In the event that permanent signage is installed by the Government, such signage shall not be removed except upon written approval by the Government. Provided, however, that nothing herein shall require the installation of signage by the Government nor prohibit the Government from removing any signage so installed.
- (19) The Grantee agrees to prepare class rosters or sign-in sheets and provide evaluation forms to the attendees for any educational event funded by the Grant.

**PROJECT PLAN ELEMENTS**

The West Hickman watershed has been identified by the Kentucky Division of Water as a priority watershed for the Kentucky River Basin. This urban waterway has been designated as only partially not supporting primary contact recreation. Stormwater runoff and urban hydrology is a major cause of its degradation.

The scope of this project will focus on the twelve (12) schools within West Hickman Creek.

The general project elements include:

- 1) Provide stormwater education and outreach as a means to support LFUCG's Water Quality Management Program, the MS4 permit, and the West Hickman Watershed Management Plan.
- 2) Engage students with activities and place-based learning about stormwater, West Hickman Creek, and the West Hickman Watershed Management Plan.
- 3) Establish outdoor classroom stations for hands-on learning about stormwater.
- 4) Deliver curriculum and provide professional development training for teachers to integrate lesson plans with on-campus features and outdoor classrooms.
- 5) Conduct lesson plans so that students may participate in developing site-specific stormwater inventories of their school campus.

- 6) Utilize the collection of field data and observations at school campuses to identify potential future stormwater programs and/or BMPs.
- 7) Present project information to the Hickman Creek Conservancy and coordinate potential collaborations.

### **TARGET AUDIENCE**

The scope of this project includes twelve FCPS schools in the West Hickman watershed. It is expected that funds for this grant will directly involve a range of 204 - 360 FCPS students, teachers and staff participating in this project. The project management team of Russ Turpin (EcoGro) and Tresine Logsdon (FCPS) will coordinate with each school to determine which teachers and groups of students may be the best fit with this project. For example, this could be working with one teacher and a typical class of 28 students to integrate a stormwater lesson plan into their regular school period. Another option is to work with an after school club or group of typically 15 students. The schools and anticipated numbers of students and FCPS personnel involved (in parenthesis) are as follows:

#### **Elementary Schools**

Breckenridge (15-28 students, 1 teacher, 1 administrator), Millcreek (15-28 students, 1 teacher, 1 administrator), Tates Creek (15-28 students, 1 teacher, 1 administrator), Veterans Park (15-28 students, 1 teacher, 1 administrator), Southern (15-28 students, 1 teacher, 1 administrator), Julius Marks (15-28 students, 1 teacher, 1 administrator), Lansdowne (15-28 students, 1 teacher, 1 administrator), and Glendover (15-28 students, 1 teacher, 1 administrator)

#### **Middle Schools**

Tates Creek (15-28 students, 1 teacher, 1 administrator), and Southern (15-28 students, 1 teacher, 1 administrator)

#### **High Schools**

Tates Creek (15-28 students, 1 teacher, 1 administrator), and Henry Clay (15-28 students, 1 teacher, 1 administrator)

### **PROJECT SUSTAINABILITY**

- 1) ***Long-term Component for Ongoing Education and Involvement:*** The long-term component for ongoing education and involvement for this grant is Fayette County Public Schools District Sustainability Coordinator who will provide any future support, resources or networking to help existing and/or new teachers, administrators or Sustainability Coordinators implement the activities generated by this project.
- 2) ***Personnel for Long-Term Implementation:*** It is anticipated that the curriculum will be taught by the teachers of Fayette County Public Schools as part of their annual lessons.
- 3) ***Ongoing Sources of Funding for Future Program Implementation beyond the Grant Period:*** Ongoing sources of funding for future program implementation beyond the grant period will come from Go Green + Earn Green funds designed to be reinvested into student-drive sustainability improvement projects. This often takes the form of outdoor learning or classroom supplies that could support the long-term application of this project's activities.

### **PROJECT SUCCESS MEASURES**

Within the scope and timeframe of this project, success will be measured by:

1. The number and hours of student participation.
2. The number and/or hours of teacher training and professional development.
3. The number of outdoor classroom learning stations installed.

### **REPORTING REQUIREMENTS**

In addition to the reporting requirements outlined in the Grant Award Agreement, the following special items are noted for this project:

After the grant period has ended, the Organization (and/or Property Owner) agrees to allow LFUCG access for monitoring per the terms of the Maintenance Agreement. Water quality sampling via grab samples or other methods may be employed by LFUCG staff as part of its Kentucky Pollutant Discharge Elimination System (KPDES) MS4 Phase 1 Permit.

**GRANT PERIOD & PROJECT SCHEDULE**

The grant period starts on the date of execution by the Mayor and extends for the time period as listed in the Grant Award Agreement.
