2006 - INTERNATIONAL FIRE CODE FOR PORTABLE EXTINGUISHERS (SECTION 906)
2013 - NFPA 13 INSTALLATION OF SPRINKLER SYSTEMS
2013 - NFPA 13D INSTALLATION OF SPRINKLER SYSTEMS - ONE/TWO FAMILY DWELLING
2013 - NFPA 13R INSTALLATION OF SPRINKLER SYSTEMS IN RESIDENTIAL OCCUPANCIES UP TO FOUR STORIES
2013 - NFPA 14 INSTALLATION OF STANDPIPE, HOSE SYSTEMS
2013 - NFPA 72 NATIONAL FIRE ALARM AND SIGNALING CODE
2007 - STRUCTURAL ENGINEERS ASSOCIATION OF KENTUCKY - SPECIAL INSPECTION GUIDELINES, THIRD EDITION

BUILDING PLANNING

OCCUPANCY: S-1
MIXED OCCUPANCY NO
REQUIRED FIRE SEPARATION: NO

TYPE OF CONSTRUCTION

CONSTRUCTION TYPE: 2B

ESSENTIAL FACILITY (CHAPTER 16, IBC)

ESSENTIAL FACILITY NO (TABLE 1604.5 RISK CATEGORY 2)

GENERAL BUILDING LIMITATIONS

- HEIGHT OF BUILDING: ALLOWED 55FT > ACTUAL +/- 33FT (TABLE 503 2015 IBC) (NON-SPRINKLED)
- NUMBER OF STORIES: 1 STORY ACTUAL (2 STORIES PER TABLE 503 2015 IBC)
- MAXIMUM SINGLE FLOOR AREA: 17,500SQFT. (PER TABLE 503 2015 IBC)
- TOTAL AREA OF BUILDING: 4,960 SQFT.
- PENTHOUSE AND ROOF STRUCTURE: NONE
- HIGH RISE: NO
- PARKING SPACES PROVIDED: N/A
- PARKING SPACES REQUIRED: N/A
- ACCESSIBLE PARKING SPACES PROVIDED: N/A

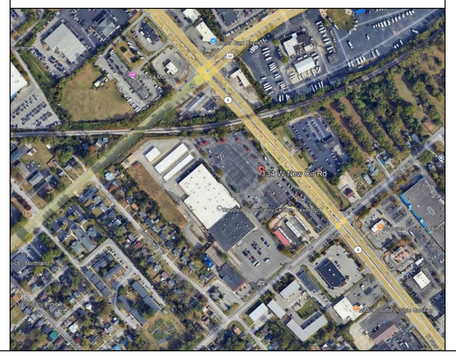
FIRE PROTECTION SYSTEMS

- FIRE EXTINGUISHING SYSTEM: NO
- STANDPIPE SYSTEM: NO TYPE
- SMOKE CONTROL: NO CLASS

FIRE-RESISTANCE RATING REQUIREMENTS FOR BUILDING ELEMENTS (HOURS)

BUILDING ELEMENT	REQ'D RATING / HR	UL/FM # WHERE APPLICABLE
PRIMARY STRUCTURAL FRAME	0 / HR	N/A
BEARING WALLS		
EXTERIOR	0 / HR	N/A
INTERIOR	0 / HR	N/A
NONBEARING WALLS AND PARTITIONS		
EXTERIOR 10' > SEPARATION DISTANCE	0 / HR	N/A
NONBEARING WALLS AND PARTITIONS		
INTERIOR	0 / HR	N/A
FLOOR CONSTRUCTION	0 / HR	N/A
ROOF CONSTRUCTION	0 / HR	N/A

VICINITY MAP



BUILDING CODE REVIEW - 2018 KBC

CHAPTER 3: USE AND OCCUPANCY CLASSIFICATION:

1. MODERATE-HAZARD STORAGE, GROUP S-1 (SECTION 311.2)

CHAPTER 4: SPECIAL DETAILED REQUIREMENTS BASED ON USE AND OCCUPANCY:

1. MOTOR-VEHICLE-RELATED OCCUPANCIES (SECTION 406.8)

CHAPTER 5: GENERAL BUILDING HEIGHTS AND AREAS:

1. ASSEMBLY GROUP S-1 (TYPE 2B CONSTRUCTION) HEIGHT 2 STORIES (55' H) @ 17,500 SQFT PER STORY. (SECTION 503, 504, 506)
2. SEPARATED OCCUPANCIES (TABLE 508.4) B, S-1 NO SEPARATION IS REQUIRED.
3. BUILDING AREA MODIFICATIONS: (SECTION 506.3)
   A. If = [142/285 - 0.25] 370/30 = 3.08
   B. Aa = 17,500 sqft + [17500sqft x 3.08] = 71,454 sqft > 4,960 sqft ACTUAL. (AREA IS UNDER ALLOWED. SEE UNLIMITED AREA BUILDINGS BELOW)
4. UNLIMITED AREA BUILDINGS: (SECTION 507.5 GROUP B, S-1 BUILDINGS OF TYPE 2 CONSTRUCTION)
   A. BUILDING AREA NOT LIMITED WHERE EQUIPPED THROUGHOUT WITH AUTOMATIC SPRINKLER SYSTEM AND IS SURROUNDED AND ADJOINED BY PUBLIC WAYS OR YARDS NOT LESS THAN 60 FEET IN WIDTH. SEE SITE PLAN FOR 60 FOOT MINIMUM WIDTH.
5. INCIDENTAL USES (SECTION 509)
   A. N/A
6. SPECIAL PROVISIONS (SECTION 510)
   A. N/A

CHAPTER 6: TYPES OF CONSTRUCTION:

1. CONSTRUCTION CLASSIFICATION:
   A. TYPE 2B
2. SEE FIRE-RESISTANCE RATING REQUIREMENTS FOR BUILDING ELEMENTS HOURS (TABLE 601)
   A. SEE TABLE THIS SHEET
3. FIRE-RESISTANCE RATING REQUIREMENTS FOR EXTERIOR WALLS BASED ON FIRE SEPARATION DISTANCE
   A. FIRE SEPARATION DISTANCE = 10 < x <30
   B. TYPES OF CONSTRUCTION = 2B
   C. OCCUPANCY GROUP = S-1
   D. FIRE RATING REQUIRED = 0

CHAPTER 7: FIRE AND SMOKE PROTECTION FEATURES:

1. SHAFT ENCLOSURES:
   A. 1 HOUR WHERE CONNECTING FOUR STORIES OR LESS. (713.4)
   B. SHAFT ENCLOSURES SHALL BE CONSTRUCTED AS FIRE BARRIERS PER SECTION 707.

CHAPTER 8: INTERIOR FINISHES:

1. INTERIOR WALL AND FINISH MATERIAL (803.1.1)
   A. CLASS C: = FLAME SPREAD INDEX 76-200; SMOKE DEVELOPMENT INDEX 0-450
2. INTERIOR WALL AND FINISH REQUIREMENTS BY OCCUPANCY: (TABLE 803.11 SPRINKLERED)
   A. GROUP S = CLASS C

CHAPTER 9: FIRE PROTECTION SYSTEMS:

1. AUTOMATIC SPRINKLER SYSTEMS: (SECTION 903)
   A. GROUP S-1 (SECTION 903.2.9)
      a. THE FIRE AREA DOES NOT EXCEED 12,000 SQFT < 4,960 SQFT. SPRINKLER SYSTEM NOT REQUIRED.
   B. PORTABLE FIRE EXTINGUISHERS (SECTION 906)
      a. PORTABLE FIRE EXTINGUISHERS SHALL BE INSTALLED IN GROUP S (SECTION 906.1)
      b. INSTALL FIRE EXTINGUISHERS PER NFPA 10.
      c. MIN. NUMBER OF EXTINGUISHERS = 4960 / 3000 = 1.65 < ACTUAL 2
      d. MAX. DISTANCE TO TRAVEL TO EXTINGUISHER = 75 FEET.
   C. FIRE ALARM DETECTION SYSTEMS (907.2 GROUP S)
      a. N/A

CHAPTER 10: MEANS OF EGRESS:

1. OCCUPANT LOAD (SECTION 1004)
   A. TABLE 1004.1.2 MAXIMUM FLOOR AREA ALLOWANCE PER OCCUPANT.
      a. STORAGE AREA 300 SQFT. (4960SQFT/300SQFT = 16 OCCUPANTS)
2. COMMON PATH OF EGRESS TRAVEL (SECTION 1006.2.1)
   A. GROUP S-1: OCCUPANT LOAD LESS THAN 30 WITHOUT SPRINKLER SYSTEM = 100 FEET.
3. EXIT ACCESS TRAVEL DISTANCE (SECTION 1017.2)
   A. GROUP S-1 = 200 FEET MAXIMUM WITHOUT SPRINKLER SYSTEM.
4. CORRIDOR FIRE RESISTANCE RATING (1020.1)
   A. GROUP S, WITHOUT SPRINKLER SYSTEM REQUIRED RATED CORRIDOR = 1 HOURS.
   B. MINIMUM CORRIDOR WIDTH 36 INCHES (1020.2)

CHAPTER 12: INTERIOR ENVIRONMENT:

1. LIGHTING (SECTION 1205.2)
   A. THE MINIMUM NET GLAZED AREA SHALL BE NOT LESS THAN 8 PERCENT OF THE FLOOR AREA OF THE ROOM SERVED.
      a. N/A - ACCESSORY BUILDING
2. TOILET AND BATHROOM REQUIREMENTS (SECTION 1210)
   a. N/A - ACCESSORY BUILDING

CHAPTER 13: ENERGY EFFICIENCY

1. GENERAL (SECTION 1301)
   A. BUILDINGS SHALL BE DESIGNED AND CONSTRUCTED IN ACCORDANCE WITH THE INTERNATIONAL ENERGY CONSERVATION CODE.

CHAPTER 16: STRUCTURAL DESIGN:

1. RISK CATEGORY OF BUILDINGS AND OTHER STRUCTURES (TABLE 1604.5.1)
   A. RISK CATEGORY II.

00.AB CODE CRITERIA FOR DESIGN

A. THESE STRUCTURAL DRAWINGS ARE TO BE USED IN CONJUNCTION WITH ALL OTHER DRAWINGS, SPECIFICATIONS & CONTRACT DOCUMENTS.

B. THE DESIGN, CONSTRUCTION, QUALITY CONTROL AND SAFETY OF ALL WORK PERFORMED ON THE PROJECT SHALL CONFORM TO THE REFERENCED CODES AND STANDARDS, INCLUDING ALL SPECIFICATIONS REFERENCED WITH THE LATEST EDITIONS SHALL APPLY UNLESS NOTED.

C. BUILDING CODE: 2018 KENTUCKY BUILDING CODE, 4TH EDITION
D. COUNTY/STATE: FAYETTE / KENTUCKY

E. RISK CATEGORY: II

F. DEAD LOADS

1. ROOFS = 2 PSF
2. COLLATERAL = 2 PSF

G. DESIGN LIVE LOADS

1. ROOF = 20 PSF
2. ROOF LIVE LOAD = 25 PSF MIN
3. STORAGE = 125 PSF

H. ROOF SNOW LOAD

1. GROUND SNOW LOAD (p_g) = 15 PSF
2. SNOW EXPOSURE FACTOR (C_e) = 0.9
3. THERMAL FACTOR (C_t) = 1.0
4. SLOPE FACTOR (C_s) = 0.49
5. IMPORTANCE FACTOR (I_s) = 1.0
6. RAIN ON SNOW SURCHARGE (P_{ds}) = 5 PSF
7. FLAT ROOF SNOW LOAD (p_f) = 9.45 PSF
8. SLOPED ROOF SNOW LOAD (p_s) = 4.63 PSF PLUS DRIFTS AS APPLICABLE
9. MINIMUM ROOF SNOW LOAD (p_{m}) = 15 psf

I. LATERAL LOADS

1. WIND

   a. SEE PRE-ENGINEERED METAL BUILDING MANUFACTURER.
   b. BASIC WIND SPEED: 115 MPH
   c. EXPOSURE CATEGORY: B

2. SEISMIC

   a. MAPPED SHORT PERIOD SPECTRAL RESPONSE ACCELERATION (S_s) = 0.189g
   b. MAPPED 1 SECOND SPECTRAL RESPONSE ACCELERATION (S_1) = 0.091g
   c. DESIGN SHORT PERIOD SPECTRAL RESPONSE ACCELERATION (S_{DS}) = 0.151
   d. DESIGN 1 SECOND SPECTRAL RESPONSE ACCELERATION (S_{D1}) = 0.103
   SEISMIC IMPORTANCE FACTOR (I_E) = 1.0
   e. SEISMIC RESPONSE FACTOR (R) = 1.0
   f. SEISMIC COEFFICIENT (C_d) = 1.0
   g. SOIL SITE CLASS: C (ASSUMED)
   h. SEISMIC DESIGN CATEGORY: B
   i. SEE PRE-ENGINEERED METAL BUILDING MANUFACTURER.

J. ALL CONTRACTOR PROPOSED STRUCTURAL SUBSTITUTIONS, INCLUDING CONCRETE ADDITIVES, SHALL BE SUBMITTED TO THE ENGINEER FOR REVIEW AND APPROVAL PRIOR TO ANY PERTINENT WORK AND PRIOR TO THE AWARD OF A SUBCONTRACTOR.

K. SHOP DRAWINGS, TEST REPORTS, AND CERTIFICATIONS ARE REQUIRED FOR THE FOLLOWING STRUCTURAL ITEMS:

1. CONCRETE CYLINDER TESTS
2. CONCRETE MIX DESIGNS
3. GROUT MIX DESIGNS
4. REINFORCING STEEL SHOP DRAWINGS
5. MISCELLANEOUS AND STRUCTURAL STEEL SHOP DRAWINGS
6. STEEL JOIST AND JOIST GIRDER SHOP DRAWINGS
7. STEEL ROOF DECK SHOP DRAWINGS
8. COMPOSITE AND FORM STEEL DECK SHOP DRAWINGS
9. CONCRETE MASONRY UNIT CERTIFICATION AND DATA
10. MORTAR CERTIFICATION AND DATA
11. WALL REINFORCING DATA
12. UNDERPINNING METHOD AND SEQUENCING (IF REQUIRED)
13. METAL BUILDING LOADS AND DETAILS

L. THE SHOP DRAWINGS SPECIFIED BY THE ENGINEER ARE AN INTEGRAL PART OF THE COMPLETE DESIGN. THEY SERVE AS BOTH A CHECK ON THE CONTRACTOR'S INTERPRETATION OF THE ENGINEER'S DRAWINGS AND SPECIFICATIONS AND AS A FINAL CHECK ON THE COORDINATED, DETAILED DESIGN PRIOR TO CONSTRUCTION. THEREFORE, ANY MATERIAL ORDERED OR WORK PERFORMED PRIOR TO THE ENGINEER'S REVIEW AND APPROVAL OF THE SHOP DRAWINGS ARE DONE AT THE CONTRACTOR'S SOLE FINANCIAL RISK. THIS MEANS THAT WHERE DIFFERENCES OF INTERPRETATION EXIST, WORK DONE PRIOR TO THE APPROVAL OF THE SHOP DRAWINGS THAT IS ADJUDGED BY THE ENGINEER TO BE NOT IN CONFORMANCE WITH THE DRAWINGS AND SPECIFICATIONS MAY BE SUBJECT TO REMOVAL AND REPLACEMENT AT THE CONTRACTORS SOLE EXPENSE. AT A MINIMUM, WHERE REASONABLE ADDITIONS TO THE WORK ARE INDICATED ON THE SHOP DRAWINGS, THE ADDITIONAL COST OF THE REMOVAL AND REWORK THAT WOULD NOT HAVE BEEN REQUIRED HAD THE CONTRACTOR NOT PROCEEDED PRIOR TO SHOP DRAWING APPROVAL SHALL BE AT THE CONTRACTOR'S SOLE EXPENSE.

M. CONSTRUCTION METHODS, PROCEDURES, AND SEQUENCES ARE THE RESPONSIBILITY OF THE CONTRACTOR. THE CONTRACTOR SHALL TAKE ALL NECESSARY MEANS TO MAINTAIN AND PROTECT THE STRUCTURAL INTEGRITY OF ALL CONSTRUCTION AT ALL STAGES.

O. COORDINATION WITH THE ARCHITECTURAL, MECHANICAL, PLUMBING AND ELECTRICAL DRAWINGS TO VERIFY THE LOCATIONS AND SIZES OF ALL CHASES, INSERTS, OPENINGS, SLEEVES, FINISHES, DEPRESSIONS, AND OTHER PROJECT REQUIREMENTS ARE THE CONTRACTOR'S RESPONSIBILITY. ALL REQUIRED OPENINGS, SLEEVES, OR OTHER COMPONENTS MAY NOT BE SHOWN ON THE STRUCTURAL DRAWINGS.

P. IMPOSED CONSTRUCTION LOADS, INCLUDING CRANE LOADS, IN EXCESS OF THE STATED DESIGN LOADS MUST BE SUBMITTED TO THE ENGINEER FOR REVIEW PRIOR TO THE IMPOSITION OF SUCH LOADS.

Q. IMPLEMENTING JOB SITE SAFETY AND CONSTRUCTION PROCEDURES ARE THE SOLE RESPONSIBILITY OF THE CONTRACTOR.

R. IN CASE OF CONFLICT BETWEEN THE GENERAL NOTES, DETAILS AND SPECIFICATIONS, THE MOST RIGID REQUIREMENTS SHALL GOVERN.

00.31.32 GENERAL FOUNDATION INFORMATION

A. SOIL BEARING VALUES ARE ASSUMED TO BE 2,000PSF FOR UNDISTURBED NATIVE SOIL. 3,000PSF FOR ENGINEERED FILL, 6,000PSF FOR COMPETENT BEDROCK.

B. EXISTING FOUNDATION SIZES, ELEVATIONS, LOCATIONS, ETC., SHOWN ARE FROM ORIGINAL DRAWINGS FURNISHED BY THE OWNER AND MAY NOT BE THE ACTUAL CONDITIONS ENCOUNTERED.

C. IF REQUIRED, UNDERPINNING OF EXISTING FOOTINGS SHALL BE PERFORMED IN SUCH A MANNER SO AS TO MAINTAIN THE STRUCTURAL INTEGRITY OF THE EXISTING BUILDING. CONTRACTOR SHALL INCLUDE ANY ASSOCIATED COSTS OF UNDERPINNING IN HIS BID.

D. VERIFY LOCATIONS OF COLUMNS, UNDERGROUND UTILITIES, ETC., WITH ARCHITECTURAL, MECHANICAL, ELECTRICAL, AND CIVIL DRAWINGS PRIOR TO PLACEMENT OF FOUNDATIONS.

E. THE BOTTOM OF ALL FOOTINGS SHALL EXTEND 1'-0" MINIMUM INTO UNDISTURBED SOIL OR ENGINEERED FILL HAVING A SAFE BEARING CAPACITY OF 2,000PSF. THE BOTTOM OF ALL EXTERIOR FOOTINGS SHALL EXTEND 3'-0" BELOW FINISHED GRADE.

F. ALL FOUNDATION AND SLAB-ON-GRADE SUB GRADES ARE TO BE FIELD INSPECTED BY AN EXPERIENCED QUALIFIED GEOTECHNICAL ENGINEER TO VERIFY THAT THE ALLOWABLE BEARING PRESSURE IS ACHIEVED AND THAT THE SUB GRADES ARE SUITABLE FOR SUPPORT OF THE FOUNDATIONS AND SLAB-ON-GRADE. THE GEOTECHNICAL ENGINEER SHALL ALSO VERIFY FOUNDATION ELEVATIONS PRIOR TO PLACEMENT OF FOUNDATION ELEMENTS.

G. UNLESS DETERMINED OTHERWISE BY GEOTECHNICAL EVALUATION, FILL MATERIAL FOR SLAB AND FOOTING AREAS SHALL BE PLACED IN LAYERS NOT EXCEEDING 8 INCHES (UNCOMPACTED THICKNESS) AND COMPACTED TO 98% OF MAXIMUM DRY DENSITY AS DETERMINED BY ASTM D698.

H. THE CONTRACTOR SHALL TAKE ALL NECESSARY PRECAUTIONS TO BRACE FOUNDATION WALLS WHEN BACK FILLING AND WHEN THERE IS A POSSIBILITY OF DAMAGE BY EXCESS WATER.

I. COMPACTION OF BACKFILL WITHIN 2 FEET OF FOUNDATION WALLS SHALL BE ACCOMPLISHED WITH HAND EQUIPMENT. WHERE FILL IS REQUIRED ON BOTH SIDES OF FOUNDATION WALL, BRING THE FILL UP EACH SIDE SIMULTANEOUSLY AND UNIFORMLY.

J. THE SURFACE AREA ADJACENT TO THE FOUNDATION WALL SHALL BE PROVIDED WITH ADEQUATE DRAINAGE AND SHALL BE GRADED SO AS TO DRAIN SURFACE WATER AWAY FROM FOUNDATION WALLS.

K. WHEN USING HELICAL PIERS, CONTRACTOR SHALL PROVIDE A DETAILED LAYOUT OF PIER LOCATIONS AND WORKING CAPACITIES, WHICH ARE TO BE SEALED BY AN ENGINEER IN THE STATE OF WEST VIRGINIA.

L. WHEN USING GEOFOAM FOR STRUCTURAL BACKFILL, CONTRACTOR SHALL PROVIDE A DETAILED LAYOUT OF BLOCKS SEALED BY AN ENGINEER IN THE STATE OF KENTUCKY.

M. IF FOOTING EXCAVATIONS ENCOUNTER ISOLATED AREAS OF RELATIVELY HARD ROCK AT OR ABOVE THE PLANNED FOOTING ELEVATIONS, THE ROCK SHALL BE OVER EXCAVATED TO A DEPTH OF APPROXIMATELY ONE FOOT BELOW THE FOUNDATION BEARING ELEVATION AND BACKFILLED WITH STRUCTURAL FILL.

N. FOUNDATIONS SHALL NOT BE PLACED ON MUD OR MUCK, SOFT OR LOOSE SOIL, IN STANDING WATER OR ON FROZEN GROUND.

O. ALL NON-CANTILEVER WALLS SHALL BE BE ADEQUATELY BRACED PRIOR TO BACKFILL.

P. CANTILEVER RETAINING WALLS SHALL NOT BE BACKFILLED UNTIL THE CONCRETE HAS DEVELOPED 100% OF THE REQUIRED 28-DAY COMPRESSIVE STRENGTH FOR THE CLASS OF CONCRETE SPECIFIED.

01.41.AB SPECIAL INSPECTIONS

A. SPECIAL INSPECTION IS REQUIRED ACCORDING TO CHAPTER 17 OF THE 2015 INTERNATIONAL BUILDING CODE.

B. SPECIAL INSPECTIONS SHALL BE PERFORMED FOR THE FOLLOWING WORK AS REQUIRED IN THE 2015 INTERNATIONAL BUILDING CODE:

1. STEEL CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.02
2. CONCRETE CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.3
3. MASONRY CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.4
4. SOILS CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.6
5. CAST-IN-PLACE DEEP FOUNDATION CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.8
6. FABRICATED ITEMS IN ACCORDANCE WITH SECTION 1705.10
7. THE TYPE AND EXTENT OF EACH TEST AND INSPECTION REQUIRED FOR EACH TYPE OF WORK SHALL BE AS INDICATED IN THE BUILDING CODE AND THE REFERENCES INCORPORATED THEREIN.

C. SPECIAL INSPECTION SERVICES SHALL BE CONTRACTED AND PAID FOR BY THE OWNER.

D. WORK REQUIRING SPECIAL INSPECTION SHALL BE INSPECTED BY THE SPECIAL INSPECTOR FOR CONFORMANCE WITH THE APPROVED DRAWINGS AND SPECIFICATIONS. INSPECTION REPORTS INDICATING THE RESULTS OF SPECIAL INSPECTIONS SHALL BE PROMPTLY SUBMITTED TO THE CONTRACTOR, THE ARCHITECT, AND THE STRUCTURAL ENGINEER.

E. ALL SPECIAL INSPECTIONS INDICATING NON-CONFORMING WORK SHALL BE REPORTED IMMEDIATELY TO THE CONTRACTOR, THE ARCHITECT AND THE STRUCTURAL ENGINEER. IMPENDING CONSTRUCTION WORK THAT WOULD IMPEDE ECONOMICAL CORRECTION OF NON-CONFORMING WORK SHALL NOT PROCEED WITHOUT WRITTEN APPROVAL.

F. A FINAL REPORT DOCUMENTING COMPLETION OF ALL REQUIRED SPECIAL INSPECTIONS AND CORRECTION OF ANY NON-CONFORMING WORK NOTED IN THE INSPECTIONS SHALL BE SUBMITTED BY THE SPECIAL INSPECTOR AT THE COMPLETION OF THE PROJECT.

G. THE SPECIAL INSPECTION AGENCY SHALL NOT BE ENGAGED BY THE CONTRACTOR FOR OTHER TESTING OR INSPECTION SERVICES ON THIS PROJECT.

H. SPECIAL INSPECTION SHALL BE PERFORMED BY A QUALIFIED INSPECTION AND TESTING AGENCY APPROVED BY THE BUILDING OFFICIAL, THE ARCHITECT, AND THE STRUCTURAL ENGINEER.

03.30 CAST-IN-PLACE CONCRETE

A. ALL MATERIALS AND WORKMANSHIP SHALL COMPLY WITH THE REQUIREMENTS OF THE FOLLOWING CODES AND STANDARDS:

1. "BUILDING CODE REQUIREMENTS FOR REINFORCED CONCRETE, ACI 318-11", AMERICAN CONCRETE INSTITUTE
2. "ACI MANUAL OF CONCRETE PRACTICE - PARTS 1 THROUGH 5", LATEST EDITION
3. "MANUAL OF STANDARD PRACTICE", CONCRETE REINFORCING STEEL INSTITUTE
4. "ENVIRONMENTAL ENGINEERING CONCRETE STRUCTURES, ACI 350-06", AMERICAN CONCRETE INSTITUTE (FOR CONCRETE TANKS)
5. ACI 305 AND ACI 306 FOR HOT AND COLD WEATHER CONCRETE CONSTRUCTION
6. ACI 347 FOR SHORING AND RESHORING OF CONCRETE STRUCTURES

B. CONTRACTOR SHALL PROVIDE MATERIALS WHICH COMPLY WITH THE FOLLOWING ASTM REQUIREMENTS, AS REQD:

1.	CEMENT:	ASTM C150: TYPE I OR III
2.	AGGREGATES:	ASTM C33
3.	FLY ASH:	ASTM C618
4.	PLAIN REINFORCING BARS:	ASTM A615, GRADE 60
5.	WELDABLE REINFORCING BARS:	ASTM A706, GRADE 60
6.	GALVANIZED REINFORCING BARS:	ASTM A767, CLASS II GRADE 60
7.	WELDED WIRE FABRIC:	ASTM A185
8.	FIBER REINFORCEMENT:	ASTM C 1116, TYPE III
9.	AIR-ENTRAINING ADMIXTURE:	ASTM C260

C. CONCRETE PROTECTION FOR REINFORCEMENT SHALL BE IN ACCORDANCE WITH THE FOLLOWING TABLE, U.N.O. ON THE CONSTRUCTION DRAWINGS:

	APPLICATION	COVER
a.	CONCRETE CAST AGAINST AND PERMANENTLY EXPOSED TO EARTH:	3"
b.	CONCRETE EXPOSED TO WEATHER (U.N.O.):	
1.	#6 THROUGH #18 BARS:	2"
2.	#5 BAR, W31 OR D31 WIRE AND SMALLER:	1-1/2"
c.	CONCRETE NOT EXPOSED TO WEATHER OR IN CONTACT WITH GROUND SLABS, WALLS, AND JOISTS:	
1.	#14 AND #18 BARS:	1-1/2"
2.	#11 BAR AND SMALLER:	3/4"

D. CONCRETE MIXES SHALL BE AS FOLLOWS:

	APPLICATION	COMP. STRENGTH, AIR, W/C
a.	TANKS OR OTHER STRUCTURES RETAINING FLUID	5,000 PSI, 6%, 0.40
b.	CONCRETE USED FOR FOUNDATION CONSTRUCTION (STRIP/SPREAD FOOTINGS, GRADE BEAMS, FOUNDATION WALLS ETC.), OR CONCRETE EXPOSED TO CYCLES OF FREEZE THAW (SIDEWALKS, EXTERIOR SLAB ON GRADE ETC.):	4,500 PSI, 6%, 0.45
c.	INTERIOR SLAB ON GRADE:	4,000 PSI, NONE, 0.50

E. SHOP DRAWINGS SHOWING THE SIZE, LENGTH, QUANTITY, LOCATION AND MARK OF ALL REINFORCING BARS, SUPPORTS AND ACCESSORIES SHALL BE SUBMITTED FOR APPROVAL PRIOR TO FABRICATION.

F. MIX DESIGNS AND ADMIXTURE PRODUCT DATA SHALL BE SUBMITTED FOR APPROVAL PRIOR TO ORDERING CONCRETE.

G. THE TYPICAL DETAILS, PLANS, AND SECTIONS ON THESE DRAWINGS CONTAIN ADDITIONAL GENERAL CONCRETE CONSTRUCTION NOTES AND INFORMATION.

H. ALL CONCRETE SHALL BE REINFORCED UNLESS NOTED OTHERWISE.

I. SUPPORTS TO ADEQUATELY POSITION REINFORCING BARS DURING CONSTRUCTION SHALL BE INSTALLED.

J. FOUNDATION DOWELS OF THE SAME SIZE AND SPACING AS VERTICAL STEEL SHALL BE INSTALLED FOR ALL WALLS, PIERS, AND COLUMNS.

K. ALL REINFORCING AT WALL AND FOOTING CORNERS AND INTERSECTIONS SHALL BE CONTINUOUS BY THE USE OF BENT BARS OR CORNER BARS UNLESS INDICATED OTHERWISE.

L. CONSTRUCTION JOINTS SHALL BE POSITIONED SO AS NOT TO ADVERSELY AFFECT THE STRUCTURAL PERFORMANCE. CONSTRUCTION JOINT LOCATIONS NOT INDICATED ON THE STRUCTURAL DRAWINGS SHALL BE APPROVED BY THE STRUCTURAL ENGINEER.

M. PIPE SLEEVES AND INSERTS SHALL BE INSTALLED IN CONCRETE WORK AT ALL PENETRATIONS. PENETRATIONS OF BEAMS, JOISTS, COLUMNS OR STRUCTURAL SLABS NOT INDICATED ON THE STRUCTURAL DRAWINGS SHALL BE APPROVED BY THE STRUCTURAL ENGINEER.

N. ONLY WELDABLE REINFORCING BARS MAY BE WELDED.

O. ADMIXTURES CONTAINING CHLORIDE OR OTHER CORROSIVE CHEMICALS SHALL NOT BE USED IN CONCRETE.

P. AGGREGATES SHALL BE FREE OF DELETERIOUS OR NON-DURABLE MATERIALS SUCH AS CHERTS.

Q. REINFORCING SHALL BE ADEQUATELY TIED AND SUPPORTED TO HOLD IT IN THE CORRECT POSITION DURING CONSTRUCTION AND THE PLACEMENT OF CONCRETE.

R. CONCRETE SHALL BE CONSOLIDATED ADEQUATELY DURING PLACEMENT BY MECHANICAL VIBRATION IN ACCORDANCE WITH PUBLISHED PRACTICES.

S. PLASTIC CHAIRS SHALL BE USED IN ALL CONCRETE THAT WILL BE EXPOSED TO VIEW IN THE COMPLETED STRUCTURE.

T. EXPOSED CONCRETE CORNERS SHALL BE CHAMFERED MINIMUM 3/4", OR AS INDICATED ON THE STRUCTURAL/ARCHITECTURAL DRAWINGS.

U. FILL POCKETS AROUND CONNECTIONS WITH CONCRETE FLUSH AND SMOOTH UNLESS INDICATED OTHERWISE.

V. FORMED SURFACES SHALL HAVE A SMOOTH-FORM FINISH WHERE EXPOSED TO VIEW AND A ROUGH-FORM FINISH WHERE NOT EXPOSED TO VIEW UNLESS INDICATED OTHERWISE.

W. UNFORMED SURFACES SHALL HAVE A TROWEL FINISH WHERE EXPOSED TO VIEW AND A FLOAT FINISH WHERE NOT EXPOSED TO VIEW U.N.O. EXCEPT THAT STAIRS AND EXTERIOR WALKING SURFACES SHALL HAVE A BROOM FINISH U.N.O.

X. SLABS-ON-GRADE SHALL BE PLACED ON A VAPOR BARRIER OVER 4" MINIMUM OF WELL GRADED CRUSHED STONE OVER COMPACTED SUBGRADE, U.N.O.

Y. ALL COLD JOINTS SHALL BE ROUGHENED TO A FULL AMPLITUDE OF 1/4" AND A CONCRETE BONDING AGENT SHALL BE APPLIED PRIOR TO THE PLACEMENT OF FRESH CONCRETE.

Z. IN SLABS-ON-GRADE, LAP WELDED WIRE FABRIC TWO FULL MESH PANELS AND WIRE TOGETHER.

AA. SPLICE LAP LENGTHS FOR REINFORCING SHALL BE IN ACCORDANCE WITH THE FOLLOWING TABLE, U.N.O. ON THE PLANS:

	BAR SIZE	LAP LENGTH
a.	#3	17"
b.	#4	22"
c.	#5	28"
d.	#6	33"
e.	#7	48"
f.	#8	55"
g.	#9	62"
h.	#10	70"
i.	#11	83"

BB. PROVIDE ISOLATION JOINTS IN SLABS AS FOLLOWS:

1. BETWEEN SLABS-ON-GRADE AND FOUNDATION WALLS
2. BETWEEN SLABS AND INSERTS SUCH AS PIPES
3. AROUND STEEL COLUMNS AT SPREAD FOOTINGS

04 STRUCTURAL MASONRY

A. ALL MATERIALS AND WORKMANSHIP SHALL COMPLY WITH THE REQUIREMENTS OF THE FOLLOWING CODES ANDSTANDARDS:

1. "BUILDING CODE REQUIREMENTS AND SPECIFICATION FOR MASONRY STRUCTURES", (ACI 530-11/ASCE 5-11/TMS 402-11) AND "SPECIFICATION FOR MASONRY STRUCTURES", (ACI 530. 1-11/ASCE 6-11/TMS 602-11).
2. LOAD BEARING CONCRETE MASONRY UNITS: ASTM C90, TYPE I, GRADE N (MIN. COMPRESSIVE STRENGTH ON NET AREA = 1900 PSI) NORMAL (MEDIUM-LIGHT) WEIGHT
3. NON-LOAD BEARING CONCRETE MASONRY UNITS: ASTM C129, TYPE II
4. IVANY OPEN END BLOCK: ASTM C901 (MIN. COMPRESSIVE STRENGTH ON NET AREA = 3000 psi)
5. MORTAR: ASTM C270, TYPE S ABOVE GRADE/BELOW GRADE
6. CONCRETE BUILDING BRICK: ASTM C55, GRADE N (MIN. COMPRESSIVE STRENGTH ON NET AREA = 3500 PSI
7. CMU GROUT: ASTM C476, (MIN. COMPRESSIVE STRENGTH AT 28 DAYS = 2000 PSI)
8. CMU PRISM STRENGTH: F'm = 1500 PSI PER ACI 530/ASCE 5/TMS 402 UNIT STRENGTH METHOD
9. HORIZONTAL JOINT REINFORCING: ASTM A951, HOT DIPPED GALVANIZED
10. PLAIN REINFORCING BARS: ASTM A615, GRADE 60
11. WELDABLE REINFORCING BARS: ASTM A706, GRADE 60

B. CONCRETE MASONRY WALLS SHOWN ON STRUCTURAL DRAWINGS SHALL BE CONSTRUCTED IN ACCORDANCE WITH ACI 530.1 "SPECIFICATIONS FOR MASONRY STRUCTURES".

C. INSTALLATION DRAWINGS SHALL BE SUBMITTED FOR APPROVAL BY THE STRUCTURAL ENGINEER. THE INSTALLATION DRAWINGS SHALL INDICATE:

1. THE MATERIALS USED, THEIR SPECIFICATIONS, AND THEIR DESIGN STRENGTHS.
2. ELEVATIONS OF ALL STRUCTURAL CONCRETE MASONRY WALLS SHOWING THE LAYOUT, INCLUDING OPENINGS AND JOINTS, REINFORCING, ACCESSORIES, BOND BEAMS, LINTELS AND EMBEDDED ITEMS.

D. PRODUCT DATA AND MATERIAL CERTIFICATIONS FOR MASONRY MATERIALS AND ACCESSORIES SHALL BE SUBMITTED FOR APPROVAL IN SHOP DRAWING FORMAT.

E. MORTAR CEMENT SHALL BE PORTLAND-LIME CEMENT. MASONRY CEMENT SHALL NOT BE USED.

F. THE TYPICAL DETAILS ON THE DRAWINGS CONTAIN ADDITIONAL GENERAL MASONRY NOTES AND DETAILS.

G. BEARING WALLS SHALL BE ANCHORED AT INTERSECTIONS BY GALVANIZED STEEL STRAPS 1 1/2" X 1/4" X 24" WITH 2" BEND AT 90 DEGREES EACH END. INSTALL STRAPS INTO GROUTED CORES OF C.M.U. AT 24" MAXIMUM VERTICAL SPACING. DO NOT INSTALL ANCHORS AT CONTROL JOINTS.

H. CORNERS OF LOAD BEARING CONCRETE MASONRY WALLS SHALL BE LAID IN RUNNING BOND.

I. PROVIDE SOLID GROUTED CONCRETE MASONRY AROUND BEARING ENDS OF ALL BEAMS AND JOISTS.

J. NO OPENINGS FOR TRADES SHALL OCCUR IN CONCRETE MASONRY WALLS WITHIN 16 INCHES OF BEAM BEARING CENTERLINES.

K. EMBEDDED ITEM LOCATIONS SHALL BE COORDINATED WITH THE APPROVED SHOP DRAWINGS OF THE TRADES.

L. PROVIDE GALVANIZED HORIZONTAL JOINT REINFORCING IN ALL WALLS AT 16" O.C. PROVIDE ONE-PEICE PREFABRICATED "T" AND "L" SHAPED UNITS AT ALL WALL CORNERS AND INTERSECTIONS.

M. ONLY WELDABLE REINFORCING BARS MAY BE WELDED.

N. CONCRETE MASONRY IS SUPPOSED TO ABSORB WATER FROM MORTAR AND GROUT. DO NOT PLACE OR GROUT WET CONCRETE MASONRY UNITS.

O. WEBS OF MASONRY UNITS FOR PIERS, COLUMNS, PILASTERS, AND THE STARTER COURSE SHALL BE MORTARED. WEBS OF MASONRY UNITS SHALL ALSO BE MORTARED WHERE REQUIRED TO CONFINE GROUT.

P. IN GROUTED AND/OR REINFORCED MASONRY WALLS, USE MASONRY UNITS WITH CORES THAT ALIGN VERTICALLY. PROVIDE CONTINUOUS UNOBSTRUCTED CELLS FOR REINFORCEMENT PLACEMENT AND GROUTING.

Q. SPACES TO BE FILLED WITH GROUT SHALL BE KEPT CLEAN AND FREE FROM PROTRUSIONS OF MASONRY OR MORTAR.

R. ALL CELLS OF BELOW-GRADE CONCRETE MASONRY UNITS SHALL BE GROUTED.

S. THE MAXIMUM GROUT POUR HEIGHT FOR EACH SPECIFIC TYPE AND SIZE OF CONCRETE MASONRY UNIT SHALL NOT EXCEED THE LIMITS SPECIFIED IN ACI 530.1.

T. GROUT POURS SHALL BE CONSOLIDATED ADEQUATELY DURING PLACEMENT BY MECHANICAL VIBRATION IN ACCORDANCE WITH PUBLISHED PRACTICES.

U. PROVIDE VERTICAL MASONRY CONTROL JOINTS AT APPROXIMATELY 20'-0" O.C., AND IN ACCORDANCE WITH RECOMMENDATIONS IN THE "MASONRY DESIGNER'S GUIDE". REFER TO ARCHITECTURAL PLANS FOR LOCATIONS, OR IF NOT SHOWN, COORDINATE LOCATIONS WITH THE ARCHITECT.

V. SPLICE LAP LENGTHS FOR REINFORCING SHALL BE IN ACCORDANCE WITH THE FOLLOWING TABLE, U.N.O. ON THE PLANS:

	BAR SIZE	LAP LENGTH
a.	#3	24"
b.	#4	36"
c.	#5	48"
d.	#6	60"

W. DO NOT EMBED ANY NON-STRUCTURAL ITEMS IN STRUCTURAL MASONRY WITHOUT WRITTEN PERMISSION FROM THE STRUCTURAL ENGINEER.

X. ALL REINFORCING STEEL SHALL BE PLACED AND TIED IN THE PROPER POSITION AS THE WALLS ARE CONSTRUCTED. LOWERING THE BARS IN FROM THE TOP OF A COMPLETED WALL OR SECTION OF WALL IS NOT ALLOWED.

Y. CONTRACTOR SHALL PROVIDE BRACING AND SUPPORT FOR ALL MASONRY WORK UNTIL PERMANENT ROOF/FLOOR FRAMING IS IN PLACE.

05.12 STRUCTURAL STEEL FRAMING

A. ALL MATERIALS AND WORKMANSHIP SHALL COMPLY WITH THE REQUIREMENTS OF THE FOLLOWING CODES AND STANDARDS:

B. "MANUAL OF STEEL CONSTRUCTION - AISC 360-10 FOURTEENTH EDITION, 2010, AMERICAN INSTITUTE OF STEEL CONSTRUCTION (INCLUDING SPECIFICATIONS FOR STRUCTURAL STEEL BUILDINGS, SPECIFICATIONS FOR STRUCTURAL JOINTS USING ASTM A325 OR A490 BOLTS, AND AISC CODE OF STANDARD PRACTICE).

1. "DETAILING FOR STEEL CONSTRUCTION" AISC 326-09, AMERICAN INSTITUTE OF STEEL CONSTRUCTION.
2. "SEISMIC PROVISIONS FOR STRUCTURAL STEEL BUILDINGS, ANSI/AISC 341-05" AMERICAN INSTITUTE OF STEEL CONSTRUCTIONS.
3. "STRUCTURAL WELDING CODE ANSI/AWS D1.1/D1.1M-2004", AMERICAN WELDING SOCIETY.
4.

	MEMBER TYPE	SPECIFICATION
a.	W SHAPES	ASTM A992, Fy = 50 KSI
b.	CHANNELS	ASTM A36, Fy = 36 KSI
c.	PLATES	ASTM A572, Fy = 50 KSI
d.	ANGLES	ASTM A36, Fy = 36 KSI
e.	BARS AND RODS	ASTM A36, Fy = 36 KSI
f.	HSS SECTIONS KSI	ASTM A500, GRADE B, Fy = 46
g.	STRUCTURAL PIPE KSI	ASTM A53, GRADE B, Fy = 35
h.	THREADED RODS KSI	ASTM A36, Fy = 36 KSI, Fu = 58
i.	ANCHOR RODS	ASTM F 1554 GR 36, (50), (105)
j.	HIGH-STRENGTH BOLTS	ASTM A325-N, Fu = 120 KSI FOR 1/2" TO 1", Fu = 105 KSI >1"
k.	NUTS	ASTM A563
l.	HEADED SHEAR STUDS	ASTM A108, Fu = 65 KSI
m.	WELDING ELECTRODES	AWS A5.1 OR A5.5 E70XX

C. DESIGN OF ALL STRUCTURAL STEEL CONNECTIONS IS HEREBY DELEGATED. THE DESIGN OF ALL SUCH CONNECTIONS SHALL BE PERFORMED UNDER THE DIRECT SUPERVISION OF A LICENSED KENTUCKY PROFESSIONAL ENGINEER QUALIFIED AND EXPERIENCED IN THE DESIGN OF STRUCTURAL STEEL CONNECTIONS.

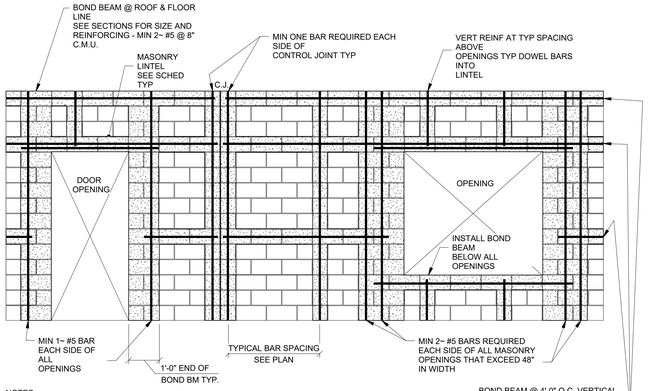
D. ALL SHOP AND FIELD CONNECTIONS SHALL BE MADE WITH HIGH STRENGTH BOLTS OR WELDS. ALL BOLTS AND NUTS SHALL BE CLEARLY MARKED AS REQUIRED BY AISC SPECIFICATIONS. ALL CONNECTIONS MADE WITH UNMARKED NUTS AND BOLTS WILL BE REJECTED. ALL BOLTED CONNECTIONS SHALL HAVE A MINIMUM OF 2 BOLTS.

E. THE DESIGN OF ALL STRUCTURAL STEEL CONNECTIONS SHALL BE AS FOLLOWS:

1. ALL CONNECTIONS SHALL CONFORM TO AISC REQUIREMENTS AND SHALL BE DESIGNED FOR THE GREATER OF 50% OF THE MAXIMUM UNIFORM DESIGN LOAD PER AISC TABLES, OR AS INDICATED ON THE DRAWINGS.
2. BRACE MEMBER CONNECTIONS SHALL BE DESIGNED FOR THE FORCES INDICATED ON EACH MEMBER, IF SHOWN.
3. IF BRACE MEMBER FORCES ARE NOT SHOWN, BRACE MEMBER CONNECTIONS SHALL BE DESIGNED TO DEVELOP THE FULL TENSILE YIELD STRENGTH OF THE BRACE MEMBER.
4. CONNECTION DESIGN SHALL BE IN ACCORDANCE WITH PROVISIONS OF THE AISC "STEEL CONSTRUCTION MANUAL", 14TH EDITION AND THE AISC MANUAL "DETAILING FOR STEEL CONSTRUCTION".

F. SHOP DRAWINGS AND CONNECTION CALCULATIONS SHALL BE SUBMITTED FOR APPROVAL PRIOR TO FABRICATION OF STRUCTURAL STEEL.

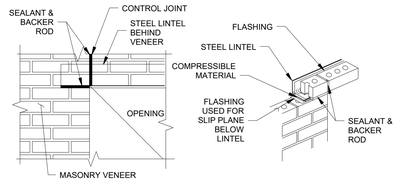
1. SHOP DRAWINGS SHALL CONTAIN ERECTION DRAWINGS AND DETAIL DRAWINGS.
2. ERECTION DRAWING SHALL SHOW THE LAYOUT AND PIECEMARK OF ALL STRUCTURAL STEEL MEMBERS AND ALL CONNECTIONS OF STRUCTURAL STEEL. SHOP-MADE AND FIELD-MADE CONNECTIONS SHALL BE INDICATED ON THE ERECTION DRAWINGS. ERECTION DRAWINGS SHALL INCLUDE SETTING DRAWINGS FOR ALL ANCHORAGES FOR STRUCTURAL STEEL.
3. CONNECTIONS BETWEEN STRUCTURAL STEEL AND STEEL JOIST FRAMING SHALL BE COORDINATED ON THE STRUCTURAL STEEL ERECTION DRAWINGS.
4. THE ERECTION DRAWINGS SHALL BEAR THE SEAL OF THE LICENSED ENGINEER UNDER WHOSE SUPERVISION THE CONNECTIONS WERE DESIGNED.
5. DETAIL DRAWINGS SHALL SHOW THE DIMENSIONS OF EACH PIECE INCLUDING THE DIMENSIONS OF ALL HOLES, SLOTS, COPES, CUTS ETC.
6. WHERE PIECES ARE SHIPPED AS ASSEMBLIES, THE ASSEMBLIES SHALL BE DETAILED SHOWING CONNECTIONS BETWEEN THE INDIVIDUAL PIECES. WELDS AND BOLTS SHALL BE INDICATED FOR ALL CONNECTIONS.
7. DETAIL DRAWINGS SHALL SHOW THE TYPE AND EXTENT OF PRIME PAINTING FOR EACH PIECE AND/OR ASSEMBLY.
8. CONNECTION DESIGN CALCULATI



NOTES:

1. MINIMUM VERTICAL WALL REINFORCING SHALL BE #5 @ 2'-0" UNLESS NOTED OTHERWISE.
2. VERTICAL WALL REINFORCING SHALL BE CONTINUOUS.
3. SEE TYPICAL DETAIL FOR DOWELS REQUIRED AT BASE OF WALLS.
4. CENTER REINFORCING BARS IN GROUTED CELLS UNLESS NOTED OTHERWISE.
5. USE BAR POSITIONERS AT MINIMUM 4'-0" SPACING TO SUPPORT REINFORCING BARS.
6. FOLLOW SPECIFIED GROUTING PROCEDURES.
7. CLEAN MORTAR FROM EDGES OF CELLS SO GROUT CAN FLOW SMOOTHLY AND FILL ENTIRE CELL.
8. USE LINTEL BLOCK OVER OPENINGS AND CONTINUE WITH OPEN-BOTTOM BOND BEAM FROM EDGE OF OPENING INTO WALL SO THAT VERTICAL REINFORCING AT JAMB CAN PASS.
9. CONTROL JOINTS SHALL EXTEND FULL HEIGHT OF WALL AND ALIGN FROM FLOOR TO FLOOR.
10. WHERE A CONTROL JOINT OCCURS THROUGH A BOND BEAM OR LINTEL BEARING, PROVIDE 2 ~ 1/2" DOWELS ACROSS JOINT WITH GREASE ON ONE SIDE. DO NOT CONTINUE HORIZONTAL REINFORCING ACROSS CONTROL JOINT.

TYPICAL C.M.U. WALL REINFORCEMENT DETAILS



LOOSE LINTEL SCHEDULE (FOR MASONRY VENEER)

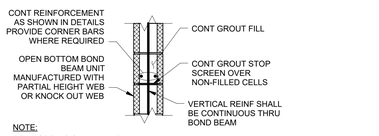
THIS SCHEDULE IS FOR LINTELS OVER MASONRY OPENINGS NOT OTHERWISE SHOWN OR NOTED ON DRAWINGS.

SPAN	ANGLE SIZE	PLAN MARK
UP TO 4'-0"	L3x 3 1/2 x 5/16 LLV	AL-1
UP TO 5'-6"	L4x 3 1/2 x 5/16 LLV	AL-2
UP TO 7'-6"	L5x 3 1/2 x 5/16 LLV	AL-3
UP TO 9'-6"	L6x 3 1/2 x 5/16 LLV	AL-4

NOTES:

1. PROVIDE ONE ANGLE FOR EACH 4" OF MASONRY WALL.
2. ANGLES EXPOSED TO WEATHER SHALL BE GALVANIZED.
3. MINIMUM BEARING LENGTH SHALL BE 4" EACH END.

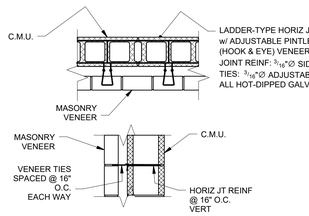
TYPICAL MASONRY VENEER LINTEL DETAIL



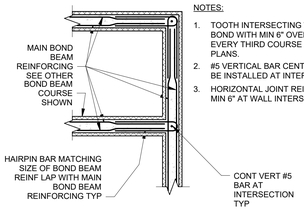
NOTE:

REINFORCING SHALL HAVE 3/4" MINIMUM GROUT COVER TO ALL C.M.U. SURFACES.

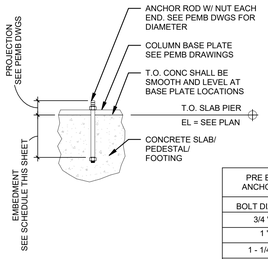
TYPICAL C.M.U. BOND BEAM DETAIL



TYPICAL HORIZ JOINT REINF AND VENEER DETAIL



TYPICAL MASONRY WALL INTERSECTION DETAIL

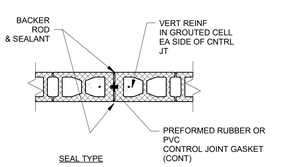


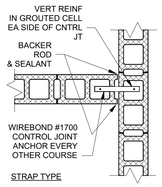
PRE ENGINEERED METAL BUILDING ANCHOR ROD EMBEDMENT LENGTHS	
BOLT DIAMETER	MIN EMBEDMENT*
3/4 "	1' - 6"
1 "	1' - 9"
1 - 1/4 "	2' - 0"
1 - 1/2 "	2' - 3"

NOTES:

1. VERIFY BASE PLATE DETAILS W METAL BUILDING DRAWINGS.
2. SET ANCHOR RODS WITH A TEMPLATE
3. * REDUCE EMBEDMENT FOR 3" CONCRETE COVER WHERE FOOTING THICKNESS WILL NOT ACCOMODATE EMBEDMENT IN TABLE.

TYPICAL METAL BUILDING ANCHOR ROD

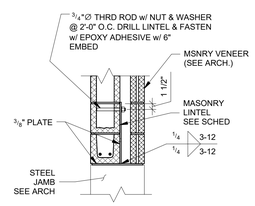




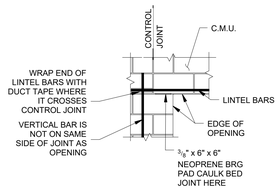
NOTES:

1. ARCHITECTURAL AND/OR STRUCTURAL DRAWINGS FOR CONTROL JOINT LOCATIONS.
2. DISCONTINUE HORIZONTAL JOINT REINFORCEMENT AND BOND BEAMS REINFORCEMENT AT CONTROL JOINTS.
3. UNLESS OTHERWISE SHOWN OR NOTED, SPACING OF CONTROL JOINTS SHALL NOT EXCEED 24 FEET.

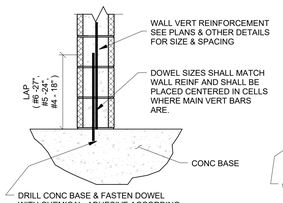
TYPICAL C.M.U. CONTROL JOINT DETAIL

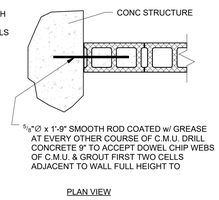


TYP MASONRY VNR LINTEL FOR OPNGS > = 10' W

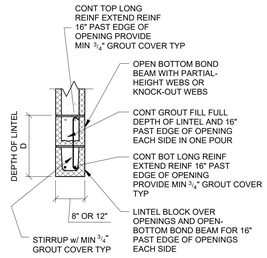


TYPICAL C.M.U. CONTROL JT @ OPENING





TYPICAL C.M.U. WALL DOWELS DETAIL

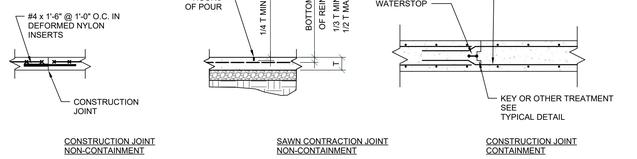


MASONRY LINTEL SCHEDULE					
MARK	MAX OPENING SIZE	D	BOTTOM REINF	TOP REINF	STIRRUPS
ML-1	5'-0"	8"	2~#5	NONE	NONE
ML-2	8'-0"	16"	2~#5	NONE	NONE
ML-3	11'-8"	24"	2~#5 (8" C.M.U.) 2~#6 (10" C.M.U.)	NONE	NONE
ML-4	18'-0"	24"	2~#5 (8" C.M.U.) 2~#6 (10" C.M.U.)	2~#5	#3@8"

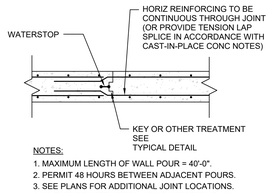
NOTES:

1. DO NOT USE THIS SCHEDULE IF CONCENTRATED LOAD IS APPLIED TO THE LINTEL AT A HEIGHT LESS THAN HALF THE SPAN ABOVE THE LINTEL OR IF STACK BOND IS SPECIFIED.
2. IN LIEU OF USING LINTEL BLOCK ON THE BOTTOM OF LINTELS WHICH, REQUIRES SHORING DURING CONSTRUCTION, CONTRACTOR MAY USE PRESTRESSED, PRECAST CONCRETE LINTELS BY "CAST-CRETE" (WWW.CASTCRETE.COM) OR APPROVED EQUAL. SUBMIT PRODUCT DATA AND A PLAN AND SCHEDULE OF LINTEL LOCATIONS AND SIZES FOR APPROVAL FOR THIS OPTION.

TYPICAL C.M.U. LINTEL DETAIL



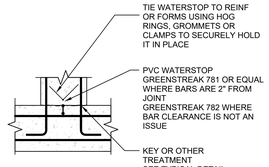
TYPICAL SLAB ON GRADE JOINTS



NOTES:

1. MAXIMUM LENGTH OF WALL POUR = 40'-0".
2. PERMIT 48 HOURS BETWEEN ADJACENT POURS.
3. SEE PLANS FOR ADDITIONAL JOINT LOCATIONS.
4. SUBMIT CONSTRUCTION JOINT LOCATION PLAN FOR APPROVAL PRIOR TO CONSTRUCTION.
5. DO NOT FORM JOINTS WITHIN 5'-0" OF A CORNER OR TEE INTERSECTION.

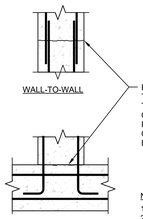
TYPICAL WALL CONSTRUCTION JOINT



NOTES:

1. USE THIS DETAIL IF A SPECIFIC DETAIL IS NOT INDICATED OTHERWISE ON PLANS AND SECTIONS.

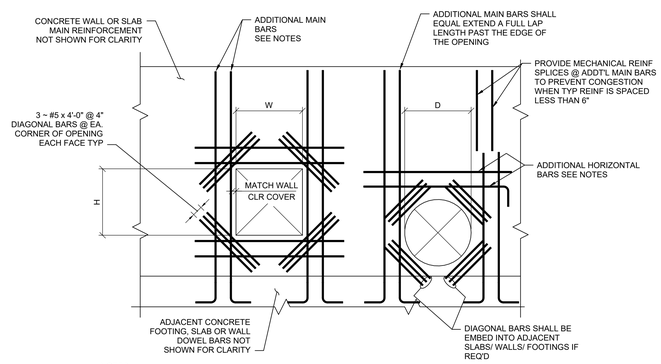
TYPICAL WATERSTOP



NOTES:

1. JOINT MAY BE WALL-TO-WALL OR SLAB-TO-SLAB.
2. WATERSTOP MAY BE REQUIRED SEE PLANS.
3. SEE OTHER DETAILS FOR MORE JOINT INFORMATION.

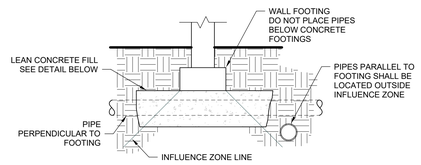
TYPICAL CONSTRUCTION JOINT CONCRETE PREPARATION

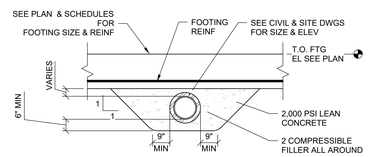


NOTES:

1. USE THIS DETAIL IF ADDITIONAL REINFORCEMENT IS NOT INDICATED OTHERWISE ON DRAWINGS.
2. SPECIFIED REINFORCEMENT CONCRETE COVER REQUIRED AT ALL OPENINGS. SEE OTHER SECTIONS FOR COVER REQUIREMENTS.
3. REINFORCEMENT SPACING SHALL NOT EXCEED 12" FOR LIQUID RETAINING STRUCTURES.
4. ADDITIONAL BARS SHALL BE EQUAL TO THE NUMBER AND SIZE OF BARS INTERRUPTED BY THE OPENING. IF THE INTERRUPTED BARS ARE AN ODD NUMBER, THEN ROUND UP TO THE NEAREST EVEN NUMBER AND PROVIDE HALF THAT NUMBER AS ADDITIONAL BARS TO EACH SIDE OF THE OPENING AND EACH FACE. THE LENGTH OF THE BARS SHALL EQUAL THE WIDTH OF THE OPENING + STANDARD LAP LENGTH, HOOK IF LAP LENGTH IS NOT AVAILABLE AT EITHER END.
5. IF ADDITIONAL DIAGONAL BARS REQUIRED AT THE CORNERS OF THE OPENINGS CONFLICT WITH ONE ANOTHER THE CONFLICTING ENDS THEN HOOK ENDS OF DIAGONAL BARS AS REQUIRED.
6. ADDITIONAL BARS MAY EXTEND ACROSS TWO OR MORE OPENINGS CONTINUOUSLY.

