1. For Installer: Certificate from HVLS fan manufacturer certifying that Installer has successfully completed prerequisite training administered by manufacturer for proper installation of systems, including but not limited to, equipment, controls, and accessories indicated and furnished for installation.

C. Field quality-control reports.

1.5 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For HVLS fans to include in emergency, operation, and maintenance manuals.

1.6 QUALITY ASSURANCE

A. Manufacturer Qualifications: Provide certification that manufacturer complies with the most recent edition of ISO 9001.

1.7 DELIVERY, STORAGE, AND HANDLING

A. Deliver and store products in a clean and dry place.

B. Comply with manufacturer's written rigging and installation instructions for unloading and moving to final installed location.

C. Handle products carefully to prevent damage, breaking, denting, and scoring. Do not install damaged products.

D. Protect products from weather, dirt, dust, water, construction debris, and physical damage.

1. Retain factory-applied coverings on equipment to protect finishes during construction and remove just prior to operating unit.
2. Cover unit openings before installation to prevent dirt and dust from entering inside of units. If required to remove coverings during unit installation, reapply coverings over openings after unit installation and remove just prior to operating unit.

E. Replace installed products damaged during construction.

1.8 WARRANTY

A. Warranty: Manufacturer and Installer agree to repair or replace components of fans that fail in materials or workmanship within specified warranty period.

1. Warranty Period:

a. For Motor, Including Controls: 10 years from date of Substantial Completion.
b. For Parts, Including Blades and Hub: 10 years from date of Substantial Completion.
c. For Labor: One year from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

B. UL Compliance: Listed and labeled to UL 507.

C. CSA Compliance: Listed and labeled to CSA C22.2, No. 113.

D. Comply with NFPA 13 requirements for HVLS fans.

E. AMCA Compliance:

1. Test HVLS fans according to AMCA 230.
2. Certify HVLS fan performance according to AMCA 211.

F. Performance Data: Comply with ANSI 230 test procedure standard, based on five rating points: 20-, 40-, 60-, 80-, and 100-percent of maximum speed. Comply with AMCA 211 for publication of performance data.

2.2 MANUFACTURERS

A. Big Ass Fans, Greenheck.

B. Source Limitations: Obtain HVLS fans from single source from single manufacturer.

2.3 HIGH-VOLUME, LOW-SPEED FANS

A. Description: Factory-assembled and -tested horizontal, non-ducted fan unit, consisting of large-diameter blade set, direct-drive electric motor, with variable-speed motor control.

1. Provide fan designed to circulate large air volume, vertically, at low velocity.
2. Maximum Operating Temperature: 122 deg F.
3. Controls: Provide wall-mounted keypad for multiple fans.

a. Provide automatic and manual speed control.

4. Standard Mounting Bracket: Steel beam/steel angle.
5. Accessories:

a. Mounting extension tube.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine conditions for compliance with requirements for installation tolerances and other conditions affecting HVLS fan performance, maintenance, and operations.

1. Fan locations indicated on Drawings are approximate. Determine exact locations before roughing-in for mounting, control, and electrical connections.

B. Examine roughing-in for mounting location, anchor-bolt sizes, and locations, to verify actual locations for mounting connections before installation of fan.

C. Examine areas for suitable conditions where fan will be installed.

D. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION OF HIGH-VOLUME LOW-SPEED FANS

A. Install fan according to manufacturer's published instructions.

B. Comply with NECA 1 and NFPA 70.

C. Comply with NFPA 13 for installation of HVLS fans and maximum allowable fan diameter. Center HVLS fans between four adjacent sprinklers. Minimum vertical clearance from HVLS fan to sprinkler deflector is 3 feet (0.9 m).

D. Comply with NFPA 72 and interlock HVLS fans to shut down upon receiving an alarm from fire alarm system.

E. Equipment Mounting:

1. Anchor fan to building structure with manufacturer's recommended mounting bracket for installed condition.
2. Consult a licensed professional structural engineer for mounting methods and approval for mounting to the structure. Structure must be able to withstand the torque and forces generated by the fan.
3. Comply with requirements for hangers and supports specified in Section 230529 "Hangers and Supports for HVAC Piping and Equipment."
4. Comply with requirements for vibration isolation devices specified in Section 230548 "Vibration Control for HVAC."

F. Install unit to permit access for maintenance.

G. Install parts and accessories shipped loose.

3.3 ELECTRICAL CONNECTIONS

A. Connect wiring according to Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

B. Ground equipment according to Section 260526 "Grounding and Bonding for Electrical Systems."

C. Install electrical devices furnished by manufacturer, but not factory mounted, according to NFPA 70 and NECA 1.

D. Install nameplate for each electrical connection, indicating electrical equipment designation and circuit number feeding connection.

1. Nameplate shall be laminated acrylic or melamine plastic signs with a black background and engraved white letters at least 1/2 inch (13 mm) high.

E. Install power wiring to field-mounted electrical devices, furnished by fan manufacturer, but not factory mounted.

3.4 CONTROL CONNECTIONS

A. Connect control wiring to field-mounted control devices.

B. Connect control wiring according to Section 260523 "Control-Voltage Electrical Power Cables."

C. Connect control interlock wiring between HVLS fan and other equipment to provide a complete and functioning system.

D. Connect control wiring between fan unit control interface and control system to provide remote control and monitoring.

E. Install control devices furnished by manufacturer, but not factory mounted.

F. Install control wiring to field-mounted control devices, furnished by fan manufacturer, but not factory mounted.

G. Protect installed units from damage caused by other work.

3.5 FIELD QUALITY CONTROL

A. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

B. Perform the following tests and inspections with the assistance of a factory-authorized service representative:

1. Fan Operational Test: After electrical circuitry has been energized, start units to confirm proper motor rotation and unit operation.

2. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.

C. Fan or components will be considered defective if fan or components do not pass tests and inspections.

D. Prepare and submit test and inspection reports.

3.6 STARTUP SERVICE

A. Engage a factory-authorized service representative to perform startup service.

1. Complete installation and startup checks according to manufacturer's written instructions.
2. Verify that fan is secure on mountings and supporting devices and that connections to electrical systems are complete. Verify that proper thermal-overload protection is installed in motors, controllers and switches.
3. Verify proper motor rotation direction and free fan rotation.
4. Check bearing lubrication.
5. Verify proper fan rotation.

3.7 ADJUSTING

A. Comply with requirements in Section 230593 "Testing, Adjusting, and Balancing for HVAC" for air-handling system testing, adjusting, and balancing.

3.8 CLEANING

A. Clean equipment externally; remove coatings applied for protection during shipping and storage, foreign material, and oily residue according to manufacturer's written instructions. Following manufacturer's cleaning procedures, and clean with manufacturer-recommended cleaning products.

3.9 DEMONSTRATION

A. Engage a factory-authorized service representative to train Owner's maintenance personnel to adjust, operate, and maintain HVLS fans.

B. Video training sessions, and provide electronic copy of video to Owner.

END OF SECTION 233439

SECTION 233713 – AIR DISTRIBUTION DEVICES

PART 1 - GENERAL

1.1 WORK INCLUDED

A. Diffusers

B. Registers/grilles

C. Louvers

1.2 RELATED DOCUMENTS

A. The General and Special Conditions and all other Contract Documents are applicable to work under this section of the specifications. All the work under this section of the specifications shall be governed by any alternates and unit prices called for in the Form of Proposal insofar as they affect this portion of the work.

B. Section 230100 – GENERAL PROVISIONS FOR MECHANICAL WORK

C. Section 233113 – DUCTWORK AND DUCTWORK INSULATION

D. Section 233300 - DUCTWORK ACCESSORIES

1.3 REFERENCES

A. ADC 1062 - Certification, Rating and Test Manual.

B. AMCA 500 - Test Method for Louvers, Dampers and Shutters.

C. ANSI/NFPA 90A - Installation of Air Conditioning and Ventilating Systems.

D. ARI 650 - Air Outlets and Inlets.

E. ASHRAE 70 - Method of Testing for Rating the Air Flow Performance of Outlets and Inlets.

F. SMACNA - Low Pressure Duct Construction Standard.

1.4 QUALITY ASSURANCE

A. Test and rate performance of air outlets and inlets in accordance with ADC Equipment Test Code 1062 and ASHRAE 70.

B. Test and rate performance of louvers in accordance with AMCA 500.

1.5 REGULATORY REQUIREMENTS

A. Conform to ANSI/NFPA 90A.

PART 2 - PRODUCTS

2.1 ACCEPTABLE MANUFACTURERS

A. Manufacturer listed in schedule is for design selection only.

B. Registers, Grilles, and Diffusers

1. Anemostat, Carnes, Hart and Cooley, Krueger, Metalaire, Price, Titus, Tuttle and Bailey.

C. Louvers

1. Arrow, Cesco, Greenheck, Louvers and Dampers, Ruskin, Vent Products and United Enertech.

2.2 RECTANGULAR CEILING DIFFUSERS

A. Square, stamped, multicore type diffuser to discharge air in 360-degree pattern.

B. Provide for surface mount and inverted T-bar where shown. In plaster ceilings, provide plaster frame and ceiling frame.

C. Fabricate of steel with baked enamel finish.

D. Provide radial opposed blades damper adjustable from diffuser face for surface mounted unit where specified.

2.3 CEILING GRID CORE EXHAUST AND RETURN REGISTERS/GRILLES

A. Fixed grilles of 1/2 x 1/2 x 1-inch louvers.

B. Fabricate margin frame with countersunk screw mounting or lay-in frame for suspended grid ceilings as shown in schedule on drawings.

C. Fabricate of aluminum with factory clear lacquer finish.

D. Where scheduled provide integral, gang-operated opposed blade dampers with removable key operator, operable from face.

E. All louver-faced grilles shall be provided with pattern controller blades unless scheduled otherwise on the Drawings.

2.4 WALL SUPPLY REGISTERS/GRILLES

A. Streamlined and individually adjustable blades, depth of which exceeds 3/4 inch with adjustable blades, vertical, horizontal face, and horizontal rear deflectors.

B. Fabricate margin frame with countersunk screw or concealed mounting and gasket suitable for surface or duct mounting.

C. Fabricate of steel with 20 gage minimum frames and 22 gage minimum blades, steel and aluminum with 20 gage minimum frame, or aluminum extrusions, with factory baked enamel finish.

D. Provide integral, gang-operated opposed blade dampers with removable key operator, operable from face.

2.5 WALL EXHAUST AND RETURN REGISTERS/GRILLES

A. Streamlined blades, fixed, non-adjustable, horizontal face.

B. Fabricate margin frame with countersunk screw or concealed mounting.

C. Fabricate of steel with 20 gage minimum frames and 22 gage minimum blades, steel and aluminum with 20 gage minimum frame, or aluminum extrusions, with factory baked enamel finish.

2.6 LOUVERS

A. Provide louvers with blades on 37.5- or 45-degree slope, heavy channel frame, bird screen with 1/2 inch square mesh for exhaust and 3/4 inch for intake.

B. Fabricate of extruded aluminum, welded assembly with factory bake-enamel finish.

C. Furnish with required flange to match installation required.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Furnish and install where shown on drawings all registers, grilles, diffusers and louvers in accordance with the tabulation in the schedule on drawings.

B. Provide accessories and modifications as indicated in schedule notes.

C. Install items in accordance with manufacturer’s instructions.

D. Install in locations as shown on drawings. Items have been located as shown to provide maximum performance. Coordinate with architectural features and notify Architect/Engineer of any conflicts.

E. Install diffusers to ductwork with air tight connection.

F. Provide accessible balancing dampers on duct take-off to diffusers, and grilles and registers, regardless of whether dampers are specified as part of the diffuser, or grille and register.

PART 4 - SUBMITTALS

A. In accordance with the requirements of the General Conditions and Supplementary General Conditions, the following information is required to be submitted for this Section. The Contractor shall submit the required information to Architect for approval within 30 days after notice to proceed.

ITEM DESCRIPTION	SHOP DRAWINGS	CATALOG DATA	PARTS LISTS	OPERATING MANUAL	WIRING DIAGRAM	CERTIFICATION	SAMPLES	OTHER
Diffusers	X	X						
Registers/Grilles	X	X						
Louvers	X	X						

END OF SECTION 233713

SECTION 235533 – GAS FIRED UNIT HEATERS

PART 1 - GENERAL

1.1 WORK INCLUDED

A. Gas Fired Unit Heaters

1.2 RELATED DOCUMENTS

A. The General and Special Conditions and all other Contract Documents are applicable to work under this section of the specifications. All the work under this section of the specifications shall be governed by any alternates and unit prices called for in the Form of Proposal insofar as they affect this portion of the work.

B. Section 230100 - General Provisions for Mechanical Work

C. Section 221000 – Plumbing Piping and Valves

D. See drawings for further conditions, requirements and schedules.

1.3 QUALITY ASSURANCE

A. All electrical components and accessories shall be listed and labeled per requirements of NFPA 70, Article 100.

PART 2 - PRODUCTS

2.1 ACCEPTABLE MANUFACTURERS

A. Reznor

2.2 GAS FIRED UNIT HEATERS

A. Gas Fired, Separated Combustion Unit Heater: Provide (82%, 83%) high-efficiency, separated-combustion, power vented, gas-fired unit heaters. The unit shall be designed for use in a building with negative pressures up to 0.15" w.c. and for use in building where a non-explosive atmosphere exist that is dust laden and/or contains mildly corrosive fumes.

B. The heater shall be equipped with a multi-cell, 4 pass serpentine style steel heat exchanger. Heat exchanger tubes shall be press fabricated of (corrosion resistant aluminized steel). All heat exchangers shall be fabricated with no welding or brazing, only tool pressed mechanical joints. All heat exchanger cells shall be designed with an aerodynamic cross section to provide maximum airflow.

C. The units shall incorporate a single, one-piece burner assembly with a single orifice. The burner shall have a continuous wound close pressed stainless-steel ribbon separating the flame from the burner interior. All units shall have a single venturi tube and orifice supplying fuel to a one-piece burner housing. Each heat exchanger cell shall use balanced draft induction to maintain optimum flame control.

D. Controls shall include a (single-stage) gas valve; direct spark multi-try ignition with electronic flame supervision with 100% lockout integrally controlled via a printed circuit control board. The control board shall also incorporate diagnostic lights, DIP switches for fan overrun settings, and a relay for fan only operation. All units shall be equipped with a safety limit switch.

E. All controls shall be enclosed in the sealed controlled compartment to protect them from accidental damage, dust, and atmospheric corrosion.

F. Combustion Air and Venting

1. The unit shall have a factory-installed power venter device to draw combustion air from outside of the building. The outside air shall enter the unit through a factory-installed round inlet air terminal on the rear of the heater. The control compartment shall be sealed, and the access door shall be gasketed to prevent dirt, lent, dust, or other contaminants present in the heated space from injuring a unit. The control compartment door shall be equipped with a safety interlock switch to prevent operation when the door is open.
2. The combustion air supply pipe and flue exhaust pipe shall be run in parallel from the heater to a factory supplied concentric adaptor assembly, which allows for a single wall or roof penetration to the vertical air inlet and vent terminal.
3. The combustion air/venting system shall include a vibration isolated power venter motor and wheel assembly and a combustion air pressure switch.

G. Electrical

1. Operation shall be controlled by an integrated circuit board that includes LED diagnostic indicator lights. Supply voltage connections shall be made in a sealed junction box. 24-volt controlled connections shall be made on an externally mounted terminal strip with connections (W1, W2, R, and G). All internal wiring both lined and controlled voltages, shall be terminated by insulated terminal connectors to minimize shock hazard during service.
2. All units will be equipped with a built-in disconnect switch.

H. Cabinet

1. The cabinet shall be low profile with a pre-coat or powder-coat paint finish. Finish shall be a minimum 80 gloss on G30 galvanized steel. The cabinet shall be constructed so that screws are not visible from the bottom, front, or sides, except for service panel and accessories. Unit construction shall incorporate a beveled front corner on control side for additional cabinet rigidity. All units shall be manufactured with a tool drawn supply air orifice on the rear panel to reduce fan inlet noise.
2. The unit shall be designed for ceiling suspension featuring 3/8"-16 female threads (hanger kits for 1" pipe) at both 2-point and 4-point locations with no additional adaptor kits.

3. The cabinet shall be equipped with painted, rolled-formed horizontal louvers. Louvers shall be spring held and adjustable for directing air flow.
4. The cabinet shall be equipped with a full safety fan guard with no more than half-inch grill spacing. The (enclosed) motor and fan assembly shall be resiliently mounted to the cabinet to reduce cabinet noise.
5. The unit shall be designed with a full opening service access panel complete with screw closure attachment and lifting handle for removal. Service panel shall be fully gasketed and equipped with a safety interlock switch. All components in the gas train, all standard electrical controls, and the power venter shall be within the sealed service compartment.

2.3 CERTIFICATIONS

A. Units shall be manufactured in an ISO9002 certified facility. Manufacturer must have a minimum of 50 years' experience in the manufacturer of gas-fired unit heaters.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install all units and accessories in accordance with manufacturer's recommendations.

B. Install all units in a manner to provide clearances for proper operation accessibility and maintenance.

C. Coordinate electrical and gas connections required.

3.2 DEMONSTRATION

A. Provide Owner's maintenance personal training as required to adjust, operate and maintain heaters.

PART 4 - SUBMITTALS

A. In accordance with the requirements of the General Conditions and Supplementary General Conditions, the following information is required to be submitted for this Section. The Contractor shall submit the required information to Architect for approval within 30 days after notice to proceed.

ITEM DESCRIPTION	SHOP DRAWINGS	CATALOG DATA	PARTS LISTS	OPERATING MANUAL	WIRING DIAGRAM	CERTIFICATION	SAMPLES	OTHER
Gas-Fired Unit Heaters	X	X	X	X	X			

END OF SECTION 235533

SECTION 237416 - PACKAGED ROOFTOP AIR CONDITIONING UNIT WITH GAS HEAT

PART 1 - GENERAL

1.1 SECTION INCLUDES

A. Package roof top unit.

B. Refrigeration components.

C. Gas heat.

D. Unit operating controls.

E. Hot Gas Reheat.

F. Roof curb.

G. Electrical power connections.

H. Operation and maintenance service.

1.2 REFERENCES

A. NFPA 90 A & B - Installation of Air Conditioning and Ventilation Systems and Installation of Warm Air Heating and Air Conditioning Systems.

B. ANSI/ASHRAE 15 - Safety Code for Mechanical Refrigeration.

C. AHRI 360 - Commercial and Industrial Unitary Air Conditioning Equipment testing and rating standard.

D. ANSI/ASHRAE 37 - Testing Unitary Air Conditioning and Heat Pump Equipment.

E. ANSI/ASHRAE/IESNA 90.1-1999 - Energy Standard for New Buildings Except Low-Rise Residential Buildings.

F. ANSI Z21.47/UL1995 - Unitary Air Conditioning Standard for safety requirements.

G. California Energy Commission Administrative Code - Title 20/24 - Establishes the minimum efficiency requirements for HVAC equipment installed in new buildings in the State of California.

H. AHRI 210/240 - Unitary Air-Conditioning Equipment and Air- Source Heat Pump Equipment.

I. AHRI 270 - Sound Rating of Outdoor Unitary Equipment.

J. AHRI 370 - Sound Rating of Large Outdoor Refrigerating and Air Conditioning Equipment.

K. ANSI/NFPA 70-1995 - National Electric Code.

1.3 SUBMITTALS

A. Submit unit performance data including: capacity, nominal and operating performance.

B. Submit Mechanical Specifications for unit and accessories describing construction, components and options.

C. Submit shop drawings indicating overall dimensions as well as installation, operation and services clearances. Indicate lift points and recommendations and center of gravity. Indicate unit shipping, installation and operating weights including dimensions.

D. Submit data on electrical requirements and connection points. Include recommended wire and fuse sizes or MCA, sequence of operation, safety and start-up instructions.

E. Shop drawings submitted for approval shall be accompanied by a copy of the purchase agreement between the Contractor and an authorized service representative of the manufacturer for check, test and start up and first year service.

1.4 DELIVERY, STORAGE and HANDLING

A. Comply with manufacturer's installation instructions for rigging, unloading, and transporting units.

B. Protect units from physical damage. Leave factory-shipping covers in place until installation.

1.5 WARRANTY

A. Provide parts warranty for 24 months from date of start-up or 30 months from shipment, whichever occurs first.

B. Provide five-year extended warranty for compressors.

C. Provide 15-year warranty for stainless steel gas-fired heat exchangers.

1.6 MAINTENANCE SERVICE

A. Provide maintenance service for one-year with a two-month interval as maximum time period between calls. Provide 24 hour emergency service on breakdowns and malfunctions. Refer to Schedule Drawings for Add Alternate pricing for additional maintenance service request.

B. Include maintenance items as outlined in manufacturer's operating and maintenance data.

C. Submit copies of service call work order or report and include description of work performed.

1.7 REGULATORY REQUIREMENTS

A. Unit shall conform to ANSI Z21.47/UL1995 for construction of packaged air conditioner.

1. In the event the unit is not UL approved, the manufacturer must, at his expense, provide for a field inspection by a UL representative to verify conformance to UL standards. If necessary, contractor shall perform modifications to the unit to comply with UL, as directed by the UL representative, at no additional expense to the Owner.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by an "NRTL" (nationally recognized testing laboratory), and marked for intended location and application.

B. NFPA Compliance: Comply with NFPA 90A for design, fabrication, and installation of units and components.

C. ASHRAE 62.1 Compliance: Applicable requirements in ASHRAE 62.1, Section 5 - "Systems and Equipment" and Section 7 - "Construction and Startup."

D. ASHRAE 15 and ASHRAE 34 Compliance: For refrigeration system safety.

E. ASHRAE/IES 90.1 Compliance: Applicable requirements in ASHRAE/IES 90.1, Section 6 - "Heating, Ventilating, and Air-Conditioning."

F. ASHRAE 84 Compliance: Comply with capacity ratings for heat-wheel energy-recovery equipment.

G. UL Compliance:

1. Electric Coils: Comply with requirements in UL 1995.

2.2 CAPACITIES AND CHARACTERISTICS

A. Refer to Schedules on Drawings.

2.3 ACCEPTABLE MANUFACTURERS

A. Trane, Daikin, Carrier, McQuay, York/JCI

2.4 UNIT CASING

A. General Fabrication Requirements for Casings: Formed and reinforced double-wall insulated panels, fabricated to allow removal for access to internal parts and components, with joints between sections sealed.

B. Configuration: Horizontal unit with bottom discharge for roof-mounting installation.

C. Single-Wall Configuration:

1. Outside Casing Wall: Galvanized steel, minimum 18 gauge thick with manufacturer's standard finish, with pitched roof panels and knockouts with grommet seals for electrical and piping connections and lifting lugs.
2. Inside: Provide cleanable foil-faced, fire-retardant permanent, odorless glass fiber insulation.

D. Double-Wall Configuration:

1. Outside Casing Wall: Galvanized steel, minimum 18 gauge thick with manufacturer's standard finish, with pitched roof panels and knockouts with grommet seals for electrical and piping connections and lifting lugs.
2. Inside Casing Wall:

    a. Inside Casing, All Other Sections: Galvanized steel, solid.
    b. Antimicrobial Coating: Applied during the manufacturing process. Coating is to be EPA approved, NSF approved, or FDA listed.

3. Floor Plate: Reinforced metal surface; reinforced to limit deflection when walked on by service personnel. Insulation is provided below metal walking surface.
4. Roof: Standing seam or membrane; sloped to drain water.
5. Casing Insulation:

    a. Materials: Polyurethane foam insulation.
    b. Casing Panel R-Value: Minimum R-13.
    c. Insulation Thickness: 2 inches.
    d. Thermal Break: Provide continuity of insulation with no through-casing metal in casing walls, floors, or roofs of air-handling unit.

E. Access Doors:

1. Doors:

    a. Fabrication: Formed and reinforced double-wall and insulated panels of same materials and thicknesses as casing.
    b. Hinges: A minimum of two ball-bearing hinges or stainless steel piano hinge and two wedge-lever latches, operable from inside and outside. Arrange doors to be opened against airflow. Provide safety latch retainers on doors so that doors do not open uncontrollably. All access doors shall be hinged access doors.
    c. Gasket: Neoprene, applied around entire perimeters of panel frames.
    d. Size: Large enough to allow for unobstructed access for inspection and maintenance of air-handling unit's internal components.

F. Condensate Drain Pans:

1. Location: Each refrigerant coil and rotary heat exchanger.
2. Construction:

    a. Single-wall, stainless steel.

3. Size: Large enough to collect condensate from cooling coils, including coil piping connections, coil headers, and return bends.
4. Drain Connection:

    a. Located on one end or both ends of pan, at lowest point of pan.
    b. Terminated with threaded nipple.
    c. Minimum Connection Size: NPS 1NPS 2.

5. Slope: Minimum 0.125-inch/ft. slope, to comply with ASHRAE 62.1, in at least two planes to collect condensate from cooling coils (including coil piping connections, coil headers, and return bends) and from humidifiers and to direct water toward drain connection.
6. Length: Extend drain pan downstream from leaving face for distance to comply with ASHRAE 62.1.
7. Width: Entire width of water-producing device.
8. Depth: A minimum of 2 inches deep.
9. Pan-Top Surface Coating for Galvanized-Steel Drain Pans: Asphaltic waterproofing compound.
10. Provide units having stacked coils with intermediate drain pan to collect condensate from top coil.
11. Provide each unit with condensate overflow shutoff switch.

2.5 FANS, DRIVES, AND MOTORS

A. Fan and Drive Assemblies: Statically and dynamically balanced and designed for continuous operation at maximum-rated fan speed and motor horsepower.

B. Supply-Air Fans and Relief-Air Fans: Centrifugal; galvanized or painted steel; mounted on solid-steel shaft.

1. Shafts: With field-adjustable alignment.

    a. Turned, ground, and polished hot-rolled steel with keyway.

2. Shaft Bearings:

    a. Heavy-duty, self-aligning, pillow-block type with an L-50 rated life of minimum 100,000 hours in accordance with ABMA 9.

3. Housings: Formed- and reinforced-steel panels to form curved scroll housings with shaped cutoff and spun-metal inlet bell.

    a. Bracing: Steel angle or channel supports for mounting and supporting fan scroll, wheel, motor, and accessories.

4. Housings, Plenum Fans: Steel frame and panel; fabricated without fan scroll and volute housing. Provide inlet screens for Type SWSI fans.
5. Airfoil, Centrifugal Fan Wheels (Plenum Fan Wheels): Smooth-curved inlet flange, backplate, and hollow die-formed airfoil-shaped blades continuously welded at tip flange and backplate; steel hub riveted to backplate and fastened to shaft with setscrews.
6. Mounting: For internal vibration isolation. Factory mount fans with manufacturer's standard vibration isolation mounting devices having a minimum static deflection of 1 inch.
7. Shaft Lubrication Lines: Extended to a location outside the casing.
8. Flexible Connector: Factory fabricated with a fabric strip minimum 3-1/2 inches wide, attached to two strips of minimum 2-3/4-inch wide by 0.028-inch thick, galvanized-steel sheet.

    a. Flexible Connector Fabric: Glass fabric, double coated with neoprene. Fabrics, coatings, and adhesives shall comply with UL 181, Class 1.

C. Drive, Direct: Factory-mounted direct drive.

D. Motors:

1. Comply with NEMA designation, temperature rating, service factor, enclosure type, and efficiency requirements for motors specified in Section 230513 "Common Motor Requirements for HVAC Equipment."
2. Motor Sizes: Minimum size as indicated. If not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.
3. Enclosure Type: Open, dripproof or Totally enclosed, fan cooled.
4. Enclosure Materials: Cast iron.
5. Efficiency: Premium efficient as defined in NEMA MG 1.
6. Controllers, Electrical Devices, and Wiring: Comply with requirements for electrical devices and connections specified in electrical Sections.
7. Mount unit-mounted disconnect switches on exterior of unit.

E. Comply with Section 262923 "Variable-Frequency Motor Controllers."

F. Variable-Frequency Motor Controller: Serving each fan individually in fan array.

1. Manufactured Units: Pulse-width modulated; constant torque and variable torque for inverter-duty motors.
2. Output Rating: Three phase; 10 to 60 Hz, with voltage proportional to frequency throughout voltage range; maximum voltage equals input voltage.
3. Unit Operating Requirements:

    a. Internal Adjustability:

        1) Minimum Speed: 5 to 25 percent of maximum rpm.
        2) Maximum Speed: 80 to 100 percent of maximum rpm.
        3) Current Limit: 30 to minimum of 150 percent of maximum rating.

    b. Self-Protection and Reliability Features:

        1) Surge suppression.
        2) Loss of input signal protection.

3) Under- and overvoltage trips.
4) Variable-frequency motor controller and motor-overload/overtemperature protection.
5) Critical frequency rejection.
6) Loss-of-phase protection.
7) Reverse-phase protection.
8) Motor-overtemperature fault.

c. Bidirectional autospeed search.
d. Torque boost.
e. Motor temperature compensation at slow speeds.

1) Panel-mounted operator station.
2) Historical logging information and displays.
3) Digital indicating devices.

f. Control Signal Interface: Electric.
g. Proportional Integral Directive (PID) control interface.
h. DDC system for HVAC Protocols for Network Communications: ASHRAE 135.

4. Line Conditioning:

a. Input line conditioning.
b. Output filtering.
c. EMI/RFI filtering.

2.6 COILS

A. Coils section side panel shall be removable to allow for removal and replacement of coils without impacting the structural integrity of the unit.

B. Install coils such that headers and return bends are enclosed by unit casing to ensure that if condensate forms on the header or return bends, it is captured by the drain pan under the coil.

C. Coils shall be manufactured with plate fins to minimize water carryover and maximize airside thermal efficiency. Fin tube holes shall have drawn and belled collars to maintain consistent fin spacing to ensure performance and air pressure drop across the coil as scheduled. Tubes shall be mechanically expanded and bonded to fin collars for maximum thermal conductivity. Use of soldering or tinning during the fin-to-tube bonding process is not acceptable due to the inherent thermal stress and possible loss of bonding at that joint.

D. Construct coil casings of stainless steel. End supports and tube sheets shall have belled tube holes to minimize wear of the tube wall during thermal expansion and contraction of the tube.

E. All coils shall be completely cleaned prior to installation into the air handling unit. Complete fin bundle shall be degreased and cleaned to remove any lubricants used in the manufacturing of the fins, or dirt that may have accumulated, in order to minimize the chance for water carryover.

F. When two or more cooling coils are stacked in the unit, an intermediate drain pan shall be installed between each coil. The intermediate drain pan shall be designed being of sufficient size to collect

all condensation produced from the coil and sloped to promote positive drainage to eliminate stagnant water conditions. The intermediate drain pan shall be constructed of the same material as the primary drain pan.

G. The intermediate drain pan shall begin at the leading face of the water-producing device and be of sufficient length extending downstream to prevent condensate from passing through the air stream of the lower coil.

H. Intermediate drain pan shall include downspouts to direct condensate to the primary drain pan. The intermediate drain pan outlet shall be located at the lowest point of the pan and shall be sufficient diameter to preclude drain pan overflow under any normally expected operating condition.

2.7 INDIRECT-FIRED GAS BURNER

A. Description: Factory assembled, piped, and wired; and complying with ANSI Z21.47, "Gas-Fired Central Furnaces," and with NFPA 54, "National Fuel Gas Code."

1. Burners: Stainless steel.

a. Gas Control Valve: Modulating. Refer to Schedule for turndown ratio.
b. Fuel: Natural gas.
c. Minimum Combustion Efficiency: 80 percent.
d. Ignition: Electronically controlled electric spark with flame sensor.

B. Venting: Power vented, with integral, motorized centrifugal fan interlocked with gas valve.

C. Heat Exchanger: Stainless steel.

D. Heat-Exchanger Drain Pan: Stainless steel.

E. Safety Controls:

1. Vent Flow Verification: Flame rollout switch.
2. Control Transformer: 24-V ac.
3. High Limit: Thermal switch or fuse to stop burner.
4. Gas Train: Regulated, redundant, 24-V ac gas valve assembly containing pilot solenoid valve, electronic-modulating temperature control valve, pilot filter, pressure regulator, pilot shutoff, and manual shutoff all in one body.
5. Purge-period timer shall automatically delay burner ignition and bypass low-limit control.
6. Gas Manifold: Safety switches and controls complying with ANSI standards and FM Global.
7. Airflow Proving Switch: Differential pressure switch senses correct airflow before energizing pilot.
8. Automatic-Reset, High-Limit Control Device: Stops burner and closes main gas valve if high-limit temperature is exceeded.
9. Safety Lockout Switch: Locks out ignition sequence if burner fails to light after three tries. Controls are reset manually by turning the unit off and on.

2.8 HOT GAS REHEAT

1. Adaptive Dehumidification System.

    a. The Adaptive Dehumidification System shall be factory-installed in single stage condenser coils, and shall provide greater dehumidification of the occupied space by two modes of dehumidification operations beside its normal design cooling mode:

        1) Subcooling mode further subcools the hot liquid refrigerant leaving the condenser coil when both temperature and humidity in the space are not satisfied.
        2) Hot gas reheat mode shall mix a portion of the hot gas from the discharge of the compressor with the hot liquid refrigerant leaving the condenser coil to create a two-phase heat transfer in the system, resulting in a neutral leaving-air temperature when only humidity in the space is not satisfied.
        3) Includes Head Pressure Controller.

2.9 AIR FILTRATION

A. Panel Filters:

1. Description: Flat, nonpleated or Pleated factory-fabricated, self-supported disposable air filters with holding frames.
2. Two-inch MERV-13.
3. Filter Unit Class: UL 900.
4. Media: Interlaced glass, synthetic, or cotton fibers coated with nonflammable adhesive and antimicrobial coating.
5. Filter-Media Frame: High wet-strength beverage board with perforated metal retainer, or metal grid, on outlet side.

B. Mounting Frames:

1. Panel filters arranged for flat or angular orientation, with access doors on both sides of unit. Filters shall be removable from one side or from access plenum.
2. Cartridge filters arranged for flat orientation, removable from access plenum.
3. Galvanized or stainless steel with gaskets and fasteners, suitable for bolting together into built-up filter banks.

2.10 DAMPERS

A. Outdoor- and Relief-Air Dampers: Low-leakage, double-skin, airfoil-blade, galvanized-steel dampers with compressible jamb seals and extruded-vinyl blade edge seals in opposed or parallel-blade arrangement with zinc-plated steel operating rods rotating in sintered bronze or nylon bearings mounted in a single galvanized-steel frame, and with operating rods connected with a common linkage. Leakage rate shall not exceed 4 cfm/sq. ft. at 1 inch wg and 8 cfm/sq. ft. at 4 inches wg.

B. Electronic Damper Operators:

1. Direct-coupled type designed for minimum 60,000 full-stroke cycles at rated torque.
2. Electronic damper position indicator shall have visual scale indicating percentage of travel and 2 to 10 V dc feedback signal.
3. Operator Motors:

    a. Comply with NEMA designation, temperature rating, service factor, enclosure type, and efficiency requirements for motors specified in Section 230513 "Common Motor Requirements for HVAC Equipment."
    b. Size to operate with sufficient reserve power to provide smooth modulating action or two-position action.
    c. Permanent Split-Capacitor or Shaded-Pole Type: Gear trains completely oil immersed and sealed. Equip spring-return motors with integral spiral-spring mechanism in housings designed for easy removal for service or adjustment of limit switches, auxiliary switches, or feedback potentiometer.

4. Nonspring-Return Motors for Dampers Larger Than 25 Sq. Ft.: Size for running torque of 150 in. x lbfand breakaway torque of 300 in. x lbf.
5. Spring-Return Motors for Dampers Larger Than 25 Sq. Ft.: Size for running and breakaway torque of 150 in. x lbf.
6. Size dampers for running torque calculated as follows:

    a. Parallel-Blade Damper with Edge Seals: 7 inch-lb/sq. ft. of damper.
    b. Opposed-Blade Damper with Edge Seals: 5 inch-lb/sq. ft. of damper.
    c. Parallel-Blade Damper without Edge Seals: 4 inch-lb/sq. ft. of damper.
    d. Opposed-Blade Damper without Edge Seals: 3 inch-lb/sq. ft. of damper.
    e. Dampers with 2 to 3 Inches wgof Pressure Drop or Face Velocities of 1000 to 2500 fpm: Increase running torque by 1.5.
    f. Dampers with 3 to 4 Inches wgof Pressure Drop or Face Velocities of 2500 to 3000 fpm: Increase running torque by 2.0.

7. Coupling: V-bolt and V-shaped, toothed cradle.
8. Overload Protection: Electronic overload or digital rotation-sensing circuitry.
9. Fail-Safe Operation: Mechanical, spring-return mechanism with external, manual gear release on nonspring-return actuators.
10. Power Requirements (Two-Position Spring Return): 24 V dc or 120 V ac.
11. Power Requirements (Modulating): Maximum 10 VA at 24 V ac or 8 W at 24 V dc.
12. Proportional Signal: 2 to 10 V dc or 4 to 20 mA, and 2 to 10 V dc position feedback signal.
13. Temperature Rating: Minus 22 to plus 122 deg F.
14. Run Time: 12 seconds open, 5 seconds closed.

2.11 ELECTRICAL POWER CONNECTIONS

A. Single-Point Power Connection: Factory-installed and -wired switches, motor controllers, transformers, and other necessary electrical devices shall provide a single-point field power connection to unit except for service lights and convenience outlets, which are to be powered separately.

B. Enclosure: NEMA 250, Type 3R, mounted in unit with hinged access door in unit cabinet having a lock and key or padlock and key.

C. Wiring: Numbered and color-coded to match wiring diagram.

D. Wiring Location: Install factory wiring outside an enclosure in a raceway.

E. Power Interface: Field power interface to be wire lugs or NEMA KS 1, heavy-duty, nonfused disconnect switch.

F. Factory Wiring: Branch power circuit to each motor and to controls with one of the following disconnecting means:

1. NEMA KS 1, heavy-duty, fusible switch with rejection-type fuse clips rated for fuses. Select and size fuses to provide Type 2 protection in accordance with IEC 60947-4-1.
2. NEMA KS 1, heavy-duty, nonfusible switch.
3. UL 489, motor-circuit protector (circuit breaker) with field-adjustable, short-circuit trip coordinated with motor locked-rotor amperes.

G. Factory-Mounted, Overcurrent-Protection Service: For each motor.

H. Transformer: Factory mounted with primary and secondary fuses and sized with enough capacity to operate electrical load plus spare capacity.

I. Controls: Factory wire unit-mounted controls where indicated.

1. Service Lights: LED vaporproof luminaire with individual switched junction box located inside, adjacent to each access door and panel.

a. Locations: Each section accessed with door or panel.

2. Convenience Outlets: One 20 A duplex GFCI receptacle per location with junction box located on outside casing wall.

a. Locations: Fan section.

J. Control Relays: Auxiliary and adjustable time-delay relays.

2.12 CONTROLS

A. Comply with requirements in Section 230900 "Direct Digital Control (DDC) System for HVAC".

B. Control Wiring: Factory wire connection for controls' power supply.

C. Control Devices: Sensors, transmitters, relays, switches, detectors, operators, actuators, and valves shall be manufacturer's standard items to accomplish indicated control functions.

D. Unit-Mounted Status Panel:

1. Cooling/Off/Heating Controls: Control operational mode.
2. Damper Position: Indicate position of outdoor-air dampers in terms of percentage of outdoor air.
3. Status Lights:

a. Filter dirty.
b. Fan operating.
c. Cooling operating.
d. Heating operating.
e. Smoke alarm.
f. General alarm.

4. Digital Numeric Display:

a. Outdoor airflow.
b. Supply airflow.
c. Outdoor dry-bulb temperature.
d. Outdoor dew point temperature.
e. Space temperature.
f. Supply temperature.
g. Space relative humidity.

E. Refrigeration System Controls:

1. Unit-mounted enthalpy controller shall lock out refrigerant system when outdoor-air enthalpy is less than 28 Btu/lb of dry air or outdoor-air temperature is less than 60 deg F.
2. Outdoor-air sensor de-energizes dehumidifier operation when outdoor-air temperature is less than 60 deg F.
3. Relative-humidity sensor energizes dehumidifier operation when relative humidity is more than 50 percent.

F. Gas Heat Controls:

1. Factory-mounted sensor in unit discharge or Remote sensor for field installation in supply-air duct with sensor adjustment located in control panel to control gas heating section to maintain temperature.
2. Wall-mounted, space-temperature sensor with temperature adjustment to control gas heating section to maintain temperature.
3. Capacity Controls: Modulating burner with turndown ratio as specified on Schedules.

G. Damper Controls: Space-pressure sensor modulates outdoor- and relief-air dampers to maintain a positive pressure in space at a minimum of 0.05 inch wg with respect to outdoor reference.

H. DDC Temperature Control: Standalone control module for link between unit controls and DDC temperature-control system. Control module shall be compatible with control system specified in Section 230923 "Direct Digital Control (DDC) System for HVAC." Links shall include the following:

1. Start/stop interface relay and relay to notify DDC temperature-control system alarm condition.
2. Hardware interface or additional sensors for the following:

a. Room temperature.
b. Discharge-air temperature.
c. Refrigeration system operation.
d. Furnace operation.

I. Interface with DDC System for HVAC: Factory-installed hardware and software to enable the DDC system for HVAC to monitor, control, and display unit status and alarms.

1. Hardwired Points:

a. Monitoring: On-off status, common trouble alarm.
b. Control: On-off operation, space temperature set-point adjustment, supply temperature set-point adjustment, space humidity set-point adjustment, space pressure set-point adjustment.

2. ASHRAE 135 (BACnet) communication interface with the DDC system for HVAC shall enable the DDC system for HVAC operator to remotely control and monitor the unit from an operator workstation. Control features and monitoring points displayed locally at unit control panel shall be available through the DDC system for HVAC. Coordinate and match communication interface with existing county BAS system.

2.13 ROOF CURBS

A. Materials: Galvanized steel with corrosion-resistant coating, watertight gaskets, and factory-installed wood nailer; complying with National Roofing Contractors Association manuals for the specific type of roofing applicable to the Project.

1. Curb Insulation and Adhesive: Comply with NFPA 90A or NFPA 90B.

a. Materials: ASTM C1071, Type I or II.
b. Thickness: 2 inches.

2. Application: Factory applied with adhesive and mechanical fasteners to the internal surface of curb.

a. Liner Adhesive: Comply with ASTM C916, Type I.
b. Mechanical Fasteners: Galvanized steel, suitable for adhesive attachment, mechanical attachment, or welding attachment to duct without damaging liner when applied as recommended by manufacturer and without causing leakage in cabinet.
c. Liner materials applied in this location shall have airstream surface coated with a temperature-resistant coating or faced with a plain or coated fibrous mat or fabric, depending on service air velocity.

B. Curb Dimensions: Height of 14 inches. Refer to Schedules and Drawings for units requiring curb adapters.

C. Wind and Seismic Restraints: Metal brackets compatible with the curb and casing, painted to match unit, used to anchor unit to the curb, and designed for loads at Project site. Comply with requirements in Section 230548 "Vibration and Seismic Controls for HVAC" for wind-load requirements.

2.14 INTAKE AND RELIEF OPENINGS

A. Type: Manufacturer's standard hood or louver, including moisture eliminator, at all unit intake and relief openings.

B. Materials: Match material and finish of casing exterior.

C. Bird Screen: Comply with requirements in ASHRAE 62.1.

D. Configuration: Designed to inhibit wind-driven rain and snow from entering unit.

2.15 MATERIALS

A. Steel:

1. ASTM A36/A36M for carbon structural steel.
2. ASTM A568/A568M for steel sheet.

B. Stainless Steel:

1. Manufacturer's standard grade for casing.
2. Manufacturer's standard type, ASTM A240/A240M for bare steel exposed to airstream or moisture.

C. Galvanized Steel: ASTM A653/A653M.

D. Aluminum: ASTM B209.

E. Corrosion-Resistant Coating: Coat casing, coils and fan guards with a corrosion-resistant coating capable of withstanding a 3,000-hour salt-spray test in accordance with ASTM B117.

1. Standards:

a. ASTM B117 for salt spray.
b. ASTM D2794 for minimum impact resistance of 100 in-lb.
c. ASTM D3359 for cross-hatch adhesion of 5B.

2. Application: Immersion or Spray.
3. Thickness: 1 mil.
4. Gloss: Minimum gloss of 50 gloss units on a single angle 60-degree meter.

2.16 SOURCE QUALITY CONTROL

A. AHRI 920: Manufacturer to certify that performance ratings are in accordance with AHRI 920 if AHRI 920 certification program is not in place. Provide AHRI 920 certification if AHRI 920 certification program is in place.

B. AHRI 260 or AMCA 311 Sound Performance Rating Certification: Test, rate, and label unit fan sound ratings in accordance with AHRI 260 or AMCA 311.

C. Fan Aerodynamic Performance Rating: Test and rate fan performance for airflow, pressure, power, air density, rotation speed, and efficiency.

D. Fan Energy Index (FEI): Test in accordance with AMCA 210 and rate in accordance with AMCA 99, AMCA 207, and AMCA 208.

E. Fan Operating Limits: Classify fans in accordance with AMCA 99, Section 14.

F. Damper Leakage and Air Performance:

1. Damper Rating: Test and rate dampers for leakage and air performance in accordance with AMCA 510.
2. AMCA Damper Certification: Test, rate, and label in accordance with AMCA 511.

G. Refrigerant Coils: Factory tested to minimum 300 psig 450 psig internal pressure and to minimum 300 psig internal pressure while under water, in accordance with AHRI 410 and ASHRAE 33.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine areas, and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

B. Examine roughing-in for piping, ducts, and electrical systems to verify actual locations of connections before equipment installation.

C. Examine roof curbs and equipment supports for suitable conditions where units will be installed.

D. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION, GENERAL

A. Roof Curb: Install on roof structure or concrete base, level and secure, in accordance with NRCA's "The NRCA Roofing Manual: Membrane Roof Systems" or AHRI Guideline B. Install units on curbs and coordinate roof penetrations and flashing with roof construction specified in Section 077200 "Roof Accessories." Secure units to upper curb rail, and secure curb base to roof framing or concrete base with anchor bolts. Coordinate sizes and locations of roof curbs with actual equipment provided.

B. Do not operate fan system until filters (temporary or permanent) are in place. Replace temporary filters used during construction and testing with new, clean filters.

C. Install filter-gauge, static-pressure taps upstream and downstream of filters. Mount filter gauges on outside of filter housing or filter plenum in accessible position. Provide filter gauges on filter banks, installed with separate static-pressure taps upstream and downstream of filters.

D. Connect duct to air-handling units with flexible connections. Comply with requirements in Section 233300 "Air Duct Accessories."

E. Install wall- and duct-mounted sensors furnished by manufacturer for field installation. Install control wiring and make final connections to control devices and unit control panel.

F. Comply with requirements for gas-fired furnace installation in NFPA 54.

G. Install separate devices furnished by manufacturer and not factory installed.

H. Install new filters at completion of equipment installation and before testing, adjusting, and balancing.

3.3 PIPING CONNECTIONS

A. Piping installation requirements are specified in other Sections. Drawings indicate general arrangement of piping, fittings, and specialties.

B. Where installing piping adjacent to units, allow space for service and maintenance.

C. Connect piping to units mounted on vibration isolators with flexible connectors.

D. Refrigerant Piping: Comply with applicable requirements in Section 232300 "Refrigerant Piping." Install shutoff valve and union or flange at each supply and return connection.

E. Duct Connections:

1. Comply with requirements in Section 233113 "Metal Ducts."
2. Drawings indicate the general arrangement of ducts.
3. Connect ducts to units with flexible duct connectors. Comply with requirements for flexible duct connectors in Section 233300 "Air Duct Accessories."

3.4 ELECTRICAL CONNECTIONS

A. Connect wiring in accordance with Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

B. Ground equipment in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."

C. Install electrical devices furnished by manufacturer, but not factory mounted, in accordance with NFPA 70 and NECA 1.

D. Install nameplate for each electrical connection, indicating electrical equipment designation and circuit number feeding connection.

1. Nameplate shall be laminated acrylic or melamine plastic signs, as specified in Section 260553 "Identification for Electrical Systems."

3.5 CONTROL CONNECTIONS

A. Install control and electrical power wiring to field-mounted control devices.

B. Connect control wiring in accordance with Section 260523 "Control-Voltage Electrical Power Cables."

3.6 STARTUP SERVICE

A. Engage a factory-authorized service representative to perform startup service.

1. Complete installation and startup checks in accordance with manufacturer's written instructions.
2. Inspect units for visible damage to refrigerant compressor, condenser and evaporator coils, and fans.
3. Start refrigeration system when outdoor-air temperature is within normal operating limits. and measure and record the following:

    a. Cooling coil leaving-air, dry- and wet-bulb temperatures.
    b. Cooling coil entering-air, dry- and wet-bulb temperatures.

4. Inspect casing insulation for integrity, moisture content, and adhesion.
5. Verify that clearances have been provided for servicing.
6. Verify that controls are connected and operable.
7. Verify that filters are installed.
8. Clean coils and inspect for construction debris.
9. Inspect and adjust vibration isolators.
10. Verify bearing lubrication.
11. Clean fans and inspect fan-wheel rotation for movement in correct direction without vibration and binding.
12. Adjust fan belts to proper alignment and tension.
13. Start unit.
14. Inspect and record performance of interlocks and protective devices, including response to smoke detectors by fan controls and fire alarm.
15. Operate unit for run-in period.
16. Calibrate controls.
17. Adjust and inspect high-temperature limits.
18. Inspect outdoor-air dampers for proper stroke and interlock with return-air dampers.
19. Verify operational sequence of controls.
20. Measure and record the following airflows. Plot fan volumes on fan curve.

    a. Supply-air volume.
    b. Relief-air flow.
    c. Outdoor-air flow.

B. After startup, change filters, verify bearing lubrication, and adjust belt tension.

C. Remove and replace components that do not properly operate, and repeat startup procedures as specified above.

D. Prepare written report of the results of startup services.

3.7 ADJUSTING

A. Adjust initial temperature and humidity set points.

B. Set field-adjustable switches and circuit-breaker trip ranges as indicated.

C. Occupancy Adjustments: When requested within 12 months from date of Substantial Completion, provide on-site assistance in adjusting system to suit actual occupied conditions. Provide up to two visits to Project during other-than-normal occupancy hours for this purpose.

3.8 CLEANING

A. After completing system installation; testing, adjusting, and balancing dedicated outdoor-air unit and air-distribution systems; and completing startup service, clean air-handling units internally to remove foreign material and construction dirt and dust. Clean fan wheels, casings, dampers, coils, and filter housings, and install new, clean filters.

3.9 FIELD QUALITY CONTROL

A. Testing Agency: Engage a qualified testing agency to perform tests and inspections.

B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

C. Perform the following tests and inspections with the assistance of a factory-authorized service representative:

1. Leak Test: After installation, fill water and steam coils with water, and test coils and connections for leaks.
2. Fan Operational Test: After electrical circuitry has been energized, start units to confirm proper motor rotation and unit operation.

3.10 DEMONSTRATION

A. Engage a factory-authorized service representative to train Owner's maintenance personnel to adjust, operate, and maintain units.

END OF SECTION 237416.11

SECTION 238127 – MINI-SPLIT SYSTEM AIR CONDITIONER

PART 1 - GENERAL

1.1 WORK INCLUDED

A. Fan coil unit

B. Outdoor unit

C. Refrigerant piping

D. Controls

1.2 RELATED DOCUMENTS

A. The General and Special Conditions and all other Contract Documents are applicable to work under this section of the specifications. All the work under this section of the specifications shall be governed by any alternates and unit prices insofar as they affect this portion of the work.

B. Section 230100 - GENERAL PROVISION FOR MECHANICAL WORK

C. See drawings for further conditions, requirements and schedules.

1.3 WARRANTY

A. Provide two-year parts and labor warranty on equipment and five-year warranty on compressors.

PART 2 - PRODUCTS

2.1 DUCTLESS SPLIT SYSTEMS

A. Provide self-contained, packaged, factory assembled, pre-wired unit consisting of cabinet, supply fan, controls, air filter, refrigerant cooling coil and outdoor package containing compressor, condenser coil and condenser fan.

2.2 ACCEPTABLE MANUFACTURERS

A. Daikin, Trane, Mitsubishi, LG, Samsung.

2.3 INDOOR UNIT

A. The indoor unit shall be completely factory assembled and tested. Units shall have factory wiring, piping, electronic proportional expansion valve, control circuit board, fan motor thermal protector, flare connections, condensate drain pan, self-diagnostics, auto restart function, 3-minute fused time delay and test run switch. The unit shall have an auto-swing louver which ensures efficient air distribution, which closes automatically when the unit stops. The front grille shall be easily removed for cleaning.

B. Indoor unit and refrigerant pipes will be charged with dehydrated air prior to shipment from the factory.

C. Both refrigerant lines shall be insulated from the outdoor unit.

D. The indoor units shall be equipped with a return air thermistor.

E. Unit Cabinet

1. The indoor unit shall have a white, “flat screen” finish.
2. The drain and refrigerant piping shall be accessible from six (6) positions for flexible installation (right side, right back, right bottom, left side, left back and left bottom).
3. The cabinet shall be supplied with a mounting plate to be installed onto a wall for securely mounting the cabinet.

F. Fan

1. The evaporator fan shall be an assembly consisting of a direct-driven fan by a single motor.
2. The fan shall be statically and dynamically balanced and operate on a motor with permanent lubricated bearings.
3. An auto-swing louver for adjustable air flow (vertically) shall be standard.

G. Coil

1. The evaporator coil shall be a nonferrous, aluminum fin on copper tube heat exchanger.
2. All tube joints shall be brazed with silver alloy or phoscopper.
3. All coils will be factory pressure tested.
4. Condensate pad shall be located in unit.
5. Provide with a remote condensate pump for condensate removal. Power from unit.

H. Filter

1. The return air filter provided will be a mildew proof, removable and washable filter.

I. Refrigerant Piping

1. All refrigeration piping shall be Type ACR hard drawn copper tubing and shall be precapped, precleaned and dry nitrogen charged at the factory. This piping shall be capped throughout the construction to prevent any foreign materials from entering the piping. Fittings shall be wrought copper solder joint type. Dry nitrogen shall be bled through piping while joints are being brazed. Joints shall be as follows:

a. Copper to Brass - Silver Solder
b. Copper to Copper - Silfos.

2. Joints: Copper tubing connections shall be made up with 95/5 tin antimony solder or silfos, in accordance with the recommendations of the manufacturer or as specified hereinafter.
3. Refrigerant Piping Insulation: Armstrong Armaflex insulation ½" thick with fittings covered with mitered sections of insulation and sealed with 520 adhesive. All insulation on outdoor installation shall be additionally protected with two (2) coats of Armaflex vinyl-lacquer type finish.

J. Controls

1. As noted in equipment schedule, unit shall be provided with either a wall-mounted thermostat or a remote mounted with wall bracket.
2. The unit shall have a wall mounted remote infra-red controller capable to operate the system. Provide wall-mounting bracket to mount adjacent to light switch.
3. The unit shall also be provided with wall-mounted thermostat to be mounted adjacent to light switch. Unit shall be capable of operating based on return air temperature or thermostat reading, as programmed at the wall-mounted thermostat.
4. The infrared remote controller and wall controller shall both consist of an On/Off Power switch, Mode Selector, Fan Setting, On/Off Timer Setting, Temperature Adjustment.

a. On/Off switch power the system on or off mode.
b. Mode selector shall operate the system in auto, cool, heat (if available), fan or dry operation.
c. Fan setting shall provide high, medium or low fan speed.
d. On/Off timer is used for automatically switching the unit on or off.
e. Temperature adjustment allows for the increase or decrease of the desired temperature.

2.4 OUTDOOR UNIT

A. Unit Cabinet

1. The outdoor unit shall be completely weatherproof and corrosive resistant.
2. The unit shall be constructed from rust-proofed mild steel panels coated with a baked enamel finish.

B. Fan

1. The fan shall be a direct drive, propeller type fan.
2. The motor shall be inverter drive, permanently lubricated type bearings, inherent.
3. A fan guard is provided on the outdoor unit to prevent contact with fan operation.

C. Coil

1. The outdoor coil shall be nonferrous construction with corrugated fin tube.
2. Refrigerant flow from the condenser will be controlled via a metering device.

D. Compressor

1. The compressor shall be a rotary swing inverter-driven compressor.
2. The compressor shall have an internal thermal overload.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install all components in accordance with manufacturer's recommendation.

B. Install all components in a manner to provide clearances required for proper operation and maintenance.

C. Furnish equipment with charge of refrigerant and oil.

D. Coordinate electrical connections required.

3.2 DEMONSTRATION

A. Provide owner's maintenance personnel training as required to adjust, operate and maintain pumps.

PART 4 - SUBMITTALS

A. In accordance with the requirements of the General Conditions and Supplementary General Conditions, the following information is required to be submitted for this Section. The Contractor shall submit the required information to Architect for approval within 30 days after notice to proceed.

ITEM DESCRIPTION	SHOP DRAWINGS	CATALOG DATA	PARTS LISTS	OPERATING MANUAL	WIRING DIAGRAM	CERTIFICATION	SAMPLES	OTHER
Mini-Split System AC	X	X	X	X	X			

END OF SECTION 238127

SECTION 238239 – ELECTRIC UNIT HEATERS

PART 1 - GENERAL

1.1 WORK INCLUDED

A. Electric Unit Heaters

1.2 RELATED DOCUMENTS

A. The General and Special Conditions and all other Contract Documents are applicable to work under this section of the specifications. All the work under this section of the specifications shall be governed by any alternates and unit prices called for in the Form of Proposal insofar as they affect this portion of the work.

B. Section 230100 - General Provisions for Mechanical Work

C. See drawings for further conditions, requirements and schedules.

1.3 QUALITY ASSURANCE

A. All electrical components and accessories shall be listed and labeled per requirements of NFPA 70, Article 100.

PART 2 - PRODUCTS

2.1 ACCEPTABLE MANUFACTURERS

A. Markel, Trane, TPI/Reddi, QMark

2.2 ELECTRIC UNIT HEATERS

A. Provide vertical unit heaters with heating and air delivery capacities as shown in schedule on drawings. The cabinet shall be made of 18 gauge die formed, furniture grade steel. Individual adjustable louvers with 30 degree downward stops shall be furnished to provide desired control of discharge air. All metal surfaces of the casing shall be phosphate coated to resist corrosion and finished in baked enamel. Heat to be of the draw-through air flow design.

B. The electric heating bank shall consist of metal sheath heating elements. The elements shall have a copper clad steel sheath and corrosion resistance, and aluminum fins. Automatic reset thermal over-heat protection, shall be of the linear capillary type wired for instantaneous de-energizing in case of thermal overload. Heating bank to have protective air inlet louvers.

C. Motors shall be of the totally enclosed, continuous heavy-duty all-angle operation equipped with built-in thermal overload protection.

D. Fans shall be aluminum directly connected to fan motor, designed specifically for unit heat application.

E. Controls: Provide unit mounted thermostat to maintain space temperature unless otherwise noted.

F. All heaters shall be U.L. listed and meet the requirements of the National Electrical Code.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install all units and accessories in accordance with manufacturer's recommendations.

B. Install all units in a manner to provide clearances for proper operation accessibility and maintenance.

C. Coordinate electrical connections required.

3.2 DEMONSTRATION

A. Provide Owner's maintenance personal training as required to adjust, operate and maintain heaters.

PART 4 - SUBMITTALS

A. In accordance with the requirements of the General Conditions and Supplementary General Conditions, the following information is required to be submitted for this Section. The Contractor shall submit the required information to Architect for approval within 30 days after notice to proceed.

