clients while providing us the data storage infrastructure that we need to grow our agency into the future. Because BCB is a community of people who are visually impaired, there is an increased risk for others to take advantage of certain situations. Having security cameras can be very effective in deterring unwanted behaviors while protecting our consumers, our staff and equipment. Having access to the recordings of our phone interactions allows us to perform audits of phone interactions, ensuring compliance with agency policies, procedures and quality of service.

Section 3

The Bluegrass Council of the Blind has been managing grants and grant reporting for decades. Our Executive Director has 10 years of successful grant writing and management experience here at BCB, and our Deputy Director has almost 3 years' experience successfully managing our organization's grants, including those from the United Way of the Bluegrass, LFUCG ESR grant program, Linda Neville, Blue Grass Community Foundation and more. He will be Security+ certified within the next 6 months and is currently working on a Bachelor of Science in cybersecurity and information assurance.

BCB has a sound fiscal history, demonstrating cash flow that maintains sufficient funds to cover several months of expenses along with additional emergency reserves that would ensure stability for at least six months of expenses, if needed.

We acknowledge that we have read and agree to comply with all ARPA Requirements as listed in the RFP as they pertain to this project.

Section 4:

Our lease at our current location is up next year, and because we have outgrown our current office and meeting space, we are actively looking for a new facility in Lexington, with more space for both employees and our consumers, especially a larger group meeting space and a computer lab for small group trainings. These are spaces we hope to be able to make available to other nonprofits serving mutual and similar clients, such as Independence Place, which serves people with all types of disabilities in Fayette and surrounding counties. Our goal is to find office space large enough to house both BCB and Independence Place staff, while being able to share large meeting space and a computer lab. If we are successful, this equipment could empower us to provide a safe, convenient and accessible location for clients of both organizations in one place.

Our timeline for this project is to begin purchasing the security equipment once we have signed a lease on a new facility, which we hope to be in the first quarter of FY 2023. In our request for estimates, we asked that each vendor give us assurances that prices and availability would remain consistent through April 2023, to the best of their ability. All purchases will be finalized by April 2023, and we will begin installation upon arrival, with an estimated project completion of end of December of 2023. We are in negotiations on a location which would potentially house both BCB and our partner agency, Independence Place.

This project has a team of four: BCB's IT/Cybersecurity manager will manage the purchases and installation of the security items and systems; our office manager will assist with record keeping and project organization; and our deputy director will manage the reporting. BCB's executive director will oversee and guide the project overall.

The staff will be paid as part of their regular hours. BCB's IT/Cybersecurity manager is currently part time; we have budgeted for him to come on full time as of July 1, 2022. Our deputy director has also had additional hours budgeted for the 2022/2023 Fiscal year.

Should this project need additional funding, we would contribute funds we acquire from our annual fundraising campaigns and corporate solicitations.

Section 5:

We requested estimates from eight companies and received three estimates by the deadline (see attached estimates):

Computers Plus Repair in Lexington was the lowest estimate at \$10,800.13 for BCB's Security System Upgrade project. Zetta Code, LLC, also in Lexington, came in a close second at \$11,194.87. The third estimate, from Newegg.com, a well-known national technology company was several thousand higher. If we are awarded the grant for this project, Computers Plus Repair would be the winning estimate.

Because managing and implementing this project will be part of regular job expectations for the staff involved, there are no other costs other than equipment purchases for this project. Thus, the total cost of this project would be \$10,800.13 in equipment purchases.