TYPICAL REINFORCEMENT AT WALL & SLAB OPENINGS





NOTE:

PROVIDE CONCRETE PROTECTION AROUND UTILITY LINE WHEN LINE IS WITHIN FOOTING INFLUENCE ZONE. SEE DETAIL ABOVE FOR INFLUENCE ZONE DEFINITION.

TYPICAL UTILITY LINE BELOW FOOTING

SCALE: 1/4" = 1'-0"

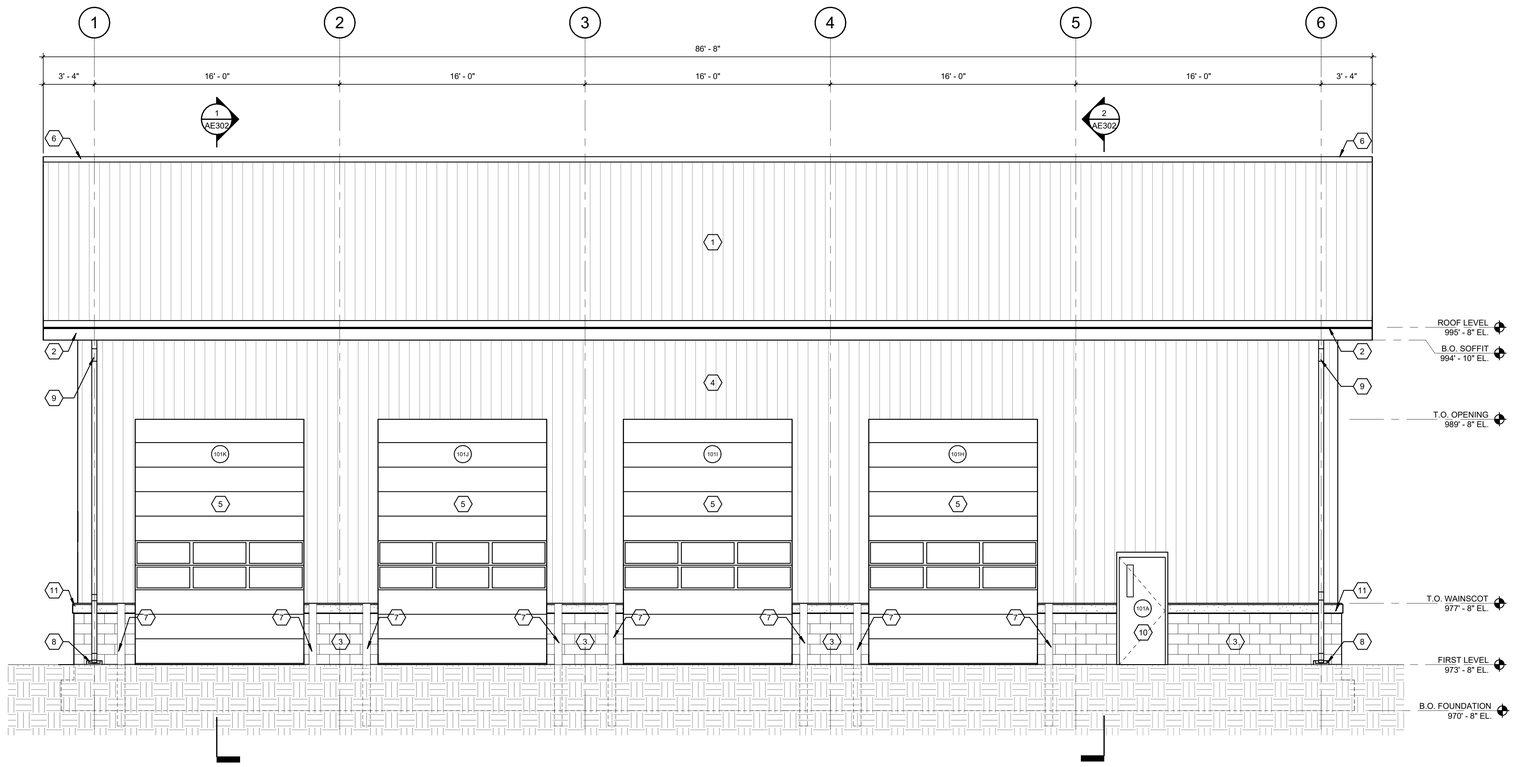
SHEET NO.: AE102 03

BUILDING 1 of 1.DS Rel G:\GA7-FLF\CD DWG\ HCB\Working\Drawings\Revit Arch\Central Model\GA7TAKEOFF.rvt

1 EXTERIOR NORTH ELEVATION

SCALE: 1/4" = 1'-0"



2 EXTERIOR SOUTH ELEVATION

SCALE: 1/4" = 1'-0"

GENERAL NOTES:

1. SEE STRUCTURAL PLANS FOR ADDITIONAL REQUIREMENTS.
2. SEE PLUMBING PLANS FOR ADDITIONAL REQUIREMENTS.
3. SEE MECHANICAL PLANS FOR ADDITIONAL REQUIREMENTS.
4. SEE SITE/CIVIL PLANS FOR ADDITIONAL REQUIREMENTS.

SHEET KEYNOTES:

1	INSULATED METAL ROOF PANEL
2	PRE-FINISHED METAL GUTTER, SEE SPECS.
3	WAINSCOT EXTERIOR FINISH - 4" NOM. SPLIT-FACED CMU.
4	INSULATED METAL WALL PANEL
5	SECTIONAL DOOR, TYP. SEE SCHEDULE.
6	RIDGE CLOSURE PER MFR.
7	EXTERIOR BOLLARD, COORDINATE WITH CIVIL. ENSURE BOLLARD IS OUTSIDE OF FOOTING AND IS CLEAR OF OVERHEAD DOOR OPENING
8	PROVIDE DOWNSPOUT SPLASH BLOCK
9	PRE-FINISHED METAL DOWNSPOUT, SEE SPECS.
10	HOLLOW METAL DOOR, SEE SCHEDULE.
11	PRECAST WATER TABLE, TYP.

PLUMBING GENERAL NOTES:

1. GENERAL NOTES, WHEREVER THEY ARE FOUND, APPLY TO ALL WORK IN THE PROJECT, UNLESS OTHERWISE INDICATED. CONFLICTS BETWEEN GENERAL NOTES AND SPECIFICATIONS SHALL BE CALLED TO THE ATTENTION OF THE ENGINEER - THE MORE STRINGENT REQUIREMENT SHALL APPLY. SHEET KEYNOTES, UTILIZING NOTE SYMBOLS, APPLY ONLY TO THE SHEET ON WHICH THEY ARE FOUND, UNLESS OTHERWISE STATED. THE MEANING OF NOTE SYMBOLS AND NUMBERS VARIES FROM SHEET TO SHEET.
2. CONTRACTOR SHALL UTILIZE ALL INFORMATION IN THE CONTRACT DOCUMENTS FOR PROVIDING THE WORK. CONTRACTOR SHALL UTILIZE DETAILS AND RISER DIAGRAMS FOR THE WORK WHERE APPROPRIATE, WHETHER OR NOT THEY ARE SPECIFICALLY REFERENCED ON THE PLAN OR SUPPORTING DRAWINGS.
3. CONTRACTOR SHALL FIELD VERIFY ALL EXISTING CONDITIONS. ANY DISCREPANCIES BETWEEN EXISTING CONDITIONS AND CONTRACT DOCUMENTS ARE TO BE BROUGHT TO THE ATTENTION OF THE ENGINEER BEFORE ANY WORK RELATING TO THOSE CONDITIONS IS PERFORMED.
4. LEGENDS OR LISTS OF SYMBOLS AND ABBREVIATIONS ARE GENERAL IN NATURE AND MAY CONTAIN ITEMS NOT USED IN THE CONTRACT DOCUMENTS. IF ANY SUCH ITEMS ARE FOUND WHICH ARE NOT DEFINED ON THE PLANS OR IN THE SPECIFICATIONS, THE ENGINEER SHALL BE CONTACTED FOR CLARIFICATION BEFORE THE BID.
5. CONTRACTOR SHALL MAINTAIN A SET OF PROJECT RECORD DRAWINGS AT THE JOB SITE AND SHALL BE RESPONSIBLE FOR MAKING CLEAR, NEAT CHANGES TO THE DRAWINGS, REFLECTING CHANGES TO THE WORK AND VARIANCE IN EXISTING CONDITIONS.
6. PROVIDE ALL MISCELLANEOUS STEEL, AS REQUIRED, TO SUPPORT ALL PIPING SYSTEMS, FIXTURES AND EQUIPMENT. DO NOT HANG ANYTHING FROM MECHANICAL OR ELECTRICAL ITEMS.
7. NO STRUCTURAL MEMBERS SHALL BE CUT, BURNED, WELDED OR DRILLED WITHOUT SPECIFIC PERMISSION OF THE ENGINEER.
8. DO NOT CHANGE PATH OF PIPING, ADD TURNS OR OFFSETS OR PIPE SIZE WITHOUT FIRST CONSULTING THE ENGINEER. PIPE SIZES SHOWN ON DRAWINGS ARE NOMINAL UNLESS OTHERWISE INDICATED.
9. CONTRACTOR SHALL MAKE MINOR OFFSETS AND LOCATION CHANGES IN PIPE AS REQUIRED IN CONGESTED CEILING OR MECHANICAL SPACES. GENERALLY, THESE WILL BE AT NO COST TO THE OWNER AND APPROVED BY THE ENGINEER WITHOUT FORMAL DOCUMENTS. MAJOR REROUTING OF LINES OR MAJOR ADDITION OF FITTINGS WILL BE REVIEWED AND APPROVED AS A CHANGE ORDER OR A FORMAL DIRECTIVE. ENGINEER ALONE SHALL CLASSIFY CHANGES AS MAJOR OR MINOR.
10. ALL COPPER PIPING SHALL BE ASSEMBLED WITH WROUGHT COPPER OR CAST COPPER ALLOY FITTINGS AND 95/5 TIN ANTIMONY SOLDER OR SILVER BRAZING. NO SOLDER CONTAINING MORE THAN 0.2% LEAD SHALL BE USED IN MANUFACTURING OR IN FIELD ASSEMBLY OF POTABLE WATER SYSTEM COMPONENTS. ALL PIPING, FITTINGS, FIXTURES AND EQUIPMENT IN CONTACT WITH POTABLE WATER SHALL BE CERTIFIED BY THE SOURCE OF THE PRODUCT TO BE 'LEAD-FREE' (TO CONTAIN LESS THAN 0.25% LEAD) IN COMPLIANCE WITH THE EPA AND SDWA (SAFE DRINKING WATER ACT AND U.S. PUBLIC LAW 111-380).
11. ALL INTERRUPTIONS OF UTILITY SERVICE REQUIRED FOR COMPLETION OF THE WORK SHALL BE SCHEDULED 7 DAYS IN ADVANCE.
12. COORDINATE ALL PLUMBING WITH NEW MECHANICAL AND ELECTRICAL WORK, INCLUDING HVAC, PLUMBING, FIRE PROTECTION, ELECTRICAL, FIRE ALARM AND COMMUNICATIONS.
13. DO NOT USE BULL-HEADED TEE FITTINGS ON PIPE, UNLESS SPECIFICALLY SHOWN.
14. PROVIDE ALL PLUMBING CONNECTIONS, PIPING, FIXTURES AND EQUIPMENT AS INDICATED, NOTED AND SCHEDULED, FOR A COMPLETE WORKING SYSTEM. WORK SHALL BE PROVIDED BY A LICENSED PLUMBING CONTRACTOR, IN ACCORDANCE WITH KENTUCKY PLUMBING CODE, AND SHALL BE ACCOMPANIED BY A CERTIFICATE OF INSPECTION AND APPROVAL.
15. ALL EQUIPMENT, ACCESSORIES, PIPING, AND OTHER WORK, WHICH IS INSTALLED IN FINISHED SPACES SHALL BE CONCEALED IN WALLS, FLOORS, CHASES OR SUSPENDED CEILINGS, UNLESS OTHERWISE INSTRUCTED ON PLANS.
16. PROVIDE ALL ACCESS DOORS AS SHOWN, EXCEPT THOSE SPECIFIED UNDER OTHER DIVISIONS. IN ADDITION, PROVIDE ANY OTHER ACCESS DOORS (WHETHER OR NOT SHOWN ON PLANS) NECESSARY FOR ACCESS TO CONCEALED EQUIPMENT, VALVES OR OTHER OPERATIONAL OR SERVICEABLE ITEMS, UNLESS ITEM IS REASONABLY ACCESSIBLE THROUGH LAY-IN CEILING PANELS.
17. SEE RISER DIAGRAMS FOR SIZES NOT SHOWN ON PLANS.
18. THE CONTRACTOR SHALL NOT REMOVE OR DISTURB ANY SUSPECTED HAZARDOUS MATERIALS, INCLUDING ASBESTOS-CONTAINING MATERIALS (ACM), LEAD-BASED PAINTS EXCEPT AS INSTRUCTED IN THIS CONTRACT. IF ANY MATERIAL NOT COVERED BY THE CONTRACT IS ENCOUNTERED, NOTIFY THE ENGINEER AT ONCE.
19. ALL DEMOLISHED OR REMOVED EQUIPMENT, PIPING, FIXTURES, SUPPORTS, AND THE LIKE SHALL BECOME THE PROPERTY OF THE CONTRACTOR AND SHALL BE REMOVED FROM THE SITE UNLESS OTHERWISE NOTED.
20. REINSULATE ALL PIPE, VALVES AND FITTINGS WHERE EXISTING INSULATION HAS BEEN REMOVED OR DAMAGED DURING THE PROJECT.
21. FINAL PRODUCT SHALL BE A COMPLETE AND FUNCTIONING SYSTEM CONFORMING TO ALL REQUIREMENTS OF THE CURRENT BUILDING CODES OF KENTUCKY. CONTRACTOR IS RESPONSIBLE FOR MAKING ALL REQUIRED CONNECTIONS FOR A COMPLETE SYSTEM.
22. EXAMINE THE CONTRACT DOCUMENTS AND IMMEDIATELY REPORT ANY ERROR, DISCREPANCY OR OMISSION. THE ENGINEER WILL DETERMINE WHICH INTERPRETATION TAKES PRECEDENCE WHERE TWO OR MORE CONFLICTING STATEMENTS OCCUR. OTHERWISE, THE CONTRACTOR IS RESPONSIBLE FOR THE MORE STRINGENT (OR EXPENSIVE) INTERPRETATION. IN GENERAL, SCHEDULES, WHEREVER THEY APPEAR, SUPERSEDE SPECIFICATIONS AND SPECIFICATIONS SUPERSEDE PLANS.
23. APPLICABLE KENTUCKY CODES ARE:
KENTUCKY STATE PLUMBING LAW, REGULATIONS & CODE (815 KAR CHAPTER 20)
STATE BOILER REGULATION
2018 KENTUCKY BUILDING CODE
2015 INTERNATIONAL EXISTING BUILDING CODE
2015 INTERNATIONAL MECHANICAL CODE
2015 INTERNATIONAL FIRE CODE

GENERAL NOTES:

1. FURNISH ALL LABOR, MATERIAL, AND EQUIPMENT REQUIRED FOR THE COMPLETION & OPERATION OF ALL SYSTEMS IN THIS SECTION OF WORK IN ACCORDANCE WITH ALL APPLICABLE CODES, ASHRAE, SMACNA, NFPA, EPA, ETC.
2. REFER TO ALL PROJECT DRAWINGS FOR DETAILS OF CONSTRUCTION AND INSTALLATION REQUIREMENTS.
3. CONTRACTOR SHALL BECOME, PRIOR TO BID, THOROUGHLY FAMILIAR WITH THE REQUIREMENTS OF THESE NOTES AS WELL AS OTHER NOTES SHOWN ON THE CONTRACT DOCUMENTS.
4. THESE DRAWINGS REFLECT A SYSTEM DESIGNED AROUND SPECIFIC REFERENCE PRODUCTS (SEE SCHEDULES). THE SELECTION OF WHICH HAS INFLUENCED THE DESIGNS OF OTHER TRADES (ELECTRICAL, STRUCTURAL, ETC.). IF SUBSTITUTE MANUFACTURERS, SIZES, OR MODEL NUMBERS ARE BID, SUBMITTED OR INSTALLED, IT IS THE RESPONSIBILITY OF THE MECHANICAL CONTRACTOR AND ALL HIS SUBCONTRACTORS TO COORDINATE ALL DIFFERENCES PRIOR TO BID. ALL COSTS OF ALL TRADES ASSOCIATED WITH THE SUBSTITUTION SHALL BE INCLUDED IN THE BID.
5. COORDINATION OF ALL MODIFICATIONS TO EACH DISCIPLINE WHICH RESULT FROM SUBSTITUTION OF EQUIPMENT OR MATERIALS SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR. SUBSTITUTIONS WHICH ARE INSTALLED AND SUBSEQUENTLY ARE PROVEN UNSATISFACTORY BY OWNER AND/OR ENGINEER, WITHIN THE WARRANTY PERIOD, SHALL BE REMOVED COMPLETELY BY THE CONTRACTOR AND REPLACED WITH THE ORIGINAL DESIGN OR CORRECTED AS DIRECTED BY THE ENGINEER WITHOUT ADDITIONAL COST TO THE OWNER.
6. ALL DRAWINGS ARE DIAGRAMMATIC AND INDICATE THE GENERAL ARRANGEMENTS OR GEOMETRICAL RELATIONSHIPS OF EQUIPMENT AND SERVICES. THEY ARE NOT INTENDED TO SPECIFY OR SHOW EVERY OFFSET, SEQUENCE, DEVICE, OPTION, FITTING, VALVE, OR COMPONENT.
7. INFORMATION AND COMPONENTS SHOWN ON RISER DIAGRAMS OR DETAILS, BUT NOT SHOWN ON PLANS, AND VICE VERSA, SHALL BE PROVIDED AS IF EXPRESSLY REQUIRED BY BOTH.
8. CONTRACTOR SHALL NOT SCALE DRAWINGS. DRAWINGS SPECIFIC TO THIS DISCIPLINE DO NOT LIMIT THE RESPONSIBILITY OF WORK REQUIRED BY THE CONTRACT DOCUMENTS.
9. EXACT LOCATIONS OF ALL EQUIPMENT, DUCTS, DIFFUSERS, ETC. SHALL BE COORDINATED WITH OTHER TRADES. CEILING MOUNTED LIGHTING, AND ELECTRICAL REQUIREMENTS TAKE PRECEDENCE OVER CEILING MOUNTED MECHANICAL REQUIREMENTS.
10. CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING ALL WORK WITH THAT OF OTHER TRADES. REFER TO ELECTRICAL AND OTHER DRAWINGS FOR COMPLETE INFORMATION PRIOR TO BID.
11. ALL MECHANICAL CONSTRUCTION DETAILS SHALL BE AS SHOWN AND AS REQUIRED TO MAINTAIN "UL" ASSEMBLY RATINGS. SEAL AROUND ALL PENETRATIONS THROUGH ALL "UL" RATED ASSEMBLIES, FIRE, AND SMOKE WALLS. COORDINATE WITH GENERAL CONTRACTOR.
12. NO OTHER TRADES, I.E., ELECTRICAL, CEILING, PLUMBING, ETC., SHALL BE SUSPENDED, HUNG, OR SUPPORTED FROM DUCTWORK OR PIPING.
13. ALL BUILDING PENETRATIONS MUST BE COORDINATED WITH ENGINEER AND SHALL BE FLASHED AND SEALED WEATHERTIGHT. ALL MATERIALS AND COLORS MUST BE PRE-APPROVED BY ENGINEER.
14. ROUTE DUCTWORK AS HIGH AS POSSIBLE TO FACILITATE ACCESS TO ABOVE CEILING SPACE. COORDINATE ROUTING WITH OTHER SERVICES AND TRADES.
15. ALL DUCTWORK AND PIPING SHALL BE SUPPORTED FROM STRUCTURE.
16. ALL DUCTWORK SHALL BE CONSTRUCTED AND INSTALLED PER SMACNA HVAC DUCT CONSTRUCTION STANDARDS.
17. MAXIMUM FLEXIBLE DUCT LENGTH SHALL BE 5'-0". ALL FLEXIBLE DUCT SHALL CONFORM TO THE REQUIREMENTS OF U.L. 181 FOR CLASS 1 FLEXIBLE AIR DUCTS. SUPPORT TO ELIMINATE SAGGING & KINKING.
18. ALL HVAC EQUIPMENT TO BE INSTALLED PER MANUFACTURER'S REQUIREMENTS AS SHOWN. UTILIZE FACTORY FILTERS DURING CONSTRUCTION.
19. ALL PIPING, DUCTS, VENTS, ETC., EXTENDING THROUGH WALLS SHALL BE FLASHED, COUNTER FLASHED IN WATERPROOF MANNER W/LEAD ROOF JACK.
20. CONTRACTOR TO COORDINATE DUCTWORK WITH OTHER TRADES, OFF-SET AS REQUIRED, RUN DUCTWORK BETWEEN JOIST WHERE POSSIBLE.
21. CONTRACTOR SHALL VISIT THE JOB SITE & BE FAMILIAR WITH ALL PROJECT CONDITIONS PRIOR TO FABRICATING ANY EQUIPMENT, DUCTWORK, ETC. NO ALLOWANCES WILL BE MADE FOR CONTRACTOR UNFAMILIARITY WITH PROJECT CONDITIONS.
22. MECHANICAL CONTRACTOR SHALL BALANCE SYSTEM TO AIR QUANTITIES INDICATED ON PLANS AND PROVIDE OWNERS REPRESENTATIVES WITH COMPLETE NEBB/AABC BALANCE REPORT.
23. ALL SQUARE ELBOWS SHALL HAVE TURNING VANES. NO EXCEPTIONS.
24. PROVIDE A MANUAL VOLUME DAMPER AT ALL BRANCH TAKE-OFFS.
25. ALL DUCT DIMENSIONS SHOWN ARE INTERIOR CLEAR DUCT DIMENSIONS.
26. ALL CONTROL WIRING & CONDUIT SHALL COMPLY WITH NEC.
27. PIPE AND DUCT ROUTING SHOWN IS SCHEMATIC. HVAC CONTRACTOR SHALL PROVIDE ANY ADDITIONAL OFFSETS AND FITTINGS, INCLUDING DIVIDED DUCTS, REQUIRED FOR PROPER INSTALLATION AND TO MAINTAIN CLEARANCES AS ENCOUNTERED IN THE FIELD.
28. MECHANICAL CONTRACTOR SHALL COORDINATE WITH ELECTRICAL CONTRACTOR AND DRAWINGS FOR CONNECTIONS AND LOCATION OF ALL EQUIPMENT.
29. CONTRACTOR SHALL MAINTAIN A SET OF PROJECT RECORD DRAWINGS AT THE JOB SITE AND SHALL BE RESPONSIBLE FOR MAKING CLEAR, NEAT CHANGES TO THE DRAWINGS, REFLECTING CHANGES TO THE WORK AND VARIANCE IN EXISTING CONDITIONS.
30. CONSULT ROOF PLAN AND STRUCTURAL DRAWINGS FOR PLACEMENT OF ROOF MOUNTED EQUIPMENT. PROVIDE ALL NECESSARY ROOF CURBS, EQUIPMENT RAILS AND BASES AND ANY ADDITIONAL REQUIRED FRAMING IN COORDINATION WITH STRUCTURAL AND ROOFING WORK.
31. ALL EQUIPMENT, DUCT, PIPING AND ACCESSORIES INSTALLED OUTSIDE OR OTHERWISE EXPOSED TO THE ELEMENTS SHALL BE ADEQUATELY WEATHERPROOFED, IN KEEPING WITH THE SPECIFICATIONS. ALL FERROUS METAL FRAMING COMPONENTS SHALL BE STAINLESS STEEL OR HOT-DIP GALVANIZED.
32. PROVIDE ALL ACCESS DOORS AS SHOWN, EXCEPT THOSE SPECIFIED UNDER OTHER DIVISIONS. IN ADDITION, PROVIDE ANY OTHER ACCESS DOORS WHETHER OR NOT SHOWN ON PLANS, NECESSARY FOR ACCESS TO CONCEALED EQUIPMENT, VALVES, DAMPERS, ACTUATORS, JUNCTION BOXES, CONTROLS OR OTHER OPERATIONAL OR SERVICEABLE ITEMS, UNLESS ITEM IS REASONABLY ACCESSIBLE THROUGH LAY-IN CEILING PANELS.
33. PROVIDE LINTELS AS REQUIRED FOR ALL NEW OPENINGS GREATER THAN 12" WIDE IN MASONRY OR LOAD-BEARING WALLS, MATERIAL TO BE APPROVED BY ENGINEER.
34. ANY AND ALL DAMAGE DUE TO DEMOLITION OR CONSTRUCTION IS TO BE REPAIRED OR REPLACED AS APPROPRIATE, SUBJECT TO ENGINEER'S APPROVAL, AND AT NO ADDITIONAL COST TO THE OWNER.
35. THE CONTRACTOR SHALL NOT REMOVE OR DISTURB ANY SUSPECTED HAZARDOUS MATERIALS, INCLUDING ASBESTOS-CONTAINING MATERIALS (ACM), LEAD-BASED PAINTS, ELECTRICAL GEAR CONTAINING PCB'S OR ANY OTHER, EXCEPT AS INSTRUCTED IN THIS CONTRACT. IF ANY MATERIAL NOT COVERED BY THE CONTRACT IS ENCOUNTERED, NOTIFY THE ENGINEER AT ONCE.
36. ALL DEMOLISHED OR REMOVED EQUIPMENT, PIPING, DUCTWORK, SUPPORTS, CONTROLS AND THE LIKE SHALL BECOME THE PROPERTY OF THE CONTRACTOR AND SHALL BE REMOVED FROM THE SITE UNLESS OTHERWISE NOTED.
37. ALL EQUIPMENT PROVIDED WITH FILTERS SHALL HAVE FILTERS IN PLACE AT THE TIME OF STARTUP. ALL NEW FILTERS SHALL BE INSTALLED AT THE TIME OF OWNER OCCUPANCY, AND A COMPLETE SET OF EXTRA FILTERS SHALL BE TURNED OVER TO THE OWNER AT THIS TIME. IN THE EVENT THAT CARE IS NOT TAKEN DURING INITIAL OPERATION TO PREVENT CONTAMINATION OF THE FILTERS WITH CONSTRUCTION DUST, ADDITIONAL SETS OF FILTERS SHALL BE PROVIDED TO PROTECT THE EQUIPMENT.
38. PROVIDE ADDITIONAL INPUT/OUTPUT POINTS REQUIRED TO IMPLEMENT CONTROL SEQUENCES SPECIFIED.
39. PAINT ALL EXPOSED PLENUMS AND DUCTWORK BEHIND GRILLES AND DIFFUSERS WITH FLAT BLACK PAINT.

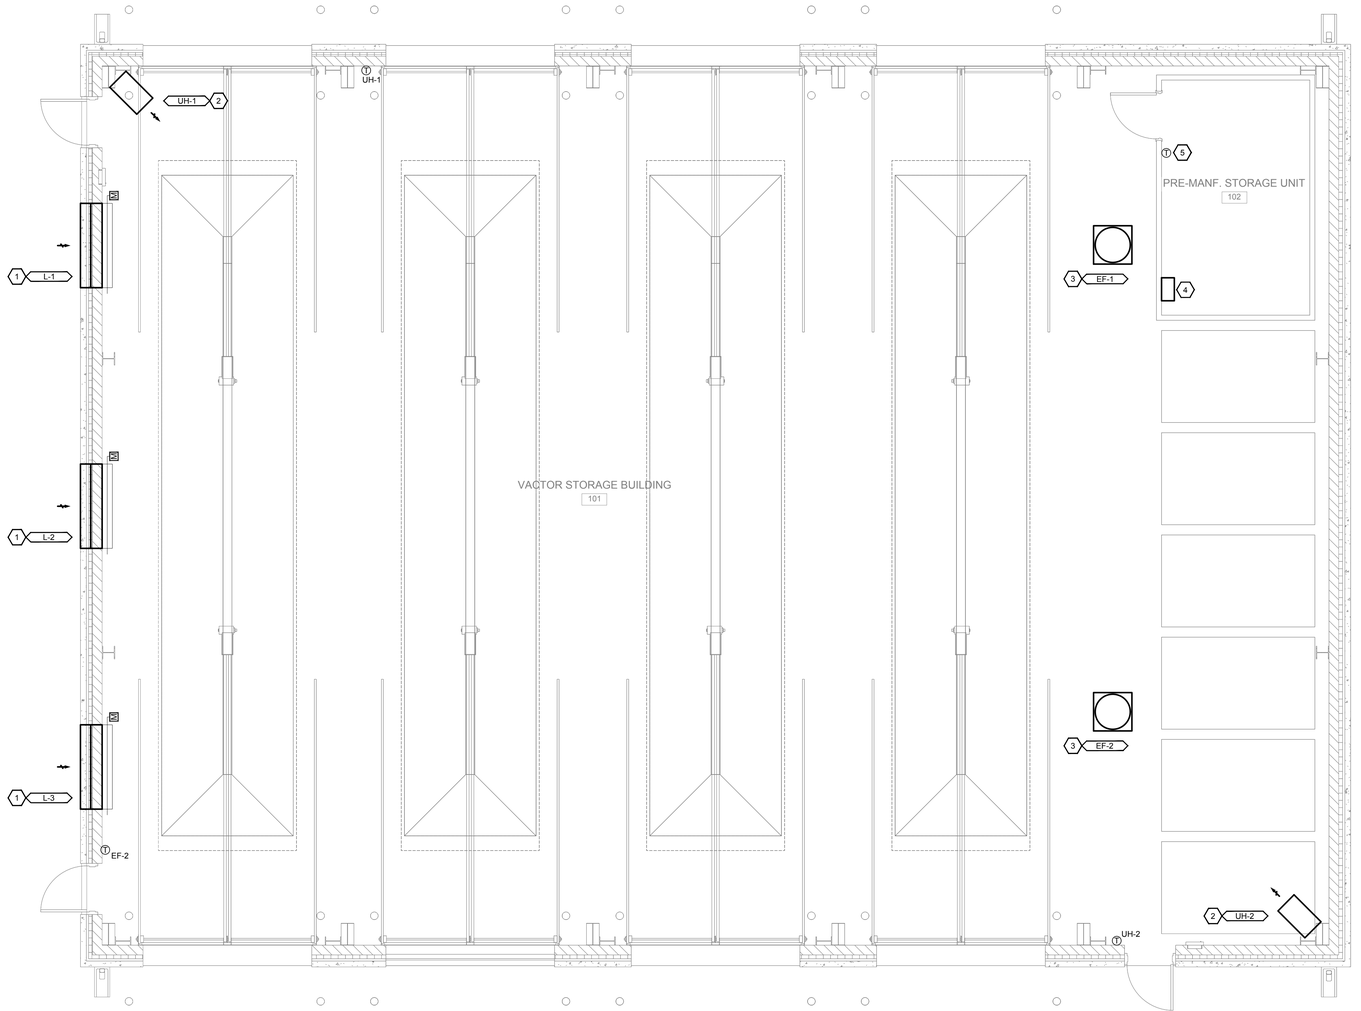
ADD ALTERNATE #1:

REFER TO ARCHITECTURAL AND CIVIL DRAWINGS FOR REVISED VACTOR BUILDING LOCATION FOR THIS ALTERNATE. THIS ALTERNATE DOES NOT AFFECT THE MECHANCIAL DESIGN LAYOUT.



GENERAL NOTES:

1. CONTROL WIRING CONDUIT IS BEING PROVIDED AND INSTALLED BY ELECTRICAL CONTRACTOR FROM VACTOR BUILDING TO THE STORAGE BUILDINGS. TEMPERATURE CONTROLS CONTRACTOR SHALL PULL ALL CONTROL WIRING NEEDED FROM CONTROL PANEL IN VACTOR BUILDING TO THE STORAGE BUILDINGS.

SHEET KEYNOTES:

1. FURNISH AND INSTALL NEW INTAKE LOUVER AND MOTORIZED CONTROL DAMPER FOR VENTILATION SYSTEM. COORDINATE LOUVER INSTALLATION HEIGHT WITH GENERAL CONTRACTOR & ARCHITECT.
2. FURNISH AND INSTALL NEW GAS-FIRED UNIT HEATER. HANG FROM WALL BRACKET.
3. FURNISH AND INSTALL NEW ROOF MOUNTED EXHAUST FAN. PROVIDE WITH ROOF CURB TO FIT ROOF SLOPE
4. PROVIDE AND INSTALL MAIN BAS CONTROL PANEL IN LOCATION SHOWN BELOW. COORDINATE LOCATION WITH OWNER AND OWNER'S IT DEPARTMENT. ALSO COORDINATE WITH ELECTRICAL AND CONTROLS CONTRACTORS.
5. PROVIDE TEMPERATURE SENSOR CONNECTED TO BAS TO MONITOR AIR TEMPERATURE IN ROOM. REFER TO CONTROLS DRAWINGS FOR ADDITIONAL INFORMATION.

ADD ALTERNATE #3:

MECHANICAL CONTRACTOR SHALL INCLUDE PRICING FOR ADD ALTERNATE #3 TO INCLUDE ALL PREVENTATIVE MAINTENANCE WORK FOR ALL MECHANICAL EQUIPMENT FOR A PERIOD OF THREE YEARS FROM DATE OF SUBSTANTIAL COMPLETION. ALL PREVENTATIVE MAINTENANCE WORK SHALL BE PER MANUFACTURER'S INSTALLATION AND MAINTENANCE GUIDES. BASE BID AND WARRANTY WORK INCLUDES ONE YEAR FROM SUBSTANTIAL COMPLETION. ADD ALTERNATE #3 PRICING INCLUDES THE TWO ADDITIONAL YEARS AFTER THE FIRST YEAR.

LOUVER SCHEDULE

MARK	MANUFACTURER	MODEL	INTAKE / EXHAUST	SIZE			CFM	PRESSURE DROP (IN)	FREE AREA (SQ FT)	VELOCITY (FPM)	REMARKS
				WIDTH	HEIGHT	DEPTH					
IL-1	GREENHECK	EAD-635	INTAKE	36	24	6"	1,550	0.035"	2.9	530	ALL
IL-2	GREENHECK	EAD-635	INTAKE	36	24	6"	1,550	0.035"	2.9	530	ALL
IL-3	GREENHECK	EAD-635	INTAKE	36	24	6"	1,550	0.035"	2.9	530	ALL

REMARKS:
1. LOUVER COLOR SELECTED BY ARCHITECT
2. COORDINATE ALL LOUVER LOCATIONS WITH ARCHITECT AND GENERAL CONTRACTOR PRIOR TO INSTALLATION
3. ALUMINUM CONSTRUCTION
4. DRAINABLE BLADES
5. MAXIMUM NC LEVEL OF 25
6. PROVIDE WITH MOTORIZED 120V CONTROL DAMPER.
7. PROVIDE BIRD SCREEN
8. PROVIDE INSECT SCREEN

OTHER ACCEPTABLE MANUFACTURERS INCLUDE: RUSKIN, UNITED. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

GAS FIRED UNIT HEATER SCHEDULE

MARK	MANUFACTURER	MODEL	GAS INFORMATION		FAN MOTOR ELECTRICAL			FLUE	ELECTRICAL			REMARKS
			INPUT (MBH)	OUTPUT (MBH)	HP	RPM	AMPS	SIZE	V/Ø/Hz	MCA	MOCP	
UH-1	DAYTON	2RYU8	45	37.4	1/20	1650	1.9	4"	115/1/60	4	20	ALL
UH-2	DAYTON	2RYU8	45	37.4	1/20	1650	1.9	4"	115/1/60	4	20	ALL

REMARKS:
1. WALL MOUNTED INSTALLATION
2. INSTALL AS HIGH AS POSSIBLE TO AVOID WORKING AREA BELOW
3. ROUTE FLUE VENTS UP TO ROOF. COORDINATE FLUE PENETRATIONS WITH ROOFING CONTRACTOR
4. CONTROL VIA WALL MOUNTED THERMOSTAT, REFER TO FLOOR PLANS

OTHER ACCEPTABLE MANUFACTURERS INCLUDE: REZNOR, MODINE. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

EXHAUST FAN SCHEDULE

MARK	MANUFACTURER	MODEL	SERVICE	TYPE	CFM	ESP (IN H20)	SONES	DRIVE TYPE	RPM	ELECTRICAL				REMARKS
										V/Ø/Hz	HP	MCA	MOCP	
EF-1	GREENHECK	G-095-VG	VACTOR STORAGE	ROOF-DOWNBLAST	300	0.4	9.5	DIRECT	1725	120/1/60	1/6	3.0	15	1,2,3,4,5,6,7

EF POINTS LIST								
TAG	POINT DESCRIPTION	UNITS	DI	DO	AI	AO	ALARM	TREND
FS-1	FAN STATUS	ON/OFF	X				X	

SEQUENCE OF OPERATION - EF

EXHAUST FANS - EF-1 AND EF-2

FANS
EF-1 SHALL RUN CONTINUOUS DURING OCCUPIED HOURS. FAN SHALL BE OFF DURING UNOCCUPIED HOURS. VERIFY OCCUPIED HOURS WITH OWNER. MOTORIZED CONTROL DAMPERS ON LOUVERS SHALL BE INTERLOCKED WITH FAN STATUS. IF ANY FAN IS ON, THEN LOUVER DAMPERS SHALL OPEN. IF BOTH FANS ARE OFF, THEN LOUVER DAMPERS SHALL BE CLOSED. FAN ON/OFF STATUS SHALL TIE INTO BAS MONITORING SYSTEM.

EF-2 SHALL BE CONTROLLED VIA WALL MOUNTED THERMOSTAT. WHEN SPACE TEMPERATURE IS 65F (ADJ) OR BELOW, FAN SHALL BE OFF. WHEN SPACE TEMPERATURE RISES ABOVE 65F (ADJ), FAN SHALL RUN CONTINUOUS DURING OCCUPIED HOURS. DURING UNOCCUPIED HOURS, FAN SHALL BE OFF..

LOUVER CONTROL DAMPER OPEN/CLOSE STATUS SHALL BE VIEWABLE AND CONNECT TO BAS.

EMERGENCY SHUTOFF: IF SPACE TEMPERATURE DROPS TO 45F (ADJ) OR BELOW, EF-1 AND EF-2 SHALL TURN OFF AND THE LOUVER MOTORIZED DAMPERS SHALL CLOSE. WHEN SPACE TEMPERATURE RISES ABOVE 45F (ADJ), FANS SHALL RESUME NORMAL OPERATION.

OPERATING PARAMETERS: UH

FUNCTION	SET POINT ADJUSTABLE	REMARKS
TEMPERATURE SETPOINT	65 F (ADJ)	SEND ALARM TO DDC SYSTEM IF SPACE TEMPERATURE FALLS BELOW 55F (ADJ).
BAS INTERFACE		-ON/OFF STATUS TO BAS MONITORING SYSTEM. -HEAT STATUS TO BAS MONITORING SYSTEM. -SPACE TEMPERATURE TO BAS MONITORING SYSTEM.

UNIT HEATER POINTS LIST (UH 1-2)								
TAG	POINT DESCRIPTION	UNITS	DI	DO	AI	AO	ALARM	TREND

GENERAL NOTES:

1. THE MINIMUM STANDARD FOR ALL WORK SHALL BE THE LATEST EDITION OF THE INTERNATIONAL BUILDING CODE WITH IN STATE AMENDMENTS AND THE NATIONAL ELECTRICAL CODE (NEC).
2. ALL ELECTRICAL WORK SHALL BE PERFORMED BY AN IN-STATE LICENSED ELECTRICIAN.
3. ALL PERMITS NEEDED TO LEGALLY PERFORM THE ELECTRICAL WORK SHALL BE OBTAINED BY THE CONTRACTOR PRIOR TO START OF WORK. COST OF PERMITTING IS BY THE CONTRACTOR.
4. AT COMPLETION OF THE WORK, A CERTIFICATE OF COMPLIANCE FROM THE LOCAL AHJ OVER THE ELECTRICAL WORK SHALL BE PROVIDED TO THE ENGINEER AND OWNER. COST OF ELECTRICAL INSPECTION IS BY THE CONTRACTOR.
5. ALL MATERIALS USED IN THE PROJECT GENERALLY SHALL BE NEW AND UNUSED, UNLESS OTHERWISE NOTED ON THE DRAWINGS. ALL NEW MATERIALS SHALL BE LISTED AND LABELED BY UL OR OTHER ACCEPTABLE LISTING AGENCY, WHERE A LISTING EXISTS.
6. THE CONTRACTOR SHALL VISIT THE SITE(S) PRIOR TO BIDDING TO FAMILIARIZE THEMSELVES WITH PROJECT REQUIREMENTS AND EXISTING CONDITIONS.
7. FIRESTOP ALL NEW CONDUIT INSTALLED THROUGH EXISTING OR NEW FIRE RATED ASSEMBLIES.
8. SHOP DRAWINGS SHALL BE SUBMITTED ON ALL ELECTRICAL MATERIALS AND EQUIPMENT FOR ACCEPTANCE PRIOR TO PURCHASE BY THE CONTRACTOR.
9. WHEN AN ITEM DEMOLISHED IS REMOVED, REMOVE ALL CONCRETE PADS, FASTENERS, CONDUIT AND WIRING. SCARIFY SURFACE AND RESTORE TO MATCH EXISTING SURROUNDING SURFACE, INCLUDING PAINTING TO MATCH.
10. ALL NEW WIRING SHALL BE ENCLOSED IN AN APPROVED RACEWAY SYSTEM. OPEN WIRING IS PROHIBITED.
11. CIRCUIT BREAKERS USED FOR HVAC EQUIPMENT LOADS SHALL BE HACR TYPE.
12. ENSURE DEDICATED ELECTRICAL SPACE IS PROVIDED AT ELECTRICAL EQUIPMENT IN ACCORDANCE WITH NEC ARTICLE 110.26.
13. UP TO 3 CIRCUITS MAY BE COMBINED IN ONE CONDUIT, AS LONG AS NEC DERATING RULES ARE FOLLOWED.
14. ALL CIRCUITS SHALL HAVE A DEDICATED NEUTRAL. SHARED NEUTRALS AND MULTI-WIRE CIRCUITS ARE NOT TO BE USED EXCEPT POSSIBLY TO COORDINATE WITH SYSTEMS FURNITURE. SEE POWER PLAN.
15. 120 VOLT CIRCUITS THAT EXCEED 75 LINEAR CIRCUIT FEET SHALL BE INCREASED TO #10 AWG AS A GENERAL RULE. OTHER CIRCUITS WILL BE DESIGNED SPECIFICALLY WITH VOLTAGE DROP CONSIDERED IN CONDUCTOR SIZING.
16. COORDINATE ALL MOTOR STARTERS, FEEDERS AND DISCONNECT SWITCHES FOR HVAC AND OTHER UTILIZATION EQUIPMENT ACTUALLY PROVIDED IN ACCEPTED SHOP DRAWINGS.
17. IN ORDER TO COMPLY WITH OSHA REQUIREMENTS, NO OPERATOR DEVICE OF ANY PANEL OR DISCONNECT OR MOTOR CONTROL SHALL BE HIGHER THAN 6'-6" AFF.
18. PROVIDE AN EXTERIOR RATED SERVICE RECEPTACLE WITHIN 25 FEET HORIZONTALLY OF ANY EXTERIOR OR ROOFTOP HVAC OUTDOOR UNIT (HEATING OR AIR CONDITIONING ONLY).
19. INSTALL A NYLON PULLSTRING IN ALL SPARE CONDUITS, ACCESSIBLE AT BOTH ENDS. CAP OFF SPARE CONDUITS ON BOTH ENDS.
20. DEVICE PLATES SHALL BE INSTALLED PLUMB. JUMBO OR OVERSIZED PLATES SHALL NOT BE USED.
21. NEW RECEPTACLES SHALL BE INSTALLED WITH GROUND PIN ORIENTATION TO MATCH EXISTING. IN NEW CONSTRUCTION, GROUND PIN DOWN ABOVE COUNTERS OR WORK BENCHES AND UP FOR LOW WALL MOUNTED DEVICES.
22. AT COMPLETION OF PROJECT, ALL ELECTRICAL, TELECOMMUNICATIONS, AND ELECTRONIC SAFETY SYSTEMS SHALL BE FULLY OPERATIONAL.
23. EGRESS LUMINAIRES AND EXIT SIGNS REQUIRE UNSWITCHED LIGHTING CONDUCTOR.
24. SUPPORT ALL LUMINAIRES FROM THE STRUCTURE, NOT FROM THE SUSPENDED CEILING GRID. ALSO ATTACH THE LUMINAIRES TO THE GRID SYSTEM USING EARTHQUAKE CLIPS (SIMILAR TO ERICO/CADDY FASTENERS OR T&B/STEEL CITY).
25. WHERE DUPLEX RECEPTACLES ARE INDICATED GENERALLY BACK TO BACK ON OPPOSITE SIDES OF A PARTY WALL, THE RECEPTACLES SHALL NOT BE INSTALLED IN THE SAME STUD SPACE, BUT SHALL BE SEPARATED BY AT LEAST ONE STUD SPACE.
26. PROVIDE LABEL WITH ESTIMATED FAULT CURRENT AND DATE CALCULATED ON THE MAIN SERVICE DISCONNECT ENCLOSURE. PROVIDE COORDINATION STUDY AND ARC FLASH STUDY, AND APPLY JOB SPECIFIC ARC FLASH HAZARD WARNING LABELS ON ALL SWITCHBOARDS, SWITCHGEAR, MCC'S AND PANELBOARDS.
27. CIRCUIT BREAKERS, 1200 AMPERE OR LARGER, SHALL COMPLY WITH NEC ARTICLE 240.87, ARC ENERGY REDUCTION.

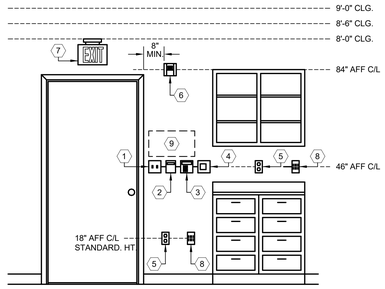
1 DEDICATED ELECTRICAL SPACE DETAIL

NOT TO SCALE



SHEET KEYNOTES:

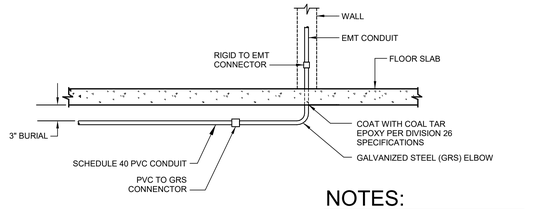
1. MOUNT EDGE OF LIGHTING CONTROL DEVICES CLOSEST TO DOOR AT A DISTANCE OF TWO INCHES FROM THE EDGE OF THE FACE PLATE TO THE DOOR FRAME INCLUDING ALL APPLIED TRIM UNLESS OTHERWISE NOTED. MOUNT REMAINING DEVICES IN THE FOLLOWING ORDER:

   A. FIRE ALARM INITIATION DEVICES.
   B. SECURITY/ACCESS CONTROL DEVICES.
   C. HVAC THERMOSTAT/HUMIDISTAT DEVICES.
   D. OTHER DEVICES.

   MOUNT THE EDGE OF DEVICE OR DEVICE FACE PLATES TWO INCHES APART. PROVIDE BLOCKING AS NECESSARY IN THE WALL OR PROVIDE MANUFACTURED SUPPORTS SIMILAR TO CADDY 'RB' SERIES OR EQUAL. ALL DEVICES TO BE MOUNTED WITH CENTER LINE AT HEIGHT INDICATED.
2. FIRE ALARM INITIATING DEVICE.
3. SECURITY/ACCESS CONTROL KEYPAD.
4. HVAC THERMOSTAT/HUMIDISTAT CONTROL DEVICE.
5. ABOVE COUNTER ELECTRICAL/COMMUNICATIONS DEVICE, COORDINATE MOUNTING HEIGHT WITH ARCHITECTURAL INTERIOR ELEVATIONS. SHOWN AT TYPICAL HEIGHT.
6. FIRE ALARM NOTIFICATION APPLIANCE.
7. INSTALL WALL MOUNTED EXIT SIGNS WITH BOTTOM EDGE OF SIGN APPROXIMATELY FOUR INCHES FROM TOP OF DOOR FRAME.
8. COMMUNICATIONS OUTLET.
9. WHEN SIGNAGE WITH TACTILE CHARACTERS ARE TO BE INSTALLED, THE BOTTOM OF TACTILE SIGNAGE SHALL BE MOUNTED AT 50" AFF MINIMUM WITH THE TOP MOUNTED AT A MAXIMUM OF 60" AFF. PROVIDE A CLEAR SPACE OF 18" IN FRONT OF SIGNAGE. ALL OTHER PROVISIONS AND SPACINGS REQUIRED BY A.D.A. SHALL BE FOLLOWED.

2 DEVICE MOUNTING COORDINATION DETAIL

NOT TO SCALE

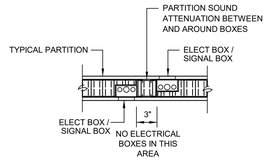


NOTES:

1. THIS DETAIL APPLIES TO ALL RISERS THROUGH SLAB ON GRADE, EITHER IN WALL OR EXPOSED.

3 THROUGH-SLAB CONDUIT DETAIL

NOT TO SCALE

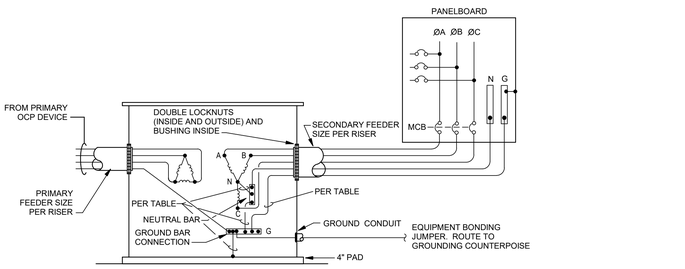


NOTES:

1. ROUGH-IN BOXES MAY BE MOUNTED IN ADJACENT STUD SPACE ONLY IF THE BOXES FACE THE SAME DIRECTION. BACK-TO-BACK BOXES MUST BE SEPARATED PER THIS DETAIL.
2. DO NOT PLACE BOXES BACK-TO-BACK EVEN IF SHOWN GRAPHICALLY ON DRAWINGS AS BACK-TO-BACK. BOXES SHALL BE INSTALLED SEPARATED PER THIS DETAIL. PROVIDE ADDITIONAL METAL FRAMING AS NECESSARY TO INSTALL BOXES SEPARATED AS INDICATED.
3. ELEC/SIGNAL BOXES WITH OPENING AREAS NOT EXCEEDING 16 SQUARE INCHES PLACED IN RATED WALLS FACING IN OPPOSITE DIRECTIONS SHALL BE SEPARATED A MINIMUM OF 24 INCHES. INSTALLATION SHALL BE IN ACCORDANCE WITH KENTUCKY BUILDING CODE SECTION 711.3.2 "MEMBRANE PENETRATIONS".

4 BACK-TO-BACK BOX MOUNTING DETAIL

NOT TO SCALE

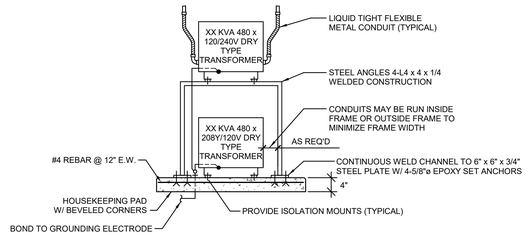


NOTES:

1. DETAIL IS FOR 3-PHASE DRY-TYPE TRANSFORMERS WITH PRIMARY 480-VOLTS DELTA AND SECONDARY 208/120-VOLT WYE.
2. BOND JUMPER AND GROUNDING ELECTRODE CONDUCTOR SHALL BE SIZED PER TABLE 250.66 OF NEC 2017.
3. BOND JUMPER AND REQUIRED GROUNDING ELECTRODE CONDUCTOR SHALL BE SAME SIZE. IF THE SECONDARY FEEDER CONDUCTORS ARE GREATER THAN 1100 MCM COPPER OR 1750MCM ALUMINUM, THE BOND JUMPER SHALL BE INCREASED IN SIZE TO 12.5 PERCENT OF THE CROSS-SECTIONAL AREA OF THE SECONDARY PHASE CONDUCTOR.

5 GROUNDING FOR DRY-TYPE (600V OR LESS) TRANSFORMER

NOT TO SCALE



NOTES:

1. AT THE CONTRACTORS DISCRETION, THE TRANSFORMER LOCATED ON TOP OF THE RACK MAY BE WALL-MOUNTED UTILIZING THE PROPER WALL-MOUNT BRACKET (FURNISHED BY THE MANUFACTURER).
2. ALL TRANSFORMERS FOR WALL MOUNTING SHALL BE PROVIDED WITH APPROPRIATE MOUNTING BRACKET BY THE TRANSFORMER MANUFACTURER.
3. SLEEVE GROUNDING ELECTRODE BONDING BACK TO MAIN SERVICE GROUND.

6 TRANSFORMER MOUNTING DETAIL - RACK MOUNTED

GENERAL NOTES:

1	REFER TO ONE-LINE DIAGRAMS (AND/OR PANELBOARD SCHEDULES) FOR CONDUIT/CONDUCTOR SIZE FOR BRANCH PANELBOARD FEEDERS AND INDICATED BRANCH CIRCUITS.
2	INDIVIDUAL HOMERUNS HAVE BEEN SHOWN FOR EACH CIRCUIT FOR CLARITY. CONTRACTOR MAY CHOOSE TO COMBINE UP TO THREE (3) 20A/120V BRANCH CIRCUITS IN A COMMON CONDUIT WITHOUT UPSIZING CONDUCTORS. EACH CIRCUTI SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR-CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.
3	COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.

SHEET KEYNOTES

1	PANELBOARD VL1 (200A MCB, 480Y/277V, 3-PHASE, 4-WIRE).
2	PANELBOARD VL1 ELECTRICAL FEEDER. REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-601.
3	BARE #2 COPPER GROUNDING ELECTRODE CONDUCTOR - EXTEND FROM PANELBOARD VL1 TO GROUNDING TRIAD (REFER TO "LFUCG DWQ HEADQUARTERS & OPERATIONS FACILITY" - SITE PLAN - ELECTRICAL NEW WORK", SHEET ES102 01).
4	PANELBOARD VR1 (400A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
5	PANELBOARD VR1 TRANSFORMER (112.5 KVA, 480V X 208Y/120V, 3-PHASE, 4-WIRE DRY-TYPE TRANSFORMER - FLOOR MOUNTED).
6	PANELBOARD VR2 TRANSFORMER (25 KVA, 480V X 120/240V, 1-PHASE, 3-WIRE DRY-TYPE TRANSFORMER - RACK MOUNTED ABOVE VR1 TRANSFORMER). REFER TO MOUNTING REQUIREMENTS ON DETAIL 6, SHEET E-501.
7	4" CONCRETE HOUSEKEEPING PAD.
8	EXISTING PANELBOARD VR2 (100A MCB, 120/240V, 1-PHASE, 3-WIRE). PANELBOARD WILL BE PROVIDED WITH THE PRE-MANUFACTURERED STORAGE UNIT.
9	100A/240V/1-PHASE FUSIBLE DISCONNECT (NEMA 1 ENCLOSURE) FOR SECONDARY OVERCURRENT PROTECTION OF PANELBOARD VR2 TRANSFORMER. FUSE AT 100 AMPS.
10	PANELBOARD SR1 ELECTRICAL FEEDER. REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-601. REFER TO PANELBOARD LOCATION ON "LFUCG EXTERIOR STRUCTURES" - FIRST LEVEL - POWER PLAN, SHEET EP101 02.
11	PANELBAORD SR2 ELECTRICAL FEEDER. REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-601. REFER TO PANELBOARD LOCATION ON "LFUCG EXTERIOR STRUCTURES" - FIRST LEVEL - POWER PLAN, SHEET EP101 02.
12	BARE #2 COPPER GROUNDING CONDUCTOR - EXTEND FROM PANELBOARD VR1 TRANSFORMER Xo TO GROUNDING ELECTRODE CONDUCTOR.
13	BARE #6 COPPER GROUNDING CONDUCTOR - EXTEND FROM PANELBOARD VR2 TRANSFORMER TO GROUNDING ELECTRODE CONDUCTOR.
14	30A/600V/3-PHASE NON-FUSED DISCONNECT SWITCH (NEMA 1 ENCLOSURE). PROVIDE CONNECTION TO OVERHEAD DOOR CONTROLLER, AS REQUIRED. COORDINATE REQUIREMENTS WITH OVERHEAD DOOR INSTALLER. REFER TO FIELD CONNECTION DETAIL 1 ON SHEET E-502 FOR ADDITIONAL INFORMATION.
15	UP/DOWN/STOP PUSHBUTTON FOR OVERHEAD DOOR. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
16	PROVIDE CONNECTION TO OVERHEAD DOOR SAFETY BEAM PHOTO SENSOR. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
17	PROVIDE CONNECTION TO OVERHEAD DOOR SENSING EDGE. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
18	HVAC UNIT IS PROVIDED WITH FACTORY MOUNTED DISCONNECT SWITCH.
19	ROUTE THE 120V CIRCUIT SERVING EXHAUST FAN (EF-1) THROUGH A N.O. CONTACT ON THE FACTORY MOUNTED DAMPER CONTROL TRANFORMER INTEGRAL TO THE EXHAUST FAN AND PROVIDE CONNECTION TO THE MOTORIZED DAMPER.
20	PROVIDE 120V CONNECTION TO THE BAS CONTROL PANEL. COORDINATE LOCATION OF CONTROL PANEL WITH MECHANICAL CONTROLS CONTRACTOR.
21	HVAC UNIT PROVIDED WITH STARTER AND DISCONNECT.
22	PROVIDE DEDICATED RECEPTACLE (NEMA L5-20R) FOR TELECOMMUNICATIONS EQUIPMENT.
23	ADD ALTERNATE #1 - PROVIDE NEW BRANCH PANELBOARD SR3 ELECTRICAL FEEDER. REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-601. REFER TO PANELBOARD LOCATION ON "LFUCG EXTERIOR STRUCTURES" - ADD ALTERNATE #1 - FIRST LEVEL - POWER PLAN, SHEET EP102 02.
24	SUMP PUMP CONTROL PANEL (FURNISHED/INSTALLED BY DIV 23). PROVIDE TWO (2) 208V CIRCUITS FOR PUMP POWER.
25	PROVIDE 120V CONNECTION TO SUMP PUMP CONTROL PANEL FOR CONTROL/ALARM POWER. ROUTE THROUGH ADJACENT SWITCH.
26	PROVIDE 120V CONNECTION TO TRAP PRIMER. COORDINATE EXACT LOCATION WITH PLUMBING CONTRACTOR.
27	PROVIDE 2" CONDUIT FROM SUMP PUMP BASIN TO SUMP PUMP CONTROL PANEL (COORDINATE WITH PLUMBING CONTRACTOR). PROVIDE SEAL OFF FITTING IN CONDUIT WITH FIBER FILLER AND SEALING CEMENT (INSTALL PER NEC 500 AND 502). CONDUIT SHALL BE USED FOR FACTORY PUMP AND FLOAT CABLES.

