October 18, 2016

This Memorandum is entered into by Eastside Technical Center (Fayette County, Kentucky Public Schools) hereinafter referred to as Eastside and the City of Lexington Fire and Emergency Services, hereinafter referred to as the LFD. Eastside is engaged in a training partnership for secondary students in the area of fire science, safety, and response. The LFD, by established investment in the youth of our community, and in cooperation with the Kentucky Fire Commission, provides professional resources, training equipment, and a variety of practical learning experiences while Eastside provides facilities, instructional support, and supplies.

The parties are desirous in regard to providing an exceptional fire training program to students that establishes the standard for other programs within the Commonwealth and the nation. As such, the LFD is committed to providing Eastside with an operational fire apparatus, hereinafter referred to as Apparatus, for hands on practical training. In consideration for providing such equipment, Eastside agrees to provide an adequately secured and safe facility for the Apparatus to be stored. Eastside further understands and agrees that events may take place that require the LFD to use the Apparatus at a location other than Eastside and as such staff will be provided to provide timely access to the Apparatus when necessary.

A handwritten signature in blue ink that reads "D. Wade Stanfield" followed by a date "10-1-16".

D. Wade Stanfield, Principal
Eastside Technical Center
