This Article is intended to establish zones which allow for innovation which may not be accomplished using traditional techniques. While the traditional zones will continue to be available, this article is intended to establish Planned Unit Development zones, which will provide an alternative to the traditional zones.

It is further intended that the Planned Unit Development zones are established to encourage innovative design and the use of qualified professionals, to provide for flexibility which would not be possible using traditional techniques, to promote the efficient use of existing and proposed facilities, to minimize land use conflicts and promote development compatible with surrounding land uses, to provide a safe and efficient roadway system both for the Planned Unit Development and the surrounding area, to ensure that the development is responsive to the natural and man-made features of the site and to provide for development which will further the implementation of the adopted Comprehensive Plan.