SYSTEM LABELING / WIRING SPECIFICATION

DATA LABELING:

F:XY-R:P

F = IDENTIFIES FLOOR OF TELECOMMUNICATION SPACE
XY = RACK IDENTIFIER
R = PATCH PANEL IDENTIFIER
P = PATCH PANEL PORT IDENTIFIER

PATCH PANEL TYPES:

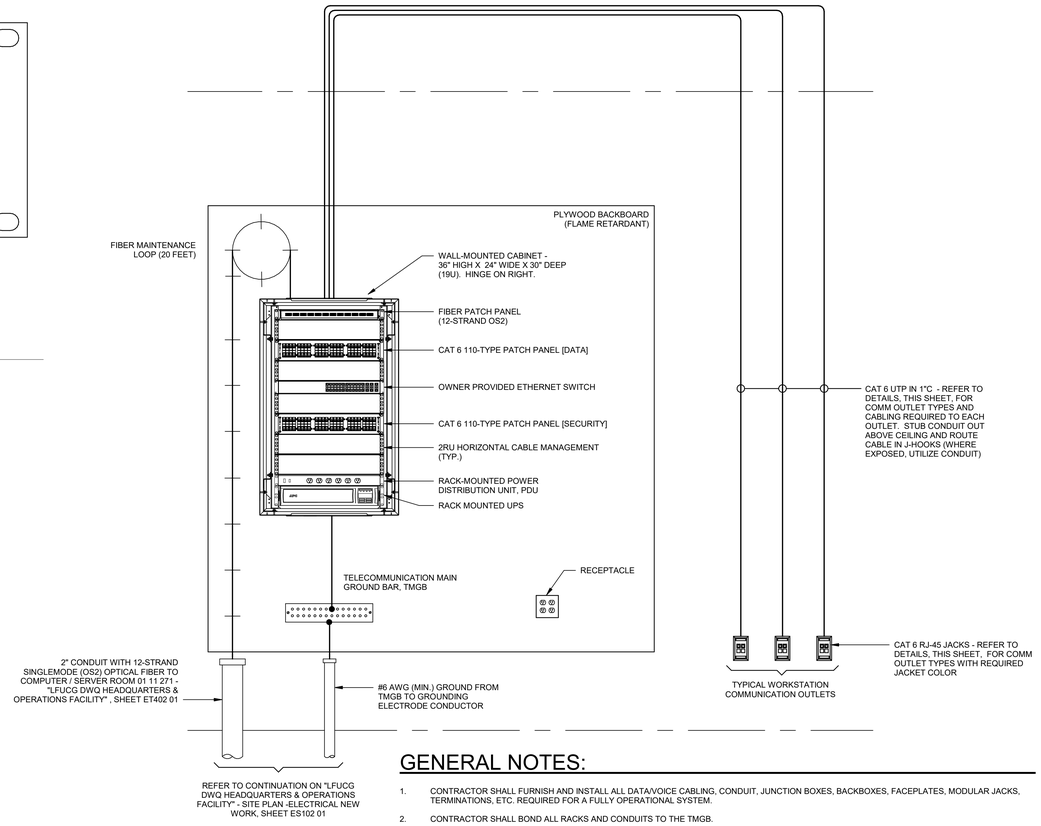
TYPE A - FOR TERMINATION OF DATA CABLES ONLY (ORANGE JACKS)
TYPE B - FOR TERMINATION OF WAP CABLES ONLY (ORANGE JACKS)
TYPE C - FOR TERMINATION OF SECURITY CABLES ONLY (PURPLE JACKS)

COLOR CODE TELECOMMUNICATION OUTLETS AND CABLING AS FOLLOWS:

DATA - BLUE CABLING (ORANGE JACKS)
WAP - BLUE CABLING (ORANGE JACKS)
SECURITY - PURPLE CABLING (PURPLE JACKS)

NOTES:

1. DATA/VOICE/SECURITY: CATEGORY 6 UTP CABLE (JACKET COLOR AS INDICATED OR SPECIFIED ELSEWHERE)
2. HDMI CABLING: HIGH DEFINITION MULTIMEDIA CABLE (BLACK JACKET)



GENERAL NOTES:

1. CONTRACTOR SHALL FURNISH AND INSTALL ALL DATA/VOICE CABLING, CONDUIT, JUNCTION BOXES, BACKBOXES, FACEPLATES, MODULAR JACKS, TERMINATIONS, ETC. REQUIRED FOR A FULLY OPERATIONAL SYSTEM.
2. CONTRACTOR SHALL BOND ALL RACKS AND CONDUITS TO THE TMGB.
3. TELECOMMUNICATION CABLING SHALL BE ROUTED IN CONDUIT TO ABOVE CEILING AND UTILIZE J-HOOKS FOR ABOVE CEILING. WHERE EXPOSED (NO CEILING), CABLING SHALL BE ROUTED IN CONDUIT.
4. NOT SHOWN ON THIS DETAIL; HOWEVER, THE ACCESS CONTROL PANEL AND POWER SUPPLY SHALL BE MOUNTED ON THE PLYWOOD BACKBOARD. REFER TO EY101 AND EY601 FOR ADDITIONAL INFORMATION.
5. NOT SHOWN ON THIS DETAIL; HOWEVER, ACCESS CONTROL AND CAMERA HORIZONTAL CABLING SHALL TERMINATE ON THE SECURITY PATCH PANEL WITHIN THIS EQUIPMENT CABINET. REFER TO SECURITY RISER DIAGRAMS ON SHEET EY601.

   BASE BID - ACCESS CONTROL AND CAMERA HORIZONTAL CABLING SHALL BE ROUTED BACK TO THIS EQUIPMENT CABINET FOR ACCESS CONTROL AND CAMERA HORIZONTAL CABLING FOR THE "LFCUCG EXTERIOR STRUCTURES". REFER TO SECURITY RISER DIAGRAMS ON "LFUCG EXTERIOR STRUCTURES", SHEETS EY601 02 AND EY602 02 FOR ADDITIONAL INFORMATION.

   ADD ALTERNATE #1 - 12-STRAND SINGLEMODE (OS2) OPTICAL FIBER WILL BE ROUTED TO A TELECOMMUNICATIONS EQUIPMENT CABINET LOCATED AT THE "LFUCG EXTERIOR STRUCTURES." ACCESS CONTROL AND CAMERA HORIZONTAL CABLING FOR THE "LFUCG EXTERIOR STRUCTURES" WILL BE ROUTED TO THAT TELECOMMUNICATIONS EQUIPMENT CABINET. PROVIDE ADDITIONAL FIBER TERMINATION PANEL IN THE "LFUCG VACTOR BUILDING" TELECOMMUNICAITONS EQUIPMENT CABINET TO ACCOMMODATE. REFER TO SECURITY RISER DIAGRAMS ON "LFUCG EXTERIOR STRUCTURES", SHEETS EY601 02 AND EY603 02 FOR ADDITIONAL INFORMATION.
6. RACK-MOUNTED POWER DISTRIBUTION UNIT, PDU, SHALL BE OWNER PROVIDED / CONTRACTOR INSTALLED.

1	WALL-MOUNTED TELECOMMUNICATIONS EQUIPMENT CABINET. REFER TO SHEET ET501 FOR ADDITIONAL INFORMATION.
2	BASE BID ONLY - PROVIDE CAT 6, 1"C FROM TELECOMMUNICATIONS EQUIPMENT CABINET TO ACCESS CONTROL PANEL (SM STORAGE E 105 - "LFUCG EXTERIOR STRUCTURES" - SHEET EY101 02).
3	BASE BID ONLY - PROVIDE FIVE (5) CAT 6 CABLES (CAMERAS) IN 1-1/2"C FROM TELECOMMUNICATIONS EQUIPMENT CABINET TO CAMERAS AT THE EXTERIOR STRUCTURES (COLUMN G8 - "LFUCG EXTERIOR STRUCTURES" - SHEET EY 101 02).
4	BASE BID ONLY - PROVIDE SIX (6) CAT 6 CABLES (CAMERAS) IN 1-1/2"C FROM TELECOMMUNICATIONS EQUIPMENT CABINET TO CAMERAS AT THE EXTERIOR STRUCTURES (COLUMN E18 - "LFUCG EXTERIOR STRUCTURES" - SHEET EY 101 02).
5	ACCESS CONTROL PANEL AND POWER SUPPLY. REFER TO SHEET EY601 FOR ADDITIONAL INFORMATION.
6	SINGLE DOOR WITH ELECTRIC STRIKE. PROVIDE CONDUIT/WIRING BACK TO POWER SUPPLY AND ACCESS CONTROL PANEL. REFER TO DETAIL 2, SHEET TY601.
7	OWNER FURNISHED/OWNER INSTALLED WALL-MOUNTED CAMERA (REFER TO DETAIL 2, SHEET EY501). PROVIDE CAT 6 CABLE, 1"C BACK TO TELECOMMUNICATIONS EQUIPMENT CABINET.
8	PROVIDE 1-1/2"CONDUIT W/ PULL STRING FROM THE VACTOR BUILDING TO THE EXTERIOR STRUCTURES (SHEET EY101 02) FOR BAS CABLING. CABLING BY THE CONTROLS CONTRACTOR.
9	PROVIDE PULLBOX FOR BAS CONDUIT.

1 PHYSICAL ACCESS CONTROL SYSTEM RISER DIAGRAM - VACTOR BUILDING

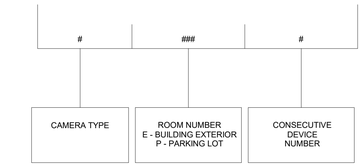
NOT TO SCALE

GENERAL NOTES:

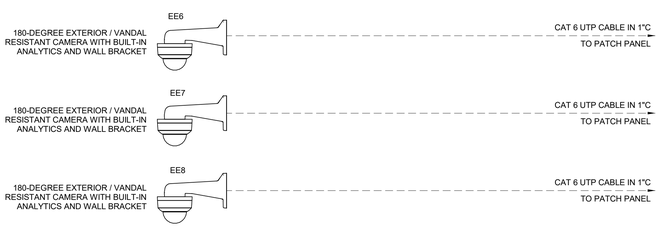
1. ACCESS CONTROL EQUIPMENT/DEVICES (ACCESS CONTROL PANELS, CARD READERS, BALANCED MAGNETIC SWITCHES, REX PUSHBUTTONS, REX MOTION SENSORS, AND ASSOCIATED POWER SUPPLIES) SHALL BE PROVIDED BY THE OWNER VIA A SEPARATE CONTRACT. CONTRACTOR SHALL BE RESPONSIBLE FOR INSTALLATION OF THE ACCESS CONTROL EQUIPMENT/DEVICES AND SHALL PROVIDE AND INSTALL ALL ASSOCAITED CONDUIT, BACKBOXES, CABLING, CABLING TERMINATIONS AND PATCH PANELS.
2. ACTUAL WIRING CONFIGURATION AND TYPE/SIZE OF CONDUCTORS SHALL BE AS RECOMMENDED BY THE ACS MANUFACTURER/SUPPLIER WITHIN MINIMUM REQUIREMENTS STATED IN SPECIFICATIONS. CONTRACTOR SHALL COORDINATE WITH THE ACCESS CONTROL SYSTEM MANUFACTURER/SUPPLIER FOR REQUIREMENTS.
3. ACS COMPONENTS SHOWN CONSTITUTE THE TYPE, PRODUCT QUALITY, MATERIAL AND DESIRED OPERATING FEATURES REQUIRED. CONTRACTOR SHALL COORDINATE WITH THE ACCESS CONTROL SYSTEM MANUFACTURER/SUPPLIER FOR ANY ADDITIONAL REQUIREMENTS.
4. REFER TO ARCHITECTURAL DRAWINGS AND SPECIFICATIONS FOR ADDITIONAL INFORMATION RELATING TO ELECTRIFIED DOOR HARDWARE. EXIT DEVICES, ELECTRIC LOCKS, LATCHBOLT/DOOR STATUS SWITCHES, POWER SUPPLIES, ETC. ARE FURNISHED AND INSTALLED BY THE DOOR HARDWARE CONTRACTOR. WIRING FROM ELECTRIFIED DOOR HARDWARE WILL BE INSTALLED COMPLETE TO JUNCTION BOX LOCATED ABOVE CEILING. CONTRACTOR SHALL PROVIDE ALL OTHER REQUIRED CONNECTIONS.
6. ACS MANUFACTURER/SUPPLIER SHALL INTEGRATE THE NEW ACS CONTROLLERS AND FIELD DEVICES INTO THE OWNER'S EXISTING SECURITY NETWORK AS REQUIRED FOR ALL MONITORING, CONTROLLING, PROGRAMMING AND SERVICE.
7. CATEGORY 6, UNSHIELDED TWISTED PAIR (UTP) WITH OVERALL PURPLE JACKET. TERMINATE ALL ENDS WITH A RJ45 MODULAR PLUG USING THE TIA/EIA 568B COLOR CODING STANDARD.
8. TERMINATE SECURITY HORIZONTAL CABLING AT A DEDICATED SECURITY NETWORK PATCH PANEL. REFER TO TELECOMMUNICATIONS RISER DIAGRAM - VACTOR BUILDING, SHEET ET501.

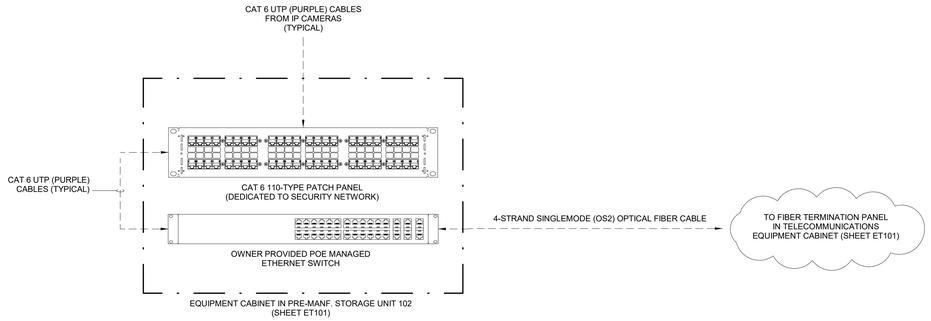
SHEET KEYNOTES:

1. REFER TO ELECTRICAL DRAWINGS FOR CIRCUIT INFORMATION.



VIDEO SURVEILLANCE SYSTEM ADDRESS DESIGNATONS





GENERAL NOTES:

1. ETHERNET SWITCH AND CAMERAS SHALL BE PROVIDED AND INSTALLED BY THE OWNER VIA A SEPARATE CONTRACT. CONTRACTOR SHALL PROVIDE AND INSTALL ALL ASSOCIATED CONDUIT, BACKBOXES, CABLING, CABLING TERMINATIONS AND PATCH PANELS.
2. ACTUAL WIRING CONFIGURATION AND TYPE/SIZE OF CABLING SHALL BE AS RECOMMENDED BY THE VASS MANUFACTURER/ SUPPLIER WITHIN MINIMUM REQUIREMENTS STATED IN SPECIFICATIONS. CONTRACTOR SHALL COORDINATE WITH THE VASS MANUFACTURER/SUPPLIER FOR REQUIREMENTS.
3. VASS MANUFACTURER/SUPPLIER SHALL INTEGRAGE THE NEW VASS CAMERAS INTO THE OWNER'S EXISTING SECURITY NETWORK AS REQUIRED FOR MONITORING, CONTROLLING, PROGRAMMING, AND SERVICE.
4. CATEGORY 6, UNSHIELDED TWISTED PAIR (UTP) WITH OVERALL PURPLE JACKET. TERMINATE ALL ENDS WITH A RJ45 MODULAR PLUG USING THE TIA/EIA 568B COLOR CODING STANDARD.
5. PROVIDE SURGE SUPPRESION FOR ALL EXTERIOR CABLING.
6. TERMINATE SECURITY HORIZONTAL CABLING AT A DEDICATED SECURITY NETWORK PATCH PANEL. REFER TO TELECOMMUNICATIONS RISER DIAGRAM - VACTOR BUILDING, SHEET ET501.
7. NOT SHOWN ON THIS RISER DIAGRAM; HOWEVER, CAMERAS FOR THE EXTERIOR STRUCTURES SHALL TERMINATE AT THE DEDICATED SECURITY NETWORK PATCH PANEL AT THIS FACILITY ("LFUCG VACTOR BUILDING"). REFER TO SERCURITY RISER DIAGRAM ON "LFUCG EXTERIOR STRUCTURES", SHEET EY602 02 FOR ADDITIONAL INFORMATION.

MAYOR LINDA GORTON

LEXINGTON

TODD SLATIN
DIRECTOR
CENTRAL PURCHASING

ADDENDUM #1

Bid Number: **#70-2025**

Date: September 16, 2025

Subject: **Division of Water Quality Facility Renovation**

Address inquiries to:
Brian Marcum
brianm@lexingtonky.gov
(859) 258-3325

TO ALL PROSPECTIVE SUBMITTERS:

Please be advised of the following clarifications to the above referenced Bid:

1. **The bid submittal deadline has been extended to September 25, 2025 at 2:00 PM EST.**
2. **Please see all the attached clarifications and attachments.**

Todd Slatin, Director
Division of Central Purchasing

All other terms and conditions of the Bid and specifications are unchanged.
This letter should be signed, attached to and become a part of your Bid.

COMPANY NAME: _____

ADDRESS: _____

SIGNATURE OF BIDDER: _____

DOCUMENT 009113 - ADDENDA

1.1 ADDENDUM

A. Addendum No. One.

1.2 PROJECT INFORMATION

A. Project Name: LFUCG DWQ Headquarters & Operations Facility

B. Owner: Lexington Fayette Urban County Government.

C. Owner Project Number: RFB #70-2025.

D. Architect: GRW Engineering Architecture Geospatial.

E. Architect Project Number: 5247-01.

F. Date of Addendum: September 12, 2025.

1.3 NOTICE TO BIDDERS

A. This Addendum is issued to all registered plan holders pursuant to the Instructions to Bidders and Conditions of the Contract. This Addendum serves to clarify, revise, and supersede information in the Project Manual, Drawings, and previously issued Addenda. Portions of the Addendum affecting the Contract Documents will be incorporated into the Contract by enumeration of the Addendum in the Owner/Contractor Agreement.

B. The Bidder shall acknowledge receipt of this Addendum in the appropriate space on the Bid Form.

C. The date for receipt of bids is changed to the following, at same time and location.

1. Bid Date: **September 25th, 2025.**

1.4 ATTACHMENTS

A. This Addendum includes the following attached Documents and Specification Sections:

1. Document: Bidding Questions and Responses, dated September 15, 2025, (new).
2. Document: Geotechnical Engineering Exploration Report dated August 20, 2025, (new).
3. Document: Phase I ESA Report dated November 27, 2023, (new).
4. Document: Roof Investigation Report dated May 15, 2025, (new).
5. Document: Pre-Bid Sign in Sheet dated August 26, 2025, (new).
6. Document: Asbestos Bulk Sampling Report dated October 30, 2024, (new).
7. Document: Site Visit Sign in Sheet dated August 28 and September 4, 2025, (new).

8. Specification Section 005100 Notice of Award dated August 15, 2025, (reissued).
9. Specification Section 011000 Summary dated August 15, 2025, (reissued).
10. Specification Section 093013 Ceramic Tiling dated August 15, 2025, (reissued).

B. This Addendum includes the following attached sheets:

1. Civil Sheet C100, dated September 12, 2025 (reissued).
2. Landscape Sheet L200, dated September 12, 2025 (reissued).
3. Landscape Sheet L301, dated September 12, 2025 (reissued).
4. Landscape Sheet LK200, dated September 12, 2025 (reissued).
5. Landscape Sheet LK300, dated September 12, 2025 (reissued).
6. Landscape Sheet LK400, dated September 12, 2025 (reissued).
7. Landscape Sheet LK401, dated September 12, 2025 (reissued).
8. Architectural Sheet AD201, dated September 12, 2025, (reissued).
9. Architectural Sheet AE201, dated September 12, 2025, (reissued).
10. Architectural Sheet AE403, dated September 12, 2025, (reissued).
11. Architectural Sheet AE409, dated September 12, 2025, (reissued).
12. Architectural Sheet AE410, dated September 12, 2025, (reissued).
13. Architectural Sheet AE412, dated September 12, 2025, (reissued).
14. Architectural Sheet AE414, dated September 12, 2025, (reissued).
15. Architectural Sheet AE415, dated September 12, 2025, (reissued).
16. Architectural Sheet AE601, dated September 12, 2025, (reissued).
17. Architectural Sheet AE602, dated September 12, 2025, (reissued).
18. Architectural Sheet GJ404, dated September 12, 2025, (reissued).
19. Electrical Sheet ES102 01, dated September 12, 2025, (reissued).
20. Electrical Sheet ES103 01, dated September 12, 2025, (reissued).
21. Electrical Sheet ES401 01, dated September 12, 2025, (reissued).
22. Electrical Sheet EL401 01, dated September 12, 2025, (reissued).
23. Electrical Sheet EL402 01, dated September 12, 2025, (reissued).
24. Electrical Sheet EL403 01, dated September 12, 2025, (reissued).
25. Electrical Sheet EL502 01, dated September 12, 2025, (reissued).
26. Electrical Sheet EP403 01, dated September 12, 2025, (reissued).
27. Electrical Sheet ET403 01, dated September 12, 2025, (reissued).
28. Electrical Sheet EP101 02, dated September 12, 2025, (reissued).
29. Electrical Sheet EP102 02, dated September 12, 2025, (reissued).

C. This Addendum includes the attached Addendum Drawings:

1. Civil Addendum Drawing C100, dated September 12, 2025, revising Sheet C100.

2. Landscape Addendum Drawing L200, dated September 12, 2025, revising Sheet L200.

3. Landscape Addendum Drawing L301, dated September 12, 2025, revising Sheet L301

4. Landscape Addendum Drawing LK200, dated September 12, 2025, revising Sheet LK200

5. Landscape Addendum Drawing LK300, dated September 12, 2025, revising Shet LK300.

6. Landscape Addendum Drawing LK400, dated September 12, 2025, revising Sheet LK400.

7. Landscape Addendum Drawing LK401, dated September 12, 2025, revising Sheet LK401.
8. Architectural Addendum Drawing: AD201 01 X1, dated September 12, 2025, revising Sheet AD201 01.
9. Architectural Addendum Drawing: AE201 01 X1, dated September 12, 2025, revising Sheet AE201 01.
10. Architectural Addendum Drawing: AE403 01 X1, dated September 12, 2025, revising Sheet AE403 01
11. Architectural Addendum Drawing: AE409 01 X1, dated September 12, 2025, revising Sheet AE409 01
12. Architectural Addendum Drawing: AE410 01 X1, dated September 12, 2025, revising Sheet AE410 01
13. Architectural Addendum Drawing: AE412 01 X1, dated September 12, 2025, revising Sheet AE412 01
14. Architectural Addendum Drawing: AE414 01 X1, dated September 12, 2025, revising Sheet AE414 01
15. Architectural Addendum Drawing: AE415 01 X1, dated September 12, 2025, revising Sheet AE415 01
16. Architectural Addendum Drawing: AE601 01 X1, dated September 12, 2025, revising Sheet AE601 01
17. Architectural Addendum Drawing: AE602 01 X1, dated September 12, 2025, revising Sheet AE602 01
18. Architectural Addendum Drawing: GJ404 01 X1, dated September 12, 2025, revising Sheet GJ404 01
19. Electrical Addendum Drawing: ES102 01 X1, dated September 12, 2025, revising Sheet ES102 01.
20. Electrical Addendum Drawing: ES103 01 X1, dated September 12, 2025, revising Sheet ES103 01.
21. Electrical Addendum Drawing: ES401 01 X1, dated September 12, 2025, revising Sheet ES401 01.
22. Electrical Addendum Drawing: EL401 01 X1, dated September 12, 2025, revising Sheet EL401 01.
23. Electrical Addendum Drawing: EL402 01 X1, dated September 12, 2025, revising Sheet EL402 01.
24. Electrical Addendum Drawing: EL403 01 X1, dated September 12, 2025, revising Sheet EL403 01.
25. Electrical Addendum Drawing: EL502 01 X1, dated September 12, 2025, revising Sheet EL502 01.
26. Electrical Addendum Drawing: EP403 01 X1, dated September 12, 2025, revising Sheet EP403 01.
27. Electrical Addendum Drawing: ET403 01 X1, dated September 12, 2025, revising Sheet ET403 01.
28. Electrical Addendum Drawing: EP101 02 X1, dated September 12, 2025, revising Sheet EP101 02.
29. Electrical Addendum Drawing: EP102 02 01 X1, dated September 12, 2025, revising Sheet EP102 02.

1.5 REVISIONS TO DIVISION 00 PROCUREMENT REQUIREMENTS AND CONTRACTING REQUIREMENTS

A. Document 005100 Notice of Award, (reissued).

1. Paragraph 1.1F: Owner project number revised.

B. Document 009113 Addenda, (reissued).

1. Paragraph 1.2C: Owner project number revised.

1.6 REVISIONS TO DIVISION 01 GENERAL REQUIREMENTS

A. Specification Section 011000 Summary, (reissued).

1. Paragraph 1.8 A 5 and 6: Coordination with occupants added.

1.7 REVISIONS TO DIVISIONS 02 - 49 SPECIFICATION SECTIONS

A. Specification Section 093013 Ceramic Tiling, (reissued).

1. Paragraph 2.3 and 3.9: Ceramic tile location clarified.

1.8 REVISIONS TO DRAWING SHEETS

A. Sheet C100 BASE BID SITE CIVIL UTILITIES PLAN (reissued).
1. Added Keynote 11, indicating ¾" water service line into new Vactor building.

B. Sheet L200 BASE BID SITE DEMOLITION PLAN (reissued).

1. Revised area of pavement demolition to allow additional room to adjust grades at pavement west / northwest of Base Bid Vactor Building location.

2. Added note regarding fence demolition / replacement at south edge / adjoining residential properties. Fence adjacent to residential properties must be removed and replaced the same day, no sections shall be left open overnight.

3. Removed Keynote 5 indicating fence removal around existing dumpster, there is no existing fence to be removed at this location.

4. Remove existing honeysuckle growth at south yard area, up to existing fence. Remove prior to removing / replacing fence (remove along fenceline as part of fence removal and replacement same day).

C. Sheet L301 STORM PIPE PROFILES (reissued)
   1. Added profile for Additive Alternate #1 pipe outlet from new underground detention (Pipe 5).

D. Sheet L500 SITE LANDSCAPE PLAN (not reissued)
   1. Delete Keynote 2 (honeysuckle to be removed per Addendum) and add 5 additional Picea Abies (PA) trees, for a total of 13 at this location.

E. Sheet LK200 ADDITIVE ALTERNATE #1 SITE DEMOLITION PLAN (reissued).

   1. Revised area of pavement demolition to accommodate add-alternate underground stone / detention

   2. Additional pavement demolition at new flume for new downspouts location per add-alternate, as indicated on Drawing.
   3. Remove existing honeysuckle growth at south yard area, up to existing fence. Remove prior to removing / replacing fence (remove along fenceline as part of fence removal and replacement same day).

F. Sheet LK300 ADDITIVE ALTERNATE #1 SITE GRADING & DRAINAGE PLAN (reissued).

   1. Add area of underground stone / detention per add-alternate underground stone / detention

   2. Additional grade information and new flume detail for new downspouts location per add-alternate, as indicated on Drawing.

   3. Corrected storm information to match Base Bid Sheet L300.

   4. Added Details A and B for flume (A) and pipe outlet at new flume (B).

G. Sheet LK400 ADDITIVE ALTERNATE #1 SITE LAYOUT PLAN (reissued).

   1. Revised dimensions at curb island and new flume per add-alternate downspouts.

H. Sheet LK401 ADDITIVE ALTERNATE #1 SITE MATERIALS PLAN (reissued).

   1. Revised Detail A to include permeable pavers and underground stone / detention area details per add-alternate condition.

   2. Reference to new concrete flume per add-alternate downspout condition.

I. Sheet AD201 01 - EXTERIOR ELEVATION - DEMOLITION (reissued).

   1. Drawing AD201 01: Revised downspouts in coordination with add-alternate one storm water drainage requirements.

J. Sheet AE201 01 - EXTERIOR ELEVATION (reissued).

   1. Drawing AE201 01: Revised downspouts in coordination with add-alternate one storm water drainage requirements.

K. Sheet AE403 01 – FIRST LEVEL – AREA C (reissued).

1. Drawing AE403 01: Removed interior furnishings (OFOI)

L. Sheet AE409 01 – ENLARGED PLAN AND ELEVATIONS (reissued).

1. Drawing AE409 01: Revised signage at west elevation lobby detail 4/AE409

M. Sheet AE410 01 – ENLARGED PLAN AND ELEVATIONS (reissued).

1. Drawing AE410 01: Removed solid surface countertop over existing flat files (OFOI)

N. Sheet AE412 01 – ENLARGED PLAN AND ELEVATIONS (reissued).

1. Drawing AE412 01: relocated wall mounted television in Cane Run Conference Room 223.

O. Sheet AE414 01 – ENLARGED PLAN AND ELEVATIONS (reissued).

1. Drawing AE414 01: Revised wall mounted casework over microwaves and refrigerators from a depth of 12 inches to a depth of 24" See detail 11/AE414.

P. Sheet AE415 01 – ENLARGED PLAN AND ELEVATIONS (reissued).

1. Drawing AE415 01: Revised signage on east elevation of lobby. See detail 5/AE415.

Q. Sheet AE601 01 – SCHEDULE – NEW ROOM FINISH (reissued).

1. Drawing AE601 01: Updated schedule in coordination with ceramic tile installation schedule in ceramic tiling specification section 093013

R. Sheet AE602 01 – SCHEDULE – NEW ROOM FINISH (reissued).

1. Drawing AE602 01: Updated schedule in coordination with ceramic tile installation schedule in ceramic tiling specification section 093013

S. Sheet GJ404 01 – PROGRAM VALIDATION PLAN – AREA D (reissued).

1. Drawing GJ404 01: Revised pallet rack shelving spacing at keynote 13 location only.

T. Sheet E-602 01 - ELECTRICAL ONE-LINE DIAGRAM II – EXISTING: (not reissued)

1. Existing Panelboard AL1 electrical feeder shall be removed and disposed of completely. Refer to Sheet E-606 01 – Electrical One-Line Diagram III – New Work for new electrical feeder back to new Distribution Panelboard, DP.'

U. Sheet E-603 01 - ELECTRICAL ONE-LINE DIAGRAM III – EXISTING: (not reissued)

1. Existing 30A/3P breaker serving existing RTU-4 shall remain. Reuse breaker for new Roof Top Unit, RTU-10 (refer to Sheet E-605 01).

V. Sheet E-604 01 -ELECTRICAL ONE-LINE DIAGRAM I – NEW WORK: (not reissued)

1. Keynote #2 shall be modified to read "PROVIDE NEW ELECTRICAL FEEDER TO THE NEW DISTRIBUTION PANELBOARD, DP."

W. Sheet ED402 01 – FIRST LEVEL – ELECTRICAL DEMOLITION – AREA B: (not reissued)

1. Keynote #35 shall be modified to read "EXISTING FIRE ALARM AUDIO/VISUAL DEVICE TO BE RELOCATED. REFER TO SHEET EY402 FOR NEW LOCATION."

X. Sheet ED403 01 – FIRST LEVEL – ELECTRICAL DEMOLITON – AREA C: (not reissued)

1. Keynote #16 shall be modified to read "EXISTING FIRE ALARM AUDIO/VISUAL DEVICE TO BE RELOCATED. REFER TO SHEET EY403 FOR NEW LOCATION."

Y. Refer to Sheet ED404 01 – First Level – Electrical Demolition – Area D: (not reissued)

1. Keynote #24 shall be modified to read "EXISTING FIRE ALARM MANUAL PULL STATION TO BE RELOCATED. REFER TO SHEET EY404 FOR NEW LOCATION."

Z. Refer to Sheet ES102 01 –SITE PLAN – ELECTRICAL NEW WORK: (reissued)

1. Two (2) 4" conduits with pullstring added between the LFUCG DWQ Headquarters & Operations Facility and the LFUCG Exterior Structures. Refer to reissued sheet for additional information.
2. Keynote #23 shall be modified to read "POLE-MOUNTED SECURITY CAMERA(S) AND NEMA 4X SURVEILLANCE CABINET (CAMERA AND CAMERA MOUNT PROVIDED BY OWNER AS PART OF A SEPARATE CONTRACT). CONTRACTOR SHALL PROVIDE AND INSTALL NEMA 4X SURVEILLANCE CABINET INCLUDING MEDIA CONVERTER SWITCH, POE INJECTOR, AND 12VDC POWER SUPPLY. REFER TO DETAIL 1, SHEET EY502 01 FOR ADDITIONAL INFORMATION."
3. Within the call out for Detail 3, Sheet ES401, Pedestrian Gate shown shall be referenced as Pedestrian Gate No. 1.
4. General Notes have been modified to reflect full sheet numbers (added building numbers).
5. Keynote #28 shall be modified to read "SLIDE GATE NO. 1 CARD READERS (ACCESS CONTROL) – TWO (2) 6C#18 SHIELDED CABLE, 1-1/4"C. CONNECTED TO ASSOCIATED ACCESS CONTROL PANEL (IDF 287 – "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET EY401 01."
6. Keynote #30 shall be modified to read "SLIDE GATE NO. 1 OPERATOR CONTROL (REMOTE/ACCESS CONTROL) – 2#12, 1#12 GND, 1"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (IDF 287 – "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET EY401 01)."
7. Keynotes #32, 39, 41, 44 through 45 have been modified to reflect full sheet numbers (added building numbers).

AA. Refer to Sheet ES103 01 – ADD ALTERNATE #1 – SITE PLAN – ELECTRICAL NEW WORK: (reissued)

1. Two (2) 4" conduits with pullstring added between the LFUCG DWQ Headquarters & Operations Facility and the LFUCG Exterior Structures. Refer to reissued sheet for additional information.
2. Keynote #11 shall be modified to read "POLE-MOUNTED SECURITY CAMERA(S) AND NEMA 4X SURVEILLANCE CABINET (CAMERA AND CAMERA MOUNT PROVIDED BY OWNER AS PART OF A SEPARATE CONTRACT). CONTRACTOR SHALL PROVIDE AND INSTALL NEMA 4X SURVEILLANCE CABINET INCLUDING MEDIA CONVERTER SWITCH, POE INJECTOR, AND 12VDC POWER SUPPLY. REFER TO DETAIL 1, SHEET EY502 01 FOR ADDITIONAL INFORMATION."
3. Within the call out for Detail 3, Sheet ES401, Pedestrian Gate shown shall be referenced as Pedestrian Gate No. 1.
4. Keynote #28 has been moved to be more legible.
5. Add Alternate #1 Notes and General Notes have been modified to reflect full sheet numbers (added building numbers).
6. Keynote #30 shall be modified to read "PROVIDE TWO (2) 36" X 36" CONCRETE HANDHOLES FOR POWER AND OPTICAL FIBER CONDUIT. LOCATE OUTSIDE VEHICULAR TRAFFIC. REFER TO DETAIL 7, SHEET E-501 01 FOR ADDITIONAL INFORMATION."

BB. Refer to Sheet ES401 01 – SITE PLAN – ENLARGED ELECTRIAL NEW WORK: (reissued)

1. Detail 3, Enlarged Site Plan – Slide Gate No. 3 – Pedestrian Gate shown shall be referenced as Pedestrian Gate No. 1.
2. Keynote #11 shall be modified to read "DUAL HEIGHT CARD READER/INTERCOM PEDESTAL WITH PROTECTION BOLLARD. COORDINATE SETBACK (18'-6") FROM GATE WITH LFUCG PRIOR TO ROUGH-IN. REFER TO DETAIL 1, SHEET EY503 FOR ADDITIONAL INFORMATION."
3. Equipment/devices have been moved to reflect new gate locations – typical for each.

CC. Refer to Sheet EL401 01 – FIRST LEVEL – LIGHTING PLAN – AREA A: (reissued)

1. Provide 4-zones of lighting for the North and South Elkhorn Training Rooms 150 and 151 in lieu of 3-zones.
2. Keynote #10 shall be modified to read "JUNCTION BOXES FOR OL7 LUMINAIRES SHALL BE LOCATED BEHIND PARAPET WALL ON ROOF."
3. Keynote #11 shall be modified to read "MOUNT OL7 LUMINAIRES 2' ABOVE TOP OF BUILDING SIGNAGE. COORDINATE WITH ARCHITECTURAL DRAWINGS."

DD. Refer to Sheet EL402 01 – FIRST LEVEL – LIGHTING PLAN – AREA B: (reissued)

1. Luminaires within Vestibule 153 shall be switched/controlled with the luminaires located in the perimeter/walkways of the adjacent Open Office Area 154.
2. Provide standalone lighting controls for Administration Principal AD08 206.

EE. Refer to Sheet EL403 01 – FIRST LEVEL – LIGHTING PLAN – AREA C: (reissued)

1. Provide an additional two-channel wallpod with on/off + raise/lower control. Locate in Open Office Area 154 (outside Corridor – PS 214).

FF. Refer to Sheet EL404 01 – FIRST LEVEL – LIGHTING PLAN – AREA D: (not reissued)

1. Keynote tag #7 is incorrectly located in Mens Locker 238. Keynote tag #7 shall be located adjacent to Keynote tag #6.

GG. Refer to Sheet EL502 01 – LIGHTING CONTROL DETAILS II: (reissued)

1. Modify Detail LC-11 Training Room – Occupancy and Dimming to reflect additional lighting zone.
2. Modify Detail LC-13 Multi-Entry / Multi-Zone Open Office – Occupancy and Dimming to reflect additional two-channel wallpod with on/off + raise/lower control.

HH. Refer to Sheet EC401 01 – FIRST LEVEL – LIGHTING CONTROL PLAN – AREA A: (not reissued)

1. Provide 4-zones of lighting for North and South Elkhorn Training Room 150 and 151 in lieu of 3-zones. Refer to the modifications made to EL401 issued as part of this addendum for additional information.

II. Refer to Sheet EC402 01 – FIRST LEVEL – LIGHTING CONTROL PLAN – AREA B: (not reissued)

1. Provide standalone lighting controls for Administration Principal AD08 207. Utilize Lighting Control, LC-05. Refer to the modifications made to EL402 01 issued as part of this addendum for additional information.

JJ. Refer to Sheet EC403 01 – FIRST LEVEL – LIGHTING CONTROL PLAN – AREA C: (not reissued)

1. Provide an additional two-channel wallpod with on/off + raise/lower control. Locate in Open Office Area 154 (outside Corridor PS214). Refer to the modifications made to EL403 01 issued as part of this addendum for additional information.

KK. Refer to Sheet EC404 01 – FIRST LEVEL – LIGHTING CONTROL PLAN – AREA D: (not reissued)

1. Switch located in Warehouse 246 leading into Locker Room Vestibule 237 shall be tagged with “4L” annotation.

LL. Refer to Sheet EP401 01 – FIRST LEVEL – POWER PLAN – AREA A: (not reissued)

1. Tap On Desk 152 – receptacle at copier shall be tagged with Keynote #8 tag.
2. Keynote #27 shall be modified to read “CONTRACTOR SHALL PROVIDE AN ALUMINUM TELE-POWER POLE. PROVIDE RECEPTACLE MOUNTED AT 46” AFF. TELE-POWER POLE SHALL INCLUDE MOUNTING HARDWARE, ENTRANCE END CAPS, AND CEILING TRIM PLATES (EQUIVALENT TO WIREMOLD AMTC-4). REFER TO SHEET ET401 FOR TELECOMMUNICATION OUTLET REQUIREMENTS.”

MM. Refer to Sheet EP403 01 – FIRST LEVEL – POWER PLAN – AREA C: (reissued)

1. Modified receptacle locations in Cane Run Conf Room 223. Modification includes new location for TV.

NN. Refer to Sheet ET401 01 – FIRST LEVEL – TELECOMMUNICATIONS PLAN – AREA A: (not reissued)

1. As shown on EP401, Cubical Spaces 278 – 285 shall be provided with tele-power poles for power and telecommunications cabling. Refer to Keynote #15 on Sheet EP401 01 for information on tele-power pole.

OO. Refer to Sheet ET403 01 – FIRST LEVEL – TELECOMMUNICATIONS PLAN – AREA C: (reissued)

1. Modified telecommunication outlet locations in Cane Run Conf Room 223. Modification includes new location for TV.

PP. Refer to Sheet EY401 01 – FIRST LEVEL – FIRE ALARM AND SECURITY PLAN – AREA A: (not reissued)

1. Keynote #4 shall be modified to read "ACCESS CONTROL PANEL AND POWER SUPPLY. REFER TO ACCESS CONTROL SYSTEM RISER DIAGRAM ON SHEET EY602 AND EY603 FOR ADDITIONAL INFORMATION."

QQ. Refer to Sheet EY402 01 – FIRST LEVEL – FIRE ALARM AND SECURITY PLAN – AREA B: (not reissued)

1. Keynote #2 shall be modified to read "ACCESS CONTROL PANEL AND POWER SUPPLY. REFER TO ACCESS CONTROL SYSTEM RISER DIAGRAM ON SHEET EY604 FOR ADDITIONAL INFORMATION."
2. Common Work Area 116 – Duct smoke detector (DS-116-1) missing Keynote tag #6.

RR. Refer to Sheet EY403 01 – FIRST LEVEL – FIRE ALARM AND SECURITY PLAN – AREA C: (not reissued)

1. Keynote tag #5 is incorrectly located in Files – AD34 180. Keynote tag #5 shall be located adjacent to Fire Alarm Visual Device (A-222-1) located in Office 202.

SS. Refer to Sheet EY404 01 – FIRST LEVEL – FIRE ALARM AND SECURITY PLAN – AREA D: (not reissued)

1. Keynote tag #8 is incorrectly located in Multi-Purpose Training / Break Room 290. Keynote tag #8 shall be located adjacent to Fire Alarm Addressable Control Module (HVLS-1) in Warehouse 246.

TT. Refer to Sheet EY501 01 – SECURITY DETAILS I: (not reissued)

1. Add door 237A to list of applicable doors for Detail 1 – Typical Single Door with Electrical Strike Detail.
2. Modify View Title for Detail 4 – revise name to "TYPICAL SINGLE DOOR WITH LOCAL ALARM DETAIL".

UU. Refer to Sheet EP101 02 – FIRST LEVEL – POWER PLAN: (reissued)

1. Add two (2) 4" conduits with pullstring between LFUCG Exterior Structures.

VV. Refer to Sheet EP102 02 – ADD ALTERNATE #1 - FIRST LEVEL – POWER PLAN: (reissued)

1. Add two (2) 4" conduits with pullstring between LFCUG Exterior Structures.
2. Add one (1) 4" conduit with pullstring to the LFCUG Canopy Structure.

WW. Refer to Sheet PD402 01 – FIRST LEVEL - DEMOLITION - AREA B - PLUMBING PLAN: (not reissued)

1. Refer to Office-11QQ55 - Rework existing floor cleanout and associated piping to be flush with new finish floor. New floor finish is carpet tile.

XX. Refer to Sheet P-402 01 – FIRST LEVEL - AREA B - DOMESTIC WATER PLAN: (not reissued)

1. Refer to ENG SECT MANAGER-01 03 137 - Provide new floor cleanout and associated piping to be flush with finish floor. New floor finish is carpet tile.

YY. Refer to Sheet P-404 01 – FIRST LEVEL - AREA D - DOMESTIC WATER PLAN: (not reissued)

1. Refer to Mop Sink-02 09 298 in Warehouse. Faucet on Plan North shall be labelled as JS-3 in lieu of JS-2.

ZZ. Refer to Sheet P-601 01 – PLUMBING SCHEDULES: (not reissued)

Add the following fixture to the Plumbing Fixture Schedule: JS-3, SERVICE SINK FAUCET, T&S BRASS, MODEL NO. B-0133-ADF12-B.

END OF DOCUMENT 009113

1. Please find attached a copy of the Geotechnical Engineering Exploration Report prepared by LE Gregg Associates on August 20th, 2025, for your reference and per specification section 003119 1.1 D.

2. Please find attached a copy of the Phase I ESA Report prepared by Shield Environmental Associates, Inc. on November 27, 2023, for your reference and per specification section 003119 1.1 C.

3. Please find attached a copy of the roof investigation report prepared by GRW Engineering Architecture Geospatial on May 15, 2025, for your reference.

4. Please find attached the Pre-Bid Sign in Sheet conducted on August 26, 2025, at 134 West New Circle Road, Lexington KY.

5. What is the anticipated start date on this project?

    a. LFUCG's process to award projects of this size and scale would typically follow this timeline: Upon bid closing all bids received are reviewed for completeness and to assure they are compliant with submission criteria. Next the Low Bid is reviewed internally by the LFUCG Project Manager and externally by the Design Team. Upon acceptance by both parties the LFUCG Buyer send the low bidder a contract for signature and requests any required Bond and COI documents. This process can take 2-4 weeks. Upon receipt of a signed contract and all required documentation this project is submitted to Council for approval, typically 1-3 weeks. Upon approval the contractor is issued a Notice to Proceed. In summary, the time from bid opening to Notice to Proceed is typically 4-8 weeks.

6. Does the city already have a Tridium Supervisor that would pull in the BSC(s) on this job? Or is it the customers intent to have an additional supervisor for this job with all the licensing needed?

    a. LFUCG does have Triduim Supervisor license and maintains our own server. No supervisor license will be needed to be provided under the scope of this project. The controls contractor would be responsible for working with LFUCG controls staff to establish the initial data links to LFUCG's existing Tridium Supervisor for all new equipment and associated points installed under this project.

7. Is the TCC to provide 4, eight hour training sessions per quarter or just one per quarter totaling 4. Clarify 3.8 a.

    a. The Owner has stated that they only would like to receive one training session on the Temperature Controls System which should be 8 hours in length.

8. MBI (Munson Business Interiors) would like to propose a substitution to specification section 125000 – Interior Furnishings. We would like to propose Allsteel Office System "Terrace" as an approved manufacturer.

    a. Upon review of the proposed manufacturer substitution request Allsteel Office Systems "Terrace" is an acceptable alternate per specification section 125000 2.1 A.

    b. Architects' approval of substitute during bidding does not relieve Contractor of the responsibility to submit required Shop Drawings and to comply with all other requirements of the Contract Documents per specification section 002600 1.4 C.

    c. Provide equal workstation panels per specification section 125000 Technical Product Specification Answer Panel.

    d. Provide equal power and data in workstations panels per section 125000 technical product specifications Answer Panel C.5 Coordinate with electrical and data requirements per construction documents.

    e. Provide equal workstation worksurfaces per specification section 125000 Technical Product Specification Universal Tables and Universal Systems Worksurfaces.

    f. Finishes shall be selected during the shop drawing review process from manufacturer full range of color options.

    g. Action submittals shall be submitted per specification section 125000 1.5. Include product data, shop drawings including plans, elevations, power and data locations, samples for initial selection and samples for verification.

    h. Typical workstation dimensions are indicated on sheet AE410 01.

9. Please review a manufacturer substitution request for specification section 096813 SW Resuflor Screed Deco Quartz II Resinous Flooring as manufactured by Sherwin Willians to be approved for use as an equal to Stoneblend GSI as manufactured by Stonhard, Inc. Product data was emailed to the Architect for review.

    a. Upon review of the proposed substitution request please provide Stonehard, Inc Stoneblend GSI per specification section 096813 Resinous Flooring. The proposed manufacturer substitution does not meet the design intent of specification section 096813.

10. Please consider removing AWI's Quality Certification Program requirements from specification section 064116 1.7 A1 and B.

a. The intent of the AWI's Quality Certification Program requirements as specified in section 064116 1.6 and 1.7. is to establish a minimum level of expectation in quality and craftsmanship in the plastic laminate clad architectural cabinets in addition to the level of quality as defined in specification section 064116. Please provide manufacturers and installers who meet the requirements of specification section 064116 1.6 and 1.7.

11. Is Ebtron an acceptable manufacturer for the RTU airflow measuring stations?

    a. Yes, Ebtron will be allowed for the measuring stations.

    b. Architects' approval of substitute during bidding does not relieve Contractor of the responsibility to submit required Shop Drawings and to comply with all other requirements of the Contract Documents per specification section 002600 1.4 C.

12. The Finish Schedule on AE602 01 only lists ceramic or porcelain tile but doesn't list which of the 4 possibilities that is in the spec book. I need clarification of what tile goes where. Also, in the spec book it is written that CT-3 is to be used in the shower pan, but that is a 24"24" tile. Will need to be re-selected to a smaller faced tile.

    a. Room finishes schedule and specification section 093013 Ceramic Tiling has been revised to coordinate ceramic tile specified and installation location.

13. Please indicate per the attached marked-up snip that these are new bollards in the Alternate 1.

    a. The bollards at the New Vactor Building in add-alternate #1 are new bollards. Bollards at the Vactor Building in the Base Bid shall be removed from add alternate #1. Bollards at overhead door openings both on the inside and outside of the Vactor Building shall be in the base bid. See Architectural floor plan for requirements.

14. Are the Masonry Corner Block required at the split faced veneer at the Vactor Building or can we miter those corners?

    a. Masonry corner blocks are required at the split faced veneer of the Vactor Building. Mitered corners are not permitted. The cast stone water table shall also have a cast returned end. Mitered corners of the cast stone water table are not permitted.

15. Are the doors at the Pre-Manufactured Storage Units by the Owner? They are called out in the door schedules like they are CFCI.

    a. The doors at the Pre-Manufactured Storage Units are by the owner. The door schedule shall be clarified.

16. The new grades on C100 near the Vactor Building in the base bid will require the existing parking lot asphalt to be removed and the subgrade cut down beyond the indicated demo on sheet L200. Please clarify. See Grades from 970 to 974. There is a note 23 on sheet L401 addressing this but the grade change is as much as a foot raised on the “west” side.

    a. Refer to L300 Site Grading & Drainage Plan for Base Bid grades (not C100). The majority of the area indicated is fill / additional overlay up to 6" over existing asphalt pavement. A revised sheet L200 has been reissued with this addendum to indicate an additional area of pavement removal west of the Base Bid Vactor building location to allow for finish grades indicated.

17. In 251 Kitchen/Break Room (3/AE415) it only shows 2 new cabinets, and the rest already exist. Is this correct?

    a. Correct. Keynote 3 indicates existing plastic laminate cabinets. Keynote 4 indicates new plastic laminate cabinets to match the finish of the existing cabinets.

18. For tall cabinets with 4 doors (6/AE412, 9/AE414) are the doors a style and rail or can they be flush panel like the rest of the cabinets?

    a. The tall cabinets with 4 doors can be flush panels to match the rest of the cabinets. The construction shall be Face Frame with Reveal Overlay per specification section 064116 2.1

19. 1.7C What mockup cabinets are needed?

    a. One standard base cabinet can be used to satisfy the mockup requirements of specification section 064116 1.7 C. The intent is to define quality standard for aesthetic effects, craftsmanship, materials, and execution. Approved mock-up may be incorporated into final work.

20. Is this a QCP project or do you just want casework fabricators to be AWI Quality Certified?

    a. We just need the fabricators to be AWI Quality Certified. The intent is to define a level of minimum quality standards.

21. 2.3B calls for 170-degree hinges. Will 120 degrees be acceptable?

    a. Yes, 120-degree hinges are an acceptable alternate to the 170-degree hinges specified.

22. 2.1F.2 calls for laminate edging, will 1mm pvc edging be accepted? 2.1G a+b call for pvc edging. This is standard and protects better from dings

    a. At exposed surfaces. Provide laminate edging as specified.
    b. At Semi-exposed surfaces, Shelving, PVC is acceptable as specified

LFUCG DWQ HOB – ROOF INVESTIGATION

GRW Project No. 5247-01

Phase: Construction Documents
Date: 5/15/2025
Location: 134 W New Circle Rd
Lexington, KY 40505

SUMMARY

1) Investigation

Existing and Record Drawings provided little information on the existing warehouse roof assembly. Identifying the construction of the roof assembly and the roof framing members was required to determine the structural capacity of the roof. Understanding the structural capacity of the existing roof system informed if ballasted solar panels could be installed on the warehouse roof.

A joist analysis was performed using the approximated dead loads of the existing roof assembly and proposed alternatives. The addition of solar panels is analyzed for each loading condition. The load conditions are summarized in Table 2. *Analysis of an 18S6 Joist*.

From the investigation and analysis, GRW does not recommend placing solar panels on the existing roof system of the warehouse. While removing some of the existing roof assembly in lieu of the entire assembly may reduce the total weight of the roof, the addition of solar panels on the existing roof slab exceeds the maximum allowable loading to the existing joists and is not recommended for solar-ready capabilities. Replacing the existing perlite-concrete slab and substrates with metal deck construction will reduce the applied roof load, allow for solar-ready capabilities and increase structural capacity between the span of the joists.

2) Findings

On Monday, February 24th, measurements collected by GRW of the existing bar joists indicated the joists are most likely 18S6 (per Steel Joist Institute). Information on the roof assembly was still needed to determine the applied roof load and the roof framing's structural capacity.

On Thursday, May 15th, the Owner, Design Team and Tri-State Roofing accessed the roof and samples of the roof assembly were collected by cutting pieces off adjacent to an infilled mechanical opening.

Dead loads of each material in the roof assembly were extracted from ASCE7-1 Table C3-1 *Minimum Design Dead Loads* and Table C3-2 *Minimum Densities for Design Loads from Materials*. Table C3-2 provides a range for vermiculite and perlite aggregate from 25 to 50 lb/ft3. A density of 50lb/ft3 was selected to calculate the weight of the perlite layer and account for the welded wire mesh. The total weight of the roof assembly is estimated at approximately 15.45 lb/ft2. The roof assembly and its associated material weights can be outlined as follows:

Table 1. Existing Roof Assembly Materials and Weights

	Substrate Type	Thickness	Weight
Exterior Face	EDPM Roof Membrane	-	0.7 psf
	Asphalt Sheeting	-	2.0 psf
	Ballast Substrate	1”	5.5 psf
	Gypsum or Perlite – Concrete Slab with Welded-Wire Mesh	Avg. 1 ½ ”	6.25 psf
Interior Face	Wood Fiber Substrate	1 ½”	1.0 psf

3) Structural Analysis

According to the Steel Joist Institute, the existing joists are most likely 18S6 – a joist type that was manufactured in the late 1950’s. This joist type may not represent every existing joist in the warehouse; there may be more joist types existing than measured. S-series joists are not standard to today’s industry and are not included in most recent joist catalogs or analysis programs. Historical Load tables for S-series joists were provided by the Steel Joist Institute.

The structural analysis considers the addition of solar panels at 5psf. The roof assembly weight, self-weight of the joist, collateral weight of MEP systems, solar panel weight and the minimum roof live load were used to determine the maximum end reactions and deflections for each load combination. The analysis compared the applied roof load, the load to an individual joist, and the end reactions of the existing roof assembly, the existing slab and proposed roof assembly of insulation and SBS membrane, and the replacement of the slab with metal deck.

A maximum joist span was noted at 31’-5” between gridlines D and C. For this analysis the joist was analyzed at a span of 31’-0” with an average spacing of 5’-0” between joists.

GRW | engineering | architecture | geospatial
801 Corporate Drive | Lexington, KY 40503
859.223.3999 | www.grwinc.com

Table 2. Analysis of a 18S6 Joist

	Actual Values				Historical Values for 18S6	
	Roof Load*	Load to Joist**	End Reaction	Deflection	Max End Reaction	Max Load to Joist
Existing Roof	44.95psf	224.75plf	3531lb	1.44" (L/261)	3600lb	189plf
With 5psf Solar	49.95psf	249.75plf	3923lb	1.61" (L/235)	3600lb	189plf
New Roof Insulation	37.80psf	189.0 plf	2971lb	1.22" (L/310)	3600lb	189plf
With 5psf Solar	42.80psf	214.0 plf	3363lb	1.37" (L274)	3600lb	189plf
New Roof Deck	33.56psf	165.3 plf	2637lb	1.08" (L/349)	3600lb	189plf
with 5psf Solar	38.56psf	190.3 plf	3029lb	1.24" (L/304)	3600lb	189plf

1. * Roof Load Includes a Dead Load of the Roof Assembly, 7.5psf collateral (electrical, fire protection, ceilings, etc.), 2psf self-weight of joist and a minimum Live Load of 20psf.
2. **Calculated using an assumed 5'-0" uniform spacing

Providing new roof insulation and membrane and removing the existing membrane, asphalt, and ballast material will reduce the roof load and the load to the joists by approximately 16%. The estimated load to the joist is 189plf, same as the historical 1959 design criteria specified for an 18S6 joist. The removal of the existing roof assembly down to the slab and providing the proposed roof assembly reduces the end reactions to below 3600lb and reduces the deflection of the joist to under 1 ¼". Under this load configuration, solar panels would not be allowed to be placed on the existing roof slab as the load to the joists exceeds the maximum by 60plf.

To bring the facility up to solar-ready capabilities, GRW recommends replacing the existing roof slab with metal deck. Removing the existing roof slab and providing new roof deck and insulation reduces the load to the joist by more than 25%. The addition of 5psf solar panels would be acceptable in relation to the end reactions and maximum load to the joist based on the 1959 Steel Joist Institute "*Allowable Total Safe Load per Linear Foor of 'S' Series and Nailer Steel Joists*."

4) Summary

- GRW does not recommend placing solar panels on the existing roof system. Removing the existing roof system down to the slab and providing rigid insulation would distribute 189plf to the existing joists, which is the maximum allowable load to an 18S6 joist. No additional load permitted.
- For solar-ready capabilities, GRW recommends replacing the existing roof slab with metal deck. The addition of solar panels to this roof assembly would distribute 190plf to the joist, which is only .5% past its "Allowable Total Safe Uniformly Distributed Load" for an 18S6 Joist, per Steel Joist Institute (1959).
- The age and existing condition of the existing perlite-concrete roof slab presents uncertainty in the structural capacity of the slab. The interior face substrate shows signs of water damage, deterioration and decay, creating the need for an architectural solution for a façade or cover-up. Removing the existing slab and deteriorating substrate would eliminate the need for additional architectural elements on the interior face of the roof structure.

DOCUMENT 005100 - NOTICE OF AWARD

1.1 BID INFORMATION

A. Bidder:

B. Bidder's Address:

C. Project Name: LFUCG DWQ Headquarters & Operations Facility.

D. Project Location: 134 West New Circle Road, Lexington KY 40505.

E. Owner: Lexington Fayette Urban County Government.

F. Owner Project Number: RFB #70-2025.

G. Architect: GRW Engineering Architecture Geospatial.

H. Architect Project Number: 5247-01.

1.2 NOTICE OF AWARD OF CONTRACT

A. Notice: The above Bidder is hereby notified that their Bid, dated <Insert date>, for the above Contract has been considered and the Bidder is hereby awarded a Contract for the LFUCG DWQ Headquarters & Operations Facility.

B. Alternates Accepted: Accepted alternates are indicated in the Owner/Contractor Agreement.

C. Contract Sum: The Contract Sum including accepted alternates is:

1. Indicated in the Owner/Contractor Agreement.

1.3 EXECUTION OF CONTRACT

A. Contract Documents: Executable copies of the Contract Documents will be made available to the Bidder immediately. The Bidder must comply with the following conditions precedent within 10 days of the above date of issuance of the Notice:

1. Deliver to Owner three sets of fully executed copies of the Owner/Contractor Agreement
2. Deliver with the executed Owner/Contractor Agreement the Bonds and Certificates of Insurance required by the Contract Documents.

B. Compliance: Failure to comply with conditions of this Notice within the time specified will entitle Owner to consider the Bidder in default, annul this Notice, and declare the Bidder's Bid security forfeited.

1. Within 10 days after the Bidder complies with the conditions of this Notice, Owner will return to the Bidder one fully executed copy of the Owner/Contractor Agreement.

1.4 NOTIFICATION

A. This Notice is issued by:

1. Owner: Lexington Fayette Urban County Government.

2. Authorized Signature: _____.

3. Signed By: **<Insert authorized signatory name>**.

4. Title: **<Insert authorized signatory title>**.

END OF DOCUMENT 005100

SECTION 011000 - SUMMARY

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

1. Project information.
2. Work covered by Contract Documents.
3. Contractor's use of site and premises.
4. Coordination with occupants.
5. Work restrictions.
6. Specification and Drawing conventions.

B. Related Requirements:

1. Section 015000 "Temporary Facilities and Controls" for limitations and procedures governing temporary use of Owner's facilities.

1.3 DEFINITIONS

A. Work Package: A group of specifications, drawings, and schedules prepared by the design team to describe a portion of the Project Work for pricing, permitting, and construction.

1.4 PROJECT INFORMATION

A. Project Identification: LFUCG DWQ Headquarters & Operations Facility.

1. Project Location: 134 West New Circle Road, Lexington KY.

B. Owner: Lexington Fayette Urban County Government, 200E. Main Street Lexington Ky.

1. Owner's Representative: Richard Dugas, EQPW Commissioners Office 200 E. Main Street, Lexington Ky, Phone: 859-280-8520.

C. Architect: GRW Engineering Architecture Geospatial, 801 Corporate Drive, Lexington KY,

1. Architect's Representative: David Vaught, Phone: 859 880-2503.

D. Architect's Consultants: Architect has retained the following design professionals, who have prepared designated portions of the Contract Documents:

1. Landscape Architecture: Element Design.

a. Landscape Architect Representative: Ramona Fry, Phone: 859-389-6533.

E. Web-Based Project Software: Project software will be used for purposes of managing communication and documents during the construction stage.

1. See Section 013100 "Project Management and Coordination." for requirements for using web-based Project software.

1.5 WORK COVERED BY CONTRACT DOCUMENTS

A. The Work of Project is defined by the Contract Documents and includes, but is not limited to, the following:

1. The project includes renovation and fit-up of approximately 67,873 square feet of business and storage space, one new vehicle storage building of approximately 4,960 square feet, structure demolition of one small canopy approximately 4,000 square feet including all below grade improvements in preparation for the new vehicle storage building, renovation of 17,200 square feet of covered parking canopies with small storage spaces and site improvements. The project also includes new HVAC roof top units and new light fixtures and other Work indicated in the Contract Documents.

