  - Trends can be tracked by running reports that can include all shipping locations, or that can be tailored to a specific shipping address.
  - A purchase summary report can be self-generated to view total products purchased over a selected period of time.
  - The purchase summary report can be sorted in ascending order by total sales per item.
  - Purchase summary reports and items per month reports can be self-exported in spreadsheet format for additional evaluation.
  - The purchase summary report provides item usage totals based on monthly, quarterly and yearly expenditures.
  - Reports can be self-exported in spreadsheet format.
- d. Product name, short description and detailed descriptions are maintained for items on BoundTree.com. Product photography is uploaded to the website based on manufacturer availability. Custom photography is also available to supplement manufacturer-supplied items.

RE: Price Adjustments Due to Tariffs

To Whom It May Concern:

As has been widely publicized, new tariffs have been implemented on certain imported goods, including medical supplies. While these tariffs are expected to impact pricing on products your agency purchases from Bound Tree, we remain committed to securing inventory at the most competitive prices and providing great value to our customers.

In an effort to mitigate cost increases, Bound Tree has been actively collaborating with key manufacturers and suppliers ("Suppliers") to identify alternative sourcing options, manage costs, and inventory levels. However, if Bound Tree receives a price increase from a Supplier for a product that was awarded pursuant to a bid and such price increase is related to a tariff, Bound Tree will notify you of the price increase, as well as the effective date in which your agency should expect a corresponding change (if any) in its pricing. Bound Tree will also strive to provide any relevant pricing documentation received from the Supplier. If your agency elects not to accept a proposed price increase, Bound Tree reserves the right to remove the affected product(s) from the contract or offer an alternative product, which may be subject to different pricing.

Please be assured, Bound Tree will continue to monitor the status of existing tariffs, in addition to any proposed new tariffs. If and when there is a change in tariffs (e.g. reduction or elimination), Bound Tree will attempt to adjust your pricing accordingly.

We appreciate your understanding and continued partnership as we navigate these evolving market conditions.

Sincerely,

A handwritten signature in black ink that reads "Rob Meriweather". The signature is fluid and cursive, with a long horizontal stroke at the end.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

VAWD accreditation is achieved after a criteria compliance review that includes a rigorous evaluation of operating policies and procedures, licensure verification, survey of facility and operations, background checks and screening through the NABP Clearinghouse. Our accreditation demonstrates that we are in compliance with state and federal laws and that our prescription drugs are distributed safely and securely.

For a complete listing of VAWD-Accredited Facilities, please visit:

### Compliant with DSCSA Requirements

Under the Drug Supply Chain Security Act (DSCSA), entities in the supply chain including manufacturers, wholesale distributors, and dispensers have responsibilities to meet the requirements of the DSCSA. As of May 1, 2015 all wholesalers are required by law, under the DSCSA, to provide transaction information, transaction history and transaction statements for the pharmaceuticals that they supply.

Bound Tree is compliant with these FDA standards which helps improve patient protection by preventing the distribution of substandard or ineffective drugs and while providing our customers with the product and transaction information they need to be in compliance with the FDA standards.

Under the DSCSA you are responsible for knowing that your prescription drug wholesale distributor is an authorized trading partner who holds a valid state or federal license. Bound Tree Medical is licensed federally and in all 50 states. Purchasing from a licensed and VAWD accredited distributor like Bound Tree Medical makes great strides to ensure none of your purchases will ever be counterfeit, contaminated, improperly stored and transported, ineffective, and/or unsafe.

Wholesaler Distributor licenses can be searched online:

## Current situation.

---

- **Financial challenges plague EMS** across all delivery models; rural EMS is in a crisis. Low reimbursements from CMS & commercial insurers, frequently below the cost of the care provided, and lack of funding to support EMS have been the primary contributing factors.
- **High levels of stress, fatigue and burnout** among the EMS workforce. Workforce shortages as reported in national news are exacerbating an already very challenging environment.
- **EMS is a small percentage** of the consumption of PPE within the healthcare market and was left under-allocated for PPE during the pandemic.
- **EMS impacted by shortages and short expiration dates** on critical cardiac arrest and respiratory therapy drugs. Pharmaceutical companies prioritize large hospital GPOs & IDNs over EMS
- **Inefficiencies in using the Strategic National Stockpile** to provide critical PPE to EMS agencies who were the “Tip of the Sword” during the pandemic
- **Community paramedicine** remains an underutilized asset in local healthcare systems due to the lack of reimbursement for this highly cost effective, patient-centered type of care

## Advocating for EMS.

---

- **Increased sourcing efforts** during the pandemic, making financial investments in PPE inventory.
- **Partnered with US government** to address challenges in getting FDA-approved products, given significant counterfeit in N95 masks and gloves.
- **Volunteered to assist** FEMA, HHS, DHS, DoD, FDA and CDC officials as “Voice of EMS” for Committee for the Distribution of Medical Resources Necessary to Respond to a Pandemic, advocating for effective distribution of PPE to first responders.
- **Advocated for increased allocation and funding** for EMS and hardest-hit communities through outreach to over 35 congressional offices.
- **Providing critical data monthly** to HHS Preparedness and Response teams, providing them greater visibility of PPE needs for EMS during the COVID-19 pandemic, as well as future pandemics and natural disasters.
- **Working with the Federal Maritime Commission** and west coast terminal operators to prioritize essential medical supplies at US ports.

## How Congress can help.

---

- **Adjust the ambulance fee schedule** to cover the cost of the emergent, urgent and preventive care provided by EMS, and include reimbursement for treatment in place, transport to alternate designations, telemedicine facilitation, and community paramedicine.
- **Support Bound Tree’s efforts** with pharmaceutical companies and the FDA to prioritize production of key lifesaving drugs for EMS at reasonable costs, as well as to reduce the amount of “short expiration dates.”
- **Fully fund the SIREN Act** (Support and Improving Rural EMS Needs) in FY2022.
- **Support efforts to strengthen** America’s Strategic National Stockpile by directing SNS to partner with healthcare distributors to manage PPE during pandemics and natural disasters.
