MEMORANDUM
Lexington, Kentucky

DATE OF ISSUE
02/23/2022

EFFECTIVE DATE

NUMBER
TS2022-007

TO:
Assistant Chief Eric Lowe

Bureau of Administration

FROM:
Commander Ann Welch

Bureau of Administration- Training Section

SUBJECT:
Request for Sole Source- MT2 Firing Range
Services

I would like to request a Sole Source contract with MT2 Firing Range Services. We have FY21 funding for this contract in 71205, Professional Services- Engineer.

MT2 (Metals Treatment Technologies) provides lead maintenance services in accordance with applicable Federal, State, and local safety and environmental regulations. Based upon our reported range usage, as maintained by Range Officer Crayner, MT2 will recover and recycle 10-12 tons of lead from the backstop berms and apron areas. They ensure 80-90% of lead bullets and bullet fragments are removed.

MT2 has all certified crews who will restore the berms and clean the range upon completion of reclamation of lead. Documentation, including waste manifests and lead reclamation certificates are provided within 1-2 weeks of project completion. Lead reclamation proceeds offset the cost of services.

MT2 guarantees, through their ECOBOND soil treatment process, to meet US EPA Resource Conservation and Recovery Act guidelines of hazardous lead Toxicity Characteristic Leaching Procedure to reduce leachability of lead into surface soils and reduce the potential for lead infiltration to groundwater.

Sole Source form and MT2 explanation of services and proposal is attached.

Please advise if you require further.