B. Type of Contract:

1. Project will be constructed under a single prime contract.

1.6 OWNER-FURNISHED/OWNER-INSTALLED (OFOI) PRODUCTS

A. The Owner will furnish and install products indicated.

1.7 CONTRACTOR'S USE OF SITE AND PREMISES

A. Unrestricted Use of Site: Contractor shall have full use of Project site for construction operations during construction period. Contractor's use of Project site is limited only by Owner's right to perform work or to retain other contractors on portions of Project.

B. Limits on Use of Site: Limit use of Project site areas within the Contract limits indicated. Do not disturb portions of Project site beyond areas in which the Work is indicated.

1. Driveways, Walkways and Entrances: Keep driveways and entrances serving premises clear and available to Owner, Owner's employees, and emergency vehicles at all times. Do not use these areas for parking or for storage of materials.

a. Schedule deliveries to minimize use of driveways and entrances by construction operations.
b. Schedule deliveries to minimize space and time requirements for storage of materials and equipment on-site.

C. Condition of Existing Building: Maintain portions of existing building affected by construction operations in a weathertight condition throughout construction period. Repair damage caused by construction operations.

D. Condition of Existing Grounds: Maintain portions of existing grounds, landscaping, and hardscaping affected by construction operations throughout construction period. Repair damage caused by construction operations.

1.8 COORDINATION WITH OCCUPANTS

A. Owner Limited Occupancy of Completed Areas of Construction: Owner reserves the right to occupy and to place and install equipment in completed portions of the Work, prior to Substantial Completion of the Work, provided such occupancy does not interfere with completion of the Work. Such placement of equipment and limited occupancy shall not constitute acceptance of the total Work.

1. Architect will prepare a Certificate of Substantial Completion for each specific portion of the Work to be occupied prior to Owner acceptance of the completed Work.
2. Obtain a Certificate of Occupancy from authorities having jurisdiction before limited Owner occupancy.
3. Before limited Owner occupancy, mechanical and electrical systems shall be fully operational, and required tests and inspections shall be successfully completed. On occupancy, Owner will operate and maintain mechanical and electrical systems serving occupied portions of Work.
4. On occupancy, Owner will assume responsibility for maintenance and custodial service for occupied portions of Work.
5. Work hours and utility interruptions hours: Per Code / Ordinance for noise requirements of authorities having jurisdiction
6. Utility interruptions impacting Goodwill, need to be coordinated with Goodwill and Architect.

1.9 WORK RESTRICTIONS

A. Comply with restrictions on construction operations.

1. Comply with limitations on use of public streets, work on public streets, rights of way, and other requirements of authorities having jurisdiction.

B. On-Site Work Hours: Limit work to between 7:00 a.m. to 5:00 p.m., Monday through Friday, unless otherwise indicated. Work hours may be modified to meet Project requirements if approved by Owner and authorities having jurisdiction.

1. Weekend Hours: 7:00 a.m. to 5:00 p.m.
2. Hours for Utility Shutdowns: Coordinate utility shutdown with owner.

C. Existing Utility Interruptions: Do not interrupt utilities serving facilities occupied by Owner or others unless permitted under the following conditions and then only after arranging for temporary utility services according to requirements indicated:

1. Notify Architect and Owner not less than two days in advance of proposed utility interruptions.

D. Noise, Vibration, Dust, and Odors: Coordinate operations that may result in high levels of noise and vibration, dust, odors, or other disruption to Owner occupancy with Owner.

1. Notify Architect and Owner not less than two days in advance of proposed disruptive operations.

E. Smoking and Controlled Substance Restrictions: Use of tobacco products and other controlled substances on Owner's property is not permitted.

F. Employee Identification: Provide identification tags for Contractor personnel working on Project site. Require personnel to use identification tags at all times.

G. Employee Screening: Comply with Owner's requirements for drug and background screening of Contractor personnel working on Project site.

1. Maintain list of approved screened personnel with Owner's representative.

1.10 SPECIFICATION AND DRAWING CONVENTIONS

A. Specification Content: The Specifications use certain conventions for the style of language and the intended meaning of certain terms, words, and phrases when used in particular situations. These conventions are as follows:

1. Imperative mood and streamlined language are generally used in the Specifications. The words "shall," "shall be," or "shall comply with," depending on the context, are implied where a colon (:) is used within a sentence or phrase.
2. Text Color: Text used in the Specifications, including units of measure, manufacturer and product names, and other text may appear in multiple colors or underlined as part of a hyperlink; no emphasis is implied by text with these characteristics.
3. Hypertext: Text used in the Specifications may contain hyperlinks. Hyperlinks may allow for access to linked information that is not residing in the Specifications. Unless otherwise indicated, linked information is not part of the Contract Documents.
4. Specification requirements are to be performed by Contractor unless specifically stated otherwise.

B. Division 00 Contracting Requirements: General provisions of the Contract, including General and Supplementary Conditions, apply to all Sections of the Specifications.

C. Division 01 General Requirements: Requirements of Sections in Division 01 apply to the Work of all Sections in the Specifications.

D. Drawing Coordination: Requirements for materials and products identified on Drawings are described in detail in the Specifications. One or more of the following are used on Drawings to identify materials and products:

1. Terminology: Materials and products are identified by the typical generic terms used in the individual Specifications Sections.
2. Abbreviations: Materials and products are identified by abbreviations scheduled on Drawings and published as part of the U.S. National CAD Standard.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION (Not Used)

END OF SECTION 011000

SECTION 093013 - CERAMIC TILING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Ceramic mosaic tile.
2. Porcelain tile.
3. Glazed wall tile.
4. Thresholds.
5. Tile backing panels.
6. Waterproof membranes.
7. Crack isolation membranes.

B. Related Requirements:

1. Section 079200 "Joint Sealants" for sealing of expansion, contraction, control, and isolation joints in tile surfaces.
2. Section 092900 "Gypsum Board" for cementitious backer units.

1.2 DEFINITIONS

A. General: Definitions in the ANSI A108 series of tile installation standards and in ANSI A137.1 apply to Work of this Section unless otherwise specified.

B. Face Size: Actual tile size, excluding spacer lugs.

C. Module Size: Actual tile size plus joint width indicated.

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at Project site.

1. Review requirements in ANSI A108.01 for substrates and for preparation by other trades.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Shop Drawings: Show locations of each type of tile and tile pattern. Show widths, details, and locations of expansion, contraction, control, and isolation joints in tile substrates and finished tile surfaces.

C. Samples for Initial Selection: For tile, grout, and accessories involving color selection.

D. Samples for Verification:

1. Full-size units of each type and composition of tile and for each color and finish required. For ceramic mosaic tile in color blend patterns, provide full sheets of each color blend.
2. Assembled samples mounted on a rigid panel, with grouted joints, for each type and composition of tile and for each color and finish required. Make samples at least 36 inches square, but not fewer than four tiles. Use grout of type and in color or colors approved for completed Work.
3. Full-size units of each type of trim and accessory for each color and finish require.
4. Stone thresholds in 6-inch lengths.

1.5 INFORMATIONAL SUBMITTALS

A. Qualification Data: For Installer.

B. Product Certificates: For each type of product.

1.6 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials that match and are from same production runs as products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Tile and Trim Units: Furnish quantity of full-size units equal to 3 percent of amount installed for each type, composition, color, pattern, and size indicated.

2. Grout: Furnish quantity of grout equal to 3 percent of amount installed for each type, composition, and color indicated.

1.7 QUALITY ASSURANCE

A. Installer Qualifications:

1. Installer is a Five-Star member of the National Tile Contractors Association
2. Installer's supervisor for Project holds the International Masonry Institute's Foreman Certification.
3. Installer employs only Ceramic Tile Education Foundation Certified Installers for Project.
4. Installer employs at least one installer for Project that has completed the Advanced Certification for Tile Installers (ACT) certification for installation of membranes and shower receptors.

B. Mockups: Build mockups to verify selections made under Sample submittals and to demonstrate aesthetic effects and set quality standards for materials and execution.

1. Build mockup of floor tile installation.
2. Build mockup of wall tile installation.

3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.8 DELIVERY, STORAGE, AND HANDLING

A. Deliver and store packaged materials in original containers with seals unbroken and labels intact until time of use. Comply with requirements in ANSI A137.1 for labeling tile packages.

B. Store tile and cementitious materials on elevated platforms, under cover, and in a dry location.

C. Store aggregates where grading and other required characteristics can be maintained and contamination can be avoided.

D. Store liquid materials in unopened containers and protected from freezing.

1.9 FIELD CONDITIONS

A. Environmental Limitations: Do not install tile until construction in spaces is complete and ambient temperature and humidity conditions are maintained at the levels indicated in referenced standards and manufacturer's written instructions.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Source Limitations for Tile: Obtain tile from single source or producer.

1. Obtain tile of each type and color or finish from same production run and of consistent quality in appearance and physical properties for each contiguous area.

B. Source Limitations for Setting and Grouting Materials: Obtain ingredients of a uniform quality for each mortar, adhesive, and grout component from single manufacturer and each aggregate from single source or producer.

1. Obtain setting and grouting materials, except for unmodified Portland cement and aggregate, from single manufacturer.
2. Obtain waterproof membrane and crack isolation membrane, except for sheet products, from manufacturer of setting and grouting materials.

C. Source Limitations for Other Products: Obtain each of the following products specified in this Section from a single manufacturer:

1. Stone thresholds.
2. Waterproof membrane.
3. Crack isolation membrane.
4. Cementitious backer units.

2.2 PRODUCTS, GENERAL

A. ANSI Ceramic Tile Standard: Provide tile that complies with ANSI A137.1 for types, compositions, and other characteristics indicated.

1. Provide tile complying with Standard grade requirements.

B. ANSI Standards for Tile Installation Materials: Provide materials complying with ANSI A108.02, ANSI standards referenced in other Part 2 articles, ANSI standards referenced by TCNA installation methods specified in tile installation schedules, and other requirements specified.

C. Factory Blending: For tile exhibiting color variations within ranges, blend tile in factory and package so tile units taken from one package show same range in colors as those taken from other packages and match approved Samples.

D. Mounting: For factory-mounted tile, provide back- or edge-mounted tile assemblies as standard with manufacturer unless otherwise indicated.

1. Where tile is indicated for installation in wet areas, do not use back- or edge-mounted tile assemblies unless tile manufacturer specifies in writing that this type of mounting is suitable for installation indicated and has a record of successful in-service performance.

2.3 TILE PRODUCTS

A. Porcelain Tile Type: Floor CT-1 (Public Circulation Spaces)

1. DalTile Porcelain Stone Floor tile, Emerson Wood Series, or approved equal.
2. Face Size: 8 inch x 48 inch.
3. Face Size: 6 inch x 48 inch. (Base)
4. Thickness: 5/16 inch.
5. Face: Wood look with square or cushion edges.
6. Dynamic Coefficient of Friction: Not less than 0.42.
7. Tile Color, Glaze, and Pattern: As selected by Architect from manufacturer's full range.
8. Grout Color: As selected by Architect from manufacturer's full range.

B. Porcelain Tile Type: Floor CT-2 (Restroom Locker Room)

1. Crossville Porcelain Stone Floor tile and Mosaic, Trajectory Collection, or approved equal.
2. Certification: Tile certified by the Tile Council of North America (TCNA).
3. Face Size: 24 inch x 24 inch.
4. Face Size Variation: Rectified.
5. Thickness: 3/8 inch.
6. Face: Plain with square or cushion edges.
7. Dynamic Coefficient of Friction: Not less than 0.42.
8. Tile Color, Glaze, and Pattern: As selected by Architect from manufacturer's full range.
9. Grout Color: As selected by Architect from manufacturer's full range.

C. Porcelain Tile Type: Shower Floor CT-3

1. Crossville Porcelain Stone Floor tile and Mosaic, Trajectory Collection, or approved equal.
2. Certification: Tile certified by the Tile Council of North America (TCNA).
3. Face Size: 12 inch x 12 inch. (Cut 24 inch x 24 inch to 12 inch x 12 inch at showers)
4. Face Size Variation: Rectified.
5. Thickness: 3/8 inch.
6. Face: Plain with square or cushion edges.
7. Dynamic Coefficient of Friction: Not less than 0.6.
8. Tile Color, Glaze, and Pattern: As selected by Architect from manufacturer's full range.
9. Grout Color: As selected by Architect from manufacturer's full range.

D. Glazed Wall Tile Type: wet and Dry Walls. CT-4 (Restroom, Locker Room, Showers)

1. Crossville Porcelain Stone Field tile and Mosaic, Trajectory Collection, or approved equal.
2. Module Size: 2 inch x 4 inch Stacked Mosaic, Dot-mounted.
3. Module Size: 6 inch x 12 inch Cove Base
4. Face Size Variation: Rectified.
5. Thickness: 1/4” inch
6. Face: Plain with modified square edges or cushion edges
7. Finish: UPS.
8. Tile Color and Pattern: As selected by Architect from manufacturer's full range.
9. Grout Color: As selected by Architect from manufacturer's full range
10. Mounting: 12 inch x 12 inch Sheet.
11. Trim Units: Coordinated with sizes and coursing of adjoining flat tile where applicable and matching characteristics of adjoining flat tile. Provide shapes as follows, selected from manufacturer's standard shapes:

    a. Wainscot Cap for Thinset Mortar Installations: Surface bullnose, module size 3 inch x 24 inch.
    b. Internal Corners: Field-butted square corners. For coved base and cap use angle pieces designed to fit with stretcher shapes.

2.4 THRESHOLDS

A. General: Fabricate to sizes and profiles indicated or required to provide transition between adjacent floor finishes.

1. Bevel edges at 1:2 slope, with lower edge of bevel aligned with or up to 1/16 inch above adjacent floor surface. Finish bevel to match top surface of threshold. Limit height of threshold to 1/2 inch or less above adjacent floor surface.

2.5 TILE BACKING PANELS

A. Cementitious Backer Units: ANSI A118.9 or ASTM C1325, Type A, in maximum lengths available to minimize end-to-end butt joints.

1. USG Durock Brand Cement Board with edge guard or approved equal
2. Thickness: 5/8 inch.

2.6 WATERPROOF MEMBRANES

A. General: Manufacturer's standard product that complies with ANSI A118.10 and is recommended by the manufacturer for the application indicated. Include reinforcement and accessories recommended by manufacturer.

B. Waterproof Membrane, Fabric-Reinforced, Modified-Bituminous Sheet: Self-adhering, SBS-modified-bituminous sheet with fabric reinforcement facing; 0.040-inch nominal thickness.

2.7 CRACK ISOLATION MEMBRANES

A. General: Manufacturer's standard product that complies with ANSI A118.12 for standard performance and is recommended by the manufacturer for the application indicated. Include reinforcement and accessories recommended by manufacturer.

B. Crack Isolation Membrane, PVC Sheet: PVC heat-fused on both sides to facings of nonwoven polyester; 0.040-inch nominal thickness.

2.8 SETTING MATERIALS

A. Standard Dry-Set Mortar (Thinset): ANSI A118.1.

1. For wall applications, provide mortar that complies with requirements for nonsagging mortar in addition to the other requirements in ANSI A118.1.

2.9 GROUT MATERIALS

A. Sand-Portland Cement Grout: ANSI A108.10, consisting of white or gray cement and white or colored aggregate as required to produce color indicated.

B. Standard Cement Grout: ANSI A118.6.

2.10 MISCELLANEOUS MATERIALS

A. Trowelable Underlayments and Patching Compounds: Latex-modified, portland cement-based formulation provided or approved by manufacturer of tile-setting materials for installations indicated.

B. Vapor-Retarder Membrane: Polyethylene sheeting, ASTM D4397, 4.0 mils thick.

C. Tile Cleaner: A neutral cleaner capable of removing soil and residue without harming tile and grout surfaces, specifically approved for materials and installations indicated by tile and grout manufacturers.

D. Floor Sealer: Manufacturer's standard product for sealing grout joints and that does not change color or appearance of grout.

2.11 MIXING MORTARS AND GROUT

A. Mix mortars and grouts to comply with referenced standards and mortar and grout manufacturers' written instructions.

B. Add materials, water, and additives in accurate proportions.

C. Obtain and use type of mixing equipment, mixer speeds, mixing containers, mixing time, and other procedures to produce mortars and grouts of uniform quality with optimum performance characteristics for installations indicated.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions where tile will be installed, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

1. Verify that substrates for setting tile are firm; dry; clean; free of coatings that are incompatible with tile-setting materials, including curing compounds and other substances that contain soap, wax, oil, or silicone; and comply with flatness tolerances required by ANSI A108.01 for installations indicated.
2. Verify that concrete substrates for tile floors installed with thin set mortar comply with surface finish requirements in ANSI A108.01 for installations indicated.

    a. Verify that surfaces that received a steel trowel finish have been mechanically scarified.
    b. Verify that protrusions, bumps, and ridges have been removed by sanding or grinding.

3. Verify that installation of grounds, anchors, recessed frames, electrical and mechanical units of work, and similar items located in or behind tile has been completed.
4. Verify that joints and cracks in tile substrates are coordinated with tile joint locations; if not coordinated, adjust joint locations in consultation with Architect.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Fill cracks, holes, and depressions in concrete substrates for tile floors installed with thin set mortar with trowelable leveling and patching compound specifically recommended by tile-setting material manufacturer.

B. Where indicated, prepare substrates to receive waterproof membrane by applying a reinforced mortar bed that complies with ANSI A108.1A and is sloped 1/4 inch per foot toward drains.

C. Blending: For tile exhibiting color variations, verify that tile has been factory blended and packaged so tile units taken from one package show same range of colors as those taken from other packages and match approved Samples. If not factory blended, either return to manufacturer or blend tiles at Project site before installing.

3.3 INSTALLATION OF CERAMIC TILE

A. Comply with TCNA's "Handbook for Ceramic, Glass, and Stone Tile Installation" for TCNA installation methods specified in tile installation schedules. Comply with parts of the ANSI A108 series "Specifications for Installation of Ceramic Tile" that are referenced in TCNA installation methods, specified in tile installation schedules, and apply to types of setting and grouting materials used.

1. For the following installations, follow procedures in the ANSI A108 series of tile installation standards for providing 95 percent mortar coverage:

    a. Tile floors in wet areas.
    b. Tile floors consisting of tiles 8 by 8 inches or larger.

B. Extend tile work into recesses and under or behind equipment and fixtures to form complete covering without interruptions unless otherwise indicated. Terminate work neatly at obstructions, edges, and corners without disrupting pattern or joint alignments.

C. Accurately form intersections and returns. Perform cutting and drilling of tile without marring visible surfaces. Carefully grind cut edges of tile abutting trim, finish, or built-in items for straight aligned joints. Fit tile closely to electrical outlets, piping, fixtures, and other penetrations so plates, collars, or covers overlap tile.

D. Provide manufacturer's standard trim shapes where necessary to eliminate exposed tile edges.

E. Where accent tile differs in thickness from field tile, vary setting-bed thickness so that tiles are flush.

F. Jointing Pattern: Lay tile in grid pattern unless otherwise indicated. Lay out tile work and center tile fields in both directions in each space or on each wall area. Lay out tile work to minimize the use of pieces that are less than half of a tile. Provide uniform joint widths unless otherwise indicated.

1. For tile mounted in sheets, make joints between tile sheets same width as joints within tile sheets so joints between sheets are not apparent in finished work.
2. Where adjoining tiles on floor, base, walls, or trim are specified or indicated to be same size, align joints.
3. Where tiles are specified or indicated to be whole integer multiples of adjoining tiles on floor, base, walls, or trim, align joints unless otherwise indicated.

G. Joint Widths: Unless otherwise indicated, install tile with the following joint widths:

1. Ceramic Mosaic Tile: 1/8 inch (2.5 MM).
2. Porcelain Tile: 1/8 inch (3 MM).

H. Lay out tile wainscots to dimensions indicated or to next full tile beyond dimensions indicated.

I. Expansion Joints: Provide expansion joints and other sealant-filled joints, including control, contraction, and isolation joints, where indicated. Form joints during installation of setting materials, mortar beds, and tile. Do not saw-cut joints after installing tiles.

1. Where joints occur in concrete substrates, locate joints in tile surfaces directly above them.

J. Stone Thresholds: Install stone thresholds in same type of setting bed as adjacent floor unless otherwise indicated.

1. At locations where mortar bed (thickset) would otherwise be exposed above adjacent floor finishes, set thresholds in modified dry-set mortar (thinset).
2. Do not extend waterproof membrane or crack isolation membrane under thresholds set in standard dry-set mortar. Fill joints between such thresholds and adjoining tile set on waterproof membrane or crack isolation membrane with elastomeric sealant.

K. Floor Sealer: Apply floor sealer to cementitious grout joints in tile floors according to floor-sealer manufacturer's written instructions. As soon as floor sealer has penetrated grout joints, remove excess sealer and sealer from tile faces by wiping with soft cloth.

3.4 INSTALLATION OF TILE BACKING PANELS

A. Install panels and treat joints according to ANSI A108.11 and manufacturer's written instructions for type of application indicated.

3.5 INSTALLATION OF WATERPROOF MEMBRANES

A. Install waterproof membrane to comply with ANSI A108.13 and manufacturer's written instructions to produce waterproof membrane of uniform thickness that is bonded securely to substrate.

B. Allow waterproof membrane to cure and verify by testing that it is watertight before installing tile or setting materials over it.

3.6 INSTALLATION OF CRACK ISOLATION MEMBRANES

A. Install crack isolation membrane to comply with ANSI A108.17 and manufacturer's written instructions to produce membrane of uniform thickness that is bonded securely to substrate.

B. Allow crack isolation membrane to cure before installing tile or setting materials over it.

3.7 ADJUSTING AND CLEANING

A. Remove and replace tile that is damaged or that does not match adjoining tile. Provide new matching units, installed as specified and in a manner to eliminate evidence of replacement.

B. Cleaning: On completion of placement and grouting, clean all ceramic tile surfaces so they are free of foreign matter.

1. Remove grout residue from tile as soon as possible.
2. Clean grout smears and haze from tile according to tile and grout manufacturer's written instructions but no sooner than 10 days after installation. Use only cleaners recommended by tile and grout manufacturers and only after determining that cleaners are safe to use by testing on samples of tile and other surfaces to be cleaned. Protect metal surfaces and plumbing fixtures from effects of cleaning. Flush surfaces with clean water before and after cleaning.

3.8 PROTECTION

A. Protect installed tile work with kraft paper or other heavy covering during construction period to prevent staining, damage, and wear. If recommended by tile manufacturer, apply coat of neutral protective cleaner to completed tile walls and floors.

B. Prohibit foot and wheel traffic from tiled floors for at least seven days after grouting is completed.

C. Before final inspection, remove protective coverings and rinse neutral protective cleaner from tile surfaces.

3.9 INTERIOR CERAMIC TILE INSTALLATION SCHEDULE

A. Interior Floor Installations, Concrete Subfloor:

1. TCNA F113 24 x 24 Porcelain: Thinset mortar.

   a. Ceramic Tile Type: 24x24 Porcelain.
   b. Thinset Mortar: Standard dry-**set** mortar.
   c. Grout: High-performance unsanded grout.

2. TCNA F113 8 x 48 Porcelain: Thinset mortar.

   a. Ceramic Tile Type: 8x48 Porcelain.
   b. Thinset Mortar: Standard dry-**set** mortar.
   c. Grout: High-performance unsanded grout.

3. TCNA F122 12 x 12 shower Floor: Thinset mortar on waterproof membrane.

   a. Ceramic Tile Type: 12x12.
   b. Thinset Mortar: Modified dry-set mortar.
   c. Grout: High-performance unsanded grout.

4. TCNA F125-Full 24 x 24: Thinset mortar on crack isolation membrane.

    a. Ceramic Tile Type: 24x24.
    b. Thinset Mortar: Modified dry-set mortar.
    c. Grout: High-performance unsanded grout.

B. Interior Wall Installations, Masonry or Concrete:

1. TCNA W202 2x4 Stacked: Thinset mortar.

    a. Ceramic Tile Type: 2x4 stacked.
    b. Thinset Mortar: Standard dry-set mortar.
    c. Grout: Standard sanded cement grout.

C. Interior Wall Installations, Wood or Metal Studs or Furring:

1. TCNA W244C or TCNA W244F 2x4 Stacked: Thinset mortar on cementitious backer units or fiber-cement backer board.

    a. Ceramic Tile Type: 2x4 stacked.
    b. Thinset Mortar: Standard dry-set mortar.
    c. Grout: Standard sanded cement grout.

D. Shower Receptor and Wall Installations:

1. TCNA B422 2x4 Stacked: Thinset mortar on waterproof membrane with integrated bonding flange for bonded membranes.

    a. Ceramic Tile Type: 2x4 stacked.
    b. Thinset Mortar: Standard dry-set mortar.
    c. Grout: Standard sanded cement grout.

GENERAL NOTES:

A. THE EXISTING TOPOGRAPHIC AND SITE INFORMATION SHOWN IS FROM A SURVEY PROVIDED BY ENDRIS ENGINEERING. THIS INFORMATION IS PROVIDED FOR THE CONVENIENCE OF THE CONTRACTOR. THE ARCHITECT SHALL NOT BE RESPONSIBLE FOR THE ACCURACY OF THE INFORMATION SHOWN THEREON. CONTRACTOR TO VERIFY ALL INFORMATION SHOWN.CONTRACTOR TO VERIFY ALL INFORMATION SHOWN.

B. THE DRAWINGS SHOW THE APPROXIMATE LOCATION OF EXISTING AND PROPOSED UTILITY LINES. THESE LINES HAVE BEEN IDENTIFIED AND LOCATED AS ACCURATELY AS POSSIBLE USING AVAILABLE INFORMATION; THE CONTRACTOR IS RESPONSIBLE FOR VERIFYING ALL ACTUAL LOCATIONS.

C. PROTECT EXISTING TREES FROM POTENTIAL DAMAGE OF CONSTRUCTION OPERATIONS. STEEPEN GRADES UPHILL FROM EXISTING TREES TO A MAX. OF 2:1 TO AVOID FILLING SOILS ONTO TRUNKS.

D. UNLESS OTHERWISE INDICATED TO BE REMOVED, ALL ITEMS REMAINING WITHIN THE LIMIT OF CONTRACT ARE TO REMAIN AND BE PROTECTED FROM DAMAGE DURING CONSTRUCTION.

E. THE CONTRACTOR SHALL MAINTAIN STORM DRAINAGE SYSTEMS TO FUNCTION THROUGHOUT THE CONSTRUCTION PERIOD.

F. PROPOSED GRADES SHOWN ARE FINISHED GRADES. ELEVATIONS SHOWN AT CURBS ARE BOTTOM OF CURB UNLESS NOTED TC.

G. LIMIT OF GRADING EXTENTS TO INCLUDE ALL AREAS DISTURBED BY ALL SITE UTILITY WORK. REFER TO SITE UTILITY DRAWINGS FOR LOCATIONS OF PROPOSED SITE UTILITIES.

H. REFER TO SPECIFICATION / PROJECT MANUAL FOR ADDITIONAL REQUIREMENTS.

I. ADJUST RIM ELEVATIONS OF ALL EXISTING STRUCTURES TO MATCH PROPOSED FINISHED GRADES.

J. GRADE ALL NEW PAVEMENTS TO DRAIN. GRADE ALL NEW WALKS AT MAX. 2% CROSS SLOPE. GRADE ALL NEW WALKS TO MAX. 5% LONGITUDINAL SLOPE UNLESS OTHERWISE SPECIFICALLY INDICATED ON PLANS TO BE A RAMP.

CIVIL UTILITY LEGEND

- W — PROPOSED POTABLE WATER LINE
- PROPOSED FIRE PROTECTION SERVICE LINE
- STRM — PROPOSED STORM LINE- SEE L-300 FOR REQUIREMENTS
- PROPOSED WATER LINE VALVE
- FLUSHING HYDRANT
- S — MANHOLE

CIVIL UTILITY NOTES (1)

1. CONTRACTOR TO LOCATE EXISTING METER AND SERVICE LINE. CONNECT PROPOSED 2" WATER LINE TO EXISTING SERVICE LINE BETWEEN METER AND BUILDING
2. 2" PVC SDR-17 WATERLINE. REFER TO DETAIL A/C200. MAINTAIN 10 FEET SEPARATION FROM FORCE MAIN.
3. INSTALL FLUSH HYDRANT. REFER TO DETAIL D/C200.
4. PROPOSED WATER LINE VALVE. REFER TO DETAIL B/C200.
5. CONNECT FORCE MAIN TO THE BUILDING LIFT STATION. REFER TO MEP PLANS.
6. 2" HDPE FORCE MAIN. MAINTAIN 10 FEET SEPARATION FROM WATER LINE.
7. INSTALL MANHOLE TO ALLOW FOR FORCE MAIN TRANSITION TO GRAVITY FLOW, REFER TO DETAIL E/C200
8. INSTALL MANHOLE AT CONNECTION POINT TO EXISTING 8" SANITARY SEWER. FIELD VERIFY INVERT ELEVATION AT CONNECTION POINT PRIOR TO PURCHASING MANHOLE MATERIALS. PROVIDE ENGINEER WITH FIELD VERIFIED ELEVATIONS, REFER TO DETAIL E/C200.
9. FIELD VERIFY EXISTING UTILITY ELEVATIONS AND ADJUST PROPOSED UTILITY TO AVOID CONFLICT.
10. TAP EXISTING GAS LINE AND EXTEND 1" MDPE GAS LINE TO BUILDING POINT OF CONNECTION. REFER TO MEP PLANS FOR CONTINUATION.
11. 3/4" PVC SDR-17 WATERLINE INTO BUILDING, REFER TO MEP PLANS FOR ADDITIONAL REQUIREMENTS. PROVIDE SHUT OFF VALVE AT TEE.

DEMOLITION NOTES:

A. THE EXISTING TOPOGRAPHIC AND SITE INFORMATION SHOWN HAS BEEN PROVIDED FROM A SURVEY BY ENDRIS ENGINEERING. THIS INFORMATION IS PROVIDED FOR THE CONVENIENCE OF THE CONTRACTOR. THE ARCHITECT SHALL NOT BE RESPONSIBLE FOR THE ACCURACY OF THE INFORMATION SHOWN THEREON. CONTRACTOR TO VERIFY ALL INFORMATION SHOWN.
B. THE CONTRACT DRAWINGS SHOW THE APPROXIMATE LOCATION OF EXISTING AND PROPOSED UTILITY LINES. THESE LINES HAVE BEEN IDENTIFIED AND LOCATED AS ACCURATELY AS POSSIBLE USING AVAILABLE INFORMATION. THE CONTRACTOR IS RESPONSIBLE FOR VERIFYING ALL ACTUAL UTILITY LOCATIONS.
C. SAWCUT EDGES OF EXISTING PAVEMENT WHERE NEW PAVEMENT ABUTS AND / OR EXISTING PAVEMENT IS INDICATED TO BE REMOVED.
D. CONTRACTOR TO PROTECT ALL EXISTING TREES TO REMAIN- ALL TREES WITHIN THE LIMITS OF WORK SHALL BE PROTECTED. CONTRACTOR SHALL NOTIFY LANDSCAPE ARCHITECT IF ANY TREES ARE DAMAGED ON OR OFF SITE. NO MATERIALS ARE TO BE STORED UNDER A TREE IN ANY CIRCUMSTANCE. THE CONTRACTOR SHALL MAINTAIN TREE PROTECTION FENCING WHERE INDICATED AND FOR ALL EXISTING TREES WITHIN THE LIMITS OF THE CONSTRUCTION FENCING. TREE PROTECTION FENCING SHALL BE CONSTRUCTED OF SAFETY FENCE WITH STEEL 'T' SECTION FENCE POSTS SPACED AT 6' MAXIMUM; LIMIT OF FENCE TO ALIGN WITH CANOPY / DRIP EDGE OF TREES TO AVOID DAMAGE TO EXISTING TREES DURING CONSTRUCTION.
E. CONTRACTOR SHALL PROTECT ALL SURROUNDING AREAS. CONTRACTOR SHALL REPAIR ANY DAMAGES TO OFF OR ON SITE PROPERTY THAT IS NOT LISTED TO BE REMOVED AT NO ADDITIONAL COST TO OWNER.
F. SEE SPECIFICATIONS FOR OTHER DEMOLITION AND SITE CLEARING REQUIREMENTS.
G. CONTRACTOR SHALL PROTECT ALL UTILITY STRUCTURES. ANY DAMAGES TO UTILITIES ON OR OFF SITE SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR FOR REPAIR AT NO ADDITIONAL COST TO OWNER. THE CONTRACTOR SHALL SALVAGE AND REINSTALL ALL EXISTING UTILITY MARKERS IN NEW PAVEMENT.
H. PROTECT ALL WALKWAYS, WALLS, VEGETATION, TREES AND OTHER IMPROVEMENTS WITHIN THE CONSTRUCTION LIMITS THAT ARE NOT INDICATED FOR REMOVAL. ANY DAMAGE OR DESTRUCTION OF SUCH SHALL BE REPLACED BY THE CONTRACTOR AT NO COST TO THE OWNER.
I. WHERE ITEMS ARE INDICATED TO BE SALVAGED AND RETURNED TO OWNER, THE OWNER SHALL DESIGNATE A LOCATION FOR CONTRACTOR TO DELIVER AND OFFLOAD SALVAGED ITEMS.
J. FOR WORK SCOPE ITEMS OUTSIDE OF THE CONSTRUCTION FENCE, THE CONTRACTOR SHALL PROVIDE TEMPORARY FENCE AND SIGNAGE TO DIRECT PEDESTRIANS AROUND CONSTRUCTION AREAS AS NEEDED FOR DEMOLITION AND CONSTRUCTION IN THESE AREAS. CONTRACTOR SHALL MINIMIZE THE DURATION OF WORK OUTSIDE OF THE CONSTRUCTION FENCE AS MUCH AS FEASIBLE, AND SHALL NOTIFY OWNER OF ANY PROPOSED CHANGES TO THE CONSTRUCTION FENCE AND WORK OUTSIDE OF THE CONSTRUCTION FENCE A MINIMUM OF 72 HOURS IN ADVANCE.

SITE DEMOLITION LEGEND

- ASPHALT PAVEMENT TO BE MILLED 1 ½", SEE KEYNOTE 3
- EXISTING ASPHALT PAVEMENT TO BE REMOVED- FULL PAVEMENT SECTION- SEE KEYNOTES 2 & 4
- EXISTING CONCRETE PAVEMENT TO BE REMOVED TO STONE BASE, SEE KEYNOTE 7 AND 8 FOR TYPE
- EXISTING CONCRETE PAVEMENT TO REMAIN, SEE KEYNOTES 9 AND 13
- EXISTING TURF AREA TO BE CLEARED FOR NEW SITE IMPROVEMENTS, SEE KEYNOTE 15
- EXISTING CHAIN LINK FENCING TO BE REMOVED, SEE KEYNOTES 5 & 6
- EXISTING FENCING TO REMAIN, SEE KEYNOTE 16
- EXISTING CONCRETE CURB TO BE REMOVED, SEE KEYNOTE 1
- EXISTING TREE TO BE REMOVED, SEE KEYNOTES AND SPECIFICATIONS 'SITE CLEARING' FOR ADDITIONAL REQUIREMENTS
- EXISTING TREE TO BE PROTECTED WITH TREE PROTECTION FENCING, SEE GENERAL NOTES. EXTEND TREE FENCING TO DRIP LINE OF TREE- SEE DETAIL A/L200. NO PARKING, MATERIAL STORAGE OR GRADING TO TAKE PLACE WITHIN DRIPLINE OF EXISTING TREES

DEMOLITION KEYNOTES 1

1. EXISTING CURB AND GUTTER TO BE REMOVED, FULL SECTION.
2. EXISTING ASPHALT PAVEMENT TO BE REMOVED, FULL SECTION INCLUDING STONE BASE, WHERE ASPHALT PAVEMENT HAS FAILED. REMEDIATE BASE WITH 6" #2 STONE CHOKED WITH 4" DGA TO PAVEMENT SUBGRADE. FIELD VERIFY EXTENTS WITH OWNER AND ARCHITECT.
3. EXISTING ASPHALT PAVEMENT TO BE MILLED 1 ½" AND PREPARED FOR NEW ASPHALT SURFACE.
4. EXISTING ASPHALT PAVEMENT TO BE REMOVED, FULL PAVEMENT SECTION INCLUDING STONE BASE. SEE L401 FOR PROPOSED IMPROVEMENTS.
5. EXISTING FENCE TO BE REMOVED, FENCING, FABRIC, POSTS AND FOOTINGS.
6. EXISTING PERIMETER FENCING AT EXISTING COVERED PARKING, FENCING TO BE REMOVED INCLUDING FABRIC, POSTS AND FOOTINGS. CUT FOOTINGS OFF AT GRADE AND GROUT OPENING SOLID.
7. EXISTING CONCRETE PAVEMENT TO BE REMOVED.
8. EXISTING HEAVY DUTY CONCRETE PAVEMENT TO BE REMOVED TO CONSTRUCT NEW VACTOR BUILDING. SAWCUT AT NEAREST CONTROL JOINT AND REMOVE PAVEMENT AND STONE BASE.
9. EXISTING HEAVY DUTY CONCRETE PAVEMENT AT COVERED PARKING AREA, TO REMAIN. TREAT AND REMOVE WEEDS IN CRACKS AND PATCH CRACKS WITH CONCRETE FILLER. PROTECT CONCRETE AND CANOPIES TO REMAIN FROM CONSTRUCTION ACTIVITIES.
10. EXISTING ASPHALT PAVEMENT, SUBGRADE FAILURE. REMOVE FULL ASPHALT PAVEMENT SECTION AND STONE BASE TO ADDRESS SUBGRADE FAILURE.
11. EXISTING OVERHEAD CANOPY TO BE REMOVED TO CONSTRUCT NEW VACTOR BUILDING. REMOVE CANOPY, FRAMING, POSTS AND FOOTINGS IN THEIR ENTIRETY. BACKFILL FOOTINGS WITH COMPACTED DGA IN MAX. 8" LIFTS TO NEW PAVEMENT OR BUILDING SUBGRADE.
12. REMOVE ALL EXISTING WHEELSTOPS, TYPICAL.
13. EXISTING CONCRETE PAVEMENT TO REMAIN.
14. EXISTING FENCE / GATE TO BE REMOVED AND RELOCATED 10' BACK. FIELD VERIFY NEW GATE LOCATION WITH OWNER AND ARCHITECT.
15. EXISTING TURF OR LANDSCAPE AREA TO BE CLEARED, EXCAVATED AND COMPACTED / PREPARED FOR NEW CONCRETE CURB AND GUTTER AND / OR ASPHALT PAVEMENT, SEE L400 AND L401 FOR REQUIREMENTS.
16. EXISTING FENCE ON ADJACENT PROPERTY TO REMAIN IN PLACE.
17. EXISTING CONCRETE DUMPSTER PAD AND BOLLARDS TO REMAIN FOR REUSE.
18. AREA OF EXISTING ASPHALT PAVEMENT TO BE SAWCUT AND REMOVED FOR NEW HEAVY DUTY CONCRETE UTILITY PAD, SEE L400 AND L401 FOR ADDITIONAL NOTES.
19. EXISTING CURB AT EAST EDGE OF EXISTING COVERED PARKING AREA TO BE REMOVED. REMOVE CURB AND REMOVE ASPHALT STRIP BEHIND CURB / BETWEEN CURB AND EXISTING COVERED CONCRETE PAVEMENT THAT REMAINS. ASPHALT STRIP THAT IS REMOVED SHALL BE REPLACED WITH NEW ASPHALT PAVEMENT TRANSITION FROM ASPHALT DRIVE TO CONCRETE PAVEMENT.
20. EXISTING FENCE TO BE REMOVED AROUND COVERED PARKING. REMOVE FENCE, POSTS, GATES AND GATE OPERATORS AND ALL APPURTENANCES. WHERE EXISTING POSTS ARE EMBEDED IN CONCRETE THAT REMAINS, CUT FENCE POST TO GRADE AND GROUT POST HOLES SOLID WITH NON-SHRINK GROUT.
21. EXISTING BUILDINGS TO REMAIN IN COVERED PARKING AREA.
22. REMOVE EXISTING WHEELSTOPS AND GROUT HOLES SOLID.
23. REMOVE EXISTING BOLLARD AND PATCH / GROUT HOLE SOLID.

B. DIMENSIONS GIVEN IN RELATIONSHIP TO BUILDINGS OR OTHER SITE ELEMENTS ARE MEASURED PERPENDICULAR FROM THE OUTSIDE FACE OF BRICK, STONE OR CONCRETE UNLESS OTHERWISE INDICATED. DIMENSIONS GIVEN AT ROADWAYS ARE FROM FACE OF CURB TO FACE OF CURB UNLESS OTHERWISE NOTED. DIMENSIONS GIVE AT WALKWAYS ARE FROM EDGE OF PAVEMENT TO EDGE OF PAVEMENT OR FACE OF CURB UNLESS OTHERWISE NOTED.

C. DIMENSIONS ARE REFERENCED AT 90 DEGREE ANGLES UNLESS OTHERWISE INDICATED. RADII ARE 5' UNLESS OTHERWISE INDICATED.

D. THE CONTRACTOR IS RESPONSIBLE FOR CONTACTING ALL INVOLVED UTILITY COMPANIES AND COORDINATING WITH THEM ALL CONSTRUCTION ACTIVITIES AND VERIFYING ALL SITE UTILITIES PRIOR TO CONSTRUCTION ACTIVITY.

E. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

LAYOUT LEGEND:

	CENTERLINE
CL	CENTERLINE
ME	MATCH EXISTING DIMENSION
EQ	SPACE EQUALLY
+/-	DIMENSION MAY VARY DUE TO EXISTING FIELD CONDITIONS
PI	CENTERLINE POINT OF INTERSECTION
PC	CENTERLINE POINT OF CURVATURE
PT	CENTERLINE POINT OF TANGENCY
BC	BUILDING CORNER
CP	CENTER POINT OF CURVATURE
#1 N:XXX E:XXX	POINT COORDINATES
	SURVEY BENCHMARK- REFER TO SITE SURVEY

SITE LAYOUT KEYNOTES

1. ALIGN NEW ADA COMPLIANT CURB RAMP WITH CENTERLINE OF NEW DOORS.
2. NEW SECURITY FENCE TO FOLLOW PROPERTY LINE AT PERIMETER. LOCATE FENCE JUST INSIDE PROPERTY LINE TO ENSURE POSTS AND ALL COMPONENTS ARE WITHIN THE PROPERTY LINE.
3. ANGLE OF DRIVE CHANGES TO ACCOMMODATE TURNING MOVEMENT AROUND NEW VACTOR BUILDING.
4. ALIGN NEW LANDSCAPE ISLANDS AT OPENING TO EXISTING COVERED PARKING DRIVE LANES.
5. 6' CENTER WALK AISLE, TYPICAL, STRIPED ASPHALT.
6. 6' ASPHALT AISLE FOR NEW SECURITY FENCE, FENCE TO BE LOCATED IN CENTER OF AISLE.
7. NEW SECURITY FENCE VEHICULAR GATE, FIELD VERIFY LOCATION WITH OWNER AND ARCHITECT PRIOR TO INSTALLATION.
8. NEW SECURITY FENCE MAN GATE, FIELD VERIFY LOCATION WITH OWNER AND ARCHITECT PRIOR TO INSTALLATION.
9. NEW SECURITY FENCE LOCATION OFF PROPERTY LINE, FIELD VERIFY LOCATION WITH OWNER AND ARCHITECT PRIOR TO INSTALLATION.

LAYOUT & MATERIALS NOTES

A. EXISTING TOPOGRAPHIC AND SITE INFORMATION SHOWN HAS BEEN PROVIDED FROM A SURVEY BY ENDRIS ENGINEERING. THIS INFORMATION IS PROVIDED FOR THE CONVENIENCE OF THE CONTRACTOR. THE ARCHITECT SHALL NOT BE RESPONSIBLE FOR THE ACCURACY OF THE INFORMATION SHOWN THEREON. CONTRACTOR TO VERIFY ALL INFORMATION SHOWN. THE CONTRACTOR SHALL VERIFY THE LOCATION OF AND PROTECT ALL UTILITIES PRIOR TO THE COMMENCEMENT OF DIGGING. NOTIFY THE LANDSCAPE ARCHITECT OF ANY CONFLICTS.

B. DIMENSIONS GIVEN IN RELATIONSHIP TO BUILDINGS OR OTHER SITE ELEMENTS ARE MEASURED PERPENDICULAR FROM THE OUTSIDE FACE OF BRICK, STONE OR CONCRETE UNLESS OTHERWISE INDICATED. DIMENSIONS GIVEN AT ROADWAYS ARE FROM FACE OF CURB TO FACE OF CURB UNLESS OTHERWISE NOTED.

C. DIMENSIONS ARE REFERENCED AT 90 DEGREE ANGLES UNLESS OTHERWISE INDICATED. RADII ARE 5' UNLESS OTHERWISE INDICATED.

D. THE CONTRACTOR IS RESPONSIBLE FOR CONTACTING ALL INVOLVED UTILITY COMPANIES AND COORDINATING WITH THEM ALL CONSTRUCTION ACTIVITIES AND VERIFYING ALL SITE UTILITIES PRIOR TO CONSTRUCTION ACTIVITY.

E. ANY EXISTING SIGNAGE ALONG SHILLITO PARK ROAD THAT IS DISTURBED BY CONSTRUCTION ACTIVITIES SHALL BE REPLACED AT NOT ADDITIONAL COST TO THE OWNER.

F. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

MATERIALS LEGEND:

- NEW 1 ½" ASPHALT SURFACE OVERLAY OVER MILLED PAVEMENT BASE
- NEW FULL ASPHALT PAVEMENT SECTION, SEE KEYNOTES 6 & 17
- AREA OF EXISTING ASPHALT PAVEMENT TO BE OVERLAID TO MEET FINISH GRADES INDICATED, SEE KEYNOTE 23
- NEW BROOMED 4" CONCRETE PAVEMENT WITH TOOLED CONTROL JTS SEE KEYNOTE 6
- NEW BROOMED HEAVY DUTY 6" CONCRETE PAVEMENT WITH TOOLED CONTROL JTS SEE KEYNOTES AND DETAIL C/L601
- NEW LANDSCAPE AREA, SEE L500
- NEW CONCRETE CURB & GUTTER - SEE KEYNOTE 1
- NEW HEADER CURB
- CURB TRANSITION FROM 6" TO FLUSH CURB CONDITION
- NEW CURB RAMP
- EJ — EXPANSION JOINT- SEE DETAIL E/L601
- CONTROL JOINT- SEE DETAIL D/L601
- NEW THERMOPLASTIC STRIPING AND ARROWS, SEE DETAIL D/L6.1 AND SPECIFICATIONS FOR REQUIREMENTS. COMPLY FHWA STANDARDS FOR DIRECTIONAL AND TURN ARROWS
- NEW WHEELSTOP, SEE DETAIL L/L601
- STOP — STOP SIGN AND STOP BAR, SEE DETAIL M/L601 FIELD VERIFY FINAL LOCATION
- NO THRU TRAFFIC — NO THRU TRAFFIC, SEE DETAIL M/L601 FIELD VERIFY FINAL LOCATION WITH LFUCG, SEE KEYNOTE 31
- PARKING SPACE STRIPING - 4" X 18' THERMOPLASTIC STRIPING TYPICAL FOR STANDARD SPACES
- TRASH RECEPTACLE BY OWNER AND NIC, SEE KEYNOTE 12
- MOVABLE TABLE AND CHAIR BY OWNER AND NIC, SEE KEYNOTE 13
- ADD ALTERNATE #1 PERMEABLE PAVERS, SEE DETAIL A/LK-401

SITE MATERIALS KEYNOTES

1. NEW CONCRETE CURB AND GUTTER, SEE DETAIL A/L601.
2. NEW FLUSH CONCRETE CURB AND GUTTER, SEE DETAIL A/L601.
3. NEW 6" HEADER CURB SEE DETAIL A/L601.
4. NEW CURB RAMP, SEE DETAIL F/L601.
5. NEW 1 ½" ASPHALT SURFACE OVER MILLED ASPHALT BASE, SEE DETAIL H/L601.
6. NEW FULL ASPHALT PAVEMENT SECTION, SEE DETAIL H/L601. FULLY COMPACT SUB BASE PRIOR TO INSTALLING NEW DGA STONE BASE.
7. NEW LIGHT DUTY CONCRETE PAVEMENT, SEE DETAIL B/L601.
8. NEW PROTECTIVE BOLLARD, SEE DETAIL E/L602.
9. EXISTING CHAIN LINK FENCE / GATES TO BE RELOCATED APPROXIMATELY 10' BACK N EXISTING PAVEMENT. FIELD VERIFY NEW GATE LOCATION WITH OWNER AND ARCHITECT.
10. NEW PERIMETER SECURITY FENCE, SEE DETAIL A/L602.
11. NEW 16' WIDE SLIDING VEHICULAR SECURITY GATE, SEE DETAIL B/L602. PROVIDE LEVEL GATE RETURN AREA AS REQUIRED BY MANUFACTURER (MIN. 24' LONG COUNTERBALANCE PANELS).
12. NEW TRASH RECEPTACLE SHOWN FOR REFERENCE ONLY. PROVIDED AND INSTALLED BY OWNER, NOT N CONTRACT.
13. NEW MOVABLE TABLE AND CHAIR SET SHOWN FOR REFERENCE ONLY. PROVIDED AND INSTALLED BY OWNER, NOT IN CONTRACT.
14. NEW ADA PARKING SPACE, SEE DETAIL H/L601 AND J/L602 FOR ADA PARKING SIGNS.
15. NEW HEAVY DUTY CONCRETE PAVEMENT APRON AT ENTRANCE TO VACTOR BUILDING, SEE DETAIL P/L601. NEW HEAVY DUTY CONCRETE PAVEMENT APRON AT ENTRANCE TO VACTOR BUILDING, SEE DETAIL P/L601, SEE ALSO N/L601 FOR WHERE NEW APRON MEETS BUILDING AT OVERHEAD DOORS.
16. NEW PROTECTIVE BOLLARDS AT ENTRANCES / OVERHEAD DOORS, SEE DETAIL E/L602.
17. NEW ASPHALT PAVEMENT, FULL SECTION, N AREA OF PREVIOUS SUBGRADE FAILURE. PLACE 8" #2 STONE CHOKED OFF WITH 4" DGA AND COMPACT PRIOR TO PLACING PAVEMENT DGA BASE. SEE DETAIL H/L601 FOR ASPHALT PAVEMENT SECTION.
18. NEW RECYCLED RUBBER WHEELSTOP WHERE INDICATED, SEE DETAIL L/601.
19. NEW PARKING SPACES / FUTURE LOCATION FOR EV CHARGERS (EV CHARGERS ARE NOT N CONTRACT).
20. NEW 36" WIDE CHAIN LINK PEDESTRIAN GATE WITH PANIC HARDWARE. REFER TO MEP PLANS FOR POWER SUPPLY. SEE DETAIL G/L602.
21. NEW 9' TALL CHAIN LINK SCREEN FENCE WITH PRIVACY SLATS, SEE DETAIL D/L602.
22. NEW HEAVY DUTY CONCRETE UTILITY PAD, SEE DETAIL P/L601.
23. AREA OF EXISTING ASPHALT PAVEMENT TO BE OVERLAID TO MEET FINISH GRADES INDICATED, SEE L300 FOR FINISH GRADES.
24. THERMOPLASTIC CROSSWALK STRIPING, SEE DETAIL M/L601.
25. NEW HEADER CURB IN PARKING ISLAND TO FORM CHANNEL FOR SLIDING GATE RETURN, SEE DETAIL A/L601.
26. CURB CUT AND CONCRETE FLUME DRAINAGE CHANNEL, SEE DETAIL O/L601.
27. NEW HEAVY DUTY CONCRETE COLLAR AROUND EXISTING CATCH BASIN, SEE L300.
28. AT AREA OF REMOVED CURB AND ASPHALT STRIP, INSTALL NEW ASPHALT PAVEMENT, FULL SECTION. ASPHALT SHALL TRANSITION FROM GRADE AT EDGE OF EXISTING DRIVE TO EXISTING GRADE AT CONCRETE PAVEMENT IN GOVERED PARKING AREA.
29. NEW SECURITY FENCE WITH PRIVACY SLATS ALONG SOUTH PROPERTY BOUNDARY. SEE DETAIL A/L602, PRIVACY SLAT CONDITION.
30. WHERE NEW SECURITY FENCE SPANS OVER CONCRETE FLUMES AND RIP RAP, LOCATE FENCE POSTS EQUALLY TO EITHER SIDE OF FLUME AND SPAN OVER FLUME WITH FENCE PANEL.
31. NO THRU TRAFFIC SIGN TO BE LOCATED EAST OF PROJECT SITE, TWO SIGNS. ONE AT LOCATION SHOWN BEHIND EXISTING GOODYALL BUILDING, THE SECOND SHALL BE LOCATED NEAR LIMESTONE STREET, TO PREVENT VEHICLES FROM DRIVING THROUGH / USING SERVICE DRIVE. FIELD VERIFY FINAL LOCATION WITH LFUCG.
32. ADDITIVE ALTERNATE #1 - AS PART OF ADDITIVE ALTERNATE #1, DEDUCT ASPHALT PAVEMENT AND ADD PERVIOUS PAVERS IN PARKING SPACES AS INDICATED, WITH 12"X6' CIP CONCRETE EDGE RESTRAINT BAND. SEE DETAIL A/LK-401.
33. ADDITIVE ALTERNATE #1 - AS PART OF ADDITIVE ALTERNATE #1, INSTALL NEW CONCRETE DRAINAGE FLUME AT WHERE INDICATED, TO CARRY FLOW FROM ROOF DOWNSPOUTS NEST. SEE DETAIL A/L300.

5. DIMENSIONS INDICATED ARE FROM FACE OF FRAMING UNLESS NOTED OTHERWISE.
6. EXISTING DIMENSIONS ARE FROM RECORD DOCUMENTS. CONTRACTOR SHALL FIELD VERIFY EXISTING CONDITION DIMENSIONS. ADVISE ARCHITECT OF DISCREPANCIES BETWEEN EXISTING CONDITION AND CONSTRUCTION DOCUMENTS.

SHEET KEYNOTES:

1	EQUIPMENT - COPY MACHINE (OFOI) SEE ELECTRICAL PLANS FOR ADDITIONAL REQUIREMENTS.
2	EQUIPMENT - WALL MOUNTED TELEVISION. (OFOI) PROVIDE WOOD BLOCKING FOR TV MOUNTING. SEE ELECTRICAL PLANS FOR ADDITIONAL REQUIREMENTS.
3	24" X 24" MOP SINK.
4	CERAMIC TILE WAINSCOT.
5	ADA COMPLIANT DRINKING FOUNTAIN.
6	SOLID SURFACE COUNTERTOPS.
7	RECESSED DEAL TRAY.
8	AMPLIFIED SPEAK-THRU INTERCOM SYSTEM.
9	INTERIOR FURNISHINGS OFFICE FURNITURE SYSTEMS.
10	EXISTING STRUCTURAL COLUMN TO REMAIN.
11	EXISTING FLAT FILES. (OFOI)
12	NEW ACOUSTICAL PANEL CEILING.
13	ROOM IDENTIFICATION PANEL SIGNAGE. TYPICAL AT EACH DOOR INTO EACH ROOM. PROVIDE ADA RESTROOM SIGNAGE AT EACH RESTROOM / LOCKER ROOM DOOR.
14	THERMAL INSULATION - SOUND BATT INSULATION.
15	PROVIDE POWER AND DATA POLE DROP. SEE ELECTRICAL PLANS.
16	FIRE EXTINGUISHER CABINET. FIRE EXTINGUISHER IS (OFOI). COORDINATE CABINET SIZE WITH OWNER PROVIDED FIRE EXTINGUISHERS.
17	EXISTING BAR JOIST TO REMAIN. PREPARE FOR NEW PAINT FINISH.
18	4" BASE POLYISOCYANURATE RIGID INSULATION.
19	1/2" PROTECTION BOARD.
20	SBS MODIFIED BITUMINOUS MEMBRANE ROOFING - FINISH PLY.

GENERAL NOTES:

1	REFER TO POWER PLANS FOR PANELBOARD LOCATIONS.
2	REFER TO LIGHTING CONTROL DETAILS ON SHEET EL501 THROUGH EL503.
3	PROVIDE AN UNSWITCHED LIGHTING CONDUCTOR TO EACH LUMINAIRE CONTAINING AN EMERGENCY BATTERY DRIVER.
4	0-10VDC DIMMING CONDUCTORS (CLASS 2) HAVE NOT BEEN SHOWN; HOWEVER, SHALL BE PROVIDED AS REQUIRED BY SHEET KEYNOTES AND/OR THE CONTROL DETAILS FOR EACH ROOM / AREA. DIMMING CONDUCTORS SHALL BE ROUTED IN SEPARATE CONDUIT FROM POWER CONDUCTORS.
5	OCCUPANCY SENSORS SHALL BE MOUNTED ON A VIBRATION FREE SURFACE AND SHALL BE LOCATED AT LEAST 6'-0" FROM DIFFUSERS.
6	REFER TO SPECIFICATION SECTION 265100 FOR MOUNTING / SUPPORT REQUIREMENTS FOR LUMINAIRES.
7	LUMINAIRES DESIGNATED AS "NL" SHALL BE CONSTANT ON LUMINAIRES, ALL OTHER EGRESS LUMINAIRES SHALL BE SWITCHED WITH THE NORMAL LIGHTING WITHIN THE SAME SPACE.

SHEET KEYNOTES

1	EXISTING LUMINAIRE SHALL BE REINSTALLED IN NEW CEILING. IN ADDITION, LUMINAIRE SHALL BE RETROFITTED WITH LED LIGHTBAR KITS (QUANTITY AS REQUIRED BASED ON LUMINAIRE LENGTH). REFER TO LUMINAIRE SCHEDULE FOR ADDITIONAL INFORMATION.
2	ROUTE CIRCUIT THROUGH A DEDICATED LIGHTING RELAY PACK MOUNTED ADJACENT TO PANELBOARD WH (REFER TO LOCATION ON SHEET EL404).
3	REMOTE MOUNTED BATTERY INVERTER FOR OL3E LUMINAIRE. TYPICAL OF 3.
4	PROVIDE AIRCRAFT CABLE AS REQUIRED FOR SUSPENDING LUMINAIRES L9/L9E AT 17' 0" AFF.
5	REFER TO SITE PLANS (SHEETS ES102 AND ES401) FOR CONDUITS ASSOCIATED WITH SITE LIGHTING, ACCESS CONTROL, INTERCOM, VIDEO SURVEILANCE, AND GATE BRANCH POWER ENTERING THE BUILDING VIA THE INDICATED COLUMN. PATCH, REPAIR, AND PAINT AS REQUIRED (COORDINATE WITH GENERAL CONTRACTOR).
6	EXTEND CONDUIT OVERHEAD TO DESIGNATED EQUIPMENT (PANELBOARDS, EQUIPMENT RACKS AND ACCESS CONTROL PANELS) AS NOTED.
7	ROUTE CIRCUIT THROUGH LIGHTING CONTACTOR (ELECTRICAL ROOM 129). PROVIDE UNSWITCHED CONDUCTOR FOR BATTERY INVERTERS.
8	AS PART OF THE LIGHITNG CONTROLS, PROVIDE AN AUXILARY RELAY WITH "RESTROOM OCCUPIED" STATUS OUTPUT TO THE BAS CONTROL PANEL (COMPUTER/SERVER 261). COORDINATE REQUIREMENTS WITH THE TEMPERATURE CONTROLS CONTRACTOR.
9	ROUTE CIRCUIT THROUGH LIGHTING CONTACTOR (ELECTRICAL ROOM 129).
10	JUNCTION BOXES FOR OL7 LUMINAIRES SHALL BE LOCATED BEHIND PARAPET WALL ON ROOF.
11	MOUNT OL7 LUMINAIRES 2' ABOVE TOP OF BUILDING SIGNAGE. COORDINATE WITH ARCHITECTURAL DRAWINGS.

