EQUAL OPPORTUNITY AGREEMENT

The Law

- Title VII of the Civil Rights Act of 1964 (amended 1972) states that it is unlawful for an employer to discriminate in employment because of race, color, religion, sex, age (40-70 years) or national origin.
- Executive Order No. 11246 on Nondiscrimination under Federal contract prohibits employment discrimination by contractor and sub-contractor doing business with the Federal Government or recipients of Federal funds. This order was later amended by Executive Order No. 11375 to prohibit discrimination on the basis of sex.

· Section 503 of the Rehabilitation Act of 1973 states:

The Contractor will not discriminate against any employee or applicant for employment because of physical or mental handicap.

- Section 2012 of the Vietnam Era Veterans Readjustment Act of 1973 requires Affirmative Action on behalf of disabled veterans and veterans of the Vietnam Era by contractors having Federal contracts.

- Section 206(A) of Executive Order 12086, Consolidation of Contract Compliance Functions for Equal Employment Opportunity, states:

The Secretary of Labor may investigate the employment practices of any Government contractor or sub-contractor to determine whether or not the contractual provisions specified in Section 202 of this order have been violated.

The Lexington-Fayette Urban County Government practices Equal Opportunity in recruiting, hiring and promoting. It is the Government's intent to affirmatively provide employment opportunities for those individuals who have previously not been allowed to enter into the mainstream of society. Because of its importance to the local Government, this policy carries the full endorsement of the Mayor, Commissioners, Directors and all supervisory personnel. In following this commitment to Equal Employment Opportunity and because the Government is the benefactor of the Federal funds, it is both against the Urban County Government policy and illegal for the Government to let contracts to companies which knowingly or unknowingly practice discrimination in their employment practices. Violation of the above mentioned ordinances may cause a contract to be canceled and the contractors may be declared ineligible for future consideration.

Please sign this statement in the appropriate space acknowledging that you have read and understand the provisions contained herein. Return this document as part of your application packet.

I/We agree to comply with the Civil Rights Laws listed above that govern employment rights of minorities, women, Vietnam veterans, handicapped and aged persons.

The Lexington-Fayette Urban County Government Division of Police is seeking qualified installers of public safety mobile radio equipment. It is anticipated that installations will begin in May of 2013. The Division of Police may choose to award price contracts to one or more vendors.

1. Specifications

Type of radio

The mobile radio that the Division of Police will purchase is a TM9155 Tait Communications radio. This radio has the capability to be installed as a one piece dash mount or a two piece remote mount.

The installation includes the following:

Installation of an antenna and coax with connectors
Radio power connection with fuse and grounding
Installation of dash mount radio in vehicle console or two piece mount in console/trunk
Installation of radio repeat (PA) interconnect wires (two pin Molex connector)

Installed Vehicle Model:

2003 - 2010 Ford Crown Vic Interceptors

Installation requirements:

Proper installation of the equipment requires the installer to have a good understanding of automotive electronics systems and industry install procedures. Installers and shops must include with their submittals what industry training classes they have completed and how many years of experience in the electronics installation field.

All equipment to be installed needs to be properly and safely installed to the manufacturer's recommendations with final approval by Technical Services Unit's(TSU) personnel.

If mounting the equipment requires drilling holes, the installer must be sure that no vehicle components or other vital parts could be damaged by the drilling process. Check both sides of the mounting surface before drilling begins. Also, de-burr the hole(s) and remove any metal shards or remnants. Install grommets into all wire passage holes.

All supply wire that connects to the positive terminal of the battery must be sized to supply at least 125% of the maximum operation current and be fused at the battery to carry that load. If the hot side power wire is connected to the positive terminal on the battery, there must not be more than two feet of wire between the fuse and the battery and the fuse holder must be watertight and TSU approved. Vehicles that have approved remote power access points, other than directly to the battery, may only require the radio's factory fused power lead.

For the equipment to operate at optimal efficiency a good electrical connection must be

made. No splices. All connections need to be terminated by the installer in a manner approved by TSU and the manufactures recommendations.

Equipment ground wires are to be connected directly to the negative battery post unless alternate approved ground access points are given by TSU. Grounding to the body or frame of the vehicle is not allowed.

Do not install the equipment or route any wire in the deployment areas of the air bag. Equipment mounted or located in the air bag deployment area will damage or reduce the effectiveness of the air bag or become a projectile that could cause serious personal injury or death. Refer to the vehicle owner's manual for the air bag deployment area.

Uninstalling of old radio will include:

Removal of console control head and remote trunk mount unit
Any under the hood wires related to the old radio
All coax antenna wires related the old radio
Non-cut removal of the two interconnect cables related to the existing PM1500 radios

2. Supplies and equipment

Supplies and equipment will be supplied as follows:

TSU will supply:

The Tait radio package which comes with a separation kit, antenna, coax, radio mounting brackets, and fuse holder.

TSU will provide the antenna mount and connectors and any required under the hood watertight fuse holder.

Contractor will supply:

Industry trained personnel to perform installations
Location(s) to perform the radio installations
Proper tools to perform the work
Extra wiring if needed for power, grounding and connectors
Extra hardware, if needed, to complete the installation (e.g., screw, nuts, bolts, spacers, etc.)
