**PROJECT PLAN ELEMENTS**

This Feasibility Study will determine green nature-based approaches to stormwater management and develop recommendations to achieve the following goals:

- 1) Improve Water Quality in the Shannon Run Tributary to South Elkhorn Creek by incorporating natural stormwater features and streambank stabilization to reduce and filter pollutants.
- 2) Establish native vegetation within the HOA area including riparian buffers, wet meadows and native trees.
- 3) Educate the public on stormwater management systems and water quality by incorporating public meetings during the feasibility study and educational signage after full construction.

### Deliverables

The feasibility study will present three alternatives, with construction and maintenance cost estimates, pros and cons of each solution and what pollutants of concern each solution addresses. The alternatives will evaluate how to address sedimentation, E. coli, nutrification, flooding resiliency, and education. The solutions will be evaluated and scored for pollutant removal potential using the International Stormwater BMP Database. In addition, they will be broken into phased projects for future implementation using grant funding.

### Meetings

An initial site visit and meeting with HOA representatives will be held to discuss the project, important aspects of the property and education on stormwater and water quality. Once the background information has been gathered and alternatives defined, a meeting with regulatory agencies (KDOW, USACE, LFUCG-DOE, LFUCG-DWQ) will be held onsite to review and discuss the pros and cons of solutions. Communication with LFUCG-DOE and DWQ will be ongoing, as needed, throughout the processes. Once the alternatives have been vetted and final draft created, a HOA public meeting will be held to discuss these alternatives and receive feedback from stakeholders.

### **FINAL FEASIBILITY STUDY REPORT**

The results of the Feasibility Study will be presented in a final report that will, at a minimum, include:

- 1) Proposed locations of project elements.
- 2) Conceptual designs, cross-sections, etc. of the proposed elements.
- 3) Maintenance plans, as applicable.
- 4) Design and construction cost estimates for each proposed project element.
- 5) Special design and construction considerations (*i.e.* 401 / 404 permitting).

### **REPORTING REQUIREMENTS**

In addition to the reporting requirements outlined in the Grant Award Agreement, the following special items are noted for this project:

- 1) Grantor shall be provided a minimum of three (3) hard copies of the Final Feasibility Report along with one (1) digital copy.
- 2) All attachments to Request for Funds & Project Status Reports shall reference the associated line Table 2 – Project Eligible Expenses.

### **PERMANENT FACILITIES / INFRASTRUCTURE**

Does not apply to this grant. Attachment B is not required for this Agreement.

### **EQUIPMENT**

Any equipment purchased with the Grant shall remain the property of the Organization.

### **ADDITIONAL GRANT STIPULATIONS**

1. Both electronic and hard copies of all materials are to be provided to LFUCG, for its use, as part of the grant deliverables.
2. Organization proposes a larger cost share beyond that required by the grant program. Budget shall reflect the 20.20% cost share offered in the application (approximately \$9,872.20).

### **GRANT PERIOD & PROJECT SCHEDULE**

The grant period starts on the date of execution by the Mayor and extends for the time period as listed in the Grant Award Agreement. Any time extensions must be approved in writing by the LFUCG Grant Manager. The project schedule shown in Table 1 is preliminary. Proposed changes to the project which alter this schedule significantly shall be discussed with the LFUCG Grant Manager prior to implementation.