SHEET KEYNOTES

1	EXISTING LUMINAIRE SHALL BE RETROFITTED WITH LED LIGHTBAR KITS (QUANTITY AS REQUIRED BASED ON LUMINAIRE LENGTH). REFER TO LUMINAIRE SCHEDULE FOR ADDITIONAL INFORMATION.
2	EXISTING LUMINAIRE SHALL BE RELOCATED FROM EXISTING SALES & MARKETING ROOM 11FF29 (REFER TO SHEET ED401).
3	TAPE LIGHT W/ MOUNTING CHANNEL (MOUNT ABOVE SOFFIT). PROVIDE POWER SUPPLY AND CONNECTORS AS REQUIRED.
4	MOUNT L6/L6A LUMINAIRES ABOVE THE EXISTING PARABOLIC LOUVERS.
5	PROVIDE LED DOWNLIGHT RETROFIT KIT FOR EXISTING DOWNLIGHT HOUSING.
6	MOUNT OL1E LUMINAIRE AT 12' 6" AFF (TO CENTERLINE).
7	REPAIR, PATCH AND PAINT CEILING AFTER INSTALLATION OF NEW DOWNLIGHTS.
8	ROUTE CIRCUIT THROUGH LIGHTING CONTACTOR (ELECTRICAL ROOM 129). PROVIDE UNSWITCHED CONDUCTOR FOR BATTERY INVERTERS.
9	EXTERIOR LIGHTING CONTROLS (3-POSITION SWITCH, 8-POLE LIGHTING CONTACTOR, AND ASTRONOMICAL TIME CLOCK). REFER TO LIGHTING CONTROL CIRCUIT DETAIL ON SHEET EL503.
10	PHOTOCELL FOR EXTERIOR LIGHTING CONTROLS. MOUNT IN EXISTING SOFFIT (AIM ACCORDINGLY DUE TO LOCATION).
11	AS PART OF THE LIGHITNG CONTROLS, PROVIDE AN AUXILIARY RELAY WITH "RESTROOM OCCUPIED" STATUS OUTPUT TO THE BAS CONTROL PANEL (COMPUTER/SERVER 261). COORDINATE REQUIREMENTS WITH THE TEMPERATURE CONTROLS CONTRACTOR.
12	MOUNT OL1/OL1E LUMINAIRE AT 16' 6" AFF.

1 FIRST LEVEL - LIGHTING PLAN - AREA C
SCALE: 1/8" = 1'-0"

GENERAL NOTES:

1	REFER TO POWER PLANS FOR PANELBOARD LOCATIONS.
2	REFER TO LIGHTING CONTROL DETAILS ON SHEET EL501 THROUGH EL503.
3	PROVIDE AN UNSWITCHED LIGHTING CONDUCTOR TO EACH LUMINAIRE CONTAINING AN EMERGENCY BATTERY DRIVER.
4	0-10VDC DIMMING CONDUCTORS (CLASS 2) HAVE NOT BEEN SHOWN; HOWEVER, SHALL BE PROVIDED AS REQUIRED BY SHEET KEYNOTES AND/OR THE CONTROL DETAILS FOR EACH ROOM / AREA. DIMMING CONDUCTORS SHALL BE ROUTED IN SEPARATE CONDUIT FROM POWER CONDUCTORS.
5	OCCUPANCY SENSORS SHALL BE MOUNTED ON A VIBRATION FREE SURFACE AND SHALL BE LOCATED AT LEAST 6'-0" FROM DIFFUSERS.
6	REFER TO SPECIFICATION SECTION 265100 FOR MOUNTING / SUPPORT REQUIREMENTS FOR LUMINAIRES.
7	LUMINAIRES DESIGNATED AS "NL" SHALL BE CONSTANT ON LUMINAIRES, ALL OTHER EGRESS LUMINAIRES SHALL BE SWITCHED WITH THE NORMAL LIGHTING WITHIN THE SAME SPACE.

SHEET KEYNOTES

1	EXISTING LUMINAIRE SHALL BE RETROFITTED WITH LED LIGHTBAR KITS (QUANTITY AS REQUIRED BASED ON LUMINAIRE LENGTH). REFER TO LUMINAIRE SCHEDULE FOR ADDITIONAL INFORMATION.
2	EXISTING LUMINAIRE SHALL BE RELOCATED FROM EXISTING SALES & MARKETING ROOM 11FF29 (REFER TO SHEET ED401).
3	MOUNT OL2/OL2E LUMINAIRES AS HIGH AS POSSIBLE BELOW EXISTING CANOPY.
4	MOUNT L6/L6A LUMINAIRES ABOVE THE EXISTING PARABOLIC LOUVERS.
5	SWITCH L1/L1E LUMINAIRES WITH LUMINAIRES IN FILE AREA/WORKROOM 215.
6	MOUNT OL1/OL1E LUMINAIRE AT 16' 6" AFF.
7	MOUNT OL1E LUMINAIRES AS HIGH AS POSSIBLE BELOW EXISTING CANOPY.
8	PROVIDE AIRCRAFT CABLE AS REQUIRED FOR SUSPENDING LUMINAIRES L9/L9E AT 17' 0" AFF.
9	AS PART OF THE LIGHITNG CONTROLS, PROVIDE AN AUXILARY RELAY WITH "RESTROOM OCCUPIED" STATUS OUTPUT TO THE BAS CONTROL PANEL (COMPUTER/SERVER 261). COORDINATE REQUIREMENTS WITH THE TEMPERATURE CONTROLS CONTRACTOR.
10	ROUTE CIRCUIT THROUGH LIGHTING CONTACTOR (ELECTRICAL ROOM 129). PROVIDE UNSWITCHED CONDUCTOR FOR BATTERY INVERTERS.

SCALE: 1/8" = 1'-0"

PLAN NORTH

AREA KEY PLAN

GENERAL NOTES:

1	REFER TO ONE-LINE DIAGRAMS (AND/OR PANELBOARD SCHEDULES) FOR CONDUIT/CONDUCTOR SIZES FOR BRANCH PANELBOARD FEEDERS AND INDICATED BRANCH CIRCUITS.
2	INDIVIDUAL HOMERUNS HAVE BEEN SHOWN FOR EACH CIRCUIT FOR CLARITY. CONTRACTOR MAY CHOOSE TO COMBINE UP TO THREE (3) 20A/120V BRANCH CIRCUITS IN A COMMON CONDUIT WITHOUT UPSIZING CONDUCTORS. EACH CIRCUIT SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR-CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.
3	COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.

SHEET KEYNOTES

1	NEW BRANCH PANELBOARD SR1 (100A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
2	NEW BRANCH PANELBOARD SR2 (200A MCB, 208Y/120V. 3-PHASE, 4-WIRE).
3	NEW BRANCH PANELBOARD SR1 ELECTRICAL FEEDER. REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-601.
4	NEW BRANCH PANELBOARD SR2 ELECTRICAL FEEDER. REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-601.
5	PROVIDE 3/4" X 10' COPPER GROUND RODS IN TRIAD CONFIGURATION, MINIMUM 10' APART.
6	BARE #6 COPPER GROUNDING ELECTRODE CONDUCTOR - EXTEND FROM PANELBOARD SR1 TO GROUNDING TRIAD.
7	BARE #4 COPPER GROUNDING ELECTRODE CONDUCTOR - EXTEND FROM PANELBOARD SR2 TO GROUNDING TRIAD.
8	PROVIDE MANUAL MOTOR STARTER FOR THE NEW OVERHEAD DOOR OPERATOR. PROVIDE CONNECTION TO OVERHEAD DOOR CONTROLLER, AS REQUIRED. COORDINATE WITH OVERHEAD DOOR INSTALLER. REFER TO FIELD CONNECTION DETAIL 5 ON SHEET E-501 FOR ADDITIONAL INFORMATION.
9	UP/DOWN/STOP PUSHBUTTON FOR OVERHEAD DOOR. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
10	PROVIDE CONNECTION TO OVERHEAD DOOR SAFETY BEAM PHOTO SENSOR. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
11	PROVIDE CONNECTION TO OVERHEAD DOOR SENSING EDGE. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
12	MOUNT RECEPTACLES WITHIN THIS SPACE AT 46"AFF.
13	ROUTE THE 120V CIRCUIT SERVING THE EXHAUST FAN THROUGH A N.O. CONTACT ON THE FACTORY MOUNTED DAMPER CONTROL TRANFORMER INTEGRAL TO THE ASSOCIATED EXHAUST FAN AND PROVIDE CONNECTION TO THE MOTORIZED DAMPER.
14	PROVIDE JUNCTION BOX MOUNTED ON COLUMN ABOVE CONCRETE BASE. PROVIDE ONE BLOCK HEATER RECEPTACLE DROP. REFER TO DETAIL 6, SHEET E-501.
15	PROVIDE JUNCTION BOX MOUNTED ON COLUMN ABOVE CONCRETE BASE. PROVIDE TWO BLOCK HEATER RECEPTACLE DROPS. REFER TO DETAIL 6, SHEET E-501.
16	PROVIDE TWO (2) 4" SPARE CONDUITS WITH PULLSTRING BETWEEN LFUCG EXTERIOR STRUCTURES. STUB INTO SPACE AS SHOWN.

1 ADD ALTERNATE #1 -FIRST LEVEL - POWER PLAN

SCALE: 1/8" = 1'-0"

ADD ALTERNATE #1:

1	ADD ALTERNATE #1 WILL REQUIRE THE WORK SHOWN ON THE BASE BID DRAWING (SHEET EP101) AND THE ADDITIONAL WORK SHOWN ON THIS SHEET FOR THE THIRD CANOPY. THIS SHEET INCLUDES ALTERNATE ROUTING FOR PANELBOARD FEEDERS SR1 AND SR2.

GENERAL NOTES:

1	REFER TO ONE-LINE DIAGRAMS (AND/OR PANELBOARD SCHEDULES) FOR CONDUIT/CONDUCTOR SIZES FOR BRANCH PANELBOARD FEEDERS AND INDICATED BRANCH CIRCUITS.
2	INDIVIDUAL HOMERUNS HAVE BEEN SHOWN FOR EACH CIRCUIT FOR CLARITY. CONTRACTOR MAY CHOOSE TO COMBINE UP TO THREE (3) 20A/120V BRANCH CIRCUITS IN A COMMON CONDUIT WITHOUT UPSIZING CONDUCTORS. EACH CIRCUIT SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR-CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.
3	COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.

SHEET KEYNOTES

1	NEW BRANCH PANELBOARD SR1 ELECTRICAL FEEDER. REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-601.
2	NEW BRANCH PANELBOARD SR2 ELECTRICAL FEEDER. REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-601.
3	NEW BRANCH PANELBOARD SR3 (60A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
4	NEW BRANCH PANELBOARD SR3 ELECTRICAL FEEDER. REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-601.
5	PROVIDE 3/4" X 10' COPPER GROUND RODS IN TRIAD CONFIGURATION, MINIMUM 10' APART.
6	BARE #8 COPPER GROUNDING ELECTRODE CONDUCTOR - EXTEND FROM PANELBOARD SR3 TO GROUNDING TRIAD.
7	MOUNT CANOPY RECEPTACLES ON COLUMN ABOVE CONCRETE BASE.
8	MOUNT RECEPTACLE IN TELECOMMUNICATIONS CABINET.
9	PROVIDE TWO (2) 4" SPARE CONDUITS WITH PULLSTRING BETWEEN LFUCG EXTERIOR STRUCTURES. STUB INTO SPACE AS SHOWN.
10	PROVIDE ONE (1) 4" SPARE CONDUIT WITH PULLSTRING TO THE LFUCG CANOPY STRUCTURE. STUB INTO SPACE AND AT COLUMN AS SHOWN.

1 FIRST LEVEL - POWER PLAN - AREA C

SCALE: 1/8" = 1'-0"

GENERAL NOTES:

1	WORK SHOWN IN LIGHT PEN (SHADED) IS EXISTING TO REMAIN EQUIPMENT / DEVICES. WORK SHOWN IN HEAVY PEN (BOLD) IS NEW WORK; HOWEVER, MAY BE NEW EQUIPMENT OR REINSTALLATION OF EXISTING DEVICES (AS NOTED).
2	REFER TO ONE-LINE DIAGRAMS (AND/OR PANELBOARD SCHEDULES) FOR CONDUIT/CONDUCTOR SIZES FOR BRANCH PANELBOARD FEEDERS AND INDICATED BRANCH CIRCUITS.
3	INDIVIDUAL HOMERUNS HAVE BEEN SHOWN FOR EACH CIRCUIT FOR CLARITY. CONTRACTOR MAY CHOOSE TO COMBINE UP TO THREE (3) 20A/120V BRANCH CIRCUITS IN A COMMON CONDUIT WITHOUT UPSIZING CONDUCTORS. EACH CIRCUIT SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR-CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.
4	COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.
5	COORDINATE EXACT LOCATION OF RECEPTACLES, EQUIPMENT CONNECTIONS, DEVICES, ETC. WITH ARCHITECT APPROVED CASEWORK / EQUIPMENT SHOP DAWINGS PRIOR TO ROUGH-IN.
6	PROVIDE FIRE STOP FOR PENETRATIONS OF FIRE RATED WALLS AND FLOORS. REFER TO LOCATIONS ON ARCITECTURAL DRAWINGS.

SHEET KEYNOTES

1	DEDICATED RECEPTACLE FOR COPIER MACHINE.
2	DRYER RECEPTACLE - PROVIDE 30AMP, 125/250V, 3-POLE, 4-WIRE RECEPTACLE (NEMA 14-30R). CONTRACTOR SHALL PROVIDE MATCHING DRYER POWER SUPPLY CORD COMPLETE WITH PLUG (NEMA 14-30P).
3	DEDICATED WASHER RECEPTACLE.
4	30A/600V/3-PHASE NON-FUSED DISCONNECT SWITCH (NEMA 1 ENCLOSURE). PROVIDE CONNECTION TO OVERHEAD DOOR CONTROLLER, AS REQUIRED. COORDINATE REQUIREMENTS WITH OVERHEAD DOOR INSTALLER. REFER TO FIELD CONNECTION DETAIL 1 ON SHEET E-504 FOR ADDITIONAL INFORMATION.
5	UP/DOWN/STOP PUSHBUTTON FOR OVERHEAD DOOR. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
6	PROVIDE CONNECTION TO OVERHEAD DOOR SAFETY BEAM PHOTO SENSOR. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
7	PROVIDE CONNECTION TO OVERHEAD DOOR SENSING EDGE. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
8	MOUNT RECEPTACLE 4" ABOVE COUNTERTOP / BACKSPLASH. COORDINATE WITH ARCHITECTURAL DRAWINGS AND APPROVED CASEWORK SHOP DRAWINGS PRIOR TO ROUGH-IN.
9	CONTRACTOR SHALL PROVIDE RECESSED JUNCTION BOX WITH BLANK COVERPLATE. PROVIDE COVERPLATE WITH KQ FOR FLEXIBLE CONNECTION TO WORKSTATION RECEPTACLES (UTILIZE CIRCUITS SHOWN).
10	PROVIDE AND INSTALL RECEPTACLE WITHIN WORKSTATION/DESK. COORDINATE WITH APPROVED WORKSTATION SHOP DRAWINGS.
11	BACKFEED EXISTING RECEPTACLES FROM A NEW 120V CIRCUIT.
12	DEDICATED RECEPTACLE FOR WALL-MOUNTED TV. MOUNT RECEPTACLE AT 72" AFF.
13	THE EXISTING EWC DOES NOT APPEAR TO BE GFCI PROTECTED. PROVIDE A BLANK FACE GFCI RECEPTACLE. INTERCEPT THE EXISTING CIRCUIT AND REFED THE EXISTING RECEPTACLE(S) FROM THIS NEW GFCI RECEPTACLE.
14	DEDICATED RECEPTACLE FOR WORKBENCH. MOUNT RECEPTACLE AT 48" AFF.
15	DEDICATED SIMPLEX RECEPTACLE (NEMA L5-30R) FOR WORKBENCH. MOUNT RECEPTACLE AT 48" AFF.
16	WELDING / HOT WORK AREA - COORDINATE RECEPTACLES AND DISCONNECT SWITCHES FOR AIR COMPRESSOR, WELDERS, AND WORKBENCH TOOLS WITH LFUCG PRIOR TO ROUGH-IN.
17	ROUTE THE 120V CIRCUIT THROUGH A CONTROL MODULE PROVIDED AS PART OF THE BAS SYSTEM.
18	NEW PANELBOARD WHR2 TRANSFORMER (45KVA, 480V X 240Y/120V, 3-PHASE, 4-WIRE).
19	4" CONCRETE HOUSEKEEPING PAD.
20	MIG WELDER - 60A/240V/3-PHASE FUSED DISCONNECT SWITCH (NEMA 1 ENCLOSURE). FUSED AT 40 AMPS. ALSO, PROVIDE 50A, 250V, 2-POLE, 3-WIRE RECEPTACLE (NEMA 6-50R).
21	MOUNT INDICATED RECEPTACLE AT 72" AFF.

15	BARE #2 COPPER GROUNDING CONDUCTOR - EXTEND FROM PANELBOARD VR1 TRANSFORMER ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO GROUNDING ELECTRODE CONDUCTOR.
16	BARE #6 COPPER GROUNDING CONDUCTOR - EXTEND FROM PANELBOARD VR2 TRANSFORMER ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO GROUNDING ELECTRODE CONDUCTOR.
17	BARE #6 GROUND FROM TMGB ("LFCUG VACTOR BUILDING", SHEET ET101 03) TO GROUNDING ELECTRODE CONDUCTOR.
18	PROVIDE 2" CONDUIT WITH 12-STRAND SINGLEMODE (OS2) OPTICAL FIBER FROM TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER/SERVER 261 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET ET402 01) TO TELECOMMUNICATIONS EQUIPMENT CABINET (PRE-MANUFACTURED STORAGE UNIT 102 - "LFUCG VACTOR BUILDING", SHEET ET101 03).
19	PROVIDE CAT 6, 1"C FROM TELECOMMUNICATIONS EQUIPMENT CABINET (PRE-MANUFACTURED STORAGE UNIT 102 - "LFUCG VACTOR BUILDING", SHEET ET101 03) TO ACCESS CONTROL PANEL (STORAGE 105 - "LFUCG EXTERIOR STRUCTURES", SHEET EY101 02).
20	PROVIDE 1-1/2" CONDUIT WITH PULL STRING FROM THE VACTOR STORAGE 101 ("LFUCG VACTOR BUILDING", SHEET EY101 03) TO SM STORAGE F 106 ("LFUCG EXTERIOR STRUCTURES", SHEET EY101 02). CONTROLS CONTRACTOR SHALL UTILIZE FOR BAS NETWORK CABLING.
21	PROVIDE FIVE (5) CAT 6 CABLES (CAMERAS) IN 1-1/2"C FROM TELECOMMUNICATIONS EQUIPMENT RACK (PRE-MANUFACTURED STORAGE UNIT 102 - "LFUCG VACTOR BUILDING", SHEET EY101 03) TO CAMERAS AT THE EXTERIOR STRUCTURES (COLUMN G8 - "LFUCG EXTERIOR STRUCTURES", SHEET EY 101 02).
22	PROVIDE SIX (6) CAT 6 CABLES (CAMERAS) IN 1-1/2"C FROM TELECOMMUNICATIONS EQUIPMENT RACK (PRE-MANUFACTURED STORAGE UNIT 102 - "LFUCG VACTOR BUILDING", SHEET EY101 03) TO CAMERAS AT THE EXTERIOR STRUCTURES (COLUMN E18 - "LFUCG EXTERIOR STRUCTURES", SHEET EY 101 02).
23	POLE-MOUNTED SECURITY CAMERA(S) AND NEMA 4X SURVEILLANCE CABINET (CAMERA AND CAMERA MOUNT PROVIDED BY OWNER AS PART OF A SEPARATE CONTRACT). CONTRACTOR SHALL PROVIDE NEMA 4X SURVEILLANCE CABINET INCLUDING MEDIA CONVERTER SWITCH, POE INJECTOR AND 12VDC POWER SUPPLY. REFER TO DETAIL 1, SHEET EY502 01 FOR ADDITIONAL INFORMATION.
24	POLE-MOUNTED SECURITY CAMERA(S) - CAMERA AND CAMERA MOUNT PROVIDED BY OWNER AS PART OF A SEPARATE CONTRACT. REFER TO DETAIL 2, SHEET EY502 01 FOR ADDITIONAL INFORMATION.
25	PROVIDE ONE (1) 4-STRAND SINGLEMODE (OS2) OPTICAL FIBER IN 1"C FROM POLE-MOUNTED SECURITY CAMERAS TO TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER/SERVER 261 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET ET402 01).
26	PROVIDE CAT 6, 1" C FROM POLE-MOUNTED SECURITY CAMERAS TO TELECOMMUNICATIONS EQUIPMENT RACK (IDF 287 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET ET401 01).
27	REFER TO ENLARGED DETAIL FOR ADDITIONAL WORK WITHIN THIS AREA.
28	SLIDE GATE NO. 1 CARD READERS (ACCESS CONTROL) - TWO (2) 6C#18 SHIELDED CABLE, 1-1/4"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (IDF 287 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET EY401 01).
29	SLIDE GATE NO. 1 OPERATOR BRANCH CIRCUIT (480V) FROM PANELBOARD L1 (ELECTRICAL ROOM 129 -"LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET EP402 01). UTILIZE 3#12, 1#12 GND, 1"C.
30	SLIDE GATE NO. 1 OPERATOR CONTROL (REMOTE / ACCESS CONTROL) - 2#12, 1#12 GND, 1"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (IDF 287 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET EY401 01).
31	PROVIDE 2" CONDUIT WITH 12-STRAND SINGLEMODE (OS2) OPTICAL FIBER FROM TELECOMMUNICATIONS EQUIPMENT CABINET (SITE) TO THE TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER / SERVER 261 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING" - SHEET ET402 01).
32	AS A RESULT OF THE DEMOLITION PHASE, IT IS ANTICIPATED THAT THE EXISTING CIRCUIT SERVING THE FACILITY SIGN WILL BE DEMOLISHED. CONTRACTOR SHALL PROVIDE NEW CONDUIT/WIRING (MATCH EXISTING) TO BACKFEED FROM CIRCUIT INDICATED. ROUTE NEW WIRING THROUGH A NEW LIGHTING CONTACTOR INSTALLED IN ELECTRICAL ROOM 129 (SHEET EL402 01). REFER TO EXTERIOR LIGHTING CONTROLS - DETAIL LC-17, SHEET EL503 01.
33	POE INJECTOR CIRCUIT (120V) FROM INDICATED PANELBOARD. UTILIZE FOR POLE-MOUNTED CAMERA.
34	ROUTE CONDUIT WITHIN EFIS SYSTEM AT COLUMN. PATCH, REPAIR, AND PAINT AS REQUIRED. COORDINATE WITH GENERAL CONTRACTOR.
35	EXTEND CONDUIT ABOVE EXISTING SOFFIT TO DESIGNATED EQUIPMENT (PANELBOARDS, EQUIPMENT RACKS, AND ACCESS CONTROL PANELS) AS NOTED.
36	120V CIRCUIT FOR TELECOMMUNICATIONS EQUIPMENT CABINET (SITE). CONNECT TO 20A/1P BREAKER IN PANELBOARD RP1B - UTILIZE 2#8, 1#8 GND, 1"C.
37	PROVIDE 4" CONDUIT WITH PULL STRING FROM PROPERTY LINE TO ELECTRICAL ROOM 129 ("LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET ET402 01) FOR OPTICAL FIBER SERVICE. CONTRACTOR SHALL CONCRETE ENCASE UNDER DRIVE; HOWEVER CONCRETE ENCASEMENT IS NOT REQUIRED BELOW THE SIDEWALK. REFER TO TRENCHING DETAILS ON SHEET E-504. LFUCG WILL PROVIDE AND INSTALL OPTICAL FIBER CABLE.
38	CAP 4" CONDUIT AT PROPERTY LINE.
39	PROVIDE A 36" X 36" CONCRETE HANDHOLE FOR OPTICAL FIBER CONDUIT. REFER TO DETAIL 7, SHEET E-501 01 FOR ADDITIONAL INFORMATION.
40	CONTRACTOR SHALL CORE DRILL BUILDING FOUNDATION AS REQUIRED TO ENTER BUILDING.
41	RACK-MOUNTED TELECOMMUNICATIONS EQUIPMENT CABINET (SITE). REFER TO SHEET ET604 01 AND DIVISION 27 SPECIFICATIONS FOR ADDITIONAL INFORMATION.
42	PROVIDE CAT 6, 1"C FROM CAMERA TO TELECOMMUNICATIONS EQUIPMENT CABINET (SITE).
43	PROVIDE TWO (2) CAT 6 CABLES FROM CAMERAS TO TELECOMMUNICATIONS EQUIPMENT CABINET (SITE).
44	PROVIDE TWO (2) 120V CONNECTIONS TO THE NEW POST/PANEL SIGNAGE PROVIDED AS PART OF THIS PROJECT. ROUTE CIRCUITS THROUGH A NEW LIGHTING CONTACTOR INSTALLED IN ELECTRICAL ROOM 129 (SHEET EL402 01). REFER TO EXTERIOR LIGHITNG CONTROLS - DETAIL LC-17, SHEET EL503 01.
45	REFER TO SHEET ES103 01 FOR MODIFICATIONS REQUIRED AS PART OF ADD ALTERNATE #1 FOR THIS AREA.
46	PROVIDE TWO (2) 36" X 36" CONCRETE HANDHOLES FOR POWER AND OPTICAL FIBER CONDUIT. LOCATE OUTSIDE VEHICULAR TRAFFIC. REFER TO DETAIL 7, SHEET E-501 01 FOR ADDITIONAL INFORMATION.
47	PROVIDE TWO (2) 4" SPARE CONDUITS WITH PULLSTRING FROM LFUCG DWQ HEADQUARTERS & OPERATIONS FACILITY TO THE LFUCG EXTERIOR STRUCTURES. AT THE DWQ HEADQUARTERS & OPERATIONS FACILITY, EXTEND CONDUIT INTO BUILDING AND ROUTE OVERHEAD INTO MECHANICAL / ELECTRICAL ROOM 301 (SHEET EP404 01). AT THE EXTERIOR STRUCTURES, EXTEND CONDUIT INTO BUILDING AND ROUTE OVERHEAD INTO PS STORAGE B 102 (SHEET EP101 02).

GENERAL NOTES:

1	MINIMUM BURY FOR ALL SITE CONDUITS SHALL BE 24", UNLESS OTHERWISE NOTED. REFER TO TRENCHING DETAILS ON SHEET E-504 01 FOR ADDITIONAL INFORMATION.
2	SEE INDIVIDUAL BUILDING/STRUCTURE DRAWINGS FOR ALL REQUIRED CONDUITS/CONDUCTORS/CABLES ENTERING AND LEAVING AREAS.
3	LOCATE ALL EXISTING UNDERGROUND UTILITIES AND COORDINATE WITH GENERAL CONTRACTOR FOR ALL UNDERGROUND WORK PRIOR TO ANY EXCAVATION OR TRENCHING. MAINTAIN A MINIMUM 12" SEPARATION FROM OTHER UTILITIES, UNLESS OTHERWISE NOTED.
6	CONTRACTOR SHALL SAWCUT EXISTING PAVEMENT / DRIVEWAYS AS REQUIRED FOR NEW UNDERGROUND CONDUITS.
7	ALL EXPOSED CONDUIT SHALL BE GALVANIZED RIGID STEEL AND UNDERGROUND CONDUIT SHALL BE SCHEDULE 80 PVC.
8	PROVIDE CONCRETE BASE AND GROUNDING FOR ALL POLE-MOUNTED LUMINAIRES. REFER TO DETAIL 8, SHEET E-502 01.

SHEET KEYNOTES

1	EXISTING UTILITY POLE AND ASSOCIATED GUY WIRE(S) SHALL REMAIN.
2	KENTUCKY UTILITIES (KU) WILL REMOVE THE EXISTING UTILITY POLE AND ASSOCIATED GUY WIRE(S).
3	EXISTING OVERHEAD UTILITIES SHALL REMAIN.
4	KENTUCKY UTILITIES (KU) WILL RELOCATE THE EXISTING OVERHEAD ELECTRICAL PRIMARY.
5	EXISTING PAD-MOUNTED TRANSFORMER SHALL REMAIN.
6	EXISTING OVERHEAD ELECTRICAL SECONDARY SERVING THE FACILITY SHALL REMAIN.
7	EXISTING 1200A ENCLOSED CIRCUIT BREAKER (SERVICE ENTRANCE RATED) SHALL REMAIN.
8	EXISTING ELECTRICAL METER SHALL REMAIN.
9	EXISTING POLE-MOUNTED LUMINAIRE SHALL REMAIN.
10	EXISTING TELEPHONE CABINET(S) SHALL REMAIN.
11	POLE-MOUNTED SECURITY CAMERA(S) AND NEMA 4X SURVEILLANCE CABINET (CAMERA AND CAMERA MOUNT PROVIDED BY OWNER AS PART OF A SEPARATE CONTRACT). CONTRACTOR SHALL PROVIDE NEMA 4X SURVEILLANCE CABINET INCLUDING MEDIA CONVERTER SWITCH, POE INJECTOR AND 12VDC POWER SUPPLY. REFER TO DETAIL 1, SHEET EY502 01 FOR ADDITIONAL INFORMATION.
12	PANELBOARD VL1 ELECTRICAL FEEDER - ROUTED FROM DISTRIBUTION PANELBOARD DP ("LFUCG DWQ HEADQUARTERS & OPERATIONS FACILITY", SHEET EP404 01) TO PANELBOARD VL1 ("LFUCG VACTOR BUILDING", SHEET EP101 03). REFER TO CONDUIT/CONDUCTOR INFORMATION ON ELECTRICAL ONE-LINE DIAGRAM III - NEW WORK, SHEET E-606 01).
13	PROVIDE 2" CONDUIT WITH 12-STRAND SINGLEMODE (OS2) OPTICAL FIBER FROM TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER/SERVER 261 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET ET402 01) TO TELECOMMUNICATIONS EQUIPMENT CABINET (PRE-MANUFACTURED STORAGE UNIT 102 - "LFUCG VACTOR BUILDING", SHEET ET101 03).
14	PROVIDE ONE (1) 4-STRAND SINGLEMODE (OS2) OPTICAL FIBER IN 1"C FROM POLE-MOUNTED SECURITY CAMERAS TO TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER/SERVER 261 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET ET402 01).
15	REFER TO ENLARGED DETAIL FOR ADDITIONAL WORK WITHIN THIS AREA.
16	POE INJECTOR CIRCUIT (120V) FROM INDICATED PANELBOARD. UTILIZE FOR POLE-MOUNTED CAMERA.
17	REMOVE AND PROPERLY DISPOSE OF EXISTING POLE-MOUNTED LUMINAIRE AND ASSOCIATED POLE BASE.
18	REMOVE AND PROPERLY DISPOSE OF THE EXISTING TELEPHONE CABINET.
19	PROVIDE 3/4" X 10' COPPER GROUND RODS IN TRIAD CONFIGURATION, MINIMUM 10' APART.
20	BARE #2 COPPER GROUNDING ELECTRODE CONDUCTOR - EXTEND FROM PANELBOARD VL1 ("LFUCG VACTOR BUILDING", SHEET EP101 03).
21	BARE #2 COPPER GROUNDING CONDUCTOR - EXTEND FROM PANELBOARD VR1 TRANSFORMER ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO GROUNDING ELECTRODE CONDUCTOR.
22	BARE #6 COPPER GROUNDING CONDUCTOR - EXTEND FROM PANELBOARD VR2 TRANSFORMER ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO GROUNDING ELECTRODE CONDUCTOR.
23	BARE #6 GROUND FROM TMGB ("LFCUG VACTOR BUILDING", SHEET ET101 03) TO GROUNDING ELECTRODE CONDUCTOR.
24	PANELBOARD SR1 ELECTRICAL FEEDER - ROUTED FROM PANELOBARD VL1 ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO PANELBOARD SR1 ("LFUCG EXTERIOR STRUCTURES", EP102 02). REFER TO CONDUIT/CONDUCTOR INFORMATION ON ELECTRICAL ONE-LINE DIAGRAM - VACTOR BUILDING, SHEET E-601 03).
25	PANELBOARD SR2 ELECTRICAL FEEDER - ROUTED FROM PANELOBARD VL1 ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO PANELBOARD SR2 ("LFUCG EXTERIOR STRUCTURES", EP102 02). REFER TO CONDUIT/CONDUCTOR INFORMATION ON ELECTRICAL ONE-LINE DIAGRAM - VACTOR BUILDING, SHEET E-601 03).
26	PANELBOARD SR3 ELECTRICAL FEEDER - ROUTED FROM PANELOBARD VL1 ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO PANELBOARD SR3 ("LFUCG EXTERIOR STRUCTURES", EP102 02). REFER TO CONDUIT/CONDUCTOR INFORMATION ON ELECTRICAL ONE-LINE DIAGRAM - VACTOR BUILDING, SHEET E-601 03).
27	PROVIDE 1-1/2" CONDUIT WITH PULL STRING FROM THE VACTOR STORAGE 101 ("LFUCG VACTOR BUILDING", SHEET EY101 03) TO STORAGE C 103 ("LFUCG EXTERIOR STRUCTURES", SHEET EY102 02). CONTROLS CONTRACTOR SHALL UTILIZE FOR BAS NETWORK CABLING.
28	PROVIDE 2" CONDUIT WITH 12-STRAND SINGLEMODE (OS2) OPTICAL FIBER FROM TELECOMMUNICATIONS EQUIPMENT CABINET (PRE-MANUFACTURED STORAGE UNIT 102 - "LFUCG VACTOR BUILDING", SHEET ET101 03) TO TELECOMMUNICATIONS EQUIPMENT CABINET (SM STORAGE E 105 - "LFUCG EXTERIOR STRUCTURES", SHEET EY102 02).
29	LFUCG WILL PAY KU DIRECTLY FOR THEIR WORK. CONTRACTOR DOES NOT NEED TO INCLUDE THIS COST.
30	PROVIDE TWO (2) 36" X 36" CONCRETE HANDHOLES FOR POWER AND OPTICAL FIBER CONDUIT. LOCATE OUTSIDE VEHICULAR TRAFFIC. REFER TO DETAIL 7, SHEET E-501 01 FOR ADDITIONAL INFORMATION.
31	PROVIDE TWO (2) 4" SPARE CONDUITS WITH PULLSTRING FROM LFUCG DWQ HEADQUARTERS & OPERATIONS FACILITY TO THE LFUCG EXTERIOR STRUCTURES. AT THE DWQ HEADQUARTERS & OPERATIONS FACILITY, EXTEND CONDUIT INTO BUILDING AND ROUTE OVERHEAD INTO MECHANICAL / ELECTRICAL ROOM 301 (SHEET EP404 01). AT THE EXTERIOR STRUCTURES, EXTEND CONDUIT INTO BUILDING AND ROUTE OVERHEAD INTO PS STORAGE B 102 (SHEET EP101 02).

ADD ALTERNATE #1

1	ADD ALTERNATE #1 WILL REQUIRE THE WORK SHOWN ON THE BASE BID DRAWINGS (SHEET ES102 01 AND ES401 01); HOWEVER, WORK SHALL BE MODIFIED AS SHOWN ON THIS DRAWING FOR THE ALTERNATE LOCATION OF THE "LFUCG VACTOR BUILDING".

GENERAL NOTES:

1	MINIMUM BURY FOR ALL SITE CONDUITS SHALL BE 24", UNLESS OTHERWISE NOTED. REFER TO TRENCHING DETAILS ON SHEET E-504 01 FOR ADDITIONAL INFORMATION.
2	SEE INDIVIDUAL BUILDING/STRUCTURE DRAWINGS FOR ALL REQUIRED CONDUITS/CONDUCTORS/CABLES ENTERING AND LEAVING AREAS.
3	LOCATE ALL EXISTING UNDERGROUND UTILITIES AND COORDINATE WITH GENERAL CONTRACTOR FOR ALL UNDERGROUND WORK PRIOR TO ANY EXCAVATION OR TRENCHING. MAINTAIN A MINIMUM 12" SEPARATION FROM OTHER UTILITIES, UNLESS OTHERWISE NOTED.
6	CONTRACTOR SHALL SAW/CUT EXISTING PAVEMENT / DRIVEWAYS AS REQUIRED FOR NEW UNDERGROUND CONDUITS.
7	ALL EXPOSED CONDUIT SHALL BE GALVANIZED RIGID STEEL AND UNDERGROUND CONDUIT SHALL BE SCHEDULE 80 PVC.
8	PROVIDE CONCRETE BASE AND GROUNDING FOR ALL POLE-MOUNTED LUMINAIRES. REFER TO DETAIL 8, SHEET E-502 01.

8	PROVIDE CONCRETE BASE AND GROUNDING FOR ALL POLE-MOUNTED LUMINAIRES. REFER TO DETAIL 8, SHEET E-502 01.

SHEET KEYNOTES

1	SLIDE GATE OPERATOR BRANCH CIRCUIT (480V) FROM PANELBOARD L1 (SHEET EP402) - UTILIZE 3#12, 1#12 GND, 1"C.
2	SLIDE GATE OPERATOR CONTROL (REMOTE / ACCESS CONTROL) - 6#12, 1#12 GND, 1"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (IDF 287 - SHEET EY401).
3	SLIDE GATE OPERATOR (2HP, 460V/3-PHASE). PROVIDE 20'W X 30'L X 15"D CONCRETE PAD (COORDINATE REQUIREMENTS WITH MANUFACTURER AND PROVIDE COMPLETE).
4	3/4" X 10' GROUND ROD WITH #6 AWG COPPER GROUND CONDUCTOR. PROVIDE 1" PVC SLEEVE. TERMINATE ON GROUND LUG WITHIN OPERATOR.
5	PHOTO EYE SENSOR (TRANSMITTER OR RECEIVER) FOR LEADING END PROTECTION. COORDINATE LOCATION WITH GATE OPERATOR INSTALLER. MOUNT SIMILAR TO DETAIL 8, SHEET E-501.
6	PHOTO EYE SENSOR (TRANSMITTER OR RECEIVER) FOR TRAILING END PROTECTION. COORDINATE LOCATION WITH GATE OPERATOR INSTALLER. MOUNT SIMILAR TO DETAIL 8, SHEET E-501.
7	PROVIDE 3#12, 1#12 GND, 1"C FROM PHOTO EYE SENSOR TO THE GATE OPERATOR.
8	WIRED EDGE ENTRAPMENT SENSOR ON POST.
9	PROVIDE 3#12, 1#12 GND, 1"C FROM WIRED EDGE SENSOR TO THE GATE OPERATOR.
10	OBSTRUCTION LOOP (OR RESET LOOP). CONTRACTOR TO PROVIDE 1"C FROM GATE OPERATOR TO LOOP.
11	DUAL HEIGHT CARD READER/INTERCOM PEDESTAL WITH PROTECTION BOLLARD. COORDINATE SETBACK (18'-6") FROM GATE WITH LFUCG PRIOR TO ROUGH-IN. REFER TO DETAIL 1, SHEET EY503 FOR ADDITIONAL INFORMATION.
12	CARD READERS (ACCESS CONTROL) - TWO (2) 6C#18 SHIELDED CABLE, 1-1/4"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (IDF 287 - SHEET EY401).
13	INTERCOM DOOR STATIONS - PROVIDE TWO (2) CAT 6 IN 1"C FROM CARD READER/INTERCOM PEDESTAL TO IDF 287 (SHEET ET401).
14	SLIDE GATE OPERATOR BRANCH CIRCUIT (480V) FROM PANELBOARD M1 (SHEET EP404) - UTILIZE 3#12, 1#12 GND, 1"C.
15	SLIDE GATE OPERATOR CONTROL (REMOTE / ACCESS CONTROL) - 2#12, 1#12 GND, 1"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (COMPUTER/SERVER 261 - SHEET EY402).
16	ROUTE CONDUIT WITHIN EFIS SYSTEM AT COLUMN. PATCH, REPAIR, AND PAINT AS REQUIRED, COORDINATE WITH GENERAL CONTRACTOR.
17	EXTEND CONDUIT ABOVE EXISTING SOFFIT TO DESIGNATED EQUIPMENT (PANELBOARDS, EQUIPMENT RACKS, AND ACCESS CONTROL PANELS) AS NOTED.
18	CARD READERS (ACCESS CONTROL) - TWO (2) 6C#18 SHIELDED CABLE, 1-1/4"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (COMPUTER/SERVER 261 - SHEET EY402).
19	INTERCOM DOOR STATIONS - PROVIDE TWO (2) CAT 6 IN 1"C FROM CARD READER/INTERCOM PEDESTAL TO COMPUTER/SERVER 261 (SHEET ET402).
20	PEDESTRIAN GATE WITH ELECTRIFIED LATCH RETRACTION, POSITION SWITCH, AND CARD READER. PROVIDE CONDUIT/WIRING BACK TO POWER SUPPLY AND ASSOCIATED ACCESS CONTROL PANEL (COMPUTER/SERVER 261 - SHEET EY402). REFER TO DETAIL 2, SHEET EY503.
21	CARD READER/INTERCOM PEDESTAL. REFER TO DETAIL 3, SHEET EY503 FOR ADDITIONAL INFORMATION.
22	PEDESTRIAN GATE CONTROL (REMOTE / ACCESS CONTROL) - 4#14, 2#18, 1"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (COMPUTER/SERVER 261 - SHEET EY402).
23	BALANCED MAGNETIC SWITCH (MONITORING) - 2#18, 1"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (COMPUTER/SERVER 261 - SHEET EY402).
24	CARD READER (ACCESS CONTROL) - 6C#18 SHIELDED CABLE, 1"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (COMPUTER/SERVER 261 - SHEET EY402).
25	INTERCOM DOOR STATION - PROVIDE CAT 6 IN 1"C FROM CARD READER/INTERCOM PEDESTAL TO COMPUTER/SERVER 261 (SHEET ET402).
26	RACK-MOUNTED TELECOMMUNICATIONS EQUIPMENT CABINET (SITE). REFER TO SHEET ET604 01 AND DIVISION 27 SPECIFICATIONS FOR ADDITIONAL INFORMATION.
27	PROVIDE EQUIPMENT RACK SIMILAR TO DETAIL 9, SHEET E-501 FOR MOUNTING OF TELECOMMUNICATIONS EQUIPMENT CABINET.
28	PROVIDE 2" CONDUIT WITH 12-STRAND SINGLEMODE (OS2) OPTICAL FIBER FROM TELECOMMUNICATIONS EQUIPMENT CABINET (SITE) TO THE TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER / SERVER 261 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING" - SHEET ET402 01).
29	INTERCOM DOOR STATIONS - PROVIDE TWO (2) CAT 6 IN 1"C FROM CARD READER/INTERCOM PEDESTAL TO TELECOMMUNICATIONS EQUIPMENT CABINET (SITE).
30	MOUNT 120V RECEPTACLE IN TELECOMMUNICATIONS EQUIPMENT CABINET.
31	120V CIRCUIT FOR TELECOMMUNICATIONS EQUIPMENT CABINET (SITE). CONNECT TO 20A/1P BREAKER IN PANELBOARD RP1B - UTILIZE 2#8, 1#8 GND, 1"C.

GENERAL NOTES:

1	WORK SHOWN IN LIGHT PEN (SHADED) IS EXISTING TO REMAIN EQUIPMENT / DEVICES. WORK SHOWN IN HEAVY PEN (BOLD) IS NEW WORK; HOWEVER, MAY BE NEW EQUIPMENT OR REINSTALLATION OF EXISTING DEVICES (AS NOTED).
2	TELECOMMUNICATION DEVICE TAGS INDICATE THE ASSOCIATED CONFIGURATION TYPE. REFER TO SHEET ET501 FOR ADDITIONAL INFORMATION.
3	CONDUIT SHALL BE UTILIZED FOR HORIZONTAL CABLING TO ABOVE LAY-IN CEILINGS. CONTRACTOR SHALL TRANSITION FROM CONDUIT TO J-HOOKS / BRIDAL RINGS FOR ROUTING TO CABLE TRAY OR EQUIPMENT ROOM. CABLE TRAY AND J-HOOK / BRIDAL RING PATH SHALL BE COORDINATED WITH OTHER TRADES.
4	THE ENTIRE TELECOMMUNICATIONS SYSTEM INCLUDING OUTLETS, PATCH PANELS, ETC. SHALL BE LABELED IN ACCORANCE WITH TIA/EIA-606-A. LABELS SHALL BE MACHINE GENERATED.
5	CONDUIT ONLY SHALL BE UTILIZED ABOVE INACCESSIBLE CEILINGS AND EXPOSED STRUCTURES.
6	INSTALL NYLON BUSHINGS ON ALL CONDUITS TERMINATIONS FOR CABLE PROTECTION.
7	REFER TO DIVISION 27 SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

SHEET KEYNOTES

1	LOCATION OF OWNER PROVIDED / CONTRACTOR INSTALLED WIRELESS ACCESS POINT. PROVIDE 1-PORT KEYSTONE SURFACE MOUNTED BOX ABOVE CEILING.
2	MOUNT TELECOMMUNICATIONS OUTLET 4" ABOVE COUNTERTOP / BACKSPLASH. COORDINATE WITH ARCHITECTURAL DRAWINGS AND APPROVED CASEWORK SHOP DRAWINGS PRIOR TO ROUGH-IN.
3	TELECOMMUNICATIONS OUTLET FOR WALL-MOUNTED TV. MOUNT OUTLET AT 72" AFF.
4	PROVIDE 1-1/2"C WITH HDMI AND CAT 6 CABLES BETWEEN THE TELECOMMUNICATIONS OUTLETS (AV1/AV2).
5	CONTRACTOR SHALL PROVIDE RECESSED JUNCTION BOX WITH BLANK COVERPLATE. PROVIDE COVERPLATE WITH KO FOR FLEXIBLE CONNECTION TO WORKSTATION TELECOMMUNICATIONS OUTLETS.
6	LOCATION OF OWNER PROVIDED / CONTRACTOR INSTALLED WIRELESS ACCESS POINT. PROVIDE 1-PORT KEYSTONE SURFACE MOUNTED BOX - MOUNT TO BOTTOM OF STRUCTURE.
7	PROVIDE AND INSTALL TELECOMMUNICATIONS OUTLET WITHIN WORKSTATION/DESK. COORDINATE WITH APPROVED WORKSTATION SHOP DRAWINGS.
8	APPROXIMATE ROUTING OF THREE (3) EXISTING TELECOMMUNICATIONS CONDUITS (4"). CONTRACTOR MAY UTILIZE FOR THE 12-STRAND SINGLE-MODE OPTICAL FIBER (OS2) ROUTED TO THE "LFUCG VACTOR BUILDING". REFER TO SITE PLAN - ELECTRICAL NEW WORK, SHEET ES102 AND "LFUCG VACTOR BUILDING" - FIRST LEVEL - TELECOMMUNICATIONS PLAN, SHEET ET101 03 FOR CONTINUATION.

RE: Report of Geotechnical Exploration
LFUCG DWQ Headquarters and Operations Building
Lexington, Kentucky
L.E. Gregg Project Number: 2025032

Mr. Dugas,

L.E. Gregg Associates is pleased to present our report for the geotechnical exploration performed at the above referenced site. The attached report presents a review of the project information provided to us, a description of the site and subsurface conditions encountered, as well as any foundation and earthwork recommendations for the proposed project.

Unless prior arrangements are made, any remaining soil samples will be discarded shortly after the issue date of this report. Rock cores will be retained for a period of 12 months and then discarded.

We appreciate the opportunity to assist you on this project. If we can be of further service on this or other projects, please contact us.

Respectfully,

L.E. GREGG ASSOCIATES

Steven Mortimer, P.E.
Senior Engineer

Jason Ainslie, P.E.
President

1.0 INTRODUCTION

1.1 PURPOSE OF EXPLORATION

The purpose of this exploration was to determine the general subsurface conditions existing at the project site through a program of controlled drilling, sampling, and testing; and to evaluate these findings with respect to the project concept, design, and currently accepted engineering practices. The purpose and scope of work is based upon information provided by Richard Dugas with Lexington Fayette Urban County Government (LFUGC) and outlined in L.E. Gregg proposal P25-055, dated July 31, 2025. More specifically, the objectives are:

1. Determine depths to and elevations of the underlying bedrock surface beneath the proposed structures and the general geologic conditions existing at the site.

2. Determine existing surface and subsurface water conditions at the site and their relation to design, construction, and service of the proposed project.

3. Make general recommendations concerning design and construction based on the encountered conditions.

2.0 PROJECT INFORMATION

2.1 BACKGROUND INFORMATION

Project information was provided in a request for proposal to L.E. Gregg Associates from LFUCG. The proposed project is for the construction of a new structure for the LFUCG Division of Water Quality at the rear of 130 West New Circle Road.

2.2 SITE SURFACE CONDITIONS

In reviewing historical aerial images of the site, it appears that the shopping center was constructed sometime between 1960 and 1965. Since this time, the rear of the property in the area of the proposed construction has been relatively undisturbed. The majority of the ground surface was grass covered at the time of the field exploration. The site is bordered to the northeast and southeast by asphalt parking areas and the shopping center. It is bordered to the northwest by North Broadway and to the southwest by residential properties along Broadview Drive.

2.3 SITE GEOLOGY

Geologic information was referenced from the *Geologic map of the Lexington East quadrangle, Fayette and Bourbon Counties, Kentucky, 1968*. Materials underlying the site are of Lower to Middle Ordovician age and classified as belonging to the Tanglewood Limestone Member. The Tanglewood Limestone Member consists of limestone and shale. The limestone (80 percent), is generally light gray, medium to coarse grained, thin to thick bedded, phosphatic, bioclastic, and

very fossiliferous to sparingly fossiliferous. The shale is generally limy, medium gray, and mostly interlaminated with fine grained shaly limestone.

The karst potential in the vicinity of the site is characterized as intense. There are no mapped sinkholes located within the project area or in the immediate vicinity. It should be noted that sinkholes are common in this region and that caverns can extend laterally and may be unobserved from the ground surface.

There are no faults crossing the project area; however, there are several that lie along the east and southeast side of Lexington. Faults are common geologic structures across the Commonwealth of Kentucky and have been mapped in many counties. These faults represent seismic activity that has occurred several million years ago at the latest and there has been no activity along these faults in recorded history. Seismic risk associated with these faults is considered to be very low.

3.0 EXPLORATION FINDINGS

3.1 SUBSURFACE CONDITIONS

General

Field testing procedures were performed in general accordance with ASTM practices, procedures, and standards. The borings were advanced using 4 in. solid flight augers. Samples were recovered in the undisturbed material below the tip of the auger using the standard drive sample technique in accordance with ASTM D 1586 and the thin-walled tube sampling technique in accordance with ASTM D1587. A 2 in. O.D. (outside diameter) by 1 ⅜ in. I.D. (inside diameter) split-spoon sampler was driven a total of 18 in. with the number of blows of a 140 lb. hammer falling 30 in. recorded for each 6 in. of penetration. The sum of the blows for the final 12 in. of penetration is referred to as the Standard Penetration Test (SPT) result, also known as the N-value, or blow count, which is recorded in blows per foot (bpf). Split spoon samples were generally recovered at 0.0, 1.5, 4.0, 6.5, 9.0 ft., and at 5.0 ft. intervals thereafter. These intervals may be adjusted in the field if gravel, boulders, shot rock, asphalt, or concrete surfaces are encountered. The boreholes were backfilled immediately with auger cuttings and/or granular material for safety considerations.

Soil Conditions

The geotechnical exploration consisted of six (6) soil test borings, labeled B-1 thru B-6, and seven (7) rock line soundings, labeled S-1 thru S-7. Boring and sounding locations were located and staked in the field by L.E. Gregg Associates based on the provided layout. The approximate boring locations are shown on the boring layout in Appendix C.

The following subsurface descriptions are of a generalized nature in order to highlight the subsurface stratification features and material characteristics at the boring locations. The boring logs included in Appendix B of this report should be reviewed for specific information at each boring location. Information on actual subsurface conditions exists only at the specific boring locations and is relevant only to the time period that this exploration was performed. Variations may occur and should be expected at the site.

The subsurface conditions are separated between the two proposed structures are described as follows:

Asphalt paving sections were encountered at borings B-1 and B-2 from the surface to approximately 6 in.

Topsoil was encountered at the remaining locations from the surface to approximately 4 in.

Natural Soil materials consisting of lean clay materials were encountered in all of the borings from below the topsoil or asphalt paving materials to refusal depths. The materials consisted of clay materials with varying amounts of gravel and/or weathered rock. The soils were silty and/or sandy, firm to very stiff, and dry to slightly moist. The materials had Standard Penetration Test "N" blows ranging from 15 to 33 bpf and natural moisture contents ranging from 11.1 to 24.8 percent.

The results for the field exploration are summarized in Table 1.

Table 1 – Summary of Drilling Information

Location	*Elevation (ft.)	Refusal Depth (ft.)	Refusal Elevation (ft.)
B-1	975	2.3	972.7
B-2	975	3.7	971.3
B-3	978	2.8	975.2
B-4	979	3.5	975.5
B-5	979	3.3	975.7
B-6	979	3.9	975.1
S-1	979	2.8	976.2
S-2	980	3.5	976.5
S-3	981	2.5	978.5
S-4	980	3.0	977.0
S-5	981	2.0	979.0
S-6	976	4.6	971.4
S-7	980	1.5	978.5

Elevations are taken from the provided grading plan and are approximate.

Rock Conditions

All borings and soundings completed during this exploration were advanced to refusal with refusal depths ranging from 1.5 to 4.6 ft. Refusal generally indicates materials that cannot be penetrated with typical soil drilling methods. Therefore, refusal can indicate one or more of the

following: coarse gravel, boulders, shot rock fill, buried concrete, weathered rock, thin rock seams, or the upper surface of sound, continuous bedrock. Core drilling is then required to determine the characteristics and soundness of the refusal materials. Coring was performed at boring B-1 from 2.3 to 12.3 ft. The refusal materials were cored according to ASTM D 2113, which utilizes a diamond studded bit fastened to the end of a hollow double tube core barrel. The assembly is lowered to refusal depth and the boring is flooded with water to control overheating and to bring the cuttings to the surface. As the drill is rotated at high speeds, the core bit advances into the refusal material and core samples are retained within the inner core barrel. These samples are removed after core runs of up to ten feet and placed in boxes for storage. The core samples were taken back to the laboratory where they were classified as to type of rock, percent recovery, and rock quality designation by an L.E. Gregg geologist or engineer. The percent core recovery (REC) is a ratio of the recovered sample length versus the total length attempted and is expressed as a percentage. The REC is used to assess the continuity of the refusal material. The rock quality designation (RQD) is obtained by summing up the length of core recovered, including only the portions that are greater than or equal to 4 inches, and dividing by the total length attempted. This is also expressed as a percentage and is used to assess the quality of the refusal material.

The core obtained from B-1 consisted of limestone with thin interbeds of shale. The core was gray with thin interbeds of dark gray shale. The material was fractured and fossiliferous. The core had a recovery of 93% and an RQD of 37%. This indicates that the bedrock is continuous and of poor quality.

Water Conditions

Water was not encountered in any of the borings during the field exploration. Groundwater levels are expected to stay near or below bedrock elevations. Groundwater refers to any water that percolates through the soil and can refer to isolated or perched water pockets or water that occurs below the "water table", which is a zone that remains saturated and water-bearing. The groundwater levels encountered during drilling may fluctuate significantly over time due to weather influences and should not be considered a true static groundwater level.

3.2 SEISMIC SITE CLASSIFICATION

The Kentucky Building Code (current edition), Chapter 20 of ASCE 7-16, and the ASCE 7 Hazard Tool were reviewed to determine the Seismic Site Classification for the site based on the following coordinates, 38.066086°N, 84.474259°W. Based on review of geologic data, previous experience with similar projects, and the subsurface conditions encountered, a **Seismic Site Class "B"** is recommended for rock bearing foundations. We have assumed a Seismic Risk Category of II for the site.

Using a Site Classification of **B**, we recommend the use of spectral response acceleration coefficients as follows:

0.2 second period: $\mathbf{S_S}$ = 0.172 and Soil Factor = 0.9

1.0 second period: $\mathbf{S_I}$ = 0.082 and Soil Factor = 0.8

The design spectral response acceleration factors are as follows:

$\mathbf{S_{DS}}$ = 0.103

$\mathbf{S_{DI}}$ = 0.044

4.0 GEOTECHNICAL RECOMMENDATIONS

4.1 GEOTECHNICAL CONSIDERATIONS

General

Based on the provided information, the subsurface conditions encountered and past experience with similar projects, the site is suitable for the proposed development provided the following considerations are addressed. These considerations are briefly summarized below.

Shallow Bedrock

Auger refusal was encountered across the site at depths ranging from 1.5 to 4.6 ft. Weathered bedrock was generally encountered before refusal. The underlying bedrock consists of limestone with thin interbeds of shale. The weathered material may be rippable to an extent; however, pneumatic ramming will be required for mass bedrock removal.

Silty and/or Sandy Materials

Natural materials consisting of silty and/or sandy clays were encountered in at the site. These materials can be sensitive to changing moisture conditions and can degrade under repetitive loading and unloading. Heavy equipment traffic during construction can cause these materials to break down. Care will need to be taken to limit heavy construction traffic across the building pad and the contractor will need to consider changing moisture conditions during construction. The owner and contractor should consider seasonal weather patterns for construction scheduling.

Karst Potential

Karst potential in the location of the site is classified as karst intense. Sinkholes are common in this region and caverns can extend laterally and may be unobserved from the ground surface. It should also be noted that the rock formations underlying the site are known for horizontal and vertical solution cavities that may go unnoticed for long periods of time. There is a potential for karst features such as solution channels, rock pinnacles, or sinkholes to be encountered during construction.

Excavation Sloping and/or Benching

All excavation work must be performed in accordance with OSHA and local building code requirements. The contractor is solely responsible for designing and constructing stable, temporary excavations and should shore, slope, or bench the sides of the excavations as required to maintain stability of both the excavation sides and bottom. The contractor's "responsible person", as defined in 29 CFR Part 1926, should evaluate the soil exposed in the excavations as part of the contractor's safety procedures. In no case should slope height, slope inclination, or excavation depth, including utility trench excavation depth, exceed those specified in local, state, and federal safety regulations.

Ground Water or Free Water

Water was not encountered during the field exploration. Groundwater levels may fluctuate significantly over time due to weather influences. The available geological information and past experience with similar projects indicates that it is possible that during construction ground water could be encountered. Ground water and/or free water encroaching upon construction excavations should be removed by placing a sump near the source of seepage and then pumping from the sump. Should heavy seepage or ponding of water occur, L.E. Gregg should be contacted.

Site Drainage

Positive site drainage and adequate subgrade drainage are critical for performance of the proposed foundations. During construction, large quantities of water should not be allowed to accumulate on the site.

4.2 FOUNDATIONS

General

Lean clay materials and shallow bedrock materials were encountered during the exploration. We have assumed that minimal cut and fill operations will be required to achieve the required subgrades. Due to the shallow refusal depths encountered, we would recommend that the proposed foundations bear within the underlying bedrock.

Rock Bearing Foundations

Typical spread foundations bearing within unweathered competent bedrock materials should be designed for a maximum allowable bearing capacity of 10,000 pounds per square foot (psf). The bearing materials used should be uniform and rock removal should be expected to remove weathered material.

Excavate foundations down to competent bedrock. L.E. Gregg should observe the bearing surface once foundation excavations have been completed. Please note that foundation excavations may need to be deepened if the weathered bedrock is observed to be unsuitable as a bearing surface.

In order to check the continuity of the bedrock, a 2 to 3 in. diameter air hole should be drilled in the footprint of each column location and at 50 ft. intervals along continuous wall foundations to a depth of 5 ft. The hole should then be "probed" by a qualified geotechnical technician to check for any soft compressible seams, coal or other discontinuities. If this check indicates a discontinuous or compressible seam in the rock, the rock material will need to be excavated deeper. Significant deviations from the specified or anticipated conditions should be reported to the owner's representative and to the foundation designer.

As an alternative to bearing directly on competent bedrock, the foundation excavations may be trenched down to bedrock and backfilled with lean concrete to the bearing elevation. If the trenching method is preferred, widen footing excavations by a minimum of six (6) inches on each side and backfill the foundation excavation from bedrock to the bearing elevation with lean concrete.

Construction Considerations

All vegetation, topsoil, unsuitable fill soil (if required), loose rock fragments greater than 6 inches, construction debris, water, and other debris should be removed from the proposed construction areas before concrete placement. Any trench excavations should have adequate shoring and/or benching per OSHA requirements. The foundation support and/or foundation side walls should be protected from freezing weather, severe drying, and water ponding. Positive drainage should be provided to direct surface runoff away from excavations.

4.3 SLAB ON GRADE

Slab on grade areas should be thoroughly proofrolled and any areas showing deflections or pumping should be removed and replaced. Slabs should be designed using a modulus of subgrade reaction, k, of 150 psi/in. We typically recommend that the floor slab should be fully ground supported and not structurally connected to any walls or foundations in order to reduce the possibility of cracking and displacement of the floor slab due to any differential settlement between it and the foundation. If the design requires a turn down slab or areas where the slab is tied to perimeter walls, differential movement between the walls and slabs will likely be observed in adjacent slab expansion joints or floor slab cracks beyond the length of the structural dowels. The potential for differential settlement should be accounted for through use of sufficient control joints, appropriate reinforcing, or other means. We recommend that control joints be placed in the slab around columns and along footing supported walls to reduce cracking due to minor differential settlements. We recommend that ACI 302.1R-96 "GUIDE FOR CONCRETE FLOOR AND SLAB CONSTRUCTION" be followed for design and placement

of concrete floor slabs. Areas that may encounter higher point loading such as freezers, lab equipment, etc… should be designed with greater reinforcement. We recommend that a vapor barrier and a minimum of 4 inches of crushed stone be placed beneath the slab to act as a moisture block. The crushed stone or gravel should be kept moist, but not wet, immediately prior to slab concrete placement to minimize curling of the slab due to differential curing conditions between the top and bottom of the slab. These measures should help equalize loading and moisture conditions under the slab. Isolation joints should be provided between the slab and any columns or footing supported walls. Interior construction joints using dowels could be used to reduce any sharp vertical displacements.

