Data Exchange Description

An application programming interface (API) is established between Lexington-Fayette Urban County Government (LFUCG) and the Administrative Office of the Courts to allow data related to paper citations entered by the Lexington Police Department (LPD) to be received by the Fayette County Circuit Clerk’s Office and incorporated into the KYCourts 3 application.

API Process

LPD enters data into the Tyler Technologies *Computer Aided Dispatch* record management system. Data with the structure described below is compiled into a comma-separated value (csv) file. This file is uploaded to AOC’s secure File Transfer Protocol (FTP) site.

A daily job imports this data to KYCourts 3 each morning.

Staff in the Fayette County Circuit Clerks Office access this data in KYCourts 3 with the *Citation Add* function. Entering a citation number populates information from the imported data matching this citation number which may then be modified and saved to be part of the KYCourts 3 Charge data.
