Tiffany Rank, P.E. Lexington-Fayette Urban County Government 301 Lisle Industrial Avenue Lexington, KY 40511

Re: Town Branch Primary Digester Complex Improvements

Dear Tiffany:

This letter documents the proposed change in project scope for making improvements to your existing facilities to comply with NFPA 820 (Standard for Fire Protection in Wastewater Treatment and Collection Facilities, published by National Fire Protection Association). NFPA 820 was first authored in 1990 and updated several times with the latest version dated 2016. Anaerobic Digesters and related structures and equipment are included in Chapter 4, Table 4.2 of NFPA 820 with specific recommendations for best design practices. NFPA 820 has not been adopted in Kentucky, but is used by design professionals as a guide for designing wastewater facilities. We have discussed this pending change and our compliance approach in several meetings.

The existing anaerobic primary digester complex does not meet the standards promoted by NFPA 820. During this complete upgrade to the Primary Digester Complex, we recommend LFUCG make certain improvements to bring your facilities into conformance with NFPA 820 recommendations. These improvements include:

- Locating the HVAC air supply equipment outside of the hazard classification areas.
- Closing up doors and windows to separate nonhazardous areas from hazardous classified areas.
- Extending the northwest entrance into the building to be outside of the 10-foot external digester radius.
- Isolating the three digester gas handling equipment rooms from other spaces through structural barriers and providing separate access for these rooms.
- Eliminating roof penetrations within 10 feet of any digester.
- One additional consequence of these changes is to relocate the sludge hot water heaters (boilers) to the existing Engine/Blower building.

Our construction cost opinion for these changes increases the capital costs from about \$9.4M to \$10.4M.

In addition to the higher construction costs, we are requesting an amendment to our engineering agreement for the additional design scope. The following table summarizes the requested scope change amendment. Details are attached with this letter.

Tiffany Rank, P.E. Lexington-Fayette Urban County Government Page 2 December 21, 2016

Task	Change to Strand Contract	Change to Magna Contract	Change to Cornerstore Contract	Total Change
Code review, compliance strategy, and meetings	\$9,700	\$0	\$0	\$9,700
Relocate Boilers to Engine/blower Building	\$22,200	\$0	\$0	\$22,200
NFPA 820 Structural Design changes	\$0	\$0	\$57,643	\$57,643
Additional Structural Design	\$0	\$0	\$35,570	\$35,570
Additional subconsultant interaction	\$6,000	\$0	\$0	\$6,000
Total Change	\$37,900	\$0	\$93,213	\$131,113

Thank you for your consideration of these improvements and amendment. We are available to meet and discuss these recommendations further. We will continue design of the elements that are not impacted by these changes in scope. We can have the improvements designed and ready for bidding ten weeks after approval of the amendment.

Sincerely,

STRAND ASSOCIATES, INC.*

Michael L. Davis, P.E.

Mark A Sneve P.F.

Re: LFUCG Town Branch WWTP Primary Digester Complex Improvement Project - Structural Engineering Services Proposal - Additional Scope - Rev 1: Fees itemized as indicated [].

Dear Mr. Sneve,

Per request, we are pleased to submit this proposal for providing our Structural Engineering and Architectural Services for the Additional Scope on the above referenced project. Our additional scope consists of two major parts. Part I includes items associated with NFPA Classified Area separations as outlined per the meeting at your office on November 16. Part II includes design of detailed structural repairs as described in our preliminary engineering report (PER).

Part I - Architectural and Structural Design Phase Services associated with NFPA Classified Area separations.

1) New Two Story Entrance and Exterior Stair to Mezzanine level: [\$20,025.00] We will require the input information from the owner with regard to planning. We assume the foundation system to be a shallow foundation and of poured-in-place reinforced concrete. The load bearing walls will be of reinforced block masonry with brick veneer. The 2nd floor and roof structures will be of hollow core concrete planks. Also included is an adjacent exterior (open) stair from grade level to the Mezzanine level. New openings are required through the existing exterior wall at the Mezzanine level which may require structural reinforcements.

Our scope also includes design of architectural elements (roofing, flashings, brick veneer, doors etc.)

2) New stair from first floor to basement: [\$3,962.00] An opening through the existing first floor structural slab is required which will require structural reinforcement. Design of the stair is included in our scope.