4.4 SITE PREPARATION AND GRADING

All vegetation, topsoil, unsuitable fill soil (if required), loose rock fragments greater than 6 in., construction debris, and other debris should be removed from the proposed construction areas. After completion of stripping operations, we recommend that the subgrade be proofrolled with a fully-loaded, tandem-axle dump truck or other pneumatic-tired construction equipment of similar weight. The geotechnical engineer or their representative should observe proofrolling. Areas judged to perform unsatisfactorily should be undercut and replaced with structural soil fill or remediated at the geotechnical engineer's recommendation.

4.5 FILL PLACEMENT

Material considered suitable for use as structural fill should be clean soil free of organics, trash, or other deleterious materials, and contain no rock fragments greater than 6 in. in any one dimension. Preferably, structural soil fill material should have a standard Proctor maximum dry density of 90 pounds per cubic foot (pcf) or greater and a plasticity index (PI) of 25 percent or less. Materials with PI's greater than 25 may evaluated on a case-by-case basis for use in other areas of the site or in areas of deep fill. All material to be used as structural fill should be tested by the geotechnical engineer to confirm that it meets the project requirements before being placed.

Structural fill should be placed in loose, horizontal lifts not exceeding 8 in. thick. Each lift should be compacted per Table 2 below and within the range of minus (-) 2 percent to plus (+) 2 percent of the optimum moisture content. Each lift should be tested by geotechnical personnel to confirm that the contractors' method is capable of achieving the project requirements before placing any subsequent lifts. Any areas which have become soft or frozen should be removed before additional structural fill is placed. One in place density test should be performed a minimum of every 5,000 ft^2 for each 8 in. lift. Adequate surface drainage should be provided during all site grading and fill placement operations. **Please note that compaction efforts can be difficult to achieve using conventional construction methods during wet weather.**

Table 2 – Fill Placement (ASTM D 698)

Location	Maximum Dry Density (%)
Footings and Floor Slabs	98.0
Pavement Areas	95.0
Landscape Areas	85.0

4.6 DRAINAGE

To reduce the potential for undercut and construction induced sinkholes, water should not be allowed to collect in the foundation excavations, on floor slab areas, or on prepared subgrades of the construction area either during or after construction. Undercut or excavated areas should be sloped toward one corner to facilitate removal of any collected rainwater, subsurface water, or surface runoff. Engineered fill or concrete should not be placed in excavations containing standing water or over-softened soils. Positive site surface drainage should be provided to reduce infiltration of surface water around the perimeter of structures and beneath floor slabs. The grades should be sloped away from structures and surface drainage should be collected and discharged such that water infiltration is not permitted.

4.7 BELOW GRADE WALLS

The following parameters are recommended for below grade wall design and construction:

Material Backfill

- Plasticity Index of any soil material should be less than 25;
- Provide temporary bracing if the walls cannot accommodate construction phase stresses;
- Provide adequate drainage at the rear of the wall;

Table 3 – Lateral Earth Pressures

Description of Backfill	φ (°)	Moist Unit Weight, γ (pcf)	Active Coefficient, K_a	At-Rest Coefficient, K_o	Passive Coefficient, K_p
Low to Medium Plasticity Clay (CL)	28	120	0.36	0.53	2.80
Well Graded Gravel-Sand Mix (GW/SW)	36	130	0.26	0.41	3.90
Poorly Graded Clean Gravel or sand (GP/SP)	34	120	0.28	0.44	3.55

- The data presented in Table 3 are based on the following assumptions:
  - Soil Backfill material exhibits an angle of shear resistance of 28 degrees or greater;
  - Retaining wall analysis assumes a level backfill slope;
  - Retaining wall analysis assumes that the wall will be designed as a vertical wall with respect to the retained material;

- Retaining wall analysis assumes the wall will be designed as a smooth wall with no friction.

4.8 LATERAL EARTH PRESSURES

The Kentucky Building Code (KBC), current edition, Table 1806.2, provides guidelines for allowable lateral pressure for use in foundation design. The following table summarizes the allowable lateral pressures.

Table 4 – Presumptive Load-Bearing Values (KBC/IBC Table 1806.2)

Type of Material	Vertical Foundation Pressure (psf)	Lateral Bearing Pressure (psf/ft below natural grade)	Lateral Sliding Resistance	
			Coefficient of friction[a]	Cohesion (psf)[b]
Crystalline bedrock	12,000	1,200	0.70	-
Sedimentary and foliated rock	4,000	400	0.35	-
Sandy gravel and/or gravel (GW and GP)	3,000	200	0.35	-
Sand, silty sand, clayey sand, silty gravel, and clayey gravel (SW, SP, SM, SC, GM, and GC)	2,000	150	0.25	-
Clay, sandy clay, silty clay, clayey silt, silt, and sandy silt (CL, ML, MH, and CH)	1,500	100	-	130

a. Coefficient to be multiplied by the dead load
b. Cohesion value to be multiplied by the contact area, as limited by Section 1806.3.2

The values for lateral bearing pressure located above in Table 4, may be adjusted when considering load combinations, including wind or earthquake loads as permitted by Section 1605.3.2 of the KYBC.

4.9 SLOPE RECOMMENDATIONS

Cut Slopes

Permanent cut slopes are typically recommended to be no steeper than 2H:1V. If steeper slopes are required, they will depend on existing conditions and will need to be reviewed on a case-by-case basis. The upper two (2) ft. of all cut slopes should be graded to 2:1 in order to reduce the potential for sloughing and erosion. Temporary cut slopes may be constructed for retaining walls, below grade walls, etc. and should follow OSHA excavation standards.

Fill Slopes

Permanent fill slopes should be no steeper that 2H:1V. Steeper slopes may be feasible if reinforcement is used in the design/construction. The fill material should be placed and

compacted in horizontal lifts according to the project specifications and plans. The slope should be constructed by overbuilding the slope face and then cutting it back to the design grade. New fill material should be properly benched into the existing slopes as shown in the diagram below. Fill slopes should not be constructed or extended horizontally by placing fill on an existing slope face and/or compacted by track walking.

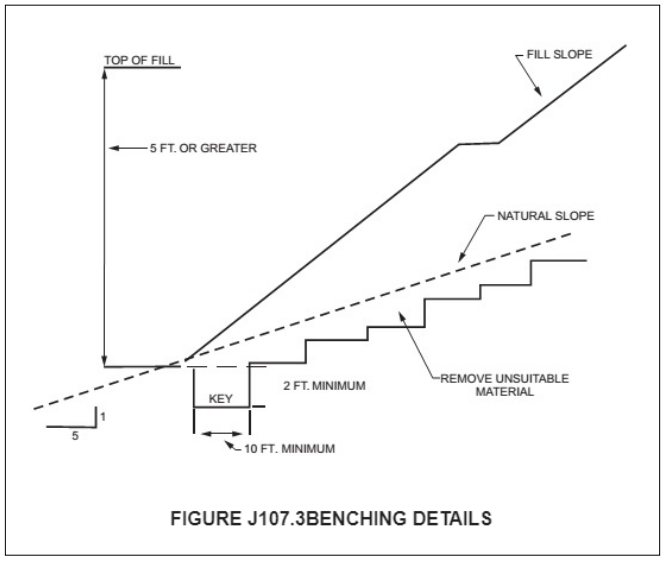

Figure 1: Benching Details (2015 IBC)

4.10 KARST REGION CONSTRUCTION RECOMMENDATIONS

The underlying rock units are classified as karst prone to karst intense. Close attention should be given during the construction process to identify any possible karst features or surface movement. Adequate drainage to minimize water infiltration into the subsurface during and after construction should be provided to lessen the risk of damage due to karst activity during construction. Any significant solution features or dropouts encountered during construction will require remediation and will need to be evaluated on a case-by-case basis. Sinkholes could be repaired by using the inverted cone method which involves excavating the material to find the throat or opening in the bedrock; then lining the excavation with a filter fabric, and backfilling with crushed aggregate, however, L.E. Gregg should be contacted to provide specific recommendations for remediation of any encountered karst features.

4.11 PAVEMENT RECOMMENDATIONS

A California Bearing Ratio (CBR) value of 3.0 when compacted to 95% of the Standard Proctor value was assumed for the pavement design listed below. The American Concrete Pavement Association's WinPas 12 software was utilized to evaluate the pavement recommendations and is based on the AASHTO Guide for Design of Pavement Structures (1993).

Table 5 – Pavement Design Assumptions

Design Life	**20 years**
Reliability	95%
Subgrade Resilient Modulus	3,500
Drainage Coefficient	1.0
Growth Potential	2 %
Initial Serviceability (Asphalt, Concrete)	4.5, 4.0
Terminal Serviceability	2.0
Asphalt Wearing Surface, layer coefficient	0.44
Asphalt Base Surface, layer coefficient	0.40
Dense Graded Aggregate Base, layer coefficient	0.14

The amount and type of traffic is unknown at this time. We have provided the following light and heavy-duty flexible designs listed below. The light-duty deign will provide approximately 40,000 ESAL's and the heavy-duty design will provide approximately 100,000 ESAL's. L.E. Gregg should be contacted if the amount of ESAL's provided will not satisfy the final traffic loading.

Table 6 –Flexible Pavement Design

Component	**Light Duty Thickness (in.)**	**Heavy Duty Thickness (in.)**
Surface Course	1.5	1.5
Asphalt Base Course	2.5	3.5
Base Material (DGA)	8.0	8.0

Pavement Maintenance

It should be expected that cracks will appear in flexible pavement areas within 1 to 3 years due to thermal expansion and contraction and the loss of volatiles from the bituminous mixture. These cracks cannot be avoided. In order to maintain pavement areas, these cracks should be cleaned annually and patched with a hot bituminous sealant. Within 3 to 5 years, cracks and depressions may appear in heavily traveled areas. These areas should be cut out and repaired promptly to extend the life of the pavement.

Rigid Pavement

If heavy duty rigid pavements are required, we would recommend a 6 in. concrete section with a 6 in. DGA base. Prior to placing the crushed stone base for the rigid pavement, the area should be proof rolled and observed by L.E. Gregg. It is recommended that the concrete pads be large enough to accommodate the entire length of a truck while loading or unloading. In addition, it is recommended that a thickened curb be constructed around the perimeter of the pads to reduce the potential for damage typically associated with overstressing of the pad edges.

Reinforcement for the rigid pavements should consist of a wire mesh or fiber-reinforced concrete. If wire mesh is utilized, the mesh should be located in the middle third of the rigid pavement. It is recommended that control joints be placed at 15 ft. intervals each way in the apron and pad areas. These control joints should be filled with a fuel resistant seal to prevent intrusion of liquids into the subgrade.

5.0 BASIS FOR RECOMMENDATIONS

VARIATIONS

Since any general foundation or subsurface exploration can examine and report only that information which is obtained from the borings and samples taken there from, and since uniformity of subsurface conditions does not always exist, the following is recommended. If, during construction, any latent soil, bedrock, or water conditions are encountered that were not observed in the borings, contact L.E. Gregg so that the site may be inspected to identify any necessary modifications in the design or construction of the foundation.

OTHER INTERPRETATIONS

The conclusions and recommendations submitted in this report apply to the proposed project only. They are not applicable to on-site, subsequent construction, adjacent or nearby projects. In the event that conclusions or recommendations based on this report and relating to any other projects are made by others, such conclusions and recommendations are not the responsibility of L. E. Gregg Associates. The recommendations provided are based in part on project information provided to L.E. Gregg and only apply to the specific project and site discussed in this report. If the project information section in this report contains incorrect information or if additional information is available, the correct or additional information should be conveyed to L.E. Gregg for review.

It is recommended that this complete report be provided to the various design team members, the contractors, and the project owner. Potential contractors should be informed of this report in the "instructions to bidders" section of the bid documents. The report should not be included or referenced in the actual contract documents.

STANDARD OF CARE

The services provided by L. E. Gregg Associates for this exploration have been performed in a manner consistent with that degree of care and skill ordinarily exercised by members of the same profession currently practicing under similar circumstances.

Important Information about Your

Geotechnical Engineering Report

Subsurface problems are a principal cause of construction delays, cost overruns, claims, and disputes.

While you cannot eliminate all such risks, you can manage them. The following information is provided to help.

Geotechnical Services Are Performed for Specific Purposes, Persons, and Projects

Geotechnical engineers structure their services to meet the specific needs of their clients. A geotechnical engineering study conducted for a civil engineer may not fulfill the needs of a construction contractor or even another civil engineer. Because each geotechnical engineering study is unique, each geotechnical engineering report is unique, prepared *solely* for the client. No one except you should rely on your geotechnical engineering report without first conferring with the geotechnical engineer who prepared it. *And no one — not even you* — should apply the report for any purpose or project except the one originally contemplated.

Read the Full Report

Serious problems have occurred because those relying on a geotechnical engineering report did not read it all. Do not rely on an executive summary. Do not read selected elements only.

A Geotechnical Engineering Report Is Based on A Unique Set of Project-Specific Factors

Geotechnical engineers consider a number of unique, project-specific factors when establishing the scope of a study. Typical factors include: the client's goals, objectives, and risk management preferences; the general nature of the structure involved, its size, and configuration; the location of the structure on the site; and other planned or existing site improvements, such as access roads, parking lots, and underground utilities. Unless the geotechnical engineer who conducted the study specifically indicates otherwise, do not rely on a geotechnical engineering report that was:

- not prepared for you,
- not prepared for your project,
- not prepared for the specific site explored, or
- completed before important project changes were made.

Typical changes that can erode the reliability of an existing geotechnical engineering report include those that affect:

- the function of the proposed structure, as when it's changed from a parking garage to an office building, or from a light industrial plant to a refrigerated warehouse,
- elevation, configuration, location, orientation, or weight of the proposed structure,
- composition of the design team, or
- project ownership.

As a general rule, *always* inform your geotechnical engineer of project changes—even minor ones—and request an assessment of their impact. *Geotechnical engineers cannot accept responsibility or liability for problems that occur because their reports do not consider developments of which they were not informed.*

Subsurface Conditions Can Change

A geotechnical engineering report is based on conditions that existed at the time the study was performed. *Do not rely on a geotechnical engineering report* whose adequacy may have been affected by: the passage of time; by man-made events, such as construction on or adjacent to the site; or by natural events, such as floods, earthquakes, or groundwater fluctuations. *Always* contact the geotechnical engineer before applying the report to determine if it is still reliable. A minor amount of additional testing or analysis could prevent major problems.

Most Geotechnical Findings Are Professional Opinions

Site exploration identifies subsurface conditions only at those points where subsurface tests are conducted or samples are taken. Geotechnical engineers review field and laboratory data and then apply their professional judgment to render an opinion about subsurface conditions throughout the site. Actual subsurface conditions may differ—sometimes significantly—from those indicated in your report. Retaining the geotechnical engineer who developed your report to provide construction observation is the most effective method of managing the risks associated with unanticipated conditions.

A Report's Recommendations Are *Not* Final

Do not overrely on the construction recommendations included in your report. *Those recommendations are not final,* because geotechnical engineers develop them principally from judgment and opinion. Geotechnical engineers can finalize their recommendations only by observing actual

subsurface conditions revealed during construction. *The geotechnical engineer who developed your report cannot assume responsibility or liability for the report's recommendations if that engineer does not perform construction observation.*

A Geotechnical Engineering Report Is Subject to Misinterpretation

Other design team members' misinterpretation of geotechnical engineering reports has resulted in costly problems. Lower that risk by having your geotechnical engineer confer with appropriate members of the design team after submitting the report. Also retain your geotechnical engineer to review pertinent elements of the design team's plans and specifications. Contractors can also misinterpret a geotechnical engineering report. Reduce that risk by having your geotechnical engineer participate in prebid and preconstruction conferences, and by providing construction observation.

Do Not Redraw the Engineer's Logs

Geotechnical engineers prepare final boring and testing logs based upon their interpretation of field logs and laboratory data. To prevent errors or omissions, the logs included in a geotechnical engineering report should *never* be redrawn for inclusion in architectural or other design drawings. Only photographic or electronic reproduction is acceptable, *but recognize that separating logs from the report can elevate risk.*

Give Contractors a Complete Report and Guidance

Some owners and design professionals mistakenly believe they can make contractors liable for unanticipated subsurface conditions by limiting what they provide for bid preparation. To help prevent costly problems, give contractors the complete geotechnical engineering report, *but* preface it with a clearly written letter of transmittal. In that letter, advise contractors that the report was not prepared for purposes of bid development and that the report's accuracy is limited; encourage them to confer with the geotechnical engineer who prepared the report (a modest fee may be required) and/or to conduct additional study to obtain the specific types of information they need or prefer. A prebid conference can also be valuable. *Be sure contractors have sufficient time* to perform additional study. Only then might you be in a position to give contractors the best information available to you, while requiring them to at least share some of the financial responsibilities stemming from unanticipated conditions.

Read Responsibility Provisions Closely

Some clients, design professionals, and contractors do not recognize that geotechnical engineering is far less exact than other engineering disciplines. This lack of understanding has created unrealistic expectations that have led to disappointments, claims, and disputes. To help reduce the risk of such outcomes, geotechnical engineers commonly include a variety of explanatory provisions in their reports. Sometimes labeled "limitations" many of these provisions indicate where geotechnical engineers' responsibilities begin and end, to help others recognize their own responsibilities and risks. *Read these provisions closely.* Ask questions. Your geotechnical engineer should respond fully and frankly.

Geoenvironmental Concerns Are Not Covered

The equipment, techniques, and personnel used to perform a *geoenvironmental* study differ significantly from those used to perform a *geotechnical* study. For that reason, a geotechnical engineering report does not usually relate any geoenvironmental findings, conclusions, or recommendations; e.g., about the likelihood of encountering underground storage tanks or regulated contaminants. *Unanticipated environmental problems have led to numerous project failures.* If you have not yet obtained your own geoenvironmental information, ask your geotechnical consultant for risk management guidance. *Do not rely on an environmental report prepared for someone else.*

Obtain Professional Assistance To Deal with Mold

Diverse strategies can be applied during building design, construction, operation, and maintenance to prevent significant amounts of mold from growing on indoor surfaces. To be effective, all such strategies should be devised for the *express purpose* of mold prevention, integrated into a comprehensive plan, and executed with diligent oversight by a professional mold prevention consultant. Because just a small amount of water or moisture can lead to the development of severe mold infestations, a number of mold prevention strategies focus on keeping building surfaces dry. While groundwater, water infiltration, and similar issues may have been addressed as part of the geotechnical engineering study whose findings are conveyed in this report, the geotechnical engineer in charge of this project is not a mold prevention consultant; ***none of the services performed in connection with the geotechnical engineer's study were designed or conducted for the purpose of mold prevention. Proper implementation of the recommendations conveyed in this report will not of itself be sufficient to prevent mold from growing in or on the structure involved.***

Rely, on Your ASFE-Member Geotechncial Engineer for Additional Assistance

Membership in ASFE/The Best People on Earth exposes geotechnical engineers to a wide array of risk management techniques that can be of genuine benefit for everyone involved with a construction project. Confer with your ASFE-member geotechnical engineer for more information.

	GC	**Clayey gravels, sand and clay mixtures**
	SW	**Well graded sand, little or no fines**
	SP	**Poorly graded sand, little or no fines**
	SM	**Silty sands, sand and silt mixtures**
	SC	**Clayey sands, sand and clay mixtures**
	ML	**Inorganic silts and very fine sands, rock flour, silty or clayey fine sands silts and with slight plasticity**
	CL	**Inorganic clays with low to medium plasticity, gravelly clays, sandy clays, silty clays, lean clays**
	OL	**Organic silts and organic silty clay of low plasticity**
	MH	**Inorganic silts, micaceous or diatomaceous fine sandy or silt soils, elastic silts**
	CH	**Inorganic clays of high plasticity, fat clays**
	OH	**Organic clays of medium to high plasticity, organic silts**
	Topsoil	**Usually top few inches of soil deposits and contains considerable amounts of organic matter**
	Asphalt	**Usually a black solid or semisolid mixture of bitumens mostly used in paving**
	Fill	**Soils that have been transported by man to their present location**
	Limestone	**Sedimentary rock consisting of predominantly of calcium carbonate**
	Sandstone	**Sedimentary rock consisting of sand with some cementitious material**
	Siltstone	**Fine grained rock of consolidated silt**
	Shale	**Fine grained sedimentary rock consisting of compacted clay, silt, or mud**
	Coal	**Natural black graphite like material formed from fossilized plants**
	Limestone interbedded with Shale	**Predominantly limestone interbedded with shale layers**
	Weathered	**Weathered rock**

CONSISTANCY AND RELATIVE DENSITY CORRELATED WITH STANDARD PENETRATION TEST (SPT)

SILT AND CLAY		SAND AND GRAVEL	
Relative Density	**Blows Per Foot (BPF)**	**Relative Density**	**Blows Per Foot (BPF)**
Very Soft	0 to 1	Very Loose	0 to 4
Soft	2 to 4	Loose	5 to 10
Firm	5 to 8	Firm	11 to 20
Stiff	9 to 15	Very Firm	21 to 30
Very Stiff	16 to 30	Dense	31 to 50

ROCK PROPERTIES

RELATIVE HARDNESS OF ROCK

Very Soft	Can be scratched by fingernail
Soft	May be broken by fingers
Medium	Corner and edges may be broken by fingers
Moderately Hard	Moderate blow of hammer required to break sample
Hard	Hard blow of hammer required to break sample
Very Hard	Several hard blows of hammer required to break sample

Rock Continuity (REC)		Rock Quality Designation (RQD)	
Core Recovery (%)	Description	RQD (%)	Classification
0 – 40	Incompetent	<25	Very Poor
40 – 70	Competent	25 – 50	Poor
70 – 90	Fairly Continuous	50 – 75	Fair
90 – 100	Continuous	75 – 90	Good
		90 – 100	Very Good

Estimated Moisture Condition Relative to Optimum	
Dry	Under 5% of Optimum
Slightly Moist	Minus 2% of Optimum
Moist	± 2% of Optimum
Very Moist	Plus 2% of Optimum
Wet	Over 5% of Optimum

Misc. and Soil Sampler Symbols

N	Blows Per Foot (BPF)		Undisturbed Sample
% W	Percent Water		Standard Penetration Test (SPT)
RQD	Rock Quality Designation		Boring Location
REC	Rock Core Recovery		Water Table while Drilling
CLA	Classification of Combined Samples		Water Table after Drilling
	Rock Core (RC)		Bulk Sample (BK)

Subject: Asbestos Bulk Sampling Report for Bulk Samples collected from the Lexington - Fayette New Water Quality Office, 130 New Circle Road, Lexington, Kentucky

Dear Mr. Kelsey:

Applegate Environmental Inspections & Consulting, Inc. (AEIC, Inc.) received bulk samples of suspect asbestos containing materials (ACMs) sampled on October 17, 2024 from the Lexington-Fayette New Water Quality Building, 130 New Circle Road Lexington, Kentucky. The sampling of the materials was performed by Scott Kelsey, Facilities Manager, LFUCG to determine if the floor tile/mastic/ floor leveler, recessed ceiling tile, decorative ceiling tile, drywall, drywall mud and roofing material collected from selected locations contained asbestos.

The bulk samples were delivered to AEIC, Inc. on October 19, 2024. The bulk samples were assigned numbers based upon the areas where the samples were collected. The samples were submitted to San Air Technologies Laboratory for PLM analysis. The following table details the data for the asbestos bulk samples.

ASBESTOS BULK SAMPLING TABLE

Material Description	Location	HA #	Sample ID #	SF/LF of Material	Sample Result ACM -Yes or No

Disclaimer and Additional Information

This report is the sole property of the client named on the SanAir Technologies Laboratory, Inc. (SanAir) chain-of-custody (COC). Results in the report are confidential information intended only for the use by the client named on the COC. Neither results nor reports will be discussed with or released to any third party without our client's written permission to maintain client confidentiality. The final report cannot be reproduced, except in full, without written authorization from SanAir to assure that parts of the report are not taken out of context. This report and any information contained within shall not be edited, altered, or modified in any way by any persons or agencies receiving, viewing, distributing, or otherwise possessing a copy of this final report. The laboratory reserves the right to perform amendments to any finalized report, of which shall supersede and make obsolete any previous editions. Such changes, modifications, additions, or deletions shall be effective immediately upon notice thereof, which may be given by means including, but not limited to, posting on the SanAir client portal website, electronic or conventional mail, or by any other means. The information provided in this report applies only to the samples submitted in the condition they were received at the laboratory and is relevant only for the date, time, and location of sampling. Samples were received in good condition unless otherwise noted on the report. The accuracy of the results is dependent upon the client's sampling procedure and information provided to the laboratory by the client on the COC, which includes the project name, project number, P.O. number, sample collection dates, special instructions, samples collected by, sample numbers, sample identifications/location, sample type, selected analysis type, and total area or volume that may affect the validity of the results. SanAir assumes no responsibility for the sampling procedure and will provide evaluation reports based solely on the sample and information provided by the client. SanAir assumes no responsibility or liability for the manner in which results are used or interpreted. This report does not constitute and shall not be used to claim product, process, system, or person certification, approval, or endorsement by NVLAP, NIST, NELAC, AIHA LAP, LLC or any other agency of the U.S. government; all or some tests contained in this report may not be accredited by every local, state, and federal regulatory agency. Refer to the SanAir website at www.sanair.com for copies of current certificates and scopes of various accreditations, certifications, and licenses or contact the laboratory at iaq@sanair.com for inquiries regarding the status or scope of an accreditation or certification.

Fibers smaller than 5-microns cannot be seen with this method due to scope limitations. Polarized- light microscopy is not consistently reliable in detecting asbestos in floor covering and similar non-friable organically bound materials. Quantitative transmission electron microscopy is currently the only method that can be used to determine if this material can be considered or treated as non-asbestos containing. Samples are held for a period of 60 days.

Asbestos Accreditations, Certifications, and Licenses

1.0 EXECUTIVE SUMMARY

On behalf of Lexington-Fayette Urban County Government (LFUCG), Shield Environmental Associates, Inc. (Shield) performed a Phase I Environmental Site Assessment (ESA) of properties located at 130 and 134 W. New Circle Road in Lexington, Fayette County, Kentucky. The property located at 130 W. New Circle Road is a multi-tenant building; therefore, this Phase I ESA only includes Suite 170 of the building and exterior portions associated with this suite. The 130 W. New Circle Road is contiguous to the 134 W. New Circle Road; therefore, for the purpose of this Phase I ESA the properties will be referred to as one (1) unless otherwise differentiated. This Phase I ESA was performed in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E1527-21. This ESA includes reconnaissance of the subject site, a search for readily available government and local records, interviews with persons familiar with the site, and a review of historical information. The site reconnaissance was conducted by Ms. Elizabeth Greathouse of Shield on October 31, 2023. The purpose of this site assessment was to determine the potential for the presence of recognized environmental conditions (RECs) associated with the site.

According to the Fayette County Property Valuation Administrator (PVA) both properties are owned by the William Ziering Trust and consist of a total of 8.43 acres. Suite 170 consists of approximately 67,500-square feet and was constructed in 1968. The building is currently being used by the Lexington Fire Department for their annual Toy Drive. Prior to Lexington Fire Department's occupancy, the building was utilized as office space for Windstream. The exterior of the property consists of paved parking space and a fenced area containing covered parking and several small ancillary structures. This fenced area was utilized for fleet storage by Windstream and is not currently being used by the Lexington Fire Department.

The interior of Suite 170 consists of office space, storage areas, restrooms, and open warehouse space. The warehouse portion of the building may have historically been used for automotive service when K-Mart occupied the property. Some concrete patched areas and one (1) floor drain were observed in this area.

A concrete curbed area is located on the western exterior of the building. The purpose of this area is not known; however, it may have been the former location of an aboveground storage tank (AST).

A fenced area is located on the northern portion of the property. Within the fenced area is covered parking, formerly used by Windstream for fleet parking, two (2) small storage buildings and a third building located near the northwestern corner that was not accessible during site reconnaissance.

The remaining property exterior is primarily used for parking. Grass-covered areas are located along the northern, eastern and western perimeters.

Based on available historic documentation the property appears to have been undeveloped/agricultural land prior to development for commercial purposes in the mid-1960s. The entire property was originally occupied by a K-Mart retail store. Additional occupants have included Alltel and Windstream. The property is currently being utilized by the Lexington Fire Department as their annual toy drive headquarters. Mr. William Ziering, current property owner, indicated Windstream took occupancy of the property in 2004 and vacated the premises in December 2023. The property was vacant until the Lexington Fire Department's occupancy.

Mr. Ziering provided a copy of a Phase I ESA completed prior to his purchase in 2017. The 2017 Phase I ESA indicates the former UST was located on the property to the south, currently owned by Goodwill Industries; however, the fill port to the UST was located inside the former service area on the subject property. No RECS were identified in the 2017 Phase I ESA.

Files were provided for the property by the Kentucky Division of Waste Management (KDWM), Underground Storage Tank Branch (USTB). According to information in the files a 1,000-gallon waste oil UST was installed on the property in 1964 and was utilized to contain waste liquids generated during automobile servicing by K-Mart. Based on information located in the files it appears the UST was formerly located on the western side of the building, near the fenced area which is located near the center of the building. It appears the fill port to the UST was located inside the service area within the building. The UST was removed in 1991. Following removal soil impacts (oil and grease and total lead) were identified. In August/September 1993 a total of 222 cubic yards of soil was removed for proper disposal. A letter of no further action was issued for the removal in January 1996.

Shield has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-21 of the properties located at 130 and 134 W. New Circle Road in

Lexington, Fayette County, Kentucky. Any exceptions to or deletions from this practice are described in Section 8.2 of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the property.

2.0 INTRODUCTION

Shield has completed a Phase I ESA on behalf of LFUCG. The subject site is a commercial property located at 130 and 134 W. New Circle Road in Lexington, Fayette County, Kentucky.

2.1 Location and Legal Description

The subject site is situated in a shopping center along New Circle Road, northeast of downtown Lexington, Kentucky. William Ziering Trust is the current owner of the property. The trust, according to the Fayette County PVA, is dated June 18, 2015. The property consists of two (2) contiguous tracts of land totaling 8.43 acres. The following information was provided via the Fayette County PVA for each parcel.

- 130 W. New Circle Road, Suite 170: Parcel Number 13872150; 7.59 acres, building 67,500 square feet and built in 1968
- 134 W. New Circle Road: Parcel Number 38158940, 0.84 acres, no structures

The location of the property is illustrated on Figure 1, the Site Location Map, which is a portion of the United States Geological Survey (USGS) Lexington East, Kentucky, 7.5-minute Topographic Quadrangle Map (2019). The property is located at the following approximate geographic coordinates: latitude 38°03'58" North; and, longitude 84°28'23" West. The general property layout is illustrated on Figure 2, the Site Plan Map.

2.2 Purpose

The purpose of this assessment was to evaluate the presence of recognized environmental conditions (RECs) associated with the subject property. Recognized environmental conditions are defined by ASTM as "(1) the *presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on or at the subject property due to a release or likely release to the environment; (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of future release to the environment".* This assessment considered not only current and prior activities on the site, but also to the extent possible, operations on the adjacent properties that could have impacted the site.

Historical RECs (HRECs) are defined by ASTM as *"a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the subject property to any controls (for example, activity and use limitations, or other property use limitations)".*

Controlled RECs (CRECs) are defined by ASTM as *"recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities, with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls".*

2.3 Scope of Services

This report was prepared in accordance with Shield's proposal number 23-207 provided to Mr. Gregory Lubeck, P.E. of LFUCG Division of Water Quality and dated October 17, 2023. Mr. Lubeck issued a Purchase Order (PO) (PO LF00202699) authorizing the work on October 25, 2023. The proposal, scope of services, and authorization are provided in Appendix A. Signatures and resumes of the personnel performing this assessment are provided in Appendix B.

This assessment was conducted in conformance with *ASTM E 1527-21*, a consensus document and guide for conducting Environmental Site Assessments under 40 CFR Part 312 related to *All Appropriate Inquiry* (AAI). Shield assessed the potential for contamination by performing the following general scope of services:

- Site Reconnaissance performed on October 31, 2023;
- Interviews conducted on-site on October 31, 2023 and via telephone on November 21, 2023;
- Regulatory Records Review;
- Historical Source Review; and,
- Report Preparation.

2.4 Significant Assumptions

The following assumptions were made when preparing this report:

- Information provided in the interview process and during site reconnaissance is true and accurate to the best of the individual's knowledge;

- As requested in the user questionnaire and Shield's proposal, any information available related to the following items has been provided: title records; environmental liens or activity and use limitations (AULs); specialized knowledge of site environmental problems; records and reports regarding environmental investigations or assessments; and/or reduction of property value due to environmental impairment; and,

- Shield understands that this ESA is being conducted prior to a potential property lease.

2.5 Limitations and Exceptions

The findings are relevant to the date of the site visit and should not be relied upon to represent conditions at later dates. As outlined in 40 CFR 312.20 (c) (3), portions of this report must be updated within a 180-day period. The interviews, regulatory review, search for environmental liens, visual inspection of the property, and declaration by the environmental professional must be updated within 180 days from the date those activities were completed. While the information contained in this report can be used as a reference source at any time in the future, the report cannot be relied upon after one year. The scope executed for this project is not an audit for regulatory compliance or a detailed condition survey for the presence of hazardous and/or toxic materials such as, asbestos, lead paint, polychlorinated biphenyls (PCBs), mold or radon and other naturally occurring materials.

Our conclusions regarding the site are based upon observations of existing site conditions, interpretations of available site history, and site usage information. The results of this evaluation are limited by the fact that Shield has not conducted asbestos or other hazardous materials testing, or soil, groundwater, or air sampling. Conclusions regarding the site's condition do not represent a warranty that all areas within the site are of the same quality as may be inferred from observable site conditions and readily available site history.

While this report represents appropriate inquiry into readily available sources for information, this report is not exhaustive and does not eliminate uncertainty regarding the potential for RECs in connection with the property.

In performing this site assessment, Shield has strived to conform to generally accepted practices of other consultants undertaking similar studies at the same time and in the same geographical area. Shield has attempted to observe a degree of care and skill generally exercised by the technical community under similar circumstances and conditions. Our findings and conclusions must be considered probabilities based upon professional judgment on the significance of the limited data gathered during the course of the ESA.

This assessment was conducted based upon the scope of work and level of effort desired by the client and with resources adequate only for that scope of work. Our findings have been developed according to generally accepted standards of engineering, geology, and hydrogeology practices in the Commonwealth of Kentucky, available information, and our professional judgment. No other warranty is expressed or implied.

2.6 Special Terms and Conditions

Aside from the terms and conditions outlined in Shield's proposal and above in Section 2.4, no additional terms and conditions are applicable.

2.7 User Reliance

This report has been prepared and is intended for the exclusive use of LFUCG. The report's contents should not be relied upon by any other party without the express written consent of Shield.

3.0 USER PROVIDED INFORMATION

As outlined in 40 CFR 312.22, ASTM E1527-21 (Section 6) and requested in the user questionnaire, the following information is to be provided by the user (i.e., client and/or client's representative):

- Title records;
- Information regarding environmental liens or AULs;
- Specialized knowledge of environmental impairment or known RECs;
- Environmental records not available through the public record such as environmental investigation or assessment reports;
- Reduction in property value due to environmental impairment or RECs; and,
- Any additional specialized knowledge regarding the potential presence of contamination on the property.

A completed user questionnaire is provided in Appendix A. A current title and/or chain of title were not provided. No information regarding specialized knowledge of environmental impairments, or a reduction in property value was provided. In addition, no environmental records or copies of liens or AULs were provided.

4.0 PHYSICAL SETTING

Numerous sources were contacted for environmental and regulatory information pertaining to the site and surrounding areas. These sources included state regulatory agencies, the relevant local city offices, and specific site setting sources. The following summarizes the information obtained from the sources of the records reviewed and copies of documents obtained in this section are provided in Appendix F.

4.1 Topographic Map

The subject site was viewed on the USGS Topographic Quadrangle Map, Lexington East, Kentucky (2019). According to the topographic map, the elevation of the subject site is approximately 970 feet above the National Geodetic Vertical Datum (NGVD29, a national datum approximately equal to Mean Sea Level). Surface topography at the site has a downward gradient to the east-northeast.

4.2 Soil Survey

Shield reviewed the United States Department of Agriculture (USDA) Natural Resource Conservation Service's Web Soil Survey website (http://websoilsurvey.nrcs.usda.gov) to gather information regarding the subsurface soil at the property. According to Web Soil Survey, subsurface soils are predominantly comprised of Bluegrass and Maury series soils. The Bluegrass and Maury series soils consist of very deep, well-drained, moderately permeable soils that formed in silty material over residuum weathered from phosphatic limestone. These soils are typically found on uplands. A copy of the digital map is provided in Appendix F.

4.3 Flood Potential, Wells, Springs, and Wetlands

Information concerning flood zones is obtained by reviewing the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps website (https://msc.fema.gov/portal/home). According to the FEMA map reviewed (map number 2100670128E effective March 3, 2014), the property is located in an area of minimal flood hazard. A copy of the FEMA map is provided in Appendix F.

Shield conducted a search for wells and springs located within a 1/10-mile radius of the property center via the Kentucky Groundwater Data Repository provided by the Kentucky Geological Survey (KGS) (https://www.uky.edu/KGS/). No water wells are depicted on the property. A perennial stream is depicted near the northwestern corner of the property. The Kentucky Spring Inventory form located in the file indicates the spring is coming out of a rock wall next to North Broadway and the water drains into a concrete tank located in the ditch next to the road. Several abandoned monitoring wells are located in the vicinity of the subject property; however, their proximity to the subject property is not of concern. A copy of the wells and springs map and the Kentucky Spring Inventory form are provided in Appendix F.

Based upon a review of the National Wetlands Inventory Map obtained via the United States Fish and Wildlife Service National Wetlands Inventory website (http://www.fws.gov/wetlands/Data/Mapper.html), no wetlands are located on the property. Cane Run is illustrated east of the property. A copy of the wetland map is provided in Appendix F.

4.4 Site History

Historical information was obtained for the site through the review of various standard historical sources. If available and considered to be useful sources of historical information for the subject site, resources such as historical topographic maps, aerial photographs, Sanborn® Maps, and city directories are commonly reviewed. For this ESA, Shield obtained historical information primarily from databases provided by Environmental Data Resources, Inc. (EDR®), a third-party company utilized to search state and federal databases for the site and/or surrounding properties of concern, as well as provide historical information (i.e., Sanborn® maps, aerial photographs and topographic maps).

Based on available historic documentation the property appears to have been undeveloped/agricultural land prior to development for commercial purposes in the mid-1960s. The entire property was originally occupied by a K-Mart retail store. Additional occupants have included Alltel and Windstream. The property is currently being utilized by the Lexington Fire Department as their annual toy drive headquarters. Copies of historical source information are provided in Appendix F. Specific information gathered from the sources reviewed is summarized below.

4.4.1 Aerial Photographs

Shield reviewed aerial photographs obtained from EDR® dated 1949, 1958, 1965, 1971, 1984, 1993, 1997, 2008, 2012, 2016, and 2020. The property was undeveloped land on the 1949 and 1958 aerial photographs. The K-Mart building and associated parking lot were present on the 1965 aerial photograph. No changes were noted to the property on the 1971 through 1997 aerial photographs. The covered parking areas and associated buildings located on the northern side of the property were first visible on the 2008 aerial photograph. No additional changes were noted to the property on any of the remaining aerial photographs (2012 through 2020). No areas of concern were seen on any of the aerial photographs reviewed.

4.4.2 Sanborn® Maps

Sanborn® fire insurance maps depict historical features and potential facility uses related to urban properties. These maps are routinely requested for review of urban sites for relevant historical information, including details of former and existing structures. Sanborn® maps dated 1934, 1950, 1958, 1963, and 1970 were provided for review. Coverage of the property was not provided on the 1934 through 1963 Sanborn® maps. K-Mart is present on the property on the 1970 Sanborn® map.

4.4.3 City Directories

City directories were not expected to provide any additional, useful historical information and therefore were not reviewed.

5.0 RECORDS REVIEW

5.1 Database Search

EDR® was contacted to perform a search of State and Federal databases related to environmental permitting, chemical or waste handling, sites with the potential for environmental impacts, and sites with known impacts. The following databases were searched with the resulting number of sites within the radii specified in the table below:

1– MILE RADIUS		¼-MILE RADIUS	
National Priorities List (NPL), Delisted NPL and Proposed NPL	0	RCRA Generators/ RCRA NonGen	1/6

Shield provided the subject site address and location to EDR®. A copy of the EDR® database search report is provided in Appendix D. Shield reviewed the EDR® database for information regarding the subject site (a.k.a. Target Property), properties located adjacent or in close proximity to the subject site, and those properties that have the potential to impact the subject site.

Shield requested files for the Lex Express and Early Bird Cleaners sites. The Lex Express property is located northeast of the Target Property, across the railroad tracks. Information in the files indicates the facility is an active fueling station with no documented releases. Given the inferred groundwater direction flow and lack of documented releases, no impacts from the Lex Express property are expected.

The Early Bird Cleaners site formerly operated as a one-hour drycleaning business. The property is currently under Managed Closure with annual groundwater monitoring due to impacts related to the former drycleaner operations found on the property. The Corrective Action Plan (CAP) completed in 2009 for the property recommended an engineered barrier, institutional controls and post-construction monitoring. Groundwater flow on the property is to the northwest and northeast. While the Early Bird Cleaners site is located in close proximity to the Target Property, impacts are not expected given the site is under Managed Closure with monitoring wells being sampled located only on the site itself (no off-site wells).

Given either the distance, the direction, inferred groundwater direction flow, and/or the type of facility listing relative to the Target Property, none of the remaining surrounding properties identified are considered to be of concern.

5.1.2 Target Property

The Target Property was listed on the AST, FINDS, UST databases as Alltel, K-Mart, and Goodwill Industries of Kentucky Inc., respectively. The following provides detailed information regarding the Target Property's listing on these databases.

AST: The AST database is a listing of aboveground storage tank site locations. The Target Property is listed on this database as Alltel. According to information provided in the

EDR® radius report an AST was installed on the property in 2005 by Randy Walker Electrical and Communications company on behalf of Alltel. This AST was not observed during site reconnaissance. However, a concrete curbed area was observed on the western side of the building and is likely the former location of this AST.

UST: The UST database is a listing of regulated underground storage tanks (USTs) in the state of Kentucky. The Target Property is listed on this database as Goodwill Industries of Kentucky Inc. According to information provided in the EDR® radius report a UST was installed on the property in 1964 and removed in 1991. Additional information pertaining to the former UST is provided in Section 5.2.

FINDS: The FINDS database contains both facility information and "pointers" to other sources that contain more details on the Target Property. The Target Property is listed on this database as K-Mart. The Target Property's listing on this database is likely due to the former UST located on the property. As previously mentioned, additional information regarding the former UST is provided in Section 5.2.

5.2 Regulatory Agency Information

The following regulatory agencies were contacted regarding the subject site. Correspondence relative to regulatory agencies, as well as any information provided by the regulatory agencies, is provided in Appendix E.

Kentucky Division of Water: Records Coordinator; (502) 564-3410. A file search was conducted for Kentucky Pollutant Discharge Elimination System (KPDES) Permits and No Discharge Permits for the site. No files were found for the property.

KDWM: Records Coordinator; (502) 564-5981. A request to conduct a file search for any waste management records for the site was submitted. Based on the information provided, files pertaining to hazardous waste generation by Goodwill Industries; occupants of the southern side of the building (not the subject property) were provided. Goodwill Industries is currently registered as a small quantity generator of hazardous waste. The most recent technical compliance inspection located in the file was conducted in July 2022. No violations were observed during the inspection.

KDWM UST Branch: Records Coordinator; (502) 564-6716. A file search was conducted for any USTs, spills, leaks, or environmental complaints for the site. Files were provided for

the former UST located on the property. A 1,000-gallon waste oil UST was installed on the property in 1964 and was utilized to contained waste liquids generated during automobile servicing by K-Mart. Based on information located in the files it appears the UST was formerly located on the western side of the building, near the fenced area which is located near the center of the building. It appears the fill port to the UST was located inside the service area within the building. The UST was removed in 1991. Following removal soil impacts (oil and grease and total lead) were identified. In August/September 1993 a total of 222 cubic yards of soil was removed for proper disposal. A letter of no further action was issued for the removal in January 1996.

Lexington-Fayette Urban County Government (LFUCG), Department for Environmental Quality (DEQ): Records Coordinator; (859) 425-2255. LFUCG DEQ was contacted with regards to any hazardous materials spills and/or environmental emergency responses to the site, as well as any environmental records relative to the property. A letter of no further action for the UST closure dated May 6, 2005 was the only file provided.

5.3 Vapor Encroachment Screening

Shield utilized the findings from the EDR® report and EDR®'s E2600-10 Tier I Vapor Encroachment Screening App™ to determine the potential for vapor encroachment relative to surrounding properties of concern. Based on EDR®'s inferred groundwater flow direction to the north, it has been determined that the potential for vapor migration from surrounding properties of concern is low and thus a vapor encroachment condition (VEC) is not expected to be present at this time. A VEC is defined as the presence or likely presence of COC vapors in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater either on or near the Target Property. A copy of the Vapor Encroachment Screen Report is included in Appendix D.

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

On October 31, 2023, Elizabeth Greathouse of Shield conducted a reconnaissance of the subject site. Mr. Chris McFarland of the Lexington Fire Department, current occupant of the property, provided access and answered questions regarding site use. The site reconnaissance involved a walk-through of the existing building as well as observations of the exterior portions of the subject site. Limiting conditions encountered during site reconnaissance include the fact that the lights in the main portion of the former service area did not work and Shield was not able to access the interior of the small building in the northwestern corner of the property.

The site boundaries were observed from public streets, and the property lines and adjacent properties were viewed via public streets within an approximate radius of ¼-mile. A compilation of photographs taken of the site and adjacent properties is provided in Appendix C.

6.2 Site and Vicinity General Characteristics

The property consists of Suite 170 of the on-site building, a fenced area containing covered parking areas and three (3) storage-like buildings, as well as a large paved parking lot and associated grass-covered areas. Properties within the vicinity of the subject site are utilized for commercial and residential purposes.

6.3 Current Use of the Property

The property is currently being used by the Lexington Fire Department as their annual toy drive headquarters.

6.4 Site Improvements

Access to the site is provided via West New Circle Road. The property is improved with the buildings, covered parking areas and a large paved parking lot. A chain-link fence

surrounds the covered parking areas and three (3) storage buildings. The following utilities are available to the property:

- Electricity
- Potable water service
- Natural Gas
- Sanitary sewer service

6.5 Current Use of Adjoining Properties

Generalized Direction	Site Use
North	Railroad tracks
South	Goodwill portion of the building with associated parking lot
East	W. New Circle Road
West	Residential property

Additional information regarding neighboring facilities is provided in Section 5.1.

6.6 Site Reconnaissance Overview

The property consists only of suite 170 of the building, which is approximately 67,500-square feet in size, as well a vacant, undeveloped lot (parking lot), which totals 8.43 acres of land. The interior of the building consists of office space, storage areas, restrooms, and open warehouse space. The warehouse portion of the building may have historically been used for automotive service when K-Mart occupied the property. Some concrete patched areas and one (1) floor drain were observed in this area.

A concrete curbed area is located on the western exterior of the building. The purpose of this area is not known.

A fenced area is located on the northern portion of the property. Within the fenced area is covered parking, formerly used by Windstream for fleet parking, two (2) small storage buildings and a third building located near the northwestern corner that was not accessible during site reconnaissance.

The remaining property exterior is primarily used for parking. Grass-covered areas are located along the northern, eastern and western perimeters.

6.7 Environmentally Significant Site Features Summary

The following table summarizes the key features of the property observed during the site reconnaissance completed on October 31, 2023. This summary provides an overview of those areas which were accessible on the day of the site walk. The features observed during site reconnaissance are designated with an (X) in the table below with further discussion detailed below the table.

Category	Item or Feature	Item or Feature Observed
Site Operations, Processes, and Equipment	Emergency generators	
	Elevators	
	Air compressors	
	Hydraulic lifts (stationary or mobile)	
	Dry-cleaning	
	Photo-processing	
	Laboratory hoods and/or Incinerators	
	Waste treatment systems and/or water treatment systems	
	Heating and/or cooling systems	
	Paint Booths	
	Sub-grade pits	
	Automotive repair/maintenance	**X**
	Pesticide/herbicide storage	
	Salvage operations	
	Metal finishing (i.e., electroplating, chrome plating, galvanizing, etc.)	
	Other processes or equipment	
Above ground Chemical or Waste Storage	Evidence of aboveground storage tanks	
	Drums, barrels and/or containers ≥ 5 gallons	
	Cleaning and/or similar supplies	
	MSDS	

Category	Item or Feature	Item or Feature Observed
Underground Chemical or Waste Storage, Drainage or Collection Systems	Evidence of underground storage tanks or ancillary UST equipment	
	Sumps, cisterns, catch basins and/or dry wells	
	Grease traps	
	Septic tanks and/or leach fields	
	Oil/water separators	
	Pipeline markers	
	Interior floor drains	**X**
	Suspect patched concrete or asphalt	**X**
Electrical Transformers/ PCBs	Pad-or pole-mounted transformer and/or capacitor	**X**
	Generators	
Evidence of Releases or Potential Releases	Stressed vegetation	
	Stained soil	
	Significant stained pavement or similar surface	
	Trash, debris and/or other waste materials	**X**
	Dumping or disposal areas	
	Construction/demolition debris and/or dumped fill dirt	
	Surface water discoloration, odor, sheen, and/or free-floating product	
	Strong, pungent or noxious odors	
	Exterior pipe discharges and/or other effluent discharges	
	Compressor blowdown	
Other Notable Site Features	Surface water bodies	
	Quarries or pits	
	Wells	
	Wastewater lagoons	
	Suspect asbestos containing materials (ACMs)	

6.7.1 Automotive Repair/Maintenance

Automotive service and repair were historically conducted on the property.

6.7.2 Interior Floor Drains

An interior drain was observed in the warehouse/former maintenance area of the building. No additional interior drains were noted.

6.7.3 Suspect Patched Concrete or Asphalt

Concrete patching was noted in the warehouse/former service area of the building. The purpose of these patches is not known.

6.7.4 Pole- or Pad-Mounted Transformer and/or Capacitators

A pad-mounted transformer is located on western side of the property. A label indicating the presence/absence of PCB-containing oils was not observed on the transformer; however, the transformer appeared to be in good condition.

6.7.5 Trash, Debris and/or Other Waste Materials

A dumpster enclosure is located on the western side of the property. The Lexington Fire Department is not currently utilizing this area. Rather a dumpster is located inside the former service area.

7.0 INTERVIEWS

When conducting interviews, Shield attempts to contact owners, occupants, owner's representatives, and other individuals with pertinent information regarding the subject site or surrounding areas. For this ESA, Shield interviewed the following people to obtain information:

- Mr. William Ziering, current property owner

Mr. Ziering provided information regarding current and historic site operations. Mr. Ziering purchased the property in 2017. He was unaware of any environmental issues associated with the property nor was he aware of any USTs located on the property. Further, Mr. Ziering believed the property was initially occupied by K-Mart and was vacant for some time prior to occupancy by Goodwill Industries (southern portion of building, not part of this property transaction) and Windstream. Windstream occupied the property from 2004 through 2022. Any additional information gathered during the interview process is contained throughout this Phase I ESA.

Additionally, Mr. Ziering provided a copy of a Phase I ESA completed prior to his purchase in 2017. The 2017 Phase I ESA indicates the former UST was located on the property to the south, currently owned by Goodwill Industries; however, the fill port to the UST was located inside the former service area on the subject property. No RECS were identified in the 2017 Phase I ESA.

8.0 EVALUATION

On behalf of LFUCG, Shield performed a Phase I ESA of the property located at 130 & 134 W. New Circle Road in Lexington, Fayette County, Kentucky, in conformance with the scope and limitations of ASTM Practice E1527-21. Any exceptions to, or deletions from this practice are described in Section 8.2 of this report. This ESA included reconnaissance of the subject site, a search and review of readily available government records, interviews with persons knowledgeable of the site, a review of historical information, and correspondence with appropriate local regulatory agencies.

8.1 Significant Findings

- The property is owned by William Ziering Trust and consist of a total of 8.43 acres. Suite 170 consists of approximately 67,500-square feet and was constructed in 1968. The building is currently being used by the Lexington Fire Department for their annual Toy Drive. Prior to Lexington Fire Department's occupancy, the building was utilized as office space for Windstream. The exterior of the property consists of paved parking space and a fenced area containing covered parking and several small ancillary structures. This fenced area was utilized for fleet storage by Windstream and is not currently being used by the Lexington Fire Department.

- The interior of Suite 170 consists of office space, storage areas, restrooms, and open warehouse space. The warehouse portion of the building may have historically been used for automotive service when K-Mart occupied the property. Some concrete patched areas and one (1) floor drain were observed in this area.

- A concrete curbed area is located on the western exterior of the building. The purpose of this area is not known; however, it may have been the former location of an aboveground storage tank (AST).

- A fenced area is located on the northern portion of the property. Within the fenced area is covered parking, formerly used by Windstream for fleet parking, two (2) small storage buildings and a third building located near the northwestern corner that was not accessible during site reconnaissance.

- Based on available historic documentation the property appears to have been undeveloped/agricultural land prior to development for commercial purposes in the

mid-1960s. The entire property was originally occupied by a K-Mart retail store. Additional occupants have included Alltel and Windstream. The property is currently being utilized by the Lexington Fire Department as their annual toy drive headquarters. Mr. William Ziering, current property owner, indicated Windstream took occupancy of the property in 2004 and vacated the premises in December 2023. The property was vacant until the Lexington Fire Department's occupancy.

- Mr. Ziering provided a copy of a Phase I ESA completed prior to his purchase in 2017. The 2017 Phase I ESA indicates the former UST was located on the property to the south, currently owned by Goodwill Industries; however, the fill port to the UST was located inside the former service area on the subject property. No RECS were identified in the 2017 Phase I ESA.

- According to information in the KDWM, USTB files a 1,000-gallon waste oil UST was installed on the property in 1964 and was utilized to contain waste liquids generated during automobile servicing by K-Mart. Based on information located in the files it appears the UST was formerly located on the western side of the building, near the fenced area which is located near the center of the building. It appears the fill port to the UST was located inside the service area within the building. The UST was removed in 1991. Following removal soil impacts (oil and grease and total lead) were identified. In August/September 1993 a total of 222 cubic yards of soil was removed for proper disposal. A letter of no further action was issued for the removal in January 1996.

8.2 Deviations

Historical information was not available in five (5)-year intervals. A person with intimate knowledge of the property and historic operations was not available to interview. Additionally, a chain-of-title was not provided. It is Shield's opinion that these deviations do not represent a significant data gap nor prevent Shield from making conclusions regarding RECs associated with the property.

8.3 Conclusions

Shield has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-21 of the property located at 130 & 134 W. New Circle Road in Lexington, Fayette County, Kentucky. Any exceptions to or deletions from this practice are

described in Section 8.2 of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the property.

8.4 Opinions and Recommendations

No further investigative work is recommended at this time.

9.0 NON-SCOPE SERVICES

No non-scope services were requested.

APPENDIX A

SHIELD
ENVIRONMENTAL ASSOCIATES, INC.

October 17, 2023

Mr. Gregory Lubeck, P.E.
LFUCG Division of Water Quality
125 Lisle Industrial Avenue
Lexington, Kentucky 40511

Re: Proposal for Phase I Environmental Site Assessment
130 (Suite 170) & 134 W. New Circle Road, Lexington, Kentucky 40505
Shield Proposal No. 23-207

Dear Mr. Lubeck,

Shield Environmental Associates, Inc. (Shield) is pleased submit this proposal to perform a Phase I Environmental Site Assessment (ESA) on the property identified above. We understand the property consists of a portion of 130 W. New Circle Road and all of 134 W. New Circle Road which collectively measure approximately 8.43-acres. Further, we understand that the purpose of performing this study is to identify any potential environmental liabilities as part of a proposed property acquisition. The following narrative outlines our qualifications to perform this work and provides a proposed scope of work and cost estimate for professional environmental services.

QUALIFICATIONS OF SHIELD

Shield is a firm of professional engineers, geologists, and environmental scientists practicing in the fields of environmental compliance, hydrogeology and groundwater management, emergency response management, geotechnical engineering, facility engineering/design, construction management, and risk, solid, and hazardous waste management including air quality services. Members of the firm collectively hold professional registrations throughout the United States.

The following presents a brief summary of Shield's qualifications to perform such a study:

- Shield has provided Phase I ESA services for a variety of commercial, industrial, manufacturing, and agricultural sites throughout the United States and abroad.
- We are familiar with ASTM and AAI guidelines for preparation of such a study.
- Shield has previously prepared and provided Phase I ESA reports for commercial clients, real estate developers, law firms, municipalities, and commercial lenders throughout Kentucky. Shield has also performed environmental due diligence at facilities in numerous foreign countries on behalf of multi-national clients.

Louisville, KY

PROPOSED PROJECT APPROACH

Shield will perform a Phase I Environmental Site Assessment for the project site and will exercise the standard of care normally exercised by national, and local consulting, architectural, engineering and construction organizations on similar projects. This work will include, but is not limited to, relevant provisions of *ASTM E 1527-21*, a consensus document that outlines key elements for the conduct of Phase I ESAs under 40 CFR Part 312 related to *All Appropriate Inquiries* (AAI). Specifically, Shield will perform the following scope of work for this assessment:

1. **Data Collection and Review**. This task will consist of a record search to establish the past history of the site, whether or not past activities may have environmentally impacted the site and the status of environmentally related permits and/or regulatory actions. The following items will be specifically addressed:

   (a) Review publicly available documents for information regarding historical site use and previous ownership, where appropriate. Types of records that are typically reviewed may include aerial photographs, Sanborn maps, historical topographic maps, city directories and information at various local offices (e.g., PVA, Planning & Zoning, and Public Works). We have not included a certified title search in the proposed scope.

   (b) Contact State regulatory agencies to determine the nature and status of any environmental issues or concerns including applicable environmental permits, reported hazardous materials and/or petroleum releases, environmental covenants or restrictions, and/or existing and historic investigations, if any, on the subject property and significant adjoining properties.

   (c) Contact local emergency agency to establish whether they are aware of any environmentally significant hazardous materials or petroleum spills that may have occurred on the property or adjacent properties.

   (d) Review resources including, but not limited to, topographic maps, geologic maps, soil surveys and local floodplain maps to establish the site setting.

   (e) Examine readily available aerial photographs of the site.

   (f) Examine National Wetlands Inventory maps to establish if the site is located within a wetland area.

   (g) Conduct interviews with available individuals familiar with the site and historical property use including owners, occupants, tenants and other persons familiar with site use.

2. **Site Visit/Visual Assessment**: Shield will perform a site-reconnaissance to include the following:

   (a) Observation of the site for possible underground tanks, sumps, clarifiers, and other subsurface structures or features.

(b) Identification of current and past uses, including key industrial operations or activities, at the site, adjoining properties, and surrounding areas to the extent they can be visually or physically observed from the subject site.

(c) Visual inspection of the site for obvious signs of chemical or hazardous substances releases including dumping, past chemical spillage, distressed vegetation, or other signs which may indicate possible environmental impacts to the subject site.

(d) Visual inspection of the site for potential asbestos containing building materials, if applicable. This proposal does not include collection or analysis of asbestos samples.

(e) Observe and identify ownership of electrical transformers that may be on-site or immediately adjacent to the site.

(f) Photographic documentation of significant site conditions will be performed and these features will be addressed in the final report.

The above activities will help to identify relevant site features and observe the topography of the area and current site conditions. Notations would be made as to possible impacted areas based on visual observations.

3. **Information to be Provided by Client/User**: In accordance with the ASTM standard and related guidance document, Shield requests that the client provide information relative to the following items where applicable and appropriate:

   (a) Title records;

   (b) Any environmental liens or activity and use limitations of the subject site;

   (c) Specialized knowledge of environmental impairment related to the site obtained through disclosure from the property owner/operator;

   (d) Commonly known information that may not be readily available in the public record, such as existing environmental investigation or assessment reports;

   (e) Any reduction of the property valuation as a result of environmental impairment; and

   (f) Other information relevant to the intent of this assessment appropriate for environmental due diligence documentation.

