Re: Contract Award Recommendation – Bid #7-2012 Fiber Optic Pathway and Cable Installation,
PO2-628-0900022383

The Division of Traffic Engineering has reviewed bid packets received on February 14th, from Arrow Electric Company, Inc. and Davis H. Elliot Construction Company, Inc. The apparent low bidder for this project is Davis H. Elliot at a total cost of \$386,229.25.

The project consists of installing fiber optic pathways along the following corridors:

- Bates Creek Road (New Circle to Man o' War Blvd.) 1.65 miles
- Man o' War Blvd (Bates Creek Road to Nicholasville Road) 1.72 miles
- North Broadway (New Circle to Old Paris Pike) 1.47 miles

Federal Congestion Mitigation and Air Quality (CMAQ) funding will be used to pay for most of this project. It is budgeted in Account 3160-303602-3605-91711 FIBEROPT_2009. A short segment along North Broadway is to be paid for out of Account 2518-303601-0001-91711 FIBOPTCAB_2008A

If at all possible, we'd like to get two readings from Council to expedite the work due to the funds expiring in August 2012.

Feel free to contact me for clarification.