Other items include:

- 3) Close off existing stair well between 1st floor and Mezzanine level. [\$2,610.00]
- 4) Infill roof hatch and mechanical openings. [\$3,116.00]
- 5) Investigation of [possible] load bearing masonry walls at boiler room which are to be removed and design of permanent shoring. [\$6,622.00]
- 6) Infill of various door & window openings. [\$3,050.00]
- 7) Analysis of existing roof structure to support new HVAC unit and design of steel supports to distribute load. [\$6,655.00]
- 8) Infill material and new slabs at existing pits at generator building for equipment support. [\$1,610.00]
- 9) Attend Progress Meetings, coordination, etc. [Included above.]
- 10) Three Site visits. [Included above.]

Phone: (502) 493-2717 www.cei-engineering.com Fax: (502) 491-4824

Commitment Excellence Integrity

2302 Hurstbourne Village Dr., Ste 1000 Louisville, KY 40299 Phone: (502) 493-2717

ione: (502) 493-2717 Fax: (502) 491-4824

Our fee to perform the above Design Phase scope of Part I is \$47,650.00 [See itemized fees for each item.]

Bid Phase Services:

We will address bidders' questions raised during the bidding process and prepare addenda as required for Structural Scope and send our responses to Strand.

Our fee to perform the above Bid Phase Services scope of Part I is \$838.00. [Minimum fee for Bid Phase.]

Construction Phase Services:

We will answer (7) RFIs [\$3,400.], perform four (4) site structural inspections and provide reports summarizing inspection findings [\$3,200], shop drawings review, and correspond through emails and phone calls during construction phase [\$2,605.]

Our fee to perform the above Construction Phase Services scope of Part I is \$9,205.00 [Itemized above.]

Total PART I = \$57,643.

Part II - Design of Structural Rehabilitation Repairs

These include the following:

- a) Structural reinforcement of stairwell walls where extensive cracking has occurred. [\$10,403.00]
- b) Apparent cracks and seepage at digester tank pipe penetrations and other locations. [\$11,450.00]
- c) Brick and copings on digester tanks. [\$8,738.00]
- d) Cracks and deteriorating lintels in building brick. [\$2,845.00]
- e) Deterioration at south walkway and steps. [\$2,134.00]

We will provide necessary design, CAD drawings and specification for the scope included in this proposal. Also, we will perform one site visit at the beginning of the design phase and perform internal QA/QC review and address any review comments received.

Our fee to perform the above Design Phase scope of Part II is \$35,570. [See itemized fee for each item.]

Bid Phase Services:

We will address bidders' questions raised during the bidding process and prepare addenda as required for Structural Scope and send our responses to Strand.

Our fee to perform the above Bid Phase Services scope is \$711.00 [Minimum fee for Bid Phase.] Construction Phase Services:

We will answer (4) RFIs [\$1,943.], perform four (4) site structural inspections and provide reports summarizing inspection findings [\$3,200], shop drawings review, and correspond through emails and phone calls during construction phase [\$1,950].

Our fee to perform the above Construction Phase Services scope of Part II is \$7,093.00 [Itemized above.] Total PART II = \$35,570.

Phone: (502) 493-2717 www.cei-engineering.com Fax: (502) 491-4824

MAYOR JIM GRAY

CHARLES H. MARTIN, P.E. DIRECTOR WATER QUALITY

TO:

Mayor Jim Gray

Urban County Council

FROM:

Charles H. Martin, P.E., Director Division of Water Quality

DATE:

January 19, 2017

SUBJECT:

Change Order #1; Town Branch WWTP Primary Digester Complex Improvements

Request

The Division of Water Quality request approval of Change Order #1, to Strand Associates, Inc..; the design consultant for the Town Branch WWTP Primary Digester Improvements.

Purpose of Request

The increase to the contract includes additional design cost and scope changes for making improvements to the existing Primary Digester Complex to comply with NFPA 820 (Standard for Fire Protection in Wastewater Treatment and Collection Facilities, published by National Fire Protection Association). The existing primary digester complex was completed in 1989. NFPA 820 was authored in 1990. The non-compliance became apparent when reviewing the scope with mechanical engineers. The issues that will be corrected include the relocation of air supply equipment, separating nonhazardous and hazardous classified areas, isolating digester gas handling equipment, and relocating boilers.

Project Cost in FY17 Budget and Future Budget Years

FY17 – Approval of this change order results in an increase of \$ 131,113.00 to the contract. The revised contract amount including this change order will be \$605,635.00 representing a 27.63% increase of the original contract amount.

Future Budget Impact –This change order will not have an impact on future budget years but the overall change in project scope will increase the construction costs for the project. The RMP schedule construction cost estimate is \$3,525,000. Meeting the NFPA 820 standard will escalate the project cost to an estimated \$10.5 M.

Are Funds Budgeted