ITEM DESCRIPTION	SHOP DRAWINGS	CATALOG DATA	PARTS LISTS	OPERATING MANUAL	WIRING DIAGRAM	CERTIFICATION	SAMPLES	OTHER
Unit Heaters	X	X	X	X	X			

END OF SECTION 238239

SECTION 239500 – MECHANICAL SYSTEM TESTING AND START-UP

PART 1 - GENERAL

1.1 WORK INCLUDED

A. The testing of, adjustments to, and initial operation of mechanical systems included in this contract, including but not limited to items described in the Scope of Work – Section 230110, as well as any reports or certifications required.

B. Training and Instructions for owner personnel

1.2 RELATED WORK

A. Section 230100 – General Mechanical Provisions

B. Section 230900 – Instrumentation and Controls

C. Section 230593 – Testing, Adjusting and Balancing for HVAC

1.3 TESTING, ADJUSTING AND BALANCING

A. The Contractor shall provide the services of an independent thermal balancing agency which shall perform balancing work in accordance with Section 230593 – Testing, Adjusting and Balancing.

B. Section 230593 – work shall not be construed to include the initial start-up and adjustment of major items of equipment or distribution systems. Only final adjustments, air and water balancing, and reporting of information are required under Section 230593.

C. The Contractor shall furnish as-built drawings and equipment submittals as required to the testing, adjusting and balancing subcontractor as specified in 230593.

1.4 TEMPORARY USE OF EQUIPMENT

A. No mechanical equipment which is part of the work of this contract shall be used in any way or form to provide temporary heating, cooling, hot water or other services during construction without the specific written permission of the Architect/Engineer (A/E) and/or Owner. Temporary heat or ventilation for construction purposes shall be furnished by portable heaters and fans or other means.

B. Should the Owner and A/E require that any portion of the systems or equipment be operated for the Owner's benefit or occupancy prior to the contractual date of substantial completion and acceptance of the work, the Contractor shall furnish such operation. All the direct expenses to the Contractor such as maintenance or fuel for this operation will be paid for by the Owner, separate and distinct from any money paid on account of the Contract. For such preliminary operation or testing, payment shall be construed as final acceptance of any of the work of this Contract.

C. Permission to use the permanent equipment does not relieve the Contractors from the responsibility for any damages to the building construction and/or equipment which might result because of its use.

D. All warranties shall begin at substantial completion regardless of temporary use of equipment or not.

E. For Air Handling Units and/or Rooftop Units during all phases of construction:

1. At a minimum, four complete sets of filter media are required for each unit. In each unit, install two sets of filter media during construction (more shall be required if construction activities dictate more frequent changes). In each unit, install one set of filter media at substantial completion. Leave one set of filter media in boxes in appropriate mechanical room as a spare set for the Owner. All other filters shall be used by the Contractor during construction. Dispose of all construction filter media.
2. On the outside of all return air openings install a minimum of two sets of fiberglass filter media to be utilized as pre-filters for the "construction" filters. Install the first set upon start-up and then install the second set when the first set is dirty. Dispose of all dirty construction filters. Change filters as often as necessary to keep units from becoming dirty at no additional cost.
3. At substantial completion of the project the entire unit shall be cleaned to present a like "new" unit for the Owner and all filters shall be replaced with new.

1.5 FINAL INSPECTIONS, REVIEW AND ACCEPTANCE

A. Final Acceptance Tests (Including all equipment start-up testing, air and water balancing, hood Tests, demonstration of control systems operation, or other testing, the results of which must be accepted or approved): The date for the final acceptance tests shall be sufficiently in advance of the Contract completion date to permit the execution before the expiration of the Contract of any adjustments and/or alteration which the final acceptance tests indicate as necessary for the proper functioning of all equipment. Any such modifications shall be completed within the number of days allotted for completion of the Contract. The need for retests, after correcting unsatisfactory operation, shall not relieve the Contractor of completion date responsibility.

B. System Operation: All HVAC systems shall be operating properly with all water and air volume balanced and all temperature controls adjusted and shall be so demonstrated to the A/E. Balance report shall be submitted to the A/E at least one week BEFORE SUBSTANTIAL COMPLETION INSPECTION. Inspection will not otherwise be made. All labels shall be removed from the plumbing fixtures, and fixtures shall be clean and in operating condition, with all accessories and services operating properly. Fire protection systems shall have been tested and inspected to the satisfaction of code-enforcement authorities.

C. Documentation: Certificates and documents required herein shall be in order and presented to the A/E at least two weeks prior to the final inspection and review.

D. Changes and Corrections: After the inspection, any changes or corrections noted by the A/E as necessary for the work to comply with these Specifications and the Drawings shall be accomplished without delay in order to secure final acceptance of the Work within the allotted time provided for by the Contract.

PART 2 - SERVICES

2.1 FACTORY START-UPS

A. Major items of equipment noted below shall be started up by factory authorized technicians. These items shall include as a minimum:

1. Control Systems
2. Packaged Rooftop Units
3. Split Systems
4. Special fire suppression systems.

B. The A/E shall be notified one week in advance of the date and time of the start-ups in A above.

C. Submit a complete start-up report to A/E within 2 weeks of start-up and at least two weeks prior to final review.

D. When specified in individual specification Sections, require manufacturer to provide authorized representative to be present at site to inspect, check and approve equipment or system installation prior to start-up, and to supervise placing equipment or system in operation.

2.2 CONTRACTOR START-UPS

A. The Contractor may perform start-up work not specified otherwise in paragraph 2.1. The A/E shall be notified at least 3 working days in advance of the start-up of each system.

B. Before starting or operating equipment or systems, certify to the A/E that all systems have been properly flushed, cleaned, and tested. Verify that each piece of equipment or system has been checked for proper lubrication, drive rotation, belt tension, control sequence, or other conditions which may cause damage. Verify that tests, meter reading, and specified electrical characteristics agree with those required by the equipment or system manufacturer and that all manufacturer's check lists and instructions have been followed. Verify wiring and support components for equipment are complete and tested.

C. Execute start-up under supervision of responsible Contractor's personnel in accordance with manufacturer's instructions. Satisfy requirement of this section and other individual specification sections for procedures.

2.3 INSTRUCTION AND TRAINING

A. Schedule with the Owner periods of training and instruction to coincide with the factory start-ups required in this Section. In addition, schedule one 8-hour instruction period with the approval of the A/E for Owner personnel after all systems are operational and at least two weeks before contract completion date. All parties shall have at least one-week advance notice of such meeting, and it shall be conducted by a collection of Contractor personnel and subcontractors having a thorough knowledge of all systems operations and the ability to communicate this to the Owner's designated maintenance people.

B. Schedule an additional 8-hour instruction period during the warranty period and within six months for the demonstration of seasonally operating equipment.

C. Utilize maintenance and operation manuals as basis for instruction. Review contents of manual with Owner's personnel in detail to explain all aspects of operation and maintenance.

D. Demonstrate start-up, operation, control, adjustment, troubleshooting, servicing, maintenance, and shutdown of each item of equipment.

E. Prepare and insert additional data in maintenance and operation manuals when the need for additional data becomes apparent during instruction.

F. Instructional periods shall be videotaped to allow the owner to review the commentary at a later date. The video file of this taping shall be transmitted to the owner within 5 days of the instructional session.

PART 3 - PROCEDURES

3.1 HYDROSTATIC TESTING

A. When all pressure-parts have been assembled and connections have been completed, but before any refractory, insulation or casing work is begun, or before piping is concealed, the pressure vessels and piping shall be tested at the pressure specified by the applicable code. For fossil-fuel boiler and heaters, tanks and piping systems this pressure shall be 1.5 times the design working pressure.

B. Hydrostatic means that these tests are to be done with water. DO NOT PRESSURIZE ANY VESSEL OR PIPING SYSTEM ASSOCIATED WITH THIS PROJECT WITH COMPRESSED AIR EXCEPT AS NOTED BELOW OR EXCEPT FOR BLADDER TYPE EXPANSION TANKS ANDE ASME-RATED COMPRESSED AIR RECEIVERS.

C. Before the test, a final inspection shall be made of all welding and all external connections, including all fittings within code requirements. Screwed safety valves shall be removed and the ports plugged with capped nipples. Connections for flanged safety valves shall be blanked with a blind flange or a rated valve. Welded safety valves shall be closed with an internal plug furnished by the valve manufacturer. The Engineer shall be notified of the intent to perform the test at least three days in advance and shall have the opportunity to observe the initial pressurization as well as the inspection at the end of the holding period.

D. Water for most hydrostatic testing shall be clean, clear, filtered water. Nondrainable items such as some coils, shall be filled with demineralized water [or in the case of steam systems, clean condensate, if available, and treated with 10 ppm ammonia for pH control and 500 ppm of hydrazine for oxygen control]. Both the metal and the water temperatures shall be above the dew point of the surrounding room, since condensation on metal surfaces makes inspection difficult. Fill water shall be at a temperature of not less than 70F but shall not be hot enough that metal parts cannot be held for long periods or that water escaping from small leaks immediately evaporates or flashes to steam. No air shall be trapped inside the unit while making the tests. As a boiler or vessel is being filled, it shall be vented at every available connection, to allow water to fill every circuit or void within the unit.

E. After the equipment is filled with water, hydrostatic pressure shall be applied by a pump made for testing purposes and read from a minimum of two independent calibrated pressure gauges. If a boiler-feed or other high-capacity pump is used, precautions shall be taken to keep the pressure under control at all times and specific approval must be obtained from the Engineer. While water is being pumped into the system, continuous inspection shall be made to observe any leakage conditions that might need repair or become dangerous. For small systems operating at low pressures, the vessel or piping may be pressurized with air from a pneumatic hand or foot pump, applied through an air valve to a column of water in a large pipe nipple mounted above the highest point in the system. Pressure shall not be allowed to exceed 1.60 times the design working pressure while pumping the air. Once fully pressurized the pump-up valve shall be closed and the pressure recorded by the Engineer's designated inspector. DO NOT RUN CIRCULATING PUMPS DURING TEST.

F. During the hydrostatic testing of any vessel, safety precautions must be observed and nonessential personnel kept from the test area. The Contractor should assume that the vessel will burst when pressure is applied and protect personnel and the public accordingly. Systems which have been observed for several hours without detecting leaks may be left pressurized overnight to complete the required holding period.

G. Test pressure must be held minimum of 8 hours to allow minute leaks to be observed. No amount of leakage is allowed. Following this holding period, pressure is retained for an inspection period. The A/E shall witness the last half hour of the test [On Universal-Pressure boilers and large Radiant boilers, high-capacity pumps are used to cycle boiler pressure several times. The cycling uncovers leaks that might otherwise not show up until the first few operating cycles of the boiler]. During final inspection, every area of the pressure system is viewed for leakage and repaired, if necessary, to make the unit completely watertight. Repairs shall be made by replacing the defective party or joint. Retest of the defective section is required.

3.2 HVAC PIPING SYSTEM FLUSHING AND CLEANING

A. Follow procedures described in Section 235460 – HVAC Piping System Cleanup.

B. Simultaneously, coordinate system chemical water treatment with Section 235450, so that this may be started immediately after the cleaning and flushing.

PART 4 - SUBMITTALS

4.1 SUBMITTAL SCHEDULE

A. In accordance with the requirements of the General Provisions for Mechanical in Section 230100, the following information is required to be submitted for this Section. The Contractor shall submit the specified copies of the required information to the designated party for approval within 30 days after Notice to Proceed.

Item Description	Shop Drawings	Product Data	Scheduled	Installation Data	Parts Lists	Wiring Diagram	Samples	O & M Manual	Certificates	Warranty	Report	Other
Testing, Start-Up, & Commissioning		*	**						***			Training & Instructions for Owner Personnel

* Provide instrumentation data.
** Provide test matrix as specified.
*** Provide certification of firm and personnel.

END OF DOCUMENT 000104

DIVISION 26

ELECTRICAL

SECTION 260000 - BASIC ELECTRICAL MATERIALS AND METHODS

PART 1 - GENERAL

1.1 CONTRACTOR'S UNDERSTANDING

A. Contractors bidding work under this Contract shall read and understand Division 00 and Division 01 - General Requirements. If any discrepancies are discovered between the Basic Electrical Materials and Methods and General Requirements, the above-mentioned documents shall overrule this section. The Basic Electrical Materials and Methods are intended as a supplement to the above-mentioned documents.

B. The Contractor shall bid as outlined in the above-mentioned Specifications and shall be governed by any alternates or unit prices called for in the form of proposal.

C. Each Contractor bidding on the work included in these Specifications shall view the building site and carefully examine the contract Drawings and Specifications, so that he/she may fully understand what is to be done, and to document existing conditions.

D. The electrical design depicted in the Contract Drawings, is a concept. As the Contractor and Subcontractors layout the job in the field and submit Shop Drawings, it is likely that minor changes will need to be made to the layout, field control wiring, or branch circuits/feeders, from what is shown on the Contract Drawings. These changes will be indicated by Engineer review comments on Shop Drawings or issuance of field orders. It is the Contractors job to coordinate these changes among Subcontractors and equipment vendors, to assure a complete and fully operational electrical system at completion of construction. The Contractor shall not layout the job from the Contract Drawings, but rather from accepted Shop Drawings. Electrical rough-in shall be done based on templates provided from the electrical switchgear and MCC manufacturers showing allowable conduit entry locations. Do not submit electrical panelboard Shop Drawings, Motor Control Center Shop Drawings, Switchboard or Switchgear Shop Drawings until all utilization equipment submittals have been made and accepted. Short Circuit, Coordination and Arc Flash studies must be accepted prior to submittal of Shop Drawings for panelboards, MCC's, switchboards or switchgear.

E. The Contractor shall perform the work of this contract in a "neat and workmanlike manner" as required by NEC Article 110.12, and further delineated in ANSI/NECA 1, latest edition, "Standard for Good Workmanship in Electrical Construction".

1.2 SCOPE OF WORK

A. Work included in this section of the Specifications shall include the furnishing of all labor, material, tools, approvals, utility connection fees, excavation, backfill, and other equipment necessary to install the electrical system as shown on the Contract Drawings and as specified herein.

B. It also includes installation and connection of all electrical utilization equipment included in this Contract but furnished by other contractors or suppliers.

C. It is the general intent that all motors shall be furnished with the particular object of equipment it drives, except where a new motor is to be provided for an item of existing equipment (a replacement motor), then it shall be provided under this Division of the Specifications.

D. The Contractor shall furnish and install all conduit, wire, disconnect switches and miscellaneous material to make all electrical connections to all items of utilization equipment or wiring devices except as otherwise specified.

E. Equipment connections shall be made with flexible or rigid conduit as required. Controllers for motors, disconnect switches, and all control, protective and signal devices for motor circuits, except where such apparatus is furnished mounted and connected integrally with the motor driven equipment, shall be installed, connected and left in operating condition. The number and size of conductors between motors and control or protective apparatus shall be as required to obtain the operation described in these Specifications, and/or by the Contract Documents, and/or as shown in manufacturer furnished, Engineer reviewed Shop Drawings.

F. All devices and items of electrical equipment, including those shown on the Contract Drawings but not specifically mentioned in the Specifications or those mentioned in the Specifications but not shown on the Contract Drawings, are to be furnished under this section of the specifications. Any such device or item of equipment, if not defined in quality, shall be equal to similar Equipment and/or devices specified herein.

G. All devices and items of equipment mentioned in this section of the Specifications whether electrical or not or whether furnished under this or other Division of the Specifications, shall be installed under this Division of the Specifications, unless specifically indicated otherwise.

H. Where wiring diagrams are not shown on the Contract Drawings, they are to be provided by the supplier of the equipment served and such diagrams shall be adhered to except as herein modified.

I. The following is a list of items that may not be defined clearly on the Contract Drawings or in other parts of these Specifications. The list is meant to be an aid to the Contractor and is not necessarily a complete list of all work to be performed under this Contract:

1. Connect all motors and accessories furnished by equipment suppliers.
2. Furnish, install, and connect all motor controls.
3. Furnish, install, and connect lighting, indoor and outdoor.
4. Furnish, install, and connect all electrical conduit, duct and cables.
5. Furnish, install, and connect all communication boxes, outlets, etc.
6. Furnish, install, and connect all power distribution equipment.
7. Abandon and remove all existing wiring and materials not to be reused in the renovated plant, as shown on the Contract Drawings.
8. Furnish and install fire alarm control panel, devices, and wiring.
9. All HVAC control wiring is by the Temperature Controls Contractor for Division 23.
10. Furnish and install communications system equipment.
11. Furnish and install all fiber optic system cables, conduits and accessories.
12. Furnish and install all security system boxes, conduit, cabling etc.

J. All raceways and wiring shall be fire stopped where required by code and/or indicated in the Contract Drawings.

1.3 SHOP DRAWINGS, DESCRIPTIVE LITERATURE, INSTALLATION, OPERATION AND MAINTENANCE INFORMATION

A. Shop Drawings including descriptive literature and/or installation, operation and maintenance instructions shall be submitted for this Division.

B. Shop Drawings shall be submitted on the following materials specified in this Division:

1. Conduit - all types and sizes, including liquid-tight flexible.
2. Boxes - all types and sizes.
3. Coal tar epoxy paint.
4. Wiring devices.
5. Device plates.
6. Metal framing system (Strut type channel).
7. Conduit fittings, expansion joints, support hardware.
8. Motor control equipment - including individually mounted items and pole top items.
9. Power distribution equipment - including individually mounted items.
10. Miscellaneous spare parts and hardware.
11. Wire - all types and sizes.
12. Luminaires - all types.
13. Wire markers, signs and labels.
14. Lightning/transient suppressors.
15. Motors
16. Transformers.
17. Fire alarm system.
18. Lighting controls.
19. Communications equipment.

C. The Engineer reserves the right to make modifications to motor control and power distribution equipment ratings after Shop Drawing review, if the Shop Drawings are submitted prematurely (prematurely meaning submitted before all utilization equipment has been reviewed and accepted). Cost of modifications shall be the Contractor’s responsibility.

1.4 SYMBOLS AND ABBREVIATIONS

A. The symbols and abbreviations generally follow standard electrical and architectural practice; however, exceptions to this shall be as shown on the Contract Drawings.

1.5 COORDINATION WITH OTHER TRADES

A. The Contractor shall coordinate the electrical work with that of other trades to ensure proper final location of all electrical equipment and/or connections. The Contractor shall verify door swings to see that light switches are located properly.

1.6 CODES

A. The minimum standard for all work shall be the latest revision of the Kentucky Building Code (KBC), and the National Electrical Code (NEC). Whenever and wherever state and/or local

laws or ordinances and/or regulations and/or the Engineer's design require a higher standard that the current NEC or KBC, then these laws and/or regulations and/or the design shall be followed.

B. Following is a list of other applicable Standards and Codes:

1.	Kentucky Building Code	KBC
2.	National Electrical Code	NEC
3.	National Electrical Safety Code	NESC
4.	Underwriters Laboratories, Inc.	UL
5.	Factory Mutual System	FM
6.	National Fire Protection Association	NFPA
7.	National Electrical Manufacturers Association	NEMA
8.	Occupational Safety and Health Administration	OSHA
9.	Insulated Cable Engineers Association, Inc.	ICEA
10.	Illuminating Engineering Society of North America	IES
11.	Instrument Society of America	ISA
12.	Institute of Electrical and Electronic Engineers, Inc.	IEEE
13.	Certified Ballast Manufacturers Association	CBM
14.	American National Standards Institute, Inc.	ANSI
15.	Anti-Friction Bearing Manufacturers Association, Inc.	AFBMA
16.	Joint Industry Council	JIC
17.	American Society of Heating, Refrigerating and Air Conditioning Engineers, Inc.	ASHRAE
18.	Federal Communications Commission	FCC
19.	American Society for Testing and Materials	ASTM
20.	American Wood Preservers Association	AWPA
21.	Rural Electrification Association	REA

1.7 INSPECTIONS AND PERMITS

A. Inspection of the electrical system on all construction projects is required. If the local government has appointed a state licensed inspector, the Contractor shall be required to use that person to perform the inspections. If a locally mandated inspector does not exist, the Contractor shall select and hire a state licensed inspector, who has jurisdiction before any work is concealed. The Contractor shall notify the electrical inspector in writing, immediately upon notice to proceed, and a copy of the notice shall be submitted to the Engineer.

B. At the time of completion of the project, there shall be furnished to the Owner a certificate of compliance, from the agency having jurisdiction pursuant to all electrical work performed. The Engineer shall also receive a copy.

C. All costs incurred by the Contractor to execute the above-mentioned requirements shall be paid by the Contractor at no extra cost to the Owner.

D. All permits necessary for the complete electrical system shall be obtained by the Contractor from the authorities governing such work. For further information, see Division 01.

1.8 STORAGE

A. All work, equipment, and materials shall be protected against dirt, water, or other injury during the period of construction.

B. Sensitive electrical equipment such as light fixtures, motor starters, controls, and panel boards, delivered to the job site, shall be protected against injury or corrosion due to atmospheric conditions or physical damage by other means. Protection is interpreted to mean that equipment shall be stored under roof, in a structure properly heated in cold weather and ventilated in hot weather. Provision shall be made to control the humidity in the storage area to 50 percent relative. The stored equipment shall be inspected periodically, and if it is found that the protection is inadequate, further protective measures shall be employed. Electrical equipment other than boxes and conduit shall not be installed until the structure is under roof with doors and windows installed.

C. No light fixtures or device plates shall be hung or installed until after painting is completed; however, temporary lighting shall be provided by the Contractor.

1.9 MATERIALS

A. All materials used shall be new and at least meet the minimum standards as established by the NEC and/or National Electrical Manufacturers Association (NEMA). All materials shall be UL listed for the application, where a listing exists. Additional requirements are found in Division 01. All equipment shall meet applicable FCC requirements and restrictions.

B. The material and equipment described herein has been specified according to a particular trade name or make to set quality standards. However, each Contractor has the right to substitute other material and equipment in lieu of that specified, other than those specifically mentioned at matching or for standardization, providing such material and equipment meets all of the requirements of those specified and is accepted, in writing by the Engineer.

C. The reuse of salvaged electrical equipment and/or wiring will not be permitted unless specified herein or indicated on the Contract Drawings.

D. All salvaged or abandoned electrical materials shall become the property of the Contractor and shall be removed from the job site upon completion of the project, unless otherwise noted on the Contract Drawings or specified herein.

1.10 ERRORS, CORRECTIONS, AND/OR OMISSIONS

A. Should a piece of utilization equipment be supplied of a different size or horsepower than shown on the Contract Drawings, the Contractor shall be responsible for installing the proper size wiring, conduit, starters, circuit breakers, etc., for proper operation of that unit and the complete electrical system at no extra cost to the Owner.

B. It is the intent of these Specifications to provide for an electrical system installation complete in every respect, to operate in the manner and under conditions as shown in these Specifications and on the Contract Drawings. The Contractor shall notify the Engineer, in writing, of any omission or error at least 10 days prior to opening of bids. In the event of the Contractor's

failure to give such notice, he/she may be required to correct work and/or furnish items omitted without additional cost. Further requirements on this subject may be found in the General Requirements, Division 01.

C. Necessary changes or revisions in electrical work to meet any code or power company requirement shall be made by the Contractor without additional charge.

1.11 GUARANTEES AND WARRANTIES

A. The Contractor shall guarantee all work including equipment, materials, and workmanship. This guarantee shall be against all defects of any of the above and shall run for a period of 1 year from the date of acceptance of the work, concurrent with the one-year guarantee period designated for the general construction contract under which electrical work is performed. Date of acceptance shall be the date on which all "punch list" items are completed ("punch list" is defined to be the written listing of work that is incomplete or deficient that must be finished or replaced/repaired before the Contractor receives final payment).

B. Repair and maintenance for the guarantee period is the responsibility of the Contractor and shall include all repairs and maintenance other than that which is considered as routine. (That is oiling, greasing, etc.) The Engineer shall be the judge of what shall be considered as routine maintenance.

1.12 TESTING

A. After the wiring system is complete, and at such time as the Engineer may direct, the Contractor shall conduct an operating test for acceptance. The equipment shall be demonstrated to operate in accordance with the requirements of these Specifications and the Contract Drawings. The test shall be performed in the presence of the Engineer or his authorized representative. The Contractor shall furnish all instruments and personnel required for the tests, as well as the necessary electrical power.

B. Before energizing the system, the Contractor shall check all connections and set all relays and instruments for proper operation. He shall obtain all necessary clearances, approvals, and instructions from the serving utility company and/or equipment manufacturers prior to placing power on the equipment.

C. Tests may be performed by the Engineer to determine integrity of insulation on wiring circuits selected by the Engineer at random.

D. Cost of utilities for testing done prior to beneficial occupancy by the Owner shall be borne by the Contractor.

1.13 CLEANUP

A. Cleanup shall be completed as soon as possible after the electrical installation is complete. All light fixtures, outlets, switches, starters, motor control centers, disconnect switches and other electrical equipment shall be free of shipping tags, stickers, etc. All painted equipment shall be left free of scratches or other blemishes, such as splattered or blistered paint, etc. All light

fixture diffusers shall be clean and the interior of all motor controls, etc., shall be free of dust, dirt, wire strippings, etc. Surplus material, rubbish and equipment resulting from the work shall be removed from the job site by the Contractor upon completion of the work.

B. During construction, cover all Owner equipment and furnishings subject to mechanical damage or contamination in any way.

1.14 CUTTING AND PATCHING

A. Cutting and patching shall be held to an absolute minimum and such work shall be done only under the direction of the Engineer or Owner. The Contractor shall be responsible for and shall pay for all openings that may be required in the floors or walls, and he shall be responsible for putting said surfaces back in their original condition. Every attempt shall be made to avoid cutting reinforcing steel bars when an opening is required in a reinforced concrete wall or floor slab.

1.15 EXCAVATION AND BACKFILL

A. Excavation

1. Excavation for conduits shall be of sufficient width to allow for proper jointing and alignment of the type conduit used. Conduit shall be bedded on original ground. Where conduit is in solid rock, a 6-inch earth cushion must be provided. Conduit shall be laid in straight lines between pull boxes and/or structures unless otherwise noted on the Contract Drawings. The cost of solid rock excavation shall be included in the lump sum bid with no extra pay allowed (unclassified).

B. Backfill

1. Backfill shall be hand placed, loose granular earth for a height of 6 inches above the top of the largest conduit. This material shall be free of rocks over 2 inches in diameter. Above this, large rocks may be included but must be mixed with sufficient earth to fill all voids.

1.16 SLEEVES, CHASES AND OPENINGS

A. Sleeves shall be required at all points where exposed conduits pass through new concrete walls, slabs, or masonry walls. Sleeves that must be installed below grade or where subject to high water conditions must be installed watertight.

B. Wiring chases shall be provided where shown on the Contract Drawings. The Contractor shall have the option of installing chases below surface mounted panel boards provided all structural requirements are met.

C. It is the Contractor’s responsibility to leave openings to allow installation of the complete, operational electrical system. Openings required but not left shall be cut as outlined under cutting and patching. The Contractor shall coordinate all holes and other openings with necessary diameters for proper fire stopping.

1.17 POWER COMPANY COORDINATION

A. The Contractor is responsible for coordinating all activities onsite by the power company.

B. All power company metering equipment shall be electrically located “upstream” of any manual/automatic transfer equipment on projects requiring onsite emergency power generation equipment.

C. Any special provisions required by the serving electrical utility shall be as outlined on the Contract Drawings or as advised by the utility at the time of construction, and work required by these special provisions shall be executed with no extra cost to the Owner.

1.18 TEMPORARY ELECTRICAL POWER

A. The Contractor shall be responsible for providing temporary electrical power as required during construction and shall remove the temporary service equipment when no longer required. Temporary power is also addressed in Division 01.

1.19 OVERCURRENT PROTECTION

A. Circuit breakers or fused switches shall be the size and type as written herein and shown on the Contract Drawings. Any additional overcurrent protection required to maintain an equipment listing by an authority having jurisdiction shall be installed by the Contractor at no extra cost to the Owner.

B. The Contractor shall submit to the Engineer actual nameplate data from motors shipped to the site, stating motor identification as well as characteristics. Overload relay thermal unit selection tables shall accompany the motor data. The Engineer will select thermal unit sizes from this data for use by the Contractor in ordering proper thermal units.

1.20 TRAINING

A. All manufacturers supplying equipment for this division shall provide the Owner’s operations staff with training in the operation and maintenance on the equipment being furnished. The training shall be conducted at the project site by a qualified representative of the manufacturer.

B. The cost of this training shall be included in the bid price.

C. The required training shall consist of both classroom and hands-on situation. Classroom training shall include instruction on how the equipment works its relationship to all accessories and other related units, detailed review of shop drawings, detailed presentation of written O & M instructions, troubleshooting and record-keeping recommendations. Hands-on-training shall include a review of the manufacturer’s O & M instructions, check out of each operator to identifying key elements of the equipment, tear down as appropriate, calibration, adjustment, greasing and oiling points, and operating manipulations of all electrical and mechanical controls.

D. The training shall be scheduled through the Contractor with the Owner. The timing of the training shall closely coincide with startup of the equipment, but no training shall be conducted until the equipment is operational.

E. The minimum number of hours to be provided by manufacturers supplying equipment on this project shall be in accordance with the following table:

Item	Training Hours	
	Classroom	Hands-on
Fire Alarm System	1	1
Lighting Control System	2	1

F. At least 60 days prior to the training the manufacturer shall submit through the Contractor to the Engineer an outline of the training proposed for the Engineer's review and concurrence.

G. The Owner reserves the right to record all training sessions.

1.21 AS BUILT DRAWINGS

A. The Contractor shall maintain 1 set of the Contract Drawings on the job in good condition for examination at all times. The Contractor's qualified representative shall enter upon these drawings, from day to day, the actual "as-built" record of construction and/or alteration progress. Entries and notes shall be made in a neat and legible manner and these drawings delivered to the Engineer after completion of the construction, for use in preparation of Record Drawings.

1.22 GROUNDING AND BONDING

A. All metallic conduit, cabinets, equipment, and service shall be grounded in accordance with the latest issue of the National Electrical Code. All supporting framework and other metal or metal clad equipment or materials which are in contact with electrical conduit, cable and/or enclosures shall be properly grounded to meet the code requirements.

1.23 RELATED SPECIFICATION DIVISIONS

A. The following divisions contain Specifications on utilization equipment, equipment accessories, and procedures related to execution of the electrical work, and are included here for the Contractor's information. Bids shall still be based on complete Contract Documents.

Division 00 – Procurement and Contracting Requirements
Division 01 – General Requirements
Division 02 – Existing Conditions
Division 03 – Concrete
Division 05 – Metals
Division 08 – Openings
Division 09 – Finishes
Division 10 – Specialties

Division 11 – Equipment
Division 13 – Special Construction
Division 23 – Heating, Ventilating, and Air Conditioning
Division 27 – Communications
Division 28 – Electronic Safety and Security
Division 31 – Earthwork
Division 33 – Utilities

1.24 SERVICE ENTRANCE – (Existing-To-Remain)

1.25 CONTRACTOR LICENSING

A. The Contractor performing the electrical work on this project shall be locally licensed, if required by local law or ordinance. If the Contractor has passed the State test, it may not be necessary to meet local testing requirements. It shall be the Contractor's responsibility to investigate these requirements and comply with same.

1.26 ANCHORING/MOUNTING

A. Electrical conduits and/or equipment shall be rigidly supported. Anchors used shall be metallic expansion type, or if appropriate to prevent spalling concrete, epoxy set type. Plastic or explosive type anchors are prohibited.

B. Seismic Anchorage & Qualification of Electrical Components

1. Refer to the structural drawings for seismic design criteria, including seismic design accelerations, Seismic Design Category and structure Risk Category.
2. All electrical components shall be anchored to resist seismic forces in buildings with seismic design category D, E, or F except when ALL the conditions exist:

    a. The component is not required for life safety.
    b. The component is not needed for continuing operation of a Risk Category IV structure.
    c. The component is positively attached to the structure.
    d. The component is flexibly connected to associated conduit and is one of the following:

        1) The component weighs less than 400 lb and has a center of mass less than 48 in above the adjacent floor level OR
        2) The component weighs less than 20 lb or less than 5 lb/s.f. if distributed.

3. All electrical components required for life safety shall be anchored to resist seismic forces in buildings with Seismic Design Category C, D, E or F.
4. All electrical components required for continued operation of a Risk Category IV structure shall be anchored to resist seismic forces in buildings regardless of the Seismic Design Category.
5. Where anchorage to resist seismic forces is required, the following shall be submitted:

a. Designs of all connections of electrical components to the structure, either supplied and certified by the manufacturer; or by a licensed professional engineer qualified and experienced in such design – FOR APPROVAL prior to installation.
b. Certifications by manufacturers of electrical equipment in accordance with 13.2.2.1 of ASCE 7 – FOR APPROVAL prior to purchase.
c. Special Inspection Reports verifying that the electrical components were installed in accordance with the seismic anchorage designs – FOR RECORD after installation.

1.27 ELECTRICAL COMPONENT MOUNTING HEIGHTS

A. Unless otherwise indicated, mounting height for components shall be as defined herein. In cases of conflicts with architectural or structural aspects, the components may be relocated. If an indicated height conflicts with a code requirement, the code shall govern.

B. Mounting heights are given from finished floor elevation to the centerline of the component, unless otherwise noted.

	Component	Height	Comments
1.	Wall type light switch	4'-0"	To top of box
2.	Low wall outlet (power, TV, Comm)	16"	To bottom
3.	Medium height wall outlet	44"	To bottom
4.	Medium height telephone outlet	44"	To bottom
5.	High wall outlet or fixture	7'-0"	
6.	Wall type buzzers, horns, etc.	8'-0" Max.	Top 2" below ceiling
7.	Wall type exit signs	8'-0" Max.	Top of sign 2" below ceiling
8.	Fire alarm manual pull station	42"	To the handle
9.	Wall mount speaker	8'-0" Max.	Top of speaker 1" below ceiling
10.	Push-button or control stations	4'-0"	
11.	Top of panelboards or control panels	6'-6"	Maximum (except for handicapped areas)
12.	Top of local motor controller	6'-0"	Maximum
13.	Top of local disconnect switch	6'-0"	Maximum
14.	Wall mounted outlets above a counter	4'-2"	
15.	Wall telephone	4'-6"	Maximum to top of phone
16.	Wall outlets over workbench	3'-6"	Coordinate with workbench
17.	Wall mount exterior light fixtures	8'-0"	Except as noted on Drawings

	Component	Height	Comments
18.	Wall mount emergency light fixtures	6'-6"	Maximum to test button
19.	Wall thermostats	4'-0"	Per Division 23
20.	Receptacles & cable outlet for wall hung TV	72"	
21.	Fire alarm horn/strobe units	80"	Max. 6" below ceiling whichever is lower

In situations where there appears to be a conflict with Americans with Disabilities Act (ADA) legislation, utilize the ADA requirements.

1.28 RECEIPTS

A. Some sections of the Specifications call for equipment, materials, accessories, etc. to be provided and "turned over to the Owner" or like requirements. The Contractor shall obtain a receipt for each item turned over, signed by the Owner or his representative. A copy of this receipt shall be transmitted to the Engineer.

B. When a question arises concerning whether items have been turned over to the Owner, and there is no signed receipt, it may be assumed that the items were not provided.

1.29 BUY AMERICAN

A. The Contractor is responsible for compliance with any "Buy American" legislation that may apply to this project due to State, Federal, and local laws or funding agency requirements. Necessary certifications of the sourcing of materials shall be part of the submittals.

PART 2 - PRODUCTS (Not Applicable)

PART 3 - EXECUTION (Not Applicable)

END OF SECTION 260000

SECTION 260100 - ELECTRICAL DEMOLITION

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. Furnish all labor, equipment, materials, and supplies necessary for and reasonably incidental to demolition of work hereinafter specified, indicated on drawings, required or intended for completion of the work.

B. Major items included under demolition work include, but are not limited to:

1. Interior electrical systems in the existing facility as shown.
2. Feeders/branch circuits to indicated HVAC and plumbing equipment.
3. Site lighting.

C. Repair those areas damaged under demolition work once new services and systems have been installed.

1.2 SUBMITTALS

A. No submittals are anticipated under this Section.

1.3 JOB CONDITIONS

A. Provide adequate protection to persons and property. Execute work in such a manner as to avoid interference with required operations and use of or passage to and from adjoining buildings and facilities.

B. Demolition work of equipment necessary for the operation of the power and communication systems to be coordinated with the installation of new equipment. The demolition and installation work is to be done as quickly as possible to minimize any burdens on the Owner.

1.4 CONDITION OF EXISTING FACILITIES

A. Contractor shall verify the areas, conditions and features necessary to tie new work into existing construction. This verification shall be done prior to submittal of shop drawings, fabrication or erection, construction or installation. The Contractor shall be responsible for the accurate tie-in of the new work to existing facilities.

PART 2 - PRODUCTS (Not Applicable)

PART 3 - EXECUTION

3.1 SCHEDULES

A. Schedule all demolition work as to cause minimal interference with existing facility operations. Refer to Specification Divisions 0 and Division 01 for additional requirements.

B. Obtain prior approval of the Owner at least seven days in advance before starting demolition of any equipment. Under no circumstances will demolition work be approved until new equipment is ready for installation.

3.2 PREPARATION

A. Disconnect or arrange for disconnection of utility service connections to equipment and areas to be demolished before starting demolition.

B. Preserve in operating condition all active utilities transversing the project site. Protect all equipment that remains (electrical and mechanical) during demolition, and repair all damage caused by this work to satisfaction of Engineer.

3.3 APPLICATION

A. Maintain the continuity of the existing branch circuits serving all existing light fixtures that are to remain, whether indicated or not on the drawings.

B. All existing walls, ceilings, floor slabs, etc., being cut or damaged under this Contract shall be patched back to match existing by General Contractor.

C. All existing luminaires, receptacles, control equipment and switches being removed shall be disposed of by the Contractor. Refer to 260000 for more details.

D. Remove exposed ground conductor back to source or point of contact with slab. Cut conductor off below slab and abandon with hole being patched back to match existing surface (floor, wall or ceiling). If reusable, simply disconnect ground conductor.

E. Conduits, wire and wood products that are not salvageable shall be disposed of legally.

3.4 STORAGE AND HANDLING

A. The Owner reserves the right to save materials that are a part of the demolition work, and the Contractor shall turn over and store any such materials at the Owner’s direction.

B. All materials not turned over to Owner shall become property of Contractor and removed promptly from project site at no additional cost to the Owner. Any permits or fees for disposal shall be the responsibility of the Contractor.

3.5 CLEANUP

A. Burn no materials or debris on premises.

B. Remove from site rubbish and debris found thereon and, except as otherwise specified, materials and debris resulting from work of demolition. Leave site in safe and clean condition.

END OF SECTION 260100

SECTION 260519 - CONDUCTORS AND CABLES

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. All wire and cable shall conform to the latest requirements of the NEC and shall meet all ASTM/UL specifications. Wire and cable shall be new; shall have size, grade of insulation, voltage rating and manufacturer's name permanently marked on the outer covering at regular intervals. Complete descriptive literature shall be submitted to the Engineer for review and acceptance prior to installation.

B. Building wire #12 - #1 shall be applied based on a 60 degrees C temperature rise. Building wire larger than #1 may be applied at its 75 degrees C temperature rise.

1.2 DELIVERY, STORAGE AND HANDLING

A. Wire and cable shall be suitably protected from weather and damage during storage and handling and shall be in first class condition when installed.

PART 2 - PRODUCTS

2.1 ACCEPTABLE MANUFACTURERS

A. Building Wire (types THWN and THW-cu.) – American, Carol, or Collyer, Rome, equal.

B. Flexible Cords and Cables (Types SO (600V) SJO - 300V) – American, Carol, Collyer, or equal.

C. Control Cables (Shielded or unshielded) 600V max. – Belden, Eaton-Dekoron, Okonite, Anixter, or equal.

D. Instrumentation Cables (Shielded) 600V mx. – American, Belden, Eaton-Dekoron, Manhatton, Okonite, or equal.

E. Multi-Conductor Instrumentation Cables (Shielded) 600V mx. – American, Belden, Houston Wire & Cable, Eaton-Dekoron, or equal.

F. Fire Alarm Cables – American, Anixter, Collyer, or equal.

2.2 MATERIALS

A. General

1. In general, all conductors shall be 98 percent conductive, annealed copper unless otherwise noted on the Contract Drawings.

2. Conductors shall be type THW or THWN insulation. Conductor size shall be AWG (American Wire Gauge) Standard. Minimum conductor size shall be AWG number 12 except branch circuits in excess of 75 feet from panel to first outlet not smaller than no. 10 AWG. Minimum voltage rating shall be 600 volts. Conductors for small power may be solid (i.e. lighting, receptacles), but conductors for control work shall be stranded.
3. All conductors shall be stranded, #8 and larger. Number 12 and number 10 AWG shall be solid.
4. Conductors with high temperature rated insulations and special construction shall be used where required in connecting to light fixtures or appliances that have special requirements.
5. Aerial power cables shall be as specified in this division, Section: Overhead Power Distribution.
6. Telephone cables shall be as specified in this division, Section: Communications.

B. Fire Alarm Conductors

1. Conductors for use in conduit for fire alarm systems shall comply with NEC Article 760, and cables specified in B1 above may be used in conduit if so desired. Conductors and insulation types as specified for non-power limited fire protective signaling circuits in Article 760 may be used on power limited systems for this project in conduit. Conductors shall be rated 600 volts, UL listed, copper, minimum #16 AWG, but in no case smaller than recommended by the fire alarm manufacturer.

PART 3 - EXECUTION

3.1 INSTALLATION/APPLICATION/ERECTION

A. General

1. Conductors shall be continuous from outlet to outlet and no splices shall be made except accessible in junction or outlet boxes. Wire connectors of insulating material or solderless pressure connectors, properly taped, shall be used for all splices in wiring, wherever possible.
2. Conductors shall be color coded in accordance with the following schedule:

	480/277V 3 Phase	208/120V 3 Phase	120/240, Single Phase
Phase A	Brown	Black	Black
Phase B	Orange	Red	Red
Phase C	Yellow	Blue	
Neutral (Grounded)	White or Light Gray	White or Light Gray	White or Light Gray
3-Way Tracers			Blue
Grounding	Green	Green	Green

	480/277V 3 Phase	208/120V 3 Phase	120/240, Single Phase
Remote Energized Conductors (Control)			Yellow
Control	Per NFPA 79	Per NFPA 79	

3. Conductors shall be pulled into raceways in strict accordance with manufacturer's recommendations.
4. Ample slack conductors shall be allowed at each terminal point, and pull or junction box, to permit installation with ease and without crowding.
5. All conductors terminating at terminal blocks shall be identified with numbers and/or letters identical to circuit or control identification.
6. No conductors shall be drawn into conduits until all work which may cause wire or cable damage is completed. Wire pulling shall be accomplished utilizing machinery and accessories intended for the purpose.
7. All connections and splices shall be made in accordance with conductor manufacturer's recommendations, and as written herein.
8. If the size and number of conductors in a conduit on the Drawings is not shown, then it shall be assumed to be 3 #12, 3/4 inch.
9. In general, feeder sizes shown are based on no more than three current carrying conductors in a conduit. Multiple small branch circuit feeders may be combined in a common conduit, provided conductors are derated in accordance with NEC article 310-15.
10. Unless otherwise specifically indicated, neutrals may not be shared.

B. Low Voltage Feeders

1. All low voltage feeders shall be 480-volt, 240-volt, or 208-volt as noted in the Contract Drawings. Three phase, 4 wire for power and 208/120 volt, 3 phase, 4 wire for general lighting, unless otherwise noted. The Contractor shall furnish and install all feeders from the distribution center(s) to each of the other structures/subpanels as shown on the Contract Drawings.
2. Wire shall be factory color coded for each phase and neutral, with green used for the ground conductor. As far as practical, all feeders shall be continuous from origin to panel termination without running splices in intermediate pull boxes.

C. Control Cable

1. Control cable shall be the size and have the number of conductors shown on the control system drawings. Control cable shall be used for motor controls and monitoring only. Color coding shall be ICEA, Method 1. Control cables between buildings shall be underground in conduit of the size shown in the control system schematic. Cabling shall provide a minimum of 25 percent spare conductors. Voltage rating shall be 600 volts.

2. Control cable shall be terminated at valve actuators via cable glands listed for the environment (IP68 and/or Class I, Division 1, Class, I, Division 2).

D. Instrument Cable

1. General

    a. All signal lines should be constructed of individually twisted pairs (6 to 10 twists per foot), including thermocouple extension leads. Cables should be made of twisted pairs, with all lays and pairs twisted in the same direction for maximum flexibility.
    b. Wire size is #16 AWG minimum for single pair runs under 5,000 feet in length. Wire size shall be #16 - #20 AWG for multi-pair cable runs under 5,000 feet in length.
    c. Stranded tinned copper conductor shall be used for all wiring other than thermocouple extension leads.
    d. Insulation resistance at 68 degrees Fahrenheit between conductors and between conductors and ground should be at least 500 megohms per 1,000 feet.
    e. Multi-pair cable should be jacketed with poly-vinyl-chloride, polyethylene or Teflon at least 0.045 inch thick. Voltage rating shall be 600 volts.

2. Signal Wiring

    a. Low level analog (less than 500 millivolt d-c). Use twisted pairs which may be cabled with other pairs carrying similar voltage levels. Foil wraps or equivalent shielding is required for each cable with the shield insulated from ground.
    b. High level analog (greater than 500 millivolts d-c). Use twisted pairs which may be cabled with other pairs carrying similar voltage levels and current levels less than 100 ma. Shielding is required.
    c. Analog outputs (normally 0-4 d-c or 4-20 ma). Same as b.
    d. Contact inputs - use twisted pairs and run in separate conduit.
    e. Contact outputs - same as d.
    f. Pulse inputs - same as d.

3. Signal and Shield Grounding

    a. All shields must be grounded at one point only as close as possible to the signal source.
    b. Thermocouples may be grounded or ungrounded.
    c. Analog signals, if grounded, should be grounded as near the signal source as possible.
    d. Resistance bulbs should not be grounded.

4. Signal and Wiring Separation

    a. High level analog signals may share the same conduit or run with contact or pulse signals.
    b. Thermocouple and low-level signals should be run in a separate conduit.
    c. A minimum separation of 12 inches between analog signal leads and a-c power leads should be maintained. For a-c power leads carrying 100 amps or greater, a 24-inch separation should be maintained. Parallel runs should be limited to less than 500 feet. Perpendicular runs may be as close as 6 inches.

E. Multi-Pair Instrument Cables

1. Multi-Conductor instrument cable shall meet the requirements of ‘Instrument Cable’ above, plus the following:

    a. Provide number of shielded twisted pairs indicated on drawings.
    b. Conductor shall be terminated at valve actuators via cable glands listed for the environment (IP68 and/or Class I, Division 1, Class, I, Division 2).

END OF SECTION 260519

SECTION 260529 – SUPPORTING DEVICES AND HANGERS

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. Provide a system of supporting devices and hangers to ensure secure support or bracing for conduit, electrical equipment, including safety switches, luminaires, panelboards, outlet boxes, junction boxes, cabinets, etc.

B. All electrical equipment shall be rigidly mounted, and installed using supporting devices as indicated, required by the work, or as described herein.

PART 2 - PRODUCTS

2.1 ACCEPTABLE MANUFACTURERS

A. Provide appropriate supporting devices and hangers as manufactured by Erico Products, Inc., Steel City, Rayco, or equal:

1. Vertical flange clamps (beam clamps).
2. “Z” purlin clips.
3. Conduit clips.
4. Universal clamps (Beam clamps).
5. Beam clamps (set screw type).
6. Combination push-in conduit clips.
7. Combination conduit hanger clamps.
8. Flexible conduit clips.
9. Special combination conduit clips.
10. One hole steel straps.
11. Minerallac conduit hangers.

B. Strut type channel shall be Unistrut, Kindorf, or equal.

2.2 MATERIALS

A. All mounting brackets and strut used outside shall be aluminum. Fasteners used to mount equipment outside shall be stainless steel. The only exception to the above shall be anchor bolts for area light poles which shall be allowed to have galvanized threads and galvanized nuts.

B. All mounting brackets and strut used inside shall be galvanized or aluminum. If galvanized is used, then the cut ends shall be cold galvanized. Fasteners used inside to mount equipment into concrete shall be stainless steel. Ungalvanized strut is prohibited.

C. Stainless steel (non-magnetic) or fiberglass resin strut shall be used in chemical areas and areas exposed to chlorine gas.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Secure conduits to within 3’ of each outlet box, junction box, cabinet, fitting, etc., and at intervals not to exceed ten feet (10’) for EMT conduit and in accordance with Table 344.30 (B) (2) for Rigid Steel conduit.

B. Install clamps secured to structure for feeder and other conduits routed against the structure. Use drop rods and hangers or racks to support conduits run apart from the structure.

C. Furnish and install suitable angle iron, channel iron or steel metal framing with accessories to support or brace electrical equipment including safety switches, fixtures, panelboards, outlet boxes, etc.

D. Fasteners used to mount equipment into concrete shall be stainless steel.

E. All freestanding equipment shall be anchored to its foundation using stainless steel expansion bolts of the type, size, and number recommended by the equipment manufacturer.

F. Paint all supporting metal not otherwise protected, with rust inhibiting primer and then with a finish coat if appropriate to match the surrounding metal surfaces. (Prepainted or galvanized support material is not required to be painted or repainted.)

G. Support all luminaires including lay-in troffers from the structure to comply with seismic requirements for the specified area.

H. Use of chains, perforated iron, bailing wire, cable ties, duct tape, Velcro, or tie wire for supporting conduit runs will not be permitted.

I. All ends of strut (cut or not) shall have safety cap installed.

END OF SECTION 260529

SECTION 260530 – DUCTBANK FLOWABLE FILL

PART 1 - GENERAL

1.1 INTRODUCTION

A. Flowable fill refers to a cementitious slurry consisting of a mixture of fine aggregate or filler, water, and cementitious material(s), which is used as a fill or backfill in lieu of compacted earth. This mixture is capable of filling all voids in irregular excavations and hard-to-reach places (such as under undercuts of existing slabs), is self-leveling and hardens in a matter of a few hours without the need for compaction in layers. Flowable fill is sometimes referred to as controlled density fill (CDF), controlled low strength material (CLSM), lean concrete slurry, and unshrinkable fill.

B. The materials and mix design for the flowable fill should be designed to produce a comparable compressive strength to the surrounding soil after hardening, making excavation at a later time possible.

C. All duct bank concrete shall be dyed red.

1.2 DESCRIPTION

A. Furnish and place flowable fill in a fluid condition that sets within the required time and, after curing, obtains the desired strength properties as evidenced by the laboratory testing of the specific mix design. This section specifies flowable fill for use as backfill to remain excavatable using hand tools or easily excavatable using a backhoe as would be utilized for adjoining earth.

1.3 SUBMITTALS

A. Flowable fill Mix Design: Provide flowable fill mix design containing cement and water. At the contractor’s option, it may also contain fly ash, aggregate, or chemical admixtures in any proportions such that the final product meets the strength and flow consistency, and shrinkage requirements included in these specifications.

1. Test and Performance - Submit the following data:

a. Flowable fill shall have a minimum strength of 300 psi according to ASTM C 39 at 28 days after placement.
b. Flowable fill shall have minimal subsidence and bleed water shrinkage. Evaporation of bleed water shall not result in shrinkage of more than 1/8 inch per ft. of flowable fill depth (for mixes containing high fly ash content). Measurement of a Final Bleeding shall be as measured in Section 10 of ASTM C 940 “Standard Test Method for Expansion and Bleeding of Freshly Mixed Grouts for Preplaced-Aggregate Concrete in the Laboratory.

B. Provide documentation that the admixture supplier has experience of at least one year, with the products being provided and any equipment required to obtain desired performance of the product.

1.4 APPLICABLE PUBLICATIONS

A. Publications listed below form a part of this specification to extent referenced. Publications are referenced in text by basic designation only.

B. American Society for Testing and Materials (ASTM):

D4832-02	Standard Test Method for Preparation and Testing of Controlled Low Strength Material (CLSM) Test Cylinders.
C618-03	Standard Specifications for Coal Fly Ash and Raw or Calcined Natural Pozzolan for use as Mineral Admixture in Concrete. (Use Fly Ash conforming to the chemical and physical requirements for mineral admixture, Class F listed, including Table 2 (except for Footnote A). Waive the loss on ignition requirement.)
C403/C403M-05	Standard Test Method for Time of Setting of Concrete Mixtures by Penetration Resistance.
C150-99 Rev.A-04	Standard Specification for Portland Cement
C33-03	Standard Specification for Concrete Aggregates
C494/C494M-04	Standard Specification for Chemical Admixtures for Concrete
C940 RevA-98	Standard Specification for Expansion and Bleeding of Freshly Mixed Grouts for Preplaced – Aggregate Concrete in the Laboratory

C. American Concrete Institute (ACI):

SP-150-94	Controlled Low-Strength Materials

1.5 QUALITY ASSURANCE

A. Manufacturer: Flowable fill shall be manufactured by a ready-mix concrete producer with a minimum of 1-year experience in the production of similar products.

B. Materials: For each type of material required for the work of this Section, provide primary materials that are the products of one manufacturer. If not otherwise specified here, materials shall comply with recommendations of ACI 229, “Controlled Low Strength Materials.”

1.6 DELIVERY, STORAGE, AND HANDLING

A. Deliver and handle all products and equipment required, in strict compliance with manufacturer’s recommendations. Protect from damage due to weather, excessive temperatures, and construction operations.

1.7 PROJECT CONDITIONS

A. Perform installation of flowable fill only when existing and forecasted weather conditions are within the limits established by the manufacturer of the materials and products used.

PART 2 - PRODUCTS

2.1 MATERIALS

Provide flowable fill containing, at a minimum, cementitious materials, and water. Cementitious materials shall be portland cement, pozzolanic materials. The flowable fill mix design may also contain, fine aggregate or filler, and/or chemical admixtures in any proportions such that the final product meets the strength, flow consistency, and shrinkage requirements included in this specification.

A. Portland Cement: ASTM C150, Type 1 or Type 2. Meeting Indiana State DOT standards.

B. Mixing Water: Fresh, clean, and potable.

C. Air-Entraining Admixture: ASTM C260.

D. Chemical Admixtures: ASTM C494.

E. Aggregate: ASTM C33.

F. Red Pigment: ASTM C979.

2.2 FLOWABLE FILL MIXTURE

A. Mix design shall produce a consistency that will result in a flowable product at the time of placement which does not require manual means to move it into place.

B. Flowable fill shall have a minimum strength of 300 psi according to ASTM C39 at 28 days after placement.

C. Flowable fill shall have minimal subsidence and bleed water shrinkage. Evaporation of bleed water shall not result in shrinkage of more than 1/8 inch per foot of flowable fill depth (for mixes containing high fly ash content). Measurement of a Final Bleeding shall be as measured in Section 10 of ASTM C 940 “Standard Test Method for Expansion and Bleeding of Freshly Mixed Grouts for Preplaced-Aggregate Concrete in the Laboratory.

D. Provide equipment as recommended by the manufacturer and comply with manufacturer’s recommendations for the addition of additives, whether at the production plant or prior to placement at the site.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine conditions of substrates and other conditions under which work is to be performed. Do not proceed until unsatisfactory conditions are corrected.

3.2 APPLICATION OF FLOWABLE FILL

A. Secure pipes and other members to be encased in flowable fill. Ensure that there are no exposed metallic pipes, conduits, or other items that will be in contact with the flowable fill after placement. If so, replace with non-metallic materials or apply manufacturer's recommended coating to protect metallic objects before placing the flowable fill.

3.3 PROTECTION AND CURING

A. Protect exposed surfaces of flowable fill from premature drying, wash by rain or running water, wind, mechanical injury, and excessively hot or cold temperature. Curing method shall be subject to approval by Engineer.

END OF SECTION 260530

SECTION 260533 - RACEWAYS

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. This section of the Technical Specifications includes all raceways for accommodation of electrical conductors, communications conductors, and sleeves for underground electrical installations, conduit stubs for future installations, fittings and accessories.

B. All raceways shall be marked with the manufacturer's name or trademark as well as type of raceway and size. This marking shall appear at least once every 10 feet and shall be of sufficient durability to withstand the environment involved. All raceways shall be furnished and installed as outlined under Part 3 of this Specification.

C. All raceways and fittings shall be painted to match existing or surrounding surfaces except in mechanical spaces.

PART 2 - PRODUCTS

2.1 ACCEPTABLE MANUFACTURERS

A. Tubular Raceways

1. Steel, Galvanized, Rigid, Heavy-Wall, Threaded – Allied Tube & Conduit Corp., Triangle, Wheatland Tube Co., or equal.
2. Steel, Galvanized, Thin-Wall, Electric-Metallic-Tubing (EMT) – Allied Tube & Conduit Corp., Triangle, VAW, or equal.
3. Aluminum, Rigid, Heavy-Wall, Threaded – Alcoa, Reynolds, VAW, or equal.
4. Plastic (PVC); Type A (Thin Wall); Type 40 (or Schedule 40); Type 80 (or Schedule 80) (Heavy -Wall) – Carlon, Robin-Tech, or equal.
5. Flexible Metal Conduit – AFC, Alflex, or equal.
6. Liquidtight Flexible Metal Conduit – Carol Cable Co., Inc., OZ Gedney, Superflex, or equal.
7. PVC Coated Rigid Steel – Korkap, Robroy, or equal.
8. Factory Coated Aluminum Conduit - Alumax ALX-1, or equal.

B. Wireways

1. Hoffman, Square-D, or equal.

C. Raceway Fittings

1. Conduit fittings – Appleton, Crouse-Hinds, OZ Gedney, or equal.
2. Non-metallic conduit fittings – Carlon, Robin-Tech, Scepter, or equal.
3. PVC coated rigid steel fittings shall be provided by the conduit manufacturer.
4. Flexible conduit fittings – OZ Gedney, Raco, T & B, or equal.

2.2 MATERIALS

A. Aluminum Conduit

1. Aluminum conduit shall be extruded from alloy 6063 and shall be the rigid type, non-toxic, corrosion resistant, and non-staining. It shall be manufactured per UL standards as well as listed/labeled by same.
2. Fittings, boxes, and accessories used in conjunction with aluminum conduit shall be die cast, copper free type. They shall be resistant to both chemical and galvanic corrosion. All covers shall have neoprene gaskets.
3. Aluminum conduit shall not be used in underground applications.

B. Rigid Steel Conduit

1. Rigid steel conduit and fittings shall be of mild steel piping, galvanized inside and out, and shall conform to UL standards. The conduit and fittings hall be listed and labeled by UL as well. The galvanized coating of zinc shall be of uniform thickness applied by the hot-dipped process and shall be applied also to the threads. It shall be further dipped in a chromic acid bath so as to chemically form a corrosion resistant protective coating of zinc chromate which has a characteristic yellow-green color. Each piece of conduit shall be straight, free from blisters and other defects, cut square and taper reamed. It shall be delivered with plastic protectors on the threads.

C. Polyvinylchloride (PVC) Conduit

1. PVC conduit and fittings shall be Schedule 40, 80 heavy wall, or thinwall, as indicated in these Specifications manufactured to conform to UL standards. It shall be listed and labeled by UL. It shall have at least the same temperature rating as the conductor insulation. Expansion joints shall be used as recommended by the manufacturer in published literature. PVC systems shall be 90 degrees C minimum UL rated, have a tensile strength of 7,000 psi @ 73.4 degrees F, flexural strength of 11,000 psi and compressive strength of 8,000 psi.

