ONE YEAR CORRECTION PERIOD

If within one (1) year after the date of completion or such longer period of time as may be prescribed by laws or regulations or by the terms of any applicable special guarantee required by the Contract Documents or by any specific provision of the Contract Documents, any work is found to be defective, Contractor shall promptly, without cost to Owner and in accordance with Owner's written instructions, either correct such defective work, or, if it has been rejected by Owner, remove it from the site and replace it with non-defective work. If Contractor does not promptly comply with the terms of such instructions, or in an emergency where delay would cause serious risk of loss or damage, Owner may have the defective work corrected or the rejected work removed and replaced, and all direct, indirect, and consequential costs of such removal and replacement (including but not limited to fees and charges of engineers, architects, attorneys, and other professionals) will be paid by Contractor. In special circumstances where a particular item of equipment is placed in continuous service before completion of all work, the correction period for that item may start to run from an earlier date if so provided in the Specifications or by Change Order.

WEATHER LIMITATIONS

MIXING

Weight tickets for the asphalt cement shall be used in determining the above proportion of fiber to be blended. The crack sealing material shall be blended in an oil-jacketed double walled kettle equipped with full sweep agitator and reverse rotary auger, capable of maintaining the mixture with separate thermometers for oil bath and melting vat. Unit must

also be equipped with a pump (equal or better than Roper 2" hot asphalt pump). Temperature of the sealant shall be maintained between 265F and 295F.

PREPARATION

Prior to the application of the sealant, joints and cracks may be thoroughly cleaned by the use of compressed air. This tool should put out a blast of air between 75 to 150 P.S.I. to remove dust, dirt, moisture, vegetation, and other foreign material that will prevent bonding of the sealant. These areas shall be kept clean and dry until all sealing operations are completed. Whenever moisture is present, a hot compressed air lance shall be used. This tool should put out a blast of air between 75 to 150 P.S.I. and heated between 600F and 2000F that cleans and removes all vegetation and dries out the cracks to maximize sealability.

Sealing shall be limited to cracks that are open enough to permit entry of the sealant. Tightly closed cracks (less than 1/4 inch) shall only be sealed if they show signs of raveling or spalling. Spalls and cavities, which are greater than four (4) inches in diameter, shall not be sealed.

INSTALLATION

The sealant shall be placed with an applicator head, which will completely fill the crack and leave a 2.0 to 4.0 inch width band with a thickness of 0.065 to 0.125 inches. A one-ton to three-ton roller shall be used to compress the crack sealing material in the crack or joint to ensure a good bond, if deemed necessary by the Director of Streets & Roads or his representative.

MANUFACTURER'S REPRESENTATIVE

The sealant manufacturer's technical representative shall be notified by the Contractor and shall be present during the initial installation. Operations and procedures, which are considered by the representative as being detrimental to the effectiveness of the sealant, shall not be permitted.

TRAFFIC CONTROL

The Contractor shall be responsible for providing all traffic control devices, flagmen, etc. required to properly and safely maintain traffic. All traffic control devices shall be furnished, erected, maintained, and removed by the Contractor. An arrow board shall be used for all work and cone spacing shall be 50' maximum. Traffic control will be as directed by the Division of Traffic Engineering and a permit must be obtained before any work is performed on any particular street.

BASIS OF PAYMENT

Payment for this work will be made at the contract unit price for preparation and sealing of joints and/or cracks in the existing pavement, complete in place, which price includes all materials, equipment, tools, traffic control, and labor incidental thereto.
