

..Title

Resolution request by the Division of Enhanced 911 authorizing the Mayor to approve seven (7) new circuits at the Public Safety Operations Center (PSOC).

..Summary

E911 intends to move a Selective Router and Controller that handle 911 calls for Lexington and the Central Kentucky 911 Network from the Fire HQ facility we previously occupied to the Public Safety Operations Center. This will allow for ease of maintenance and access in a more secure facility. To move this hardware, telephone circuits must be ordered and installed in advance. After the hardware is moved, the circuits at Fire HQ will be cancelled. There will be a few months of overlapping expenses until the existing circuits are cancelled and E911 is prepared to meet those expenses.