D. Electrical Metallic Tubing (EMT)

1. EMT shall be high grade steel with an exterior galvanized coating of zinc applied uniformly by the electro-galvanized process. The interior surface shall be uniformly coated with aluminum lacquer or enamel. After galvanizing, it shall be dipped in a chromic acid bath to chemically form a protective coating of zinc chromate. The conduit shall conform to UL standards and be listed as well as labeled by UL.

E. Flexible Conduit

1. Flexible metallic conduit shall be constructed from flexibly or spirally wound elecro-galvanized steel. Connections shall be by means of galvanized malleable iron squeeze type fittings, or tomic twist-in type in sizes not exceeding 3/4 inch. Liquidtight conduit shall be light gray in color and have sealtight fittings, type UA.

F. PVC coated rigid conduit shall be hot dip galvanized prior to PVC coating. All threads shall be galvanized. The exterior galvanized surface shall be coated with a primer prior to PVC coating to insure adhesion. The bond on conduit and fittings shall be greater than the tensile strength of

the plastic coating. The PVC coating on the exterior of the conduits shall be applied by a plastisol dip method to a nominal thickness of 40 mils, minimum. The interior of the conduit and fittings, and threads shall be painted with a urethane coating. The coating shall allow flexibility for field bending without cracking. PVC sleeves shall be formed at each female opening, with the inside diameter of the sleeve matching the outside of the conduit.

G. Conduit Fittings

1. Rigid Steel Conduit Fittings

a. Standard threaded couplings, locknuts, bushings, and elbows made only of steel or malleable iron are acceptable.
b. Locknuts: Bonding type with sharp edges for digging into the metal wall of an enclosure.
c. Bushings: Metallic insulating type, consisting of an insulating insert molded or locked into the metallic body of the fitting. Bushings made entirely of metal or nonmetallic material are not permitted.
d. Erickson (union-type) and set screw type couplings: Approved for use in concrete are permitted or use to complete a conduit run where conduit is installed in concrete. Use set screws of case hardened steel with hex head and cup point to firmly seat in conduit wall for positive ground. Tightening of set screws with pliers is prohibited.
e. Sealing fittings: Threaded cast iron type. Use continuous drain type sealing fittings to prevent passage of water vapor. In concealed work, installed fittings in flush steel boxes with blank coverplates having the same finishes as that of other electrical plates in the room.
f. Fittings for PVC coated rigid conduit shall be manufactured by the maker of the conduit.

2. Rigid Aluminum Conduit Fittings

a. Standard threaded couplings, locknuts, bushings, and elbows: Malleable iron, steel or aluminum alloy materials. Zinc or cadmium plate iron or steel fittings. Aluminum fittings containing more than 0.4 percent copper are prohibited.
b. Locknuts and bushings: As specified for rigid steel and IMC conduit.
c. Set screw fittings: Not permitted for use with aluminum conduit.

3. Electrical Metallic Tubing Fittings

a. Only material of steel or malleable iron is acceptable.
b. Couplings and connectors: Concrete tight and rain tight, with connectors having insulated throats. Use gland and ring compression type couplings and connectors for conduit sizes 2-inches and smaller. Use set screw type couplings with four set screws each for conduit sizes over 2-inches. Use set screws of case-hardened steel with hex head and cup point to firmly seat in wall of conduit for positive grounding.
c. Indent type connectors or couplings are prohibited.
d. Die-cast or pressure-cast zinc-alloy fittings or fittings made of pot metal are prohibited.

4. Expansion and Deflection Couplings

a. Accommodate 1.9 cm (0.75 inch) deflection, expansion, or contraction in any direction, and allow 30 degree angular deflections.
b. Include internal flexible metal braid sized to guarantee conduit ground continuity and fault currents in accordance with UL, and the NEC code tables for ground conductors.
c. Watertight, seismically qualified, corrosion-resistant, threaded for and compatible with rigid or intermediate metal conduit.
d. Jacket: Flexible, corrosion-resistant, watertight, moisture and heat-resistant molded rubber material and stainless steel jacket clamps.

PART 3 - EXECUTION

3.1 PREPARATION

A. Exterior underground metallic conduits shall be degreased, pretreated, and coated with 2 coats of Carboline 888 epoxy, or equal. Other finishes may be acceptable upon the Engineer's review.

3.2 INSTALLATION

A. Conduit

1. All conduit shall be installed in a first class workmanship manner. It shall be installed in horizontal and vertical runs in such a manner as to ensure against trouble from the collection of trapped condensation and shall be arranged so as to be devoid of traps wherever possible. Special care shall be used in assuring that exposed conduit runs are parallel or perpendicular to walls, structural members, or intersections of vertical planes and ceilings. No open wiring is allowed.
2. Fittings or symmetrical bends shall be required wherever right-angle turns are made in exposed work. Bends and offsets shall be avoided wherever possible, but where necessary, they shall be made with an approved conduit bending machine. All conduit joints shall be cut square, reamed smooth and drawn up tight, using couplings intended for the purpose.
3. Conduits shall be securely fastened to all sheet metal outlets, junction and pull boxes with double galvanized locknuts and insulating-grounding bushings as required by the NEC. Conduit crossings in insulating roof fill will require both conduits to be secured to the roof deck, and these crossings can only be made where the insulating fill is a minimum of 3 inches deep. Runs of exposed conduit shall be supported in accordance with the NEC using cast aluminum or malleable iron one hole pipe straps with spacers to provide an air space behind the conduit. Stainless steel minerallac, one piece conduit clamps shall be acceptable where located such that building occupants are not in danger of inadvertent contact, since this type fitting has several sharp edges. In general terms, they may be considered in areas such as on or above ceilings, or high on walls. All conduit in walls and slabs shall be securely braced, capped (wooden plugs are prohibited), and fastened to the forms to prevent dislodgement during vibration and pouring of concrete.
4. During construction, all conduit work shall be protected to prevent lodgement of dirt, plaster or trash in conduits, fittings or boxes. Conduits which have been plugged shall be entirely freed of accumulations or be replaced. All conduits in floors or below grade shall

be swabbed free of debris and moisture before wires are pulled. Crushed or deformed conduit shall not be permitted.

5. All open conduit work through new walls or slabs shall be run through sleeves that shall be made watertight. These sleeves shall be PVC of suitable diameter to permit the passage of the conduit used.
6. Where GRS conduit penetrates a floor slab the conduit shall be painted with 2 coats of Koppers Bitumastic 300-M or equal to a point 6 inches above the penetration.
7. The final section of conduit connecting each motor or piece of utilization equipment subject to vibration shall be of the flexible type. Type UA shall be used in all process areas and in outdoor or wet locations. Flexible conduit to space heaters shall be long enough to allow swivel action.
8. All underground conduits entering a building shall be sealed against water/condensate entering around the conductors. Sealant may be silicone rubber-based caulk.
9. In certain situations, conduit expansion joints shall be required to ensure against conduit and/or cable damage due to settling or thermal expansion and contraction. These expansion joints shall be required where required by the manufacturer or the Contract Drawings and shall be installed per manufacturer's instructions.
10. All conduit to be added to an existing structure shall be exposed in unfinished and process areas. Where new devices are shown in existing walls in finished spaces, every attempt shall be made to conceal the conduit, by fishing flexible conduit through walls from ceiling cavities.
11. All conduit work in the finished space of each new structure shall be concealed except for conduits to lighting fixtures in buildings with precast roof slabs, open joist ceilings, or excepted as noted on the Contract Drawings. All conduit work below ground floor level in each structure shall be exposed. Conduits entering from underground into buildings shall be watertight through the wall, both inside and outside.
12. PVC conduit installed underground for low voltage application shall be schedule 80 without encasement, except service entrance conduits shall be schedule 40 PVC, thin wall PVC, or Fibre Duct, and shall be concrete encased. Where PVC conduit is installed, transition shall be made to GRS conduit at bends where wire pulling could cut conduit. For medium voltage underground conduit requirements see Section 260513.
13. Aluminum conduit shall not be used underground, in chlorine storage/feed areas, or placed in concrete slabs, unless it is UL listed for the purpose and factory pre-coated.
14. Conduit stubs, for future use, extended through outside walls shall be capped with threaded pipe caps and coated to prevent corrosion. Stubs shall extend 5 feet beyond the walls from which they are stubbed unless otherwise indicated on the Contract Drawings.
15. All metal raceway systems shall be grounding conductive solidly bonded throughout and grounded in accordance with NEC requirements and/or as noted on the Contract Drawings. In addition, all raceway systems shall be provided with separate grounding conductors.
16. Minimum conduit size shall be 3/4 inch. The following table shows the minimum burial depth required for all exterior conduit or cable:

Rigid Metal Conduit	18
Schedule 80 PVC	30
Schedule 40 PVC, thinwall, or fiberduct, Concrete Encased (for low voltage service entrance)	18

17. Wire pulling shall be facilitated by the use of a UL approved pulling compound in pulls over 30 feet in length or where there are 2 or more 90-degree bends. Only polypropylene,

nylon, or manila pulling ropes will be permitted. Standard industry recognized wire pulling equipment shall be used.

18. All conduits entering and leaving instrument enclosures shall be sealed around the wires with silicone caulk.
19. All conduits for emergency lighting systems shall be separate from other building power conduits.
20. Areas of use for each type of conduit:

Area of Use	Schedule 40 PVC	Schedule 80 PVC	EMT	GRS	Aluminum
Buildings – Interior					
Building Interior (Concealed)	X	X	X	X	X
Building Interior (Exposed)			X	X	X
Exterior Underground					
Low Voltage	X	X		X	
Low Voltage Service Entrance (Concrete Encased)	X	X		X*	
Exterior Exposed					
Low Voltage					X

21. Underground raceways (conduit) shall be provided with steel sleeves where they pass over or under obstructions, such as: sidewalks; roadways; piping; etc.
22. All conduit shall have an insulated ground wire pulled to all equipment and receptacles.
23. EMT conduit fittings shall be compression type.
24. All raceway runs are shown diagrammatically to outline the general routing of the raceway. The installation shall be made to avoid interference with pipes, ducts, structural members or other equipment. Should structural or other interference prevent the installation of the raceways, or setting of boxes, cabinets, or the electrical equipment, as indicated in the Drawings, deviations must be approved by the Owner and after approval, shall be made without additional charges and shown on the Record Drawings.
25. Fire Stop: Where conduits, wireways, and other electrical raceways pass through fire partitions, fire walls, smoke partitions, or floors, install a fire stop that provides an effective barrier against the spread of fire, smoke and gases, with rock wool fiber or silicone foam sealant only. Completely fill and seal clearances between raceways and openings with the fire stop material. See Section 078400 for complete fire stop requirements.
26. Assure conduit installation does not encroach into the ceiling height head room, walkways, or doorways.

27. No conduit shall be run exposed across roofs without first obtaining permission from the Engineer.
28. Conduit may be run inside concrete slabs as long as the slab is at least 6-inches thick and conduit will have at least 1-1/2-inches of cover on both sides.
29. Flexible conduit used in mechanical rooms shall be liquid tight.
30. Runs of flexible conduit above accessible ceilings shall be limited to 10 ft. Runs of exposed flexible conduit shall be limited to 5 feet. All runs of flexible conduit shall be supported in accordance with NEC requirements.

END OF SECTION 260533

SECTION 260534 - BOXES

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. Outlet and junction boxes shall be furnished and installed where indicated on the Contract Drawings, and\or as required by the work in accordance with the NEC.

PART 2 - PRODUCTS

2.1 ACCEPTABLE MANUFACTURERS

A. Boxes – Appleton, Bauers, Carlon, Cloud Concrete Products, Crouse-Hinds, Hoffman, Queen, Raco, Robroy Industries, Sedco, Spring City, Wiegmann, or equal.

2.2 GENERAL

A. All junction and/or pull boxes for dry (non-corrosive) areas shall be of code gauge sheet metal construction, of the inside dimensions as required by code, with covers.

B. Junction and/or pull boxes for wet or damp locations shall be cast metal, rust and corrosion resistant (NEMA 4X), with at least 5 1/2 full threads for each (bossed) conduit opening and shall be suitable for flush or surface mounting as required with drilled external, cast mounting extensions (bossed to provide at least 1/8 inch between back of box and mounting surface for drainage). Box covers shall be hinged, or cap screw retained as required, of the same material as the box and provided with stainless steel (rustproof) hardware.

C. Junction boxes for out-of-doors use, not mounted in concrete may be sheet metal (NEMA 4X), waterproof, rustproof, rain and sleetproof, with hinged covers and latches and provided means of locking by means of keyed locks, tamper-resistant screws or padlocking as required and with clamping cap-screws top and bottom door edges to provide firm contact with gasketing. All gaskets shall be molded (unbroken) neoprene or butyl rubber.

D. Junction boxes for out-of-doors use, not mounted in concrete may be sheet metal, NEMA 3R, rain and sleetproof, with hinged covers and latches, provided with a means of locking.

E. NEMA 4X junction and/or pull boxes may be stainless steel, if called for on the Contract Drawings; or non-metallic or cast aluminum.

F. Underground junction or pull boxes shall be constructed of reinforced concrete cast-in-place or prefabricated as detailed on the Contract Drawings and shall be AASHTO H20 rated.

PART 3 - EXECUTION

3.1 INSTALLATION, APPLICATION, AND ERECTION

A. General

1. Outlets shall be installed in the locations shown on the Contract Drawings. The Contractor shall study the general building plans in relation to the space surrounding each outlet, in order that his work may fit the other work required by these Specifications. When necessary, the Contractor shall relocate outlets so that when fixtures or other fittings are installed, they will be symmetrically located according to room layout and will not interfere with other work or equipment.
2. All supports for outlet boxes shall be furnished and installed by the electrical trades.

B. Concealed Work

1. All outlet boxes shall be standard galvanized steel type at least 1 1/2 inches deep, single or gang type of size to accommodate devices shown. Exceptions shall be noted on the Contract Drawings.
2. Standard deep type outlet boxes (concrete rings with appropriate covers) shall be used in floor slab construction so concealed conduits entering sides of boxes can clear reinforcing rods.
3. Outlet boxes for concealed telephone and signaling systems shall be the 4-inch square type, unless otherwise noted or required by the telephone company.
4. Boxes for use in masonry construction shall be 2 1/2 inches deep for 4-inch block and 3 1/2 inches deep for 6- and 8-inch block. Through wall boxes are prohibited for outlets opposite each other.

C. Exposed Work

1. Outlet or junction boxes for use with exposed steel conduit shall be cast steel. In dry areas sheet steel with rounded corners, made for the purpose.
2. Outlet or junction boxes for use with exposed aluminum conduit shall be copper free, cast aluminum type.
3. Outlet or junction boxes for use with exposed PVC conduit shall be PVC.

D. Pull Boxes

1. Pull boxes for exterior underground work is shown on the Contract Drawings and are the minimum number required. Others may be added at the Contractor's option, but no extra pay shall be allowed. Interior pull boxes are not shown but shall be used as needed. Pull box types are as follows:

Exterior	Per detail on the Contract Drawings.
Interior	Interior pull boxes in dry areas shall be of code gauge steel of not less than the minimum required by the NEC and shall be provided with hinged covers. In wet areas or pipe galleries, they shall be rated watertight, of stainless steel, cast aluminum, PVC, fiberglass, or equal. Hardware shall be stainless steel.

E. Openings in Electrical Boxes

1. All openings in electrical equipment, enclosures, cabinets, outlet and junction boxes shall be by means of welded bosses, standard knockouts, or shall be sawed, drilled, or punched with tools specially made for the purpose. The use of a cutting torch is prohibited. Unused openings shall be plugged per the NEC.

END OF SECTION 260534

SECTION 260542 – HORIZONTAL DIRECTIONAL DRILLING

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. Provide all labor, materials, equipment and services required to utilize the trenchless technology of horizontal directional drilling (HDD) for the installation of below grade piping and appurtenances as specified herein.

1.2 RELATED WORK SPECIFIED ELSEWHERE

A. Drawings and General Provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification sections, apply to work of this Section.

1.3 EXISTING CONDITIONS

A. The existing piping & other utilities shown on the Contract Drawings is based on the best available information. The Engineer makes no guarantee as to the accuracy of the locations or type of piping or utility depicted. All new piping which ties into existing lines must be made compatible with that piping.

B. So that piping conflicts may be avoided, Contractor shall locate the utility (vertically & horizontally) well ahead of the pipe laying operation to confirm exact locations of existing piping before installing any new piping.

1.4 SUBMITTALS

A. Descriptive literature, catalog cuts, and dimensional prints clearly indicating all dimensions and materials of construction, shall be submitted on all items specified herein to the Engineer for review before ordering. Comply with provisions of Section 013323.

B. At the time of submission, the Contractor shall, in writing, call Engineer's attention to any deviations that the submittals may have from the requirements of the Engineer's Contract Drawings and Specifications.

C. Work Plan - Prior to beginning work, the Contractor must submit to the Engineer a general work plan outlining the procedure and schedule to be used to execute the project. Work Plan should be realistic and document the thoughtful planning required to successfully complete the project.

D. Bore Plan – Prior to beginning the work, the Contractor shall submit a drawing indicating the pilot bore plan.

E. Equipment - Contractor shall submit specifications on directional drilling equipment to be used to ensure that the equipment will be adequate to complete the project. Specifications for any

drilling fluid additives that the Contractor intends to use shall be submitted for review by the Engineer.

F. The Contractor shall submit calculations to verify that the specified pipe wall thickness (DR) is sufficient to withstand the installation (i.e. pull back force).

1.5 QUALITY ASSURANCE

A. The requirements set forth in this document specify a wide range of procedural precautions necessary to ensure that the very basic, essential aspects of a proper directional bore installation are adequately controlled. Strict adherence shall be required under specifically covered conditions outlined in this specification. Adherence to the specifications contained herein, or the Engineer's approval of any aspect of any directional bore operation covered by this specification, shall in no way relieve the Contractor of their ultimate responsibility for the satisfactory completion of the work authorized under the Contract.

PART 2 - PRODUCTS

2.1 EQUIPMENT

A. The directional drilling equipment shall consist of a directional drilling rig of sufficient capacity to perform the bore and pullback the pipe, a mixing and delivery system for drilling fluid of sufficient capacity to successfully complete the installation, a guidance system to accurately guide boring operations, control and containment of drilling fluid, along with trained and competent personnel to operate the system. All equipment shall be in good, safe operating condition with sufficient supplies, materials and spare parts on hand to maintain the system in good working order for the duration of the project.

2.2 DRILLING SYSTEM

A. Drilling Rig - The directional drilling machine shall consist of a hydraulically powered system to rotate, push and pull hollow drill pipe into the ground at a variable angle while delivering a pressurized fluid mixture to a guidable drill (bore) head. The machine shall be anchored to the ground to withstand the pulling, pushing and rotating pressure required to complete the installation. The hydraulic power system shall be self-contained with sufficient pressure and volume to power drilling operations. Hydraulic system shall be free of leaks. Rig shall have a system to monitor and record maximum pull-back pressure during pull-back operations.

B. Drill Head - The drill head shall be steerable by changing its rotation and shall provide the necessary cutting surfaces and drilling fluid jets.

C. Mud Motors (if required) - Mud motors shall be of adequate power to turn the required drilling tools.

D. Drill Pipe - Shall be constructed of high quality 4130 seamless tubing, grade D or better, with threaded box and pins. Tool joints should be hardened to 32-36 RC.

2.3 GUIDANCE SYSTEM

A. The Guidance System shall be of a proven type and shall be used to provide a continuous and accurate determination of the location of the drill head during the drilling operation. The guidance system shall be capable of tracking all required depths in any soil condition and rock encountered along the proposed installation route.

B. The guidance system shall be setup and operated by personnel trained and experienced with this system. The Operator shall be aware of any magnetic anomalies and shall consider such influences in the operation of the guidance system if using a magnetic system.

2.4 DRILLING FLUID (MUD) SYSTEM

A. Mixing System - A self-contained, closed, drilling fluid mixing system shall be of sufficient size to mix and deliver drilling fluid composed of bentonite clay, potable water and appropriate additives. Mixing system shall be able to molecularly shear individual bentonite particles from the dry powder to avoid clumping and ensure thorough mixing. The drilling fluid reservoir tank shall be sized for adequate storage of the mud mixture. Mixing system shall continually agitate the drilling fluid during drilling operations.

B. Drilling Fluids - Drilling fluid shall be composed of clean water and an appropriate additive. Water shall be from a clean source with a pH of 8.5 – 10 and/or as per mixing requirements of the Manufacturer. Water of a lower pH or with excessive calcium shall be treated with the appropriate amount of sodium carbonate or equal. The water and additives shall be mixed thoroughly and be absent of any clumps or clods. No hazardous additives may be used. Drilling fluid shall be maintained at a viscosity sufficient to suspend cuttings and maintain the integrity of bore wall.

C. Delivery System - The mud pumping system shall have a minimum capacity to supply mud in accordance with the drilling equipment pull-back rating at a constant required pressure. The delivery system shall have filters in-line to prevent solids from being pumped into the drill pipe. Connections between the pump and drill pipe shall be relatively leak-free. Used drilling fluid and drilling fluid spilled during drilling operations shall be contained and properly disposed of. A berm, minimum of 12" high, shall be maintained around drill rigs, drilling fluid mixing system, entry and exit pits and drilling fluid recycling system (if used) to prevent spills into the surrounding environment. Pumps and or vacuum truck(s) of sufficient size shall be in place to convey excess drilling fluid from containment areas to storage facilities.

2.5 OTHER EQUIPMENT

A. Pipe Rollers - Pipe rollers, if required, shall be of sufficient size to fully support the weight of the pipe while being hydro-tested and during pull-back operations. Sufficient number of rollers shall used to prevent excess sagging of pipe.

B. Pipe Rammers - Hydraulic or pneumatic pipe rammers may only be used if necessary and with the authorization of Engineer.

C. Restrictions - Other devices or utility placement systems for providing horizontal thrust other than those previously defined in the preceding sections shall not be used unless approved by the Engineer prior to commencement of the work. Consideration for approval will be made on an

individual basis for each specified location. The proposed device or system will be evaluated prior to approval or rejection on its potential ability to complete the utility placement satisfactorily without undue stoppage and to maintain line and grade within the tolerances prescribed by the particular conditions of the project.

2.6 HIGH DENSITY POLYETHYLENE (HDPE) ELECTRICAL CONDUIT

A. HDPE electrical duct pipe shall be manufactured in accordance with ASTM F2160, non-pressure-rated conduit. The PE 334420E/C resin used in HDPE non-pressure conduit shall meet ASTM D3350.

B. HDPE pipe shall have a high stress crack resistance and a coefficient of friction 30 percent less than PVC. The pipe shall come on a continuous reel, at least 500 feet of pipe on a single reel.

C. Schedule 80, UL 651 listed.

D. The Contractor shall adhere to the pipe manufacturer's most current calculation for safe pulling force and bend radius for trenchless application. This calculation shall be part of the required submittal prior to work.

E. Pipe shall be black in color.

F. HDPE pipe size as noted on project drawings.

G. HDPE pipe used on this project shall be manufactured by Carlon or equal.

PART 3 - EXECUTION-

3.1 GENERAL

A. The Engineer must be notified 48 hours in advance of starting work. The Engineer's approval for beginning the installation shall in no way relieve the Contractor of the ultimate responsibility for the satisfactory completion of the work as authorized under the Contract. It shall be the responsibility of Engineer to provide inspection personnel at such times as appropriate.

B. The Contractor shall be fully responsible for all damages resulting from his failure to comply with all applicable state, federal and local regulations, and requirements of these specifications.

3.2 DRILLING PROCEDURE

A. Site Preparation - Prior to any alterations to work-site, contractor shall photograph or video tape entire work area, including entry and exit points. One copy shall be given to the Engineer and one copy to remain with contractor for a period of one year following the completion of the project. Work site as indicated on drawings, within right-of-way, shall be graded or filled to provide a level working area. No alterations beyond what is required for operations are to be made. Contractor shall confine all activities to designated work areas.

B. Drill Path Survey - Entire drill path shall be accurately surveyed with entry and exit stakes placed in the appropriate locations within the areas indicated on drawings. If contractor is using a magnetic guidance system, drill path will be surveyed for any surface geomagnetic variations or anomalies.

C. Environmental Protection – Contractor shall have in place silt fence between all drilling operations and any drainage, wetland, waterway or other area designated for such protection by contract documents, state, federal and local regulations. Additional environmental protection necessary to contain any hydraulic or drilling fluid spills shall be put in place, including berms, liners, turbidity curtains and other measures. Contractor shall adhere to all applicable environmental regulations.

D. Safety - Contractor shall adhere to all applicable state, federal and local safety regulations and all operations shall be conducted in a safe manner. Safety meetings shall be conducted at least weekly with a written record of attendance and topic submitted to Engineer.

E. Pipe will be placed on pipe rollers before pulling into bore hole with rollers spaced close enough to prevent excessive sagging of pipe.

F. Pilot Hole - Pilot hole shall be drilled on bore path with no deviations greater than 5% of depth over a length of 100'. In the event that pilot does deviate from bore path more than 5% of depth in 100', contractor will notify Engineer and Engineer may require contractor to pull-back and re-drill from the location along bore path before the deviation. In the event that a drilling fluid fracture, inadvertent returns or returns loss occurs during pilot hole drilling operations, contractor shall cease drilling, wait at least 30 minutes, inject a quantity of drilling fluid with a viscosity exceeding 120 seconds as measured by a March funnel and then wait another 30 minutes. If mud fracture or returns loss continues, contractor will cease operations and notify Engineer. Engineer and contractor will discuss additional options and work will then proceed accordingly.

G. Reaming - Upon successful completion of pilot hole, contractor will ream bore hole to a minimum of 25% greater than outside diameter of pipe using the appropriate tools. Contractor will not attempt to ream at one time more than the drilling equipment and mud system are designed to safely handle.

H. Pull-Back - After successfully reaming bore hole to the required diameter, contractor will pull the pipe through the bore hole. In front of the pipe will be a swivel. Once pullback operations have commenced, operations must continue without interruption until pipe is completely pulled into bore hole. During pull-back operations contractor will not apply more than the maximum safe pipe pull pressure at any time. In the event that pipe becomes stuck, contractor will cease pulling operations to allow any potential hydro-lock to subside and will commence pulling operations. If pipe remains stuck, contractor will notify Engineer. Engineer and contractor will

3.3 SITE RESTORATION

A. Following drilling operations, contractor will de-mobilize equipment and restore the worksite to original condition. All excavations will be backfilled and compacted to 95% of original density. Landscaping will be restored to original. All mud shall be disposed of by the CONTRACTOR.

END OF SECTION 260542

SECTION 260553 - ELECTRICAL IDENTIFICATION

PART 1 - GENERAL

1.1 EQUIPMENT LABELING

A. All starters, feeder units in panelboards, switchboards, disconnects, instruments, etc., shall be marked to indicate the motor, outlet, circuit they control, or variable monitored. Marking is to be done with engraved laminated nameplates and shall bear the designation shown on the Contract Drawings where this information is given. Nameplates shall be fastened to equipment with stainless steel screws, minimum of one each side. In no way shall the installation of mounting screws void the NEMA enclosure rating of the equipment in which they are installed. If there are more than one identical unit, they shall be given consecutive numbers or other descriptions as designated by the Engineer. Nameplate background color shall be white, with black engraved letters, unless otherwise noted.

B. Branch circuits in lighting panels shall be typed on a card suitable for the card frame furnished with the panel. The card shall bear the panel designation listed on the Contract Drawings where this information is given, as well as indicate what each circuit controls.

C. Individual wall mounted starters, panelboards, and disconnect switch shall be labeled with vinyl self-adhesive signs that warn of “High Voltage” (state the specific voltage). Main service entrance conduits to a building, where exposed, shall be labeled with the voltage of the service they carry. Other major equipment such as transformers, transfer switches, generator sets, pump control panels, etc., shall be labeled as such. The type of labels to be used shall have orange as the basic color to conform to OSHA requirements, letters shall be black. The labels shall be of proper size to fit flatly on the surface of the enclosure to make for a neat appearance and not interfere with the operating function of the device it is attached to. These labels shall be as manufactured by the Brady Identification Systems Division, Safety Sign Company, Westline Products Company, or equal.

D. Furnish and install “Authorized Personnel Only” signs by doors into all power distribution equipment rooms/buildings. Furnish and install other signs as indicated on the Contract Drawings.

E. Furnish and install a maximum available fault current sign with date calculated on each structure main service device.

1.2 LOCATING UNDERGROUND UTILITIES

A. Plastic tape bearing the general notation of “buried electric service” or “buried high voltage cable” shall be placed in trenches with backfill about 12 inches below finished grade on all medium voltage underground conduit runs, and on others as indicated on the Contract Drawings.

PART 2 - PRODUCTS (Not Applicable)

PART 3 - EXECUTION (Not Applicable)

END OF SECTION 260553

SECTION 260573 – ELECTRICAL STUDIES AND CALCULATIONS

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. Panelboard/switchgear manufacturer shall provide detailed computer-based, fault-current and overcurrent protective device coordination studies, and the setting of these devices. This shall apply to new work at existing facilities as well as new facilities.

B. As part of the short circuit study above, the manufacturer shall provide an Arc Flash Analysis.

1.2 SUBMITTALS

A. Provide Fault-Current Study as detailed in IEEE standards during design review submittals.

B. Submit an Over Current Protective Device Coordination Study and Arc Flash Analysis prepared in accordance with IEEE standards at the time of shop drawing submittals. The study shall show and include the following:

1. That each over current protective device in the project is applied within its fault current rating.
2. The coordination study shall include time current curves plotted on log-log graph paper for all over current devices. Curves for adjustable devices shall be shown adjusted to afford maximum coordination with upstream and downstream devices, including devices provided on the primary of service transformers.
3. The interrupting capacity of all over current devices shall equal or exceed the maximum fault current level where they are installed in the system. The system shall be fully rated in that the ability of the device to interrupt a fault at its terminals and shall not depend on the characteristics of an over current device upstream. Series rated devices shall not be acceptable.
4. A schedule of all adjustable devices indicating proper dial and tap settings to achieve the plotted characteristics. A schedule of Arc Flash values and corresponding boundary distances and PPE requirements.

1.3 QUALITY ASSURANCE

A. Coordination-Study Specialist Qualifications: An entity experienced in the application of computer software used for studies, having performed successful studies of similar magnitude on electrical distribution systems using similar devices.

1. Professional engineer, licensed in the state where project is located, shall be responsible for the study. All elements of the study shall be performed under the direct supervision and control of engineer.

PART 2 - EXECUTION

2.1 INSTALLATION/APPLICATION/ERECTION

A. Manufacturer's Field Service: Engage a factory-authorized service representative of electrical distribution equipment being set and adjusted to assist in the setting of overcurrent protective devices within equipment.

B. Overcurrent devices are to be visually inspected to verify that settings determined from the final Over Current Protection Coordination Devices Study have been programmed and/or set.

C. Labels shall be applied to all enclosures, with appropriate site-specific Arc Flash warnings, PPE requirements, and boundaries. Boundaries shall be painted on the floor in front of switchgear, switchboards, panelboards and MCC's.

D. Each building main service device shall be provided with a permanent nameplate stating the maximum fault current available and the date it was calculated.

END OF SECTION 260573

SECTION 260923 – LIGHTING CONTROLS

PART 1 - GENERAL

1.1 SYSTEM DESCRIPTION

A. The lighting control system specified in this section shall provide sensor-based (both occupancy and vacancy), and manual lighting control without the use of any centrally hardwired switching equipment (relay panels). The system's control shall be exerted by directly switching lighting loads on and off.

1.2 MANUFACTURERS

A. This specification is based on the nLight Control System from Acuity Brands. Other manufacturers like NX Lighting Controls, Wattstopper or Equal are acceptable provided they fully meet the intent of the drawings and specifications. All substitutions must clearly identify any and all exceptions to the drawings and specifications, with a detailed explanation as to the exception. If substitution is approved, the contractor shall bear the responsibility of a fully functional system to the owner's and an Engineer's satisfaction.

1.3 QUALITY ASSURANCE

A. The installing contractor shall be responsible for a complete and functional system in accordance with all applicable local and national codes.

B. All applicable products must be UL and CUL or CSA Listed.

C. Product must be manufactured in the USA and be warranted for 5 years.

PART 2 - PRODUCTS

2.1 GENERAL SYSTEM SPECIFICATIONS

A. The following sections describe the features which the lighting control system shall possess as a complete operational system. Individual device features and specifications are listed in section 2.2.

1. System Architecture

a. All switching relays shall be located within either a sensor device, single gang wall switch device, or power (relay) pack device.
b. All switching for a specific lighting zone shall take place within the devices located in the zone itself (i.e. not in a remotely located device).
c. All devices within a single lighting zone shall be capable of being daisy-chain wired with CAT-6 low voltage cabling.

d. Communication and Class 2 system power shall be delivered to each device via standard CAT-6 low voltage cabling with RJ-45 connectors.
e. Contractor shall make all lighting network cables with yellow jacketed Cat 6 cable and standard RJ-45 crimp-on connectors. Factory manufactured cables or cables with molded ends are not acceptable.
f. All system devices shall have at least two RJ-45 ports.
g. Individual lighting zones must continue to provide a user defined default level of lighting control.

2. Lighting Control Profiles

a. Changes to the operation of the system can be made in real-time or scheduled via lighting control profiles. These profiles are outlines of settings that direct how a collection of devices function for a defined time period.
b. Lighting control profiles shall be capable of being created and applied to a single device, zone of devices, or customized group of zones.
c. All relays and dimming outputs shall be capable of being scheduled to track or ignore information regarding occupancy, daylight, and local user switches via lighting control profiles.
d. Every device parameter (e.g. sensor time delay and photocell set-point) shall be configurable via a lighting control profile.

3. Commissioning Features

a. To facilitate commissioning, all devices daisy-chained together (using CAT-6) shall automatically be grouped together into a functional lighting control zone.
b. All lighting control zones shall be able to function according to default settings once adequate power is applied and before any system software is installed.
c. All system devices shall be capable of being given user defined names.

2.2 INDIVIDUAL DEVICE SPECIFICATIONS

The lighting control system outlined above shall consist of only devices of the following types; occupancy sensors, daylight (photocell) sensors, wall switches, dimming switches, power (relay) packs, power supplies, communication bridges, network control gateways. Panel based relay devices are not acceptable.

A. Occupancy & Photocell Sensors

1. General Specifications

a. Occupancy sensing technologies shall be completely passive meaning that they will not emit any radiation that is known to interfere with certain types of hearing aides, or electronic devices such as electronic white board readers. Passive Infrared (PIR) or PIR/Microphonic Dual Technology detection technologies shall be acceptable. Ultrasonic or Microwave based sensing technologies shall not be accepted.
b. Sensors shall be available with zero, one, or two integrated Class 1 switching relays.
c. Sensors shall be available with one or two occupancy “poles”, each of which provides a programmable time delay.

d. Sensors shall be available in multiple lens options which are customized for specific applications.
e. Communication and Class 2 low voltage power shall be delivered to each device via standard CAT-6 low voltage cabling with standard RJ-45 connectors.
f. All sensors shall have two RJ-45 ports.
g. Every sensor parameter shall be available and configurable remotely from the software and locally via the device push-button.
h. Sensors shall be able to function together with other sensors in order to provide expanded coverage areas by simply daisy-chain wiring together the units with CAT-6 cabling.
i. Sensors shall be equipped with an automatic override for 100 hour burn-in of lamps. This feature must be available at any time for lamp replacements.

2. Wall Switch Sensors

a. Sensor shall recess into single-gang switch box and fit a standard decora opening.
b. Sensor must meet NEC grounding requirements by providing a dedicated ground connection and grounding to mounting strap. Line and load wire connections shall be interchangeable. Sensor shall not allow current to pass to the load when sensor is in the unoccupied (Off) condition.
c. Sensor shall have optional features for photocell/daylight override, vandal resistant lens, and low temperature/high humidity operation.
d. Sensors shall be Gray.
e. Sensors shall be the following nLight model numbers, with device color and optional features as specified:

1) nWSX (PIR)
2) nWSX D (PIR, Dimming)
3) nWSX PDT (Dual Technology)
4) nWSX PDT D (Dual Technology, Dimming)
5) nWSX 2P (PIR, 2 Relays)
6) nWSX PDT 2P (Dual Technology, 2 Relays)

3. Ceiling & Corner Mount Sensors

a. Sensor shall have optional features for photocell/daylight override, dimming control, and low temperature/high humidity operation.
b. Sensors with dimming control can control 0 to 10 VDC dimmable ballasts by sinking up to 20 mA of Class 2 current (typically 40 or more ballasts).
c. All sensors have at least one or two occupancy poles, each of which provides a programmable time delay.
d. Sensors shall be the following nLight model numbers, with device options as specified:

Model # Series	Occupancy Poles	# of Relays	Lens Type	Detection Technology
nCM-9	1	-	Standard	PIR
nCM-9-2P	2	-	Standard	PIR
nCMR-9	1	1	Standard	PIR
nCMR-9-2P	2	2	Standard	PIR
nCM-PDT	1	-	Standard	Dual

Model # Series	Occupancy Poles	# of Relays	Lens Type	Detection Technology
nCM-PDT-2P	2	-	Standard	Dual
nCMR-PDT	1	1	Standard	Dual
nCMR-PDT-2P	2	2	Standard	Dual
nCM-10	1	-	Extended	PIR
nCM-10-2P	2	-	Extended	PIR
nCMR-10	1	1	Extended	PIR
nCMR-10-2P	2	2	Extended	PIR
nCM-PDT-10	1	-	Extended	Dual
nCM-PDT-10-2P	2	-	Extended	Dual
nCMR-PDT-10	1	1	Extended	Dual
nCMR-PDT-10-2P	2	2	Extended	Dual
nWV-16	1	-	Wide View	PIR
nWV-PDT	1	-	Wide View	Dual
nHW-13	1	-	Hallway	PIR
nCM-6	1	-	High Bay	PIR
nCMR-6	1	1	High Bay	PIR
nCMR-6-2P	2	2	High Bay	PIR
nCMR-6-480	1	2	High Bay	PIR

4. Daylight (Photocell) Sensors

   a. Sensor shall provide for an On/Off set-point, and a deadband to prevent the artificial light from cycling. Delay shall be incorporated into the photocell to prevent rapid response to passing clouds.
   b. Sensors' set-point and deadband shall be automatically calibrated through the sensor's micro-controller by initiating the "Automatic Set-point Programming" subroutine. Further adjustment may be made manually if needed. Deadband setting shall be verified and modified by the sensor automatically every time the lights cycle to accommodate physical changes in the space (i.e., furniture layouts, lamp depreciation, or lamp outages).
   c. Sensors with dimming control can control 0 to 10 VDC dimmable ballasts by sinking up to 20 mA of Class 2 current (typically 40 or more ballasts).
   d. Photocell sensor's set point shall be automatically calibrated through the sensor's micro-controller by initiating the "Automatic Set-point Programming" subroutine. Min and Max dim settings as well as set-point may be manually entered.
   e. Dual zone option shall be available for On/Off Photocell, Automatic Dimming Control Photocell, or Combination units. The second zone shall be controlled as an "offset" from the primary zone and shall be the zone farthest from the natural light source.
   f. Sensor shall be the following nLight model numbers, with device options as specified:

      1) nCM-PC (On/Off, No Relay)
      2) nCM-ADC (Dimming, No Relay)
      3) nCM-PC-ADC (On/Off, Dimming, No Relay)
      4) nCMR-PC (On/Off, 1 Relay)
      5) nCMR-PC-ADC (On/Off, Dimming, Relay)

B. Power (Relay) Packs and Supplies

1. Power Packs shall accept 120 or 277 VAC (or optionally 347 VAC), be plenum rated, and provide Class 2 power to the system.
2. All devices shall have two RJ-45 ports.
3. Every Power Pack parameter shall be available and configurable remotely from the software and locally via the device push-button.
4. Power Pack shall securely mount to junction location through a threaded ½ inch chase nipple. Plastic clips into junction box shall not be accepted. All Class 1 wiring shall pass through chase nipple into adjacent junction box without any exposure of wire leads. Note: UL Listing under Energy Management or Industrial Control Equipment automatically meets this requirement, whereas Appliance Control Listing does not meet this safety requirement.
5. When required by local code, Power Pack must install inside standard electrical enclosure and provide UL recognized support to junction box. All Class 1 wiring is to pass through chase nipple into adjacent junction box without any exposure of wire leads.
6. Power Pack shall incorporate a Class 1 relay and contribute low voltage power to the rest of the system. Slave Packs shall incorporate the relay, but shall not be required to contribute system power. Power Supplies shall provide system power only, but are not required to switch line voltage circuit. Auxiliary Relay Packs shall switch low voltage circuits only.
7. Class 1 Relays used in Power (Slave) Packs shall provide 16 Amp switching of all load types, and be rated for 400,000 cycles.
8. Power (Relay) Packs and Supplies shall be the following nLight model numbers:

    a. nPP-16 (Power/Relay Pack)
    b. nPP-16 D (Power/Relay Pack with 0-10VDC dimming)
    c. nPP-20 PL (Power/Relay Pack for plug load control)

    *** Provide 0-10VDC Dimming output where stated on Project Drawings.

C. Wall Switches & Dimmers

1. Devices shall recess into single-gang switch box and fit a standard decora opening.
2. Devices shall provide user control via touch sensitive buttons that utilize no mechanical parts.
3. Devices shall be available with zero or one integrated Class 1 switching relay.
4. Communication and Class 2 low voltage power shall be delivered to each device via standard CAT-6 low voltage cabling with RJ-45 connectors.
5. All sensors shall have two RJ-45 ports.
6. All devices shall provide toggle switch control. Dimming control and low temperature/high humidity operation are available options.
7. Devices shall be Gray.
8. Devices with dimming control outputs can control 0 to 10 VDC dimmable ballasts by sinking up to 20 mA of Class 2 current (typically 40 or more ballasts).
9. Wall Switches & Dimmers shall be the following nLight model numbers, with device options as specified:

    a. nPODM
    b. nPODMA

D. Scene Controller

1. Device shall recess into single-gang switch box and fit a standard decora opening.
2. Device shall provide user control via touch sensitive buttons which have no mechanical parts.
3. Communication and Class 2 low voltage power shall be delivered to each device via standard CAT-6 low voltage cabling with standard RJ-45 connectors.
4. All sensors shall have two RJ-45 ports.
5. Device shall have four touch sensitive buttons for selecting programmable lighting control profiles.
6. Device shall have four LEDs indicating current selection.
7. Scene Selector device shall be the following nLight model number:

    a. nPODMA

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install all equipment in accordance with manufacturer's installation instructions.

B. The lighting controls shall be installed in accordance with specific guidelines and submittal documents provided by the lighting control manufacturer.

C. Where variations from the general specifications or drawings exist, the contractor shall request a clarification prior to rough in or installation.

D. The contractor shall verify all wire type and routing requirements with the lighting controls manufacturer prior to installation. Not part of this section are requirements for work including, but not limited to, raceways, electrical boxes, junction boxes, circuit protection, wiring, and fittings required for installation of the lighting control equipment.

3.2 STARTUP AND PROGRAMMING

A. The system manufacturer shall provide a factory authorized field engineer to the project site after installation has been completed and prior to system energization for the purpose of testing and adjustment of the system. Factory field engineer shall test and verify all system functions and ensure proper operation of the system components in accordance with the specifications and on-site conditions, including follow up visits, repair and reprogramming that may be necessary. The installing contractor shall notify the system manufacturer in writing that the system is completely wired and ready to be energized and tested 2 weeks prior to scheduling a field engineer for start-up of the system. Should the field engineer arrive on the job site and find the installation incomplete, the installing contractor shall pay the cost of any extra visits by the field engineer required to complete the system start-up (beyond those that would normally be required).

B. The Contractor shall also advise the CxA when the lighting controls commissioning will occur so that it can be witnessed by the CxA as it occurs. The manufacturer shall cooperate with the CxA as much as practicable, to ensure a successfully commissioned system. If any major verification fails, the CxA will most likely look for compensation from someone for participating in any retesting.

C. During the start-up procedure, the factory field engineer shall provide programming assistance and guidance to the building operating personnel in order to program the systems for initial operation.

D. Allow for up to 4 hours of on-site training on the use and maintenance of the lighting control system to be scheduled at the completion of startup and programming of the system.

E. Include costs for 1 return trip during the warranty to reprogram or set new Owner preferences after they have had time to familiarize themselves with the system.

3.3 TECHNICAL SUPPORT

A. The lighting controls manufacturer shall provide reasonable access to factory direct telephone technical support during normal business hours.

END OF SECTION 260923

SECTION 261200 - TRANSFORMERS

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. Transformer locations, sizes, connections and voltage/phase shall be as shown on the Contract Drawings, furnished and installed as herein specified.

B. All transformers shall be non-PCB type.

PART 2 - PRODUCTS

2.1 ACCEPTABLE MANUFACTURERS

A. Cooper, Eaton, General Electric, Square D, or equal.

2.2 FABRICATION

A. Dry-Type Transformers

1. Transformers shall be 115° C temperature rise above a 40° C ambient. The transformer shall be capable of carrying a 15 percent continuous overload without exceeding a 150° C rise in a 40° C ambient. All insulating materials are to be in accordance with the latest NEMA Standards for a 220° Celsius UL recognized insulation system.
2. Transformer coils shall be copper, of continuous wire wound construction and shall be impregnated with non-hygroscopic, thermo-setting varnish. The coils shall also have a final wrap of electrical insulating material to prevent mechanical injury to the wire as well as increasing the electrical breakdown strength.
3. All cores shall be constructed of high grade, non-aging silicon steel with high magnetic permeability, and low hysteresis and eddy current losses. Magnetic flux densities are to be kept well below the saturation point. The core laminations shall be clamped together with steel angles. The completed core and coil shall then be bolted to the base of the enclosure but isolated from the base by means of rubber, vibration absorbing mounts. There shall be no metal-to-metal contact between the core and coil and the enclosure. On transformers 500 KVA and smaller, the vibration isolation system shall be designed to provide a permanent fastening of the core and coil to the enclosure. To further facilitate vibration and noise isolation, the final section of conduit to the transformer shall be flexible.
4. Transformers shall be in heavy gauge, sheet steel, ventilated enclosures. The ventilating openings shall be designed to prevent accidental access to live parts in accordance with UL, NEMA, and National Electrical Code Standards for ventilated enclosures. Transformers 25 KVA through 75 KVA shall be designed so they can either be floor or wall mounted. Above 75 KVA they shall be of the floor mounted design.

5. The entire transformer enclosure shall be degreased, cleaned, phosphatized, primed, and finished in the same color as the motor control equipment. For more details see Division 09 of these Specifications.
6. The maximum temperature of the top of the enclosure shall not exceed 35 degrees Celsius rise above a 40° Celsius ambient.
7. The core of the transformer shall be visibly grounded to the enclosure by means of a flexible grounding conductor sized in accordance with NEMA and NEC Standards.
8. The transformer shall be marked "< fill in > KVA TRANSFORMER" and "DANGER HIGH VOLTAGE" with labels specified in the section on marking, this division.
9. Primary taps shall be full capacity, with a minimum of two 2-1/2 percent above and below rated voltage.
10. The temperature rise shall be designated on the nameplate.
11. All high voltage leads and connections shall have insulation equal to the voltage class of the winding and shall be properly supported.
12. The basic impulse level (BIL) shall be a minimum of 30 KV for the 5 KV and 2.4 KV voltage classes.
13. Large enclosures are to be provided with lifting devices secured to the base structure and shall have jacking pads. The base is to be constructed of structural steel members to permit skidding or rolling in any direction.
14. Noise levels shall be in accordance with applicable industry standards.
15. Transformers 25 KVA and larger shall have a minimum of four 2-1/2 percent full capacity primary taps.

PART 3 - EXECUTION

3.1 INSTALLATION/APPLICATION/ERECTION

A. Transformers shall be furnished and installed in accordance with manufacturer instructions, NEC, and NESC requirements, as well as local utility company requirements.

B. Touch up paint on exterior of enclosure.

C. Anchor to foundation.

END OF SECTION 261200

SECTION 262416 - PANELBOARDS

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. This section of the Technical Specifications includes furnishing all labor, materials, equipment, and incidentals required for the installation of all lighting and distribution panelboards as hereinafter specified and as shown on the Contract Drawings.

B. The panelboards for installation under this Contract shall be selected from the following types with the panel voltage and main sizes the determining factors. All panelboards shall be by the same manufacturer.

C. Circuit breakers of size and type shown on Contract Drawings and described herein shall be provided with the panelboards.

PART 2 - PRODUCTS

2.1 ACCEPTABLE MANUFACTURERS

A. Eaton, General Electric, Square D, or equal.

2.2 EQUIPMENT

A. Rating

1. Panelboard ratings shall be as shown on the Contract Drawings. All panelboards shall be rated for the intended voltage.

B. Standards

1. Panelboards shall be in accordance with the Underwriter Laboratories, Inc. “Standard for Panelboards” and “Standard for Cabinets and Boxes” and shall be so labeled where procedures exist. Panelboards shall also comply with NEMA Standard for Panelboards and the National Electrical Code.

C. Panelboard Construction (NEMA 1)

1. Interiors

a. All interiors shall be completely factory assembled with circuit breakers, wire connectors, etc. All wire connectors, except screw terminals, shall be of the anti-turn solderless type and all shall be suitable for copper or aluminum wire of the sizes indicated.

b. Interiors shall be so designed that circuit breakers can be replaced without disturbing adjacent units and without removing the main bus connectors and shall be so designed that circuits may be changed without machining, drilling or tapping.
c. Branch circuits shall be arranged using double row construction except when narrow column panels are indicated. Branch circuits shall be numbered by the manufacturer.
d. A nameplate shall be provided listing panel type, number of circuit breakers and ratings.

2. Bussing

a. Bus-bars for the mains shall be of copper. Full size neutral bars shall be included. Bus bar taps for panels with single pole branches shall be arranged for sequence phasing of the branch circuit devices. Bussing shall be braced throughout to conform to industry standard practice governing short circuit stresses in panelboards. Phase bussing shall be full height without reduction. Cross connectors shall be copper.
b. Neutral bussing shall have a suitable lug for each outgoing feeder requiring a neutral connection. Neutrals shall be rated 200 percent for panelboards supplying non-linear loads (fed from K rated transformers).
c. Spaces for future circuit breakers shall be bussed for the maximum device that can be fitted into them.
d. Separate neutral and ground bus shall be provided, insulated and isolated from each other. For isolated ground application, provide another insulated and isolated ground bus.

3. Boxes

a. Recessed boxes shall be made from galvanized code gauge steel having multiple knockouts, unless otherwise noted. Surface mounted boxes shall be painted to match the trim. Boxes shall be of sufficient size to provide a minimum gutter space of 4 inches on all sides.
b. Surface mounted boxes shall have an internal and external finish as hereinafter specified. Surface mounted boxes shall be field punched for conduit entrances.
c. At least 4 interior mounting studs shall be provided.

4. Trims

a. Hinged doors covering all circuit-breaker handles shall be included in all panel trims.
b. Doors shall have semi flush type cylinder lock and catch, except that doors over 43 inches in height shall have a vault handle and 3-point catch complete with lock, arranged to fasten door at top, bottom and center. Door hinges shall be concealed. Two keys shall be supplied for each lock. All locks shall be keyed alike; directory frame and card having a transparent cover shall be furnished on each door.
c. The trims shall be fabricated from code gauge sheet steel.
d. All exterior and interior steel surfaces of the panelboard shall be properly cleaned and finished with manufacturer’s standard gray paint over a rust-inhibiting phosphatized coating. The finish paint shall be of a type to which field applied paint will adhere without cracking or peeling.

e. Trims for flush panels shall overlap the box by at least 3/4 inch all around. Surface trims shall have the same width and height as the box. Trims shall be fastened with quarter turn clamps.

D. Overcurrent Protective Devices (Circuit Breakers)

1. Panelboards shall be equipped with circuit breakers with frame size and trip settings as shown on the Contract Drawings.
2. Circuit-breakers shall be molded case, bolt-in, thermal-magnetic trip.
3. Circuit-breakers used in 120/240-volt panelboards shall have an interrupting capacity of not less than 10,000 amperes, RMS symmetrical, unless otherwise shown in the panelboard schedule or Contract Drawings.
4. Circuit-breakers used in 480-volt panelboards shall have an interrupting capacity of not less than 14,000 amperes, RMS symmetrical, unless otherwise shown in the panelboard schedule or Contract Drawings.
5. GFCI (ground fault circuit interrupter) shall be provided for circuits where indicated on the Contract Drawings. GFCI units shall be 1-pole, 120 volt, molded case, bolt-on circuit breakers, incorporating a solid-state ground fault interrupter circuit insulated and isolated from the circuit-breaker mechanism. The unit shall be UL listed Class A Group I device (5 milliamp sensitivity, 25 millisecond trip time), and an interrupting capacity of 10,000 amperes RMS.
6. Trip elements of multi-pole breakers shall be effectively insulated from one another. Multi-pole breakers shall be designed so that an overload on any pole shall open all poles simultaneously.
7. The breaker operating mechanism shall be the quick-make, quick-break type and shall be entirely trip free to prevent the contacts being held in a closed position against a short circuit.
8. Breakers shall have a thermal bimetallic element for time delayed overload protection and a magnetic element for short circuit protection.
9. The breaker shall be trip indicating with the trip position midway between the “On” and “Off” positions.
10. Breakers for power distribution panels shall be F frame or larger. All breakers rated above 225 amps shall have interchangeable magnetic trip elements.
11. All breakers shall be UL listed and conform to requirements of NEMA Standards.
12. Breakers for HVAC equipment shall be HACR rated.
13. Breakers as called out in panel schedules shall be arc fault circuit interrupting type.

PART 3 - EXECUTION

3.1 INSTALLATION/APPLICATION/ERECTION

A. Boxes for surface mounted panelboards shall be mounted so there is at least 1/2-inch air space between the box and the mounting surface.

B. Circuit directories shall be typed giving location and nature of load served.

C. Provide a minimum of three 1-inch spare conduits stubbed out into the ceiling grid cavity from each flush mounted panelboard.

D. Each panelboard shall be nameplated with plastic engraved nameplates stating the panel's name, voltage, and the name of panel serving the panel. Nameplates shall be secured by use of stainless-steel screws. All panels that are a part of an emergency system shall have an additional red nameplate titled "EMERGENCY."

END OF SECTION 262416

SECTION 262700 - WIRE CONNECTIONS AND CONNECTING DEVICES

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. Wire connection and connecting devices shall be as herein specified.

PART 2 - PRODUCTS

2.1 ACCEPTABLE MANUFACTURERS

A. Connectors, Lugs, etc. - Anderson, Burndy, T & B, or equal.

B. Ties and Servings - Panduit, T & B, or equal.

C. Termination and splice connectors - 3M Scotchlok, Anderson, Burndy, T & B, or equal.

2.2 MATERIALS

A. Wire Splicing and Terminations (600 Volts and Below)

1. Electrical Terminal and Splice Connectors (#22 - #4 AWG)

a. Terminals and splice connectors from #22 - #4 AWG shall be compression types with barrels to provide maximum conductor contact and tensile strength. Performance, construction, and materials shall be in conformance with UL standards for wire connectors and rated for 600 volts and 105 degrees Celsius.

b. Connectors shall be manufactured from high conductivity copper and entirely tin plated. Terminal barrels shall be serrated on the inside surface and have a chamfered conductor entry. Terminals shall have funnel entry construction to prevent strand fold-back. All barrels shall be brazed seam or seamless construction.

c. Spade type terminals shall be sized for the appropriate stud and shall be locking type that snap firmly onto studs with a close fit for maximum retention. Spade type terminals shall be insulated with an insulation suitable for maintaining a high dielectric strength when crimped and be made form nylon, PVC, or equal.

2. Electrical Lugs and Connectors (#6 AWG - 1000 Kcmil)

a. Lugs and splice connectors from #6 AWG - 1000 Kcmil shall be compression types with barrels to provide maximum conductor contact and tensile strength. They shall be manufactured from high conductivity copper and entirely tin plated. They shall be crimped with standard industry tooling. The lugs and connectors must have a current carrying capacity equal to the conductors for which they are rated and must also meet all UL requirements. All lugs above 4/0 AWG shall be 2-hole lugs with NEMA spacing. The lugs shall be rated for operation through 35

KV. The lugs shall be of closed end construction to exclude moisture migration into the cable conductor.

3. Twist-on Wire Connectors (#22 AWG - #10 AWG)

   a. All twist-on wire connectors must have a corrosion resistant spring that is free to expand within a steel jacket. The steel jacket must be insulated with a flexible vinyl jacket capable of withstanding 105 degrees Celsius ambient temperatures and of sufficient length to cover wires that are inadvertently overstripped.
   b. Each connector size must be listed by UL for the intended purpose and color coded to assure that the proper size is used on the wire combinations to be spliced. The connectors must be compatible with all common rubber and thermoplastic wire insulations.

4. Solderless/re-usable lugs shall be used only when furnished with equipment such as control panels, furnished by others, where specification of compression type lugs is beyond the Contractor's control. In the event their use is necessary, the Contractor shall be responsible for assuring that they are manufactured to NEMA standards, with proper number and spacing of holes and set screws.

PART 3 - EXECUTION

3.1 INSTALLATION, APPLICATION, & ERECTION

A. Insulation of Splices and Connections

1. Connections/splices with a smooth even contour shall be insulated with a conformable 7 mil thick vinyl plastic insulating tape which can be applied under all weather conditions and is designed to perform in a continuous temperature environment up to 105 degrees Celsius. The tape shall have excellent resistance to abrasion, moisture, alkalies, acids, corrosion, and varying weather conditions (including sunlight). The tape shall be equal to Scotch 33+ and shall be applied in conformance with manufacturer's recommendations. In addition, it shall be applied in successive half-lapped layers with sufficient tension to reduce its width to 5/8 of its original width. The last inch of the wrap shall not be stretched.
2. Connections/splices with irregular shapes or sharp edges protruding shall be first wrapped with 30 mil rubber tape to smooth the contour of the joint before being insulated with 33+ insulating tape specified in the previous paragraph. The rubber tape shall be high voltage (69 KV) corona-resistant based on self-fusing ethylene propylene rubber and be capable of operation at 130 degrees Celsius under emergency conditions. The tape must be capable of being applied in either the stretched or unstretched condition without any loss in either physical or electrical properties. The tape must not split, crack, slip, or flag when exposed to various environments. The tape must be compatible with all synthetic cable insulations. The tape must have a dissipation factor of less than 5 percent at 130 degrees Celsius, be non-vulcanizing, and have a shelf life of at least 5 years. The rubber tape shall be applied in successive, half-lapped wound layers and shall be highly elongated to eliminate voids. Other manufacturer's recommendations on installation shall be adhered to. The rubber tape shall be equal to Scotch 23 or 130C electrical splicing tape.

3. Splices made in wet or damp locations shall be made submersible and watertight with special kits made for the application and compatible with type of cables employed.

B. Connection Make-up

1. Connections of lugs to bus bars, etc., shall be made up with corrosion resistant steel bolts having non-magnetic properties with matching nuts, and shall utilize a Belleville spring washer (stainless steel) to maintain connection integrity. Connections shall be torqued to the proper limits. Prior to bolting up the connection, electrical joint compound shall be brushed on the contact faces of the electrical joint.
2. All motor lead connections shall be made up to match the type of lead furnished on the motor. If the lead is not lugged, then twist-on wire connectors may be used. To prevent possible vibration problems, twist-on connectors shall be taped after installation.
3. All lugged motor lead connections (excluding motors over 200 horsepower) shall be made up using ring tongue compression lugs with proper size stainless steel nuts and bolts. Belleville type spring shall be used to maintain tension on the connections. The connections shall then be insulated using the procedure described for irregular shapes, utilizing rubber tape in conjunction with vinyl electrical tape.
4. At the time of final inspection, the Engineer may request the Contractor to disassemble 3 randomly selected motor lead connections in the Engineer's presence, to assure conformance with these Specifications.
5. The Contractor shall include all necessary tools, materials, and labor in his bid for disassembly of the connections and for remaking them with new insulating materials after inspection.

