PROJECT PLAN ELEMENTS

The Tradition at Parks Edge Townhome Association, Inc. Feasibility Study will explore the opportunity to address current issues with stormwater runoff, flooding and better use of greenspace by residents with implementation of a green infrastructure stormwater management system. The Owner's mission is to make the residences safer from potential flooding situations in a sustainable manner, while making better use of this available land for passive recreation and habitat.

Project Elements

The Feasibility Study will identify appropriate BMPs for the 33-acre site of which half is open/green space. Potential practices may include bio-infiltration, rain gardens and other infiltration measures, vegetated swales and increased tree canopy and native plantings. BMPs will be identified to address water quality issues using criteria like the Sustainable SITES initiative, and other comprehensive rating systems for sustainable landscapes.

FINAL FEASIBILITY STUDY REPORT

The results of the Feasibility Study will be presented in a final report that will, at a minimum, include:

1. Proposed locations of project elements.
2. Conceptual designs, cross-sections, etc. of the proposed elements.
3. Maintenance plans, as applicable.
4. Design and construction cost estimates for each proposed project element.
5. Special design and construction considerations (*i.e.* 401 / 404 permitting).

In addition to the reporting requirements outlined in the Grant Award Agreement, the following special items are noted for this project:

1. Grantor shall provide a minimum of three (3) hard copies of the Final Feasibility Report along with one (1) digital copy.
2. All attachments to Request for Funds & Project Status Reports shall reference the associated line Table 2 – Project Eligible Expenses.

DESIGN

No grant-funded activities shall occur until the LFUCG Grant Manager gives Notice to Proceed, in writing, for the start of the project.

Design tasks will include meetings, survey, engineering design, permit submittals to the applicable local, state, and federal agencies, bidding, and construction.

Design shall also account for the following stipulations:

- 1) Submittals for stream permits (401 / 404) shall be completed as early as possible in the design process to inform the Design Engineer of alternatives that can be permitted without triggering state or federal mitigation requirements (if required).
- 2) The Design Engineer shall meet with the LFUCG Grant Manager for at least three meetings during the design phase:
 - i) Prior to the start of design
 - ii) At the completion of approximately 50% design
 - iii) At the 95% completion of the design documents

The Design Engineer shall provide a copy of the preliminary plans, calculations, and specifications (if available) representing 50% and 95% completion. These submittals shall be used to assist LFUCG staff in understanding the project components and allow for feedback to ensure the Government's funds shall be utilized for sustainable and effective infrastructure.

- 3) All existing utilities shall be located and shown on the design plans.
- 4) All existing easements, adjacent property lines, and rights-of-way shall be shown on the design plans. If any work is proposed to occur within any easement (*i.e.*, utility, etc.), whether public or private, the Organization shall obtain all necessary encroachment agreements from the authorized agencies prior to the start of construction.
- 5) Any work proposed within or on public right-of-way, easement, or LFUCG-owned property will require one or more permits or approvals. This includes installation permits for connection into any existing curb inlet or stormwater manhole located within public right-of-way. Please contact the appropriate staff:

Parks and Recreation, Chris Cooperrider – ccooperrider@lexingtonky.gov Environmental Services (greenways), Demetria Mehlhorn – dkimball@lexingtonky.gov Environmental Services (street trees), Heather Wilson – hwilson@lexingtonky.gov Engineering (right-of-way), John Cassel – jcassel@lexingtonky.gov

Engineering (new development), Hillard Newman – hnewman@lexingtonky.gov
Sanitary Sewers, Chris Dent – cdent@lexingtonky.gov
Stormwater, Mark Sanders– msanders@lexingtonky.gov

- 6) All federal, state, and local permits, approvals, and agreements required for construction of the proposed improvements shall be obtained prior to the start of construction. If the timing of construction is such that a permit may expire before construction can be completed, then the Organization shall coordinate with the LFUCG Grant Manager and permitting agencies on appropriate timing for permit submittals. The Organization is fully responsible to determine which approvals, permits, and encroachments are required for the project.
- 7) Erosion and sediment control and traffic control measures shall be designed to meet all standards and follow guidelines in the LFUCG Engineering Manuals, and shall be shown on the design plans with appropriate notes.

PERMANENT FACILITIES / INFRASTRUCTURE

Does not apply to this grant. Attachment B is not required for this Agreement.

EQUIPMENT

Any equipment purchased with the Grant shall remain the property of the Organization.

ADDITIONAL GRANT STIPULATION

Both electronic and hard copies of all materials are to be provided to LFUCG, for its use, as part of the grant deliverables.

GRANT PERIOD & PROJECT SCHEDULE

The grant period starts on the date of execution by the Mayor and extends for the time period as listed in the Grant Award Agreement. Any time extensions must be approved in writing by the LFUCG Grant Manager. The project schedule shown in Table 1 is preliminary. Proposed changes to the project which alter this schedule significantly shall be discussed with the LFUCG Grant Manager prior to implementation.
