FROM: Charles Martin, P.E., Director *CM*
Division of Water Quality

DATE: September 11, 2013

SUBJECT: Transylvania University – Easement for Relocation of an Air Release Valve

The purpose of this memorandum is to request a resolution authorizing the acceptance of a Deed of Easement from Transylvania University for relocation of an air release valve.

Due to the construction of the new Transylvania Athletic Complex on Fourth Street, it will be necessary to relocate an air release valve presently located on the North Elkhorn force main. We have coordinated with Transylvania University to determine the best location for the new air release valve and Transylvania has requested that the new air release valve be relocated approximately 100' north of the existing location. This will involve constructing approximately 100' of sanitary sewer line to contain released air and will involve constructing a non-mechanical (passive) air release valve with an aerial vent tower approximately 55' high. The Division of Water Quality concurs with Transylvania's requested design and location. All of the construction cost will be paid for by Transylvania University and all the work will be done by their contractor. There is no anticipated cost to the LFUCG.

If you have any questions or need additional information, please let us know.