END OF SECTION 262700

SECTION 262726 - WIRING DEVICES

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. Wiring devices shall be installed where indicated on the Contract Drawings.

1.2 RELATED WORK SPECIFIED ELSEWHERE

A. Flush floor box devices are specified in Section 260534.

PART 2 - PRODUCTS

2.1 ACCEPTABLE MANUFACTURERS

A. Bryant, Cooper, Hubbell, Intermatic, Leviton, P&S, Taymac, Wiremold, or equal.

2.2 RECEPTACLES AND SWITCHES

A. Receptacles

1. Twin-convenience - outlet (interior) – “Hubbell” cat. no. 5362, or equal. Hospital grade equivalent cat. no. 8300.
2. Twin-convenience - outlet (exterior) – “Hubbell” cat. no. 5362 with Taymac Corporation or Intermatic, Inc. safety outlet enclosure.
3. Single-convenience - outlet (pole mounted) – “Hubbell” cat. no. 53CM61 or equal.
4. Special purpose outlet - Per equipment requirements.
5. Isolated ground twin - convenience - outlet – “Hubbell” catalog number IG5362, or equal. Hospital grade equivalent cat. no. IG 8300.
6. Range outlet - 50 amp. 4-wire grounded, 125/250 VAC – “Hubbell” cat. no. 9450, or equal.
7. Single receptacle for sump pump - 20A/125 VAC – “Hubbell” cat. no. 2310, or equal.
8. Ground fault interrupting receptacles shall be required where shown on the Contract Drawings and shall be indicated by the abbreviation “GFI” beside the circuit symbol on the Contract Drawings. They shall be rated 20 amps (125 volts) and shall be of the duplex, feed through type, capable of protecting all downstream receptacles on the same circuit. They shall be UL listed and interrupt the current between 4-6 milliamps of ground fault leakage. Appropriate plates shall be furnished and installed. The 20-ampere rating shall apply not only to device internals but to the faceplate as well. Receptacle shall be “Hubbell”, Cat. GF20LA or equal. The hospital grade equivalent cat. no. is GF 8300.
9. Weather-resistant type receptacles shall be required in all outdoor, damp, and wet locations or where shown on Contract Drawings. Receptacle type shall be indicated by the abbreviation “WR” beside the circuit symbol on the Contract Drawings. Receptacle shall be UL Listed. Weather-resistant receptacles shall be “Hubbell” Cat 5362WR or

equal. Weather-resistant ground fault interrupting type receptacles shall be "Hubbell" Cat. GFTR20 or equal.

B. Plates and Covers

1. Furnish and install plates of the appropriate type and size for all wiring and control devices, signal and telephone outlets.
2. All plates on surface mounted boxes shall be of 304 stainless steel (nonmagnetic) with rounded or beveled edges. All plates on flush mounted boxes shall be white nylon or non-breakable thermoplastic. All device plate screws shall be nylon or stainless steel with countersunk heads. Plates shall be installed vertically and with an alignment tolerance of 1/16 inch. Device plates shall be of the one-piece type, of suitable shape for the devices to be covered. Plates shall have a smooth finish with no crevices to collect dirt. Oversize plates are not acceptable.
3. Covers for boxes serving equipment where flexible conduit is to be tapped into cover plates shall be sheet metal drilled for conduit. Gaskets shall be required as well as all special adapters for mounting.
4. Weatherproof plates shall be Hubbell 5205/5206/CWP26H/CWP8H/WP26 as appropriate for the box utilized, vertical or horizontal mounting. Use the appropriate plate for the mounting, affixed with security fasteners if in inmate accessible areas.

C. Wall Switches (Tumbler Type)

1. Single pole (interior) – "Hubbell" cat. no. 1221, or equal.
2. Single pole (exterior) – "Hubbell" cat. no. 1222, or equal, and Bryant 7420 or equal plate.
3. Switch and pilot light (interior) – "Hubbell" cat. no. 1221-IL (with lighted switch handle), or equal.
4. Switch and pilot light (exterior) – "Hubbell" cat. no. 1221- PL or equal.
5. 3-way switches (interior) – "Hubbell" cat. no. 1223, or equal.
6. Double-pole (interior) – "Hubbell" cat. no. 1222, or equal.
7. Single pole with "Hypalon" plate and pressure switch – "Hubbell" cat. no. 178 (w/cat. no. 1750 plate), or equal.
8. 4-way switches (interior) – "Hubbell" cat. no. 1224, or equal.
9. Key switches or lock type shall be "Hubbell" cat. no. 1221-L, 1222-L, 1223-L, 1224-L. Provide 20 extra matching keys in addition to one for each switch.

PART 3 - EXECUTION

3.1 INSTALLATION/APPLICATION/ERECTION

A. Wall Switches

1. Wall switches shall be mounted at a height as indicated in Section 260000, unless otherwise noted on the Contract Drawings.

2. Switches within finish spaces shall be white, while switches within unfinished spaces shall be gray.

B. Receptacles

1. Outlets shall be located as shown on the Contract Drawings. Where located in special interior finishes, they shall be properly centered. Boxes shall be of the type noted and accepted for the specific installation.
2. Furnish and install receptacle circuits where called for on the Contract Drawings and/or by these Specifications. Circuits shall be installed in conduit from panel to receptacle, with flush mounted boxes except as noted on the Contract Drawings.
3. Receptacles and lighting circuits shall not be combined on the same overcurrent device. For runs over 75 feet or for 30-amp receptacles, minimum wire size shall be AWG No. 10.
4. Receptacles for specific devices (i.e., clothes dryer), shall be rated at the correct voltage and amperage for that unit.
5. The minimum free length of conductor at each box for the connection of a fixture, switch or receptacle shall be 8 inches. All connections shall be made mechanically and electrically secure.
6. Receptacles shall be duplex type, rated at 20 amps, 125 volts, unless otherwise noted. Mounting height shall be as specified for low outlets in Section 260000. All receptacles shall be of the grounding type. Receptacles within finished spaces shall be white, while receptacles within unfinished spaces shall be gray.
7. Receptacles over workbenches or countertops or at medium or high mountings shall be mounted so that the grounding slot is below the neutral and hot. All other receptacles shall be mounted with the grounding slot above the neutral and hot.
8. Duplex receptacles that are located in wet locations and normally have something plugged in (i.e. kitchen), shall be weatherproof while in use. This requirement shall apply as indicated on the Drawings. To meet this requirement, appropriate safety outlet covers as manufactured by Taymac Corporation, Intermatic Guardian Series, or equal shall be utilized in these areas.

END OF SECTION 262726

SECTION 262816 – SAFETY SWITCHES

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. Provide horsepower-rated, quick-make, quick-break, safety switches provided with the number of poles and fuses as required.

PART 2 - PRODUCTS

2.1 ACCEPTABLE MANUFACTURERS/EQUIPMENT

A. Safety switches shall be as manufactured by Eaton, General Electric, Square D Company, or equal.

B. For 208- and 240-volt circuits, use general-duty type switches with Class R fuse clips. For 480-volt circuits, use heavy-duty type switches with Class R fuse clips.

C. Switches shall have arc shields, shall be of enclosed construction and fusible or non-fusible as indicated. Switches shall be rated for either 250-volt AC or 600-volt AC service as required.

D. Safety switches for all part-winding or two-speed motors requiring remote disconnect to be similar to Square D Series HLL-660, six-pole.

E. All switches shall be capable of interrupting locked rotor current of motor which it serves.

F. Enclosures shall be NEMA-1 for interior use and NEMA-3R for exterior use unless noted otherwise.

G. Provide dual-element Bussman type FRN (250 volt) or type FRS (600 volt) fuses for any fusible safety switch serving a motor circuit.

H. For non-motor loads, provide dual element Bussman type LPN (250 volt) or type LPS (600 volt).

I. All switches shall be capable of being padlocked in either the “On” or “Off” position.

J. Safety switches shall be provided with auxiliary contacts where indicated on Contract Drawings.

K. Safety switches shall be UL listed and shall conform to NEMA Standards. NEMA 4X enclosed safety switches where called for shall be stainless steel, or fiberglass.

L. NEMA 1 enclosed switches shall be phosphate coated as equivalent, code gauge steel with baked enamel finish.

M. Double throw fused/non fused safety switches where required, shall be as specified on the Contract Drawings.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Provide non-fusible switches at remote motor locations (raintight where required) as indicated on drawings.

B. Provide fusible disconnects at package A/C units, fused as specified on unit nameplate.

C. Mount switches to walls or to equipment enclosures with a minimum of 4 bolts using toggle anchors for masonry construction, Phillips “Red Head” anchors for poured concrete construction and bolts, jumbo washers, lock washers and nuts for equipment enclosure mounting.

D. All safety switches to be identified with nameplates per Section 260553.

END OF SECTION 262816

SECTION 264313 – SURGE PROTECTIVE DEVICES

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. The specified unit(s) shall provide effective high energy surge suppression, surge current diversion, and high frequency noise attenuation in all electrical modes for equipment connected downstream from the SPD unit. The unit(s) shall be connected in parallel with the facility's wiring system.

B. All products that are submitted according to these specifications will be required to meet this specification in its entirety. Any product that is submitted and does not comply with all parts of this specification will be subject to rejection.

C. Instrumentation Transient Suppressors

1. Transient suppressors are intended for use on all instrument control loops for power and signal protection on transmitters/receivers, etc., and shall be furnished and installed as specified in Division 40.

D. Type 1 SPD (Secondary Power Arrestors) (480, 240, or 240/120 Volts)

1. Type 1 Surge Protective Devices shall be furnished and installed on all control equipment supplied as outlined on the Contract Drawings.

E. Type 2 SPD (Surge Protective Device) (480, 240, or 240/120 Volts)

1. Type 2 Surge Protective Devices shall be furnished and installed in all Power Distribution Panels and on all equipment supplied having solid state components as the central control/monitoring device. These shall include, but not be limited to, computer systems, level control systems, and/or variable speed equipment. They shall be shown on the Drawings where required.

F. Service entrance SPD's shall be listed to be used as part of a UL master labeled lightning protection system.

1.2 SUBMITTALS

A. Provide UL1449 Fourth Edition listing documentation including Voltage Protection Ratings for all modes of protection, Short Circuit Current Rating (SCCR), Maximum Continuous Operating Voltage Rating (MCOV), and Nominal Discharge Current (I-n) Rating.

B. Indicate the type of internal or external fusing that is incorporated in the SPD system and what impact the fusing has on the performance of the device with respect to surge capacity and clamping levels.

C. Provide independent third party testing documentation demonstrating that the SPD is capable of surviving the specified maximum 8x20 μs surge current pulse without suffering performance degradation or more than 10 percent.

D. Submittals shall include shop drawings including manufacturer installation instruction manual and line drawings detailing dimensions and weight of enclosure, internal wiring diagram illustrating all modes of protection in each type of SPD required, wiring diagram showing all field connections and manufacturer's recommended wire and breaker sizes.

1.3 STANDARDS

A. Underwriters laboratories 1449 - (UL 1449 4th edition or current safety standard for surge protection devices)

1. Underwriters laboratories 1283 - (UL 1283 listed as an electromagnetic interference filter that provides noise attenuation)
2. Underwriters laboratories 67 - (UL 67 internal integration of SPD in panelboard)

B. National electrical code latest edition - (NEC article 285 SPD installation practice/NEC article 250 grounding)

1. NFPA-780 and CSA - (National Fire Protection Association)
2. ISO 9001:2000 - quality standard / military standards (mil-std 220a)

C. IEEE (Institute of Electrical and Electronic Engineering Inc.) C62.41.1 and C62.41.2 – 2002 rev. - (system shall be designed to meet C62.41)

1. IEEE C62.41.2-2002 section 7.2 long duration 10 x 1,000 μsec test to be compliant if the device exhibits less than 10 percent deviation from initial readings. Units must be tested to withstand and pass the 10 x 1,000 μsec test
2. IEEE C62.45 – 2002 rev. - (system shall be tested to meet the C62.45)
3. Category A & B - (0.5 μs x 100 kHz ring wave)
4. Category B3 bi-wave - (8 x 20 μs at 3,000 amperes and 1.2 x 50 μs at 6,000 volts)
5. Category C3 bi-wave - (8 x 20 μs at 10,000 amperes and 1.2 x 50 μs at 20,000 volts)

D. CBEMA (ITIC) and IEC - (Computer Business Equipment Manufacturers Association or Information Technology Industry Council and International Electrotechnical Commission define clamping voltage tolerance guidelines for sensitive equipment)

E. All manufacturers must comply with above listed standards and any current revisions of industry standards. All products that do not comply with current industry standards will not be accepted.

PART 2 - PRODUCTS

2.1 ACCEPTABLE MANUFACTURERS

A. Type 1 SPD (Secondary Power Arrestors)

1. Dale, General Electric, or equal.

B. Type 2 SPD (Surge Protection Devices)

1. Advanced Protection Technologies, Atlantic Scientific Corporation, Current Technology, LEA International, or equal.

2.2 EQUIPMENT

A. Type 1 SPD (Secondary Power Arrestors)

1. The arrestor shall be hermetically sealed with pre-ionized spark gap. The unit shall be capable of repeated overvoltages without significant change in breakdown level or insulation resistance. The arrestor shall be capable of mounting in any position and shall be capable of mounting through a box knockout with standard locknuts and shall be weatherproof.
2. Capacitance shall be less than 50 picofarads, and insulation resistance shall be at least 100 megohms. Maximum arc-over with 10 KV/micro second rise time pulse applied shall be 1,500 volts. The arrestor shall be capable of withstanding repeated application of 10 kiloampere current surges and extinguish power-follow current in 2 cycle or less. Maximum voltage between terminals shall be 2,500 volts when conducting 10 kiloampere current surges.
3. Operating temperature range shall be -40 degrees Celsius to +75 degrees Celsius.

B. Type 2 SPD (Surge Protection Devices)

1. The nominal operating voltage and configuration shall be as indicated on the contract drawings.
2. Declared Maximum Continuous Operating Voltage (MCOV) shall be greater than 115 percent of the nominal system operating voltage and in compliance with test and evaluation procedures outlined in the nominal discharge surge current test of UL1449 4th Edition.
3. SPD shall be UL labeled with 20kA Inominal (I-n) for compliance to UL 96A Lightning Protection Master Label and NFPA 780.
4. The system shall provide a noise filtering system capable of attenuating noise levels produced by electromagnetic interference and radio frequency interference. The system's filtering characteristics shall be expressed in decibels (dB) of attenuation per NEMA LS1 publication. The noise filtering system shall also be UL 1283 listed as an Electromagnetic Interference Filter.
5. SPD shall be UL labeled with 200kA Short Circuit Current Rating (SCCR). Fuse ratings shall not be considered in lieu of demonstrated withstand testing of SPD, per NEC 285.6.
6. Unit shall have not more than 10 percent deterioration or degradation of the UL1449 3rd Edition Voltage Protective Rating (VPR) due to repeated surges.
7. The unit shall be UL 1449 4th Edition Listed. The UL 1449 4th Edition voltage protection ratings (VPR) for the unit including integral disconnect shall be equal to or below the following values:

UL 1449 4th Edition Voltage Protection Ratings (VPR)				
System Voltage	Mode of Protection			
	L-N	L-G	N-G	L-L

UL 1449 4th Edition Voltage Protection Ratings (VPR)				
System Voltage	Mode of Protection			
	L-N	L-G	N-G	L-L
120/240	700	700	700	1200
120/208	700	700	700	1200
277/480	1200	1200	1000	2000

8. The maximum single-pulse surge current capacity per mode shall be verified through testing at an independent third party testing facility and shall be conducted per NEMA LS-1-1992 (R2000), paragraphs 2.2.9 and 3.9. The unit shall be tested in all modes at rated surge currents and all tested modes shall be from the same test sample. This test shall include all components of the system, including disconnects (if applicable), fusing, and monitoring as a completed assembly. Individual component testing, module testing only, or subsystem testing of the unit for compliance with this section will not be acceptable. Testing that causes damage to the device, fuse operation, or voltage clamping performance degradation by more than 10 percent is not acceptable.
9. The fusing elements must be capable of allowing the suppressor's rated single impulse current to pass through the suppressor at least one time without failure. The system shall be tested to 1,000 sequential per C62.45-2002 section B.38 referencing C62.41.1 and C62.41.2 category C3 combination wave transients. The category C3 combination wave is defined as a 1.2 x 50 microsecond wave at 20,000-volt open circuit voltage waveform and 8 x 20 microsecond wave at 10,000 ampere short circuit current waveform. In addition, the system components shall be tested repetitively 1,000 times testing based on an IEEE C62.33 (MOV test) and C62.35 (SAD test) without failure or degradation exceeding ±10 percent.
10. Service Entrance Suppressors

    a. Equipment shall Equipment shall be a multi-stage parallel protector rated for 480Y/277. See one line diagram and panelboard schedule to confirm voltages. The equipment's minimum surge current capacity shall be 200kA per mode (L-N, L-G, L-L and N-G).
    b. The system protection modules shall contain a technology that utilizes a symmetrical array of balanced metal oxide varistors (MOV). Each MOV will be individually coordinated to pass UL 1449.
    c. All primary transient paths shall utilize copper wire, aluminum bus bar and lugs of equivalent capacity to provide equal impedance interconnection between phases. No plug-in module or components shall be used in surge carrying paths.
    d. Each protection module shall have a visual indicator that signifies that the protection circuitry is online. The unit shall not be taken offline to verify integrity of system. Redundant status indicators shall be mounted on the front of the door that monitors the system protection circuitry (or be visible through the enclosure front).
    e. The system shall be modular with field replaceable modules. Modular units shall contain a minimum of one module per phase.
    f. Equipment shall utilize a NEMA 1 enclosure.

11. Panelboard Suppressors & Auxiliary Panel Suppressors

    a. Device shall meet all specification requirements for service entrance suppressors except as follows:

1) Equipment shall be a multi-stage parallel protector rated for 480Y/277 or 208Y/120. See one line diagram and panelboard schedule to confirm voltages. The equipment's minimum surge current capacity shall be 100kA per mode (L-N, L-G, L-L and N-G).
2) The system protection shall contain a technology that utilizes a symmetrical array of balanced metal oxide varistors (MOV). Each MOV will be individually coordinated to pass UL 1449. The unit shall be non-modular type.
3) Equipment shall utilize a NEMA 1 enclosure.

12. Accessories

a. Device Monitoring

1) As a minimum, device monitoring shall include: Audible alarm with alarm disable switch, surge counter, and two sets of Form C contacts for remote monitoring.

b. Integral Disconnect Switch

1) The unit shall include an integral safety interlocked disconnect located in the unit enclosure with an externally mounted manual operator. If fuses are included with this switch, the fusing shall not effectively lower the rating of the SPD unit.

PART 3 - EXECUTION

3.1 INSTALLATION/APPLICATION/ERECTION

A. Where the SPD unit is not specified with an integral safety/disconnect switch an appropriately sized disconnect switch or thermal magnetic breaker shall be installed before and in-line with the SPD. It shall be capable of electrically isolating the SPD from the electrical service for repair without interrupting service to the building. If a safety/disconnect switch is utilized the switch shall be rated for 600VAC. If fuses are included with this switch, the fusing shall not effectively lower the rating of the SPD unit and shall have a minimum interrupt rating of 200kAIC. Connection means utilizing breakers shall be sized at 60A/3P and 30A/3P respectively for service entrance/switchboard/switchgear and branch panelboard units unless otherwise recommended by manufacturer.

B. The specified SPD system shall be installed with #6 AWG minimum copper conductors tapped from the electrical power distribution system. The conductors are to be as short and straight as practically possible and shall not exceed 5 electrical feet from the power conductor(s) it is protecting for service entrance/switchboard/switchgear units and 1.5 electrical feet for branch panelboard units, and shall avoid any unnecessary or sharp bends. The input conductors are to be twisted together to reduce the SPD system inductance.

C. The SPD shall be installed following the SPD manufacturer's recommended practices and in compliance with these specifications and all applicable codes.

3.2 WARRANTY

A. Manufacturer shall provide a full 5-year limited warranty against failure or workmanship defects when installed in compliance to the manufacturer's written installation instructions, UL listing requirements and the National Electrical Code.

END OF SECTION 264313

SECTION 265100 - LED LIGHTING

PART 1 - GENERAL

1.1 SECTION INCLUDES

A. LED lamps

B. LED Dimming Drivers

C. Integral lighting controls.

1.2 REFERENCE STANDARDS

A. National Energy Policy Act of 2005, Public Law No. 109-58.

B. IESNA LM-63 - ANSI Approved Standard File Format for Electronic Transfer of Photometric Data and Related Information; 2002.

C. NFPA 70 - National Electrical Code; National Fire Protection Association; 2008.

D. IESNA LM-79-08 IESNA - Approved Method for Electrical and Photometric Measurements of Solid-State Lighting Products; 2008

E. IESNA LM-80-08 IESNA - Approved Method for Measuring Lumen Maintenance of LED Light Sources

F. IESNA TM-21-2011 – Projecting Long Term Lumen Maintenance of LED Light Sources

G. UL 1310 and 8750 – Light Emitting Diode (LED) Equipment for Use in Lighting Products

H. OSHA 29CFR1910.7 – luminaires shall be listed by national recognized testing laboratory approved by United Stated Department of Labor, Occupational Safety and Health Administration (OSHA)

I. ANSI C82.11 – Performance requirement for high frequency ballasts

J. ANSI/IES RP-16-10 – Nomenclature and definitions for illuminating engineering

K. ANSI E1.20 - Remote Device Management Over DMX512 Networks

L. ANSI C62.41 – Recommended practice in low power circuits

M. IEC 61347-1 – General and safety requirements for lamp control gear

N. IEC 61347-2-13 – Particular requirements for electronic control gear for LED modules

O. IEC 62384 - DC or AC supplied electronic control gear for LED modules – performance requirements

P. IEC 61000-3-2 - Harmonic current emissions

Q. IEC 61547 - EMC immunity requirements

R. IEC 62386-101/102/207 – Digital addressable lighting interface (DALI)

S. Federal Communications Commission (FCC) rules – Part 15 Class B: Radio Frequency Devices.

1. Commercial rated

T. Entertainment Services and Technology Association

1. ESTA E1.3 - Entertainment Technology - Lighting Control System - 0 to 10V Analog Control Protocol

1.3 DEFINITIONS

CALiPER	DOE Commercially Available LED Product Evaluation and Reporting program for the testing and monitoring of commercially available LED Luminaires and lights. http://www1.eere.energy.gov/buildings/ssl/m/caliper.html
CCT	Correlated Color Temperature: The temperature in units of kelvin of a blackbody whose chromaticity most nearly resembles that of the light source in question.
cd	Candela: SI Unit of luminous intensity, equal to 1 lumen per steradian (lm/sr)
Chromaticity	The property of color of light defined by the dominant or complementary wavelength and purity aspects of the color taken together
CRI	Color Rendering Index – measure of the degree of color shift of reference objects when illuminated by the light source as compared to a reference source of comparable color temperature.
fc	Footcandle: Unit of illuminance, equal to 1 lm/ft^2
L70	The extrapolated life in hours of the luminaire when the luminous output depreciates 30 percent from initial values.
LED	Light Emitting Diode
METS	Material Engineering and Testing Services of the Translab
MacAdam	Shape on the CIE chromaticity diagram that illustrates how much one can “stray” from the target before perceiving a difference from the target color
NEMA	National Electrical Manufacturers Association
NRTL	Nationally Recognized Testing Laboratory
NVLAP	National Voluntary Laboratory Accreditation Program - A program under the US DOE to accredit independent testing laboratories to qualify
PF	Power Factor - The ratio of the real power component to the total (complex) power component.
Rated power	Power consumption that the luminaire was designed and tested for at ambient temperature (70°F or 21°C)

RoHS	Compliance aims to restrict certain dangerous substances commonly used in electronic equipment, including Lead, Cadmium, Mercury and others.
SPD	Surge Protection Device - A subsystem or component(s) that can protect the unit against short duration voltage and current surges
SSL	Solid State Lighting
THD	Total Harmonic Distortion - The amount of higher frequency power on the power line.

1.4 SUBMITTALS

A. See Division 01 specifications for submittal procedures

B. Shop drawings: Clearly indicate luminaire type, name of the job, and Engineer. Contractor shall endeavor to submit all luminaire, driver and integral controls shop drawings at one time, in one package. Any re-submittals shall include all luminaire, driver and integral controls previously rejected or requiring further information. Specialty SSL, custom, or modified fixtures may be submitted as a separate package.

C. Shop Drawings: Reproductions of the contract drawings are not acceptable as shop drawing.

D. Product Data: Provide dimensions, ratings and specific catalog number and identification of items and accessories and performance data.

E. Shop Drawings: Indicate any dimensions and components for each luminaire that are not a standard product of the manufacturer.

F. Wiring Diagrams: As needed for special operation or interaction with other system(s)

G. Photometric Data: For substitutions, supply complete photometric data for the fixture, including optical performance, rendered by NVLAP approved laboratory developed according to the methods of the Illuminating Engineering Society of North America. Submit electronically, in IESNA LM-63 standard format.

H. Submit photometric data for all substitute luminaires. Photometric reports are not required from specified manufacturer.

I. Specification Sheets: If lacking sufficient detail to indicate compliance with contract documents, standard specification sheets will not be accepted. This includes, but is not limited to, luminaire type designation, manufacturer's complete catalog number, voltage, LED type, CCT, CRI, specific driver information, system efficacy, L70 life rating, and any modifications necessary to meet the requirements of the contract documents.

J. Substitutions shall include complete photometric data as outlined in paragraph G above, and point by point calculations for the specific conditions on the project. Samples shall be required for consideration of any substitutions and must be submitted in accordance with the terms outlined in paragraph K below.

K. Working Samples of all substitutions: Samples shall be 120 volt with cord and plug attached, and shall include specified LEDs and all modifications necessary to meet the requirements specified in the Contract Documents.

PART 2 - PRODUCT REQUIREMENTS

2.1 MANUFACTURERS

A. Approved Manufacturers: Provide products of firms regularly engaged in the manufacture of lighting fixtures and components of types and ratings required, whose products have been in satisfactory use in similar service for not less than 5 years. The manufacturer of the lighting fixtures and components shall comply with the provisions of the appropriate code and standards. All fixtures shall be pretested before shipping.

B. Conformance: Fixtures shall be manufactured in strict accordance with the Contract Drawings and Specifications.

C. Codes: Materials and installation shall be in accordance with the latest revision of the National Electrical Code and any applicable Federal, State, and local codes and regulations.

D. UL or CSA US Listing: All fixtures shall be manufactured in strict accordance with the appropriate and current requirements of the “Standards for Safety" to UL 8750 or others as they may be applicable. A listing shall be provided for each fixture type, and the appropriate label or labels shall be affixed to each fixture in a position concealing it from normal vie

E. Where applicable, luminaires shall be Designlight Consortium (DLC) listed unless approved otherwise by the Owner.

F. Specifications and scale drawings are intended to convey the salient features, function and character of the fixtures only, and do not undertake to illustrate or set forth every item or detail necessary for the work.

G. Basis of Design Manufacturers: Are listed on fixture schedule and specification.

H. Luminaire shall carry the Lighting Facts label, verified based on LM-79 test reports. www.lightingfacts.com

2.2 LUMINAIRES

A. Each luminaire shall consist of an assembly that utilizes LEDs as the light source. In addition, a complete luminaire shall consist of a housing, LED array, and electronic driver (power supply) and integral controls as per this specification.

B. Each luminaire shall be designed to operate at an average operating temperature of 25°C.

C. The operating temperature range shall be 0°C to +25°C for interior luminaires in conditioned buildings. All other locations shall be rated for -20°C for cold weather operation.

D. Each luminaire shall meet all parameters of this specification throughout the minimum operational life of 50,000 hours when operated at the average operating temperature (see 2.2.2).

E. Nominal luminaire dimensions:

1. As specified in lighting fixture schedule

F. Luminaire Construction:

1. As specified in lighting fixture schedule.
2. The luminaire shall be a single, self-contained device, not requiring on-site assembly for installation. The power supply and circuit board for the luminaire shall be integral to the unit.

G. Led Sources

1. LED's shall be manufactured by a manufacturer who has produced commercial LEDs for a minimum of five (5) years.
2. Lumen Output – minimum initial delivered lumen output of the luminaire shall be as follows for the lumens exiting the luminaire in the 0-360 degree zone - as measured by IESNA Standard LM-79-08 in an accredited lab. Exact tested lumen output shall be clearly noted on the shop drawings.
3. Lumen output shall not decrease by more than 20% over the minimum operational life of 50,000 hours at the rated ambient operating temperature.
4. Individual LEDs shall be connected such that a catastrophic loss or the failure of one LED will not result in the loss of the entire luminaire.
5. LED Boards shall be suitable for field maintenance and have plug-in connectors. LED boards shall be upgradable.
6. Light Color/Quality-

    a. Correlated Color temperature (CCT) range as per specification, between 3000K, 3500K and 4000K shall be correlated to chromaticity as defined by the absolute (X,Y) coordinates on the 2-D CIE chromaticity chart.
    b. Color shift over 6,000 hours shall be <0.007 change in u' v' as demonstrated in IES LM80 report.
    c. The color rendition index (CRI) shall be 80 or greater.
    d. LED boards to be tested for color consistency and shall be within a space of 2.5 MacAdam ellipses on the CIE chromaticity chart.

H. Power Supply and Drive

1. Driver: Acceptable manufacturer: eldoLED, Sylvania, or Philips that meet or exceed the criteria herein:
2. Ten-year expected life while operating at maximum case temperature and 90 percent non-condensing relative humidity.
3. Driver should be UL Recognized under the component program and shall be modular for simple field replacement.
4. Electrical characteristics: 120 – 277 volt, UL Listed, CSA Certified, Sound Rated A+. Driver shall be > 80% efficient at full load across all input voltages. Input wires shall be 18AWG solid copper minimum.
5. Dimming: Driver shall be suitable for step dimming.

6. Dimming shall be controlled by a dual wall switches.
7. Driver shall include ability to provide no light output when the control signal drops below 0.5 V, and shall consume 0.5 watts or less in this standby.
8. Driver shall be capable of configuring a linear or logarithmic dimming curve.
9. Drivers shall track evenly across multiple fixtures at all light levels and shall have an input signal to output light level that allows smooth adjustment over the entire dimming range regardless of the controller type.
10. Flicker: Driver and luminaire electronics shall deliver illumination that is free from objectionable flicker as measured by flicker index (ANSI/IES RP-16-10). At all points within the dimming range from 100-0.1 percent luminaire shall have:
11. Less than 1 percent flicker index at frequencies below 120 Hz.
12. Less than 12 percent flicker index at 120 Hz and shall not increase at greater than 0.1 percent per Hz to a maximum of 80 percent flicker index at 800Hz.
13. Driver disconnects shall be provided where required to comply with codes.
14. The electronics/power supply enclosure shall be internal to the luminaire and be accessible per UL requirements
15. The surge protection which resides within the driver shall protect the luminaire from damage and failure for transient voltages and currents as defined in ANSI/IEEE C64.41 2002 for Location Category A, where failure does not mean a momentary loss of light during the transient event.

I. Electrical

1. Efficiency shall be:

   a. A minimum of 110 lumens per watt.

2. Operation Voltage - The luminaire shall operate from at 60 HZ ±3 HZ AC line over a voltage ranging from 120 VAC to 277 VAC. The fluctuations of line voltage of plus or minus 10% shall have no visible effect on the luminous output.
3. Power Factor: The luminaire shall have a power factor of 90% or greater at all standard operating voltages and full luminaire output.
4. THD: Total harmonic distortion (current and voltage) induced into an AC power line by a luminaire shall not exceed 20 percent at any standard input voltage and meet ANSI C82.11 maximum allowable THD requirements.
5. Surge Suppression: The luminaire shall include surge protection to withstand high repetition noise and other interference. Withstand up to a 1,000-volt surge without impairment of performance as defined by ANSI C62.41 Category A. To reduce false circuit breaker tripping due to turn on inrush, the following statement ensures that electronic dimming driver will meet NEMA inrush recommendations.
6. RF Interference: The luminaire and associated on-board circuitry must meet Class A emission limits referred in Federal Communications Commission (FCC) Title 47, Subpart B, Section 15 Non-Consumer requirements for EMI/RFI emissions.
7. Driver must support automatic adaptation, allowing for future luminaire upgrades and enhancements and deliver improved performance:
8. Adjustment of forward LED voltage, supporting 3V through 60V.
9. Adjustment of LED current from 200mA to 1.05A at the 100 percent control input point in increments of 1mA
10. Adjustment for operating hours to maintain constant lumens (within 5 percent) over the 50,000-hour design life of the system, and deliver up to 20 percent energy savings early in the life cycle.

11. Electrical connections between normal power and driver must be modular utilizing a snap fit connector. All electrical components must be easily accessible after installation and be replaceable without removing the fixture from the ceiling.
12. All electrical components shall be RoHS compliant.

J. Emergency Battery Pack

1. Shall be factory installed and provide 1400 lumens of light output for 90 minutes.

K. Photometric Requirements

1. Luminaire performance shall be tested as described herein.

    a. Luminaire performance shall be judged against the specified minimum illuminance in the specified pattern for a particular application.
    b. Luminaire lighting performance shall be adjusted (depreciated) for the minimum life expectancy.
    c. The performance shall be adjusted (depreciated) by using the LED manufacturer's data or the data from the IESNA Standard TM-21 test report, which ever one results in a higher level of lumen depreciation.
    d. The ratio of the peak-to-zenith maximum candela ratios shall be – 1.94:1 @ 127.5 degrees.

2. The luminaire may be determined to be compliant photometrically, if:

    a. The initial minimum illuminance level is achieved in 100% of the area of the specified lighting pattern
    b. The measurements shall be calibrated to standard photopic calibrations.

L. Thermal Management

1. The thermal management (of the heat generated by the LEDs) shall be of sufficient capacity to assure proper operation of the luminaire over the expected useful life.
2. The LED manufacturer's maximum junction temperature for the expected life shall not be exceeded at the average operating ambient.
3. The LED manufacturer's maximum junction temperature for the catastrophic failure shall not be exceeded at the maximum operating ambient.
4. The luminaire shall have an UL rating.
5. The Driver manufacturer's maximum case temperature shall not be exceeded at the maximum operating ambient. Thermal management shall be passive by design. The use of fans or other mechanical devices shall not be allowed.

M. Optics

1. Optics shall consist of a high-performance lens, diffusers and metal reflector.
2. Optics shall eliminate source image.

N. Luminaire Identification

1. Each luminaire shall have the manufacturer's name, trademark, model number, serial number, date of manufacture (month-year), and lot number as identification permanently marked inside the each unit and the outside of each packaging box.
2. The following operating characteristics shall be permanently marked inside each unit: rated voltage and rated power in Watts and Volt-Amperes.

O. Quality Assurance

1. The luminaires shall be manufactured in accordance with a manufacturer quality assurance (QA) program. The QA program shall include two types of quality assurance: (1) design quality assurance and (2) production quality assurance. The production quality assurance shall include statistically controlled routine tests to ensure minimum performance levels of the modules built to meet this specification. These tests shall include: CCT, CRI, Lumen output and wattage. Tests shall be recorded, analyzed and maintained for future reference.
2. LED luminaire designs not satisfying design qualification testing and the production quality assurance testing performance requirements described below shall not be labeled, advertised, or sold as conforming to this specification.

P. Design Qualification Testing

1. Design Qualification Testing shall be performed by a National Voluntary Laboratory Accreditation Program (NVLAP) testing facility. Such testing may be performed by the manufacturer or an independent testing lab hired by the manufacturer on new luminaire designs, and when a major design change has been implemented on an existing design. A major design change is defined as a design change (electrical or physical) which changes any of the performance characteristics of the luminaire, results in a different circuit configuration for the power supply or changes the layout of the individual LED's in the module.
2. A quantity of two units for each design shall be submitted for Design Qualification Testing.
3. Product submittals shall be accompanied by product specification sheets or other documentation that includes the designed parameters as detailed in this specification. These parameters include (but not limited to):

    a. Maximum power in Watts
    b. L80 in hours, when extrapolated for the worse case operating temperature (section 2.2.3). TM21 report shall be submitted to demonstrate this.
    c. Product submittals shall be accompanied by performance data that is derived in accordance with appropriate IESNA testing standards and tested in a laboratory that is NVLAP accredited for Energy Efficient Lighting Products.

4. Luminaire shall be tested per IESNA LM 79-08.

2.3 WARRANTY

A. The manufacturer shall provide a single source, 5-year limited warranty against loss of performance and defects in materials and workmanship for all components of the luminaire. Warranty is from the time of acceptance of the Luminaires. All warranty documentation shall be provided to customer prior to the first shipment.

B. Provide manufacturer's warranty covering 5 years on drivers from date of purchase. Refer to http://www.eldoled.com/termsandconditionsus for detailed information.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install fixtures securely, in a neat and workmanlike manner, as specified in NECA 500 and 501.

B. Install all required hardware and mounting brackets to secure luminaires to structure per local code requirements and the requirements of these documents.

C. Fixtures shall be rigidly mounted against the surface of the ceiling unless otherwise noted on the Contract Drawings. Conduit runs to and between fixtures shall be rigid metallic type. Use of flexible conduit for connection to fixtures is prohibited, except where concealed above a suspended ceiling.

D. Similar fixtures in each room or area shall be installed with bottom of fixtures at same elevation, unless otherwise noted.

E. Outlets shall be as specified herein and shall be suitable for the installation conditions encountered.

F. Flexible fixture hangers shall be used for all pendant-mounted fixtures.

G. Conduit run in areas with hung ceilings shall be installed in the space above the hung ceiling as close to the structure as possible. Conduits and junction boxes shall be supported from the structure.

H. All ceiling grid mounted luminaires shall be installed to fit the actual field layout of the grid system.

I. No luminaires shall be hung or installed until after painting is completed, however, temporary lighting shall be provided by the Contractor. Fixtures in suspended ceilings shall be fastened to the main tees of the ceiling grid for seismic considerations. Also, luminaires shall be supported from the building structure via ceiling wires (independent of the ceiling support wires) from opposite corners of the fixtures.

3.2 FIELD QUALITY CONTROL

A. Perform field inspection, testing, and adjusting in accordance with the specifications.

B. Operate each luminaire after installation and connection. Inspect for improper connections and operation.

C. Test and calibrate all controls associated with luminaires, i.e. integral photocells and occupancy sensors.

3.3 CLEANING

A. Clean electrical parts to remove conductive and deleterious materials.

B. Remove dirt and debris from lens and enclosures

1. For cleaning acrylic lenses or diffusers, use a feather duster or dry cotton cheesecloth to rid the lens/diffuser of any minor dust. For fingerprints, smudges, or other dirt present, use an ammonia-based cleaner (such as Windex) and wipe carefully with cotton cheesecloth (so as to avoid injury from any prismatic texture of the lens).
2. Job site contamination may not necessarily be removed using the above recommendations. In that case the lens would need to be replaced.

C. Clean photometric control surfaces as recommended by manufacturer.

3.4 CLOSEOUT ACTIVITIES

A. Replace any luminaire components or associated controls which does not function per specifications.

END OF SECTION 265100

SECTION 265110 - LED EXTERIOR LIGHTING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

1. Exterior luminaires with LED lamp and drivers.
2. Poles and accessories.

1.3 DEFINITIONS

A. CCT: Correlated color temperature.

B. CRI: Color-rendering index.

C. LER: Luminaire efficacy rating.

D. Luminaire: Complete lighting fixture, including ballast housing if provided.

E. Pole: Luminaire support structure, including tower used for large area illumination.

F. Standard: Same definition as "Pole" above.

1.4 STRUCTURAL ANALYSIS CRITERIA FOR POLE SELECTION

A. Dead Load: Weight of luminaire and its horizontal and vertical supports, lowering devices, and supporting structure, applied as stated in AASHTO LTS-4-M.

B. Live Load: Single load of 500 lb/f, distributed as stated in AASHTO LTS-4-M.

C. Ice Load: Load of 3 lbf/sq. ft. applied as stated in AASHTO LTS-4-M Ice Load Map.

D. Wind Load: Pressure of wind on pole and luminaire and banners and banner arms, calculated and applied as stated in AASHTO LTS-4-M.

1. Basic wind speed for calculating wind load for poles 50 feet high or less is 115 mph.

a. Wind Importance Factor: 1.0
b. Minimum Design Life: 25 years
c. Velocity Conversion Factors: 1.0

1.5 ACTION SUBMITTALS

A. Product Data: For each luminaire, pole, and support component, arranged in order of lighting unit designation. Include data on features, accessories, finishes, and the following:

1. Physical description of luminaire, including materials, dimensions, effective projected area, and verification of indicated parameters.
2. Details of attaching luminaires and accessories.
3. Details of installation and construction.
4. Luminaire materials.
5. Photometric data based on laboratory tests of each luminaire type, complete with indicated LED lamps, drivers, and accessories.

    a. Testing Agency Certified Data: For indicated luminaires, photometric data shall be certified by a qualified independent testing agency. Photometric data for remaining luminaires shall be certified by manufacturer.
    b. Manufacturer Certified Data: Photometric data shall be certified by manufacturer's laboratory with a current accreditation under the National Voluntary Laboratory Accreditation Program for Energy Efficient Lighting Products.

6. Drivers, including energy-efficiency data.
7. LED lamps, including life, output, CCT, CRI, lumens, and energy-efficiency data.
8. Materials, dimensions, and finishes of poles.
9. Means of attaching luminaires to supports, and indication that attachment is suitable for components involved.
10. Anchor bolts for poles.
11. Manufactured pole foundations.

B. Shop Drawings: Include plans, elevations, sections, details, and attachments to other work.

1. Detail equipment assemblies and indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
2. Anchor-bolt templates keyed to specific poles and certified by manufacturer.

1.6 INFORMATIONAL SUBMITTALS

A. Pole and Support Component Certificates: Signed by manufacturers of poles, certifying that products are designed for indicated load requirements in AASHTO LTS-4-M and that load imposed by luminaire and attachments has been included in design.

B. Qualification Data: For qualified agencies providing photometric data for lighting fixtures.

C. Field quality-control reports.

1.7 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For luminaires and poles to include in emergency, operation, and maintenance manuals.

1.8 QUALITY ASSURANCE

A. Luminaire Photometric Data Testing Laboratory Qualifications: Provided by manufacturers' laboratories that are accredited under the National Volunteer Laboratory Accreditation Program for Energy Efficient Lighting Products.

B. Luminaire Photometric Data Testing Laboratory Qualifications: Provided by an independent agency, with the experience and capability to conduct the testing indicated, that is an NRTL as defined by OSHA in 29 CFR 1910.

C. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

D. Comply with IEEE C2, "National Electrical Safety Code."

E. Comply with NFPA 70.

1.9 DELIVERY, STORAGE, AND HANDLING

A. Package aluminum poles for shipping according to ASTM B 660.

B. Store poles on decay-resistant-treated skids at least 12 inches above grade and vegetation. Support poles to prevent distortion and arrange to provide free air circulation.

C. Retain factory-applied pole wrappings on metal poles until right before pole installation. For poles with nonmetallic finishes, handle with web fabric straps.

1.10 WARRANTY

A. The manufacturer shall provide a warranty against loss of performance and defects in materials and workmanship for the Luminaires for a period of 5 years after acceptance of the Luminaires. Warranty shall cover all components comprising the luminaire. All warranty documentation shall be provided to customer prior to the first shipment.

B. Special Warranty: Manufacturer's standard form in which manufacturer agrees to repair or replace products that fail in materials or workmanship; that corrode; or that fade, stain, perforate, erode, or chalk due to effects of weather or solar radiation within specified warranty period. Manufacturer may exclude lightning damage, hail damage, vandalism, abuse, or unauthorized repairs or alterations from special warranty coverage.

1. Warranty Period for Poles: Repair or replace lighting poles and standards that fail in finish, materials, and workmanship within manufacturer's standard warranty period, but not less than three years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Base Bid Manufacturers: Are listed on fixture schedule. Manufacturers listed without accompanying catalog numbers are responsible for meeting the quality standards and photometric distribution set by the specified product.

2.2 GENERAL REQUIREMENTS FOR LUMINAIRES

A. Luminaires shall comply with UL 1598 and be listed and labeled for installation in findwet locations by an NRTL acceptable to authorities having jurisdiction.

1. LER Tests Incandescent Fixtures: Where LER is specified, test according to NEMA LE 5A.
2. LER Tests Fluorescent Fixtures: Where LER is specified, test according to NEMA LE 5 and NEMA LE 5A as applicable.
3. LER Tests HID Fixtures: Where LER is specified, test according to NEMA LE 5B.

B. Luminaires shall have the International Dark-Skys Association seal of approval.

C. Lateral Light Distribution Patterns: Comply with IESNA RP-8 for parameters of lateral light distribution patterns indicated for luminaires.

D. Metal Parts: Free of burrs and sharp corners and edges.

E. Sheet Metal Components: Corrosion-resistant aluminum unless otherwise indicated. Form and support to prevent warping and sagging.

F. Housings: Rigidly formed, weather- and light-tight enclosures that will not warp, sag, or deform in use. Provide filter/breather for enclosed luminaires.

G. Doors, Frames, and Other Internal Access: Smooth operating, free of light leakage under operating conditions, and designed to permit relamping without use of tools. Designed to prevent doors, frames, lenses, diffusers, and other components from falling accidentally during relamping and when secured in operating position. Doors shall be removable for cleaning or replacing lenses.

H. Exposed Hardware Material: Stainless steel.

I. Plastic Parts: High resistance to yellowing and other changes due to aging, exposure to heat, and UV radiation.

J. Light Shields: Metal baffles, factory installed and field adjustable, arranged to block light distribution to indicated portion of normally illuminated area or field.

K. Reflecting surfaces shall have minimum reflectance as follows unless otherwise indicated:

1. White Surfaces: 85 percent.
2. Specular Surfaces: 83 percent.

3. Diffusing Specular Surfaces: 75 percent.

L. Lenses and Refractors Gaskets: Use heat- and aging-resistant resilient gaskets to seal and cushion lenses and refractors in luminaire doors.

M. Luminaire Finish: Manufacturer's standard paint applied to factory-assembled and -tested luminaire before shipping. Where indicated, match finish process and color of pole or support materials.

N. Factory-Applied Finish for Steel Luminaires: Comply with NAAMM's "Metal Finishes Manual for Architectural and Metal Products" for recommendations for applying and designating finishes.

1. Surface Preparation: Clean surfaces to comply with SSPC-SP 1, "Solvent Cleaning," to remove dirt, oil, grease, and other contaminants that could impair paint bond. Grind welds and polish surfaces to a smooth, even finish. Remove mill scale and rust, if present, from uncoated steel, complying with SSPC-SP 5/NACE No. 1, "White Metal Blast Cleaning," or SSPC-SP 8, "Pickling."
2. Exterior Surfaces: Manufacturer's standard finish consisting of one or more coats of primer and two finish coats of high-gloss, high-build polyurethane enamel.
3. Color: As selected by Architect from manufacturer's full range.

O. Factory-Applied Finish for Aluminum Luminaires: Comply with NAAMM's "Metal Finishes Manual for Architectural and Metal Products" for recommendations for applying and designating finishes.

1. Class I, Color Anodic Finish: AA-M32C22A42/A44 (Mechanical Finish: medium satin; Chemical Finish: etched, medium matte; Anodic Coating: Architectural Class I, integrally colored or electrolytically deposited color coating 0.018 mm or thicker) complying with AAMA 611.

    a. Color: As selected by Architect from manufacturer's full range.

P. Factory-Applied Labels: Comply with UL 1598. Include recommended LED lamps and drivers. Labels shall be located where they will be readily visible to service personnel, but not seen from normal viewing angles when lamps are in place.

2.3 LED LUMINAIRES

A. LED Lamps

1. LED’s shall be manufactured by Nichia, Samsung, Osram or equal.

    a. Lumen Output – minimum initial lumen output of each luminaire shall be as specified in light fixture schedule.

2. High-efficacy LEDs mounted to metal-core circuit boards to maximize heat dissipation and promote long life 100,000 hrs at 40°C, L70.
3. Individual LEDs shall be connected such that a catastrophic loss or the failure of one LED will not result in the loss of the entire luminaire.

4. LED Boards shall be suitable for field maintenance or service with plug-in connectors. LED boards shall be upgradable.
5. Light Color/Quality

    a. Correlated Color temperature (CCT) shall be 4000K, unless otherwise indicated.
    b. The color rendition index (CRI) shall be 67 or greater.

B. Drivers

1. Class 1 electronic driver designed to provide a power factor >90%, THD <20%, with an expected life of 100,000 hours with <1% failure rate.
2. Easily-serviceable surge protection device meets a minimum Category C Low operation (per ANSI/IEEE C62.41.2).
3. Driver shall be > 80% efficient at full load across all input voltages. Input wires shall be 18AWG solid copper minimum.
4. Driver shall be UL listed.
5. Maximum stand-by power shall be 1 Watt.
6. Driver disconnect shall be provided where required to comply with codes. The electronics/power supply enclosure shall be internal to the luminaire and be accessible per UL requirements.
7. IP66 rated.

C. Electrical

1. Operation Voltage - The luminaire shall operate from a 50 or 60 HZ ±3 HZ AC line over a voltage ranging from 120 VAC to 277 VAC. The fluctuations of line voltage shall have no visible effect on the luminous output.
2. Power Factor: The luminaire shall have a power factor of 90% or greater at all standard operating voltages and full luminaire output.
3. THD: Total harmonic distortion (current and voltage) induced into an AC power line by a luminaire shall not exceed 20 percent at any standard input voltage.
4. Surge Suppression: The luminaire shall include surge protection to withstand high repetition noise and other interference.
5. RF Interference: The luminaire and associated on-board circuitry must meet Class A emission limits referred in Federal Communications Commission (FCC) Title 47, Subpart B, Section 15 Non-Consumer requirements for EMI/RFI emissions.
6. Electrical connections between normal power and driver must be modular utilizing a snap fit connector. All electrical components must be easily accessible after installation and be replaceable without removing the fixture from the ceiling.
7. All electrical components shall be RoHS compliant.

D. Photometric Requirements

1. Luminaire performance shall be tested as described herein.

    a. Luminaire performance shall be judged against the specified minimum illuminance in the specified pattern for a particular application.
    b. Luminaire lighting performance shall be adjusted (depreciated) for the minimum life expectancy.

c. The performance shall be adjusted (depreciated) by using the LED manufacturer's data or the data from the IESNA Standard TM-21 test report, which ever one results in a higher level of lumen depreciation.

2. The luminaire may be determined to be compliant photometrically, if the initial minimum illuminance level is achieved in 100% of the area of the specified lighting pattern.
3. The measurements shall be calibrated to standard photopic calibrations.

E. Thermal Management

1. The thermal management (of the heat generated by the LEDs) shall be of sufficient capacity to assure proper operation of the luminaire over the expected useful life.
2. The LED manufacturer's maximum junction temperature for the expected life shall not be exceeded at the average operating ambient.
3. The LED manufacturer's maximum junction temperature for the catastrophic failure shall not be exceeded at the maximum operating ambient.
4. The luminaire shall have an UL IC rating.
5. The Driver manufacturer's maximum case temperature shall not be exceeded at the maximum operating ambient. Thermal management shall be passive by design. The use of fans or other mechanical devices shall not be allowed.

2.4 GENERAL REQUIREMENTS FOR POLES AND SUPPORT COMPONENTS

A. Structural Characteristics: Comply with AASHTO LTS-4-M.

1. Wind-Load Strength of Poles: Adequate at indicated heights above grade without failure, permanent deflection, or whipping in steady winds of speed indicated in "Structural Analysis Criteria for Pole Selection" Article.
2. Strength Analysis: For each pole, multiply the actual equivalent projected area of luminaires and brackets by a factor of 1.1 to obtain the equivalent projected area to be used in pole selection strength analysis.

B. Luminaire Attachment Provisions: Comply with luminaire manufacturers' mounting requirements. Use stainless-steel fasteners and mounting bolts unless otherwise indicated.

C. Mountings, Fasteners, and Appurtenances: Corrosion-resistant items compatible with support components.

1. Materials: Shall not cause galvanic action at contact points.
2. Anchor Bolts, Leveling Nuts, Bolt Caps, and Washers: Hot-dip galvanized after fabrication unless otherwise indicated.
3. Anchor-Bolt Template: Plywood or steel.

D. Handhole: Oval-shaped, with minimum clear opening of 2-1/2 by 5 inches, with cover secured by stainless-steel captive screws.

E. Concrete Pole Foundations: Cast in place, with anchor bolts to match pole-base flange. Concrete, reinforcement, and formwork are specified in Division 02 – Concrete.

PART 3 - EXECUTION

3.1 LUMINAIRE INSTALLATION

A. Install lamps in each luminaire.

B. Fasten luminaire to indicated structural supports.

1. Use fastening methods and materials selected to resist seismic forces defined for the application and approved by manufacturer.

C. Adjust luminaires that require field adjustment or aiming.

3.2 POLE INSTALLATION

A. Alignment: Align pole foundations and poles for optimum directional alignment of luminaires and their mounting provisions on the pole.

B. Clearances: Maintain the following minimum horizontal distances of poles from surface and underground features unless otherwise indicated on Drawings:

1. Fire Hydrants and Storm Drainage Piping: 60 inches.
2. Water, Gas, Electric, Communication, and Sewer Lines: 10 feet.
3. Trees: 15 feet from tree trunk.

C. Concrete Pole Foundations: Set anchor bolts according to anchor-bolt templates furnished by pole manufacturer. Concrete materials, installation, and finishing requirements are specified in Division02 – Concrete.

D. Foundation-Mounted Poles: Mount pole with leveling nuts, and tighten top nuts to torque level recommended by pole manufacturer.

1. Use anchor bolts and nuts selected to resist seismic forces defined for the application and approved by manufacturer.
2. Grout void between pole base and foundation. Use nonshrink or expanding concrete grout firmly packed to fill space.
3. Install base covers unless otherwise indicated.
4. Use a short piece of 1/2-inch-diameter pipe to make a drain hole through grout. Arrange to drain condensation from interior of pole.

E. Poles and Pole Foundations Set in Concrete Paved Areas: Install poles with minimum of 6-inch-wide, unpaved gap between the pole or pole foundation and the edge of adjacent concrete slab. Fill unpaved ring with pea gravel to a level 1 inch below top of concrete slab.

F. Raise and set poles using web fabric slings (not chain or cable).

3.3 CORROSION PREVENTION

A. Aluminum: Do not use in contact with earth or concrete. When in direct contact with a dissimilar metal, protect aluminum by insulating fittings or treatment.

B. Steel Conduits: Comply with Section 260533 "Raceways." In concrete foundations, wrap conduit with 0.010-inch-thick, pipe-wrapping plastic tape applied with a 50 percent overlap.

3.4 GROUNDING

A. Ground metal poles and support structures according to Section 260526 "Secondary Grounding."

1. Install grounding electrode for each pole unless otherwise indicated.
2. Install grounding conductor pigtail in the base for connecting luminaire to grounding system.

3.5 FIELD QUALITY CONTROL

A. Inspect each installed fixture for damage. Replace damaged fixtures and components.

B. Illumination Observations: Verify normal operation of lighting units after installing luminaires and energizing circuits with normal power source.

C. Verify operation of photoelectric controls.

D. Prepare a written report of tests, inspections, observations, and verifications indicating and interpreting results. If adjustments are made to lighting system, retest to demonstrate compliance with standards.

END OF SECTION 265110

DIVISION 27

COMMUNICATIONS

SECTION 270526 - GROUNDING AND BONDING FOR COMMUNICATIONS SYSTEMS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

1. Grounding conductors.
2. Grounding connectors.
3. Grounding busbars.
4. Grounding rods.
5. Grounding labeling.

1.3 DEFINITIONS

A. BCT: Bonding conductor for telecommunications.

B. TGB: Telecommunications grounding busbar.

C. TMGB: Telecommunications main grounding busbar.

D. Service Provider: The operator of a service that provides telecommunications transmission delivered over access provider facilities.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Sustainable Design Submittals:

1. Product Data: For each conductor and cable indicating lead content.

1.5 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For grounding to include in emergency, operation, and maintenance manuals.

1. In addition to items specified in Section 017823 "Operation and Maintenance Data," include the following:

a. Result of the ground-resistance test, measured at the point of BCT connection.
b. Result of the bonding-resistance test at each TGB and its nearest grounding electrode.

PART 2 - PRODUCTS

2.1 SYSTEM DESCRIPTION

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

B. Comply with UL 467 for grounding and bonding materials and equipment.

C. Comply with TIA-607-B.

2.2 CONDUCTORS

A. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

1. Harger Lightning & Grounding.
2. Panduit Corp.
3. TE Connectivity Ltd.

B. Comply with UL 486A-486B.

C. Insulated Conductors: Stranded copper wire, green or green with yellow stripe insulation, insulated for 600 V, and complying with UL 83.

1. Ground wire for custom-length equipment ground jumpers shall be No. 6 AWG, 19-strand, UL-listed, Type THHN wire.
2. Lead Content: Less than 300 parts per million.

D. Cable Tray Grounding Jumper:

1. Not smaller than No. 6 AWG and not longer than 12 inches. If jumper is a wire, it shall have a crimped grounding lug with two holes and long barrel for two crimps. If jumper is a flexible braid, it shall have a one-hole ferrule. Attach with grounding screw or connector provided by cable tray manufacturer.

E. Bare Copper Conductors:

1. Solid Conductors: ASTM B 3.
2. Stranded Conductors: ASTM B 8.
3. Tinned Conductors: ASTM B 33.
4. Bonding Cable: 28 kcmils, 14 strands of No. 17 AWG conductor, and 1/4 inch in diameter.
5. Bonding Conductor: No. 4 or No. 6 AWG, stranded conductor.

6. Bonding Jumper: Tinned-copper tape, braided conductors terminated with two-hole copper ferrules; 1-5/8 inches wide and 1/16 inch thick.

2.3 CONNECTORS

A. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

1. Burndy; Part of Hubbell Electrical Systems.
2. Chatsworth Products, Inc.
3. Harger Lightning & Grounding.
4. Panduit Corp.
5. TE Connectivity Ltd.

B. Irreversible connectors listed for the purpose. Listed by an NRTL as complying with NFPA 70 for specific types, sizes, and combinations of conductors and other items connected. Comply with UL 486A-486B.

C. Compression Wire Connectors: Crimp-and-compress connectors that bond to the conductor when the connector is compressed around the conductor. Comply with UL 467.

1. Electroplated tinned copper, C and H shaped.

D. Busbar Connectors: Cast silicon bronze, solderless compression-type, mechanical connector; with a long barrel and two holes spaced on 5/8- or 1-inch centers for a two-bolt connection to the busbar.

E. Welded Connectors: Exothermic-welding kits of types recommended by kit manufacturer for materials being joined and installation conditions.

2.4 GROUNDING BUSBARS

A. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

1. Chatsworth Products, Inc.
2. Harger Lightning & Grounding.
3. Panduit Corp.

B. TMGB: Predrilled, wall-mounted, rectangular bars of hard-drawn solid copper, 1/4 by 4 inches in cross section, length as indicated on Drawings. The busbar shall be NRTL listed for use as TMGB and shall comply with TIA-607-B.

1. Predrilling shall be with holes for use with lugs specified in this Section.
2. Mounting Hardware: Stand-off brackets that provide a 4-inch clearance to access the rear of the busbar. Brackets and bolts shall be stainless steel.
3. Stand-off insulators for mounting shall be Lexan or PVC. Comply with UL 891 for use in 600-V switchboards, impulse tested at 5000 V.

