## EQUAL OPPORTUNITY AGREEMENT

### Standard Title VI Assurance

The Lexington Fayette-Urban County Government, (hereinafter referred to as the "Recipient") hereby agrees that as a condition to receiving any Federal financial assistance from the U.S. Department of Transportation, it will comply with Title VI of the Civil Rights Act of 1964, 78Stat.252, 42 U.S.C. 2000d-4 (hereinafter referred to as the "Act"), and all requirements imposed by or pursuant to Title 49, Code of Federal Regulations, U.S. Department of Transportation, Subtitle A, Office of the Secretary, (49 CFR, Part 21) Nondiscrimination in Federally Assisted Program of the Department of Transportation – Effectuation of Title VI of the Civil Rights Act of 1964 (hereinafter referred to as the "Regulations") and other pertinent directives, no person in the United States shall, on the grounds of race, color, national origin, sex, age (over 40), religion, sexual orientation, gender identity, veteran status, or disability be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity for which the Recipient receives Federal financial assistance from the U.S. Department of Transportation, including the Federal Highway Administration, and hereby gives assurance that will promptly take any necessary measures to effectuate this agreement. This assurance is required by subsection 21.7(a) (1) of the Regulations.

- Executive Order No. 11246 on Nondiscrimination under Federal contract prohibits employment discrimination by contractor and sub-contractor doing business with the Federal Government or recipients of Federal funds. This order was later amended by Executive Order No. 11375 to prohibit discrimination on the basis of sex.
- Section 503 of the Rehabilitation Act of 1973 states: *The Contractor will not discriminate against any employee or applicant for employment because of physical or mental disability.*
- Section 2012 of the Vietnam Era Veterans Readjustment Act of 1973 requires Affirmative Action on behalf of disabled veterans and veterans of the Vietnam Era by contractors having Federal contracts.

The Lexington-Fayette Urban County Government practices Equal Opportunity in recruiting, hiring and promoting. It is the Government's intent to affirmatively provide employment opportunities for those individuals who have previously not been allowed to enter into the mainstream of society. Because of its importance to the local Government, this policy carries the full endorsement of the Mayor, Commissioners, Directors and all supervisory personnel. In following this commitment to Equal Employment Opportunity and because the Government is the benefactor of the Federal funds, it is both against the Urban County Government policy and illegal for the Government to let contracts to companies which knowingly or unknowingly practice discrimination in their employment practices. Violation of the above mentioned ordinances may cause a contract to be canceled and the contractors may be declared ineligible for future consideration.

- 1.6 When responding to routine work orders, the contractor shall bring the appropriate parts from inventory that could reasonably be expected to need replacement, to include batteries, amps, fuses or other parts appropriate to the work order request. This is to prevent redundant service charges for the same work order.

- 2.1 In the event of approaching severe weather, and at DEM's discretion, contractor must be able to commence onsite emergency siren repairs / inspection within 2 hours.

9.0 Siren Installation

Installation or replacement of existing sirens or refit of the same will be performed as required. This provision will include replacement of mounting poles and all associated electrical requirements to make the siren functional.

10.0 AM Radio Interstate Signs Troubleshooting and Maintenance

10.1 Signals fail to operate, follow these troubleshooting procedures:

10.1a at the Control Point:

- Verify the activation sequences.
- Verify that the sequences are appropriate to operate the FAS6000(s).

10.1b at the FAS6000PV Site:

- Determine if any damage has occurred to the system or sign structure.
- Check for debris, snow or excessive shading from nearby foliage. Remove any obstruction. Determine if the photovoltaic panel is still facing south. If it is not, reposition it. Allow the battery to charge for 3-7 days without use and test it again at that time.
- Make sure the conduit and beacons appear to be undamaged. Repair if necessary.
- In the Security Enclosure if none of the component indicator lights are on, check the battery fuse with an ohmmeter. Replace with a 10-amp AGC fuse if necessary.

- 10.2 Activate the system via the command center or a hand held transceiver. The ALERT LED on the TAR will begin to flash and an audible alarm should sound. If the LED beacons are not flashing, proceed to the next troubleshooting step.
- 10.3 If the SS6L Controller "Load Disconnect" LED is on, disconnect the battery and measure its charge with a voltmeter. If the battery voltage is below 12.6 volts, it might be that insufficient solar radiation has been gathered for operation. It also might be that the beacons have operated for a length of time sufficient to discharge the battery below 11.5 volts. Allow the system to recharge for 3 days without use and test it again.
- 10.4 If the battery voltage is above 12 volts, one of the load components might be damaged. Or there could be an electrical short in the wiring. Scan the wiring for obvious crossed polarities, and refer to the wiring diagram for repair. If the wiring is not at fault, disconnect power from each component and observe the "Load Disconnect" LED. Do this one component at a time. If the
- 10.5 "Load Disconnect" LED goes out, the problem lies within the last component you disconnected. Send it to ISS for service or replacement.
- 10.6 If none of the above tests produce positive results, test the beacon operation by pressing the test switch. The LED beacons should flash. If the beacons do not flash, then the ASFC Controller might need servicing, or the problem lies in the beacons.
- 10.7 Make a visual inspection. Look for insects and other pests that might have entered the transmitter enclosure. If there is physical damage to the system lightning damage to the antenna, solar panel and other external components, look for dark marks or other obvious damage, cables or wires that might have become damaged, loose, or corroded at connection points. Replace or reconnect and use silicone to prevent weathering, dust and dirt. Clean it from the surfaces of panels and components with a damp cloth or spray cleaner.
- 10.8 Check voltage or battery in your system. If the positive lead going to the battery or battery pack has an in line fuse or breaker first remove the fuse or turn OFF the breaker to isolate the batteries from the charger system that maintains them. If there is no fuse just slide the positive lead from the positive terminal of the battery to accomplish this.
- 10.9 Test each battery with a volt-ohm meter set to measure DC voltage. Your batteries had standing voltages of about 12.8 volts when new. If healthy they will show a charge of great than 12 volts. Replace batteries that do not meet 12 volts.