4. **Report Preparation**. Shield will prepare a Phase I ESA report summarizing the findings of our assessment based upon the scope of work completed. The report will summarize our review of historical and readily available public records relevant to the sites. The ESA report will provide an evaluation of current site conditions based on the review of available information and interviews with the site contact and others. As discussed, recommendations for additional site assessment activities, if appropriate and/or warranted will be provided upon conclusion of the Phase I ESA study.

SCHEDULE AND COST ESTIMATE

Shield can initiate activities on this study within one (1) week of receiving your authorization to proceed and can complete this study within three (3) weeks of completing the site walk. Authorization to proceed can be initiated by signing the authorization below and returning via fax or mail, or by transmittal of a letter or email authorizing us to proceed. Delays in authorization to proceed and/or access to records or facilities could extend the amount of time necessary to complete the ESA.

[redacted].

The study will address only the specific services described above and is not intended to address actual subsurface conditions or the sampling of actual or suspect asbestos-containing building materials, PCB-containing materials, lead-based paints or coatings or radon. Additionally, the proposed study does not include any soil, groundwater, or air analysis.

We look forward to working with you on this project, and we appreciate the opportunity to perform this work on your behalf. This proposal is valid for a period of 30 days, except that the deadline for completion will change if authorization is delayed. Please contact either of the undersigned at (859) 294-5155 if you have any questions or concerns.

Sincerely,
SHIELD ENVIRONMENTAL ASSOCIATES, INC.

PROPOSAL ACCEPTED BY:

Signature _____ Date _____

Name _____ Title _____

SHIELD ENVIRONMENTAL ASSOCIATES, INC.

SHIELD ENVIRONMENTAL ASSOCIATES, INC.
STANDARD TERMS AND CONDITIONS

The terms and conditions below shall govern agreements made between Shield Environmental Associates, Inc., a corporation registered in Kentucky with its principal place of business located at 948 Floyd Drive, Lexington, Kentucky 40505, hereinafter referred to as "SHIELD.", and any party seeking to retain its services, hereinafter referred to as "CLIENT," unless otherwise established in a separate contract document signed by both parties.

I. SCOPE OF SERVICES

The Scope of Services shall be as described in the Proposal attached hereto and incorporated herein by reference.

II. FEES

The charges for the services, labor and materials provided by SHIELD hereunder shall be based on the fee schedule set forth in the Proposal. CLIENT agrees to pay all of such charges. SHIELD agrees to provide CLIENT with a detailed description of services performed for CLIENT and the fees and charges associated with such services on a form approved by CLIENT.

III. BILLING AND PAYMENT

CLIENT recognizes that time is of the essence with respect to payment of SHIELD's invoices, and that timely payment is a material part of the consideration of this AGREEMENT. CLIENT shall pay SHIELD for services performed in U.S. funds drawn upon U.S. Banks and in accordance with the rates and charges set forth in the proposal. Invoices will be submitted by SHIELD on a monthly basis, and shall be due and payable within thirty (30) calendar days of invoice date. If CLIENT objects to all or any portion of an invoice, CLIENT shall so notify SHIELD within fourteen (14) calendar days of the invoice date, identify the cause of disagreement, and pay when due that portion of the invoice, if any, not in dispute.

CLIENT shall pay an additional charge of one-and-one-half (1.5) percent (or the maximum percentage allowed by law, whichever is lower) of the invoiced amount per month for any payment received by SHIELD more than thirty (30) calendar days from the date of the invoice, excepting any portion of the invoiced amount in dispute and resolved in favor of CLIENT. Payment thereafter shall first be applied to accrued interest and then to the principal unpaid amount. Payment of invoices is in no case subject to unilateral discounting or set-offs by CLIENT.

Application of the percentage rate indicated above as a consequence of CLIENT's late payments does not constitute any willingness on SHIELD's part to finance CLIENT's operation, and no such willingness should be inferred. If CLIENT fails to pay undisputed invoiced amounts within thirty (30) days of the date of invoice, SHIELD may at any time, without waving any other claim against CLIENT and without thereby incurring any liability to CLIENT, suspend or terminate this AGREEMENT.

IV. SOLE AND EXCLUSIVE STANDARD BY WHICH SHIELD'S PERFORMANCE IS MEASURED

Shield will perform the work under this agreement as an independent contractor/consultant utilizing reasonable care and skill in accordance and consistent with customary industry standards and exercised under similar conditions by contractors/consultants performing these services at the same time and in the same or similar locality. This standard of care is the sole and exclusive standard of care that will be applied to measure shield's performance of the work. There are no other representations or warranties made by shield except those included specifically herein. In particular, but not by way of limitation, no implied warranty or merchantability of fitness for a particular purpose shall apply.

All recommendations, findings, and conclusions made by SHIELD will be made to the best of SHIELD's knowledge, opinion, and belief, based upon information CLIENT made available to SHIELD at the time of review, and upon a variety of factors which may include, but are not limited to the following: federal, state, and local laws, rules, codes, regulations and ordinances; market conditions; energy cost wage rates; and political climate. A change of any of the factors upon which the review is based may adversely affect the recommendations, findings, and conclusions, if any, expressed by SHIELD.

V. RESPONSIBILITY OF CLIENT TO PROVIDE ACCURATE AND SUFFICIENT INFORMATION

It is CLIENT's responsibility to disclose to SHIELD prior environmental reports and analytical results relating to the work that is the subject of this agreement and to advise of known hazardous wastes or hazardous substances, petroleum products, underground storage tanks and other matters relevant to the work that is the subject of this Agreement. In addition, unless they are obvious and clearly identifiable in the field, it is CLIENT's responsibility to disclose to SHIELD its knowledge of the presence of an accurate location of man-made objects relative to any field test or boring locations, although SHIELD will take customary and reasonable precautions to avoid damage to underground utilities and other underground objects. Unless otherwise noted, CLIENT warrants the accuracy and sufficiency of the information, plans, specifications and other material that it provides to SHIELD for use in connection with SHIELD performing its work under this Agreement, irrespective of whether such information and materials are provided directly by CLIENT to SHIELD or indirectly from one of CLIENT's other contractors, dealers or agents.

VI. SHIELD'S WORK IS EXCLUSIVELY FOR CLIENT, AND EXCLUSIVELY FOR THE PURPOSES CONTEMPLATED BY THE PARTIES WITH RESPECT TO THIS AGREEMENT, AND CLIENT HAS LEGAL AUTHORITY TO EXECUTE AGREEMENT ON BEHALF OF OWNER(s).

The work to be performed by SHIELD under this Agreement is solely for the benefit of CLIENT. This Agreement shall not be construed as creating any contractual relationship of any kind between SHIELD and any third party. It is the intent of SHIELD and CLIENT that there are no third party beneficiaries of this Agreement. The fact that CLIENT may enter into other agreements with third parties that provide SHIELD the authority to inspect or reject work being performed by the third party shall not give rise to any duty or responsibility on the part of SHIELD in favor of such third party.

Further, CLIENT covenants and agrees that CLIENT has full legal authority, as agent, to contract for all of the owner(s) and agrees that representations, warranties, and indemnification provided herein extend to SHIELD and its agents on behalf of these parties, but the work performed will not give rise to any responsibility on the part of SHIELD and its agents to these third parties.

The information and materials provided by SHIELD to CLIENT in connection with the work shall be utilized by CLIENT only for the purposes contemplated by this agreement, and shall not be provided by CLIENT to third parties for their use without the prior written consent of SHIELD, except that SHIELD agrees that information and materials provided by SHIELD to CLIENT may be provided to and used by local, state or federal agencies, CLIENT's attorneys, and pursuant to any valid court order. Additionally, an exception would be granted for a Phase I Environmental Site Assessment (ESA) which would be provided to a lending institution.

SHIELD agrees that all reports and other documents prepared for CLIENT pursuant to this agreement are the property of CLIENT. SHIELD also agrees that it will not disclose to any third party any documents, reports, laboratory data or other information generated, created or produced for CLIENT pursuant to this agreement unless required by law, pursuant to a valid court order or upon written instruction of CLIENT.

VII. TERMS AND CONDITIONS OF FIELD WORK

SHIELD is to have free access to the applicable properties at the times and on the dates field activities are scheduled. Delays to SHIELD beyond an aggregate total of 60 minutes during inspection are subject to waiting time charges to the extent such delays are caused by CLIENT or its employees, contractors or agents.

SHIELD shall take reasonable and customary precautions to locate all underground utilities, tanks, lines and cables or other underground utilities before performing field work that might damage underground utilities tanks, lines, cables or other underground structures. Delays due to locating or arising from damage to underground structures and cables are subject to waiting time charges.

VIII. INDEMNIFICATION

Each party hereto shall fully indemnify the other for loss and expense (including reasonable attorney's fees, settlements and judgments) and liability resulting from injury to or death of any person (including any employee of either party) or loss of or damage to any property (including the property of either party) or the environment and resulting solely from the act or omission, negligent or otherwise, of the indemnifying party or its agents, employees, subcontractors or assigns.

Further, each party hereto agrees to indemnify the other in proportion to the former's fault against all loss or expense (including reasonable attorney's fees, settlements and judgments) and liability resulting from injury to or death of any person (including any employee of either party) or loss or damage to property (including the property of either party) or the environmental and resulting jointly from the acts or omissions, negligent or otherwise, of the indemnifying party, its agents, employees, subcontractors or assigns and the acts or omissions, negligent or otherwise, of the party and/or any third party.

IX. ARBITRATION

All claims, disputes and other matters in question between the CLIENT and SHIELD arising out of, or relating to, this Agreement or the breach thereof shall be decided by arbitration in accordance with the Rules of the American Arbitration Association then existing and the Federal Rules of Civil Procedure regarding this discovery, unless the parties mutually agree otherwise. The foregoing agreement to arbitrate and any other agreement to arbitrate with an additional person or persons duly consented to by the CLIENT and SHIELD shall be specifically enforceable under the prevailing arbitration law. The award rendered by the arbitrators shall be final, and judgment may be entered upon it in accordance with applicable law in any court having jurisdiction thereof.

Notice of the demand for arbitration shall be filed in writing with the other party and with the American Arbitration Association. The demand to arbitration shall be made within a reasonable time after the claim, dispute or other matter in question has arisen, and in no event shall it be made after the date when institution or legal or equitable proceeding based on such claim, dispute or other matters in question would be barred by the applicable statute of limitations.

Unless otherwise agreed in writing, SHIELD shall carry on the work and maintain its progress during any arbitration proceedings, and the CLIENT shall continue to make payments to SHIELD in accordance with this Agreement.

X. DISCLAIMER

The procedures performed do not assure that contamination will be detected or that contamination detected is indicative of the full scope of possible contamination at the site. Further, the lab analysis and organic vapor analyzer readings must be viewed as an indication only of conditions in the borings drilled. Further testing in any boreholes or in groundwater sampling can produce different test results. However, nothing in this section limits or modifies the standard by which SHIELD's performance will be measured as provided in Section IV of this Agreement.

XI. COMPLETE AGREEMENT

These Terms and Conditions, along with its attachments, including the SHIELD proposal, rate schedule or other documents constituting this AGREEMENT, incorporates all of the previous and contemporaneous discussions, representations, understandings, and agreements between the parties with respect to the subject matter of this Agreement. The terms and conditions expressed in this agreement shall not be altered except in writing, signed by both parties.

XII. TERMINATION

CLIENT or SHIELD may terminate this AGREEMENT for reasons identified elsewhere in this AGREEMENT, or for other reasons which may arise. In the event such termination becomes necessary, the party effecting termination shall so notify the other party, and termination will become effective fourteen (14) calendar days after receipt of the termination notice. Irrespective of which part shall effect termination or the cause thereof, CLIENT shall within thirty (30) days of termination remunerate SHIELD for services rendered and costs incurred, in accordance with SHIELD's prevailing fee schedule and expense reimbursement policy. Services shall include those rendered up to the time of termination, as well as those associated with termination itself, such as demobilizing, modifying schedules, reassigning personnel, and so on. Costs shall include those incurred up to the time of termination and post-termination activities, such as demobilization, decontamination, disposal and replacement of contaminated consumables and so on. When a “lump sum” agreement has been entered into SHIELD's termination charges shall include an allowance for profit as a result of termination.

XIII. APPLICABLE LAW

This Agreement is governed by, and will be construed in accordance with the laws of the State of Kentucky.

XIV. MISCELLANEOUS

It is understood and agreed that contractor/consultant is not and has no responsibility as a handler, operator, treater or storer, transporter, or arranger for transport or disposal of hazardous or toxic substances found or identified at a site, and that contractor/consultant shall not be responsible to undertake or arrange for the handling, removal, treatment, storage, transportation and disposal of hazardous substances or constituents found or identified at a site. In addition, if environmental conditions are such that disclosure should be made to an environmental agency, the CLIENT will be responsible for that notification. SHIELD will not sign hazardous waste manifests on behalf of CLIENT without separate authorization to act as CLIENT's agent.

By authority of the Division of Central Purchasing of the Lexington-Fayette Urban County Government, you are hereby requested to furnish the items/services as set forth in this document. Ship and invoice in accordance with the instruction, terms, and conditions herein. The signed official authorizes the entry of the order and certifies that funds are available.

1. Address shipment exactly as shown in 'SHIP TO' address above. Shipments must be sent FOB Destination Prepaid & Added.
2. When all items have been shipped submit your invoice directly to the Division of Accounting, 200 East Main Street, Lexington, KY 40507 (859) 258-3310
3. Payments cannot be authorized for partial shipments, except for blanket purchase orders.
4. Do not include Kentucky Sales Tax; Exemption Certificate No. CT-34-100 applies.
5. All merchandise supplied to the government must fully comply with OSHA standards.
6. Vendor shall provide two copies of Material Safety Data Sheet - MSDS - on material covered by OSHA Standard 1910-1200 and confirm it is asbestos free as a condition of purchase.
7. LFUCG may assess administrative fees for invoices not issued in a timely manner.
8. LFUCG will make all reasonable efforts to pay outstanding invoices within thirty (30) days of receipt. Vendor may impose late payment charges not to exceed one per cent per month to outstanding balances which are not paid within thirty days. However, vendor agrees that in circumstances beyond the direct control of the Urban County Government (such as required review of payments by external agencies), in cases where an invoice is disputed, or in cases of improper invoicing by the vendor no such penalty shall be imposed. Vendor also agrees that, in the case of partial shipments and/or backordered items, no penalty shall be assessed until thirty (30) days after receipt of invoice for the completed order.
9. The signed official hereby certifies on behalf of the vendor that the vendor fully complies with 2 CFR 200.322, to the extent that 2 CFR 200.322 applies to this PO.

Authorized Signature

1. **Site Name:** 130 West New Circle Rd.

2. **Site Street Address:** 130 West New Circle Rd.

3. **City, County, State:** Lexington, KY 40505

4. **Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?**

   ☐ **YES** ■ **NO**

   If YES, please describe the nature of the liens:

5. **Are you aware of an activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been flied or recorded in a registry under federal, tribal, state or local law?**

   ☐ **YES** ■ **NO**

   If YES, please describe the nature of the limitation:

6. **As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you the current property owner? Or are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?**

   No

7. **Does the purchase price being paid for this property reasonably reflect the fair market value of the property?**

☐ **YES** ■ **NO** ☐ **Not Applicable (for property refinance)**

If NO, and have concluded that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

No offer to purchase the property has been made as of 11/13/23. Appraisal being conducted.

8. **Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,**

Do you know the past use of the property?

■ **YES** ☐ **NO**

If YES, please describe past uses (e.g. agricultural, gas station, undeveloped):

Retail and telecommunication offices/service

Do you know of specific chemicals that are present or once were present at the property?

☐ **YES** ■ **NO**

If YES, please list chemicals:

Do you know of spills or other chemical releases that have taken place at the property?

☐ **YES** ■ **NO**

If YES, please describe:

_____

_____

Do you know of any environmental cleanups that have taken place at the property?

☐ **YES** ■ **NO**

If YES, please describe:

_____

_____

9. As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of releases at the property?

☐ **YES** ■ **NO**

If YES, please describe:

_____

APPENDIX B

As required by 40 CFR 312 21(d), the following statement is made by the Environmental Professional on the project:

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in 312 10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

C. Dow Porter
Principal

Report review and assistance on the projects was provided by the following individuals:

Elizabeth Greathouse
Environmental Technician

C. Dow Porter

Managing Principal

Mr. Porter has accrued over 30 years of professional experience in the environmental field with 22 years as an environmental consultant. He currently serves as the President of Shield and in addition manages the Assessment and Remediation Group. Over the course of his career, he has assisted many industrial facilities and municipalities with industrial compliance issues including the proper characterization and handling of solid, special, and hazardous waste.

Mr. Porter has served in the capacity of Principal in Charge for numerous Brownfield projects and site investigations including Phase I/II/III projects and Hazardous Material Assessments. Additionally, he has experience preparing and implementing site investigation work plans and remedial action plans.

Project-Related Experience

- **Southern Wood Treatment (KDWM)** – Principal in Charge of a State-lead emergency remediation of soils impacted with high arsenic levels. Project involved rapid site investigation, corrective action planning, resident relocations, soil characterization/excavation/disposal (34,750 tons), and complete site restoration.
- **Castle & Key, Inc.** – Principal in Charge of due diligence Phase I/II ESA and Asbestos/Lead-Based Paint Assessments on the Old Taylor Distillery. Project consisted of pursuing liability protection through Kentucky's Brownfield Redevelopment Program and a State income tax credit for conducting a qualified Voluntary Corrective Action.
- **University of Kentucky PS5** – Principal in Charge of Site Characterization at the former Kennedy Book Store location which had previously been a gasoline service station. Additional services included the design of a vapor intrusion system, voluntary corrective action, and gaining acceptance into the Kentucky Brownfield Redevelopment Program.
- **GCH Insurance** – Principal in Charge of environmental due diligence at the former AutoTech Services which had previously been utilized as a transmission repair shop. Services included Phase I ESA, Corrective Action Plan, Property Management Plan, oversight of Voluntary Corrective Action to address petroleum related impacts and acceptance into Kentucky's Brownfield Redevelopment Program.
- **Lexington Transit Authority** – Principal in Charge of environmental due diligence at the former GE Glass Plant. Services included Phase I/II ESAs, Corrective Action Plan, Property Management Plan, oversight of Voluntary Corrective Action, design of a vapor intrusion mitigation system and acceptance into Kentucky's Brownfield Redevelopment Program.

Elizabeth Greathouse

Ms. Greathouse joined Shield Environmental Associates, Inc. as an Environmental Technician in August 2002 and routinely performs Phase I and Phase II Environmental Site Assessments.

Ms. Greathouse has over 12 years of experience collecting soil samples associated with industrial sites and underground storage tank sites. She also has experience collecting water samples associated with groundwater monitoring wells, including low flow sampling events. She has participated in reviewing data analysis, preparing investigative work plans, and prepared final reports on a variety of subject sites.

Asbestos Inspector Certification I14-06-1516

Project-Related Experience

Field Experience:

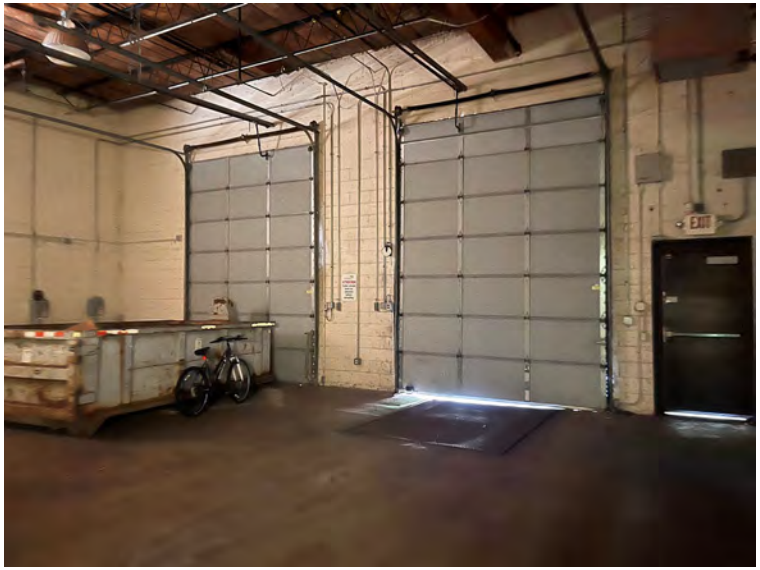
- Concord Custom Cleaners – Field technician during site investigation of a former dry cleaner contaminated with TCE. Oversaw potassium permanganate injection for remedial action, reviewed analytical data, and assisted with final report preparation.
- Link Belt Construction Equipment – Field technician overseeing potassium permanganate injection on contaminated manufacturing facility.
- Harlan County Landfill – assisted with work plan preparation and review of analytical data from site characterization activities.
- J.M. Mills Landfill – Peterson Puritan OU2 Superfund Site – assisted with collection and review of analytical data from field sampling activities.
- Project Manager – Completed numerous Phase I, Phase II Environmental Site Assessments on a variety of commercial and industrial facilities.

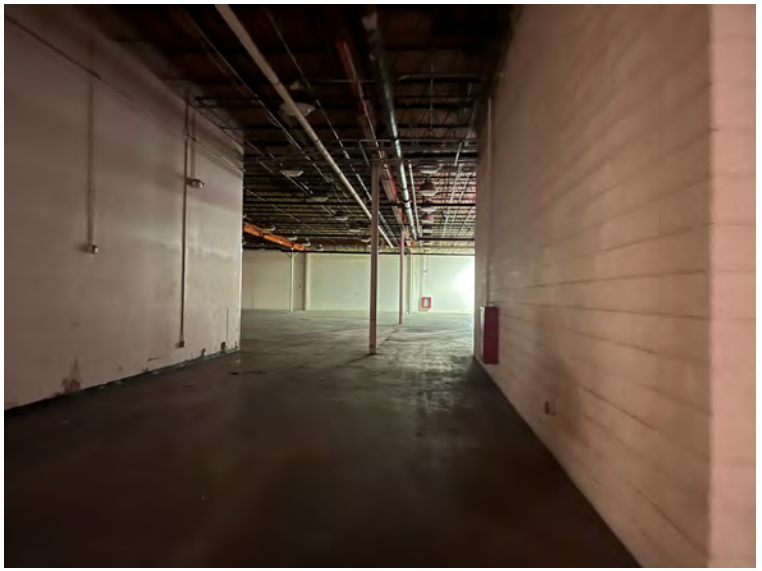
APPENDIX C

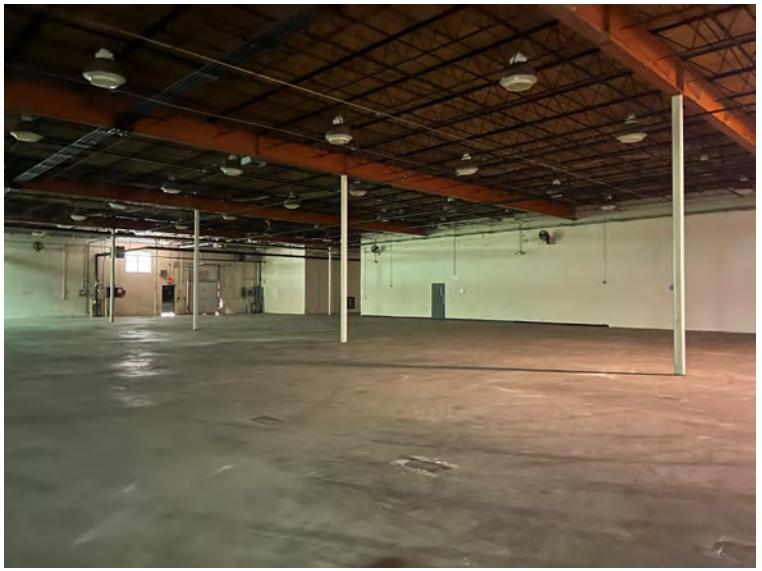
Building exterior (Suite 170)

Suite 170 building interior (office area)

Suite 170 building interior (warehouse/former automotive service area)







Floor drain in the warehouse area

Patched areas in warehouse area

Curbed concrete area on the western side of the property; likely where AST was formerly located.

Approximate location of former UST

Fenced area formerly used by Windstream for fleet vehicle parking

Two (2) former storage building in the fenced area

Interior of one (1) of the storage buildings

Inaccessible building located within the fenced area

Concrete area and platform located in fenced area near the inaccessible building

Parking lot (134 W. New Circle Road parcel)

Additional view of parking lot

Railroad tracks located along the northern property boundary

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

KY RGA HWS ---------- Recovered Government Archive State Hazardous Waste Facilities List
KY RGA LF ---------- Recovered Government Archive Solid Waste Facilities List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 07/24/2023 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 07/24/2023 has revealed that there is 1

RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

KY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Protection's Uncontrolled Site Branch List.

A review of the KY SHWS list, as provided by EDR, and dated 06/07/2023 has revealed that there are 15 KY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

KY PSTEAF: The Underground Storage Tank Branch (USTB) has ranked all PSTEAF reimbursable facilities requiring corrective action, in accordance with 401 KAR 42:290. Directive letters will be issued on the basis of facility ranking and available PSTEAF funding in sequential order as ranked. For example, Rank 2 facilities will be issued directives before Rank 3 facilities.

A review of the KY PSTEAF list, as provided by EDR, and dated 06/01/2023 has revealed that there are 2 KY PSTEAF sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/24/2023 has revealed that

there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

FINDS:
Registry ID: 110003228882

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

CVS PHARMACY #6941 (Continued) **1014923640**

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: P001
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%

Waste Code: P012
Waste Description: Arsenic Oxide As2o3 (Or) Arsenic Trioxide

Waste Code: P075
Waste Description: Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts

Waste Code: P081
Waste Description: 1,2,3-Propanetriol, Trinitrate (R) (Or) Nitroglycerine (R)

Waste Code: P108
Waste Description: Strychnidin-10-One, & Salts (Or) Strychnine, & Salts

Waste Code: P188
Waste Description: Benzoic Acid, 2-Hydroxy-, Compd. With (3as-Cis)-1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethylpyrrolo[2,3-B]Indol-5-Yl Methylcarbamate Ester (1:1) (Or) Physostigmine Salicylate

Waste Code: P204
Waste Description: Physostigmine (Or) Pyrrolo[2,3-B]Indol-5-Ol, 1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethyl-Methylcarbamate (Ester), (3as-Cis)-

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U010
Waste Description: Azirino [2',3':3,4]Pyrrolo[1,2-A]Indole-4,7-Dione, 6-Amino-8-[[(Aminocarbonyl)Oxy]Methyl]-1,1a,2,8,8a,8b-Hexahydro-8a-Methoxy-5-Methyl-, [1as-(1aalpha, 8beta, 8aalpha, 8balpha)]- (Or) Mitomycin C

Waste Code: U031
Waste Description: 1-Butanol (I) (Or) N-Butyl Alcohol (I)

Waste Code: U034
Waste Description: Acetaldehyde, Trichloro- (Or) Chloral

Waste Code: U035
Waste Description: Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U058
Waste Description: 2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide

Waste Code: U059

CVS PHARMACY #6941 (Continued) **1014923640**

Waste Description: 5,12-Naphthacenedione, 8-Acetyl-10-[(3-Amino-2,3,6-Trideoxy)-Alpha-L-Lyxo-Hexopyranosyl)Oxy]-7,8,9,10-Tetrahydro-6,8,11-Trihydroxy-1-Methoxy-, (8s-Cis)- (Or) Daunomycin

Waste Code: U070
Waste Description: Benzene, 1,2-Dichloro- (Or) O-Dichlorobenzene

Waste Code: U072
Waste Description: Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene

Waste Code: U089
Waste Description: Diethylstilbesterol (Or) Phenol, 4,4'-(1,2-Diethyl-1,2-Ethenediyl)Bis, (E)-

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U129
Waste Description: Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane

Waste Code: U132
Waste Description: Hexachlorophene (Or) Phenol, 2,2'-Methylenebis[3,4,6-Trichloro-

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U151
Waste Description: Mercury

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U165
Waste Description: Naphthalene

Waste Code: U188
Waste Description: Phenol

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U201
Waste Description: 1,3-Benzenediol (Or) Resorcinol

Waste Code: U204
Waste Description: Selenious Acid (Or) Selenium Dioxide

Waste Code: U205
Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

CVS PHARMACY #6941 (Continued) **1014923640**

Waste Code: U206
Waste Description: D-Glucose, 2-Deoxy-2-[[(Methylnitrosoamino)-Carbonyl]Amino]- (Or) Glucopyranose, 2-Deoxy-2-(3-Methyl-3-Nitrosoureido)-,D- (Or) Streptozotocin

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U279
Waste Description: U279

Waste Code: U411
Waste Description: U411

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

KENTUCKY GLASS PLANT, GE LIGHTING LLC (Continued) **1000422245**

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D011
Waste Description: Silver

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

KENTUCKY GLASS PLANT, GE LIGHTING LLC (Continued) **1000422245**

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U008
Waste Description: 2-Propenoic Acid (I) (Or) Acrylic Acid (I)

Waste Code: U096
Waste Description: Alpha,Alpha-Dimethylbenzylhydroperoxide (R) (Or) Hydroperoxide, 1-Methyl-1-Phenylethyl- (R)

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U161
Waste Description: 4-Methyl-2-Pentanone (I) (Or) Methyl Isobutyl Ketone (I) (Or) Pentanol, 4-Methyl-

Waste Code: U202
Waste Description: 1,2-Benzisothiazol-3(2h)-One, 1,1-Dioxide, & Salts (Or) Saccharin, & Salts

Waste Code: U213
Waste Description: Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U238
Waste Description: Carbamic Acid, Ethyl Ester (Or) Ethyl Carbamate (Urethane)

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Waste Code: U382
Waste Description: Carbamodithioic Acid, Dimethyl-, Sodium Salt (Or) Sodium Dimethyldithiocarbamate

Name:	TRANSIT AUTHORITY OF LEXINGTON (LEXTRAN) - LEXTRAN HEADQUARTERS COMPLEX
Address:	200 W LOUDON AVE
City,State,Zip:	LEXINGTON, KY 40508
Facility Id:	40513
Status:	**Closed**
Description:	GE GLASS PLANT - Considered CLOSED as "Unfounded" by Superfund on 12/04/2001. Sampling collected by inspectors detected lead ranging from <50ppm lead to 195 ppm lead. Source of lead was attributed to anthropogenic sources, not the operation of the facility. This status changed by Nathan hancock after conversion from Not/Com per information provided by Tim Hubbbard.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

IBM CORP (Continued) **1000108976**

Waste Code:	D003
Waste Description:	Reactive Waste
Waste Code:	D004
Waste Description:	Arsenic
Waste Code:	D005
Waste Description:	Barium
Waste Code:	D006
Waste Description:	Cadmium
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D010
Waste Description:	Selenium
Waste Code:	D011
Waste Description:	Silver
Waste Code:	D012
Waste Description:	Endrin (1,2,3,4,10,10-Hexachloro-1,7-Epoxy-1,4,4a,5,6,7,8,8a-Octahydro-1,4-En do, Endo-5,8-Dimeth-Ano-Naphthalene)
Waste Code:	D013
Waste Description:	Lindane (1,2,3,4,5,6-Hexa-Chlorocyclohexane, Gamma Isomer)
Waste Code:	D014
Waste Description:	Methoxychlor (1,1,1-Trichloro-2,2-Bis [P-Methoxyphenyl] Ethane)
Waste Code:	D015
Waste Description:	Toxaphene (C10 H10 Cl8, Technical Chlorinated Camphene, 67-69 Percent Chlorine)
Waste Code:	D016
Waste Description:	2,4-D (2,4-Dichlorophenoxyacetic Acid)
Waste Code:	D017
Waste Description:	2,4,5-Tp Silvex (2,4,5-Trichlorophenoxypropionic Acid)
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D019
Waste Description:	Carbon Tetrachloride
Waste Code:	D020
Waste Description:	Chlordane

IBM CORP (Continued) **1000108976**

Waste Code: D021
Waste Description: Chlorobenzene

Waste Code: D022
Waste Description: Chloroform

Waste Code: D023
Waste Description: O-Cresol

Waste Code: D024
Waste Description: M-Cresol

Waste Code: D025
Waste Description: P-Cresol

Waste Code: D026
Waste Description: Cresol

Waste Code: D027
Waste Description: 1,4-Dichlorobenzene

Waste Code: D028
Waste Description: 1,2-Dichloroethane

Waste Code: D029
Waste Description: 1,1-Dichloroethylene

Waste Code: D030
Waste Description: 2,4-Dinitrotoluene

Waste Code: D031
Waste Description: Heptachlor (And Its Epoxide)

Waste Code: D032
Waste Description: Hexachlorobenzene

Waste Code: D033
Waste Description: Hexachlorobutadiene

Waste Code: D034
Waste Description: Hexachloroethane

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D036
Waste Description: Nitrobenzene

Waste Code: D037
Waste Description: Pentachlorophenol

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

IBM CORP (Continued) **1000108976**

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: D041
Waste Description: 2,4,5-Trichlorophenol

Waste Code: D042
Waste Description: 2,4,6-Trichlorophenol

Waste Code: D043
Waste Description: Vinyl Chloride

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene,

IBM CORP (Continued) **1000108976**

2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code: F008
Waste Description: Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F009
Waste Description: Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F010
Waste Description: Quenching Bath Residues From Oil Baths From Metal Heat Treating Operations In Which Cyanides Are Used In The Process.

Waste Code: F011
Waste Description: Spent Cyanide Solutions From Slat Bath Pot Cleaning From Metal Heat Treating Operations.

Waste Code: F012
Waste Description: Quenching Wastewater Treatment Sludges From Metal Heat Treating Operations In Which Cyanides Are Used In The Process.

Waste Code: F019
Waste Description: Wastewater Treatment Sludges From The Chemical Conversion Coating Of Aluminum, Except From Zirconium Phosphating In Aluminum Can Washing When Such Phosphating Is An Exclusive Conversion Coating Process.

Waste Code: F020
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Or Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tri- Or Tetrachlorophenol Or Of Intermediates Used To Produce Their Pesticide Derivatives. (This Listing Does Not Include Wastes From The Production Of Hexachlorophene From Highly Purified 2,4,5-Trichlorophenol.)

Waste Code: F021
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Or Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Pentachlorophenol, Or Of Intermediates Used To Produce Derivatives.

IBM CORP (Continued) **1000108976**

Waste Code: F022
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tetra-, Penta-, Or Hexachlorobenzenes Under Alkaline Conditions.

Waste Code: F023
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Of Materials On Equipment Previously Used For The Production Or Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tri- And Tetrachlorophenols. (This Listing Does Not Include Wastes From Equipment Used Only For The Production Or Use Of Hexachlorophene From Highly Purified 2,4,5-Trichlorophenol.)

Waste Code: F024
Waste Description: Process Wastes Including, But Not Limited To, Distillation Residues, Heavy Ends, Tars, And Reactor Clean-Out Wastes From The Production Of Certain Chlorinated Aliphatic Hydrocarbons By Free Radical Catalyzed Processes. These Chlorinated Aliphatic Hydrocarbons Are Those Having Carbon Chain Lengths Ranging From One To, And Including Five, With Varying Amounts And Positions Of Chlorine Substitution. (This Listing Does Not Include Wastewaters, Wastewater Treatment Sludge, Spent Catalysts, And Wastes Listed In Sections 261.31. Or 261.32)

Waste Code: F025
Waste Description: Condensed Light Ends, Spent Filters And Filter Aids, And Spent Desiccant Wastes From The Production Of Certain Chlorinated Aliphatic Hydrocarbons By Free Radical Catalyzed Processes. These Chlorinated Aliphatic Hydrocarbons Are Those Having Carbon Chain Lengths Ranging From One To, And Including Five, With Varying Amounts And Positions Of Chlorine Substitution.

Waste Code: F026
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Of Materials On Equipment Previously Used For The Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tetra-, Penta-, Or Hexachlorobenzene Under Alkaline Conditions.

Waste Code: F027
Waste Description: Discarded Unused Formulations Containing Tri-, Tetra-, Or Pentachlorophenol Or Discarded Unused Formulations Containing Compounds Derived From These Chlorophenols. (This Listing Does Not Include Formulations Containing Hexachlorophene Synthesized From Prepurified 2,4,5-Trichlorophenol As The Sole Component.)

Waste Code: F028
Waste Description: Residues Resulting From The Incineration Or Thermal Treatment Of Soil Contaminated With Epa Hazardous Waste Nos. F020, F021, F022, F023, F026, And F027.

Waste Code: F032
Waste Description: Wastewaters, Process Residuals, Preservative Drippage, And Spent Formulations From Wood Preserving Processes Generated At Plants That Currently Use, Or Have Previously Used, Chlorophenolic Formulations [Except Potentially Cross-Contaminated Wastes That Have Had The F032

IBM CORP (Continued) **1000108976**

Waste Code Deleted In Accordance With Section 261.35 (I.E., The Newly Promulgated Equipment Cleaning Or Replacement Standards), And Where The Generator Does Not Resume Or Initiate Use Of Chlorophenolic Formulations]. (This Listing Does Not Include K001 Bottom Sediment Sludge From The Treatment Of Wastewater From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.)

Waste Code: F034
Waste Description: Wastewaters, Process Residuals, Preservative Drippage, And Spent Formulations From Wood Preserving Processes Generated At Plants That Use Creosote Formulations. This Listing Does Not Include K001 Bottom Sediment Sludge From The Treatment Of Wastewater From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.

Waste Code: F035
Waste Description: Wastewaters, Process Residuals, Preservative Drippage, And Spent Formulations From Wood Preserving Processes Generated At Plants That Use Inorganic Preservatives Containing Arsenic Or Chromium. This Listing Does Not Include K001 Bottom Sediment Sludge From The Treatment Of Wastewater From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.

Waste Code: F037
Waste Description: Petroleum Refinery Primary Oil/Water/Solids Separation Sludge - Any Sludge Generated From The Gravitational Separation Of Oil/Water/Solids During The Storage Or Treatment Of Process Wastewaters And Oily Cooling Wastewaters From Petroleum Refineries. Such Sludges Include, But Are Not Limited To, Those Generated In Oil/Water/Solids Separators; Tanks And Impoundments; Ditches And Other Conveyances; Sumps; And Storm Water Units Receiving Dry Weather Flow. Sludges Generated In Storm Water Units That Do Not Receive Dry Weather Flow, Sludges Generated In Aggressive Biological Treatment Units As Defined In Section 261.31(B)(2) (Including Sludges Generated In One Or More Additional Units After Wastewaters Have Been Treated In Aggressive Biological Treatment Units), And K051 Wastes Are Exempted From This Listing.

Waste Code: F038
Waste Description: Petroleum Refinery Secondary (Emulsified) Oil/Water/Solids Separation Sludge - Any Sludge And/Or Float Generated From The Physical And/Or Chemical Separation Of Oil/Water/Solids In Process Wastewaters And Oily Cooling Wastewaters From Petroleum Refineries. Such Wastes Include, But Are Not Limited To, All Sludges And Floats Generated In Induced Air Flotation (Iaf) Units, Tanks And Impoundments, And All Sludges Generated In Daf Units. Sludges Generated In Stormwater Units That Do Not Receive Dry Weather Flow, Sludges Generated In Aggressive Biological Treatment Units As Defined In Section 261.31(B)(2) (Including Sludges Generated In One Or More Additional Units After Wastewaters Have Been Treated In Aggressive Biological Treatment Units), And F037, K048, And K051 Wastes Are Exempted From This Listing.

Waste Code: F039
Waste Description: Leachate Resulting From The Treatment, Storage, Or Disposal Of Wastes Classified By More Than One Waste Code Under Subpart D, Or From A Mixture Of Wastes Classified Under Subparts C And D Of This Part. (Leachate Resulting From The Management Of One Or More Of The

IBM CORP (Continued) **1000108976**

Following Epa Hazardous Wastes And No Other Hazardous Wastes Retains Its Hazardous Waste Code(S): F020, F021, F022, F023, F026, F027, And/Or F028.)

Waste Code: LABP
Waste Description: Labp

Waste Code: P001
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%

Waste Code: P002
Waste Description: 1-Acetyl-2-Thiourea (Or) Acetamide, N-(Aminothioxomethyl)-

Waste Code: P003
Waste Description: 2-Propenal (Or) Acrolein

Waste Code: P004
Waste Description: 1,4,5,8-Dimethanonaphthalene, 1,2,3,4,10,10-Hexa-Chloro-1,4,4a,5,8,8a,-Hexahydro-, (1alpha, 4alpha, 4abeta, 5alpha, 8alpha, 8abeta)- (Or) Aldrin

Waste Code: P005
Waste Description: 2-Propen-1-Ol (Or) Allyl Alcohol

Waste Code: P006
Waste Description: Aluminum Phosphide (R,T)

Waste Code: P007
Waste Description: 3(2h)-Isoxazolone, 5-(Aminomethyl)- (Or) 5-(Aminomethyl)-3-Isoxazolol

Waste Code: P008
Waste Description: 4-Aminopyridine (Or) 4-Pyridinamine

Waste Code: P009
Waste Description: Ammonium Picrate (R) (Or) Phenol, 2,4,6-Trinitro-, Ammonium Salt (R)

Waste Code: P010
Waste Description: Arsenic Acid H3aso4

Waste Code: P011
Waste Description: Arsenic Oxide As2o5 (Or) Arsenic Pentoxide

Waste Code: P012
Waste Description: Arsenic Oxide As2o3 (Or) Arsenic Trioxide

Waste Code: P013
Waste Description: Barium Cyanide

Waste Code: P014
Waste Description: Benzenethiol (Or) Thiophenol

Waste Code: P015
Waste Description: Beryllium

Waste Code: P016

IBM CORP (Continued) **1000108976**

Waste Description: Dichloromethyl Ether (Or) Methane, Oxybis[Chloro-

Waste Code: P017
Waste Description: 2-Propanone, 1-Bromo- (Or) Bromoacetone

Waste Code: P018
Waste Description: Brucine (Or) Strychnidin-10-One, 2,3-Dimethoxy-

Waste Code: P020
Waste Description: Dinoseb (Or) Phenol, 2-(1-Methylpropyl)-4,6-Dinitro-

Waste Code: P021
Waste Description: Calcium Cyanide (Or) Calcium Cyanide Ca(Cn)2

Waste Code: P022
Waste Description: Carbon Disulfide

Waste Code: P023
Waste Description: Acetaldehyde, Chloro- (Or) Chloroacetaldehyde

Waste Code: P024
Waste Description: Benzenamine, 4-Chloro- (Or) P-Chloraniline

Waste Code: P026
Waste Description: 1-(O-Chlorophenyl)Thiourea (Or) Thiourea, (2-Chlorophenyl)-

Waste Code: P027
Waste Description: 3-Chloropropionitrile (Or) Propanenitrile, 3-Chloro-

Waste Code: P028
Waste Description: Benzene, (Chloromethyl)- (Or) Benzyl Chloride

Waste Code: P029
Waste Description: Copper Cyanide (Or) Copper Cyanide Cu(Cn)

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P031
Waste Description: Cyanogen (Or) Ethanedinitrile

Waste Code: P033
Waste Description: Cyanogen Chloride (Or) Cyanogen Chloride (Cn)Cl

Waste Code: P034
Waste Description: 2-Cyclohexyl-4,6-Dinitrophenol (Or) Phenol, 2-Cyclohexyl-4,6-Dinitro-

Waste Code: P036
Waste Description: Arsonous Dichloride, Phenyl- (Or) Dichlorophenylarsine

Waste Code: P037
Waste Description: 2,7:3,6-Dimethanonaphth[2,3-B]Oxirene,
3,4,5,6,9,9-Hexachloro-1a,2,2a,3,6,6a,7,7a-Octahydro-, (1aalpha,
2beta, 2aalpha, 3beta, 6beta, 6aalpha, 7beta, 7aalpha)- (Or) Dieldrin

Waste Code: P038
Waste Description: Arsine, Diethyl- (Or) Diethylarsine

IBM CORP (Continued) **1000108976**

Waste Code: P039
Waste Description: Disulfoton (Or) Phosphorodithioic Acid, O,O-Diethyl S-[2-(Ethylthio)Ethyl] Ester

Waste Code: P040
Waste Description: O,O-Diethyl O-Pyrazinyl Phosphorothioate (Or) Phosphorothioic Acid, O,O-Diethyl O-Pyrazinyl Ester

Waste Code: P041
Waste Description: Diethyl-P-Nitrophenyl Phosphate (Or) Phosphoric Acid, Diethyl 4-Nitrophenyl Ester

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: P043
Waste Description: Diisopropylfluorophosphate (Dfp) (Or) Phosphorofluoridic Acid, Bis(1-Methylethyl) Ester

Waste Code: P044
Waste Description: Dimethoate (Or) Phosphorodithioic Acid, O,O-Dimethyl S-[2-(Methylamino)-2-Oxoethyl] Ester

Waste Code: P045
Waste Description: 2-Butanone, 3,3-Dimethyl-1-(Methylthio)-, O-[Methylamino)Carbonyl] Oxime (Or) Thiofanox

Waste Code: P046
Waste Description: Alpha,Alpha-Dimethylphenethylamine (Or) Benzeneethanamine, Alpha, Alpha-Dimethyl-

Waste Code: P047
Waste Description: 4,6-Dinitro-O-Cresol, & Salts (Or) Phenol, 2-Methyl-4,6-Dinitro-, & Salts

Waste Code: P048
Waste Description: 2,4-Dinitrophenol (Or) Phenol, 2,4-Dinitro-

Waste Code: P049
Waste Description: Dithiobiuret (Or) Thioimidodicarbonic Diamide [(H2n)C(S)]2nh

Waste Code: P050
Waste Description: 6,9-Methano-2,4,3-Benzodioxathiepin,6,7,8,9,10,10-Hexachloro-1,5,5a,6, 9,9a-Hexahydro-,3-Oxide (Or) Endosulfan

Waste Code: P051
Waste Description: 2,7:3,6-Dimethanonaphth[2,3-B]Oxirene, 3,4,5,6,9,9-Hexachloro-1a,2,2a,3,6,6a,7,7a-Octahydro-, (1aalpha, 2beta, 2abeta, 3alpha, 6alpha, 6abeta, 7beta, 7aalpha)- & Metabolites (Or) Endrin (Or) Endrin, & Metabolites

Waste Code: P054
Waste Description: Aziridine (Or) Ethyleneimine

Waste Code: P056
Waste Description: Fluorine

IBM CORP (Continued) **1000108976**

Waste Code:	P057
Waste Description:	Acetamide, 2-Fluoro- (Or) Fluoroacetamide
Waste Code:	P058
Waste Description:	Acetic Acid, Fluoro-, Sodium Salt (Or) Fluoroacetic Acid, Sodium Salt
Waste Code:	P059
Waste Description:	4,7-Methano-1h-Indene, 1,4,5,6,7,8,8-Heptachloro-3a,4,7,7a-Tetrahydro- (Or) Heptachlor
Waste Code:	P060
Waste Description:	1,4,5,8-Dimethanonaphthalene, 1,2,3,4,10,10-Hexa-Chloro-1,4,4a,5,8,8a,-Hexahydro-, (1alpha, 4alpha, 4abeta, 5beta, 8beta, 8abeta)- (Or) Isodrin
Waste Code:	P062
Waste Description:	Hexaethyl Tetraphosphate (Or) Tetraphosphoric Acid, Hexaethyl Ester
Waste Code:	P063
Waste Description:	Hydrocyanic Acid (Or) Hydrogen Cyanide
Waste Code:	P064
Waste Description:	Methane, Isocyanato- (Or) Methyl Isocyanate
Waste Code:	P065
Waste Description:	Fulminic Acid, Mercury(2+) Salt (R,T) (Or) Mercury Fulminate (R,T)
Waste Code:	P066
Waste Description:	Ethanimidothioic Acid, N-[[(Methylamino)Carbonyl]Oxy]-, Methyl Ester (Or) Methomyl
Waste Code:	P067
Waste Description:	1,2-Propylenimine (Or) Aziridine, 2-Methyl-
Waste Code:	P068
Waste Description:	Hydrazine, Methyl- (Or) Methyl Hydrazine
Waste Code:	P069
Waste Description:	2-Methyllactonitrile (Or) Propanenitrile, 2-Hydroxy-2-Methyl-
Waste Code:	P070
Waste Description:	Aldicarb (Or) Propanal, 2-Methyl-2-(Methylthio)-, O-[(Methylamino)Carbonyl]Oxime
Waste Code:	P071
Waste Description:	Methyl Parathion (Or) Phosphorothioic Acid, O,O,-Dimethyl O-(4-Nitrophenyl) Ester
Waste Code:	P072
Waste Description:	Alpha-Naphthylthiourea (Or) Thiourea, 1-Naphthalenyl-
Waste Code:	P073
Waste Description:	Nickel Carbonyl (Or) Nickel Carbonyl Ni(Co)4, (T-4)-
Waste Code:	P074
Waste Description:	Nickel Cyanide (Or) Nickel Cyanide Ni(Cn)2

IBM CORP (Continued) **1000108976**

Waste Code: P075
Waste Description: Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts

Waste Code: P076
Waste Description: Nitric Oxide (Or) Nitrogen Oxide No

Waste Code: P077
Waste Description: Benzenamine, 4-Nitro- (Or) P-Nitroaniline

Waste Code: P078
Waste Description: Nitrogen Dioxide (Or) Nitrogen Oxide No2

Waste Code: P081
Waste Description: 1,2,3-Propanetriol, Trinitrate (R) (Or) Nitroglycerine (R)

Waste Code: P082
Waste Description: Methanimine, N-Methyl-N-Nitroso- (Or) N-Nitrosodimethylamine

Waste Code: P084
Waste Description: N-Nitrosomethylvinylamine (Or) Vinylamine, N-Methyl-N-Nitroso-

Waste Code: P085
Waste Description: Diphosphoramide, Octamethyl- (Or) Octamethylpyrophosphoramide

Waste Code: P087
Waste Description: Osmium Oxide Oso4, (T-4)- (Or) Osmium Tetroxide

Waste Code: P088
Waste Description: 7-Oxabicyclo[2.2.1]Heptane-2,3-Dicarboxylic Acid (Or) Endothall

Waste Code: P089
Waste Description: Parathion (Or) Phosphorothioic Acid, O,O-Diethyl-O-(4-Nitrophenyl) Ester

Waste Code: P092
Waste Description: Mercury, (Acetato-O)Phenyl- (Or) Phenylmercury Acetate

Waste Code: P093
Waste Description: Phenylthiourea (Or) Thiourea, Phenyl-

Waste Code: P094
Waste Description: Phorate (Or) Phosphorodithioic Acid, O,O-Diethyl S-[(Ethylthio)Methyl] Ester

Waste Code: P095
Waste Description: Carbonic Dichloride (Or) Phosgene

Waste Code: P096
Waste Description: Hydrogen Phosphide (Or) Phosphine

Waste Code: P097
Waste Description: Famphur (Or) Phosphorothioic Acid O-[4-[(Dimethylamino)Sulfonyl]Phenyl] O,O-Dimethyl Ester

Waste Code: P098
Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

IBM CORP (Continued) **1000108976**

Waste Code: P099
Waste Description: Argentate (1-), Bis(Cyano-C)-, Potassium (Or) Potassium Silver Cyanide

Waste Code: P101
Waste Description: Ethyl Cyanide (Or) Propanenitrile

Waste Code: P102
Waste Description: 2-Propyn-1-Ol (Or) Propargyl Alcohol

Waste Code: P103
Waste Description: Selenourea

Waste Code: P104
Waste Description: Silver Cyanide (Or) Silver Cyanide Ag(Cn)

Waste Code: P105
Waste Description: Sodium Azide

Waste Code: P106
Waste Description: Sodium Cyanide (Or) Sodium Cyanide Na(Cn)

Waste Code: P107
Waste Description: Strontium Sulfide Srs

Waste Code: P108
Waste Description: Strychnidin-10-One, & Salts (Or) Strychnine, & Salts

Waste Code: P109
Waste Description: Tetraethyldithiopyrophosphate (Or) Thiodiphosphoric Acid, Tetraethyl Ester

Waste Code: P110
Waste Description: Plumbane, Tetraethyl- (Or) Tetraethyl Lead

Waste Code: P111
Waste Description: Diphosphoric Acid, Tetraethyl Ester (Or) Tetraethyl Pyrophosphate

Waste Code: P112
Waste Description: Methane, Tetranitro- (R) (Or) Tetranitromethane (R)

Waste Code: P113
Waste Description: Thallic Oxide (Or) Thallium Oxide Tl2o3

Waste Code: P114
Waste Description: Selenious Acid, Dithallium (1+) Salt (Or) Thallium(I) Selenite

Waste Code: P115
Waste Description: Sulfuric Acid, Dithallium (1+) Salt (Or) Thallium(I) Sulfate

Waste Code: P116
Waste Description: Hydrazinecarbothioamide (Or) Thiosemicarbazide

Waste Code: P118
Waste Description: Methanethiol, Trichloro- (Or) Trichloromethanethiol

Waste Code: P119
Waste Description: Ammonium Vanadate (Or) Vanadic Acid, Ammonium Salt

Waste Description: 7,12-Dimethylbenz[A]Anthracene (Or) Benz[A]Anthracene, 7,12-Dimethyl-

Waste Code: U095
Waste Description: [1,1'-Biphenyl]-4,4'-Diamine, 3,3'-Dimethyl- (Or) 3,3'-Dimethylbenzidine

Waste Code: U096
Waste Description: Alpha,Alpha-Dimethylbenzylhydroperoxide (R) (Or) Hydroperoxide, 1-Methyl-1-Phenylethyl- (R)

Waste Code: U097
Waste Description: Carbamic Chloride, Dimethyl- (Or) Dimethylcarbamoyl Chloride

Waste Code: U098
Waste Description: 1,1-Dimethylhydrazine (Or) Hydrazine, 1,1-Dimethyl-

Waste Code: U099
Waste Description: 1,2-Dimethylhydrazine (Or) Hydrazine, 1,2-Diphenyl-

Waste Code: U101
Waste Description: 2,4-Dimethylphenol (Or) Phenol, 2,4-Dimethyl-

Waste Code: U102
Waste Description: 1,2-Benzenedicarboxylic Acid, Dimethyl Ester (Or) Dimethyl Phthalate

Waste Code: U103
Waste Description: Dimethyl Sulfate (Or) Sulfuric Acid, Dimethyl Ester

Waste Code: U105
Waste Description: 2,4-Dinitrotoluene (Or) Benzene, 1-Methyl-2,4-Dinitro-

IBM CORP (Continued) **1000108976**

Waste Code: U106
Waste Description: 2,6-Dinitrotoluene (Or) Benzene, 2-Methyl-1,3-Dinitro-

Waste Code: U107
Waste Description: 1,2-Benzenedicarboxylic Acid, Dioctyl Ester (Or) Di-N-Octyl Phthalate

Waste Code: U108
Waste Description: 1,4-Diethyleneoxide (Or) 1,4-Dioxane

Waste Code: U109
Waste Description: 1,2-Diphenylhydrazine (Or) Hydrazine, 1,2-Diphenyl-

Waste Code: U110
Waste Description: 1-Propanimine, N-Propyl-(I) (Or) Dipropylamine (I)

Waste Code: U111
Waste Description: 1-Propanamine, N-Nitroso-N-Propyl- (Or) Di-N-Propylnitrosamine

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U113
Waste Description: 2-Propenoic Acid, Ethyl Ester (I) (Or) Ethyl Acrylate (I)

Waste Code: U114
Waste Description: Carbamodithioic Acid, 1,2-Ethanediylbis-, Salts & Esters (Or) Ethylenebisdithiocarbamic Acid, Salts & Esters

Waste Code: U115
Waste Description: Ethylene Oxide (I,T) (Or) Oxirane (I,T)

Waste Code: U116
Waste Description: 2-Imidazolidinethione (Or) Ethylenethiourea

Waste Code: U117
Waste Description: Ethane, 1,1'-Oxybis-(I) (Or) Ethyl Ether (I)

Waste Code: U118
Waste Description: 2-Propenoic Acid, 2-Methyl-, Ethyl Ester (Or) Ethyl Methacrylate

Waste Code: U119
Waste Description: Ethyl Methanesulfonate (Or) Methanesulfonic Acid, Ethyl Ester

Waste Code: U120
Waste Description: Fluoranthene

Waste Code: U121
Waste Description: Methane, Trichlorofluoro- (Or) Trichloromonofluoromethane

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U123
Waste Description: Formic Acid (C,T)

Waste Code: U124
Waste Description: Furan (I) (Or) Furfuran (I)

IBM CORP (Continued) **1000108976**

Waste Code: U125
Waste Description: 2-Furancarboxaldehyde (I) (Or) Furfural (I)

Waste Code: U126
Waste Description: Glycidylaldehyde (Or) Oxiranecarboxyaldehyde

Waste Code: U127
Waste Description: Benzene, Hexachloro- (Or) Hexachlorobenzene

Waste Code: U128
Waste Description: 1,3-Butadiene, 1,1,2,3,4,4-Hexachloro- (Or) Hexachlorobutadiene

Waste Code: U129
Waste Description: Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane

Waste Code: U130
Waste Description: 1,3-Cyclopentadiene, 1,2,3,4,5,5-Hexachloro- (Or) Hexachlorocyclopentadiene

Waste Code: U131
Waste Description: Ethane, Hexachloro- (Or) Hexachloroethane

Waste Code: U132
Waste Description: Hexachlorophene (Or) Phenol, 2,2'-Methylenebis[3,4,6-Trichloro-

Waste Code: U133
Waste Description: Hydrazine (R,T)

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U135
Waste Description: Hydrogen Sulfide (Or) Hydrogen Sulfide H2s

Waste Code: U136
Waste Description: Arsinic Acid, Dimethyl- (Or) Cacodylic Acid

Waste Code: U137
Waste Description: Indeno[1,2,3-Cd]Pyrene

Waste Code: U138
Waste Description: Methane, Iodo- (Or) Methyl Iodide

Waste Code: U140
Waste Description: 1-Propanol, 2-Methyl- (I,T) (Or) Isobutyl Alcohol (I,T)

Waste Code: U141
Waste Description: 1,3-Benzodioxole, 5-(1-Propenyl)- (Or) Isosafrole

Waste Code: U142
Waste Description: 1,3,4-Metheno-2h-Cyclobuta[Cd]Pentalen-2-One, 1,1a,3,3a,4,5,5,5a,5b,6-Decachlorooctahydro- (Or) Kepone

Waste Code: U143
Waste Description: 2-Butenoic Acid, 2-Methyl-, 7-[[2,3-Dihydroxy-2-(1-Methoxyethyl)-3-Methyl-1-Oxobutoxy]Methyl]-2,3,

IBM CORP (Continued) **1000108976**

5,7a-Tetrahydro-1h-Pyrrolizin-1-Yl Ester, [1s-[1alpha(Z), 7(2s*,3r*), 7aalpha]]- (Or) Lasiocarpine

Waste Code: U144
Waste Description: Acetic Acid, Lead(2+) Salt (Or) Lead Acetate

Waste Code: U145
Waste Description: Lead Phosphate (Or) Phosphoric Acid, Lead(2+) Salt (2:3)

Waste Code: U146
Waste Description: Lead Subacetate (Or) Lead, Bis(Acetato-O)Tetrahydroxytri-

Waste Code: U147
Waste Description: 2,5-Furandione (Or) Maleic Anhydride

Waste Code: U148
Waste Description: 3,6-Pyridazinedione, 1,2-Dihydro- (Or) Maleic Hydrazide

Waste Code: U149
Waste Description: Malononitrile (Or) Propanedinitrile

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U151
Waste Description: Mercury

Waste Code: U152
Waste Description: 2-Propenenitrile, 2-Methyl- (I,T) (Or) Methacrylonitrile (I,T)

Waste Code: U153
Waste Description: Methanethiol (I,T) (Or) Thiomethanol (I,T)

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U155
Waste Description: 1,2-Ethanediamine, N,N-Dimethyl-N'-2-Pyridinyl-N'-(2-Thienylmethyl)- (Or) Methapyrilene

Waste Code: U156
Waste Description: Carbonochloridic Acid, Methyl Ester, (I,T) (Or) Methyl Chlorocarbonate (I,T)

Waste Code: U157
Waste Description: 3-Methylcholanthrene (Or) Benz[J]Aceanthrylene, 1,2-Dihydro-3-Methyl-

Waste Code: U158
Waste Description: 4,4'-Methylenebis(2-Chloroaniline) (Or) Benzenamine, 4,4'-Methylenebis[2-Chloro-

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U160
Waste Description: 2-Butanone, Peroxide (R,T) (Or) Methyl Ethyl Ketone Peroxide (R,T)

IBM CORP (Continued) **1000108976**

Waste Code: U161
Waste Description: 4-Methyl-2-Pentanone (I) (Or) Methyl Isobutyl Ketone (I) (Or) Pentanol, 4-Methyl-

Waste Code: U162
Waste Description: 2-Propenoic Acid, 2-Methyl-, Methyl Ester (I,T) (Or) Methyl Methacrylate (I,T)

Waste Code: U163
Waste Description: Guanidine, N-Methyl-N'-Nitro-N-Nitroso- (Or) Mnng