C. TGB: Predrilled rectangular bars of hard-drawn solid copper, 1/4 by 2 inches in cross section, length as indicated on Drawings. The busbar shall be for wall mounting, shall be NRTL listed as complying with UL 467, and shall comply with TIA-607-B.

1. Predrilling shall be with holes for use with lugs specified in this Section.
2. Mounting Hardware: Stand-off brackets that provide at least a 2-inch clearance to access the rear of the busbar. Brackets and bolts shall be stainless steel.
3. Stand-off insulators for mounting shall be Lexan or PVC. Comply with UL 891 for use in 600-V switchboards, impulse tested at 5000 V.

D. Rack and Cabinet Grounding Busbars: Rectangular bars of hard-drawn solid copper, accepting conductors ranging from No. 14 to No. 2/0 AWG, NRTL listed as complying with UL 467, and complying with TIA-607-B. Predrilling shall be with holes for use with lugs specified in this Section.

1. Cabinet-Mounted Busbar: Terminal block, with stainless-steel or copper-plated hardware for attachment to the cabinet.
2. Rack-Mounted Horizontal Busbar: Designed for mounting in 19- or 23-inch equipment racks. Include a copper splice bar for transitioning to an adjoining rack, and stainless-steel or copper-plated hardware for attachment to the rack.
3. Rack-Mounted Vertical Busbar: 72 or 36 inches long, with stainless-steel or copper-plated hardware for attachment to the rack.

2.5 IDENTIFICATION

A. Comply with requirements for identification products in Section 270553 "Identification for Communications Systems."

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine the ac grounding electrode system and equipment grounding for compliance with requirements for maximum ground-resistance level and other conditions affecting performance of grounding and bonding of the electrical system.

B. Inspect the test results of the ac grounding system measured at the point of BCT connection.

C. Prepare written report, endorsed by Installer, listing conditions detrimental to performance of the Work.

D. Proceed with connection of the BCT only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION

A. Bonding shall include the ac utility power service entrance, the communications cable entrance, and the grounding electrode system. The bonding of these elements shall form a loop so that each element is connected to at least two others.

B. Comply with NECA 1.

C. Comply with TIA-607-B.

3.3 APPLICATION

A. Conductors: Install solid conductor for No. 8 AWG and smaller and stranded conductors for No. 6 AWG and larger unless otherwise indicated.

1. The bonding conductors between the TGB and structural steel of steel-frame buildings shall not be smaller than No. 6 AWG.
2. The bonding conductors between the TMGB and structural steel of steel-frame buildings shall not be smaller than No. 6 AWG.

B. Underground Grounding Conductors: Install bare tinned-copper conductor, No. 2 AWG minimum.

C. Conductor Terminations and Connections:

1. Pipe and Equipment Grounding Conductor Terminations: Bolted connectors.
2. Underground Connections: Welded connectors except at test wells and as otherwise indicated.
3. Connections to Ground Rods at Test Wells: Bolted connectors.
4. Connections to Structural Steel: Welded connectors.

D. Conductor Support:

1. Secure grounding and bonding conductors at intervals of not less than 36 inches (900 mm).

E. Grounding and Bonding Conductors:

1. Install in the straightest and shortest route between the origination and termination point, and no longer than required. The bend radius shall not be smaller than eight times the diameter of the conductor. No one bend may exceed 90 degrees.
2. Install without splices.
3. Support at not more than 36-inch intervals.
4. Install grounding and bonding conductors in 3/4-inch PVC conduit until conduit enters a telecommunications room. The grounding and bonding conductor pathway through a plenum shall be in EMT. Conductors shall not be installed in EMT unless otherwise indicated.

    a. If a grounding and bonding conductor is installed in ferrous metallic conduit, bond the conductor to the conduit using a grounding bushing that complies with requirements in Section 270528 "Pathways for Communications Systems," and bond both ends of the conduit to a TGB.

3.4 GROUNDING ELECTRODE SYSTEM - Existing

3.5 GROUNDING BUSBARS

A. Indicate locations of grounding busbars on Drawings. Install busbars horizontally, on insulated spacers 2 inches minimum from wall, 12 inches above finished floor unless otherwise indicated.

3.6 CONNECTIONS

A. Bond metallic equipment in a telecommunications equipment room to the grounding busbar in that room, using equipment grounding conductors not smaller than No. 6 AWG.

B. Stacking of conductors under a single bolt is not permitted when connecting to busbars.

C. Assemble the wire connector to the conductor, complying with manufacturer's written instructions and as follows:

1. Use crimping tool and the die specific to the connector.
2. Pretwist the conductor.
3. Apply an antioxidant compound to all bolted and compression connections.

D. Primary Protector: Bond to the TMGB with insulated bonding conductor.

E. Interconnections: Interconnect all TGBs with the TMGB with the telecommunications backbone conductor. If more than one TMGB is installed, interconnect TMGBs using the grounding equalizer conductor. The telecommunications backbone conductor and grounding equalizer conductor size shall not be less than 2 kcmils/linear foot of conductor length, up to a maximum size of No. 3/0 AWG unless otherwise indicated.

F. Telecommunications Enclosures and Equipment Racks: Bond metallic components of enclosures to the telecommunications bonding and grounding system. Install top-mounted rack grounding busbar unless the enclosure and rack are manufactured with the busbar. Bond the equipment grounding busbar to the TGB No. 2 AWG bonding conductors.

G. Structural Steel: Where the structural steel of a steel frame building is readily accessible within the room or space, bond each TGB and TMGB to the vertical steel of the building frame.

H. Shielded Cable: Bond the shield of shielded cable to the TGB in communications rooms and spaces. Comply with TIA-568-C.1 and TIA-568-C.2 when grounding shielded balanced twisted-pair cables.

I. Rack- and Cabinet-Mounted Equipment: Bond powered equipment chassis to the cabinet or rack grounding bar. Power connection shall comply with NFPA 70; the equipment grounding conductor in the power cord of cord- and plug-connected equipment shall be considered as a supplement to bonding requirements in this Section.

J. Access Floors: Bond all metal parts of access floors to the TGB.

K. Equipment Room Signal Reference Grid: Provide a low-impedance path between telecommunications cabinets, equipment racks, and the reference grid, using No. 6 AWG bonding conductors.

1. Install the conductors in grid pattern on 4-foot centers, allowing bonding of one pedestal from each access floor tile.
2. Bond the TGB of the equipment room to the reference grid at two or more locations.
3. Bond all conduits and piping entering the equipment room to the TGB at the perimeter of the room.

3.7 IDENTIFICATION

A. Labels shall be preprinted or computer-printed type.

1. Label TMGB(s) with "fs-TMGB," where "fs" is the telecommunications space identifier for the space containing the TMGB.
2. Label TGB(s) with "fs-TGB," where "fs" is the telecommunications space identifier for the space containing the TGB.
3. Label the BCT and each telecommunications backbone conductor at its attachment point: "WARNING! TELECOMMUNICATIONS BONDING CONDUCTOR. DO NOT REMOVE OR DISCONNECT!"

3.8 FIELD QUALITY CONTROL

A. Perform tests and inspections.

B. Tests and Inspections:

1. Inspect physical and mechanical condition. Verify tightness of accessible, bolted, electrical connections with a calibrated torque wrench according to manufacturer's written instructions.
2. Test the bonding connections of the system using an ac earth ground-resistance tester, taking two-point bonding measurements in each telecommunications equipment room containing a TMGB and a TGB and using the process recommended by BICSI TDMM. Conduct tests with the facility in operation.

    a. Measure the resistance between the busbar and the nearest available grounding electrode. The maximum acceptable value of this bonding resistance is 100 milliohms.

3. Test for ground loop currents using a digital clamp-on ammeter, with a full-scale of not more than 10 A, displaying current in increments of 0.01 A at an accuracy of plus/minus 2.0 percent.

    a. With the grounding infrastructure completed and the communications system electronics operating, measure the current in every conductor connected to the TMGB and in each TGB. Maximum acceptable ac current level is 1 A.

C. Excessive Ground Resistance: If resistance to ground at the BCT exceeds 5 ohms, notify Architect promptly and include recommendations to reduce ground resistance.

D. Grounding system will be considered defective if it does not pass tests and inspections.

E. Prepare test and inspection reports.

END OF SECTION 270526

SECTION 270528 - PATHWAYS FOR COMMUNICATIONS SYSTEMS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

1. Metal conduits and fittings.
2. Nonmetallic conduits and fittings.
3. Optical-fiber-cable pathways and fittings.
4. Metal wireways and auxiliary gutters.
5. Hooks.
6. Boxes, enclosures, and cabinets.

1.3 DEFINITIONS

A. ARC: Aluminum rigid conduit.

B. GRC: Galvanized rigid conduit.

C. IMC: Intermediate metal conduit.

D. RTRC: Reinforced thermosetting resin conduit.

1.4 ACTION SUBMITTALS

A. Product data for the following:

1. Surface pathways
2. Wireways and fittings.
3. Boxes, enclosures, and cabinets.

B. Sustainable Design Submittals:

1. Product Data: For adhesives and sealants, indicating VOC content.
2. Laboratory Test Reports: For adhesives and sealants, indicating compliance with requirements for low-emitting materials.

PART 2 - PRODUCTS

2.1 METAL CONDUITS AND FITTINGS

A. Description: Metal raceway of circular cross section with manufacturer-fabricated fittings.

B. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

1. AFC Cable Systems; a part of Atkore International.
2. Allied Tube & Conduit; a part of Atkore International.
3. Alpha Wire.
4. Anamet Electrical, Inc.
5. Electri-Flex Company.
6. O-Z/Gedney; a brand of Emerson Industrial Automation.
7. Picoma Industries, Inc.
8. Plasti-Bond.
9. Republic Conduit.
10. Southwire Company.
11. Thomas & Betts Corporation; A Member of the ABB Group.
12. Western Tube and Conduit Corporation.
13. Wheatland Tube Company.

C. General Requirements for Metal Conduits and Fittings:

1. Listed and labeled as defined in NFPA 70, by a nationally recognized testing laboratory, and marked for intended location and application.
2. Comply with TIA-569-D.

D. GRC: Comply with ANSI C80.1 and UL 6.

E. ARC: Comply with ANSI C80.5 and UL 6A.

F. EMT: Comply with ANSI C80.3 and UL 797.

G. Fittings for Metal Conduit: Comply with NEMA FB 1 and UL 514B.

1. Fittings for EMT:

a. Material: Steel.
b. Type: Compression.

2. Expansion Fittings: PVC or steel to match conduit type, complying with UL-467, rated for environmental conditions where installed, and including flexible external bonding jumper.

2.2 NONMETALLIC CONDUITS AND FITTINGS

A. Description: Nonmetallic raceway of circular section with manufacturer-fabricated fittings.

B. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

1. AFC Cable Systems; a part of Atkore International.
2. Allied Tube & Conduit; a part of Atkore International.
3. Anamet Electrical, Inc.
4. Arnco Corporation.
5. CANTEX INC.
6. Carlon; a brand of Thomas & Betts Corporation.
7. CertainTeed Corporation.
8. Condux International, Inc.
9. Dura-Line.
10. Electri-Flex Company.
11. Kraloy.
12. Lamson & Sessions.
13. Niedax Inc.
14. RACO; Hubbell.
15. Thomas & Betts Corporation; A Member of the ABB Group.

C. General Requirements for Nonmetallic Conduits and Fittings:

1. Listed and labeled as defined in NFPA 70, by an NRTL, and marked for intended location and application.
2. Comply with TIA-569-D.

D. RNC: Type EPC-40-PVC or Type EPC-80-PVC, complying with NEMA TC 2 and UL 651 unless otherwise indicated.

E. Fittings: Comply with NEMA TC 3; match to conduit or tubing type and material.

F. Solvents and Adhesives: As recommended by conduit manufacturer.

1. VOC Content: 510 g/L or less for PVC conduit and fittings.

2.3 OPTICAL-FIBER-CABLE PATHWAYS AND FITTINGS

A. Description: Comply with UL 2024; flexible-type pathway with a circular cross section, approved for general-use installation unless otherwise indicated.

B. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

1. Alpha Wire.
2. Carlon; a brand of Thomas & Betts Corporation.
3. Dura-Line.
4. Endot Industries Inc.
5. IPEX USA LLC.

C. Listed and labeled as defined in NFPA 70, by an NRTL, and marked for intended location and application.

D. Comply with TIA-569-D.

2.4 METAL WIREWAYS AND AUXILIARY GUTTERS

A. Description: Sheet metal trough of rectangular cross section fabricated to required size and shape, without holes or knockouts, and with hinged or removable covers.

B. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

1. B-line, an Eaton business.
2. Hoffman; a brand of Pentair Equipment Protection.
3. MonoSystems, Inc.
4. Square D; by Schneider Electric.

C. General Requirements for Metal Wireways and Auxiliary Gutters:

1. Comply with UL 870 and NEMA 250, Type 1 unless otherwise indicated, and sized according to NFPA 70.
2. Metal wireways installed outdoors shall be listed and labeled as defined in NFPA 70, by an NRTL, and marked for intended location and application.
3. Comply with TIA-569-D.

D. Fittings and Accessories: Include covers, couplings, offsets, elbows, expansion joints, adapters, hold-down straps, end caps, and other fittings to match and mate with wireways as required for complete system.

E. Wireway Covers: Screw-cover type unless otherwise indicated.

F. Finish: Manufacturer's standard enamel finish.

2.5 HOOKS

A. Description: Prefabricated sheet metal cable supports for telecommunications cable.

B. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

1. MonoSystems, Inc.
2. Panduit Corp.
3. Wiremold / Legrand.

C. Listed and labeled as defined in NFPA 70, by an NRTL, and marked for intended location and application.

D. Comply with TIA-569-D.

E. Galvanized steel.

F. J shape.

2.6 BOXES, ENCLOSURES, AND CABINETS

A. Description: Enclosures for communications.

B. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

1. Adalet.
2. Carlon; a brand of Thomas & Betts Corporation.
3. Crouse-Hinds, an Eaton business.
4. EGS/Appleton Electric.
5. Erickson Electrical Equipment Company.
6. FSR Inc.
7. Hoffman; a brand of Pentair Equipment Protection.
8. Milbank Manufacturing Co.
9. Molex Industrial Products Group; Woodhead Brand.
10. MonoSystems, Inc.
11. Oldcastle Enclosure Solutions.
12. O-Z/Gedney; a brand of Emerson Industrial Automation.
13. Plasti-Bond.
14. Quazite: Hubbell Power Systems, Inc.
15. RACO; Hubbell.
16. Spring City Electrical Manufacturing Company.
17. Stahlin Non-Metallic Enclosures.
18. Thomas & Betts Corporation; A Member of the ABB Group.
19. Wiremold / Legrand.

C. General Requirements for Boxes, Enclosures, and Cabinets:

1. Comply with TIA-569-D.
2. Boxes, enclosures, and cabinets installed in wet locations shall be listed and labeled as defined in NFPA 70, by an NRTL, and marked for use in wet locations.
3. Box extensions used to accommodate new building finishes shall be of same material as recessed box.
4. Device Box Dimensions: 4 inches square by 2-1/8 inches deep, 4 inches by 2-1/8 inches by 2-1/8 inches deep as required by the work.
5. Gangable boxes are allowed.

D. Sheet Metal Outlet and Device Boxes: Comply with NEMA OS 1 and UL 514A.

E. Cast-Metal Outlet and Device Boxes: Comply with NEMA FB 1, ferrous alloy or aluminum, Type FD, with gasketed cover.

F. Small Sheet Metal Pull and Junction Boxes: NEMA OS 1.

G. Cast-Metal Access, Pull, and Junction Boxes: Comply with NEMA FB 1 and UL 1773, cast aluminum or galvanized, cast iron with gasketed cover.

H. Hinged-Cover Enclosures: Comply with UL 50 and NEMA 250, Type 1, with continuous-hinge cover with flush latch unless otherwise indicated.

1. Metal Enclosures: Steel, finished inside and out with manufacturer's standard enamel.

I. Cabinets:

1. NEMA 250, Type 1 galvanized-steel box with removable interior panel and removable front, finished inside and out with manufacturer's standard enamel.
2. Hinged door in front cover with flush latch and concealed hinge.
3. Key latch to match panelboards.
4. Metal barriers to separate wiring of different systems and voltage.
5. Accessory feet where required for freestanding equipment.

PART 3 - EXECUTION

3.1 PATHWAY APPLICATION

A. Outdoors: Apply pathway products as specified below unless otherwise indicated:

1. Exposed Conduit: GRC, RNC, Type EPC-80-PVC.
2. Concealed Conduit, Aboveground: GRC, RNC, Type EPC-40-PVC.
3. Underground Conduit: RNC, Type EPC-40-PVC concrete encased.
4. Boxes and Enclosures, Aboveground: NEMA 250, Type 3R.

B. Indoors: Apply pathway products as specified below unless otherwise indicated:

1. Exposed, Not Subject to Physical Damage: EMT.
2. Exposed, Not Subject to Severe Physical Damage: EMT.
3. Exposed and Subject to Severe Physical Damage: GRC. Pathway locations include the following:

    a. Loading dock.
    b. Corridors used for traffic of mechanized carts, forklifts, and pallet-handling units.
    c. Mechanical rooms.

4. Concealed in Ceilings and Interior Walls and Partitions: EMT or innerduct.
5. Damp or Wet Locations: GRC.
6. Pathways for Optical-Fiber or Communications-Cable Risers in Vertical Shafts: Riser-type, optical-fiber-cable pathway, EMT.
7. Pathways for Concealed General-Purpose Distribution of Optical-Fiber or Communications Cable: General-use, optical-fiber-cable pathway, EMT.
8. Boxes and Enclosures: NEMA 250, Type 1, except use NEMA 250, Type 4 stainless steel units in institutional and commercial kitchens and damp or wet locations.

C. Minimum Pathway Size: 1-inch trade size for copper and aluminum cables, and 1 inch for optical-fiber cables.

D. Pathway Fittings: Compatible with pathways and suitable for use and location.

1. Rigid Steel Conduit: Use threaded rigid steel conduit fittings unless otherwise indicated. Comply with NEMA FB 2.10.

2. EMT: Use set-screw or compression, steel or cast-metal fittings. Comply with NEMA FB 2.10.

E. Do not install aluminum conduits, boxes, or fittings in contact with concrete or earth.

F. Install surface pathways only where indicated on Drawings.

G. Do not install nonmetallic conduit where ambient temperature exceeds 120 deg F.

3.2 INSTALLATION

A. Comply with the following standards for installation requirements except where requirements on Drawings or in this Section are stricter:

1. NECA 1.
2. NECA/BICSI 568.
3. TIA-569-D.
4. NECA 101
5. NECA 102.
6. NECA 105.

B. Comply with NFPA 70 limitations for types of pathways allowed in specific occupancies and number of floors.

C. Comply with requirements in Section 078413 "Penetration Firestopping" for firestopping materials and installation for penetrations through fire-rated walls, ceilings, and assemblies.

D. Comply with requirements in Section 270529 "Hangers and Supports for Communications Systems" for hangers and supports.

E. Keep pathways at least 6 inches away from parallel runs of flues and steam or hot-water pipes. Install horizontal pathway runs above water and steam piping.

F. Complete pathway installation before starting conductor installation.

G. Arrange stub-ups so curved portions of bends are not visible above finished slab.

H. Install no more than the equivalent of two 90-degree bends in any pathway run. Support within 12 inches of changes in direction. Utilize long radius ells for all optical-fiber cables.

I. Conceal rigid conduit within finished walls, ceilings, and floors unless otherwise indicated. Install conduits parallel or perpendicular to building lines.

J. Support conduit within 12 inches of enclosures to which attached.

K. Pathways Embedded in Slabs:

1. Run conduit larger than 1-inch trade size, parallel or at right angles to main reinforcement. Where at right angles to reinforcement, place conduit close to slab support. Secure pathways to reinforcement at maximum 10-foot intervals.

2. Arrange pathways to cross building expansion joints at right angles with expansion fittings. Comply with requirements for expansion joints specified in this article.
3. Arrange pathways to keep a minimum of 2 inches of concrete cover in all directions.
4. Do not embed threadless fittings in concrete unless specifically approved by Architect for each specific location.
5. Change from nonmetallic conduit and fittings to GRC and fittings before rising above floor.

L. Stub-ups to Above Recessed Ceilings:

1. Use EMT or RMC for pathways.
2. Use a conduit bushing or insulated fitting to terminate stub-ups not terminated in hubs or in an enclosure.

M. Terminate threaded conduits into threaded hubs or with locknuts on inside and outside of boxes or cabinets. Install insulated bushings on conduits terminated with locknuts.

N. Install pathways square to the enclosure and terminate at enclosures with locknuts. Install locknuts hand tight plus one additional quarter-turn.

O. Do not rely on locknuts to penetrate nonconductive coatings on enclosures. Remove coatings in the locknut area prior to assembling conduit to enclosure, to assure a continuous ground path.

P. Cut conduit perpendicular to the length. For conduits of 2-inch trade size and larger, use roll cutter or a guide to ensure cut is straight and perpendicular to the length.

Q. Install pull wires in empty pathways. Use polypropylene or monofilament plastic line with not less than 200-lb tensile strength. Leave at least 12 inches of slack at each end of pull wire. Secure pull wire, so it cannot fall into conduit. Cap pathways designated as spare alongside pathways in use.

R. Surface Pathways:

1. Install surface pathway for surface telecommunications outlet boxes only where indicated on Drawings.
2. Install surface pathway with a minimum 2-inch radius control at bend points.
3. Secure surface pathway with screws or other anchor-type devices at intervals not exceeding 48 inches and with no less than two supports per straight pathway section. Support surface pathway according to manufacturer's written instructions. Tape and glue are not acceptable support methods.

S. Pathways for Optical-Fiber and Communications Cable: Install pathways, metal and nonmetallic, rigid and flexible, as follows:

1. 3/4-Inch Trade Size and Smaller: Install pathways in maximum lengths of 50 feet.
2. 1-Inch Trade Size and Larger: Install pathways in maximum lengths of 75 feet.
3. Install with a maximum of two 90-degree bends or equivalent for each length of pathway unless Drawings show stricter requirements. Separate lengths with pull or junction boxes or terminations at distribution frames or cabinets where necessary to comply with these requirements.

T. Install devices to seal pathway interiors at accessible locations. Locate seals, so no fittings or boxes are between the seal and the following changes of environments. Seal the interior of all pathways at the following points:

1. Where conduits pass from warm to cold locations, such as boundaries of refrigerated spaces.
2. Where an underground service pathway enters a building or structure.
3. Where otherwise required by NFPA 70.

U. Comply with manufacturer's written instructions for solvent welding PVC conduit and fittings.

V. Expansion-Joint Fittings:

1. Install in each run of aboveground RNC that is located where environmental temperature change may exceed 30 deg F, and that has straight-run length that exceeds 25 feet. Install in each run of aboveground RMC and EMT that is located where environmental temperature change may exceed 100 deg F, and that has straight-run length that exceeds 100 feet.
2. Install type and quantity of fittings that accommodate temperature change listed for each of the following locations:

    a. Outdoor Locations Not Exposed to Direct Sunlight: 125 deg F temperature change.
    b. Outdoor Locations Exposed to Direct Sunlight: 155 deg F temperature change.
    c. Indoor Spaces Connected with Outdoors without Physical Separation: 125 deg F temperature change.

3. Install fitting(s) that provide expansion and contraction for at least 0.00041 inch per foot of length of straight run per deg F of temperature change for PVC conduits. Install fitting(s) that provide expansion and contraction for at least 0.000078 inch per foot of length of straight run per deg F of temperature change for metal conduits.
4. Install expansion fittings at all locations where conduits cross building or structure expansion joints.
5. Install each expansion-joint fitting with position, mounting, and piston setting selected according to manufacturer's written instructions for conditions at specific location at time of installation. Install conduit supports to allow for expansion movement.

W. Hooks:

1. Size to allow a minimum of 25 percent future capacity without exceeding design capacity limits.
2. Shall be supported by dedicated support wires. Do not use ceiling grid support wire or support rods.
3. Hook spacing shall allow no more than 6 inches of slack. The lowest point of the cables shall be no less than 6 inches adjacent to ceilings, mechanical ductwork and fittings, luminaires, power conduits, power, and telecommunications outlets, and other electrical and communications equipment.
4. Space hooks no more than 5 feet o.c.
5. Provide a hook at each change in direction.

X. Mount boxes at heights indicated on Drawings. If mounting heights of boxes are not individually indicated, give priority to ADA requirements. Install boxes with height measured to center of box unless otherwise indicated.

Y. Recessed Boxes in Masonry Walls: Saw-cut opening for box in center of cell of masonry block and install box flush with surface of wall. Prepare block surface to provide a flat surface for a raintight connection between box and cover plate or supported equipment and box.

Z. Horizontally separate boxes mounted on opposite sides of walls, so they are not in the same vertical channel.

AA. Support boxes of three gangs or more from more than one side by spanning two framing members or mounting on brackets specifically designed for the purpose.

BB. Fasten junction and pull boxes to or support from building structure. Do not support boxes by conduits.

CC. Set metal floor boxes level and flush with finished floor surface.

3.3 FIRESTOPPING

A. Install firestopping at penetrations of fire-rated floor and wall assemblies. Comply with requirements in Section 078413 "Penetration Firestopping."

3.4 PROTECTION

A. Protect coatings, finishes, and cabinets from damage or deterioration.

1. Repair damage to galvanized finishes with zinc-rich paint recommended by manufacturer.
2. Repair damage to paint finishes with matching touchup coating recommended by manufacturer.

END OF SECTION 270528

SECTION 270529 - HANGERS AND SUPPORTS FOR COMMUNICATIONS SYSTEMS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

1. Steel slotted support systems for communication raceways.
2. Conduit and cable support devices.
3. Support for conductors in vertical conduit.
4. Structural steel for fabricated supports and restraints.
5. Mounting, anchoring, and attachment components, including powder-actuated fasteners, mechanical expansion anchors, concrete inserts, clamps, through bolts, toggle bolts, and hanger rods.
6. Fabricated metal equipment support assemblies.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for the following:

a. Slotted support systems, hardware, and accessories.
b. Clamps.
c. Hangers.
d. Sockets.
e. Eye nuts.
f. Fasteners.
g. Anchors.
h. Saddles.
i. Brackets.

2. Include rated capacities and furnished specialties and accessories.

B. Shop Drawings: For fabrication and installation details for communications hangers and support systems.

1. Trapeze hangers. Include product data for components.
2. Steel slotted-channel systems.
3. Equipment supports.

C. Delegated-Design Submittal: For hangers and supports for communications systems.

1. Include design calculations and details of trapeze hangers.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Delegated Design: Engage a qualified professional engineer, as defined in Section 014000 "Quality Requirements," to design hanger and support system.

2.2 SUPPORT, ANCHORAGE, AND ATTACHMENT COMPONENTS

A. Steel Slotted Support Systems: Preformed steel channels and angles with minimum 13/32-inch-diameter holes at a maximum of 8 inches o.c. in at least one surface.

1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

a. Allied Tube & Conduit; a part of Atkore International.
b. B-line, an Eaton business.
c. ERICO International Corporation.
d. Flex-Strut Inc.
e. Gripple Inc.
f. GS Metals Corp.
g. G-Strut.
h. Haydon Corporation.
i. Metal Ties Innovation.
j. MIRO Industries.
k. Thomas & Betts Corporation; A Member of the ABB Group.
l. Unistrut; Part of Atkore International.
m. Wesanco, Inc.

2. Standard: Comply with MFMA-4 factory-fabricated components for field assembly.
3. Material for Channel, Fittings, and Accessories: Galvanized steel.
4. Channel Width: Selected for applicable load criteria.
5. Metallic Coatings: Hot-dip galvanized after fabrication and applied according to MFMA-4.
6. Painted Coatings: Manufacturer's standard painted coating applied according to MFMA-4.
7. Protect finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.
8. Channel Dimensions: Selected for applicable load criteria.

B. Aluminum Slotted Support Systems: Extruded aluminum channels and angles with minimum 13/32-inch- diameter holes at a maximum of 8 inches o.c. in at least one surface.

1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

    a. Cooper Industries, Inc.
    b. Flex-Strut Inc.
    c. Haydon Corporation.
    d. MKT Metal Manufacturing.
    e. Thomas & Betts Corporation; A Member of the ABB Group.
    f. Unistrut; Part of Atkore International.

2. Standard: Comply with MFMA-4 factory-fabricated components for field assembly.
3. Channel Material: 6063-T6 aluminum alloy.
4. Fittings and Accessories Material: 5052-H32 aluminum alloy.
5. Channel Width: Selected for applicable load criteria.
6. Painted Coatings: Manufacturer's standard painted coating applied according to MFMA-4.
7. Protect finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.
8. Channel Dimensions: Selected for applicable load criteria.

C. Conduit and Cable Support Devices: Steel and malleable-iron clamps, hangers, and associated fittings, designed for types and sizes of raceway or cable to be supported.

D. Support for Conductors in Vertical Conduit: Factory-fabricated assembly consisting of threaded body and insulating wedging plug or plugs for nonarmored communications conductors or cables in riser conduits. Plugs shall have number, size, and shape of conductor gripping pieces as required to suit individual conductors or cables supported. Body shall be made of malleable iron.

E. Structural Steel for Fabricated Supports and Restraints: ASTM A 36/A 36M steel plates, shapes, and bars; black and galvanized.

F. Mounting, Anchoring, and Attachment Components: Items for fastening electrical items or their supports to building surfaces include the following:

1. Powder-Actuated Fasteners: Threaded-steel stud for use in hardened portland cement concrete, steel, or wood, with tension, shear, and pullout capacities appropriate for supported loads and building materials where used.

    a. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

        1) Hilti, Inc.
        2) ITW Ramset/Red Head; Illinois Tool Works, Inc.
        3) MKT Fastening, LLC.
        4) Simpson Strong-Tie Co., Inc.

2. Mechanical-Expansion Anchors: Insert-wedge-type stainless steel for use in hardened portland cement concrete, with tension, shear, and pullout capacities appropriate for supported loads and building materials where used.

    a. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

        1) B-line, an Eaton business.
        2) Empire Tool and Manufacturing Co., Inc.
        3) Hilti, Inc.
        4) ITW Ramset/Red Head; Illinois Tool Works, Inc.
        5) MKT Fastening, LLC.

3. Concrete Inserts: Steel or malleable-iron, slotted support system units are similar to MSS Type 18 units and comply with MFMA-4 or MSS SP-58.
4. Clamps for Attachment to Steel Structural Elements: MSS SP-58 units are suitable for attached structural element.
5. Through Bolts: Structural type, hex head, and high strength. Comply with ASTM A 325.
6. Toggle Bolts: Stainless-steel springhead type.
7. Hanger Rods: Threaded steel.

2.3 FABRICATED METAL EQUIPMENT SUPPORT ASSEMBLIES

A. Description: Welded or bolted structural-steel shapes, shop or field fabricated to fit dimensions of supported equipment.

B. Materials: Comply with requirements in Section 055000 "Metal Fabrications" for steel shapes and plates.

PART 3 - EXECUTION

3.1 APPLICATION

A. Comply with the following standards for application and installation requirements of hangers and supports, except where requirements on Drawings or in this Section are stricter:

1. NECA 1.
2. NECA/BICSI 568.
3. TIA-569-D.
4. NECA 101
5. NECA 102.
6. NECA 105.

B. Comply with requirements in Section 078413 "Penetration Firestopping" for firestopping materials and installation for penetrations through fire-rated walls, ceilings, and assemblies.

C. Comply with requirements for pathways specified in Section 270528 "Pathways for Communications Systems."

D. Maximum Support Spacing and Minimum Hanger Rod Size for Raceway: Space supports for EMTs, IMCs, and RMCs as required by NFPA 70. Minimum rod size shall be 1/4 inch in diameter.

E. Multiple Raceways or Cables: Install trapeze-type supports fabricated with steel slotted or other support system, sized so capacity can be increased by at least 25 percent in future without exceeding specified design load limits.

1. Secure raceways and cables to these supports with single-bolt conduit clamps, using spring friction action for retention in support channel.

F. Spring-steel clamps designed for supporting single conduits without bolts may be used for 1-1/2-inch and smaller raceways serving branch circuits and communication systems above suspended ceilings and for fastening raceways to trapeze supports.

3.2 SUPPORT INSTALLATION

A. Raceway Support Methods: In addition to methods described in NECA 1, EMT and RMC may be supported by openings through structure members, according to NFPA 70.

B. Strength of Support Assemblies: Where not indicated, select sizes of components, so strength will be adequate to carry present and future static loads within specified loading limits. Minimum static design load used for strength determination shall be weight of supported components plus 200 lb.

C. Mounting and Anchorage of Surface-Mounted Equipment and Components: Anchor and fasten communications items and their supports to building structural elements by the following methods unless otherwise indicated by code:

1. To Wood: Fasten with lag screws or through bolts.
2. To New Concrete: Bolt to concrete inserts.
3. To Masonry: Use approved toggle-type bolts on hollow masonry units and expansion anchor fasteners on solid masonry units.
4. To Existing Concrete: Use expansion anchor fasteners.
5. Instead of expansion anchors, powder-actuated-driven threaded studs, provided with lock washers and nuts, may be used in existing standard-weight concrete 4 inches thick or greater. Do not use for anchorage to lightweight-aggregate concrete or for slabs less than 4 inches thick.
6. To Steel: Beam clamps (MSS SP-58, Type 19, 21, 23, 25, or 27), complying with MSS SP-69.
7. To Light Steel: Sheet metal screws.
8. Items Mounted on Hollow Walls and Nonstructural Building Surfaces: Mount cabinets, panelboards, disconnect switches, control enclosures, pull and junction boxes, transformers, and other devices on slotted-channel racks attached to substrate by means that comply with anchorage requirements.

D. Drill holes for expansion anchors in concrete at locations and to depths that avoid the need for reinforcing bars.

3.3 INSTALLATION OF FABRICATED METAL SUPPORTS

A. Comply with installation requirements in Section 055000 "Metal Fabrications" for site-fabricated metal supports.

B. Cut, fit, and place miscellaneous metal supports accurately in location, alignment, and elevation to support and anchor communications materials and equipment.

C. Field Welding: Comply with AWS D1.1/D1.1M.

3.4 PAINTING

A. Touchup: Clean field welds and abraded areas of shop paint. Paint exposed areas immediately after erecting hangers and supports. Use same materials as used for shop painting. Comply with SSPC-PA 1 requirements for touching up field-painted surfaces.

1. Apply paint by brush or spray to provide minimum dry film thickness of 2.0 mils.

B. Touchup: Comply with requirements in Section 099113 "Exterior Painting" and Section 099123 "Interior Painting" for cleaning and touchup painting of field welds, bolted connections, and abraded areas of shop paint on miscellaneous metal.

C. Galvanized Surfaces: Clean welds, bolted connections, and abraded areas, and apply galvanizing-repair paint to comply with ASTM A 780.

END OF SECTION 270529

SECTION 270536 - CABLE TRAY FOR COMMUNICATIONS SYSTEMS

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. Furnish and install cable tray systems complete, of straight sections, fittings, and accessories as defined in the latest NEMA standards publication VE-1.

B. The general rating of trays shall be as shown on the Contract Drawings.

C. Cable tray provided shall be UL listed as suitable as an equipment grounding conductor.

1.2 RELATED WORK

A. Special requirements for materials and equipment are given in Division 0 and 01.

B. Special sequence or schedule requirements are found in the Summary of Work.

1.3 QUALIFICATIONS

A. These materials shall be furnished by a single manufacturer who is experienced, reputable, and qualified in the manufacture of cable trays. It shall be manufactured by Cablofil, Chalfant, GS Metals Flextray, Mono-Systems Mono-Mesh, or equal.

1.4 SUBMITTALS

A. Shop drawings and other items needed to establish compliance with the Contract Drawings and these Specifications shall be submitted to the Engineer in accordance with Project General and/or special Conditions. As a minimum, submittals shall include descriptive literature, dimensions, weights, layout drawings, materials of construction, NEMA load class, depth, and shall include accessories/fittings.

1.5 WARRANTY

A. These materials shall be warranted for one year concurrent with the Contractor provided warranty.

PART 2 - PRODUCTS

2.1 MATERIALS AND FINISHES

A. Electro Zinc.

1. All tray sections, fittings and accessories shall be electro zinc.

2.2 TRAY TYPES

A. Wire Tray

1. Wire type trays shall consist of 2 inch x 4 inch wire grids to support wires evenly. Wires shall be welded at tray and allow a minimum load of 864 Cat. 6 cables at 100% fill.

2.3 TRAY SIZE

A. Trays shall have a minimum usable loading depth of 4 inches.

B. All straight sections shall be supplied in standard lengths of 10 feet.

C. Width shall be 12 inches, unless otherwise noted.

D. Fittings shall be field fabricated. 90-degree bends shall be provided utilizing Cablofil, Model EZ T90, or equal, splice kits. Straight section splicing shall be provided utilizing Cablofil, Model EDT, or equal splice assemblies. Splice assemblies shall be electro zinc plated.

2.4 LOADING CAPACITIES

A. Cable tray shall be installed to meet NEMA class descriptions for a safety factor of 1.5.

B. Cable tray shall be made to manufacturing tolerances as specified by NEMA.

PART 3 - EXECUTION

3.1 EXAMINATION AND PREPARATION

A. Cable tray and accessories shall be treated as specified in General and Special Conditions.

3.2 INSTALLATION/APPLICATION/ERECTION

A. Installation shall comply with applicable codes and manufacturer recommendations and instructions.

B. All trapezes, hangers, and supports shall be provided as required, by the Contractor, and materials shall be compatible and similar to the tray furnished.

3.3 FIELD PAINTING

A. Field painting shall be limited to cold galvanizing field cut tray or accessories, where steel is used.

B. Tray shall not be painted generally. Natural finish is acceptable.

END OF SECTION 270536

SECTION 270544 - SLEEVES AND SLEEVE SEALS FOR COMMUNICATIONS PATHWAYS AND CABLING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

1. Round sleeves.
2. Rectangular sleeves.
3. Sleeve seal systems.
4. Grout.
5. Foam sealants.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

PART 2 - PRODUCTS

2.1 ROUND SLEEVES

A. Wall Sleeves, Steel:

1. Description: ASTM A53/A53M, Type E, Grade B, Schedule 40, zinc coated, plain ends and integral waterstop.

B. Pipe Sleeves, PVC:

1. Description: ASTM D1785, Schedule 40.

2.2 SLEEVE SEAL SYSTEMS

A. Description: Modular sealing device, designed for field assembly, to fill annular space between sleeve and pathway or cable or between pathway and cable.

1. Sealing Elements: EPDM rubber interlocking links shaped to fit surface of pipe. Include type and number required for pipe material and size of pipe.
2. Pressure Plates: Carbon steel.
3. Connecting Bolts and Nuts: Carbon steel, with corrosion-resistant coating, of length required to secure pressure plates to sealing elements.

2.3 GROUT

A. Description: Nonshrink; recommended for interior and exterior sealing openings in non-fire-rated walls or floors.

1. Standard: ASTM C1107/C1107M, Grade B, post-hardening and volume-adjusting, dry, hydraulic-cement grout.
2. Design Mix: 5000-psi, 28-day compressive strength.
3. Packaging: Premixed and factory packaged.

2.4 FOAM SEALANTS

A. Description: Multicomponent, liquid elastomers that, when mixed, expand and cure in place to produce a flexible, nonshrinking foam. Foam expansion must not damage cables or crack penetrated structure.

PART 3 - EXECUTION

3.1 INSTALLATION OF SLEEVES FOR NON-FIRE-RATED ELECTRICAL PENETRATIONS

A. Comply with NECA 1.

B. Sleeves for Conduits Penetrating Above-Grade, Non-Fire-Rated, Concrete and Masonry-Unit Floors and Walls:

1. Interior Penetrations of Non-Fire-Rated Walls and Floors:

a. Seal space outside of sleeves with mortar or grout. Pack sealing material solidly between sleeve and wall or floor so no voids remain. Tool exposed surfaces smooth; protect material while curing.
b. Seal annular space between sleeve and pathway or cable, using joint sealant appropriate for size, depth, and location of joint. Comply with requirements in Section 079200 "Joint Sealants."

2. Use pipe sleeves unless penetration arrangement requires rectangular sleeved opening.
3. Size pipe sleeves to provide 1/4-inch annular clear space between sleeve and pathway or cable, unless sleeve seal system is to be installed.
4. Install sleeves for wall penetrations unless core-drilled holes or formed openings are used. Install sleeves during erection of walls. Cut sleeves to length for mounting flush with both surfaces of walls. Deburr after cutting.

5. Install sleeves for floor penetrations. Extend sleeves installed in floors 2 inches above finished floor level. Install sleeves during erection of floors.

C. Sleeves for Conduits Penetrating Non-Fire-Rated Wall Assemblies:

1. Use circular metal sleeves unless penetration arrangement requires rectangular sleeved opening.
2. Seal space outside of sleeves with approved joint compound for wall assemblies.

D. Roof-Penetration Sleeves: Seal penetration of individual pathways and cables with flexible boot-type flashing units applied in coordination with roofing work.

E. Aboveground, Exterior-Wall Penetrations: Seal penetrations using steel pipe sleeves and mechanical sleeve seal systems. Size sleeves to allow for 1-inch annular clear space between pipe and sleeve for installing mechanical sleeve seals.

F. Underground, Exterior-Wall and Floor Penetrations:

1. Install steel pipe sleeves. Size sleeves to allow for 1-inch annular clear space between pathway or cable and sleeve for installing sleeve seal system. Grout sleeve into wall or floor opening.

3.2 INSTALLATION OF RECTANGULAR SLEEVES AND SLEEVE SEALS

A. Install sleeves in existing walls without compromising structural integrity of walls. Do not cut structural elements without reinforcing the wall to maintain the designed weight bearing and wall stiffness.

B. Install conduits and cable with no crossings within the sleeve.

C. Fill opening around conduits and cables with expanding foam without leaving voids.

D. Provide metal sheet covering at both wall surfaces and finish to match surrounding surfaces. Metal sheet must be same material as sleeve.

3.3 INSTALLATION OF SLEEVE SEAL SYSTEMS

A. Install sleeve seal systems in sleeves in exterior concrete walls and slabs-on-grade at pathway entries into building.

B. Install type and number of sealing elements recommended by manufacturer for pathway or cable material and size. Position pathway or cable in center of sleeve. Assemble mechanical sleeve seals and install in annular space between pathway or cable and sleeve. Tighten bolts against pressure plates that cause sealing elements to expand and make watertight seal.

END OF SECTION 270544

SECTION 270553 - IDENTIFICATION FOR COMMUNICATIONS SYSTEMS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

1. Color and legend requirements for labels and signs.
2. Labels.
3. Bands and tubes.
4. Tapes.
5. Signs.
6. Cable ties.
7. Fasteners for labels and signs.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for communications identification products.

B. Identification Schedule:

1. Outlets: Scaled drawings indicating location and proposed designation.
2. Backbone Cabling: Riser diagram showing each communications room, backbone cable, and proposed backbone cable designation.
3. Racks: Scaled drawings indicating location and proposed designation.
4. Patch Panels: Enlarged scaled drawings showing rack row, number, and proposed designations.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Comply with NFPA 70 and TIA 606-B.

B. Comply with ANSI Z535.4 for safety signs and labels.

C. Adhesive-attached labeling materials, including label stocks, laminating adhesives, and inks used by label printers, shall comply with UL 969.

D. Thermal Movements: Allow for thermal movements from ambient and surface temperature changes.

1. Temperature Change: 120 deg F, ambient; 180 deg F, material surfaces.

2.2 COLOR AND LEGEND REQUIREMENTS

A. Equipment Identification Labels:

1. Black letters on a white field.

2.3 LABELS

A. Vinyl Wraparound Labels: Preprinted, flexible labels laminated with a clear, weather- and chemical-resistant coating and matching wraparound clear adhesive tape for securing label ends.

1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

a. Brady Corporation.
b. Champion America.
c. emedco.
d. Grafoplast Wire Markers.
e. HellermannTyton.
f. LEM Products Inc.
g. Marking Services, Inc.
h. Panduit Corp.
i. Seton Identification Products.

B. Snap-Around Labels: Slit, pretensioned, flexible, preprinted, color-coded acrylic sleeves, with diameters sized to suit diameters of raceway or cable they identify, that stay in place by gripping action.

1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

a. Brady Corporation.
b. HellermannTyton.
c. Marking Services, Inc.
d. Panduit Corp.
e. Seton Identification Products.

C. Self-Adhesive Wraparound Labels: Preprinted, 3-mil- thick, polyester or vinyl flexible labels with acrylic pressure-sensitive adhesive.

1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

    a. A'n D Cable Products.
    b. Brady Corporation.
    c. Brother International Corporation.
    d. emedco.
    e. Grafoplast Wire Markers.
    f. Ideal Industries, Inc.
    g. LEM Products Inc.
    h. Marking Services, Inc.
    i. Panduit Corp.
    j. Seton Identification Products.

2. Self-Lamination: Clear; UV-, weather- and chemical-resistant; self-laminating protective shields over the legend. Labels sized such that the clear shield overlaps the entire printed legend.
3. Marker for Labels: Permanent, waterproof black ink marker recommended by tag manufacturer.
4. Marker for Labels: Machine-printed, permanent, waterproof black ink recommended by printer manufacturer.

D. Self-Adhesive Labels: Polyester or vinyl, thermal, transfer-printed, 3-mil- thick, multicolor, weather- and UV-resistant, pressure-sensitive adhesive labels, configured for intended use and location.

1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

    a. A'n D Cable Products.
    b. Brady Corporation.
    c. Brother International Corporation.
    d. emedco.
    e. Grafoplast Wire Markers.
    f. HellermannTyton.
    g. Ideal Industries, Inc.
    h. LEM Products Inc.
    i. Marking Services, Inc.
    j. Panduit Corp.
    k. Seton Identification Products.

2. Minimum Nominal Size:

    a. 1-1/2 by 6 inches for raceway and conductors.
    b. 3-1/2 by 5 inches for equipment.
    c. As required by authorities having jurisdiction.

2.4 BANDS AND TUBES

A. Snap-Around, Color-Coding Bands: Slit, pretensioned, flexible, solid-colored acrylic sleeves, 2 inches long, with diameters sized to suit diameters of raceway or cable they identify, that stay in place by gripping action.

1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

    a. Brady Corporation.
    b. HellermannTyton.
    c. Marking Services, Inc.
    d. Panduit Corp.

2.5 SIGNS

A. Laminated-Acrylic or Melamine-Plastic Signs:

1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

    a. Brady Corporation.
    b. Carlton Industries, LP.
    c. emedco.
    d. Marking Services, Inc.

2. Engraved legend.
3. Thickness:

    a. For signs up to 20 sq. in., minimum 1/16 inch thick.
    b. For signs larger than 20 sq. in., 1/8 inch thick.
    c. Engraved legend with black letters on white face.
    d. Punched or drilled for mechanical fasteners with 1/4-inch grommets in corners for mounting or self-adhesive.
    e. Framed with mitered acrylic molding and arranged for attachment at applicable equipment.

2.6 CABLE TIES

A. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

1. HellermannTyton.
2. Ideal Industries, Inc.
3. Marking Services, Inc.
4. Panduit Corp.

B. General-Purpose Cable Ties: Fungus inert, self-extinguishing, one piece, self-locking, and Type 6/6 nylon.

1. Minimum Width: 3/16 inch.
2. Tensile Strength at 73 deg F according to ASTM D 638: 12,000 psi.
3. Temperature Range: Minus 40 to plus 185 deg F.
4. Color: Black, except where used for color-coding.

2.7 MISCELLANEOUS IDENTIFICATION PRODUCTS

A. Paint: Comply with requirements in painting Sections for paint materials and application requirements. Retain paint system applicable for surface material and location (exterior or interior).

B. Fasteners for Labels and Signs: Self-tapping, stainless-steel screws, or stainless-steel machine screws with nuts and flat and lock washers.

PART 3 - EXECUTION

3.1 PREPARATION

A. Self-Adhesive Identification Products: Before applying communications identification products, clean substrates of substances that could impair bond, using materials and methods recommended by manufacturer of identification product.

3.2 INSTALLATION

A. Verify and coordinate identification names, abbreviations, colors, and other features with requirements in other Sections requiring identification applications, Drawings, Shop Drawings, manufacturer's wiring diagrams, and operation and maintenance manual. Use consistent designations throughout Project.

B. Install identifying devices before installing acoustical ceilings and similar concealment.

C. Verify identity of each item before installing identification products.

D. Coordinate identification with Project Drawings, manufacturer's wiring diagrams, and operation and maintenance manual.

E. Apply identification devices to surfaces that require finish after completing finish work.

F. Install signs with approved legend to facilitate proper identification, operation, and maintenance of communications systems and connected items.

G. Elevated Components: Increase sizes of labels, signs, and letters to those appropriate for viewing from the floor.

H. Vinyl Wraparound Labels:

1. Secure tight to surface of raceway or cable at a location with high visibility and accessibility.
2. Attach labels that are not self-adhesive type with clear vinyl tape, with adhesive appropriate to the location and substrate.
3. Provide label 6 inches from cable end.

I. Snap-Around Labels:

1. Secure tight to surface at a location with high visibility and accessibility.
2. Provide label 6 inches from cable end.

J. Self-Adhesive Wraparound Labels:

1. Secure tight to surface at a location with high visibility and accessibility.
2. Provide label 6 inches from cable end.

K. Self-Adhesive Labels:

1. On each item, install unique designation label that is consistent with wiring diagrams, schedules, and operation and maintenance manual.
2. Unless otherwise indicated, provide a single line of text with 1/2-inch- high letters on 1-1/2-inch- high label; where two lines of text are required, use labels 2 inches high.

L. Snap-Around, Color-Coding Bands: Secure tight to surface at a location with high visibility and accessibility.

3.3 IDENTIFICATION SCHEDULE

A. Install identification materials and devices at locations for most convenient viewing without interference with operation and maintenance of equipment. Install access doors or panels to provide view of identifying devices.

B. Identify conductors, cables, and terminals in enclosures and at junctions, terminals, pull points, and locations with high visibility. Identify by system and circuit designation.

C. Accessible Fittings for Raceways and Cables within Buildings: Identify covers of each junction and pull box with self-adhesive labels containing wiring system legend.

1. System legends shall be as follows:

a. Telecommunications.

D. Faceplates: Label individual faceplates with self-adhesive labels. Place label at top of faceplate. Each faceplate shall be labeled with its individual, sequential designation, numbered clockwise when entering room from primary egress, composed of the following, in the order listed:

1. Wiring closet designation.
2. Colon.
3. Faceplate number.

E. Equipment Room Labeling:

1. Racks, Frames, and Enclosures: Identify front and rear of each with self-adhesive labels containing equipment designation.
2. Patch Panels: Label individual rows and outlets, starting at to left and working down, with self-adhesive labels.
3. Data Outlets: Label each outlet with a self-adhesive label indicating the following, in the order listed:

    a. Room number being served.
    b. Colon.
    c. Faceplate number.

F. Backbone Cables: Label each cable with a vinyl-wraparound label or self-adhesive wraparound label indicating the location of the far or other end of the backbone cable. Patch panel or punch down block where cable is terminated should be labeled identically.

G. Horizontal Cables: Label each cable with a vinyl-wraparound label or self-adhesive wraparound label indicating the following, in the order listed:

1. Room number.
2. Colon.
3. Faceplate number.

H. Instructional Signs: Self-adhesive labels.

I. Warning Labels for Indoor Cabinets, Boxes, and Enclosures: Self-adhesive labels.

1. Apply to exterior of door, cover, or other access.

J. Equipment Identification Labels:

1. Indoor Equipment: Self-adhesive label.
2. Outdoor Equipment: Laminated-acrylic or melamine-plastic sign.
3. Equipment to Be Labeled:

    a. Communications cabinets.

END OF SECTION 270553

SECTION 271100 - COMMUNICATIONS EQUIPMENT ROOM FITTINGS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

1. Backboards.
2. Boxes, enclosures, and cabinets.

B. Related Requirements:

1. Section 270536 "Cable Trays for Communications Systems" for cable trays and accessories.
2. Section 271513 "Communications Copper Horizontal Cabling" for copper data cabling associated with system panels and devices.

1.3 DEFINITIONS

A. Access Provider: An operator that provides a circuit path or facility between the service provider and user. An access provider can also be a service provider.

B. BICSI: Building Industry Consulting Service International.

C. Service Provider: The operator of a telecommunications transmission service delivered through access provider facilities.

D. TGB: Telecommunications grounding bus bar.

E. TMGB: Telecommunications main grounding bus bar.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for equipment racks and cabinets.
2. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.

B. Shop Drawings: For communications equipment room fittings. Include plans, elevations, sections, details, and attachments to other work.

1. Detail equipment assemblies and indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
2. Equipment Racks and Cabinets: Include workspace requirements and access for cable connections.
3. Grounding: Indicate location of grounding bus bar and its mounting detail showing standoff insulators and wall mounting brackets.

PART 2 - PRODUCTS

2.1 BACKBOARDS

A. Backboards: Plywood, fire-retardant treated, 3/4 by 48 by 96 inches.

B. Backboard Paint: Refer to Division 09 specifications for painting requirements and room finish schedule in the architectural drawings.

2.2 BOXES, ENCLOSURES, AND CABINETS

A. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

1. Adalet.
2. Crouse-Hinds, an Eaton business.
3. EGS/Appleton Electric.
4. Erickson Electrical Equipment Company.
5. FSR Inc.
6. Hoffman; a brand of Pentair Equipment Protection.
7. Hubbell Incorporated.
8. Hubbell Incorporated; Wiring Device-Kellems.
9. Kraloy.
10. Milbank Manufacturing Co.
11. MonoSystems, Inc.
12. Oldcastle Enclosure Solutions.
13. O-Z/Gedney; a brand of Emerson Industrial Automation.
14. Plasti-Bond.
15. RACO; Hubbell.
16. Spring City Electrical Manufacturing Company.
17. Stahlin Non-Metallic Enclosures.
18. Thomas & Betts Corporation; A Member of the ABB Group.
19. Topaz Electric; a division of Topaz Lighting Corp.
20. Wiremold / Legrand.

B. General Requirements for Boxes, Enclosures, and Cabinets: Boxes, enclosures, and cabinets shall be listed and labeled for intended location and use.

C. Sheet Metal Outlet and Device Boxes: Comply with NEMA OS 1 and UL 514A.

D. Cast-Metal Outlet and Device Boxes: Comply with NEMA FB 1, Type FD, ferrous alloy or aluminum, with gasketed cover.

E. Small Sheet Metal Pull and Junction Boxes: NEMA OS 1.

F. Cast-Metal Access, Pull, and Junction Boxes: Comply with NEMA FB 1 and UL 1773, cast aluminum or galvanized cast iron with gasketed cover.

G. Box extensions used to accommodate new building finishes shall be of same material as recessed box.

H. Device Box Dimensions: 4 inches square by 2-1/8 inches deep or 4 inches by 2-1/8 inches by 2-1/8 inches deep as required by the work.

I. Hinged-Cover Enclosures: Comply with UL 50 and NEMA 250, Type 1 with continuous-hinge cover with flush latch unless otherwise indicated.

1. Metal Enclosures: Steel, finished inside and out with manufacturer's standard enamel.
2. Interior Panels: Steel; all sides finished with manufacturer's standard enamel.

J. Cabinets:

1. NEMA 250, Type 1 galvanized-steel box with removable interior panel and removable front, finished inside and out with manufacturer's standard enamel.
2. Hinged door in front cover with flush latch and concealed hinge.
3. Key latch to match panelboards.
4. Metal barriers to separate wiring of different systems and voltage.
5. Accessory feet where required for freestanding equipment.

PART 3 - EXECUTION

3.1 ENTRANCE FACILITIES

A. Contact telecommunications service provider and arrange for installation of demarcation point, protected entrance terminals, and a housing when so directed by service provider.

B. Comply with requirements in Section 270528 "Pathways for Communications Systems" for materials and installation requirements for underground pathways.

3.2 INSTALLATION

A. Comply with NECA 1.

B. Comply with BICSI's "Telecommunications Distribution Methods Manual" for layout of communications equipment spaces.

C. Comply with BICSI's "Information Technology Systems Installation Methods Manual" for installation of equipment in communications equipment spaces.

D. Bundle, lace, and train conductors and cables to terminal points without exceeding manufacturer's limitations on bending radii. Install lacing bars and distribution spools.

E. Coordinate layout and installation of communications equipment in tracks and in room. Coordinate service entrance configuration with service provider.

1. Meet jointly with systems providers, equipment suppliers, and Owner to exchange information and agree on details of equipment configurations and installation interfaces.
2. Record agreements reached in meetings and distribute them to other participants.
3. Adjust configurations and locations of distribution frames, cross-connects, and patch panels in equipment rooms to accommodate and optimize configurations and space requirements of communications equipment.
4. Adjust configurations and locations of equipment with distribution frames, cross-connects, and patch panels of cabling systems of other communications, electronic safety and security, and related systems that share space in equipment room.

F. Coordinate location of power raceways and receptacles with locations of communications equipment requiring electrical power to operate.

G. Backboards:

1. Install from 6 inches to 8 feet, 6 inches above finished floor. If plywood is fire rated, ensure that fire-rating stamp is visible after installation.
2. Paint all sides of backboard with two coats of paint, leaving fire rating stamp visible.
3. Comply with requirements for backboard installation in BICSI's "Information Technology Systems Installation Methods Manual" and TIA-569-D.

3.3 FIRESTOPPING

A. Comply with requirements in Section 078413 "Penetration Firestopping."

B. Comply with TIA-569-D, Annex A, "Firestopping."

C. Comply with BICSI's "Information Technology Systems Installation Methods Manual," "Firestopping Practices" Ch.

END OF SECTION 271100

SECTION 271116 - COMMUNICATIONS RACKS, FRAMES, AND ENCLOSURES

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

1. 19-inch equipment racks with cable management.
2. Grounding.
3. Labeling.

B. Related Requirements:

1. Section 271110 "Communications Equipment Room Fittings" for backboards and accessories.
2. Section 270526 "Grounding and Bonding for Telecommunications Equipment" for TMGBs and TGBs.
3. Section 270536 "Cable Trays for Communications Systems" for cable trays and cable tray accessories.
4. Section 271513 "Communications Copper Horizontal Cabling" for copper data cabling associated with system panels and devices.

1.3 DEFINITIONS

A. Access Provider: An operator that provides a circuit path or facility between the service provider and user. An access provider can also be a service provider.

B. BICSI: Building Industry Consulting Service International.

C. LAN: Local area network.

D. Service Provider: The operator of a telecommunications transmission service delivered through access provider facilities.

E. TGB: Telecommunications grounding bus bar.

F. TMGB: Telecommunications main grounding bus bar.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for equipment racks and cabinets.
2. Include rated capacities, operating characteristics, electrical characteristics, certifications, standards compliance, and furnished specialties and accessories.

B. Shop Drawings: For communications racks, frames, and enclosures. Include plans, elevations, sections, details, and attachments to other work.

1. Detail equipment assemblies and indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
2. Equipment Racks and Cabinets: Include workspace requirements and access for cable connections.
3. Grounding: Indicate location of TGB and its mounting detail showing standoff insulators and wall-mounting brackets.

1.5 QUALITY ASSURANCE

A. Installer Qualifications: Cabling installer must have personnel certified by BICSI on staff.

1. Layout Responsibility: Preparation of Shop Drawings shall be under direct supervision of a Technician.
2. Installation Supervision: Installation shall be under direct supervision of a Technician, who shall be present at all times when Work of this Section is performed at Project site
3. Field Inspector: Currently registered by BICSI as Technician to perform on-site inspection.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. UL listed.

