## **Storm and Disaster Response Capability Statement**

### **ClearPath Facility Services**

ClearPath Facility Services provides rapid-deployment operational support for municipalities facing severe weather events, infrastructure disruption, and disaster recovery needs. Our teams are built around experienced operators, coordinated logistics, and command-level oversight to ensure municipalities receive immediate, professional support when local capacity is exceeded.

### **Operational Focus**

Our teams specialize in snow and ice management, emergency storm response, and disaster recovery operations, with the ability to mobilize equipment and personnel quickly across state lines.

Services include:

- Snow and ice removal for roads, facilities, and public infrastructure
- Emergency storm response and debris removal
- Disaster recovery and cleanup operations
- Equipment and operator deployment for municipal support
- Hauling, excavation, and site clearing operations

### **Snow and Ice Expertise**

Snow and ice mitigation is a core competency of our organization.

Our leadership team includes industry professionals with specialized training in winter operations and risk management. ClearPath leadership holds advanced snow industry credentials and regularly consults with municipalities, facility managers, and emergency response organizations on winter operations strategy.

Our crews are experienced in:

- Large-scale snow clearing operations
- Municipal roadway support
- Snow hauling and relocation
- Ice mitigation and material application strategies
- Multi-day storm event operations

When winter storms overwhelm local resources, ClearPath provides experienced crews that integrate seamlessly into municipal operations.

## **Disaster Response and Recovery**

Through partnerships with experienced heavy-equipment contractors, including teams with extensive disaster cleanup and recovery experience, ClearPath can assist municipalities with:

- Storm debris removal
- Downed tree and infrastructure clearing
- Heavy equipment support
- Emergency site stabilization
- Hauling and material transport

Our teams regularly mobilize for travel operations, supporting communities that require immediate operational reinforcement following severe weather events.

## **Operational Structure**

Travel response crews deploy with a structured operational framework that includes:

- Command and coordination leadership
- Experienced equipment operators
- Secured communication systems
- Equipment transport and logistics planning

The leadership team supporting these operations includes individuals with backgrounds in fire service, law enforcement, and military police, bringing disciplined incident management and operational coordination to each deployment.

## **Equipment Capability**

Our network supports a wide range of heavy equipment typically required during storm and disaster operations, including:

- Wheel loaders
- Excavators
- Dump trucks and debris hauling equipment
- Snowplow trucks with and without spreaders
- Skid steers and compact equipment
- Transport trucks and trailers for mobilization

This flexibility allows ClearPath to support municipalities during both winter weather events and post-storm recovery operations.