Waste Code: U164
Waste Description: 4(1h)-Pyrimidinone, 2,3-Dihydro-6-Methyl-2-Thioxo- (Or) Methylthiouracil

Waste Code: U165
Waste Description: Naphthalene

Waste Code: U166
Waste Description: 1,4-Naphthalenedione (Or) 1,4-Naphthoquinone

Waste Code: U167
Waste Description: 1-Napthalenamine (Or) Alpha-Naphthylamine

Waste Code: U168
Waste Description: 2-Napthalenamine (Or) Beta-Naphthylamine

Waste Code: U169
Waste Description: Benzene, Nitro- (Or) Nitrobenzene (I,T)

Waste Code: U170
Waste Description: P-Nitrophenol (I,T) (Or) Phenol, 4-Nitro-

Waste Code: U171
Waste Description: 2-Nitropropane (I,T) (Or) Propane, 2-Nitro- (I,T)

Waste Code: U172
Waste Description: 1-Butanamine, N-Butyl-N-Nitroso- (Or) N-Nitrosodi-N-Butylamine

Waste Code: U173
Waste Description: Ethanol, 2,2'-(Nitrosoimino)Bis- (Or) N-Nitrosodiethanolamine

Waste Code: U174
Waste Description: Ethanamine, N-Ethyl-N-Nitroso- (Or) N-Nitrosodiethylamine

Waste Code: U176
Waste Description: N-Nitroso-N-Ethylurea (Or) Urea, N-Ethyl-N-Nitroso-

Waste Code: U177
Waste Description: N-Nitroso-N-Methylurea (Or) Urea, N-Methyl-N-Nitroso-

Waste Code: U178
Waste Description: Carbamic Acid, Methylnitroso-, Ethyl Ester (Or) N-Nitroso-N-Methylurethane

Waste Code: U179
Waste Description: N-Nitrosopiperidine (Or) Piperidine, 1-Nitroso-

IBM CORP (Continued) **1000108976**

Waste Code: U180
Waste Description: N-Nitrosopyrrolidine (Or) Pyrrolidine, 1-Nitroso-

Waste Code: U181
Waste Description: 5-Nitro-O-Toluidine (Or) Benzenamine, 2-Methyl-5-Nitro

Waste Code: U182
Waste Description: 1,3,5-Trioxane, 2,4,6-Trimethyl- (Or) Paraldehyde

Waste Code: U183
Waste Description: Benzene, Pentachloro- (Or) Pentachlorobenzene

Waste Code: U184
Waste Description: Ethane, Pentachloro- (Or) Pentachloroethane

Waste Code: U185
Waste Description: Benzene, Pentachloronitro- (Or) Pentachloronitrobenzene (Pcnb)

Waste Code: U186
Waste Description: 1,3-Pentadiene (I) (Or) 1-Methylbutadiene (I)

Waste Code: U187
Waste Description: Acetamide, N-(4-Ethoxyphenyl)- (Or) Phenacetin

Waste Code: U188
Waste Description: Phenol

Waste Code: U189
Waste Description: Phosphorus Sulfide (R) (Or) Sulfur Phosphide (R)

Waste Code: U190
Waste Description: 1,3-Isobenzofurandione (Or) Phthalic Anhydride

Waste Code: U191
Waste Description: 2-Picoline (Or) Pyridine, 2-Methyl-

Waste Code: U192
Waste Description: Benzamide, 3,5-Dichloro-N-(1,1-Dimethyl-2-Propynyl)- (Or) Pronamide

Waste Code: U193
Waste Description: 1,2-Oxathiolane, 2,2-Dioxide (Or) 1,3-Propane Sultone

Waste Code: U194
Waste Description: 1-Propanamine (I,T) (Or) N-Propylamine (I,T)

Waste Code: U196
Waste Description: Pyridine

Waste Code: U197
Waste Description: 2,5-Cyclohexadiene-1,4-Dione (Or) P-Benzoquinone

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U201

IBM CORP (Continued) **1000108976**

Waste Description:	1,3-Benzenediol (Or) Resorcinol
Waste Code:	U202
Waste Description:	1,2-Benzisothiazol-3(2h)-One, 1,1-Dioxide, & Salts (Or) Saccharin, & Salts
Waste Code:	U203
Waste Description:	1,3-Benzodioxole, 5-(2-Propenyl)- (Or) Safrole
Waste Code:	U204
Waste Description:	Selenious Acid (Or) Selenium Dioxide
Waste Code:	U205
Waste Description:	Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)
Waste Code:	U206
Waste Description:	D-Glucose, 2-Deoxy-2-[[(Methylnitrosoamino)-Carbonyl]Amino]- (Or) Glucopyranose, 2-Deoxy-2-(3-Methyl-3-Nitrosoureido)-,D- (Or) Streptozotocin
Waste Code:	U207
Waste Description:	1,2,4,5-Tetrachlorobenzene (Or) Benzene, 1,2,4,5-Tetrachloro-
Waste Code:	U208
Waste Description:	1,1,1,2-Tetrachloroethane (Or) Ethane, 1,1,1,2-Tetrachloro-
Waste Code:	U209
Waste Description:	1,1,2,2-Tetrachloroethane (Or) Ethane, 1,1,2,2-Tetrachloro-
Waste Code:	U210
Waste Description:	Ethene, Tetrachloro- (Or) Tetrachloroethylene
Waste Code:	U211
Waste Description:	Carbon Tetrachloride (Or) Methane, Tetrachloro-
Waste Code:	U213
Waste Description:	Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)
Waste Code:	U214
Waste Description:	Acetic Acid, Thallium(1+) Salt (Or) Thallium(I) Acetate
Waste Code:	U215
Waste Description:	Carbonic Acid, Dithallium(1+) Salt (Or) Thallium(I) Carbonate
Waste Code:	U216
Waste Description:	Thallium Chloride Tlcl (Or) Thallium(I) Chloride
Waste Code:	U217
Waste Description:	Nitric Acid, Thallium(1+) Salt (Or) Thallium(I) Nitrate
Waste Code:	U218
Waste Description:	Ethanethioamide (Or) Thioacetamide
Waste Code:	U219
Waste Description:	Thiourea
Waste Code:	U220

IBM CORP (Continued) **1000108976**

Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U221
Waste Description: Benzenediamine, Ar-Methyl- (Or) Toluenediamine

Waste Code: U222
Waste Description: Benzenamine, 2-Methyl-, Hydrochloride (Or) O-Toluidine Hydrochloride

Waste Code: U223
Waste Description: Benzene, 1,3-Diisocyanatomethyl- (R,T) (Or) Toluene Diisocyanate (R,T)

Waste Code: U225
Waste Description: Bromoform (Or) Methane, Tribromo-

Waste Code: U226
Waste Description: Ethane, 1,1,1-Trichloro- (Or) Methyl Chloroform

Waste Code: U227
Waste Description: 1,1,2-Trichloroethane (Or) Ethane, 1,1,2-Trichloro-

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Waste Code: U234
Waste Description: 1,3,5-Trinitrobenzene (R,T) (Or) Benzene, 1,3,5-Trinitro-

Waste Code: U235
Waste Description: 1-Propanol, 2,3-Dibromo-, Phosphate (3:1) (Or) Tris(2,3,-Dibromopropyl) Phosphate

Waste Code: U236
Waste Description: 2,7-Naphthalenedisulfonic Acid,3,3'-[(3,3'-Dimethyl[1,1'-Biphenyl]-4,4'-Diyl)Bis(Azo)Bis[5-Amino -4-Hydroxy]-, Tetrasodium Salt (Or) Trypan Blue

Waste Code: U237
Waste Description: 2,4-(1h,3h)-Pyrimidinedione, 5-[Bis(2-Chloroethyl)Amino]- (Or) Uracil Mustard

Waste Code: U238
Waste Description: Carbamic Acid, Ethyl Ester (Or) Ethyl Carbamate (Urethane)

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Waste Code: U240
Waste Description: 2,4-D, Salts & Esters (Or) Acetic Acid, (2,4-Dichlorophenoxy)-, Salts & Esters (Or) Dichlorophenoxyacetic Acid 2,4-D

Waste Code: U243
Waste Description: 1-Propene, 1,1,2,3,3,3-Hexachloro- (Or) Hexachloropropene

Waste Code: U244
Waste Description: Thioperoxydicarbonic Diamide [(H2n)C(S)]2s2, Tetramethyl- (Or) Thiram

Waste Code: U246
Waste Description: Cyanogen Bromide (Cn)Br

IBM CORP (Continued) **1000108976**

Waste Code:	U247
Waste Description:	Benzene, 1,1'-(2,2,2-Trichloroethylidene)Bis[4-Methoxy- (Or) Methoxychlor
Waste Code:	U248
Waste Description:	2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenyl-Butyl)-, & Salts, When Present At Concentrations Of 0.3% Or Less (Or) Warfarin, & Salts, When Present At Concentrations Of 0.3% Or Less
Waste Code:	U249
Waste Description:	Zinc Phosphide Zn3p2, When Present At Concentrations Of 10% Or Less
Waste Code:	U271
Waste Description:	Benomyl (Or) Carbamic Acid, [1-[(Butylamino)Carbonyl]-1h-Benzimidazol-2-Yl]-, Methyl Ester
Waste Code:	U277
Waste Description:	Sulfallate (Or) Carbamodithioic Acid, Diethyl-, 2-Chloro-2-Propenyl Ester
Waste Code:	U278
Waste Description:	Bendiocarb (Or) 1,3-Benzodioxol-4-Ol, 2,2-Dimethyl-, Methyl Carbamate
Waste Code:	U279
Waste Description:	U279
Waste Code:	U280
Waste Description:	Barban (Or) Carbamic Acid, (3-Chlorophenyl)-, 4-Chloro-2-Butynyl Ester
Waste Code:	U328
Waste Description:	Benzenamine, 2-Methyl- (Or) O-Toluidine
Waste Code:	U353
Waste Description:	Benzenamine, 4-Methyl- (Or) P-Toluidine
Waste Code:	U359
Waste Description:	Ethanol, 2-Ethoxy- (Or) Ethylene Glycol Monoethyl Ether
Waste Code:	U364
Waste Description:	Bendiocarb Phenol (Or) 1,3-Benzodioxol-4-Ol, 2,2-Dimethyl-
Waste Code:	U365
Waste Description:	H-Azepine-1-Carbothioic Acid, Hexahydro-, S-Ethyl Ester (Or) Molinate
Waste Code:	U366
Waste Description:	Dazomet (Or) 2h-1,3,5-Thiadiazine- 2-Thione, Tetrahydro-3,5-Dimethyl-
Waste Code:	U367
Waste Description:	7-Benzofuranol, 2,3-Dihydro-2,2-Dimethyl- (Or) Carbofuran Phenol
Waste Code:	U372
Waste Description:	Carbamic Acid, 1h-Benzimidazol-2-Yl, Methyl Ester (Or) Carbendazim
Waste Code:	U373
Waste Description:	Carbamic Acid, Phenyl-, 1-Methylethyl Ester (Or) Propham
Waste Code:	U375

IBM CORP (Continued) **1000108976**

Waste Description: Carbamic Acid, Butyl-, 3-Iodo-2-Propynyl Ester (Or) 3-Iodo-2-Propynyl N-Butylcarbamate

Waste Code: U376
Waste Description: Carbamodithioic Acid, Dimethyl-, Tetraanhydrosulfide With Orthothiosetenious Acid (Or) Selenium, Tetrakis (Dimethyldithiocarbamate)

Waste Code: U377
Waste Description: Carbamodithioic Acid, Methyl-, Monopotassium Salt (Or) Potassium N-Methyldithiocarbamate

Waste Code: U378
Waste Description: Carbamodithioic Acid, (Hydroxymethyl) Methyl-, Monopotassium Salt (Or) Potassium N-Hydroxymethyl- N-Methyldi-Thiocarbamate

Waste Code: U379
Waste Description: Sodium Dibutyldithiocarbamate (Or) Carbamodithioic Acid, Dibutyl, Sodium Salt

Waste Code: U381
Waste Description: Carbamodithioic Acid, Diethyl-, Sodium Salt (Or) Sodium Diethyldithiocarbamate

Waste Code: U382
Waste Description: Carbamodithioic Acid, Dimethyl-, Sodium Salt (Or) Sodium Dimethyldithiocarbamate

Waste Code: U383
Waste Description: Carbamodithioic Acid, Dimethyl, Potassium Salt (Or) Potassium Dimethyldithiocarbamate

Waste Code: U384
Waste Description: Carbamodithioic Acid, Methyl-, Monosodium Salt (Or) Metam Sodium

Waste Code: U385
Waste Description: Carbamothioic Acid, Dipropyl-, S-Propyl Ester

Waste Code: U386
Waste Description: Carbamothioic Acid, Cyclohexylethyl-, S-Ethyl Ester (Or) Cycloate

Waste Code: U387
Waste Description: Carbamothioic Acid, Dipropyl-, S-(Phenylmethyl) Ester (Or) Prosulfocarb

Waste Code: U389
Waste Description: Carbamothioic Acid, Bis(1-Methylethyl)-, S-(2,3,3-Trichloro-2-Propenyl) Ester (Or) Triallate

Waste Code: U390
Waste Description: Carbamothioic Acid, Dipropyl-, S-Ethyl Ester (Or) Eptc

Waste Code: U391
Waste Description: Carbamothioic Acid, Butylethyl-, S-Propyl Ester (Or) Pebulate

Waste Code: U392
Waste Description: Butylate (Or) Carbamothioic Acid, Bis(2-Methylpropyl)-, S-Ethyl Ester

IBM CORP (Continued) **1000108976**

Waste Code: U393
Waste Description: Copper, Bis(Dimethylcarbamodithioato-S,S')- (Or) Copper Dimethyldithiocarbamate

Waste Code: U394
Waste Description: A2213 (Or) Ethanimidothioic Acid, 2-(Dimethylamino)-N-Hydroxy-2-Oxo-, Methyl Ester

Waste Code: U395
Waste Description: Diethylene Glycol, Dicarbamate (Or) Ethanol, 2,2'-Oxybis-, Dicarbamate

Waste Code: U396
Waste Description: Ferbam (Or) Iron, Tris(Dimethylcarbamodithioato-S,S')-,

Waste Code: U400
Waste Description: Bis(Pentamethylene)Thiuram Tetrasulfide (Or) Piperidine, 1,1'-(Tetrathiodicarbonothioyl)-Bis-

Waste Code: U401
Waste Description: Bis(Dimethylthiocarbamoyl) Sulfide (Or) Tetramethylthiuram Monosulfide

Waste Code: U402
Waste Description: Tetrabutylthiuram Disulfide (Or) Thioperoxydicarbonic Diamide, Tetrabutyl

Waste Code: U403
Waste Description: Disulfiram (Or) Thioperoxydicarbonic Diamide, Tetraethyl

Waste Code: U404
Waste Description: U404

Waste Code: U407
Waste Description: Ethyl Ziram

Waste Code: U408
Waste Description: U408

Waste Code: U409
Waste Description: Carbamic Acid, [1,2-Phenylenebis (Iminocarbonothioyl)]Bis-, Dimethyl Ester (Or) Thiophanate-Methyl

Waste Code: U410
Waste Description: Ethanimidothioic Acid, N,N'-[Thiobis[(Methylimino)Carbonyloxy]]Bis-, Dimethyl Ester (Or) Thiodicarb

Waste Code: U411
Waste Description: U411

ORPHAN SUMMARY

City	EDR ID	Site Name	Site Address	Zip	Database(s)
		NO SITES FOUND			

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/19/2023
Date Data Arrived at EDR: 10/03/2023
Date Made Active in Reports: 10/19/2023

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state and tribal brownfield sites

BROWNFIELDS: Kentucky Brownfield Inventory
The Kentucky Brownfield Program has created an inventory of brownfield sites in order to market the properties to those interested in brownfield redevelopment. The Kentucky Brownfield Program is working to promote the redevelopment of these sites by helping to remove barriers that prevent reuse, providing useful information to communities, developers and the public and encouraging a climate that fosters redevelopment of contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/07/2023
Date Data Arrived at EDR: 08/08/2023
Date Made Active in Reports: 10/24/2023

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Longitude (West):	84.473151 - 84° 28' 23.34''
Universal Tranverse Mercator:	Zone 16
UTM X (Meters):	721674.3
UTM Y (Meters):	4215955.0
Elevation:	974 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	13046646 LEXINGTON EAST, KY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

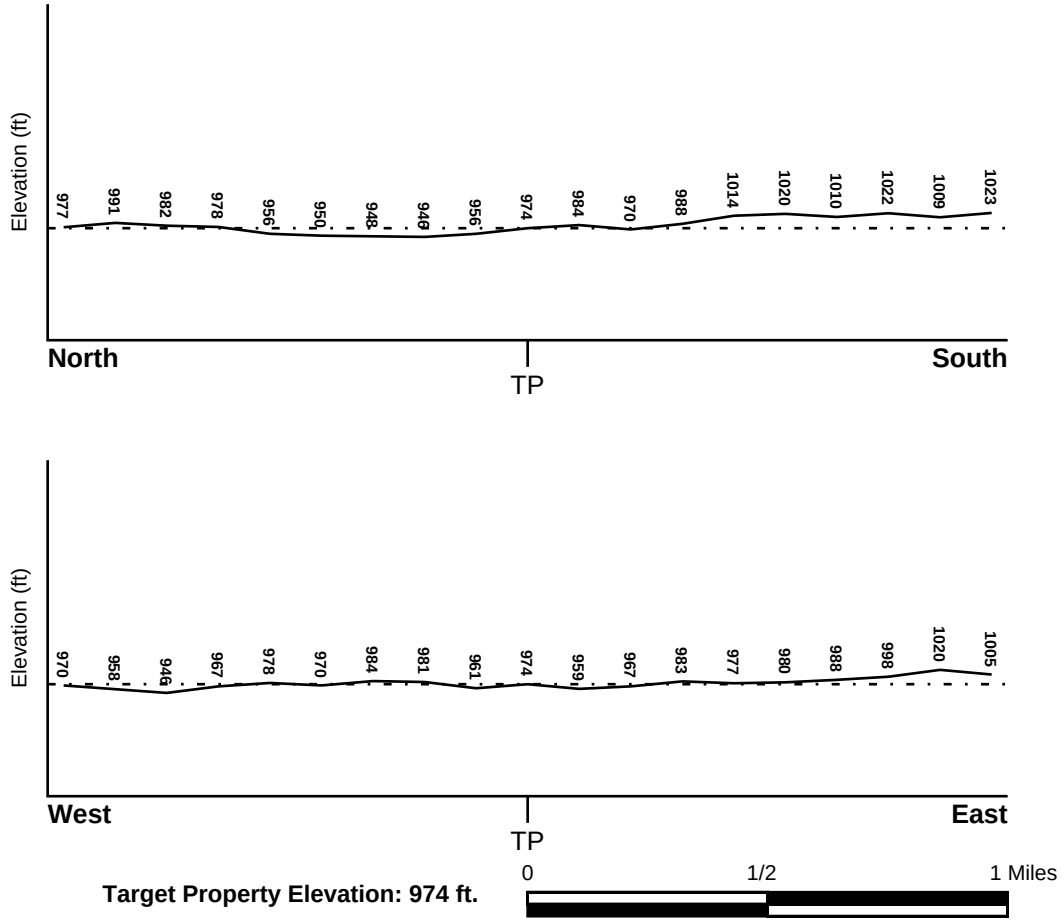
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 974 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
2100670128E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
2100670129E	FEMA FIRM Flood data
2100670080C	FEMA Q3 Flood data
2100670137E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
LEXINGTON EAST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Maury

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 14 Min: 4	Max: 6 Min: 4.5
2	16 inches	29 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 14 Min: 4	Max: 6 Min: 4.5
3	29 inches	42 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 14 Min: 4	Max: 6 Min: 4.5

Soil Layer Information

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 4.5
2	9 inches	42 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 4.5
3	42 inches	68 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 4.5

Soil Map ID: 6

Soil Component Name: Urban land

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 7

Soil Component Name: Lindside

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 502-564-6736

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Shield Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The EDR Vapor Encroachment Worksheet enables EDR's customers to make certain online modifications that effects maps, text and calculations contained in this Report. As a result, maps, text and calculations contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. Environmental Data Resources shall not be responsible for any customer's decision to include or not include in any final report any records determined to be within the relevant minimum search distances.

This report contains information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANYSUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES.ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this report "AS IS". Any analyses, estimates, ratings, or risk codes provided in this report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can produce information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by EDR. The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600).

STANDARD ENVIRONMENTAL RECORDS	Default Area of Concern (Miles)*	property	1/10	> 1/10
Lists of Federal NPL (Superfund) sites	1.0	0	0	0
Lists of Federal Delisted NPL sites	1.0	0	0	0
Lists of Federal sites subject to CERCLA removals and CERCLA orders	0.5	0	0	0
Lists of Federal CERCLA sites with NFRAP	0.5	0	0	0
Lists of Federal RCRA facilities undergoing Corrective Action	1.0	0	0	0
Lists of Federal RCRA TSD facilities	0.5	0	0	0

RE: KMART 4077
130 New Circle Rd NW
Lexington--Fayette County

UST ID # 3542-034
CAR Received Date: December 16, 1991
Tank (s): #1 = 1,000 gal used oil

Dear Tank Owner:

The Division of Waste Management personnel have reviewed the information submitted regarding the assessment of the underground storage tank area for the above referenced site. The data submitted indicates that the site has been adequately assessed in accordance with 401 KAR Chapter 42 (as in effect before April 18, 1994) and 40 CFR Part 280.

From the information submitted, the division agrees that this site has satisfied the closure requirements of Kentucky Revised Statutes 224.60-105 and the requirements of 401 KAR Chapter 42 (as in effect prior to April 18, 1994). Therefore, no further action is required. The Division has based this determination on all the information submitted. The Division reserves the right to require additional monitoring or testing and to take whatever action is necessary to protect human health, safety, and the environment if the Division determines there is a need for further investigation.

Payment of any outstanding underground storage tank fees is still required pursuant to KRS 224.60-150. Failure to pay any said outstanding fees may compromise the ability of the facility to qualify for financial assistance from the Petroleum Storage Tank Environmental Assurance Fund Commission. If outstanding fees are due, you will be contacted by the Underground Storage Tank Branch.

If you have any questions regarding this matter, please contact Rob Daniell of the Underground Storage Tank Branch at (800) 928-6716, or (502) 564-6716.

Notification for Underground Storage Tanks

FORM APPROVED
OMB NO. 2050-0049
APPROVAL EXPIRES 6-30-88

FOR TANKS IN KY

RETURN COMPLETED FORM TO
Natural Resources Cabinet
Division of Waste Management
Attention: Vicki Pettus
18 Reilly Road
Frankfort, KY 40601

APR 09 1986
DWM/PROGRAM

STATE USE ONLY
I.D. Number 3542 - 034
Date Received 4/9/86

GENERAL INFORMATION

Notification is required by Federal law for all underground tanks that have been used to store regulated substances since January 1, 1974, that are in the ground as of May 8, 1986, or that are brought into use after May 8, 1986. The information requested is required by Section 9002 of the Resource Conservation and Recovery Act, (RCRA), as amended.

The primary purpose of this notification program is to locate and evaluate underground tanks that store or have stored petroleum or hazardous substances. It is expected that the information you provide will be based on reasonably available records, or, in the absence of such records, your knowledge, belief, or recollection.

Who Must Notify? Section 9002 of RCRA, as amended, requires that, unless exempted, owners of underground tanks that store regulated substances must notify designated State or local agencies of the existence of their tanks. Owner means—
(a) in the case of an underground storage tank in use on November 8, 1984, or brought into use after that date, any person who owns an underground storage tank used for the storage, use, or dispensing of regulated substances, and
(b) in the case of any underground storage tank in use before November 8, 1984, but no longer in use on that date, any person who owned such tank immediately before the discontinuation of its use.

What Tanks Are Included? Underground storage tank is defined as any one or combination of tanks that (1) is used to contain an accumulation of "regulated substances," and (2) whose volume (including connected underground piping) is 10% or more beneath the ground. Some examples are underground tanks storing: 1. gasoline, used oil, or diesel fuel, and 2. industrial solvents, pesticides, herbicides or fumigants.

What Tanks Are Excluded? Tanks removed from the ground are not subject to notification. Other tanks excluded from notification are:
1. farm or residential tanks of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes;
2. tanks used for storing heating oil for consumptive use on the premises where stored;
3. septic tanks;
4. pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
5. surface impoundments, pits, ponds, or lagoons;
6. storm water or waste water collection systems;
7. flow-through process tanks;
8. liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
9. storage tanks situated in an underground area (such as a basement, cellar, mineworking, drift, shaft, or tunnel) if the storage tank is situated upon or above the surface of the floor.

What Substances Are Covered? The notification requirements apply to underground storage tanks that contain regulated substances. This includes any substance defined as hazardous in section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA. It also includes petroleum, e.g., crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

Where To Notify? Completed notification forms should be sent to the address given at the top of this page.

When To Notify? 1. Owners of underground storage tanks in use or that have been taken out of operation after January 1, 1974, but still in the ground, must notify by May 8, 1986. 2. Owners who bring underground storage tanks into use after May 8, 1986, must notify within 30 days of bringing the tanks into use.

Penalties: Any owner who knowingly fails to notify or submits false information shall be subject to a civil penalty not to exceed $10,000 for each tank for which notification is not given or for which false information is submitted.

INSTRUCTIONS

Please type or print in ink all items except "signature" in Section V. **This form must by completed for each location containing underground storage tanks.** If more than 5 tanks are owned at this location, photocopy the reverse side, and staple continuation sheets to this form.

Indicate number of continuation sheets attached: 0

Re: Underground Storage Tank Removal
The K Mart Corporation
K Mart Store # 4077
ATEC Project Number 21-14031

Dear Ms. Weber:

ATEC Environmental Construction (ATEC) is pleased to provide the K Mart Corporation (K Mart) with this final report documenting the underground storage tank (UST) closure at the above-referenced facility. Work performed included the removal, cleaning, and disposal of the vessel and the performance of an environmental assessment to determine if the former UST operation had affected the surrounding environment.

ATEC recommends no further action at this site, however, within the State of Kentucky, these conclusions are subject to review by the Kentucky Department of Environmental Protection (KDEP). A copy of this report should be submitted to the KDEP for their review.

It has been a pleasure serving K Mart in this endeavor. As always, should there be any questions please feel free to contact either of the undersigned.

Very truly yours,
ATEC Associates, Inc.

UNDERGROUND STORAGE TANK REMOVAL PROJECT

The K Mart Corporation
K Mart Store # 4077
130 New Circle Road NW
Lexington, Kentucky
ATEC Project Number 21-14031

1.0 INTRODUCTION

The K Mart Corporation, Inc. (K Mart) contracted ATEC Environmental Construction (ATEC) to remove and dispose of one (1) 1,000 gallon steel underground storage tank (UST) at K Mart facility number 4077 located at 130 New Circle Road NW in Lexington, Kentucky. ATEC Proposal Number PC-90275 dated October 10, 1990 defines the scope of work and documents ATEC's level of effort. K Mart accepted the proposal on March 15, 1991 and provided ATEC with notice to proceed. ATEC filed the required thirty (30) day notification with the Kentucky Department of Environmental Protection on February 25, 1991 and received authorization to remove the vessel on March 11, 1991. Copies of the 30-day notification and authorization are in Appendix A of this report. Work was scheduled in accordance with the 30-day notification period and overall project logistics. Operations commenced on April 23, 1991 and were completed on the same day.

Information provided by K Mart indicated the vessel contracted for removal last contained waste oil and had been used for bulk storage of products generated during automotive servicing. The age of the vessel or date of installation was not available.

Regulations pertaining to USTs were promulgated on the federal level in 1988, and codified in 40 CFR 280 Underground Storage Tank Regulations. These regulations stipulate that the owners/operators of UST systems must either upgrade or remove their storage tanks in accordance with a pre-determined time table based upon the age of the system. All UST removals (with the exception of deferred systems) must undergo an environmental site assessment to determine if the operation has negatively impacted the surrounding environment. The burden of monitoring regulatory compliance and establishing environmental procedures is placed upon the state regulatory agency, which

in this case, is the Kentucky Department of Environmental Protection (KDEP).

KDEP guidelines require each UST removal or abandonment in place to undergo a detailed soil sampling program. The number of samples is based upon the size of the vessel. The required analytical method for evaluation of petroleum products is TPH,IGN,EP-TOX & TCLP Metals analysis, via U.S. Environmental Protection Agency (EPA) Method SW846-9071, 1010, 6010 & 7000 series. Further discussion of analytical methods and field techniques are included in Section 3.2 of this report.

This report serves as documentation of ATEC's field activities, removal methods, laboratory analysis, conclusions and recommendations relative to K Mart's underground storage tank program.

2.0 SITE INVESTIGATION

Documented below are ATEC's field observations and work procedures concerning this UST removal operation. Mr. Rod Parke, an ATEC Field Inspector, performed the investigation under the direct supervision of the authors.

2.1 Physical Site Conditions

An ATEC UST removal crew, under the supervision of Mr. Jeff Chapman, performed the UST removal operations. Prior to ATEC's arrival on-site, K Mart had arranged for the remaining product to be removed from the vessel. Figure 1 is a topographic vicinity map indicating elevation and area location. Figure 2 illustrates the layout of the project site, UST location and ATEC's work plan.

2.2 Field Activities

Prior to excavation activities, ATEC sawcut the parking lot surface overlying the UST installation and subsequently removed the pavement and soil overlying the UST system. Once the vessel was exposed ATEC monitored the atmosphere of the vessel for both the Lower Explosive Limit (LEL) and percent oxygen. If necessary, the vessel was inerted utilizing dry ice. Once LEL readings were less than 20 percent the atmosphere allowed for the safe removal of the vessel from the excavation. The UST was extracted with a Case model 580K backhoe. Inspection of the exhumed vessel revealed no corrosion holes in the vessel. Cutting of the vessels' walls for decontamination proceeded after the visual examination. The vessel was cut in half longitudinally using a pneumatic chisel. ATEC personnel then cleaned the interior of the vessel.

Residual sludges were placed into 17H DOT approved 55-gallon drums, which are labeled with the appropriate waste identifiers. Once the gross sludge removal was complete, the interior of the vessel was squeegeed and wiped clean with an industrial degreaser (either surficant or solvent). Rinsate was collected and drummed for disposal with the sludges.

The liquid wastes were removed from site by Superior Oil Company, a licensed liquid waste disposal contractor and disposed of within a waste stream established for K Mart. A copy of the liquid waste disposal manifest is contained within Appendix A.

ATEC secured the tank on a low boy trailer, disposing of it at the Lexington Scrap Metal Scrap Yard in Lexington, Kentucky. Certification of the UST destruction is contained in Appendix A of this document which indemnifies K Mart of further liability associated with this tank.

Soils surrounding the vessel did not exhibit signs of petroleum hydrocarbon contamination. ATEC field screened the soils utilizing a Photo-ionization Detector (PID) in order to qualitatively establish the level of Total Photo-ionizable Vapors (TPVs) which can relate to the level of hydrocarbon contamination. Elevated TPV levels were not recorded at this site.

3.0 SAMPLING AND LABORATORY ANALYSIS

As noted in Section 1.0 of this report, the amount and location of the soil samples collected during a UST removal are governed by the KDEP at the state level and locally by the Lexington Department of Environmental and Emergency Management (LDEEM). General guidelines are based upon the size of the vessel and local environmental receptors. Concerning closure of vessels containing petroleum products, the state stipulates that surrounding soils be analyzed for TPH, IGN and TOTAL LEAD. LDEEM requires EP-TOX & TCLP Metals in addition to the analysis mandated by the state. ATEC submitted three (3) samples to the ATEC Indianapolis laboratory for TPH, IGN, EP-TOX & TCLP Metals analysis using U.S. EPA Methods SW846-9071, 1010, 6010 & 7000 series. All quality control information for these samples are available free of charge for thirty days. All samples were collected in accordance with KDEP sampling guidelines.

Figure 3 illustrates the location of the soil samples. Each sample was collected by removing an area of soil with the backhoe bucket and collecting this sample with a decontaminated spoon. This method allowed for the safe execution of the sampling plan with no trench entry required by our personnel.

All samples were collected in accordance with SW 846 Test Methods for Evaluating Solid Waste - Physical/Chemical Methods. This includes sample preservation and chain-of-custody tracking. Hard copy of all laboratory results and chain-of-custody documentation are in Appendix D of this report.

2	Walls	TPH, IGN, EP-TOX & TCLP Metals	ND, >140, ND & ND	Composite
3	Pipe Trench	TPH,IGN, EP-TOX & TCLP Metals	ND, >140, ND & ND	

*All concentrations in milligrams per kilogram (parts per million), ND=Non Detect

5.0 CONCLUSIONS

ATEC has completed the closure of the 1,000 gallon waste oil UST at this facility. The vessel was decontaminated and destroyed as per the attached documentation submitted by ATEC. During excavation and removal of the UST no contamination was detected by either instrumentation or observation. Laboratory analysis performed per KDEP guidelines on the samples from the excavation showed all concentrations below the laboratory quantitation limits or state action levels which leads ATEC to the conclusion that no further action should be required at this site. Copies of the raw laboratory data are included in Appendix D.

6.0 QUALIFICATIONS

Our professional services have been performed, our findings obtained and our recommendations prepared in accordance with customary principles and practices in the fields of environmental science and engineering,and all work procedures were conducted in accordance with NFPA, EPA and API guidelines. This warranty is in lieu of all other warranties either express or implied. This company is not responsible for the independent conclusions, opinions or recommendations made by others based on the field exploration and laboratory test data presented in this report.

RE: PROJECT DOCUMENTATION FROM K MART UST REMOVALS

This appendix contains all field reports from state and local regulatory inspectors along with any permits that may have been required to perform the UST removal. This appendix will also contain records of communication regarding releases from the aforementioned UST, if any.

This appendix will not contain regulatory inspection reports and permits if such reports were not issued to ATEC by the regulatory inspectors or if no permits were required to perform the scope of work within this contract.

Please note that it is uncommon for regulatory inspectors to furnish a copy of their report to the UST removal contractor, if such reports are generated.

Re: Underground Storage Tank
Notice of Intent to Close
UST Owner Name: K Mart Store #4077
Site Location: 130 New Circle Rd. NW
City, State Lexington, KY 40505
ATEC Project Number 21-14031

Dear Sirs/Madam:

This letter shall serve as written notification of the owner's intent to close the following underground storage tanks (USTs) at the above-referenced location. ATEC Environmental Construction (ATEC) has been given the responsibility by the UST owner to serve as the owner's authorized agent concerning this matter.

UST removal activities are scheduled to begin after March 18, 1991, with specific closure dates approved by yourself or the local authorities. The following table identifies the UST(s) involved in this closure, the nominal capacity, and material stored in each vessel.

UST IDENTIFICATION	CAPACITY (gallons)	MATERIAL STORED	CLOSURE METHOD
1	1,000	Waste Oil	Removal

ATEC, or its subcontractor, will perform the UST removal. The UST removal will include dismantling of immediate piping, excavation, and removal of the tank vessel from below-grade. Additionally, a sampling and analysis program will be performed to assess if any adverse environmental impact has occurred. Vessels will be completely decontaminated and rendered useless as outlined by the National Fire Protection Association (NFPA), American Petroleum Institute (API) and the United States Environmental Protection Agency (EPA) standards and guidelines. All appropriate agencies will be notified at least three days prior to work beginning.

We trust this submittal is satisfactory to your requirements. Please do not hesitate to contact the undersigned if there are any questions concerning this matter.

Very truly yours,

ATEC Associates, Inc.

D. Gray Keene
Manager, Environmental Construction

1. TYPE OF CLOSURE: (check one) X Removal from Ground ____ Close in Place (Attach variance letter.)
2. Number of tanks to be permanently closed at the above location: 1 Size(s) 1,000
   Product(s) Waste Oil
3. If the tank is to be closed in place, indicate the cleaning method and type of fill to be used: _____
4. Name of company/person performing the tank closure and the date scheduled: ATEC Environmental Construction
5. Name of laboratory where samples will be sent: ATEC Associates
6. Soil and/or groundwater samples must be collected to determine if a release has occurred. The owner should contact the laboratory prior to closure to obtain the correct sampling procedures.
   a. If the tanks are removed, soil samples must be taken immediately after the removal to prevent escape of the petroleum constituents. Samples shall be collected according to Underground Storage Tank Program methods. If groundwater is encountered during removal, groundwater shall also be sampled.
   b. If the tanks are closed in place, four (4) borings should be advanced two feet below the bottom of the tank excavation and samples collected from that level. If water is encountered during the soil borings, the groundwater shall also be sampled. Samples should be collected according to Underground Storage Tank Program methods.
   c. Below is a chart of the analysis that should be performed. The type of analysis is dependent upon the product that was stored in the tank and whether or not groundwater was encountered during the sampling event.

Products Stored in Tanks	Media	Analysis to be Performed
Gasoline only	Soil	BTEX*, ignitability and total lead
	Groundwater	BTEX*, flashpoint and total lead
Diesel/Motor Fuel only	Soil	PAH**, ignitability and total lead
	Groundwater	BTEX* and total lead
Waste Oil	Soil	TPH***, ignitability, total lead, EP Toxic, and Total metals
	Groundwater	TPH***, flashpoint and total lead

ATEC ASSOCIATES, INC.
LIMITED PAVEMENT WARRANTY

ATEC Project Number: 21-14031

Client: K Mart Corporation

Project: K Mart Store #4077

Project Address: 130 New Circle Road NW, Lexington, Kentucky

Date Installation Completed: April 23, 1991

For a period of two, (2) years commencing from the date of completion indicated above, ATEC Associates, Inc warrants to the Client ("Client")above that, subject to the terms, conditions and limitations stated herein, ATEC Associates, Inc. will repair any condition of the resurfacing which prohibits drivability due to failures of said pavement due to workmanship or materials in the Underground Storage Tank ("UST") removal pavement repair at the above location. ATEC Associates, Inc.'s repair obligations, over the life of this warranty, are limited to the original cost of the pavement repair installation.

TERMS, CONDITIONS, LIMITATIONS

1) K Mart shall provide ATEC Associates, Inc. with written notice within thirty (30) days of the failure of said pavement.
2) If upon inspection, ATEC Associates, Inc. determines that the failure of the pavement repair is caused by defects in the material or workmanship (except as provided in paragraphs number three (3) and four (4), K Mart's remedies and ATEC Associates, Inc.'s liability shall be limited to the cost limitations set forth above.
3) ATEC Associates, Inc. shall have no obligation under this warranty until it has received payment in full for all materials and services, and all invoices for installation, supplies and services have been paid in full.
4) ATEC Associates, Inc. shall have no obligation under this warranty in the event that:

   a) The pavement repair is damaged by extraordinary natural forces including without limitations, winds equal to or in excess of hurricanes and tornadoes, earthquakes or similar acts of God or natural causes;
   b) The pavement is damaged by willful or negligent acts including, but not limited to, fire, heavy truck traffic, acts of war or other misuse;
   c) The pavement repair is damaged by chemical releases or applications, esp. asphalt;
   d) There are any alterations or repairs made on or through the pavement repair without prior written authorization of ATEC Associates, Inc.;
   e) The owner, K Mart or lessee fails to comply with any material, term or condition of this warranty.

5) ATEC Associates, Inc.'s failure to at any time to enforce any of the terms or conditions stated herein shall not be construed as a waiver of such provision.
6) ATEC Associates, Inc.'s good faith determination of the cause of failure or damage to the pavement repair shall be conclusive.

THIS WARRANTY SUPERSEDES AND IS IN LIEU OF ALL OTHER WARRANTIES OR GUARANTEES WHETHER EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY SHALL BE K MART'S EXCLUSIVE REMEDY AGAINST ATEC ASSOCIATES, INC. WITH RESPECT TO THE PAVEMENT REPAIR, AND ATEC ASSOCIATES, INC. SHALL NOT BE LIABLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES. ATEC ASSOCIATES, INC.'S AGENTS HAVE NO AUTHORITY TO GIVE WARRANTIES BEYOND THOSE PROVIDED IN THIS WARRANTY.

E. CHEMICAL HAZARD ANALYSIS (1910.120(b)(4))

Contaminant	PEL/TLV	IDLH	LEL/UEL	Flash Point	Routes of Exposure
Used Motor Oil	N/A	N/A	N/A	275-600	Skin, eyes, mouth

NOTE: Material Safety Data Sheets attached for all substances identified above.

F. OTHER HAZARDS

Heat Stress: YES — If Yes, Specify Precautions:

Drinking water, regular rest breaks

Cold Stress: NO — If Yes, Specify Precautions:

Excessive Noise: YES — If Yes, Specify Precautions:

Ear plugs during air tool operation.

Confined Space Entry: NO — If Yes, Attach ATEC Entry Permit.

Open Excavations: YES — If Yes, Is Entry Required?, If so, Specify Precautions:

YES, proper excavation wall sloping per OSHA.

Welding/Cutting: NO — If Yes, Specify Precautions:

Heavy Equipment Operation: YES — If Yes, Type of Equipment and Precautions:

Backhoe, experienced operators only, caution tape, spotters.

Slip, Trip, Fall Hazards: YES — If Yes, Specify Precautions:

Police area often.

Overhead Utilities Present: Unknown — If Yes, Specify Location and Precautions to be Taken:

Determine on site.

Underground Utilities: YES

Utility Location Service: N/A

Name of Contact: N/A

Phone Number: 1-800-362-2764 1-502-597-3883

Precautions to be Taken: Be Careful

G. SITE CONTROL (1910.120(d))

Work Zones have been established as shown on the attached **Site Diagram.**
Site Security: Security on site will be maintained by:

X	Temporary Barricades and/or Warning Tape
	Security Fence
	24 Hour Security Guard
	Other:

H. PERSONAL PROTECTIVE EQUIPMENT (1910.120(b)(4))

Based on Evaluation of potential hazards, the following levels of personal protection have been designated for the applicable work zones:

WORK ZONE	LEVEL OF PROTECTION	REQUIRED PROTECTIVE EQUIPMENT	
Exclusion Zone	D	Respirator:	N/A
		Filters/Cartridges:	N/A
		Boots:	Steel toe, rubber optional
		Inner Gloves:	Nytrile
		Outer Gloves:	Nytrile
		Protective Coverall:	Saranex/Tyvek (at option)
		Hard Hat:	YES
		Eye Protection:	Safety glasses
		Other:	Work gloves

WORK ZONE	LEVEL OF PROTECTION	REQUIRED PROTECTIVE EQUIPMENT	
Contamination Reduction Zone	N/A	Respirator:	
		Filters/Cartridges:	
		Boots:	
		Inner Gloves:	
		Outer Gloves:	
		Protective Coverall:	
		Hard Hat:	
		Eye Protection:	
		Other:	

I. DECONTAMINATION (1910.120(k))

Please describe below the decontamination procedures for personnel and equipment.

Personnel decontamination is accomplished by coverall and glove removal and disposal. All contamination remaining can be washed off with soap and water in the mechanics rest room. Coveralls, gloves and used sorbent pads are to be collected in trash bags and returned to the office for proper disposal.

Equipment Decontamination:

Gross Removal By: Sorbent pads if necessary.

Decon Solution: N/A

Decontamination Rinsate:

Collection Method: N/A

Disposal Method, Firm: N/A

J. AMBIENT AIR MONITORING (1910.120(b)(4))

Not required.

K. PERSONNEL AIR MONITORING (1910.120(h))

Activity/Location	Contaminant(s)	NIOSH/OSHA Protocol
UST Removal	Possibly Flammables	LEL to be < 20%

L. CONTINGENCY PLAN (1910.120(l))

Emergency Communication Signals: To be determined on site.

Emergency Escape Routes: To be determined on site.

Emergency Equipment on Site: (Location)

First Aid Kit: Truck

Fire Extinguishers: Truck

Telephone: Truck

Eye Wash/Safety Shower: N/A

Other: N/A

M. OTHER REQUIRED INFORMATION

In order to comply with OSHA standards, the following documents MUST be maintained on site:

1) Hazard Communication Manual (1910.1200)

2) Material Safety Data Sheets for all chemicals brought onto the site, or expected to be encountered (1910.1200)

3) Respirator fit test records for all employees who will be required to wear respirators (1910.134)

4) Copy of ATEC's Respirator Program (1910.134)

5) Latest medical summary for all personnel (1910.120)

N. SIGN-OFF

All personnel have read the above plan and are familiar with its provisions. All personnel have received medical surveillance and training in compliance with the ATEC Health and Safety Policy.

Re: Three Soil Oil & Grease, EP-Tox Metals,
TCLP Metals, Ignitability
SW 846 Methods 7000 Series, 6010, 1010
EPA-600/4-79-020 Method 413.2
K-Mart Corporation
#4077
ATEC Project Number 21-14031

Dear Mr. Starzyk:

Enclosed are the results of the Chemical Analyses for the three soil samples which were submitted to the ATEC Environmental/Analytical Testing Division on April 26, 1991, on behalf of K-Mart Corporation. Oil & Grease analyses were performed according to SW 846 Method 9071. Metals were analyzed on a Perkin-Elmer 5100 Atomic Absorption Spectrophotometer according to the 7000 Series of the methods outlined in SW 846 and a Thermo Jarrell Ash ICAP-61 according to SW 846 Method 6010.

All associated Quality Control information will be maintained in the Testing Division files, a copy of which can be forwarded to you upon request. After a thirty-day period, a fee will be assessed for this additional information.

It has been a pleasure serving you and, as always, if there are any questions concerning these results or the ATEC policies, please feel free to contact me.

Respectfully submitted,
ATEC Associates, Inc.

Re: Soil Remediation
Kmart #4077, Lexington, KY
Project No. 93-31-95
Facility ID #3542-034

Dear Ms. Martin:

Enclosed please find the UST Soil Remediation Report for the referenced facility. The report includes the field procedures used and other documentation supporting our final conclusions. The removal of the hydrocarbon affected soils began on August 24, 1993 and the soil was removed from the property on September 14 and 15, 1993. A total of 222 cubic yards of soil were transported to the BFI Benson Valley Landfill in Frankfort, Kentucky for disposal.

Soil samples collected from the walls and bottom of the excavation were analyzed for Total Petroleum Hydrocarbons (TPH) and Total Lead. The levels of both TPH and Total Lead detected in the samples were below or in line with the background levels established by Veritech. The results of the analyses appear to indicate soils affected by the hydrocarbon contamination from the previously removed waste oil UST have been removed from the property.

If we can provide any additional information concerning this project, please do not hesitate to contact us.

Sincerely,

VERITECH ENVIRONMENTAL SERVICES

LEXINGTON, KENTUCKY

1.0 PROJECT OVERVIEW

Veritech Environmental Services was contracted by Kmart Corporation to supervise the removal and disposal of approximately 146 cubic yards of contaminated soil from the referenced property. The soils were removed from the area surrounding the location of a previously removed underground waste oil tank. On August 24 and 25, 1993, Peter J. Butterfield, R.G. supervised the removal activities and collected soil samples for analyses.

One sample from each wall of the cavity was collected and submitted for analysis. Five background samples were also collected per Commonwealth of Kentucky Regulations to establish background contaminant levels. The background and wall samples were analyzed for Total Petroleum Hydrocarbons (TPH, EPA Method 9071) and Total Lead (EPA Method 7420). Two composite samples from the stockpiled soils were also collected at this time for disposal profiling. These samples were analyzed for TCLP 8 RCRA Metals, TPH (9071), and Benzene, Toluene, Ethylbenzene, and Xylene (BTEX, EPA Method 8020). No samples were collected from the bottom of the excavation since bedrock was encountered.

The excavated soils were transported to the BFI Benson Valley Area Landfill in Frankfort Kentucky on September 14 and 15, 1993. The loading of the soil was supervised by Chris Mitchell, R.E.A. Copies of the waste manifests are included in the Appendix to this report. The final volume of soil transported to the landfill for disposal was 222 cubic yards.

2.0 SOIL SAMPLING PROCEDURES

One sample from each of the cavity walls was collected after the target volume of soil was removed. The backhoe operator was instructed to scrape some of the undisturbed soil into the bucket. A sample of this soil was then packed in a laboratory prepared glass jar using latex gloves, labeled, and placed on ice prior to submission to the laboratory.

Five background samples were collected at the same time. These samples were collected from an up gradient area northwest of the excavation. The samples were collected from approximately three feet below the surface, as per the requirements of the Commonwealth of Kentucky. These samples were also packed in laboratory prepared sample jars using latex gloves, labeled, and placed on ice prior to submission to the laboratory.

The volume of soil excavated was limited primarily to the former tank cavity. The bedrock is located very near the surface and limited the excavation depth in the areas not located in the former cavity. The excavation depth outside the cavity ranged from 1.5 feet to 3.5 feet. The depth of the cavity was 9 feet. The variations in depth of the excavated soils left excavation walls that were not well defined. The sample identifications reflect this lack of symmetry.

3.0 SOIL ANALYSES

The sample from each wall of the cavity and the background samples were analyzed for the presence of TPH (EPA Method 9071) and Total Lead (EPA Method 7420). The samples collected from the stockpiled soils were analyzed for TCLP 8 RCRA Metals, TPH (9071), and BTEX (EPA Method 8020) as required for disposal into the approved landfill. All samples were placed on ice and transported to Analytical Services Laboratory, Inc. of Louisville, Kentucky for analysis. The results of the tests are summarized in Table 1 and Table 2. Copies of the laboratory results and chains of custody are included in the Appendix.

Silver	0.014	0.014
TPH	675	2205

All results are listed in parts per million

4.0 CONCLUSIONS

A small amount of residual hydrocarbon contamination was detected in two of the soil samples after the excavation was completed, the samples from the east & southeast wall and the west and north wall. The levels detected ranged from 35 ppm (E & SE) to 45 ppm (W & N). The range of detectable hydrocarbons in the five background samples varied from less than 10 ppm to 160 ppm. The results of the analyses of the background samples appear to identify some level of naturally occurring hydrocarbon based substances.

Levels of Total Lead above the detection levels of the test method were present in all samples

analyzed. The levels in the excavation walls ranged from 6.2 to 8.5 ppm. The levels of Total Lead detected in the background samples ranged from 4 ppm to 8.4 ppm. The levels of lead detected in the walls of the excavation appear to be in line with the natural occurring levels detected in the background samples.

After the laboratory analyses were reviewed, clean backfill consisting of washed gravel was added to the excavation to prepare the area for paving. The area was then paved with four inches of asphalt.

Based on the information collected during this project, it appears the soil contaminated during the presence of the underground storage tank on this property have been removed from the site and no further remedial action should be necessary.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Fayette County Area, Part of Fayette County, Kentucky
Survey Area Data: Version 20, Sep 10, 2023

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jun 4, 2019—Aug 8, 2019

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
uBlmB	Bluegrass-Maury silt loams, 2 to 6 percent slopes	5.9	75.4%
uMlmC	Maury-Bluegrass silt loams, 6 to 12 percent slopes	1.9	24.6%
Totals for Area of Interest		**7.8**	**100.0%**

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 11/13/2023 at 4:15 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

Map Functionality:
- For best results, use the latest version of Internet Explorer, Firefox, or Google Chrome browsers.
- Click on a well or spring to identify feature.
- Double-click on a map location to identify coordinates.

Map Printing:
- For best results, use the latest version of Internet Explorer, Firefox, or Google Chrome browsers.
- Use the map printing tools (under the "Tools" menu on the right) to print the map to a printer or a pdf.
- This page is formatted to fit the map and the tables below on one page - use your browser functionality (or click the "Print This Page" button below) to print this page and the tables below.
  NOTE: In older versions of Internet Explorer (8.0 and below), the topography or imagery may not print. You will need to either upgrade your browser, use a different browser (Firefox or Chrome), use the "print to pdf" tool, or use your computer's screen capture functionality.

KENTUCKY SPRING INVENTORY FORM

MAY 14 1998

(1) AKGWA NUMBER: ☐☐☐☐-☐☐☐☐-☐☐

Kentucky Spring Tag 7 J.C.

9000-1290

ce.

(2) GENERAL INFORMATION:

Spring Owner's Name: ( ) unknown

Mailing Address: N. BROADWAY / BROADVIEW DR. ( ) unknown

City: LEXINGTON State: KY Zip:

Phone: ( ) ( ) no phone ( ) unknown

(4) SPRING LOCATION:

Spring Name: ( ) unnamed

USGS Quadrangle Name: LEXINGTON EAST

County: FAYETTE

Elevation: 970 ft. ( ) map ( ) altimeter ( ) Abney level ( ) other

Latitude: 38 03 58 Longitude: 84 28 28

Physiographic or Hydrologic Region:

(X) Blue Grass ( ) Ohio River Alluvium ( ) E. Coal Field

( ) Miss. Plateau ( ) Jackson Purchase ( ) W. Coal Field

(5) SPRING CHARACTERISTICS:

Spring type: ( ) seep (X) gravity ( ) bluehole (artesian) ( ) other ( ) unknown

Is the spring the headwaters of a surface stream? ( ) yes ( ) no

Which side of the stream is the spring (when facing upstream)?

( ) left ( ) center ( ) right ( ) not applicable

Type of flow: (X) perennial ( ) seasonal ( ) intermittent

Spring discharges from: ( ) cave (X) rock ( ) fracture ( ) soil ( ) alluvium ( ) mine adit ( ) unknown ( ) other

Spring discharges into: ( ) stream ( ) soil ( ) swamp ( ) pond or lake ( ) sinkhole (X) other CONCRETE TANK

Name of water body spring discharges into: ( ) unknown (X) unnamed UT CANE RUN

Spring discharge: ( ) no flow (X) < 0.1 cfs ( ) 0.1-1.0 cfs ( ) 1.0-10 cfs ( ) 10-100 cfs ( ) > 100 cfs ( ) gpm

Discharge was: ( ) measured (X) estimated ( ) not determined

Spring modifications: ( ) dam ( ) pump (X) spring box ( ) gravity fed pipe or trough ( ) spring house ( ) none ( ) other

(6) WATER (DYE) TRACE INFORMATION:

Have any water (dye) traces been run to/from this site? ( ) yes ( ) no ( ) unknown

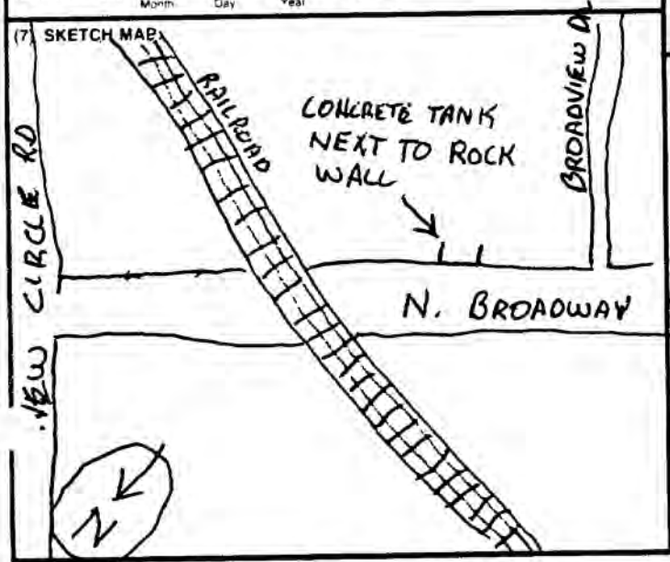
If yes, who conducted the trace? ( ) unknown

Address: ( ) unknown

City: State: Zip:

Date of trace: Month Day Year Trace #:

(7) SKETCH MAP



(8) SPRING USE:

( ) domestic ( ) public supply ( ) irrigation

( ) industrial ( ) livestock ( ) monitoring

( ) unregulated public access (X) unused

( ) other

PWSID #:

Water Withdrawal Permit #:

(9) SPRING SERVICE:

Number of people served:

Number of service connections:

Any quantity problems? ( ) yes ( ) no ( ) unknown

Any quality problems? ( ) yes ( ) no ( ) unknown

Describe

(10) TYPE OF TREATMENT SYSTEM:

(X) none

( ) water softener

( ) ultraviolet

( ) chlorination

( ) aeration

( ) charcoal filter

( ) sand filter

( ) iron inhibitor

( ) settling tank

( ) other

Is a treatment bypass available? ( ) yes ( ) no

Describe water quality problem requiring treatment:

(11) INSPECTION INFORMATION:

Date of Inspection: 7 (Month) 29 (Day) 90 (Year)

Check one: (X) original inspection ( ) re-inspection

Was a water quality sample taken as part of this inspection? ( ) yes ( ) no

Reason for inspection (check all that are applicable):

( ) general water quality analysis requested

( ) specific complaint investigation

(X) general survey

( ) ambient groundwater monitoring

( ) other

Specify:

Permit Program Name

Other ID #: 253

Other ID #:

Spring Inventory #:

(12) OPTIONAL USE:

Will spring owner allow state monitoring? ( ) yes ( ) no ( ) unknown

Extent of monitoring allowed: ( ) collect sample ( ) modify spring ( ) measure discharge ( ) access to spring or spring house ( ) other

Monitoring feasibility:

(13) COMMENTS:

SPRING COMING OUT ROCK WALL NEXT TO NORTH BROADWAY - WATER DRAINS INTO CONCRETE TANK. TANK IS IN DITCH NEXT TO ROAD.

ACCESS - FAIR

(14) INVESTIGATOR IDENTIFICATION:

Name: PIDGEON (Last) KEN (First) (MI) (Inspector ID #)

Agency: ( ) CHR (X) DOW ( ) DWM ( ) KGS ( ) SOAP ( ) Other

Signature of Inspector: Kenneth A Pidgeon

Date: 7 (Month) 29 (Day) 90 (Year)

Number of Attached pages: 1

Distribution: White copy to DOW, Pink Copy to Inspecting Agency, Yellow Copy to Owner

Printed with State Funds

TODD SLATIN
DIRECTOR
CENTRAL PURCHASING

ADDENDUM #2
+

Bid Number: **70-2025**

Date: September 19, 2025

Subject: **Division of Water Quality Facility Renovation**

Address inquiries to:
Brian Marcum
brianm@lexingtonky.gov
(859) 258-3325

TO ALL PROSPECTIVE SUBMITTERS:

Please be advised of the following clarifications to the above referenced Bid:

There will be one final site visit opportunity on Monday September 22, 2025, from 10:00 AM until 12:00 PM EST.

Todd Slatin, Director
Division of Central Purchasing

All other terms and conditions of the Bid and specifications are unchanged.
This letter should be signed, attached to and become a part of your Bid.

DOCUMENT 009113 - ADDENDA

1.1 ADDENDUM

A. Addendum No. Three.

1.2 PROJECT INFORMATION

A. Project Name: LFUCG DWQ Headquarters & Operations Facility

B. Owner: Lexington Fayette Urban County Government.

C. Owner Project Number: RFB #70-2025.

D. Architect: GRW Engineering Architecture Geospatial.

E. Architect Project Number: 5247-01.

F. Date of Addendum: September 22, 2025.

1.3 NOTICE TO BIDDERS

A. This Addendum is issued to all registered plan holders pursuant to the Instructions to Bidders and Conditions of the Contract. This Addendum serves to clarify, revise, and supersede information in the Project Manual, Drawings, and previously issued Addenda. Portions of the Addendum affecting the Contract Documents will be incorporated into the Contract by enumeration of the Addendum in the Owner/Contractor Agreement.

B. The Bidder shall acknowledge receipt of this Addendum in the appropriate space on the Bid Form.

C. The date for receipt of bids is unchanged by this Addendum, at same time and location.

1. Bid Date: **September 25th, 2025.**

1.4 ATTACHMENTS

A. This Addendum includes the following attached Documents and Specification Sections:

1. Document: Bidding Questions and Responses, dated September 22, 2025, (new).

END OF DOCUMENT 009113

1. Please review a manufacturer substitution request for specification section 096813 Tile Carpeting as manufactured by J and J Flooring to be approved for use as an equal to Square D Fractal Fluency Collection as manufactured by Mohawk Group, Inc. per specification section 096813 2.1 A. Product data was emailed to the Architect for review.

    a. Upon review of the proposed substitution request Reverie Demi-Plank 7684 as manufactured by J and J Flooring is found to be acceptable per specification section 096813 2.1 A.

    b. Architects' approval of substitute during bidding does not relieve Contractor of the responsibility to submit required Shop Drawings and to comply with all other requirements of the Contract Documents per specification section 002600 1.4 C.

2. Please review a manufacturer substitution request for specification section 102113.19 Plastic Toilet Compartments manufactured by Hadrian to be approved for use as an equal to ASI. per specification section 102113.19 2.3 A. Product data was emailed to the Architect for review.

    a. Upon review of the proposed substitution request plastic toilet compartments as manufactured by Hadrian is found to be acceptable per specification section 102113.19 2.3 A.

    b. Architects' approval of substitute during bidding does not relieve Contractor of the responsibility to submit required Shop Drawings and to comply with all other requirements of the Contract Documents per specification section 002600 1.4 C.