B. RoHS compliant.

C. Compliant with requirements of the Payment Card Industry Data Security Standard.

2.2 BACKBOARDS

A. Backboards: Plywood, fire-retardant treated, 3/4 by 48 by 96 inches. Comply with requirements for plywood backing panels specified in Section 061000 "Rough Carpentry."

2.3 19-INCH EQUIPMENT RACKS

A. Description: Four-post racks with threaded rails designed for mounting telecommunications equipment. Width is compatible with EIA/ECIA 310-E, 19-inch equipment mounting with an opening of 17.72-inches between rails. Provide number of racks as required per drawings.

B. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

1. Commscope, Inc.
2. Chatsworth Products
3. Belden Inc.
4. Black Box Corporation.
5. B-line, an Eaton business.
6. Emerson Network Power Connectivity Solutions.
7. Hammond Mfg. Co. Inc.
8. Hubbell Premise Wiring.
9. Kendall Howard.
10. Leviton Manufacturing Co., Inc.
11. Middle Atlantic Products, Inc.
12. Ortronics, Inc.
13. Panduit Corp.
14. Siemon Co. (The).
15. Tripp-Lite.

**Contractor shall utilize Graybar, Anixter, CDW-G, or approved equivalent.

C. General Requirements:

1. Frames: Modular units designed for telecommunications terminal support and coordinated with dimensions of units to be supported.
2. Material: Extruded steel, extruded aluminum, sheet steel, or sheet aluminum.
3. Finish: Manufacturer's standard, baked-polyester powder coat.
4. Color: Black.

D. Floor-Mounted Racks:

1. Overall Height: 84 inches.
2. Overall Depth: 23 inches.
3. Upright Depth: 6 inches.
4. Four-Post Load Rating: 1000 lb.
5. Number of Rack Units per Rack: 44.
    a. Numbering: Every rack unit, on interior of rack.
6. Threads: 12-24.
7. Vertical and horizontal cable management channels, top and bottom cable troughs, grounding lug.
8. Base shall have a minimum of four mounting holes for permanent attachment to floor.
9. Top shall have provisions for attaching to cable tray or ceiling.
10. Self-leveling.

11. Provide blanking panel immediately below each Ethernet switch in rack.

    a. Commscope 760162065 CPP-FPANEL-19-1U

12. Provide 26” deep UPS shelf at bottom of each rack.

    a. Chatsworth CPI-11054-719

13. Racks shall be configured with fiber patch panel and patch cord manager at top of rack, then in repeating sequence 48-port copper patch panel, 1U horizontal cable manager, Ethernet switch, 1U blanking panel. See rack detail on drawings for example.

E. Wall-Mounted Racks

1. Overall Height: 36 inches.
2. Overall Depth: 30 inches
3. Load Rating: 300 lbs
4. Number of rack Units per Rack: 19
5. Threads: 12-24.
6. Wall Attachment: Four mounting holes.
7. Equipment Access: Integral swing.
8. Horizontal cable management channels, top and bottom cable troughs, grounding lug.
9. Top shall have provisions for attaching to cable tray or ceiling.
10. Provide blanking panel immediately below each Ethernet switch in rack.

    a. Commscope 760162065 CPP-FPANEL-19-1U

11. Racks shall be configured with fiber patch panel and patch cord manager at top of rack, then in repeating sequence 48-port copper patch panel, 1U horizontal cable manager, Ethernet switch, 1U blanking panel. See rack detail on drawings for example.

F. Harsh Environment Enclosure

1. Overall Height: 24 inches.
2. Overall Depth: 30 inches
3. Load Rating: 100 lbs
4. Number of rack Units per Rack: 12
5. Threads: 12-24.
6. Wall mounting.
7. Rating: NEMA 4/4X (IP66).
8. Door: Gasketed and Lockable (3-point locking)
9. Horizontal cable management channels, top and bottom cable troughs, grounding lug.
10. Provide blanking panel immediately below each Ethernet switch in rack.

    a. Commscope 760162065 CPP-FPANEL-19-1U

11. Cabinets shall be configured with fiber patch panel and patch cord manager at top of rack, then in repeating sequence 48-port copper patch panel, 1U horizontal cable manager, Ethernet switch, 1U blanking panel. See rack detail on drawings for example.

G. Cable Management:

1. Metal, with integral wire retaining fingers.
2. Baked-polyester powder coat finish.
3. Vertical cable management panels shall have front and rear channels, with covers.
4. Provide horizontal cable manager immediately below each 48-port patch panel in rack.

a. Commscope NETCONNECT 1933530-1

2.4 GROUNDING

A. Comply with requirements in Section 270526 "Grounding and Bonding for Communications Systems" for grounding conductors and connectors.

B. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

1. Chatsworth Products, Inc.
2. Harger Lightning & Grounding.
3. Panduit Corp.

C. Rack and Cabinet TGBs: Rectangular bars of hard-drawn solid copper, accepting conductors ranging from No. 14 to No. 2/0 AWG, NRTL listed as complying with UL 467, and complying with TIA-606-B. Predrilling shall be with holes for use with lugs specified in this Section.

1. Rack-Mounted Horizontal TGB: Designed for mounting in 19- or 23-inch equipment racks. Include a copper splice bar for transitioning to an adjoining rack, and stainless-steel or copper-plated hardware for attachment to the rack.

2.5 LABELING

A. Comply with TIA-606-B and UL 969 for a system of labeling materials, including label stocks, laminating adhesives, and inks used by label printers.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Comply with NECA 1.

B. Comply with BICSI TDMM for layout of communications equipment spaces.

C. Comply with BICSI ITSIMM for installation of communications equipment spaces.

D. Bundle, lace, and train conductors and cables to terminal points without exceeding manufacturer's limitations on bending radii. Install lacing bars and distribution spools.

E. Coordinate layout and installation of communications equipment in racks and room. Coordinate service entrance configuration with service provider.

1. Meet jointly with system providers, equipment suppliers, and Owner to exchange information and agree on details of equipment configurations and installation interfaces.
2. Record agreements reached in meetings and distribute them to other participants.
3. Adjust configurations and locations of distribution frames, cross-connects, and patch panels in equipment spaces to accommodate and optimize configuration and space requirements of telecommunications equipment.
4. Adjust configurations and locations of equipment with distribution frames, cross-connects, and patch panels of cabling systems of other communications, electronic safety and security, and related systems that share space in equipment room.

F. Coordinate location of power raceways and receptacles with locations of communications equipment requiring electrical power to operate.

3.2 GROUNDING

A. Install grounding according to BICSI ITSIMM, "Bonding, Grounding (Earthing) and Electrical Protection" Ch.

B. Locate TGB to minimize length of bonding conductors. Fasten to wall, allowing at least 2 inches of clearance behind TGB. Connect TGB with a minimum No. 4 AWG grounding electrode conductor from TGB to suitable electrical building ground. Connect rack TGB to near TGB or the TMGB.

1. Bond the shield of shielded cable to patch panel, and bond patch panel to TGB or TMGB.

3.3 IDENTIFICATION

A. Coordinate system components, wiring, and cabling complying with TIA-606-B. Comply with requirements in Section 270553 "Identification for Electrical Systems."

B. Comply with requirements in Section 099123 "Interior Painting" for painting backboards. For fire-resistant plywood, do not paint over manufacturer's label.

C. Paint and label colors for equipment identification shall comply with TIA-606-B for Class 2 level of administration.

D. Labels shall be machine printed. Type shall be 1/8 inch in height.

END OF SECTION 271116

SECTION 271323 - COMMUNICATIONS OPTICAL FIBER BACKBONE CABLING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. 9/125 micrometer single-mode, indoor-outdoor optical fiber cable (OS2).
2. Optical fiber cable connecting hardware, patch panels, and cross-connects.
3. Cabling identification products.

1.2 OPTICAL FIBER BACKBONE CABLING DESCRIPTION

A. Optical fiber backbone cabling system shall provide interconnections between communications equipment rooms, main terminal space, and entrance facilities in the telecommunications cabling system structure. Cabling system consists of backbone cables, intermediate and main cross-connects, mechanical terminations, and patch cords or jumpers used for backbone-to-backbone cross-connection.

B. Backbone cabling cross-connects may be located in communications equipment rooms or at entrance facilities. Bridged taps and splitters shall not be used as part of backbone cabling.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Shop Drawings: Reviewed and stamped by RCDD.

1. System Labeling Schedules: Electronic copy of labeling schedules that are part of the cabling and asset identification system of the software.
2. Cabling administration drawings and printouts.
3. Wiring diagrams to show typical wiring schematics including the following:

a. Telecommunications rooms plans and elevations.
b. Telecommunications pathways.
c. Telecommunications system access points.
d. Telecommunications grounding system
e. Cross-connects.
f. Patch panels.
g. Patch cords.

4. Cross-connects and patch panels.

C. Optical fiber cable testing plan.

1.4 CLOSEOUT SUBMITTALS

A. Maintenance data.

1.5 QUALITY ASSURANCE

A. Installer Qualifications: Cabling Installer must have personnel certified by BICSI on staff.

1. Layout Responsibility: Preparation of Shop Drawings by an RCDD.
2. Installation Supervision: Installation shall be under the direct supervision of Technician, who shall be present at all times when Work of this Section is performed at Project site.

B. Surface-Burning Characteristics: As determined by testing identical products according to ASTM E 84 by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

1. Flame-Spread Index: 25 or less.
2. Smoke-Developed Index: 50 or less.

1.6 COORDINATION

A. Coordinate layout and installation of telecommunications pathways and cabling with Owner's telecommunications and LAN equipment and service suppliers.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. General Performance: Backbone cabling system shall comply with transmission standards in TIA-568-C.1, when tested according to test procedures of this standard.

B. Surface-Burning Characteristics: As determined by testing identical products according to ASTM E 84 by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

1. Flame-Spread Index: 25 or less.
2. Smoke-Developed Index: 50 or less.

C. Telecommunications Pathways and Spaces: Comply with TIA-569-D.

D. Grounding: Comply with TIA-607-B.

2.2 9/125 MICROMETER SINGLE-MODE, INDOOR-OUTDOOR OPTICAL FIBER CABLE (OS2)

A. Manufacturers: Subject to compliance with requirements, provide product listed below:

1. Belden CDT Networking Division/NORDX.
2. Berk-Tek Leviton; a Nexans/Leviton alliance.
3. Corning Cable Systems.
4. Dynacom Corporation.

**Contractor shall utilize Graybar, Anixter, CDW-G, or approved equivalent.

B. Description: Single mode, 9/125-micrometer, 12 fibers, single loose tube, optical fiber cable.

C. Standards:

1. Comply with TIA-492CAAA for detailed specifications.
2. Comply with TIA-568-C.3 for performance specifications.
3. Comply with ICEA S-104-696 for mechanical properties.

D. Maximum Attenuation: 0.4 dB/km at 1310 nm; 0.3 dB/km at 1550 nm.

E. Jacket:

1. Jacket Color: Blue.
2. Cable cordage jacket, fiber, unit, and group color shall be according to TIA-598-D.
3. Imprinted with fiber count, fiber type, and aggregate length at regular intervals not to exceed 40 inches.

F. Listed and labeled by an NRTL acceptable to authorities having jurisdiction as complying with UL 444, UL 1651, and NFPA 70 for the following types:

1. Plenum Rated, Nonconductive: Type OFNP, complying with NFPA 262.
2. Plenum Rated, Nonconductive: Type OFNP, or Type OFNR in metallic conduit.
3. Plenum Rated, Nonconductive: Type OFNP, complying with NFPA 262; Type OFNP in listed plenum communications raceway; or Type OFN, Type OFNG, Type OFNP, or Type OFNR in metallic conduit.
4. Riser Rated, Nonconductive: Type OFNR or Type OFNP, complying with UL 1666.

2.3 OPTICAL FIBER CABLE HARDWARE

A. Standards:

1. Comply with Optical Fiber Connector Intermateability Standard specifications of the TIA-604 series.
2. Comply with TIA-568-C.3.

B. Cross-Connects and Patch Panels: Modular panels housing multiple-numbered, duplex cable connectors.

1. Number of Connectors per Field: One for each fiber of cable or cables assigned to field, plus spares and blank positions adequate to suit specified expansion criteria.

C. Patch Cords: Factory-made, dual-fiber cables in 36-inch (900-mm) lengths.

D. Connector Type: Type LC complying with TIA-604-10-B connectors.

E. Plugs and Plug Assemblies:

1. Male; color-coded modular telecommunications connector designed for termination of a single optical fiber cable.
2. Insertion loss not more than 0.25 > dB.

F. Jacks and Jack Assemblies:

1. Female; quick-connect, simplex and duplex; fixed telecommunications connector designed for termination of a single optical fiber cable.
2. Insertion loss not more than 0.25> dB.

2.4 GROUNDING

A. Comply with requirements in Section 270526 "Grounding and Bonding for Communications Systems" for grounding conductors and connectors.

B. Comply with TIA-607-B.

2.5 IDENTIFICATION PRODUCTS

A. Comply with TIA-606-B and UL 969 for a system of labeling materials, including label stocks, laminating adhesives, and inks used by label printers.

2.6 SOURCE QUALITY CONTROL

A. Testing Agency: Engage a qualified testing agency to evaluate cables.

B. Factory test multimode optical fiber cables according to TIA-526-14-B and TIA-568-C.3.

C. Cable will be considered defective if it does not pass tests and inspections.

D. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 ENTRANCE FACILITIES

A. Coordinate backbone cabling with the protectors and demarcation point provided by communications service provider.

3.2 WIRING METHODS

A. Wiring Method: Install cables in raceways and cable trays except within consoles, cabinets, desks, and counters. Conceal raceway and cables except in unfinished spaces.

1. Install plenum cable in environmental air spaces, including plenum ceilings.
2. Comply with requirements for pathways specified in Section 260533 "Raceways and Boxes for Electrical Systems."

B. Wiring Method: Conceal conductors and cables in accessible ceilings, walls, and floors where possible.

C. Wiring within Enclosures: Bundle, lace, and train cables within enclosures. Connect to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Provide and use lacing bars and distribution spools.

3.3 INSTALLATION OF OPTICAL FIBER BACKBONE CABLES

A. Comply with NECA 1, NECA 301, and NECA/BICSI 568.

B. General Requirements for Optical Fiber Cabling Installation:

1. Comply with TIA-568-C.1 and TIA-568-C.3.
2. Comply with BICSI ITSIMM, Ch. 6, "Cable Termination Practices."
3. Terminate all cables; no cable shall contain unterminated elements. Make terminations only at indicated outlets, terminals, cross-connects, and patch panels.
4. Cables may not be spliced. Secure and support cables at intervals not exceeding 30 inches and not more than 6 inches from cabinets, boxes, fittings, outlets, racks, frames, and terminals.
5. Install lacing bars to restrain cables, to prevent straining connections, and to prevent bending cables to smaller radii than minimums recommended by manufacturer.
6. Bundle, lace, and train cable to terminal points without exceeding manufacturer's limitations on bending radii, but not less than radii specified in BICSI ITSIMM, "Cabling Termination Practices" Chapter. Use lacing bars and distribution spools.
7. Do not install bruised, kinked, scored, deformed, or abraded cable. Do not splice cable between termination, tap, or junction points. Remove and discard cable if damaged during installation and replace it with new cable.
8. Cold-Weather Installation: Bring cable to room temperature before dereeling. Heat lamps shall not be used for heating.
9. In the equipment rooms (IT Rooms), provide a 20-foot long service loop on each end of cable.
10. Pulling Cable: Comply with BICSI ITSIMM, Ch. 4, "Pulling Cable." Monitor cable pull tensions.
11. Cable may be terminated on connecting hardware that is rack or cabinet mounted.

C. Open-Cable Installation:

1. Install cabling with horizontal and vertical cable guides in telecommunications spaces with terminating hardware and interconnection equipment.
2. Cable shall not be run through structural members or in contact with pipes, ducts, or other potentially damaging items.

D. Group connecting hardware for cables into separate logical fields.

3.4 FIRESTOPPING

A. Comply with requirements in Section 078413 "Penetration Firestopping."

B. Comply with TIA-569-D, Annex A, "Firestopping."

C. Comply with BICSI ITSIMM, "Firestopping" Chapter.

3.5 IDENTIFICATION

A. Identify system components, wiring, and cabling complying with TIA-606-B. Comply with requirements for identification specified in Section 260553 "Identification for Electrical Systems."

1. Administration Class: Class 1.
2. Color-code cross-connect fields and apply colors to voice and data service backboards, connections, covers, and labels.

B. Cable and Wire Identification:

1. Label each cable within 4 inches of each termination and tap, where it is accessible in a cabinet or junction or outlet box, and elsewhere as indicated.
2. Each wire connected to building-mounted devices is not required to be numbered at device if color of wire is consistent with associated wire connected and numbered within panel or cabinet.
3. Exposed Cables and Cables in Cable Trays and Wire Troughs: Label each cable at intervals not exceeding 15 feet.
4. Label each unit and field within distribution racks and frames.
5. Identification within Connector Fields in Equipment Rooms and Wiring Closets: Label each connector and each discrete unit of cable-terminating and connecting hardware. Where similar jacks and plugs are used for both voice and data communication cabling, use a different color for jacks and plugs of each service.

C. Labels shall be preprinted or computer-printed type with printing area and font color that contrasts with cable jacket color but still complies with requirements in TIA 606-B, for the following:

1. Flexible vinyl or polyester that flexes as cables are bent.

3.6 FIELD QUALITY CONTROL

A. Testing Agency: Engage a qualified testing agency to perform tests and inspections.

B. Tests and Inspections:

1. Visually inspect optical fiber jacket materials for NRTL certification markings. Inspect cabling terminations in communications equipment rooms for compliance with color-coding for pin assignments and inspect cabling connections for compliance with TIA-568-C.1.

2. Visually inspect cable placement, cable termination, grounding and bonding, equipment and patch cords, and labeling of all components.
3. Optical Fiber Cable Tests:

    a. Test instruments shall meet or exceed applicable requirements in TIA-568-C.1. Use only test cords and adapters that are qualified by test equipment manufacturer for channel or link test configuration.
    b. Link End-to-End Attenuation Tests:
        1) Attenuation test results for backbone links shall be less than 0.4 dB/km. Attenuation test results shall be less than those calculated according to equation in TIA-568-C.1.

C. Data for each measurement shall be documented. Data for submittals shall be printed in a summary report that is formatted similar to Table 10.1 in BICSI TDMM, or transferred from the instrument to the computer, saved as text files, and printed and submitted.

D. Remove and replace cabling where test results indicate that it does not comply with specified requirements.

E. End-to-end cabling will be considered defective if it does not pass tests and inspections.

F. Prepare test and inspection reports.

END OF SECTION 271323

SECTION 271513 - COMMUNICATIONS COPPER HORIZONTAL CABLING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

A. The communication system installation is to be based on the requirements described in this specification and related drawings.

1.2 SUMMARY

A. Section Includes:

1. Pathways.
2. UTP cabling.
3. Cable connecting hardware, patch panels, and cross-connects.
4. Telecommunications outlet/connectors.
5. Cabling system identification products.

1.3 DEFINITIONS

A. BICSI: Building Industry Consulting Service International.

B. Cross-Connect: A facility enabling the termination of cable elements and their interconnection or cross-connection.

C. EMI: Electromagnetic interference.

D. IDC: Insulation displacement connector.

E. LAN: Local area network.

F. Outlet/Connectors: A connecting device in the work area on which horizontal cable or outlet cable terminates.

G. UTP: Unshielded twisted pair.

1.4 HORIZONTAL CABLING DESCRIPTION

A. Horizontal cable and its connecting hardware provide the means of transporting signals between the telecommunications outlet/connector and the horizontal patch panel located in the communications equipment room. This cabling and its connecting hardware are called "permanent link," a term that is used in the testing protocols.

B. The maximum allowable horizontal cable length is 295 feet. This maximum allowable length does not include an allowance for the length of 16 feet to the workstation equipment. The maximum allowable length does not include an allowance for the length of 16 feet in the horizontal cross-connect.

1.5 PERFORMANCE REQUIREMENTS

A. General Performance: Horizontal cabling system shall comply with transmission standards in TIA/EIA-568-B.1, when tested according to test procedures of this standard.

1.6 SUBMITTALS

A. Product Data: For each type of product indicated.

1. For all cable types, include the following installation data for each type used:

a. Nominal OD.
b. Minimum bending radius.
c. Maximum pulling tension.

B. Shop Drawings:

1. System Labeling Schedules
2. Cabling administration drawings and printouts.
3. Wiring diagrams to show typical wiring schematics, including the following:

a. Cross-connects.
b. Patch panels.
c. Patch cords.

4. Cross-connects and patch panels. Detail mounting assemblies and show elevations and physical relationship between the installed components.

C. Qualification Data: Submit data of installer's experience and qualifications.

D. Source quality-control reports.

E. Field quality-control reports.

F. Operation and Maintenance Data: For system components specified herein to include in operation and maintenance manuals.

G. Network Documentation: Contractor shall provide complete set of the following network documentation upon completion of the job and prior to final acceptance.

1. Final As-Built Drawings – must show the location of each network device and general cable routing.
2. Materials and Components Listing – complete listing of all materials used in the system including manufacturer, part no., and distributor (name, address, and phone number).

3. Patching Map – located near each patch panel showing device or cable that is connected to each patch panel position.
4. Network Layout Diagram – notebook size drawing of facility showing active/passive system layout from faceplate to distribution frame.

1.7 QUALITY ASSURANCE

A. Installer Qualifications: Prior to installation, submit data of installer's experience and qualifications which shall include 3 years on projects of similar complexity. Include names and locations of two projects successfully completed using copper communications cabling systems. Include written certification from users that systems have performed satisfactorily for not less than 18 months. Include specific experience in installing and testing structured telecommunications distribution systems using Category 6 (10 GBPS) unshielded twisted pair. Additionally, experience shall include various interface fabrications for listed cable types.

B. Surface-Burning Characteristics: As determined by testing identical products according to ASTM E 84 by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

1. Flame-Spread Index: 25 or less.
2. Smoke-Developed Index: 50 or less.

C. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

1.8 DELIVERY, STORAGE, AND HANDLING

A. Test cables upon receipt at Project site.

1. Test each pair of UTP cable for open and short circuits.

1.9 PROJECT CONDITIONS

A. Environmental Limitations: Do not deliver or install cables and connecting materials until wet work in spaces is complete and dry, and temporary HVAC system is operating and maintaining ambient temperature and humidity conditions at occupancy levels during the remainder of the construction period.

1.10 COORDINATION

A. Coordinate layout and installation of telecommunications pathways and cabling with Owner's telecommunications and LAN equipment and service suppliers.

B. Coordinate telecommunications outlet/connector locations with location of power receptacles at each work area.

PART 2 - PRODUCTS

2.1 PATHWAYS

A. General Requirements: Comply with TIA/EIA-569-A.

B. Cable Support: NRTL labeled for support of Category 6 cabling, designed to prevent degradation of cable performance and pinch points that could damage cable.

1. Support brackets with cable tie slots for fastening cable ties to brackets.
2. Lacing bars, spools, J-hooks, bridle rings, and D-rings.
3. Straps and other devices.

C. Cable Trays: Comply with requirements in Section 270536 "Cable Trays for Communications Systems".

D. Conduit and Boxes: Comply with requirements in Section 270582 "Pathways for Communication Systems.

2.2 UTP CABLE

A. Manufacturers: Subject to compliance with requirements, provide product listed below:

1. Commscope Systimax GigaSPEED XL or approved equal. Contractor shall utilize Graybar, Anixter, CDW-G, or approved equal.

B. Description: Four-pair, balanced twisted pair cable, certified to meet transmission characteristics of Category 6 cable at frequencies up to 500 MHz.

C. Standard: Comply with TIA-568-C.2 for Category 6 cables.

D. Conductors: 100-ohm, 23 AWG solid copper.

E. Shielding/Screening: Unshielded twisted pairs (UTP).

F. Cable Rating: CMP, plenum.

G. Jacket: Thermoplastic, jacket color as indicated on drawings for respective system use.

2.3 TWISTED PAIR CABLE HARDWARE

A. Manufacturers: Subject to compliance with requirements, provide product by manufacturer listed below:

1. Panduit. Conduit shall utilize Graybar, Anixter, CDW-G, or approved equal.

B. General Requirements for Cable Connecting Hardware: Comply with TIA/EIA-568-B.2, IDC type, with modules designed for punch-down caps or tools. Cables shall be terminated with connecting hardware of same category or higher.

C. Connecting Blocks:

1. 110-style IDC for Category 6.
2. Provide blocks for the number of cables terminated on the block, plus 20 percent spare, integral with connector bodies, including plugs and jacks where indicated.

D. Cross-Connect: Modular array of connecting blocks arranged to terminate building cables and permit interconnection between cables.

E. Patch Panel: Modular panels housing multiple-numbered jack units with Category 6 RJ-45 ports on front of panel and 110-style IDC punchdowns on back for permanent termination of pair groups of installed cables.

1. Universal T568A and T568B wiring labels.
2. Labeling areas adjacent to conductors.
3. Patch panels shall be 48-port type for terminating UTP. Provide number of patch panels for each outlet cabled, plus an additional 20% spare.

F. Patch Cords: Factory-made, 4-pair cables in 12-inch lengths; terminated with 8-position modular plug at each end.

1. Patch cords shall have bend-relief-compliant boots and color-coded icons to ensure Category 6 performance. Patch cords shall have latch guards to protect against snagging.
2. Patch cords shall have color-coded boots for circuit identification.
3. Provide one patch cord for every communications port cabled, plus an additional 20% spare.
4. Patch cords shall meet Category 6 UTP cabling specifications.
5. Patch cords shall have jacket colors to match systems cabling as specified herein and on drawings.
6. Commscope Systimax GigaSPEED XL or approved equal. Contractor shall utilize Graybar, Anixter, CDW-G, or approved equal.

G. Plugs and Plug Assemblies:

1. Male; eight position; color-coded modular telecommunications connector designed for termination of a single four-pair, 100-ohm, unshielded or shielded twisted pair cable.
2. Standard: Comply with TIA-568-C.2.

2.4 TELECOMMUNICATIONS OUTLET/CONNECTORS

A. Jacks: 100-ohm, balanced, twisted-pair connector; four-pair, RJ-45, Category, 6 eight-position modular, color to match respective cabling. Comply with TIA/EIA-568-B.1. Designed to snap-in to a patch panel or cover plate.

1. Panduit. Contractor shall utilize Graybar, Anixter, CDW-G, or approved equal.

B. Workstation Outlets: Four-port-connector assemblies mounted in single faceplate. Provide number of jacks in each workstation outlet to match number shown on contract drawings. Unused ports shall be provided with blank inserts.

1. Metal Cover Plate: Stainless steel, complying with requirements in Section 260533.16 "Boxes and Covers for Electrical Systems."
2. Legend: Snap-in, clear-label covers and machine-printed paper inserts.

C. Wireless Access Point Outlets: Single-port keystone surface block (biscuit box) assembly.

1. Legend: Snap-in, clear-label covers and machine-printed paper inserts.

2.5 GROUNDING

A. Comply with requirements in Section 270526 "Grounding and Bonding for Communication Systems" for grounding conductors and connectors.

B. Comply with ANSI-J-STD-607-A.

2.6 IDENTIFICATION PRODUCTS

A. Comply with TIA/EIA-606-A and UL 969 for labeling materials, including label stocks, laminating adhesives, and inks used by label printers.

2.7 SOURCE QUALITY CONTROL

A. Testing Agency: Engage a qualified testing agency to evaluate cables.

B. Factory test cables on reels according to TIA-568-C.1.

C. Factory test twisted pair cables according to TIA-568-C.2.

D. Cable will be considered defective if it does not pass tests and inspections.

E. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 WIRING METHODS

A. Wiring Method: Install cables in raceways, bridle rings, and cable trays except within consoles, cabinets, desks, and counters. Conceal raceway and cables except in unfinished spaces.

1. Install plenum cable in environmental air spaces, including plenum ceilings.
2. Comply with requirements for raceways and boxes specified in Division 26 Section "Raceway and Boxes for Electrical Systems."

B. Wiring within Enclosures: Bundle, lace, and train cables within enclosures. Connect to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Provide and use lacing bars and distribution spools.

3.2 INSTALLATION OF PATHWAYS

A. Comply with requirements for demarcation point, cabinets, and racks specified in Section 271100 "Communications Equipment Room Fittings."

B. Comply with Section 270528 "Pathways for Communications Systems."

C. Comply with Section 270529 "Hangers and Supports for Communications Systems."

D. Comply with Section 270536 "Cable Trays for Communications Systems."

E. Drawings indicate general arrangement of pathways and fittings.

F. Comply with TIA/EIA-569-A for pull-box sizing and length of conduit and number of bends between pull points.

G. Install manufactured conduit sweeps and long-radius elbows whenever possible.

H. Pathway Installation in Communications Equipment Rooms:

1. Position conduit ends adjacent to a corner on backboard where a single piece of plywood is installed, or in the corner of room where multiple sheets of plywood are installed around perimeter walls of room.
2. Install cable trays to route cables if conduits cannot be located in these positions.
3. Secure conduits to backboard when entering room from overhead.
4. Extend conduits 3 inches above finished floor.
5. Install metal conduits with grounding bushings and connect with grounding conductor to grounding system.

I. Backboards: Install backboards with 96-inch dimension vertical. Butt adjacent sheets tightly and form smooth gap-free corners and joints.

3.3 INSTALLATION OF CABLES

A. Comply with NECA 1.

B. General Requirements for Cabling:

1. Comply with TIA/EIA-568-B.1.
2. Comply with BICSI ITSIM, Ch. 6, "Cable Termination Practices."
3. Install 110-style IDC termination hardware unless otherwise indicated.
4. Terminate all conductors; no cable shall contain unterminated elements. Make terminations only at indicated outlets, terminals, and patch panels.
5. Cables may not be spliced. Secure and support cables at intervals not exceeding 30 inches and not more than 6 inches from cabinets, boxes, fittings, outlets, racks, frames, and terminals.
6. Install lacing bars to restrain cables, to prevent straining connections, and to prevent bending cables to smaller radii than minimums recommended by manufacturer.

7. Bundle, lace, and train conductors to terminal points without exceeding manufacturer's limitations on bending radii, but not less than radii specified in BICSI ITSIM, "Cabling Termination Practices" Chapter. Use lacing bars and distribution spools.
8. Do not install bruised, kinked, scored, deformed, or abraded cable. Do not splice cable between termination, tap, or junction points. Remove and discard cable if damaged during installation and replace it with new cable.
9. Cold-Weather Installation: Bring cable to room temperature before de-reeling. Heat lamps shall not be used for heating.
10. In the communications equipment room and headend locations, install 15-foot-long service loops on each end of cable.
11. At telecommunications and user interface outlets leave 5-foot length of slack cable coiled above ceiling.
12. Pulling Cable: Comply with BICSI ITSIM, Ch. 4, "Pulling Cable." Monitor cable pull tensions.
13. Cable shall be installed in 4" conduit sleeves where required to pass through walls.

C. UTP Cable Installation:

1. Comply with TIA/EIA-568-B.2. Cabling shall be terminated per T568B pin/pair assignment.
2. Do not untwist UTP cables more than 1/4 inch from the point of termination to maintain cable geometry.
3. Whenever possible, avoid running UTP in locations where temperature will be below 40 degrees Fahrenheit or above 115 degrees Fahrenheit. Humidity should normally be in the range of 8-80%.
4. From each telecommunications outlet, route cabling (number as required per drawings) in 1 inch conduit to above ceiling. Install nylon bushing on end of conduit for cable protection. Provide and install j-hooks for cable routing between end of conduit stub-ups and cable tray. Route cabling to nearest telecommunications room and terminate on designated patch panel. For locations with exposed ceilings or in locations with inaccessible ceilings, route cabling in conduit for entire length to cable tray.

D. Open-Cable Installation:

1. Install cabling with horizontal and vertical cable guides in telecommunications spaces with terminating hardware and interconnection equipment.
2. Suspend UTP cable not in a wireway or pathway, a minimum of 8 inches above ceilings by cable supports not more than 60 inches apart.
3. Cable shall not be run through structural members or in contact with pipes, ducts, or other potentially damaging items.

E. Group connecting hardware for cables into separate logical fields.

F. Separation from EMI Sources:

1. Comply with recommendations from BICSI's "Telecommunications Distribution Methods Manual" and TIA-569-D for separating unshielded copper communication cable from potential EMI sources, including electrical power lines and equipment.
2. Separation between open communications cables or cables in nonmetallic raceways and unshielded power conductors and electrical equipment shall be as follows:

a. Electrical Equipment Rating Less Than 2 kVA: A minimum of 5 inches.
b. Electrical Equipment Rating between 2 and 5 kVA: A minimum of 12 inches.
c. Electrical Equipment Rating More Than 5 kVA: A minimum of 24 inches.

3. Separation between communications cables in grounded metallic raceways and unshielded power lines or electrical equipment shall be as follows:

a. Electrical Equipment Rating Less Than 2 kVA: A minimum of 2-1/2 inches.
b. Electrical Equipment Rating between 2 and 5 kVA: A minimum of 6 inches.
c. Electrical Equipment Rating More Than 5 kVA: A minimum of 12 inches.

4. Separation between communications cables in grounded metallic raceways, power lines, and electrical equipment located in grounded metallic conduits or enclosures shall be as follows:

a. Electrical Equipment Rating Less Than 2 kVA: No requirement.
b. Electrical Equipment Rating between 2 and 5 kVA: A minimum of 3 inches.
c. Electrical Equipment Rating More Than 5 kVA: A minimum of 6 inches.

5. Separation between Communications Cables and Electrical Motors and Transformers, 5 kVA or HP and Larger: A minimum of 48 inches.
6. Separation between Communications Cables and Fluorescent Fixtures: A minimum of 5 inches.

3.4 FIRESTOPPING

A. Comply with requirements in Section 078413 "Penetration Firestopping."

B. Comply with TIA-569-D, Annex A, "Firestopping."

C. Comply with "Firestopping Systems" Article in BISCI's "Telecommunications Distribution Methods Manual."

3.5 GROUNDING

A. Comply with requirements in Section 27056 "Grounding and Bonding for Communication Systems" for grounding conductors and connectors.

B. Install grounding according to BICSI TDMM, "Grounding, Bonding, and Electrical Protection" Chapter.

C. Comply with ANSI-J-STD-607-A.

D. Locate grounding bus bar to minimize the length of bonding conductors. Fasten to wall allowing at least 2-inch clearance behind the grounding bus bar. Connect grounding bus bar with a minimum No. 4 AWG grounding electrode conductor from grounding bus bar to suitable electrical building ground.

E. Bond metallic equipment to the grounding bus bar, using not smaller than No. 6 AWG equipment grounding conductor.

3.6 IDENTIFICATION

A. Identify all system components, wiring, and cabling. All labels must be easily viewable. All cables, components and device identities must be unique.

B. Comply with Section 270533 "Identification for Communications Systems."

C. Cable and Wire Identification:

1. Label each cable within 6 inches of workstation faceplate and within 12 inches of termination at distribution frame equipment.
2. Exposed Cables and Cables in Cable Trays and Wire Troughs: Label each cable at intervals not exceeding 25 feet.
3. UTP cable labels shall indicate workstation faceplate room of termination, connection type, and connection number. See drawings for requirements.

D. Labels shall be preprinted or computer-printed type with printing area and font color that contrasts with cable jacket color but still complies with requirements in TIA/EIA 606-A, for the following:

1. Cables use flexible vinyl or polyester that flexes as cables are bent.

E. Wireless Access Point Identification:

1. Install black engraved phenolic nameplate with white lettering at each above ceiling (concealed) mounted wireless access point outlet. Nameplate shall read “WAP”.

3.7 FIELD QUALITY CONTROL

A. Perform tests and inspections.

B. Tests and Inspections:

1. Visually inspect UTP NRTL certification markings. Inspect cabling terminations in communications equipment rooms for compliance with color-coding for pin assignments and inspect cabling connections for compliance with TIA/EIA-568-B.1.
2. Visually confirm Category 6 marking of outlets, cover plates, outlet/connectors, and patch panels.
3. Visually inspect cable placement, cable termination, grounding and bonding, equipment and patch cords, and labeling of all components.
4. UTP Performance Tests:

a. Test for each outlet. Perform the following tests according to TIA/EIA-568-B.1 and TIA/EIA-568-B.2:

1) Wire map.
2) Length (physical vs. electrical, and length requirements).
3) Insertion loss.
4) Near-end crosstalk (NEXT) loss.
5) Power sum near-end crosstalk (PSNEXT) loss.

6) Equal-level far-end crosstalk (ELFEXT).
7) Power sum equal-level far-end crosstalk (PSELFEXT).
8) Return loss.
9) Propagation delay.
10) Delay skew.

C. Test UTP cable, passive network components, and miscellaneous supporting equipment for operational performance. End-to-end continuity, performance, and diagnostic tests should be final tests performed in all cases.

D. Data for each measurement shall be documented and supplied to the Owner and engineer for review. Data for submittals shall be printed in a summary report that is formatted similar to Table 10.1 in BICSI TDMM, or transferred from the instrument to the computer, saved as text files, and printed and submitted.

E. End-to-end cabling will be considered defective if it does not pass tests and inspections.

F. Prepare test and inspection reports.

END OF SECTION 271513

DIVISION 28

ELECTRONIC SAFETY AND SECURITY

SECTION 280513 - CONDUCTORS AND CABLES FOR ELECTRONIC SAFETY AND SECURITY

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

1. UTP cabling.
2. Single-mode optical-fiber cabling.
3. Control-voltage cabling.
4. Control-circuit conductors.
5. Fire alarm wire and cable.
6. Identification products.

1.3 DEFINITIONS

A. EMI: Electromagnetic interference.

B. IDC: Insulation displacement connector.

C. Low Voltage: As defined in NFPA 70 for circuits and equipment operating at less than 50 V or for remote-control and signaling power-limited circuits.

D. Open Cabling: Passing telecommunications cabling through open space (e.g., between the studs of a wall cavity).

E. RCDD: Registered Communications Distribution Designer.

1.4 ADMINISTRATIVE REQUIREMENTS

A. Coordinate layout and installation of electronic safety and security cabling with Owner's telecommunications and LAN equipment and service suppliers.

B. Coordinate telecommunications outlet/connector locations with location of power receptacles at each work area.

1.5 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Installation data for UTP and optical-fiber cables as specified in TIA 569-C-1.

B. Shop Drawings:

1. System Labeling Schedules: Electronic copy of labeling schedules, in software and format selected by Owner.
2. System Labeling Schedules: Electronic copy of labeling schedules that are part of the cabling and asset identification system of the software.
3. Cabling administration drawings and printouts.
4. Wiring diagrams to show typical wiring schematics, including the following:

    a. Cross-connects.
    b. Patch panels.
    c. Patch cords.

5. Cross-connects and patch panels. Detail mounting assemblies and show elevations and physical relationship between the installed components.

1.6 INFORMATIONAL SUBMITTALS

A. Qualification Data: For qualified layout technician, installation supervisor, and field inspector.

B. Source quality-control reports.

C. Field quality-control reports.

1.7 QUALITY ASSURANCE

A. Testing Agency Qualifications: An NRTL.

1. Testing Agency's Field Supervisor: Currently certified by BICSI as an RCDD to supervise on-site testing.

1.8 DELIVERY, STORAGE, AND HANDLING

A. Test cables upon receipt at Project site.

1. Test optical-fiber cable to determine the continuity of the strand, end to end. Use optical loss test set.
2. Test optical-fiber cable on reels. Use an optical time domain reflectometer to verify the cable length, and locate cable defects, splices, and connector; include the loss value of each. Retain test data and include the record in maintenance data.
3. Test each pair of UTP cable for open and short circuits.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Surface-Burning Characteristics: Comply with ASTM E 84; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

1. Flame-Spread Index: 25 or less.
2. Smoke-Developed Index: 50 or less.

B. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

2.2 UTP CABLE

A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:

1. Belden CDT Inc.; Electronics Division.
2. Systimax Solutions
3. General Cable
4. Siemon Co.

B. Description: 100-ohm, 4-pair Category 6 UTP, with thermoplastic jacket. Jacket color as indicated on drawings for respective system use.

1. Comply with ICEA S-90-661 for mechanical properties.
2. Comply with TIA/EIA-568-B.1 for performance specifications.
3. Comply with TIA/EIA-568-B.2, Category 6.
4. Listed and labeled by an NRTL acceptable to authorities having jurisdiction as complying with UL 444 and NFPA 70 for the following types:

a. Communications, Plenum Rated: Type CMP, complying with NFPA 262.

2.3 UTP CABLE HARDWARE

A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:

1. Panduit Corp.
2. Systimax Solutions
3. Ortronics
4. Siemon Co.

B. General Requirements for Cable Connecting Hardware: Comply with TIA/EIA-568-B.2, IDC type, with modules designed for punch-down caps or tools. Cables shall be terminated with connecting hardware of same category or higher.

C. Patch Panel: Modular panels housing multiple-numbered jack units with Category 6 RJ-45 ports on front of panel and 110-style IDC punchdowns on back for permanent termination of pair groups of installed cables.

1. Patch panels shall be 24 or 48-port type for terminating UTP. Provide number of patch panels for each outlet cabled, plus an additional 20% spare.

D. Jacks and Jack Assemblies: Modular, color-coded, Category 6 RJ-45 eight-position modular receptacle units with integral IDC-type terminals.

E. Patch Cords: Factory-made, 4-pair cables in 36-inch, 84-inch, and 144-inch lengths; terminated with 8-position modular plug at each end.

1. Patch cords shall have bend-relief-compliant boots and color-coded icons to ensure Category 6 performance. Patch cords shall have latch guards to protect against snagging.
2. Patch cords shall have color-coded boots for circuit identification.
3. Provide one patch cord for every communications port cabled, plus an additional 20% spare. Of the total number of patch cords, 33% shall be provided of each different length specified above.
4. Patch cords shall meet Category 6 UTP cabling specifications.
5. Patch cords shall have jacket colors to match systems cabling as specified herein and on drawings.

2.4 CONTROL-VOLTAGE CABLE

A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:

1. Allied Wire & Cable Inc.
2. Belden Inc.
3. General Cable Technologies Corporation.
4. Southwire Company.

B. Paired Cable: NFPA 70, Type CMG.

1. One pair, twisted, No. 16 AWG, stranded (19x29) and No. 18 AWG, stranded (19x30) tinned copper conductors.
2. PVC insulation.
3. Unshielded.
4. PVC jacket.
5. Flame Resistance: Comply with UL 1581.

2.5 CONTROL-CIRCUIT CONDUCTORS

A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:

1. Allied Wire & Cable Inc.
2. Belden Inc.
3. General Cable Technologies Corporation.

4. Southwire Company.

B. Class 1 Control Circuits: Stranded copper, Type THHN-THWN, complying with UL 83, in pathway.

C. Class 2 Control Circuits: Stranded copper, Type THHN-THWN, complying with UL 83, in pathway power-limited cable, complying with UL 83, concealed in building finishes.

D. Class 3 Remote-Control and Signal Circuits: Stranded copper, Type TW or TF in pathway, complying with UL 83.

2.6 FIRE ALARM WIRE AND CABLE

A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:

1. Allied Wire & Cable Inc.
2. CommScope, Inc.
3. Genesis Cable Products; Honeywell International, Inc.
4. Superior Essex Inc.
5. West Penn Wire.

B. General Wire and Cable Requirements: NRTL listed and labeled as complying with NFPA 70, Article 760.

C. Signaling Line Circuits: Twisted, shielded pair, not less than No. 18 AWG size as recommended by system manufacturer.

1. Circuit Integrity Cable: Twisted shielded pair, NFPA 70, Article 760, Classification CI, for power-limited fire alarm signal service Type FPL. NRTL listed and labeled as complying with UL 1424 and UL 2196 for a two-hour rating.

D. Non-Power-Limited Circuits: Solid-copper conductors with 600-V rated, 75 deg C, color-coded insulation, and complying with requirements in UL 2196 for a two-hour rating.

1. Low-Voltage Circuits: No. 16 AWG, minimum, in pathway.
2. Line-Voltage Circuits: No. 12 AWG, minimum, in pathway.

2.7 IDENTIFICATION PRODUCTS

A. Comply with TIA-606-B and UL 969 for a system of labeling materials, including label stocks, laminating adhesives, and inks used by label printers.

B. Comply with requirements in Section 260553 "Identification for Electrical Systems."

2.8 SOURCE QUALITY CONTROL

A. Testing Agency: Engage a qualified testing agency to evaluate cables.

B. Factory test UTP and optical-fiber cables on reels according to TIA-568-C.1.

C. Factory test UTP cables according to TIA-568-C.2.

D. Factory test singlemode optical fiber cables according to TIA-526.14-B and TIA-568-C.3.

E. Factory sweep test coaxial cables at frequencies from 5 MHz to 1 GHz. Sweep test shall test the frequency response, or attenuation over frequency, of a cable by generating a voltage whose frequency is varied through the specified frequency range and graphing the results. Structural Return Loss shall be less than 20 db.

F. Cable will be considered defective if it does not pass tests and inspections.

G. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 INSTALLATION OF HANGERS AND SUPPORTS

A. Comply with requirements in Section 260529 "Hangers and Supports for Electrical Systems" for installation of supports for cables.

3.2 WIRING METHOD

A. Install wiring in metal pathways and wireways.

1. Minimum conduit size shall be 3/4 inch. Control and data-transmission wiring shall not share conduits with other building wiring systems.

B. Install cable, concealed in accessible ceilings, walls, and floors when possible.

C. Wiring on Racks and within Enclosures:

1. Bundle, lace, and train conductors to terminal points with no excess and without exceeding manufacturer's limitations on bending radii, but not less than radii specified in BICSI ITSIM's "Cabling Termination Practices" chapter. Cable ties shall not be excessively tightened such that the transmission characteristics of the cable are altered.
2. Install lacing bars and distribution spools.
3. Separate power-limited and non-power-limited conductors as recommended in writing by manufacturer.
4. Install conductors parallel with or at right angles to sides and back of enclosure.
5. Mark each terminal according to system's wiring diagrams.
6. Make all connections with approved crimp-on terminal spade lugs, pressure-type terminal blocks, or plug connectors.

3.3 INSTALLATION OF CONDUCTORS AND CABLES

A. Comply with NECA 1 and NFPA 70.

B. Conductors: Size according to system manufacturer's written instructions unless otherwise indicated.

C. Do not install conductors and cables that are wet, moisture damaged, or mold damaged.

D. Install UTP, optical-fiber, and coaxial cables and connecting materials after spaces are complete and dry, and HVAC system is operating and maintaining ambient temperature and humidity conditions at occupancy levels during the remainder of the construction period.

E. General Requirements for Cabling:

1. Comply with TIA-568-C.1.
2. Comply with BICSI ITSIM, Ch. 6, "Cable Termination Practices."
3. Terminate all conductors; no cable shall contain unterminated elements. Make terminations only at indicated outlets, terminals, and cross-connect and patch panels. Leave a minimum of 6 inches of slack at outlet terminations and coil loosely into box after termination on outlet fitting.
4. Cables may not be spliced. Secure and support cables at intervals not exceeding 30 inches and not more than 6 inches from cabinets, boxes, fittings, outlets, racks, frames, and terminals.
5. Maintain minimum cable bending radius during installation and termination of cables.
6. Do not install bruised, kinked, scored, deformed, or abraded cable. Do not splice cable between termination, tap, or junction points. Remove and discard cable if damaged during installation and replace it with new cable.
7. Cold-Weather Installation: Bring cable to room temperature before dereeling. Heat lamps shall not be used for heating.
8. Pulling Cable: Comply with BICSI ITSIM, Ch. 4, "Pulling Cable." Monitor cable pull tensions. Do not exceed manufacturer's rated cable-pulling tension.
9. Riser Cable: Riser cable support intervals shall be in accordance with manufacturer's recommendations.
10. Comply with Section 280544 "Sleeves and Sleeve Seals for Electronic Safety and Security Pathways and Cabling."

F. UTP Cable Installation: Install using techniques, practices, and methods that are consistent with Category 6 rating of components and that ensure Category 6 performance of completed and linked signal paths, end to end.

1. Comply with TIA-568-C.2.
2. Install 110-style IDC termination hardware unless otherwise indicated.
3. Do not untwist UTP cables more than 1/2 inch from point of termination to maintain cable geometry.

G. Open-Cable Installation:

1. Install cabling with horizontal and vertical cable guides in telecommunication spaces with terminating hardware and interconnection equipment.
2. Suspend copper cable not in a wireway or pathway a minimum of 8 inches above ceilings by cable supports not more than 60 inches apart. Cable supports shall be fastened to structural members or floor slabs in accordance with Section 260529 "Hangers and Supports for Electrical Systems."
3. Cable shall not be run in contact with pipes, ducts, or other potentially damaging items. Cables shall not be run through structural members or use structural members, pipes, ducts, or equipment as a support.

H. Separation from EMI Sources:

1. Comply with BICSI TDMM and TIA-569-C recommendations for separating unshielded copper voice and data communication cable from potential EMI sources, including electrical power lines and equipment.
2. Separation between open communication cables or cables in nonmetallic pathways and unshielded power conductors and electrical equipment shall be as follows:

    a. Electrical Equipment Rating Less Than 2 kVA: A minimum of 5 inches.
    b. Electrical Equipment Rating between 2 and 5 kVA: A minimum of 12 inches.
    c. Electrical Equipment Rating More Than 5 kVA: A minimum of 24 inches.

3. Separation between communication cables in grounded metallic pathways and unshielded power lines or electrical equipment shall be as follows:

    a. Electrical Equipment Rating Less Than 2 kVA: A minimum of 2-1/2 inches.
    b. Electrical Equipment Rating between 2 and 5 kVA: A minimum of 6 inches.
    c. Electrical Equipment Rating More Than 5 kVA: A minimum of 12 inches.

4. Separation between cables in grounded metallic pathways and power lines and electrical equipment located in grounded metallic conduits or enclosures shall be as follows:

    a. Electrical Equipment Rating Less Than 2 kVA: No requirement.
    b. Electrical Equipment Rating between 2 and 5 kVA: A minimum of 3 inches.
    c. Electrical Equipment Rating More Than 5 kVA: A minimum of 6 inches.

5. Separation between Cables and Electrical Motors and Transformers, 5 kVA or hp and Larger: A minimum of 48 inches.
6. Separation between Cables and Fluorescent Fixtures: A minimum of 5 inches.

3.4 FIRE ALARM WIRING INSTALLATION

A. Comply with NECA 1 and NFPA 72.

B. Wiring Method: Install wiring in metal pathway according to Section 260533 "Raceways and Boxes for Electrical Systems."

1. Fire alarm circuits and equipment control wiring associated with the fire alarm system shall be installed in a dedicated pathway system. This system shall not be used for any other wire or cable.

C. Wiring Method:

1. Cables and pathways used for fire alarm circuits, and equipment control wiring associated with the fire alarm system, may not contain any other wire or cable.
2. Fire-Rated Cables: Use of two-hour, fire-rated fire alarm cables, NFPA 70, Types MI and CI, is not permitted.
3. Signaling Line Circuits: Power-limited fire alarm cables may be installed in the same cable or pathway as signaling line circuits.

D. Wiring within Enclosures: Separate power-limited and non-power-limited conductors as recommended by manufacturer. Install conductors parallel with or at right angles to sides and back of the enclosure. Bundle, lace, and train conductors to terminal points with no excess.

Connect conductors that are terminated, spliced, or interrupted in any enclosure associated with the fire alarm system to terminal blocks. Mark each terminal according to the system's wiring diagrams. Make all connections with approved crimp-on terminal spade lugs, pressure-type terminal blocks, or plug connectors.

E. Cable Taps: Use numbered terminal strips in junction, pull, and outlet boxes, cabinets, or equipment enclosures where circuit connections are made.

F. Color Coding: Color code fire alarm conductors differently from the normal building power wiring. Use one color code for alarm circuit wiring and another for supervisory circuits. Color code audible alarm-indicating circuits differently from alarm-initiating circuits. Use different colors for visible alarm-indicating devices. Paint fire alarm system junction boxes and covers red.

G. Risers: Install at least two vertical cable risers to serve the fire alarm system. Separate risers in close proximity to each other with a minimum one-hour-rated wall, so the loss of one riser does not prevent the receipt or transmission of signals from other floors or zones.

H. Wiring to Remote Alarm Transmitting Device: 1-inch conduit between the fire alarm control panel and the transmitter. Install number of conductors and electrical supervision for connecting wiring as needed to suit monitoring function.

3.5 POWER AND CONTROL-CIRCUIT CONDUCTORS

A. 120-V Power Wiring: Install according to Section 260519 "Low-Voltage Electrical Power Conductors and Cables" unless otherwise indicated.

B. Minimum Conductor Sizes:

1. Class 1 remote-control and signal circuits, No. 14 AWG.
2. Class 2 low-energy, remote-control and signal circuits, No. 16 AWG.
3. Class 3 low-energy, remote-control, alarm and signal circuits, No. 12 AWG.

3.6 CONNECTIONS

A. Comply with requirements in Section 283103 "Fire Alarm System Modifications" for connecting, terminating, and identifying wires and cables.

3.7 FIRESTOPPING

A. Comply with requirements in Section 078413 "Penetration Firestopping."

B. Comply with TIA-569-C, "Firestopping" Annex A.

C. Comply with BICSI TDMM, "Firestopping Systems" Article.

3.8 GROUNDING

A. For communication wiring, comply with J-STD-607-A and with BICSI TDMM's "Grounding, Bonding, and Electrical Protection" chapter.

3.9 IDENTIFICATION

A. Identify system components, wiring, and cabling complying with TIA-606-B. Comply with requirements for identification specified in Section 260553 "Identification for Electrical Systems."

3.10 FIELD QUALITY CONTROL

A. Testing Agency: Engage a qualified testing agency to perform tests and inspections.

B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

C. Perform the following tests and inspections with the assistance of a factory-authorized service representative:

1. Visually inspect UTP and optical-fiber cable jacket materials for NRTL certification markings. Inspect cabling terminations to confirm color coding for pin assignments and inspect cabling connections to confirm compliance with TIA-568-C.1.
2. Visually inspect cable placement, cable termination, grounding and bonding, equipment and patch cords, and labeling of all components.
3. Test UTP cabling for DC loop resistance, shorts, opens, intermittent faults, and polarity between conductors. Test operation of shorting bars in connection blocks. Test cables after termination but not cross connection.

    a. Test instruments shall comply with or exceed applicable requirements in TIA-568-C.2. Perform tests with a tester that complies with performance requirements in "Test Instruments (Normative)" Annex, complying with measurement accuracy specified in "Measurement Accuracy (Informative)" Annex. Use only test cords and adapters that are qualified by test equipment manufacturer for channel or link test configuration.

D. Document data for each measurement. Print data for submittals in a summary report that is formatted using Table 10.1 in BICSI TDMM as a guide or transfer the data from the instrument to the computer, save as text files, print, and submit.

E. End-to-end cabling will be considered defective if it does not pass tests and inspections.

F. Prepare test and inspection reports.

END OF SECTION 280513

SECTION 280526 - GROUNDING AND BONDING FOR ELECTRONIC SAFETY AND SECURITY

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

1. Grounding conductors.
2. Grounding connectors.
3. Grounding busbars.

1.3 DEFINITIONS

A. Signal Ground: The ground reference point designated by manufacturer of the system that is considered to have zero voltage.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product.

PART 2 - PRODUCTS

2.1 CONDUCTORS

A. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

1. Allied Tube & Conduit; a part of Atkore International.
2. Harger Lightning & Grounding.
3. Panduit Corp.
4. Tyco Electronics Corp.

B. Comply with UL 486A-486B.

C. Insulated Conductors: Stranded copper wire, green or green with yellow stripe insulation, insulated for 600 V, and complying with UL 83.

1. Ground wire for custom-length equipment ground jumpers shall be No. 6 AWG, 19-strand, UL-listed, Type THHN wire.

D. Bare Copper Conductors:

1. Solid Conductors: ASTM B 3.
2. Stranded Conductors: ASTM B 8.
3. Tinned Conductors: ASTM B 33.
4. Bonding Cable: 28 kcmils, 14 strands of No. 17 AWG conductor, and 1/4 inch in diameter.
5. Bonding Conductor: No. 4 or No. 6 AWG, stranded conductor.
6. Bonding Jumper: Tinned-copper tape, braided conductors terminated with two-hole copper ferrules; 1-5/8 inches wide and 1/16 inch thick.

2.2 CONNECTORS

A. Irreversible connectors listed for the purpose. Listed by an NRTL as complying with NFPA 70 for specific types, sizes, and combinations of conductors and other items connected. Comply with UL 486A-486B.

B. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

1. Burndy; Part of Hubbell Electrical Systems.
2. Chatsworth Products, Inc.
3. Harger Lightning & Grounding.
4. Panduit Corp.
5. Tyco Electronics Corp.

C. Compression Wire Connectors: Crimp-and-compress connectors that bond to the conductor when the connector is compressed around the conductor. Comply with UL 467.

1. Electroplated tinned copper, C and H shaped.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Comply with IEEE 1100, "Recommended Practice for Power and Grounding Electronic Equipment."

1. Ground cable shields, drain conductors, and equipment to eliminate shock hazard and to minimize ground loops, common-mode returns, noise pickup, cross talk, and other impairments.
2. Bond shields and drain conductors to ground at only one point in each circuit.

B. Signal Ground:

1. For each system, establish the signal ground and label that location as such.

2. Bond the signal ground to the alternating-current (ac) power system service by connecting to one of the following listed locations, using insulated No. 6 AWG, stranded, Type THHN wire:

    a. Grounding bar in an electrical power panelboard if located in the same room or space as the signal ground.
    b. Telecommunications grounding busbar.

C. Comply with NECA 1.

3.2 APPLICATION

A. Conductors: Install solid conductor for No. 8 AWG and smaller and stranded conductors for No. 6 AWG and larger unless otherwise indicated.

B. Grounding and Bonding Conductors:

1. Install in the straightest and shortest route between the origination and termination point, and no longer than required. The bend radius shall not be smaller than eight times the diameter of the conductor. No one bend may exceed 90 degrees.
2. Install without splices.
3. Support at not more than 36-inch intervals.

3.3 CONNECTIONS

A. Stacking of conductors under a single bolt is not permitted when connecting to busbars.

B. Assemble the wire connector to the conductor, complying with manufacturer's written instructions and as follows:

1. Use crimping tool and the die specific to the connector.
2. Pretwist the conductor.
3. Apply an antioxidant compound to all bolted and compression connections.

C. Shielded Cable: Bond the shield of shielded cable to the signal ground. Comply with TIA/EIA-568-B.1 and TIA/EIA-568-B.2 when grounding screened, balanced, twisted-pair cables.

D. Cabinet-Mounted Equipment: Bond powered equipment chassis to the cabinet grounding bar. Power connection shall comply with NFPA 70; the equipment grounding conductor in the power cord of cord- and plug-connected equipment shall be considered as a supplement to bonding requirements in this Section.

3.4 FIELD QUALITY CONTROL

A. Perform tests and inspections.

B. Tests and Inspections:

1. Inspect physical and mechanical condition. Verify tightness of accessible, bolted, electrical connections with a calibrated torque wrench according to manufacturer's written instructions.

C. Grounding system will be considered defective if it does not pass tests and inspections.

D. Prepare test and inspection reports.

END OF SECTION 280526

SECTION 280544 - SLEEVES AND SLEEVE SEALS FOR ELECTRONIC SAFETY AND SECURITY PATHWAYS AND CABLING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

1. Sleeves for pathway and cable penetration of non-fire-rated construction walls and floors.
2. Sleeve-seal systems.
3. Sleeve-seal fittings.
4. Grout.
5. Silicone sealants.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

PART 2 - PRODUCTS

2.1 SLEEVES

A. Wall Sleeves:

1. Steel Pipe Sleeves: ASTM A 53/A 53M, Type E, Grade B, Schedule 40, zinc coated, plain ends.
2. Cast-Iron Pipe Sleeves: Cast or fabricated "wall pipe," equivalent to ductile-iron pressure pipe, with plain ends and integral waterstop unless otherwise indicated.

B. Sleeves for Conduits Penetrating Non-Fire-Rated Gypsum Board Assemblies: Galvanized-steel sheet; 0.0239-inch minimum thickness; round tube closed with welded longitudinal joint, with tabs for screw-fastening the sleeve to the board.

C. PVC-Pipe Sleeves: ASTM D 1785, Schedule 40.

D. Molded-PVC Sleeves: With nailing flange for attaching to wooden forms.

E. Molded-PE or -PP Sleeves: Removable, tapered-cup shaped, and smooth outer surface with nailing flange for attaching to wooden forms.

2.2 SLEEVE-SEAL SYSTEMS

A. Description: Modular sealing device, designed for field assembly, to fill annular space between sleeve and pathway or cable.

1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

    a. Advance Products & Systems, Inc.
    b. CALPICO, Inc.
    c. HOLDRITE.
    d. Metraflex Company (The).
    e. Pipeline Seal and Insulator, Inc.
    f. Proco Products, Inc.

2. Sealing Elements: EPDM rubber interlocking links shaped to fit surface of pipe. Include type and number required for pipe material and size of pipe.
3. Pressure Plates: Carbon steel.
4. Connecting Bolts and Nuts: Carbon steel, with corrosion-resistant coating, of length required to secure pressure plates to sealing elements.

2.3 SLEEVE-SEAL FITTINGS

A. Description: Manufactured plastic, sleeve-type, waterstop assembly made for embedding in concrete slab or wall. Unit shall have plastic or rubber waterstop collar with center opening to match piping OD.

1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to the following:

    a. HOLDRITE.

2.4 GROUT

A. Description: Nonshrink; recommended for interior and exterior sealing openings in non-fire-rated walls or floors.

B. Standard: ASTM C 1107/C 1107M, Grade B, post-hardening and volume-adjusting, dry, hydraulic-cement grout.

C. Design Mix: 5000-psi, 28-day compressive strength.

D. Packaging: Premixed and factory packaged.

PART 3 - EXECUTION

3.1 SLEEVE INSTALLATION FOR NON-FIRE-RATED ELECTRICAL PENETRATIONS

A. Comply with NECA 1.

B. Sleeves for Conduits Penetrating Above-Grade Non-Fire-Rated Concrete and Masonry-Unit Floors and Walls:

1. Interior Penetrations of Non-Fire-Rated Walls and Floors:

a. Seal annular space between sleeve and pathway or cable, using joint sealant appropriate for size, depth, and location of joint. Comply with requirements in Section 079200 "Joint Sealants."
b. Seal space outside of sleeves with mortar or grout. Pack sealing material solidly between sleeve and wall so no voids remain. Tool exposed surfaces smooth; protect material while curing.

2. Use pipe sleeves unless penetration arrangement requires rectangular sleeved opening.
3. Size pipe sleeves to provide 1/4-inch annular clear space between sleeve and pathway or cable unless sleeve seal is to be installed or unless seismic criteria require different clearance.
4. Install sleeves for wall penetrations unless core-drilled holes or formed openings are used. Install sleeves during erection of walls. Cut sleeves to length for mounting flush with both surfaces of walls. Deburr after cutting.
5. Install sleeves for floor penetrations. Extend sleeves installed in floors 2 inches above finished floor level. Install sleeves during erection of floors.

C. Sleeves for Conduits Penetrating Non-Fire-Rated Gypsum Board Assemblies:

1. Use circular metal sleeves unless penetration arrangement requires rectangular sleeved opening.
2. Seal space outside of sleeves with approved joint compound for gypsum board assemblies.

D. Roof-Penetration Sleeves: Seal penetration of individual pathways and cables with flexible boot-type flashing units applied in coordination with roofing work.

E. Aboveground, Exterior-Wall Penetrations: Seal penetrations using steel pipe sleeves and mechanical sleeve seals. Select sleeve size to allow for 1-inch annular clear space between pipe and sleeve for installing mechanical sleeve seals.

F. Underground, Exterior-Wall and Floor Penetrations: Install cast-iron pipe sleeves. Size sleeves to allow for 1-inch annular clear space between pathway or cable and sleeve for installing sleeve-seal system.

3.2 SLEEVE-SEAL-SYSTEM INSTALLATION

A. Install sleeve-seal systems in sleeves in exterior concrete walls and slabs-on-grade at pathway entries into building.

B. Install type and number of sealing elements recommended by manufacturer for pathway or cable material and size. Position pathway or cable in center of sleeve. Assemble mechanical sleeve seals and install in annular space between pathway or cable and sleeve. Tighten bolts against pressure plates that cause sealing elements to expand and make watertight seal.

3.3 SLEEVE-SEAL-FITTING INSTALLATION

A. Install sleeve-seal fittings in new walls and slabs as they are constructed.

B. Assemble fitting components of length to be flush with both surfaces of concrete slabs and walls. Position waterstop flange to be centered in concrete slab or wall.

C. Secure nailing flanges to concrete forms.

D. Using grout, seal the space around outside of sleeve-seal fittings.

END OF SECTION 280544

SECTION 283103- FIRE ALARM SYSTEM MODIFICATIONS

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. The Contractor shall furnish and install all wiring, conduit, initiating devices, and annunciators for the fire alarm system as detailed on the Contract Drawings, and as amended by State Fire Marshal Accepted Drawings and Shop Drawings. Details not shown on Contract Drawings shall be as advised by the Fire Alarm System supplier.

B. The system supplier shall be responsible for preparing/submitting and obtaining approval of the fire alarm system plans by the State Fire Marshal, as well as paying any fees required in the course of executing same. Copies of all correspondence shall be furnished to the Engineer. Shop drawings shall be submitted for review by the Engineer prior to submittal to the State.

C. Upon completion of the building construction, and prior to occupancy, the system supplier shall demonstrate full system operation and certify the installation in accordance with State requirements as well as those of the local authorities.

D. The system shall comply with KBC and NFPA requirements.

E. All cables shall be as recommended by the supplier and shall be UL listed for the application.

F. The existing system shall be modified to accept the new devices added as part of this Contract. Devices added shall be identified in the panel by a description of the assigned area. All modifications shall be performed by the factory authorized distributor of the existing system.

PART 2 - PRODUCTS

2.1 FIRE ALARM CONTROL PANEL (Existing)

A. The existing addressable fire alarm control panel is Edwards EST with Honeywell Commercial Fire Communicator.

2.2 FIELD MOUNTED SYSTEM COMPONENTS

A. Smoke Detectors and Accessories

1. Analog Addressable Smoke – General

a. Each analog addressable smoke detector's sensitivity shall be capable of being programmed individually as: most sensitive, more sensitive, normal, less sensitive or least sensitive. In addition to the five sensitivity levels the detector shall provide a prealarm sensitivity setting, which shall be settable in 5% increments of the detector's alarm sensitivity value.

b. An alternate alarm sensitivity level shall be provided for each detector, which can be set to any of the five (5) sensitivity settings manually or automatically using a time-of-day event. In addition to the five alternate sensitivity levels the detector shall provide an alternate prealarm sensitivity setting, which shall be settable in 5% increments of the detector's alternate alarm sensitivity value.

c. The detector shall be able to differentiate between a long drift above the prealarm threshold and fast rise above the threshold.

d. The detector's sensing element reference point shall automatically adjust, compensating for background environmental conditions such as dust, temperature, and pressure. Periodically, the sensing element real-time analog value shall be compared against its reference value. The detector shall provide a maintenance alert signal that 75% to 99% compensation has been used. The detector shall provide a dirty fault signal that 100% or greater compensation has been used.

e. The system shall allow for changing of detector types for service replacement purposes without the need to reprogram the system. The replacement detector type shall automatically continue to operate with the same programmed sensitivity levels and functions as the detector it replaced. System shall display an off-normal condition until the proper detector type has been installed or change in the application program profile has been made.

2. Duct Detector Housing

a. Provide smoke detector duct housing assemblies to mount an analog/addressable detector along with a standard, relay or isolator detector-mounting base. The housing shall also protect the measuring chamber from damage and insects. The housing shall utilize an air exhaust tube and an air sampling inlet tube that extends into the duct air stream up to ten feet. Drilling templates and gaskets to facilitate locating and mounting the housing shall also be provided. The housing shall be finished in baked red enamel. Remote alarm LED indicators and remote test stations shall be provided.

3. Smoke Detector – Photoelectric

a. Provide analog/addressable photoelectric smoke detectors at the locations shown on the drawings. The detector shall have the ability to set the sensitivity and alarm verification of each of the individual detectors on the circuit. It shall be possible to automatically change the sensitivity of individual analog/addressable detectors for the day and night periods. Each smoke detector shall be capable of transmitting pre-alarm and alarm signals in addition to the normal, trouble and need cleaning information. It shall be possible to program control panel activity to each level. Each smoke detector may be individually programmed to operate at any one of five (5) sensitivity settings. Each detector microprocessor shall contain an environmental compensation algorithm that identifies and sets ambient environmental thresholds approximately six times an hour. The microprocessor shall monitor the environmental compensation value and alert the system operator when the detector approaches 75% and 100% of the allowable environmental compensation value.

B. Detector Bases

1. Provide standard detector mounting bases suitable for mounting on either North American 1-gang, 3½ or 4-inch octagon box and 4-inch square box, or European BESA or 1-gang box. The base shall, contain no electronics and support all series detector types.

C. Double Action Manual Station

1. Furnish and install a manual station as indicated on the drawings. Each station shall be of the non-coded double action type, requiring an outer door to be lifted to expose the actuator door. Upon pulling forward of the door, the unit shall lock into a readily observable "alarm" position.
2. The station shall be constructed of aluminum (6063/T5), equipped with a break glass rod feature and require a key to reset. This key shall be keyed alike with the control cabinet. The stations shall employ a highly reliable action to activate an alarm. This feature shall provide an exceptionally high resistance to accidental operation.
3. Where indicated, manual stations shall be equipped with an auxiliary false alarm preventer device cover equal to Safety Technology Industrial Stopper II, Cat. #1100 flush or Cat. #1130 surface mount. Provide covers for stations noted on Drawings.

D. Heat Detectors

1. Provide analog/addressable combination fixed temperature / rate-of-rise detectors at the location shown on the Drawings. The heat detector shall have a nominal fixed temperature alarm point rating of 135°F (57°C) and a rate of rise alarm point of 15° F (9°C) per minute. The heat detector shall be rated for ceiling installation at a minimum of 70' (21.3m) centers and be suitable for wall mount applications.

E. Notification Appliances

1. Low Profile Horn-Strobes

a. Provide low profile wall mount horn/strobes at the locations shown on the drawings. The horn/strobe shall provide an audible output of 84 dBA at 10 ft. when measured in reverberation room per UL-464. Strobes shall provide synchronized flash outputs. The strobe output shall be determined as required by its specific location and application from a family of 15cd, 30cd, 60cd, 75cd & 110cd devices. The horn shall have a selectable steady or synchronized temporal output. In and out screw terminals shall be provided for wiring. Low profile horn/strobes shall mount in a North American 1-gang box.

2. Low Profile Strobes

a. Provide low profile wall mounted strobes at the locations shown on the drawings. In and out screw terminals shall be provided for wiring. Strobes shall provide synchronized flash outputs. Strobe output shall be determined as required by its specific location and application from a family of 15cd, 30cd, 60cd, 75cd, or 110cd devices. Low profile strobes shall mount in a North American 1-gang box.

F. Initiation & Control Modules

1. Relay Module

a. Provide addressable control relay circuit modules at the locations shown on the drawings. The module shall provide one (1) form C dry relay contacts rated at 24Vdc @ 2 amps (pilot duty) to control external appliances or equipment. The position of the relay contact shall be confirmed by the system firmware.

2. Notification Appliance Circuits

a. Provide addressable notification appliance circuit modules at the locations shown on the drawings. The module shall provide one (1) supervised Class B notification circuit. The module shall provide polarized audible / visual selection for 24Vdc @ 2amps, audio outputs at 25Vrms @ 50 watts or 70 Vrms @ 35 watts.

3. Isolation Module

a. Provide addressable fault isolator circuit modules at the locations shown on the drawings. The module shall be capable of isolating and removing a fault from a Class A data circuit while allowing the remaining data loop to continue operating.

4. Addressable Monitor Module

a. An addressable monitor module with an initiating circuit wired Class A, Style D shall be furnished to provide an address for individual, normally open (N.O.) contact devices.

5. Addressable Dual Monitor Module

a. An addressable monitor module with two (2) initiating circuits wired Class A, Style D shall be furnished to provide two addresses for individual, normally open (N.O.) contact devices.

6. Addressable Monitor Module

a. An addressable monitor module with an initiating circuit capable of being configured either Class A, Style D or Class B, Style B shall be furnished to provide an address for an individual, normally open (N.O.) contact device, or a collective address for a group of such devices. The module shall contain a yellow status LED that shall flash when in a quiescent mode and light continuously when in alarm. The LED shall be field programmable not to provide quiescent status indication, if so desired.

7. Addressable Sub loop Monitor Module

a. An addressable monitor module with an initiating circuit capable of being configured Class B; Style B shall be furnished to provide a collective address for up to ten conventional two-wire smoke detectors or 301T thermistor heat detectors. The module shall contain a yellow status LED that shall flash when in a quiescent mode and light continuously when in alarm. The LED shall be field programmable not to provide quiescent status indication, if so desired.

G. Supplementary Notification Appliance Panel

1. Furnish and install supplementary panels for providing extended power and signal circuitry to notification appliance circuits as indicated on the drawings or as required to accommodate the number of devices shown.
2. Each panel shall provide four (4) 24VDC, Class A, Style Z notification appliance circuits, which may be activated in groups of two or four by connection to normally open dry contacts or existing notification appliance circuits. The panel shall be suitable for non-coded operation, coded operation, temporal pattern or a combination.
3. The panel shall operate at 120V and include its own batteries and battery charger. The panel shall be supervised for ground fault, over current, open circuits and low battery conditions. Ground fault, battery and circuit trouble conditions in the panel shall automatically open the notification appliance circuit, transmitting a trouble signal to the main fire alarm control panel.

H. Electromagnetic Door Holders

1. Electromagnetic door holders shall be provided to hold fire and smoke barrier doors open until released by an alarm. The holders shall have approximately 35 lb. (15.9 kg) holding power and offer fail safe operation. The door holders shall be capable of operation on 12 VDC, 24 VAC, 24 VDC or 120 VAC interchangeably without need of any configuration. All holders shall release through the contacts of the control panel after an alarm has been initiated from any zone on the drawings. All circuits shall be separately fused.

I. Water Flow Switches

1. Water flow switches shall consist of a cast aluminum pipe saddle which houses an electromechanical device to which is attached a corrosion-free, flexible, low-density polyethylene paddle. The paddle shall conform to the inside diameter of the sprinkler pipe and sense all water movements. To prevent false alarms, the flow switch shall incorporate an adjustable time delay mechanism between the paddle-operated stem and the alarm initiating contacts. A tapped ½" conduit connection shall be provided. Flow switch shall be UL listed for its intended purpose. Coordinate who shall provide these switches with the fire suppression contractor.

J. Sprinkler Valve Tamper Switch

1. Sprinkler valve tamper switches shall consist of an acid treated cast aluminum housing with nickel-plated parts to resist corrosion. Cover removal shall be supervised. Switch shall be provided with either one or two sets of S.P.D.T. micro switches as required. Tamper switch shall be UL listed for its intended purposes. Tamper switch shall be adaptable to existing valves, of various design. Coordinate who shall provide these switches with the fire suppression contractor.

PART 3 - EXECUTION

3.1 INSTALLATION/APPLICATION/ERECTION

A. Provide and install the system in accordance with the Drawings and Specifications, all applicable codes and the manufacturer's recommendations. All wiring shall be installed in strict compliance with all the provisions of NEC Article 760 A and C, Power-Limited Fire Protective

Signaling Circuits or if required may be reclassified as non-power limited and wired in accordance with NEC Article 760 A and B. Upon completion, the Contractor shall so certify in writing to the Owner and general Contractor.

B. All junction boxes shall be sprayed red and labeled “Fire Alarm.” Wiring color code shall be maintained throughout the installation.

C. Installation of equipment and devices that pertain to other work in the Contract shall be closely coordinated with the appropriate subcontractors.

D. The Contractor shall clean all dirt and debris from the inside and the outside of the fire alarm equipment after completion of the installation.

E. The manufacturer’s authorized representative shall provide on-site supervision of installation.

F. Grounding shall be provided to building ground.

G. The circuit breaker feeding the fire alarm panel shall be provided with a lock on device.

3.2 TESTING

A. The completed fire alarm system shall be fully tested in accordance with NFPA-72 by the Contractor in the presence of the Owner’s representative and the state DHBC inspector. Upon completion of a successful test, the Contractor shall so certify in writing to the Owner.

3.3 OWNER TRAINING

A. The system manufacturer shall train the Owner’s representative (operator) on the system operation: History Log review and use; switch operation and use; alarm review, reset and evacuation operations; systems drills; trouble review and reset operations. See Section 16050 for additional requirements.

3.4 WARRANTY

A. The Contractor shall warrant the completed fire alarm system wiring and equipment to be free from inherent mechanical and electrical defects for a period of 1 year from the date of the completed and certified test.

B. The equipment manufacturer shall make available to the Owner a maintenance contract proposal to provide a minimum of 2 inspections and tests per year in compliance with NFPA-72 guidelines.

END OF SECTION 283103

DIVISION 31

EARTHWORK

SECTION 31 1000 - SITE CLEARING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General, Supplementary and Special Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. This Section includes the following:

1. Protecting existing trees, shrubs, plants and grass to remain.
2. Removing existing trees, shrubs, plants and grass.
3. Clearing and grubbing.
4. Stripping and stockpiling topsoil.
5. Removing above- and below-grade site improvements.
6. Disconnecting, capping or sealing, and removing site utilities.
7. Temporary erosion and sedimentation control measures.

B. Related Sections include the following:

1. Division 01 Section "Temporary Facilities and Controls" for temporary utilities, temporary construction and support facilities, temporary security and protection facilities.
2. Division 01 Section "Execution" for verifying utility locations and for recording field measurements.
3. Division 31 Section "Earth Moving" for soil materials, excavating, backfilling, and site grading.
4. Division 23 Section "Turf and Grasses and Plants" for finish grading including preparing and placing planting soil mixes and testing of topsoil material.

1.3 DEFINITIONS

A. Topsoil: Natural or cultivated surface-soil layer containing organic matter and sand, silt, and clay particles; friable, pervious, and black or a darker shade of brown, gray, or red than underlying subsoil; reasonably free of subsoil, clay lumps, gravel, and other objects more than 2 inches in diameter; and free of subsoil and weeds, roots, toxic materials, or other nonsoil materials.

B. Tree Protection Zone: Area surrounding individual trees or groups of trees to be protected during construction, and defined by the drip line of individual trees or the perimeter drip line of groups of trees, unless otherwise indicated.

1.4 MATERIAL OWNERSHIP

A. Except for stripped topsoil or other materials indicated to remain Owner's property, cleared materials shall become Contractor's property and shall be removed from Project site.

1.5 SUBMITTALS

A. Photographs or videotape, sufficiently detailed, of existing conditions of trees and plantings, adjoining construction, and site improvements that might be misconstrued as damage caused by site clearing.

B. Record drawings, according to Division 01 Section "Project Record Documents," identifying and accurately locating capped utilities and other subsurface structural, electrical, and mechanical conditions.

C. Storm Water Pollution Prevention Plan: Submit prior to beginning construction and maintain on-site, and available for regular review by the Architect the following:

1. Copy of the Notice of Intent (NOI).
2. Copy of the LFUCG Grading Permit.
3. Copy of the SWPP Plan along with related written documents.
4. Maintenance Log Book in conformance with the requirements indicated.

1.6 QUALITY ASSURANCE

A. Preinstallation Conference: Conduct conference at Project site to comply with requirements in Division 01 Section "Project Management and Coordination."

1.7 PROJECT CONDITIONS

A. Traffic: Minimize interference with adjoining roads, streets, walks, and other adjacent occupied or used facilities during site-clearing operations.

1. Do not close or obstruct streets, walks, or other adjacent occupied or used facilities without permission from Owner and authorities having jurisdiction.
2. Provide alternate routes around closed or obstructed traffic ways if required by authorities having jurisdiction.

B. Salvable Improvements: Carefully remove items indicated to be salvaged and store on Owner's premises where indicated.

C. Utility Locator Service: Notify utility locator service for area where Project is located before site clearing.

D. Do not commence site clearing operations until temporary erosion and sedimentation control measures are in place and permits have been received.

PART 2 - PRODUCTS

2.1 SOIL MATERIALS

A. Satisfactory Soil Materials: Requirements for satisfactory soil materials are specified in Division 31 Section "Earth Moving."

1. Obtain approved borrow soil materials off-site when satisfactory soil materials are not available on-site.

PART 3 - EXECUTION

3.1 PREPARATION

A. Protect and maintain benchmarks and survey control points from disturbance during construction.

B. Locate and clearly flag trees and vegetation to remain or to be relocated.

C. Protect existing site improvements to remain from damage during construction.

1. Restore damaged improvements to their original condition, as acceptable to Owner.

3.2 TEMPORARY EROSION AND SEDIMENTATION CONTROL

A. Provide temporary erosion and sedimentation control measures to prevent soil erosion and discharge of soil-bearing water runoff or airborne dust to adjacent properties and walkways, according to the Storm Water Pollution Prevention Plan (SWPP) in the Drawings.

B. Inspect, repair, and maintain erosion and sedimentation control measures during construction until permanent vegetation has been established.

1. Should it appear that adjustments to the erosion control measures may be necessary due to non-performance, promptly notify the Architect who will review the situation to determine if changes will be required. Make minor adjustments as requested. If significant adjustments are necessary, the Contractor may submit a request for a Change Order for the additional work.
2. Failure of the Contractor to properly install or maintain erosion control measures shall not be considered grounds for a Change Order.

C. Remove erosion and sedimentation controls and restore and stabilize areas disturbed during removal.

3.3 TREE PROTECTION

A. Erect and maintain temporary fencing around tree protection zones before starting site clearing. Remove fence when construction is complete.

1. Do not store construction materials, debris, or excavated material within fenced area.
2. Do not permit vehicles, equipment, or foot traffic within fenced area.
3. Maintain fenced area free of weeds and trash.
4. Unless otherwise indicated, fencing to consist of flexible plastic safety fence supported by steel “T” fence posts spaced at 6 foot centers maximum.

B. Do not excavate within tree protection zones, unless otherwise indicated.

C. Where excavation for new construction is required within tree protection zones, hand clear and excavate to minimize damage to root systems. Use narrow-tine spading forks, comb soil to expose roots, and cleanly cut roots as close to excavation as possible.

1. Cover exposed roots with burlap and water regularly.
2. Temporarily support and protect roots from damage until they are permanently redirected and covered with soil.
3. Coat cut faces of roots more than 1-1/2 inches in diameter with an emulsified asphalt or other approved coating formulated for use on damaged plant tissues.
4. Backfill with soil as soon as possible.

D. Repair or replace trees and vegetation indicated to remain that are damaged by construction operations, in a manner approved by Architect.

1. Employ an arborist, licensed in jurisdiction where Project is located, to submit details of proposed repairs and to repair damage to trees and shrubs.
2. Replace trees that cannot be repaired and restored to full-growth status, as determined by Architect.

3.4 UTILITIES

A. Owner will arrange for disconnecting and sealing indicated utilities that serve existing structures before site clearing, when requested by Contractor.

1. Verify that utilities have been disconnected and capped before proceeding with site clearing.

B. Existing Utilities: Do not interrupt utilities serving facilities occupied by Owner or others unless permitted under the following conditions and then only after arranging to provide temporary utility services according to requirements indicated:

1. Notify Architect not less than two days in advance of proposed utility interruptions.
2. Do not proceed with utility interruptions without Architect's written permission.

C. Excavate for and remove underground utilities indicated to be removed.

D. Removal of underground utilities other than storm drainage and sanitary sewerage is included in Division 21, Division 23, Division 26, Division 27, and Division 28 Sections covering other site utilities.

3.5 CLEARING AND GRUBBING

A. Remove obstructions, trees, shrubs, grass, and other vegetation to permit installation of new construction.

1. Do not remove trees, shrubs, and other vegetation indicated to remain or to be relocated.
2. Cut minor roots and branches of trees indicated to remain in a clean and careful manner where such roots and branches obstruct installation of new construction.
3. Grind stumps and remove roots, obstructions, and debris extending to a depth of 18 inches below exposed subgrade. Completely remove stumps where they are located below or within 5 feet of buildings, structures, walks or pavements.
4. Use only hand methods for grubbing within tree protection zone.
5. Chip removed tree branches and dispose of off-site.

B. Fill depressions caused by clearing and grubbing operations with satisfactory soil material unless further excavation or earthwork is indicated.

1. Place fill material in horizontal layers not exceeding a loose depth of 8 inches, and compact each layer to a density equal to adjacent original ground.

3.6 TOPSOIL STRIPPING

A. Remove sod and grass before stripping topsoil.

B. Strip topsoil to whatever depths are encountered in a manner to prevent intermingling with underlying subsoil or other waste materials.

1. Remove subsoil and nonsoil materials from topsoil, including trash, debris, weeds, roots, and other waste materials.

C. Stockpile topsoil materials away from edge of excavations without intermixing with subsoil. See plans for topsoil stock pile area. Grade and shape stockpiles to drain surface water. Cover to prevent windblown dust.

1. Limit height of topsoil stockpiles to 72 inches.
2. Do not stockpile topsoil within tree protection zones.
3. Stockpile surplus topsoil to allow for respreading deeper topsoil.

3.7 SITE IMPROVEMENTS

A. Remove existing above- and below-grade improvements as indicated and as necessary to facilitate new construction.

1. Where items are indicated to be salvaged, protect and deliver to the Owner as directed.

B. Remove slabs, paving, curbs, gutters, and aggregate base as indicated.

3.8 DISPOSAL

A. Disposal: Remove surplus soil material, unsuitable topsoil, obstructions, demolished materials, and waste materials including trash and debris, and legally dispose of them off Owner's property.

1. Separate recyclable materials produced during site clearing from other nonrecyclable materials. Store or stockpile without intermixing with other materials and transport them to recycling facilities.

END OF SECTION 311000

SECTION 312000 - EARTH MOVING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Special Conditions and Division 01 Specification Sections, apply to this Section.

1.2

1.3 SUMMARY

A. This Section includes the following:

1. Preparing subgrades for slabs-on-grade, walks, pavements, lawns and grasses and exterior plants.
2. Excavating and backfilling for buildings and structures.
3. Drainage course for slabs-on-grade.
4. Subbase course for concrete walks and pavements.
5. Subbase course for asphalt paving.
6. Subsurface drainage backfill for walls and trenches.
7. Excavating and backfilling for utility trenches.
8. Excavating and backfilling trenches for buried mechanical and electrical utilities and pits for buried utility structures.

B. Related Sections include the following:

1. Geotechnical Report - Contractor shall review Geotechnical Report. The Geotechnical Report is provided for informational purposes only and is not part of the Contract Documents.
2. Division 01 Section "Structural Special Inspections" for testing and inspections associated with earthwork specified in this section below and within 5 feet of the building footprint.
3. Division 01 Section "Unit Prices" for unit-price rock excavation and authorized additional excavation provisions.
4. Division 01 Section "Construction Progress Documentation " for recording preexcavation and earthwork progress.
5. Division 01 Section "Temporary Facilities and Controls" for temporary controls, utilities, and support facilities.
6. Division 03 Section "Cast-in-Place Concrete" for granular course if placed over vapor retarder and beneath the slab-on-grade.
7. Divisions 21, 22, 23, 26, 27, and 28 Sections for installing underground facility and building plumbing, mechanical and electrical utilities and buried mechanical and electrical structures.

8. Division 31 Section "Site Clearing" for temporary erosion and sedimentation control measures, site stripping, grubbing, stripping and stockpiling topsoil, and removal of above- and below-grade improvements and utilities.
9. Division 31 Section "Dewatering" for construction dewatering system.
10. Division 32 Section "Turf and Grasses" for finish grading, including preparing and placing topsoil and planting soil for lawns.
11. Division 32 Section "Plants" for planting bed establishment and tree and shrub pit excavation and planting.
12. Division 33 Section "Subdrainage" for drainage of foundations and walls.
13. Division 33 Section "Storm Utility Drainage Piping" for installing storm drainage piping and structures.

1.4 UNIT PRICES

A. Unit prices for earthwork are included in Division 01 Section "Unit Prices."

B. Rules of Measurement: Volume of rock or soil actually removed, measured in original position, but not to exceed the following. Unit prices for rock and unsuitable soil excavation include replacement with approved materials.

1. 24 inches outside of concrete forms other than at footings.

2. 12 inches outside of concrete forms at footings.

3. 6 inches outside of minimum required dimensions of concrete cast against grade.

4. Outside dimensions of concrete walls indicated to be cast against rock without forms or exterior waterproofing treatments.
5. 6 inches beneath bottom of concrete slabs-on-grade.

6. 6 inches beneath pipe in trenches, and the greater of 24 inches wider than pipe or 42 inches wide.

1.5 DEFINITIONS

A. Backfill: Soil material or controlled low-strength material used to fill an excavation.

1. Initial Backfill: Backfill placed beside and over pipe in a trench, including haunches to support sides of pipe.
2. Final Backfill: Backfill placed over initial backfill to fill a trench.

B. Base Course: Course placed between the subbase course and hot-mix asphalt paving.

C. Bedding Course: Course placed over the excavated subgrade in a trench before laying pipe.

D. Borrow Soil: Satisfactory soil imported from off-site for use as fill or backfill.

E. Drainage Course: Course supporting the slab-on-grade that also minimizes upward capillary flow of pore water.

F. Excavation: Removal of material encountered above subgrade elevations and to lines and dimensions indicated.

1. Authorized Additional Excavation: Excavation below subgrade elevations or beyond indicated lines and dimensions as directed by Architect. Authorized additional excavation and replacement material will be paid for according to Contract provisions for changes in the Work.
2. Bulk Excavation: Excavation more than 10 feet in width and more than 30 feet in length.
3. Unauthorized Excavation: Excavation below subgrade elevations or beyond indicated lines and dimensions without direction by Architect. Unauthorized excavation, as well as remedial work directed by Architect, shall be without additional compensation.

G. Fill: Soil materials used to raise existing grades.

H. Lime Stabilization: Stabilization of soils in place by incorporating additives to increase the shear strength of the soil and / or control the shrink-swell properties of the soil to improve bearing capacity.

I. Rock: Rock material in beds, ledges, unstratified masses, conglomerate deposits, and boulders of rock material 3/4 cu. yd. or more in volume that exceed a standard penetration resistance of 100 blows/2 inches when tested by an independent geotechnical testing agency, according to ASTM D 1586.

J. Structures: Buildings, footings, foundations, retaining walls, slabs, tanks, curbs, mechanical and electrical appurtenances, or other man-made stationary features constructed above or below the ground surface.

K. Subbase Course: Course placed between the subgrade and base course for hot-mix asphalt pavement, or course placed between the subgrade and a cement concrete pavement or a cement concrete or hot-mix asphalt walk.

L. Subgrade: Surface or elevation remaining after completing excavation, or top surface of a fill or backfill immediately below subbase, drainage fill, or topsoil materials.

M. Utilities: On-site underground pipes, conduits, ducts, and cables, as well as underground services within buildings.

1.6 SUBMITTALS

A. Product Data: For the following:

1. Each type of plastic warning tape.
2. Geotextile.
3. Controlled low-strength material, including design mixture.

B. Samples: 12-by-12-inch Sample of subdrainage and separation geotextile.

C. Material Test Reports: From a qualified testing agency indicating and interpreting test results for compliance of the following with requirements indicated:

1. Classification according to ASTM D 2487 of each on-site and borrow soil material proposed for fill and backfill.
2. Laboratory compaction curve according to ASTM D 698 for each on-site and borrow soil material proposed for fill and backfill.

D. Preexcavation Photographs or Videotape: Show existing conditions of adjoining construction and site improvements, including finish surfaces, that might be misconstrued as damage caused by earthwork operations. Submit before earthwork begins.

1.7 QUALITY ASSURANCE

A. Geotechnical Testing Agency Qualifications: An independent testing agency qualified according to ASTM E 329 to conduct soil materials and rock-definition testing, as documented according to ASTM D 3740 and ASTM E 548. The Testing Agency shall also be acceptable to the Architect and Owner.

1. Refer to Division 1 Section, Structural Special Inspections for additional requirements.

B. Preexcavation Conference: Conduct conference at Project site to comply with requirements in Division 01 Section "Project Management and Coordination."

C. Suitable Weather: To minimize the difficulties of drying, placing and compacting soils, it is suggested that earthwork be conducted during the period late April to early November.

1.8 PROJECT CONDITIONS

A. Existing Utilities: Do not interrupt utilities serving facilities occupied by Owner or others unless permitted in writing by Architect and then only after arranging to provide temporary utility services according to requirements indicated.

1. Notify Architect not less than two days in advance of proposed utility interruptions.
2. Do not proceed with utility interruptions without Architect's written permission.
3. Contact utility-locator service for area where Project is located before excavating.

B. Demolish and completely remove from site existing underground utilities indicated to be removed. Coordinate with utility companies to shut off services if lines are active.

C. Project-Site Information: A Geotechnical Report has been prepared and is included in this Project Manual elsewhere for informational purposes only; the Geotechnical Report is not part of the Contract Documents. The opinions expressed in this report are those of the geotechnical engineer and represent interpretations of subsoil conditions, tests, and results of analyses conducted by geotechnical engineer. The Owner and Architect will not be responsible for interpretations or conclusions drawn from this data.

PART 2 - PRODUCTS

2.1 SOIL MATERIALS

A. General: Provide borrow soil materials when sufficient satisfactory soil materials are not available from excavations.

B. Satisfactory Soils: ASTM D 2487 Soil Classification Groups CL, GW, GP, GM, SW, SP, and SM, or a combination of these groups; free of rock or gravel larger than 4 inches in any dimension, except as indicated, a Plasticity Index (PI) not exceeding 30, debris, waste, frozen materials, vegetation, and other deleterious matter.

1. Except as indicated and subject to meeting Project requirements and acceptance by the Geotechnical Testing Agency, existing on-site CL and CH soils may be utilized as fill material provided they are properly dried, placed and compacted.
2. On-site soils with a PI of 30 percent or greater may be utilized provided the moisture content does not exceed plus 3 percent of optimum moisture content nor have an organic content exceeding 5 percent of the total soil mass.
3. On-site rubblized concrete may also be utilized provided it does not exceed 4 inches in any dimension; the void or open spaces between the pieces are effectively choked or filled with concrete fines; the pieces are placed to eliminate overlap and the percentage of soil in the rubblized concrete fill does not exceed 5 percent.
4. Rubblized concrete shall not be used as fill below or within 10 feet of the building footprint, nor in lawn areas within 4 feet of finish grade.
5. Structural soil fill used / imported to the site and used in pavement areas shall have a CBR test performed, and the CBR value shall be 1.6 or greater.

C. Unsatisfactory Soils: Soil Classification Groups GC, SC, ML, OL, CH, MH, OH, and PT according to ASTM D 2487, or a combination of these groups.

1. Unsatisfactory soils also include satisfactory soils not maintained within 2 percent of optimum moisture content at time of compaction.
2. On-site CH soils shall not be utilized as fill below or within 10 feet of the building footprint or within 12 inches of any pavement subgrade.
3. Off-site borrow materials with a PI of 30 percent or greater or with an organic content of the soil greater than 5 percent of the total soil mass.

D. Subbase Material: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone, and natural or crushed sand; ASTM D 2940; with at least 90 percent passing a 1-1/2-inch sieve and not more than 12 percent passing a No. 200 sieve.

E. Engineered Fill: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone, and natural or crushed sand; ASTM D 2940; with at least 90 percent passing a 1-1/2-inch sieve and not more than 12 percent passing a No. 200 sieve.

F. Bedding Course: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone, and natural or crushed sand; ASTM D 2940; except with 100 percent passing a 1-inch sieve and not more than 8 percent passing a No. 200 sieve.

G. Drainage Course: Narrowly graded mixture of washed crushed stone, or crushed or uncrushed gravel; ASTM D 448; coarse-aggregate grading Size 57; with 100 percent passing a 1-1/2-inch sieve and 0 to 5 percent passing a No. 8 sieve.

H. Filter Material: Narrowly graded mixture of natural or crushed gravel, or crushed stone and natural sand; ASTM D 448; coarse-aggregate grading Size 67; with 100 percent passing a 1-inch sieve and 0 to 5 percent passing a No. 4 sieve.

I. Sand: ASTM C 33; fine aggregate, natural, or manufactured sand.

J. Impervious Fill: Clayey gravel and sand mixture capable of compacting to a dense state.

K. Lime stabilization Materials:
1. Lime Kiln Dust used for stabilization shall meet the following requirements: 60% minimum total calcium & magnesium oxides, 30% minimum available calcium hydroxide (ASTM C25), maximum 4% water. 40% maximum loss on ignition. Sieve analysis per ASTM C110, maximum of 25% passing a No. 100 sieve, maximum of 10% passing a No. 30 sieve, maximum of 5% passing a no. 4 sieve.
2. Portland cement shall comply with the latest specifications for Portland cement or blended hydraulic cements.
3. Self-cementing fly ash shall meet the requirements for “very self cementing” per ASTM D 5329.
4. Quicklime or Hydrated lime shall meet the requirements of ASTM C-977 or AASHTO M 216
5. Slurry shall contain a minimum of 30% dry solids content.

2.2 GEOTEXTILES

A. Subsurface Drainage Geotextile: Nonwoven needle-punched geotextile, manufactured for subsurface drainage applications, made from polyolefins or polyesters; with elongation greater than 50 percent; complying with AASHTO M 288 and the following, measured per test methods referenced:

1. Survivability: Class 2; AASHTO M 288.
2. Grab Tensile Strength: 157 lbf; ASTM D 4632.
3. Sewn Seam Strength: 142 lbf; ASTM D 4632.
4. Tear Strength: 56 lbf; ASTM D 4533.
5. Puncture Strength: 56 lbf; ASTM D 4833.
6. Apparent Opening Size: No. 40 sieve, maximum; ASTM D 4751.
7. Permittivity: 0.5 per second, minimum; ASTM D 4491.
8. UV Stability: 50 percent after 500 hours' exposure; ASTM D 4355.

B. Separation Geotextile: Woven geotextile fabric, manufactured for separation applications, made from polyolefins or polyesters; with elongation less than 50 percent; complying with AASHTO M 288 and the following, measured per test methods referenced:

1. Survivability: Class 2; AASHTO M 288.
2. Grab Tensile Strength: 247 lbf; ASTM D 4632.
3. Sewn Seam Strength: 222 lbf; ASTM D 4632.
4. Tear Strength: 90 lbf; ASTM D 4533.

5. Puncture Strength: 90 lbf; ASTM D 4833.
6. Apparent Opening Size: No. 60 sieve, maximum; ASTM D 4751.
7. Permittivity: 0.02 per second, minimum; ASTM D 4491.
8. UV Stability: 50 percent after 500 hours' exposure; ASTM D 4355.

2.3 CONTROLLED LOW-STRENGTH MATERIAL

A. Produce conventional-weight, controlled low-strength material with 500 psi compressive strength when tested according to ASTM C 495.

2.4 ACCESSORIES

A. Detectable Warning Tape: Acid- and alkali-resistant polyethylene film warning tape manufactured for marking and identifying underground utilities, a minimum of 6 inches wide and 4 mils thick, continuously inscribed with a description of the utility, with metallic core encased in a protective jacket for corrosion protection, detectable by metal detector when tape is buried up to 30 inches deep; colored as follows:

1. Red: Electric.
2. Yellow: Gas, oil, steam, and dangerous materials.
3. Orange: Telephone and other communications.
4. Blue: Water systems.
5. Green: Sewer systems.

PART 3 - EXECUTION

3.1 PREPARATION

A. Protect structures, utilities, sidewalks, pavements, and other facilities from damage caused by settlement, lateral movement, undermining, washout, and other hazards created by earthwork operations.

B. Preparation of subgrade for earthwork operations including removal of vegetation, topsoil, debris, obstructions, and deleterious materials from ground surface is specified in Division 31 Section "Site Clearing."

C. Protect and maintain erosion and sedimentation controls, which are specified in Division 31 Section "Site Clearing," during earthwork operations.

D. Provide protective insulating materials to protect subgrades and foundation soils against freezing temperatures or frost.

3.2 DEWATERING

A. Prevent surface water and ground water from entering excavations, from ponding on prepared subgrades, and from flooding Project site and surrounding area.

B. Protect subgrades from softening, undermining, washout, and damage by rain or water accumulation.

1. Reroute surface water runoff away from excavated areas. Do not allow water to accumulate in excavations. Do not use excavated trenches as temporary drainage ditches.
2. Install a dewatering system to keep subgrades dry and convey ground water away from excavations. Maintain until dewatering is no longer required.

3.3 EXPLOSIVES

A. Explosives: Do NOT use explosives.

3.4 EXCAVATION, GENERAL

A. Unclassified Excavation: Unless otherwise indicated, excavate to subgrade elevations regardless of the character of surface and subsurface conditions encountered. Unclassified excavated materials may include rock, soil materials, and obstructions. No changes in the Contract Sum or the Contract Time will be authorized for excavation of rock, old building fill, highly plastic clays with a PI of 30 or greater, unsatisfactory soil or removal of obstructions.

1. If excavated materials intended for fill and backfill include unsatisfactory soil materials and rock, replace with satisfactory soil materials.
2. Remove rock and/or unsatisfactory soils to lines and grades indicated to permit installation of permanent construction without exceeding the following dimensions, unless specifically indicated otherwise on the Drawings:

    a. 24 inches outside of concrete forms other than at footings.

    b. 12 inches outside of concrete forms at footings.

    c. 6 inches outside of minimum required dimensions of concrete cast against grade.

    d. Outside dimensions of concrete walls indicated to be cast against rock without forms or exterior waterproofing treatments.
    e. 6 inches beneath bottom of concrete slabs on grade.

    f. 6 inches beneath pipe in trenches, and the greater of 24 inches wider than pipe or 42 inches wide.

3.5 EXCAVATION FOR STRUCTURES

A. Excavate to indicated elevations and dimensions within a tolerance of plus or minus 1 inch. If applicable, extend excavations a sufficient distance from structures for placing and removing concrete formwork, for installing services and other construction, and for inspections.

1. Excavations for Footings, Foundations, Retaining Walls or Within 10 Feet of Building Elements: Do not disturb bottom of excavation. Excavate by hand to final grade just before placing concrete reinforcement. Trim bottoms to required lines and grades to leave solid base to receive other work. Refer to Drawings for additional requirements.

a. The entire building pad shall be lime stabilized starting from 2 foot below the foundation bearing elevations and extending up to subgrade. No utility trenching or other penetration of lime treated soils after treatment is allowed. Refer to the Grading Plan for final elevations to determine areas of excavation and fill under the building pad. See 3.11 LIME STABILIZATION for requirements.

2. Excavation for Underground Tanks, Basins, and Mechanical or Electrical Utility Structures: Excavate to elevations and dimensions indicated within a tolerance of plus or minus 1 inch. Do not disturb bottom of excavations intended as bearing surfaces.

3.6 EXCAVATION FOR WALKS AND PAVEMENTS

A. Excavate surfaces under walks and pavements to indicated lines, cross sections, elevations, and subgrades.
   1. All heavy duty vehicular pavements (asphalt and concrete) shall be lime stabilized starting from 2 foot below the foundation bearing elevations and extending up to subgrade. No utility trenching or other penetration of lime treated soils after treatment is allowed. Refer to the Grading Plan for final elevations to determine areas of excavation and fill under the building pad. See 3.11 LIME STABILIZATION for requirements.

B. Where pavement subgrades are bearing on rock, overexcavate to a depth of 4 inches and backfill to subgrade elevations with compacted #57 Drainage Fill.

3.7 EXCAVATION FOR UTILITY TRENCHES

A. Excavate trenches to indicated gradients, lines, depths, and elevations.

   1. Beyond building perimeter, excavate trenches to allow installation of top of pipe below frost line.

B. Excavate trenches to uniform widths to provide the following clearance on each side of pipe or conduit. Excavate trench walls vertically from trench bottom to 12 inches higher than top of pipe or conduit, unless otherwise indicated.

   1. Clearance: 12 inches each side of pipe or conduit unless otherwise indicated.

C. Trench Bottoms: Excavate and shape trench bottoms to provide uniform bearing and support of pipes and conduit. Shape subgrade to provide continuous support for bells, joints, and barrels of pipes and for joints, fittings, and bodies of conduits. Remove projecting stones and sharp objects along trench subgrade.

   1. For pipes and conduit less than 6 inches in nominal diameter and flat-bottomed, multiple-duct conduit units, hand-excavate trench bottoms and support pipe and conduit on an undisturbed subgrade.
   2. For pipes and conduit 6 inches or larger in nominal diameter, shape bottom of trench to support bottom 90 degrees of pipe circumference. Fill depressions with tamped sand backfill.

3. Excavate trenches 6 inches deeper than elevation required in rock or other unyielding bearing material to allow for bedding course.

3.8 SUBGRADE INSPECTION

A. Notify Architect and Geotechnical Testing Agency when excavations have reached required subgrade.

B. If Architect in consultation with Geotechnical Testing Agency determines that unsatisfactory soil or rock is present, continue excavation and replace with approved compacted backfill or fill material as directed.

C. Proof-roll subgrade below the building slabs, structures, retaining walls, fill areas and pavements with heavy pneumatic-tired equipment to identify soft pockets and areas of excess yielding. Do not proof-roll wet or saturated subgrades.

1. Completely proof-roll subgrade in one direction, repeating proof-rolling in direction perpendicular to first direction. Limit vehicle speed to 3 mph.
2. Proof-roll with a loaded 10-wheel, tandem-axle dump truck weighing not less than 15 tons or other piece of equipment acceptable to the Geotechnical Testing Agency.
3. Proof-rolling operations shall be conducted in the presence of the Geotechnical Testing Agency.
4. Excavate soft spots, unsatisfactory soils, and areas of excessive pumping or rutting, as determined by Architect, and replace with compacted backfill or fill as directed.

D. Verify by probing or other means, that no stone, old building fill and debris or rock floaters in any dimension 4 inches or greater are within 10 feet of the building footprint subgrade elevation or of any pavement, structure, footing or slab-on-grade. If unsuitable soil, building fill, debris and floaters are encountered, excavate to remove the rock and unsuitable material and backfill with Satisfactory Soil compacted as specified

E. Removal of unsuitable soils, fill, rock or additional undercutting and replacement with Satisfactory Soil are included in the Work and no additional changes or charges for this work will be allowed.

F. Reconstruct subgrades damaged by freezing temperatures, frost, rain, accumulated water, or construction activities, as directed by Architect, without additional compensation.

3.9 UNAUTHORIZED EXCAVATION

A. Fill unauthorized excavation under foundations or wall footings by extending bottom elevation of concrete foundation or footing to excavation bottom, without altering top elevation. Lean concrete fill, with 28-day compressive strength of 2500 psi, may be used when approved by Architect.

1. Fill unauthorized excavations under other construction or utility pipe as directed by Architect.

3.10 STORAGE OF SOIL MATERIALS

A. Stockpile borrow soil materials and excavated satisfactory soil materials without intermixing. Place, grade, and shape stockpiles to drain surface water. Cover to prevent windblown dust.

1. Stockpile soil materials away from edge of excavations. Do not store within drip line of remaining trees.

3.11 LIME STABILIZATION

A. Use cyclone or screw type spreaders or distributors to apply chemical with a consistent and accurate application rate. Control dust during application.

B. Use self-propelled, high powered rotary mixers capable of mixing to a minimum depth of 16", fitted with cutting teeth capable of trimming earth, aggregate and bituminous mixtures and designed to be accurately adjusted vertically and held in place. Machine shall weigh a minimum of 25,000 lbs with a maximum center deflection of 1/8".

C. Soils to be stabilized shall be free of frost with a minimum air temperature of 35 degrees. Stabilization shall be performed in the same construction season as anticipated building footings, slabs, pavements, etc. will be constructed so that stabilized soils are covered and not left open to degrade.

D. Final selection of chemicals and application rates will be determined by the geotechnical inspecting agency.

E. Prepare are to be treated by cutting to subgrade per requirements of this Specification, such that, when stabilized, mixed and recompacted, final subgrade will be per plans. If slurry is used, scarify subgrade prior to application of slurry to prevent run-off.

F. Following spreading of the chemical and prior to the addition of water and mixing, the area should be scarified to loosen hard, dense soil and allow for water to easily penetrate the subgrade soil prior to mixing.

G. Lime stabilization in dry, bulk powder form shall be properly hydrated prior to scarifying / mixing. Final recommendation of the amount of water to be applied shall be by the Geotechnical Testing Agency. Water may be spread by water truck directly on the subrage or it may be injected directly into the mixing drum of the rotary mixer during the mixing operation.

H. Lime should be incorporated into the existing on-site soil at a typical rate of approximately 5% by dry weight of soil to a depth of 14" – 16" per lift, distributed evenly over the soil surface. The soil / lime mixture should be properly moistened in order to initiate the hydration of the lime, thoroughly mixed and re-compacted. Laboratory test performed by the Geotechnical Testing Agency shall determine the final admixture and rate.

I. Compaction shall begin when mixing, gradation and moisture requirements are all satisfactorily completed. Prior to the beginning of compaction, the mixture shall be in a loose condition for its full depth and width. The mixture shall be uniformly compacted until a dry density of not less than 98% is achieved.

J. The treated area shall be shaped to the required lines and grades with a smooth drum roller, and be uniform and compacted. The surface shall be maintained in a moist condition during all finishing operations by means of sprinkling water. Finished portions of stabilized subgrade that are traveled on by equipment working to stabilize other sections shall be protected to keep equipment from penetrating and damaging the finished layer.

K. The curing period shall be a minimum of 7 days. During this period, no traffic shall be permitted on any completed surface that is still curing. During this period (and for a minimum of 7 days), the completed surface shall be protected from freezing.

L. Lime stabilization shall be performed by a contractor specializing in lime stabilization, with specific experience in the application of lime or cement stabilization methods.

3.12 BACKFILL

A. Place and compact backfill in excavations promptly, but not before completing the following:

1. Construction below finish grade including, where applicable, subdrainage, dampproofing, waterproofing, and perimeter insulation.
2. Surveying locations of underground utilities for Record Documents.
3. Testing and inspecting underground utilities.
4. Removing concrete formwork.
5. Removing trash and debris.
6. Removing temporary shoring and bracing, and sheeting.
7. Installing permanent or temporary horizontal bracing on horizontally supported walls.

B. Place backfill on subgrades free of mud, frost, snow, or ice.

C. Structural soil backfill at pavement shall have a CBR value of 1.6 or greater.

3.13 UTILITY TRENCH BACKFILL

A. Place backfill on subgrades free of mud, frost, snow, or ice.

B. Place and compact bedding course on trench bottoms and where indicated. Shape bedding course to provide continuous support for bells, joints, and barrels of pipes and for joints, fittings, and bodies of conduits.

C. Backfill trenches excavated within and to a point 10 feet beyond the building footprint with compacted satisfactory silty clay soil; pulverized shale or controlled low-strength concrete flowable fill. Beyond building line influence areas, utility trench backfill may consist of any Satisfactory approved soil material.

D. Provide 4-inch- thick, concrete-base slab support for piping or conduit less than 30 inches below surface of roadways. After installing and testing, completely encase piping or conduit in a minimum of 4 inches of concrete before backfilling or placing roadway subbase.

E. Beyond building area influence lines, place and compact initial backfill of subbase material or satisfactory soil, free of particles larger than 1 inch in any dimension, to a height of 12 inches over the utility pipe or conduit.

1. Carefully compact initial backfill under pipe haunches and compact evenly up on both sides and along the full length of utility piping or conduit to avoid damage or displacement of piping or conduit. Coordinate backfilling with utilities testing.

F. Backfill voids with satisfactory soil while installing and removing shoring and bracing.

G. Place and compact final backfill of approved satisfactory soil to final subgrade elevation.

H. Unless otherwise indicated, install warning tape directly above utilities, 12 inches below finished grade, except 6 inches below subgrade under pavements and slabs.

3.14 SOIL FILL

A. Plow, scarify, bench, or break up sloped surfaces steeper than 1 vertical to 4 horizontal so fill material will bond with existing material.

1. As indicated, develop horizontal benches near the toe of the slopes and bench continuously as the fill is placed. Develop benches every 3 to 4 feet of elevation gain.
2. Excavate benches deep enough so that all building fill and soft to medium stiff surface soils are removed and the stiff native soil is exposed.
3. As benching progresses, place uniform layers of approved satisfactory soil fill properly moisture conditioned and compacted.
4. Provided it is properly moisture conditioned, the benched material may be utilized as fill in the compacted fills below.

B. Place and compact fill material in layers to required elevations as follows:

1. Under grass and planted areas, use satisfactory soil material.
2. Under walks and pavements, use satisfactory soil and subbase material as indicated.
3. Under steps and ramps, use satisfactory soil and engineered fill as indicated.
4. Under building slabs, use satisfactory soil and engineered fill as indicated.
5. Under footings and foundations, use controlled low-strength material.

C. Place soil fill on subgrades free of mud, frost, snow, or ice.

D. The entire building pad shall be lime stabilized starting from 2 foot below the foundation bearing elevations and extending up to subgrade. No utility trenching or other penetration of lime treated soils after treatment is allowed. Refer to the Grading Plan for final elevations to determine areas of excavation and fill under the building pad. See 3.11 LIME STABILIZATION for requirements. Proof rolling shall not be required at the building pad where lime stabilized.

E. All heavy duty vehicular pavements (asphalt and concrete) shall be lime stabilized starting from 2 foot below the foundation bearing elevations and extending up to subgrade. No utility trenching or other penetration of lime treated soils after treatment is allowed. Refer to the Grading Plan for final elevations to determine areas of excavation and fill under the building

pad. See 3.11 LIME STABILIZATION for requirements. Proof rolling shall not be required at the building pad where lime stabilized.

F. Place rubbilized concrete fill to effectively choke the larger concrete pieces, filling all voids or openspaces. Compact the fill with heavy construction equipment in multiple passes and in two directions of the fill surface until acceptable to the Geotechnical Testing Agency.

3.15 SOIL MOISTURE CONTROL

A. Uniformly moisten or aerate subgrade and each subsequent fill or backfill soil layer before compaction to within 2 percent below and above of optimum moisture content.

1. Do not place backfill or fill soil material on surfaces that are muddy, frozen, or contain frost or ice.
2. Remove and replace, or scarify and air dry otherwise satisfactory soil material that exceeds optimum moisture content by 3 percent and is too wet to compact to specified dry unit weight.

3.16 COMPACTION OF SOIL BACKFILLS AND FILLS

A. Place backfill and fill soil materials in layers not more than 8 inches in loose depth for material compacted by heavy compaction equipment, and not more than 4 inches in loose depth for material compacted by hand-operated tampers.

B. Place backfill and fill soil materials evenly on all sides of structures to required elevations, and uniformly along the full length of each structure.

C. Compact soil materials to not less than the following percentages of maximum dry unit weight according to ASTM D 698:

1. Under structures, footings and building slabs, scarify and recompact top 12 inches of existing subgrade and each layer of backfill or fill soil material at 98 percent.
2. Under walkways, steps, pavements and lawn or unpaved areas, scarify and recompact top 6 inches below subgrade and compact each layer of backfill or fill soil material at 95 percent.
3. For utility trenches, compact each layer of initial and final backfill soil material within 10 feet of building lines at 98 percent and beyond building lines at 95 percent.
4. Under lawn or unpaved areas, scarify and recompact top 6 inches below subgrade and compact each layer of backfill or fill soil material at 90 percent.

D. Settlement Monitoring shall be performed at the building pad with five settlement plates, in accordance with the following:
1. Level the ground surface to an elevation of 2” below the desired elevation of the base plate of the settlement platform. Level over a sufficient area to accommodate the bottom plate and at the location shown or directed.
2. Place, lightly tamp, and level a 2” layer of fine aggregate at the proposed location of the bottom plate. Set and level the bottom plate on the fine aggregate.

3. Place loose soil to an elevation corresponding to that of the top plate of the settlement platform. Ensure that the loosed soil does not disturb the platform and that it extends laterally from the perimeter of the top plate to a slope of 1:1 or flatter.
4. After placing and leveling the top plate, complete the embankment as specified for the project and ensure that the settlement platform is not damaged or disturbed. Fill material placed within 3 foot of the settlement monument shall be compacted by hand.
5. The settlement shall be measured and recorded, to the nearest .01 foot, as well as the elevation of the fill placement at weekly intervals. Stop work at any location where settlement platforms are disturbed or damaged and make repairs necessary or replace.
6. As the embankment is constructed, add sections of 2 ½" risers and 4" PVC casing to the assembly (tighten each new section of 2 ½" pipe with a pipe wrench before taking a reading to ensure that the next added section does not affect future readings). Keep the top of the outer pipe closed as work progresses with a 4" standard cap.
7. When work is complete, secure the cap to the final outer pipe section. The settlement plates and risers can be fabricated by the contractor; however, they are also abailable from manufacturers.
8. Settlement shall be monitored for 30 days after fill of the building pad is complete, without any additional work being performed at the building pad site.
9. After the 30 day observation period, settlement recorded outside of the allowed lines and grade set forth in this Specification shall be remedied in accordance with this Specification.

3.17 GRADING

A. General: Uniformly grade areas to a smooth surface, free of irregular surface changes. Comply with compaction requirements and grade to cross sections, lines, and elevations indicated.

1. Provide a smooth transition between adjacent existing grades and new grades.
2. Cut out soft spots, fill low spots, and trim high spots to comply with required surface tolerances.

B. Site Grading: Slope grades to direct water away from buildings and to prevent ponding. Finish subgrades to required elevations within the following tolerances:

1. Lawn or Unpaved Areas: Plus or minus 1 inch.
2. Walks: Plus or minus 1 inch.
3. Pavements: Plus or minus 1/2 inch.

C. Grading inside Building Lines: Finish subgrade to a tolerance of 1/2 inch when tested with a 10-foot straightedge.

3.18 SUBSURFACE DRAINAGE

A. Subdrainage Pipe: Specified in Division 33 Section "Subdrainage."

B. Subsurface Drain: Place subsurface drainage geotextile around perimeter of subdrainage trench. Place a 6-inch course of filter material on subsurface drainage geotextile to support subdrainage pipe. Encase subdrainage pipe in a minimum of 12 inches of filter material, placed in

compacted layers 6 inches thick, and wrap in subsurface drainage geotextile, overlapping sides and ends at least 6 inches.

1. Compact each filter material layer to 75 percent of maximum dry unit weight according to ASTM D4253 and D4254.

C. Drainage Backfill: Place and compact filter material over subsurface drain, in width indicated, to within 12 inches of final subgrade, in compacted layers 6 inches thick. Overlay drainage backfill with 1 layer of subsurface drainage geotextile, overlapping sides and ends at least 6 inches.

1. Compact each filter material layer to 75 percent of maximum dry unit weight according to ASTM D D4253 and D4254.
2. Place and compact impervious fill over drainage backfill in 6-inch- thick compacted layers to final subgrade.

D. Below Grade Walls/Structures: Backfill walls with Drainage Fill or Drainage Course to a minimum width of 5 feet between the wall and the soil line, to a point 2'-6" below finish grade. Completely wrap the Drainage Fill with subsurface drainage geotextile material, overlapping sides and ends at least 6 inches and top at least 12 inches, to separate the fill zone from the adjacent soil. Complete backfilling above the Drainage Fill with 2 feet of Satisfactory Soil with a PI of less than 30 and fill to finish grade with topsoil specified in Section 329200.

3.19 SUBBASE AND BASE COURSES

A. Place subbase course on subgrades free of mud, frost, snow, or ice.

B. On prepared subgrade, place subbase course under pavements and walks as follows:

1. Where indicated, install separation geotextile on prepared subgrade according to manufacturer's written instructions, overlapping sides and ends.
2. Place base course material over subbase course under hot-mix asphalt pavement.
3. Shape subbase and base course to required crown elevations and cross-slope grades.
4. Place subbase and base course 6 inches or less in compacted thickness in a single layer.
5. Place subbase and base course that exceeds 6 inches in compacted thickness in layers of equal thickness, with no compacted layer more than 6 inches thick or less than 3 inches thick.
6. Compact subbase and base course at optimum moisture content to required grades, lines, cross sections, and thickness to not less than 95 percent of maximum dry unit weight according to ASTM D 1557.

3.20 DRAINAGE COURSE

A. Place drainage course on subgrades free of mud, frost, snow, or ice.

B. On prepared subgrade, place and compact drainage course under cast-in-place concrete slabs-on-grade as follows:

1. Install subdrainage geotextile on prepared subgrade according to manufacturer's written instructions, overlapping sides and ends.
2. Place drainage course 6 inches or less in compacted thickness in a single layer.
3. Place drainage course that exceeds 6 inches in compacted thickness in layers of equal thickness, with no compacted layer more than 6 inches thick or less than 3 inches thick.
4. Compact each layer of drainage course to required cross sections and thicknesses to not less than 75 percent of maximum dry unit weight according to ASTM D D4253 and D4254.

3.21 FIELD QUALITY CONTROL

A. Testing Agency: Owner will engage and pay for a qualified Geotechnical Testing Agency to perform field testing.

B. Allow testing agency to inspect and test subgrades and each fill or backfill layer. Proceed with subsequent earthwork only after test results for previously completed work comply with requirements.

C. Footing Subgrade: At footing subgrades, at least one test of each soil stratum will be performed to verify design bearing capacities. Subsequent verification and approval of other footing subgrades may be based on a visual comparison of subgrade with tested subgrade when approved by Architect.

D. Testing agency will test compaction of soils in place according to ASTM D 1556, ASTM D 2167, ASTM D 2922, and ASTM D 2937, as applicable. Tests will be performed at the following locations and frequencies:

1. Paved and Building Slab Areas: At subgrade and at each compacted fill and backfill layer, at least 1 test for every 5000 sq. ft. or less of paved area or building slab, but in no case fewer than 3 tests per lift.
2. Foundation and Retaining Wall Backfill: At each compacted backfill layer, at least 1 test for each 100 feet or less of wall length, but no fewer than 2 tests.
3. Trench Backfill: At each compacted initial and final backfill layer, at least 1 test for each 150 feet or less of trench length, but no fewer than 2 tests.

E. When testing agency reports that subgrades, fills, or backfills have not achieved degree of compaction specified, scarify and moisten or aerate, or remove and replace soil to depth required; recompact and retest until specified compaction is obtained.

3.22 PROTECTION

A. Protecting Graded Areas: Protect newly graded areas from traffic, freezing, and erosion. Keep free of trash and debris.

B. Repair and reestablish grades to specified tolerances where completed or partially completed surfaces become eroded, rutted, settled, or where they lose compaction due to subsequent construction operations or weather conditions.

1. Scarify or remove and replace soil material to depth as directed by Architect; reshape and recompact.

C. Where settling occurs before Project correction period elapses, remove finished surfacing, backfill with additional soil material, compact, and reconstruct surfacing.

1. Restore appearance, quality, and condition of finished surfacing to match adjacent work, and eliminate evidence of restoration to greatest extent possible.

3.23 DISPOSAL OF SURPLUS AND WASTE MATERIALS

A. Disposal: Remove waste material, including unsatisfactory soil, trash, and debris, and legally dispose of it off Owner's property.

END OF SECTION 312000

SECTION 312010 - BUILDING STRUCTURE EXCAVATION AND BACKFILL

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

1. Excavating and backfilling for building foundations and slabs on grade.

B. Related Sections:

1. Division 01 Section “Special Inspection.”
2. Division 02 Section “Existing Conditions”

3. Divisions 26, 27, 28, and 33 Sections for installing underground electrical utilities and electrical structures.

4. Division 31 Section "Earthwork" for all other earthwork.

1.3 DEFINITIONS

A. Backfill: Soil material or controlled low-strength material used to fill an excavation.

B. Leveling Course: Aggregate layer between the bottom of footings and bedrock where the structure is partially founded on bedrock and partially founded on soil.

C. Excavation: Removal of material encountered above subgrade elevations and to lines and dimensions indicated.

D. Structures: Buildings, footings, foundations, retaining walls and building slabs, constructed above or below the ground surface.

E. Subgrade: Uppermost surface of an excavation or the top surface of a fill or backfill immediately below subbase, drainage fill, or drainage course.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of the following manufactured products required:

1. Controlled Low-Strength Material, including design mixture.

PART 2 - PRODUCTS

2.1 SOIL MATERIALS FOR BACKFILL

A. Satisfactory Soils: See Division 31 Section “Earthwork” for specification of satisfactory soils.

B. Leveling Course: Narrowly graded mixture of washed crushed stone, or crushed or uncrushed gravel; ASTM D 448; coarse-aggregate grading Size 67.

2.2 CONTROLLED LOW-STRENGTH MATERIAL FOR BACKFILL

A. Controlled Low-Strength Material: Self-compacting, flowable concrete material produced from the following:

1. Portland Cement: ASTM C 150, Type II.

2. Fly Ash: ASTM C 618, Class C or F.

3. Normal-Weight Aggregate: ASTM C 33, 3/8-inch nominal maximum aggregate size.

4. Water: ASTM C 94/C 94M.

B. Produce conventional-weight, controlled low-strength material with 140-psi compressive strength when tested according to ASTM C 495.

PART 3 - EXECUTION

3.1 PREPARATION

A. Protect structures, utilities, sidewalks, pavements, and other facilities from damage caused by settlement, lateral movement, undermining, washout, and other hazards created by excavation operations.

B. Protect and maintain erosion and sedimentation controls during earth moving operations.

C. Protect subgrades and foundation soils from freezing temperatures and frost. Remove temporary protection before placing subsequent materials.

3.2 DEWATERING

A. Prevent surface water and ground water from entering excavations, from ponding on prepared subgrades, and from flooding Project site and surrounding area.

B. Protect subgrades from softening, undermining, washout, and damage by rain or water accumulation.

1. Reroute surface water runoff away from excavated areas. Do not allow water to accumulate in excavations. Do not use foundation excavations as temporary drainage ditches.

3.3 EXPLOSIVES

A. Explosives: Do not use explosives.

3.4 EXCAVATION, GENERAL

A. Unclassified Excavation: Excavate to subgrade elevations regardless of the character of surface and subsurface conditions encountered. Unclassified excavated materials may include rock, soil materials, and obstructions. No changes in the Contract Sum or the Contract Time will be authorized for rock excavation or removal of obstructions. If solid obstructions are encountered, they shall be excavated to leave at least 12 inches of clearance from the new foundations.

3.5 EXCAVATION FOR STRUCTURES

A. Excavate to elevations and dimensions specified below within a tolerance of plus 1 inch minus 0 inch. If applicable, extend excavations a sufficient distance from structures for placing and removing concrete formwork, for installing services and other construction, and for inspections.

1. Excavations for Footings and Foundations:

a. Vactor Building:

1) Where soil is encountered below 12 inches below bottom of footing elevation, excavate below footings through any uncontrolled fill until original undisturbed soil or bedrock with adequate bearing capacity is reached. Coordinate inspection of subgrade. Backfill excavation to bottom of footing elevation with Controlled Low-Strength material

2) Where bedrock is encountered above 12 inches below bottom of footing elevation, excavate into competent bedrock 12 inches below and beside the bottom of footing elevation. Coordinate inspection of subgrade. Backfill excavation to bottom of footing elevation with Leveling Course material.

2. Excavations for Building Slabs on Grade:

a. Excavate to an elevation of 24 inches below the final finished floor elevation. Backfill with satisfactory soils.

3.6 SUBGRADE INSPECTION

A. Coordinate inspection of footing subgrades by/with Special Inspector.

1. Special Inspector will report to Architect/Engineer. If Architect/Engineer determines that unsatisfactory soil is present, continue excavation and backfill as specified above.

B. Proof-roll subgrade below the building slabs with a pneumatic-tired and loaded 10-wheel, tandem-axle dump truck weighing not less than 15 tons in presence of Special Inspector to identify soft pockets and areas of excess yielding. Do not proof-roll wet or saturated subgrades.

1. Completely proof-roll subgrade in one direction. Limit vehicle speed to 3 mph.

2. Special Inspector will report to Architect/Engineer. Excavate soft spots, unsatisfactory soils, and areas of excessive pumping or rutting, as determined by Architect/Engineer, and replace with compacted backfill or fill as directed.

C. Reconstruct subgrades damaged by freezing temperatures, frost, rain, accumulated water, or construction activities, as directed by Architect/ Engineer, without additional compensation.

3.7 UNAUTHORIZED EXCAVATION

A. Fill unauthorized excavation under foundations or wall footings by backfilling with appropriate materials specified above.

3.8 BACKFILL

A. Place and compact backfill in excavations promptly, but not before completing the following:

1. Construction below finish grade including, where applicable, subdrainage, dampproofing, waterproofing, and perimeter insulation.

2. Surveying locations of underground utilities for Record Documents.

3. Testing and inspecting underground utilities.

4. Removing concrete formwork.

5. Removing trash and debris.

6. Removing temporary shoring and bracing, and sheeting.

7. Installing permanent or temporary horizontal bracing on horizontally supported walls.

B. Place backfill on subgrades free of mud, frost, snow, or ice.

C. Trenches under Footings: Backfill trenches excavated under footings and within 18 inches of bottom of footings with Footing Concrete to elevation of bottom of footings.

D. Backfill voids with Controlled Low-Strength Material while removing shoring and bracing.

3.9 SOIL MOISTURE CONTROL

A. Uniformly moisten or aerate subgrade and each subsequent fill or backfill soil layer before compaction to within 2 percent of optimum moisture content.

1. Do not place backfill or fill soil material on surfaces that are muddy, frozen, or contain frost or ice.

2. Remove and replace, or scarify and air dry, otherwise satisfactory soil material that exceeds optimum moisture content by 2 percent and is too wet to compact to specified dry unit weight.

3.10 COMPACTION OF SOIL BACKFILLS AND FILLS

A. Place backfill soil materials in layers not more than 8 inches in loose depth for material compacted by heavy compaction equipment, and not more than 4 inches in loose depth for material compacted by hand-operated tampers.

B. Place backfill and fill soil materials evenly on all sides of structures to required elevations, and uniformly along the full length of each structure.

C. Compact soil materials to not less than 98% of maximum dry unit weight according to the Standard Proctor Test ASTM D 698.

D. Lightly compact stone leveling course.

3.11 FIELD QUALITY CONTROL

A. Special Inspections: Owner will engage a qualified special inspector to perform the following special inspections:

1. Verify that materials below footings and slabs-on grade are adequate to achieve the design bearing capacity.

2. Verify Excavations are extended to the proper depth and reached proper material.

3. Perform classification and testing of controlled fill materials.

4. Verify use of proper materials, densities and lift thicknesses during placement and compaction of controlled backfill.

5. Prior to placement of controlled backfill, observe subgrade and verify that it has been prepared properly.

3.12 PROTECTION

A. Existing Adjacent Construction: Protect existing adjacent structure and underground utilities not included in demolition area as indicated on plans.

3.13 DISPOSAL OF SURPLUS AND WASTE MATERIALS

A. Dispose of surplus and waste materials in accordance with Division 31 Section "Earthwork."

END OF SECTION

DIVISION 32

EXTERIOR IMPROVEMENTS

SECTION 32 1216 - ASPHALT PAVING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General, Special and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. This Section includes the following:
   1. Cold milling of existing hot-mix asphalt pavement.
   2. Hot-mix asphalt patching.
   3. Hot-mix asphalt paving.
   4. Pavement marking paint.
   5. Recycled rubber wheelstops.

B. Related Sections include the following:
   1. Division 31 Section "Earth Moving" for aggregate subbase and base courses and for aggregate pavement shoulders.

1.3 DEFINITIONS

A. Hot-Mix Asphalt Paving Terminology: Refer to ASTM D 8 for definitions of terms.

B. DOT: Department of Transportation.

1.4 SYSTEM DESCRIPTION

A. Provide hot-mix asphalt paving according to materials, workmanship, and other applicable requirements of standard specifications of state or local DOT.
   1. Standard Specification: Kentucky Department of Highways (KYDOH), “Standard Specification for Road and Bridge Construction”, current edition.
   2. Measurement and payment provisions and safety program submittals included in standard specifications do not apply to this Section.

1.5 SUBMITTALS

A. Product Data: For each type of product indicated. Include technical data and tested physical and performance properties.

B. Job-Mix Designs: Certification, by authorities having jurisdiction, of approval of each job mix proposed for the Work.

C. Job-Mix Designs: For each job mix proposed for the Work.

D. Shop Drawings: Indicate pavement markings, lane separations, and defined parking spaces. Indicate, with international graphics symbol, spaces dedicated to people with disabilities.

E. Samples: For each paving fabric, 12 by 12 inches minimum.

F. Qualification Data: For manufacturer.

G. Material Test Reports: For each paving material.

H. Material Certificates: For each paving material, signed by manufacturers.

1.6 QUALITY ASSURANCE

A. Manufacturer Qualifications: A qualified manufacturer.
   1. Manufacturer shall be a paving-mix manufacturer registered with and approved by authorities having jurisdiction or the DOT of the state in which Project is located.

B. Testing Agency Qualifications: Qualified according to ASTM D 3666 for testing indicated, as documented according to ASTM E 548.

C. Regulatory Requirements: Comply with KYDOH Standard Specifications, Division 4, for asphalt paving work.

D. Preinstallation Conference: Conduct conference at Project site to comply with requirements in Division 01 Section "Project Management and Coordination." Review methods and procedures related to hot-mix asphalt paving including, but not limited to, the following:
   1. Review proposed sources of paving materials, including capabilities and location of plant that will manufacture hot-mix asphalt.
   2. Review condition of subgrade and preparatory work.
   3. Review requirements for protecting paving work, including restriction of traffic during installation period and for remainder of construction period.
   4. Review and finalize construction schedule and verify availability of materials, Installer's personnel, equipment, and facilities needed to make progress and avoid delays.

1.7 DELIVERY, STORAGE, AND HANDLING

A. Deliver pavement-marking materials to Project site in original packages with seals unbroken and bearing manufacturer's labels containing brand name and type of material, date of manufacture, and directions for storage.

B. Store pavement-marking materials in a clean, dry, protected location within temperature range required by manufacturer. Protect stored materials from direct sunlight.

1.8 PROJECT CONDITIONS

A. Environmental Limitations: Do not apply asphalt materials if subgrade is wet or excessively damp or if the following conditions are not met:
   1. Prime and Tack Coats: Minimum surface temperature of 60 deg F.
   2. Slurry Coat: Comply with weather limitations of ASTM D 3910.
   3. Asphalt Base Course: Minimum surface temperature of 40 deg F and rising at time of placement.
   4. Asphalt Surface Course: Minimum surface temperature of 60 deg F at time of placement.

B. Pavement-Marking Paint: Proceed with pavement marking only on clean, dry surfaces and at a minimum ambient or surface temperature of 40 deg F for oil-based materials, 50 deg F for water-based materials, and not exceeding 95 deg F.

PART 2 - PRODUCTS

2.1 AGGREGATES

A. General: Use materials and gradations that have performed satisfactorily in previous installations.

B. Coarse Aggregate: KYDOH Section 805, sound; angular crushed stone, crushed gravel, or properly cured, crushed blast-furnace slag.

C. Fine Aggregate: KYDOH Section 804, sharp-edged natural sand or sand prepared from stone, gravel, properly cured blast-furnace slag, or combinations thereof.

D. Mineral Filler: KYDOH Section 804, rock or slag dust, hydraulic cement, or other inert material.

2.2 ASPHALT MATERIALS

A. Asphalt Binder: KYDOH Section 806.

B. Asphalt Cement: KYDOH Section 806.

C. Prime Coat: KYDOH Section 806.

D. Tack Coat: KYDOH Section 806, emulsified asphalt of suitable grade and consistency for application.

E. Water: Potable.

2.3 AUXILIARY MATERIALS

A. Herbicide: Commercial chemical for weed control, registered by the EPA. Provide in granular, liquid, or wettable powder form.

B. Pavement-Marking Paint: Latex, waterborne emulsion, lead and chromate free, ready mixed, complying with FS TT-P-1952, with drying time of less than 45 minutes.
1. Color: White, blue or other color as indicated.

C. Thermoplastic Markings: Comply with KYDOH Section 717.

D. Wheel Stops: Solid, integrally colored, 96 percent recycled HDPE or commingled postconsumer and postindustrial recycled plastic; UV stabilized; 4 inches high by 6 inches wide by 72 inches long. Provide chamfered corners, drainage slots on underside, and holes for anchoring to substrate.
1. Dowels: Galvanized steel, 3/4-inch diameter, 10-inch minimum length.
2. Adhesive: As recommended by wheel-stop manufacturer for application to asphalt pavement.

2.4 MIXES

A. Hot-Mix Asphalt: Dense, hot-laid, hot-mix Class III PG64-22 asphalt plant mixes approved by authorities having jurisdiction and complying with the following requirements:
1. Provide mixes with a history of satisfactory performance in geographical area where Project is located.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Verify that subgrade is dry and in suitable condition to support paving and imposed loads.

B. Proof-roll subgrade below pavements with heavy pneumatic-tired equipment to identify soft pockets and areas of excess yielding. Do not proof-roll wet or saturated subgrades.
   1. Completely proof-roll subgrade in one direction. Limit vehicle speed to 3 mph.
   2. Proof roll with a loaded 10-wheel, tandem-axle dump truck weighing not less than 15 tons.
   3. Excavate soft spots, unsatisfactory soils, and areas of excessive pumping or rutting, as determined by Architect, Geotechnical testing agency and Owner, and replace with compacted backfill or fill as directed.

C. Proceed with paving only after unsatisfactory conditions have been corrected.

D. Verify that utilities and other items requiring a cut and installation beneath the asphalt surface have been completed and that asphalt surface has been repaired flush with adjacent asphalt prior to beginning installation of imprinted asphalt.

3.2 COLD MILLING

A. Clean existing pavement surface of loose and deleterious material immediately before cold milling. Remove existing asphalt pavement by cold milling to grades and cross sections indicated.
   1. Mill to a depth of 1-1/2 inches.
   2. Mill to a uniform finished surface free of excessive gouges, grooves, and ridges.
   3. Control rate of milling to prevent tearing of existing asphalt course.
   4. Repair or replace curbs, manholes, and other construction damaged during cold milling.
   5. Excavate and trim unbound-aggregate base course, if encountered, and keep material separate from milled hot-mix asphalt.
   6. Transport milled hot-mix asphalt to asphalt recycling facility.
   7. Keep milled pavement surface free of loose material and dust.

3.3 PATCHING

A. Hot-Mix Asphalt Pavement: Saw cut perimeter of patch and excavate existing pavement section to sound base. Excavate rectangular or trapezoidal patches, extending 12 inches into adjacent sound pavement, unless otherwise indicated. Cut excavation faces vertically. Remove excavated material. Recompact existing unbound-aggregate base course to form new subgrade.

B. Tack Coat: Apply uniformly to vertical surfaces abutting or projecting into new, hot-mix asphalt paving at a rate of 0.05 to 0.15 gal./sq. yd..
   1. Allow tack coat to cure undisturbed before applying hot-mix asphalt paving.
   2. Avoid smearing or staining adjoining surfaces, appurtenances, and surroundings. Remove spillages and clean affected surfaces.

C. Patching: Fill excavated pavements with hot-mix asphalt base mix for full thickness of patch and, while still hot, compact flush with adjacent surface.

3.4

A.

3.5 SURFACE PREPARATION

A. General: Immediately before placing asphalt materials, remove loose and deleterious material from substrate surfaces. Ensure that prepared subgrade is ready to receive paving.
   1. Sweep loose granular particles from surface of unbound-aggregate base course. Do not dislodge or disturb aggregate embedded in compacted surface of base course.

B. Herbicide Treatment: Apply herbicide according to manufacturer's recommended rates and written application instructions. Apply to dry, prepared subgrade or surface of compacted-aggregate base before applying paving materials.
   1. Mix herbicide with prime coat if formulated by manufacturer for that purpose.

C. Prime Coat: Apply uniformly over surface of compacted unbound-aggregate base course at a rate of 0.15 to 0.50 gal./sq. yd.. Apply enough material to penetrate and seal but not flood surface. Allow prime coat to cure for 72 hours minimum.
   1. If prime coat is not entirely absorbed within 24 hours after application, spread sand over surface to blot excess asphalt. Use enough sand to prevent pickup under traffic. Remove loose sand by sweeping before pavement is placed and after volatiles have evaporated.
   2. Protect primed substrate from damage until ready to receive paving.

D. Tack Coat: Apply uniformly to surfaces of existing pavement at a rate of 0.05 to 0.15 gal./sq. yd..
   1. Allow tack coat to cure undisturbed before applying hot-mix asphalt paving.
   2. Avoid smearing or staining adjoining surfaces, appurtenances, and surroundings. Remove spillages and clean affected surfaces.

3.6 HOT-MIX ASPHALT PLACING

A. Machine place hot-mix asphalt on prepared surface, spread uniformly, and strike off. Place asphalt mix by hand to areas inaccessible to equipment in a manner that prevents segregation of mix. Place each course to required grade, cross section, and thickness when compacted.
   1. Place hot-mix asphalt base course in number of lifts and thicknesses indicated.
   2. Place hot-mix asphalt surface course in single lift.
   3. Spread mix at minimum temperature of 250 deg F.
   4. Begin applying mix along centerline of crown for crowned sections and on high side of one-way slopes, unless otherwise indicated.
   5. Regulate paver machine speed to obtain smooth, continuous surface free of pulls and tears in asphalt-paving mat.

B. Place paving in consecutive strips not less than 10 feet wide unless infill edge strips of a lesser width are required.
   1. After first strip has been placed and rolled, place succeeding strips and extend rolling to overlap previous strips. Complete a section of asphalt base course before placing asphalt surface course.

C. Promptly correct surface irregularities in paving course behind paver. Use suitable hand tools to remove excess material forming high spots. Fill depressions with hot-mix asphalt to prevent segregation of mix; use suitable hand tools to smooth surface.

3.7 JOINTS

A. Construct joints to ensure a continuous bond between adjoining paving sections. Construct joints free of depressions with same texture and smoothness as other sections of hot-mix asphalt course.
   1. Clean contact surfaces and apply tack coat to joints.
   2. Offset longitudinal joints, in successive courses, a minimum of 6 inches.
   3. Offset transverse joints, in successive courses, a minimum of 24 inches.
   4. Construct transverse joints as described in AI MS-22, "Construction of Hot Mix Asphalt Pavements."

5. Compact joints as soon as hot-mix asphalt will bear roller weight without excessive displacement.
6. Compact asphalt at joints to a density within 2 percent of specified course density.
7. Provide edge key joint where new asphalt pavement abuts existing asphalt pavement, in accordance with KYTC Standard Drawings.

3.8 COMPACTION

A. General: Begin compaction as soon as placed hot-mix paving will bear roller weight without excessive displacement. Compact hot-mix paving with hot, hand tampers or vibratory-plate compactors in areas inaccessible to rollers.
   1. Complete compaction before mix temperature cools to 185 deg F.

B. Breakdown Rolling: Complete breakdown or initial rolling immediately after rolling joints and outside edge. Examine surface immediately after breakdown rolling for indicated crown, grade, and smoothness. Correct laydown and rolling operations to comply with requirements.

C. Intermediate Rolling: Begin intermediate rolling immediately after breakdown rolling while hot-mix asphalt is still hot enough to achieve specified density. Continue rolling until hot-mix asphalt course has been uniformly compacted to the following density:
   1. Average Density: 96 percent of reference laboratory density according to AASHTO T 245, but not less than 94 percent nor greater than 100 percent.
   2. Average Density: 92 percent of reference maximum theoretical density according to ASTM D 2041, but not less than 90 percent nor greater than 96 percent.

D. Finish Rolling: Finish roll paved surfaces to remove roller marks while hot-mix asphalt is still warm.

E. Edge Shaping: While surface is being compacted and finished, trim edges of pavement to proper alignment. Bevel edges while asphalt is still hot; compact thoroughly.

F. Repairs: Remove paved areas that are defective or contaminated with foreign materials and replace with fresh, hot-mix asphalt. Compact by rolling to specified density and surface smoothness.

G. Protection: After final rolling, do not permit vehicular traffic on pavement until it has cooled and hardened.

H. Erect barricades to protect paving from traffic until mixture has cooled enough not to become marked.

3.9 INSTALLATION TOLERANCES

A. Thickness: Compact each course to produce the thickness indicated within the following tolerances:
   1. Base Course: Plus or minus 1/2 inch.
   2. Surface Course: Plus 1/4 inch, no minus.

B. Surface Smoothness: Compact each course to produce a surface smoothness within the following tolerances as determined by using a 10-foot straightedge applied transversely or longitudinally to paved areas:
   1. Base Course: 1/4 inch.
   2. Surface Course: 1/8 inch.
   3. Crowned Surfaces: Test with crowned template centered and at right angle to crown. Maximum allowable variance from template is 1/4 inch.

3.10 PAVEMENT MARKING

A. Do not apply pavement-marking paint until layout, colors, and placement have been verified with Architect.

B. Allow paving to age for 30 days before starting pavement marking.

C. Sweep and clean surface to eliminate loose material and dust.

D. Apply paint with mechanical equipment to produce pavement markings, of dimensions indicated, with uniform, straight edges. Apply at manufacturer's recommended rates to provide a minimum wet film thickness of 15 mils.

E. Apply thermoplastic markings in accordance with KYDOH Section 717.

3.11 WHEEL STOPS

A. Securely attach wheel stops into pavement with not less than two galvanized steel dowels embedded at one-quarter to one-third points. Securely install dowels into pavement and bond to wheel stop. Recess head of dowel beneath top of wheel stop.

3.12 FIELD QUALITY CONTROL

A. Testing Agency: Owner will engage a qualified independent testing and inspecting agency to perform field tests and inspections and to prepare test reports.
   1. Testing agency will conduct and interpret tests and state in each report whether tested Work complies with or deviates from specified requirements.

B. Additional testing and inspecting, at Contractor's expense, will be performed to determine compliance of replaced or additional work with specified requirements.

C. Thickness: In-place compacted thickness of hot-mix asphalt courses will be determined according to ASTM D 3549.

D. Surface Smoothness: Finished surface of each hot-mix asphalt course will be tested for compliance with smoothness tolerances.

E. In-Place Density: Testing agency will take samples of uncompacted paving mixtures and compacted pavement according to ASTM D 979 or AASHTO T 168.
   1. Reference maximum theoretical density will be determined by averaging results from four samples of hot-mix asphalt-paving mixture delivered daily to site, prepared according to ASTM D 2041, and compacted according to job-mix specifications.
   2. In-place density of compacted pavement will be determined by testing core samples according to ASTM D 1188 or ASTM D 2726.
      a. One core sample will be taken for every 1000 sq. yd. or less of installed pavement, with no fewer than 3 cores taken.
      b. Field density of in-place compacted pavement may also be determined by nuclear method according to ASTM D 2950 and correlated with ASTM D 1188 or ASTM D 2726.

F. Remove and replace or install additional hot-mix asphalt where test results or measurements indicate that it does not comply with specified requirements.

3.13 DISPOSAL

A. Except for material indicated to be recycled, remove excavated materials from Project site and legally dispose of them in an EPA-approved landfill.
   1. Do not allow excavated materials to accumulate on-site.

END OF SECTION 32 1216

SECTION 32 1313 – CONCRETE PAVING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. This Section includes exterior cement concrete pavement for the following:

1. Service area pavements.
2. Curbs.
3. Walkways.

B. Related Sections include the following:

1. Division 03 Section "Cast-in-Place Concrete" for general building applications of concrete.
2. Division 31 Section "Earth Moving" for subgrade preparation, grading, and subbase course.
3. Division 32 Section "Concrete Paving Joint Sealants" for joint sealants of joints in concrete pavement and at isolation joints of concrete pavement with adjacent construction.

1.3 DEFINITIONS

A. Cementitious Materials: Portland cement alone or in combination with one or more of blended hydraulic cement, fly ash and other pozzolans, and ground granulated blast-furnace slag.

1.4 SUBMITTALS

A. Product Data: For each type of manufactured material and product indicated.

B. Design Mixtures: For each concrete pavement mixture. Include alternate mixture designs when characteristics of materials, Project conditions, weather, test results, or other circumstances warrant adjustments.

C. Qualification Data: For manufacturer and testing agency.

D. Material Test Reports: From a qualified testing agency indicating and interpreting test results for compliance of the following with requirements indicated, based on comprehensive testing of current materials:

E. Material Certificates: Signed by manufacturers certifying that each of the following materials complies with requirements:

1. Cementitious materials.
2. Steel reinforcement and reinforcement accessories.
3. Admixtures.
4. Curing compounds.
5. Applied finish materials.
6. Bonding agent or epoxy adhesive.
7. Joint fillers.

F. Field quality-control test reports.

G. Minutes of preinstallation conference.

1.5 QUALITY ASSURANCE

A. Manufacturer Qualifications: Manufacturer of ready-mixed concrete products who complies with ASTM C 94/C 94M requirements for production facilities and equipment.

1. Manufacturer certified according to NRMCA's "Certification of Ready Mixed Concrete Production Facilities."

B. ACI Publications: Comply with ACI 301, "Specification for Structural Concrete," unless modified by requirements in the Contract Documents.

C. Concrete Testing Service: Engage a qualified independent testing agency to perform material evaluation tests and to design concrete mixtures.

D. Mockups: Cast mockups of full-size sections of concrete pavement to demonstrate typical joints, surface finish, texture, color, and standard of workmanship.

1. Build mockups in the location and of the size indicated or, if not indicated, as directed by Architect.
2. Notify Architect seven days in advance of dates and times when mockups will be constructed.
3. Obtain Architect's approval of mockups before starting construction.
4. Maintain approved mockups during construction in an undisturbed condition as a standard for judging the completed pavement.
5. Demolish and remove approved mockups from the site when directed by Architect.
6. Approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

E. Preinstallation Conference: Conduct conference at Project site to comply with requirements in Division 01 Section "Project Management and Coordination."

1. Before submitting design mixtures, review concrete pavement mixture design and examine procedures for ensuring quality of concrete materials and concrete pavement construction practices. Require representatives, including the following, of each entity directly concerned with concrete pavement, to attend conference:

a. Contractor's superintendent.
b. Concrete pavement subcontractor.

1.6 PROJECT CONDITIONS

A. Traffic Control: Maintain access for vehicular and pedestrian traffic as required for other construction activities.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. In other Part 2 articles where titles below introduce lists, the following requirements apply to product selection:

1. Available Products: Subject to compliance with requirements, products that may be incorporated into the Work include, but are not limited to, products specified.
2. Available Manufacturers: Subject to compliance with requirements, manufacturers offering products that may be incorporated into the Work include, but are not limited to, manufacturers specified.

2.2 FORMS

A. Form Materials: Plywood, metal, metal-framed plywood, or other approved panel-type materials to provide full-depth, continuous, straight, smooth exposed surfaces.

1. Use flexible or curved forms for curves with a radius 100 feet or less.

B. Form-Release Agent: Commercially formulated form-release agent that will not bond with, stain, or adversely affect concrete surfaces and will not impair subsequent treatments of concrete surfaces.

2.3 STEEL REINFORCEMENT

A. Plain-Steel Welded Wire Reinforcement: ASTM A 185, fabricated from as-drawn steel wire into flat sheets.

B. Reinforcing Bars: ASTM A 615/A 615M, Grade 60; deformed.

C. Plain Steel Wire: ASTM A 82, galvanized.

D. Joint Dowel Bars: Plain steel bars, ASTM A 615/A 615M, Grade 60. Cut bars true to length with ends square and free of burrs.

E. Tie Bars: ASTM A 615/A 615M, Grade 60, deformed.

F. Hook Bolts: ASTM A 307, Grade A, internally and externally threaded. Design hook-bolt joint assembly to hold coupling against pavement form and in position during concreting operations, and to permit removal without damage to concrete or hook bolt.

G. Bar Supports: Bolsters, chairs, spacers, and other devices for spacing, supporting, and fastening reinforcing bars, welded wire reinforcement, and dowels in place. Manufacture bar supports according to CRSI's "Manual of Standard Practice" from steel wire, plastic, or precast concrete of greater compressive strength than concrete, and as follows:

1. Equip wire bar supports with sand plates or horizontal runners where base material will not support chair legs.

2.4 CONCRETE MATERIALS

A. Cementitious Material: Use the following cementitious materials, of the same type, brand, and source throughout the Project:

1. Portland Cement: ASTM C 150, Type I, gray. Supplement with the following:

a. Fly Ash: ASTM C 618, Class F.

B. Normal-Weight Aggregates: ASTM C 33, Class 4S coarse aggregate, uniformly graded. Provide aggregates from a single source with documented service record data of at least 10 years' satisfactory service in similar pavement applications and service conditions using similar aggregates and cementitious materials.

1. Maximum Coarse-Aggregate Size: 1-1/2 inches nominal.
2. Fine Aggregate: Free of materials with deleterious reactivity to alkali in cement.

C. Water: ASTM C 94/C 94M.

D. Air-Entraining Admixture: ASTM C 260.

E. Chemical Admixtures: Provide admixtures certified by manufacturer to be compatible with other admixtures and to contain not more than 0.1 percent water-soluble chloride ions by mass of cementitious material.

1. Water-Reducing Admixture: ASTM C 494/C 494M, Type A.
2. Retarding Admixture: ASTM C 494/C 494M, Type B.
3. Water-Reducing and Retarding Admixture: ASTM C 494/C 494M, Type D.
4. High-Range, Water-Reducing Admixture: ASTM C 494/C 494M, Type F.
5. High-Range, Water-Reducing and Retarding Admixture: ASTM C 494/C 494M, Type G.
6. Plasticizing and Retarding Admixture: ASTM C 1017/C 1017M, Type II.

2.5 CURING MATERIALS

A. Absorptive Cover: AASHTO M 182, Class 2, burlap cloth made from jute or kenaf, weighing approximately 9 oz./sq. yd. dry.

B. Moisture-Retaining Cover: ASTM C 171, polyethylene film or white burlap-polyethylene sheet.

C. Water: Potable.

D. Evaporation Retarder: Waterborne, monomolecular film forming; manufactured for application to fresh concrete.

1. Available Products:

a. Axim Concrete Technologies; Cimfilm.
b. Burke by Edeco; BurkeFilm.
c. ChemMasters; Spray-Film.
d. Conspec Marketing & Manufacturing Co., Inc.; Aquafilm.
e. Dayton Superior Corporation; Sure Film.
f. Euclid Chemical Company (The); Eucobar.
g. Kaufman Products, Inc.; Vapor Aid.
h. Lambert Corporation; Lambco Skin.
i. L&M Construction Chemicals, Inc.; E-Con.

2.6 RELATED MATERIALS

A. Expansion- and Isolation-Joint-Filler Strips: ASTM D 1751, asphalt-saturated cellulosic fiber or ASTM D 1752, cork or self-expanding cork.

1. If an asphaltic fiber joint filler is utilized, provide an acceptable polyethylene bond breaker tape where joint sealant is indicated.

B. Epoxy Bonding Adhesive: ASTM C 881, two-component epoxy resin, capable of humid curing and bonding to damp surfaces, of class suitable for application temperature and of grade to requirements, and as follows:

1. Types I and II, non-load bearing, for bonding hardened or freshly mixed concrete to hardened concrete.

C. Chemical Surface Retarder: Water-soluble, liquid-set retarder with color dye, for horizontal concrete surface application, capable of temporarily delaying final hardening of concrete to a depth of 1/8 to 1/4 inch.

1. Available Products:

a. Burke by Edeco; True Etch Surface Retarder.
b. ChemMasters; Exposee.
c. Conspec Marketing & Manufacturing Co., Inc.; Delay S.
d. Euclid Chemical Company (The); Surface Retarder S.
e. Kaufman Products, Inc.; Expose.
f. Metalcrete Industries; Surftard.

j. Vexcon Chemicals, Inc.; Certi-Vex Envioset.

2.7 CONCRETE MIXTURES

A. Prepare design mixtures, proportioned according to ACI 301, for each type and strength of normal-weight concrete determined by either laboratory trial mixes or field experience.

1. Use a qualified independent testing agency for preparing and reporting proposed concrete mixture designs for the trial batch method.

B. Proportion mixtures to provide normal-weight concrete with the following properties:

1. Compressive Strength (28 Days): 4500 psi.
2. Maximum Water-Cementitious Materials Ratio at Point of Placement: 0.45.
3. Slump Limit: 4 inches, plus or minus 1 inch.

C. Add air-entraining admixture at manufacturer's prescribed rate to result in normal-weight concrete at point of placement having an air content as follows:

1. Air Content: 6 1/2 percent plus or minus 1.5 percent for 1-1/2-inch nominal maximum aggregate size.

D. Limit water-soluble, chloride-ion content in hardened concrete to 0.15 percent by weight of cement.

E. Chemical Admixtures: Use admixtures according to manufacturer's written instructions.

1. Use high-range, high-range, water-reducing and retarding admixture in concrete, as required, for placement and workability.
2. Use water-reducing and retarding admixture when required by high temperatures, low humidity, or other adverse placement conditions.

F. Cementitious Materials: Limit percentage, by weight, of cementitious materials other than portland cement according to ACI 301 requirements for concrete exposed to deicing chemicals.

1. Fly Ash or Pozzolan: 15 percent.

2.8 CONCRETE MIXING

A. Ready-Mixed Concrete: Measure, batch, and mix concrete materials and concrete according to ASTM C 94/C 94M. Furnish batch certificates for each batch discharged and used in the Work.

1. When air temperature is between 85 deg F and 90 deg F, reduce mixing and delivery time from 1-1/2 hours to 75 minutes; when air temperature is above 90 deg F, reduce mixing and delivery time to 60 minutes.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine exposed subgrades and subbase surfaces for compliance with requirements for dimensional, grading, and elevation tolerances.

B. Proof-roll prepared subbase surface below concrete pavements with heavy pneumatic-tired equipment to identify soft pockets and areas of excess yielding.

1. Completely proof-roll subbase in one direction and repeat in perpendicular direction. Limit vehicle speed to 3 mph.
2. Proof-roll with a loaded 10-wheel tandem-axle dump truck weighing not less than 15 tons.
3. Subbase with soft spots and areas of pumping or rutting exceeding depth of 1/2 inch require correction according to requirements in Division 31 Section "Earth Moving."

C. Proceed with concrete pavement operations only after nonconforming conditions have been corrected and subgrade is ready to receive pavement.

3.2 PREPARATION

A. Remove loose material from compacted subbase surface immediately before placing concrete.

3.3 EDGE FORMS AND SCREED CONSTRUCTION

A. Set, brace, and secure edge forms, bulkheads, and intermediate screed guides for pavement to required lines, grades, and elevations. Install forms to allow continuous progress of work and so forms can remain in place at least 24 hours after concrete placement.

B. Clean forms after each use and coat with form-release agent to ensure separation from concrete without damage.

3.4 STEEL REINFORCEMENT

A. General: Comply with CRSI's "Manual of Standard Practice" for fabricating, placing, and supporting reinforcement.

B. Clean reinforcement of loose rust and mill scale, earth, ice, or other bond-reducing materials.

C. Arrange, space, and securely tie bars and bar supports to hold reinforcement in position during concrete placement. Maintain minimum cover to reinforcement.

D. Install welded wire reinforcement in lengths as long as practicable. Lap adjoining pieces at least one full mesh, and lace splices with wire. Offset laps of adjoining widths to prevent continuous laps in either direction.

E. Install fabricated bar mats in lengths as long as practicable. Handle units to keep them flat and free of distortions. Straighten bends, kinks, and other irregularities, or replace units as required before placement. Set mats for a minimum 2-inch overlap of adjacent mats.

3.5 JOINTS

A. General: Form construction, isolation, and contraction joints and tool edgings true to line with faces perpendicular to surface plane of concrete. Construct transverse joints at right angles to centerline, unless otherwise indicated.

1. When joining existing pavement, place transverse joints to align with previously placed joints, unless otherwise indicated.

B. Construction Joints: Set construction joints at side and end terminations of pavement and at locations where pavement operations are stopped for more than one-half hour unless pavement terminates at isolation joints.

1. Continue steel reinforcement across construction joints, unless otherwise indicated. Do not continue reinforcement through sides of pavement strips, unless otherwise indicated.
2. Provide tie bars at sides of pavement strips where indicated.
3. Butt Joints: Use epoxy bonding adhesive at joint locations where fresh concrete is placed against hardened or partially hardened concrete surfaces.

4. Keyed Joints: Provide preformed keyway-section forms or bulkhead forms with keys, unless otherwise indicated. Embed keys at least 1-1/2 inches into concrete.
5. Doweled Joints: Install dowel bars and support assemblies at joints where indicated. Lubricate or asphalt-coat one-half of dowel length to prevent concrete bonding to one side of joint.

C. Isolation Joints: Form isolation joints of preformed joint-filler strips abutting concrete curbs, catch basins, manholes, inlets, structures, walks, other fixed objects, and where indicated.

1. Locate expansion joints at intervals of 50 feet, unless otherwise indicated.
2. Extend joint fillers full width and depth of joint.
3. Terminate joint filler not less than 1/2 inch or more than 1 inch below finished surface if joint sealant is indicated.
4. Place top of joint filler flush with finished concrete surface if joint sealant is not indicated.
5. Furnish joint fillers in one-piece lengths. Where more than one length is required, lace or clip joint-filler sections together.
6. Protect top edge of joint filler during concrete placement with metal, plastic, or other temporary preformed cap. Remove protective cap after concrete has been placed on both sides of joint.

D. Contraction Joints: Form weakened-plane contraction joints, sectioning concrete into areas as indicated. Construct contraction joints for a depth equal to at least one-fourth of the concrete thickness, as follows to match jointing of existing adjacent concrete pavement:

1. Grooved Joints: Form contraction joints after initial floating by grooving and finishing each edge of joint with grooving tool to a 1/4-inch radius. Repeat grooving of contraction joints after applying surface finishes. Eliminate groover marks on concrete surfaces.
2. Sawed Joints: Form contraction joints with power saws equipped with shatterproof abrasive or diamond-rimmed blades. Cut 1/8-inch- wide joints into concrete when cutting action will not tear, abrade, or otherwise damage surface and before developing random contraction cracks.
3. Doweled Contraction Joints: Install dowel bars and support assemblies at joints where indicated. Lubricate or asphalt coat one-half of dowel length to prevent concrete bonding to one side of joint.

E. Edging: Tool edges of pavement, gutters, curbs, and joints in concrete after initial floating with an edging tool to a 1/4-inch radius. Repeat tooling of edges after applying surface finishes. Eliminate tool marks on concrete surfaces.

3.6 CONCRETE PLACEMENT

A. Inspection: Before placing concrete, inspect and complete formwork installation, steel reinforcement, and items to be embedded or cast in. Notify other trades to permit installation of their work.

B. Remove snow, ice, or frost from subbase surface and reinforcement before placing concrete. Do not place concrete on frozen surfaces.

C. Moisten subbase to provide a uniform dampened condition at time concrete is placed. Do not place concrete around manholes or other structures until they are at required finish elevation and alignment.

D. Comply with ACI 301 requirements for measuring, mixing, transporting, and placing concrete.

E. Do not add water to concrete during delivery or at Project site.

F. Do not add water to fresh concrete after testing.

G. Deposit and spread concrete in a continuous operation between transverse joints. Do not push or drag concrete into place or use vibrators to move concrete into place.

H. Consolidate concrete according to ACI 301 by mechanical vibrating equipment supplemented by hand spading, rodding, or tamping.

1. Consolidate concrete along face of forms and adjacent to transverse joints with an internal vibrator. Keep vibrator away from joint assemblies, reinforcement, or side forms. Use only square-faced shovels for hand spreading and consolidation. Consolidate with care to prevent dislocating reinforcement, dowels, and joint devices.

I. Place concrete in two operations; strike off initial pour for entire width of placement and to the required depth below finish surface. Lay welded wire fabric or fabricated bar mats immediately in final position. Place top layer of concrete, strike off, and screed.

1. Remove and replace concrete that has been placed for more than 15 minutes without being covered by top layer, or use bonding agent if approved by Architect.

J. Screed pavement surfaces with a straightedge and strike off.

K. Commence initial floating using bull floats or darbies to impart an open textured and uniform surface plane before excess moisture or bleed water appears on the surface. Do not further disturb concrete surfaces before beginning finishing operations or spreading surface treatments.

L. Cold-Weather Placement: Comply with ACI 306.1 and as follows. Protect concrete work from physical damage or reduced strength that could be caused by frost, freezing actions, or low temperatures.

1. When air temperature has fallen to or is expected to fall below 40 deg F, uniformly heat water and aggregates before mixing to obtain a concrete mixture temperature of not less than 50 deg F and not more than 80 deg F at point of placement.
2. Do not use frozen materials or materials containing ice or snow.
3. Do not use calcium chloride, salt, or other materials containing antifreeze agents or chemical accelerators unless otherwise specified and approved in mix designs.

M. Hot-Weather Placement: Comply with ACI 301 and as follows when hot-weather conditions exist:

1. Cool ingredients before mixing to maintain concrete temperature below 90 deg F at time of placement. Chilled mixing water or chopped ice may be used to control temperature,

provided water equivalent of ice is calculated to total amount of mixing water. Using liquid nitrogen to cool concrete is Contractor's option.

2. Cover steel reinforcement with water-soaked burlap so steel temperature will not exceed ambient air temperature immediately before embedding in concrete.
3. Fog-spray forms, steel reinforcement, and subgrade just before placing concrete. Keep subgrade moisture uniform without standing water, soft spots, or dry areas.

3.7 FLOAT FINISHING

A. General: Do not add water to concrete surfaces during finishing operations.

B. Float Finish: Begin the second floating operation when bleed-water sheen has disappeared and concrete surface has stiffened sufficiently to permit operations. Float surface with power-driven floats, or by hand floating if area is small or inaccessible to power units. Finish surfaces to true planes. Cut down high spots and fill low spots. Refloat surface immediately to uniform granular texture.

1. Medium-to-Fine-Textured Broom Finish: Draw a soft bristle broom across float-finished concrete surface perpendicular to line of traffic to provide a uniform, fine-line texture.
2. Medium-to-Coarse-Textured Broom Finish: Provide a coarse finish by striating float-finished concrete surface 1/16 to 1/8 inch deep with a stiff-bristled broom, perpendicular to line of traffic.

3.8 CONCRETE PROTECTION AND CURING

A. General: Protect freshly placed concrete from premature drying and excessive cold or hot temperatures.

B. Comply with ACI 306.1 for cold-weather protection.

C. Evaporation Retarder: Apply evaporation retarder to concrete surfaces if hot, dry, or windy conditions cause moisture loss approaching 0.2 lb/sq. ft. x h before and during finishing operations. Apply according to manufacturer's written instructions after placing, screeding, and bull floating or darbying concrete, but before float finishing.

D. Begin curing after finishing concrete but not before free water has disappeared from concrete surface.

E. Curing Methods: Cure concrete by moisture curing, moisture-retaining-cover curing, curing compound, or a combination of these as follows:

1. Moist Curing: Keep surfaces continuously moist for not less than seven days with the following materials:

a. Water.
b. Continuous water-fog spray.
c. Absorptive cover, water saturated and kept continuously wet. Cover concrete surfaces and edges with 12-inch lap over adjacent absorptive covers.

2. Moisture-Retaining-Cover Curing: Cover concrete surfaces with moisture-retaining cover for curing concrete, placed in widest practicable width, with sides and ends lapped at least 12 inches, and sealed by waterproof tape or adhesive. Immediately repair any holes or tears during curing period using cover material and waterproof tape.
3. Curing Compound: Apply uniformly in continuous operation by power spray or roller according to manufacturer's written instructions. Recoat areas subjected to heavy rainfall within three hours after initial application. Maintain continuity of coating and repair damage during curing period.

3.9 PAVEMENT TOLERANCES

A. Comply with tolerances of ACI 117 and as follows:

1. Elevation: 1/4 inch.
2. Thickness: Plus 3/8 inch, minus 1/4 inch.
3. Surface: Gap below 10-foot- long, unleveled straightedge not to exceed 1/4 inch.
4. Lateral Alignment and Spacing of Tie Bars and Dowels: 1 inch.
5. Vertical Alignment of Tie Bars and Dowels: 1/4 inch.
6. Alignment of Tie-Bar End Relative to Line Perpendicular to Pavement Edge: 1/2 inch.
7. Alignment of Dowel-Bar End Relative to Line Perpendicular to Pavement Edge: Length of dowel 1/4 inch per 12 inches.
8. Joint Spacing: 3 inches.
9. Contraction Joint Depth: Plus 1/4 inch, no minus.
10. Joint Width: Plus 1/8 inch, no minus.

3.10 REPAIRS AND PROTECTION

A. Remove and replace concrete pavement that is broken, damaged, or defective or that does not comply with requirements in this Section.

B. Drill test cores, where directed by Architect, when necessary to determine magnitude of cracks or defective areas. Fill drilled core holes in satisfactory pavement areas with portland cement concrete bonded to pavement with epoxy adhesive.

C. Protect concrete from damage. Exclude traffic from pavement for at least 14 days after placement. When construction traffic is permitted, maintain pavement as clean as possible by removing surface stains and spillage of materials as they occur.

D. Maintain concrete pavement free of stains, discoloration, dirt, and other foreign material. Sweep concrete pavement not more than two days before date scheduled for Substantial Completion inspections.

END OF SECTION 321313

SECTION 321373 – CONCRETE PAVING JOINT SEALANTS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General, Supplementary and Special Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. This Section includes the following:

1. Expansion and contraction joints within cement concrete pavement.

B. Related Sections include the following:

1. Division 07 Section "Joint Sealants" for sealing nontraffic and traffic joints in locations not specified in this Section.
2. Division 32 Section "Concrete Paving" for constructing joints in concrete pavement.

1.3 SUBMITTALS

A. Product Data: For each joint-sealant product indicated.

B. Samples for Verification: For each type and color of joint sealant required. Install joint-sealant samples in 1/2-inch- wide joints formed between two 6-inch- long strips of material matching the appearance of exposed surfaces adjacent to joint sealants.

C. Product Certificates: For each type of joint sealant and accessory, signed by product manufacturer.

D. Qualification Data: For Installer.

E. Compatibility and Adhesion Test Reports: From sealant manufacturer, indicating the following:

1. Materials forming joint substrates and joint-sealant backings have been tested for compatibility and adhesion with joint sealants.
2. Interpretation of test results and written recommendations for primers and substrate preparation needed for adhesion.

F. Product Test Reports: Based on evaluation of comprehensive tests performed by a qualified testing agency, for sealants.

1.4 QUALITY ASSURANCE

A. Installer Qualifications: An employer of workers trained and approved by manufacturer.

B. Source Limitations: Obtain each type of joint sealant through one source from a single manufacturer.

C. Product Testing: Obtain test results for "Product Test Reports" Paragraph in "Submittals" Article from a qualified testing agency based on testing of current sealant products within a 36-month period preceding the Notice to Proceed with the Work.

1. Testing Agency Qualifications: An independent testing agency qualified according to ASTM C 1021 for testing indicated, as documented according to ASTM E 548.

1.5 DELIVERY, STORAGE, AND HANDLING

A. Deliver materials to Project site in original unopened containers or bundles with labels indicating manufacturer, product name and designation, color, expiration date, pot life, curing time, and mixing instructions for multicomponent materials.

B. Store and handle materials to comply with manufacturer's written instructions to prevent their deterioration or damage due to moisture, high or low temperatures, contaminants, or other causes.

1.6 PROJECT CONDITIONS

A. Do not proceed with installation of joint sealants under the following conditions:

1. When ambient and substrate temperature conditions are outside limits permitted by joint-sealant manufacturer.
2. When ambient and substrate temperature conditions are outside limits permitted by joint-sealant manufacturer or are below 40 deg F.
3. When joint substrates are wet or covered with frost.
4. Where joint widths are less than those allowed by joint-sealant manufacturer for applications indicated.
5. Where contaminants capable of interfering with adhesion have not yet been removed from joint substrates.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Available Products: Subject to compliance with requirements, products that may be incorporated into the Work include, but are not limited to, products listed in other Part 2 articles.

2.2 MATERIALS, GENERAL

A. Compatibility: Provide joint sealants, backing materials, and other related materials that are compatible with one another and with joint substrates under conditions of service and application, as demonstrated by joint-sealant manufacturer based on testing and field experience.

B. Colors of Exposed Joint Sealants: As selected by Architect from manufacturer's full range.

2.3 COLD-APPLIED JOINT SEALANTS

A. Multicomponent Jet-Fuel-Resistant Sealant for Concrete: Pourable, chemically curing elastomeric formulation complying with the following requirements for formulation and with ASTM C 920 for type, grade, class, and uses indicated:

1. Urethane Formulation: Type M; Grade P; Class 12-1/2; Uses T, M, and, as applicable to joint substrates indicated, O.

a. Available Products:

1) Pecora Corporation; Urexpan, Dynatred.
2) Sonneborn, Div. of ChemRex, Inc.; Sonolastic SL 2.

B. Single-Component Jet-Fuel-Resistant Urethane Sealant for Concrete: Single-component, pourable, coal-tar-modified, urethane formulation complying with ASTM C 920 for Type S; Grade P; Class 25; Uses T, M, and, as applicable to joint substrates indicated, O.

1. Available Products:

a. Sonneborn, Div. of ChemRex, Inc.; Sonolastic SL 1.
b. Tremco Sealant/Waterproofing Division; Vulkem 45SSL.

2.4 JOINT-SEALANT BACKER MATERIALS

A. General: Provide joint-sealant backer materials that are nonstaining; are compatible with joint substrates, sealants, primers, and other joint fillers; and are approved for applications indicated by joint-sealant manufacturer based on field experience and laboratory testing.

B. Round Backer Rods for Cold- and Hot-Applied Sealants: ASTM D 5249, Type 1, of diameter and density required to control sealant depth and prevent bottom-side adhesion of sealant.

C. Backer Strips for Cold- and Hot-Applied Sealants: ASTM D 5249; Type 2; of thickness and width required to control sealant depth, prevent bottom-side adhesion of sealant, and fill remainder of joint opening under sealant.

D. Round Backer Rods for Cold-Applied Sealants: ASTM D 5249, Type 3, of diameter and density required to control sealant depth and prevent bottom-side adhesion of sealant.

2.5 PRIMERS

A. Primers: Product recommended by joint-sealant manufacturer where required for adhesion of sealant to joint substrates indicated, as determined from preconstruction joint-sealant-substrate tests and field tests.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine joints indicated to receive joint sealants, with Installer present, for compliance with requirements for joint configuration, installation tolerances, and other conditions affecting joint-sealant performance.

1. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Surface Cleaning of Joints: Clean out joints immediately before installing joint sealants to comply with joint-sealant manufacturer's written instructions.

B. Joint Priming: Prime joint substrates where indicated or where recommended in writing by joint-sealant manufacturer, based on preconstruction joint-sealant-substrate tests or prior experience. Apply primer to comply with joint-sealant manufacturer's written instructions. Confine primers to areas of joint-sealant bond; do not allow spillage or migration onto adjoining surfaces.

3.3 INSTALLATION OF JOINT SEALANTS

A. General: Comply with joint-sealant manufacturer's written installation instructions for products and applications indicated, unless more stringent requirements apply.

B. Sealant Installation Standard: Comply with recommendations in ASTM C 1193 for use of joint sealants as applicable to materials, applications, and conditions indicated.

C. Install backer materials of type indicated to support sealants during application and at position required to produce cross-sectional shapes and depths of installed sealants relative to joint widths that allow optimum sealant movement capability.

1. Do not leave gaps between ends of backer materials.
2. Do not stretch, twist, puncture, or tear backer materials.
3. Remove absorbent backer materials that have become wet before sealant application and replace them with dry materials.

D. Install sealants using proven techniques that comply with the following and at the same time backings are installed:

1. Place sealants so they directly contact and fully wet joint substrates.

2. Completely fill recesses provided for each joint configuration.
3. Produce uniform, cross-sectional shapes and depths relative to joint widths that allow optimum sealant movement capability.

E. Tooling of Nonsag Sealants: Immediately after sealant application and before skinning or curing begins, tool sealants according to requirements specified below to form smooth, uniform beads of configuration indicated; to eliminate air pockets; and to ensure contact and adhesion of sealant with sides of joint.

1. Remove excess sealants from surfaces adjacent to joint.
2. Use tooling agents that are approved in writing by joint-sealant manufacturer and that do not discolor sealants or adjacent surfaces.

F. Provide joint configuration to comply with joint-sealant manufacturer's written instructions, unless otherwise indicated.

G. Provide recessed joint configuration for silicone sealants of recess depth and at locations indicated.

3.4 CLEANING

A. Clean off excess sealants or sealant smears adjacent to joints as the Work progresses by methods and with cleaning materials approved by manufacturers of joint sealants and of products in which joints occur.

3.5 PROTECTION

A. Protect joint sealants during and after curing period from contact with contaminating substances and from damage resulting from construction operations or other causes so sealants are without deterioration or damage at time of Substantial Completion. If, despite such protection, damage or deterioration occurs, cut out and remove damaged or deteriorated joint sealants immediately and replace with joint sealant so installations with repaired areas are indistinguishable from the original work.

END OF SECTION 321373

SECTION 321443 - POROUS UNIT PAVING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Special Conditions and Division 1 Specification Sections, apply to this Section.

1.2 SUMMARY

A. This Section includes the following:

1. Porous paving consisting of concrete pavers set in aggregate setting beds.

B. Related Sections include the following:

1. Division 31 Section "Earth Moving" for excavation and compacted subgrade.
2. Division 32 Section "Concrete Pavement" for cast-in-place concrete curbs that serve as edge restraints for porous paving.

1.3 SUBMITTALS

A. Product Data: For materials other than aggregates.

B. Product Data: For the following:

1. Pavers.
2. Geotextiles.

C. Sieve Analyses: For aggregate materials, according to ASTM C 136.

D. Samples for Initial Selection:

1. Each type of unit paver indicated.
2. Aggregate fill.

E. Material Certificates: For unit pavers. Include statements of material properties indicating compliance with requirements, including compliance with standards. Provide for each type and size of unit.

F. Product Test Reports: Based on evaluation of comprehensive tests performed by a qualified testing agency, for unit pavers, indicating compliance with requirements.

1. For solid interlocking paving units, include test data for freezing and thawing according to ASTM C 67.

1.4 QUALITY ASSURANCE

A. Source Limitations: Obtain each type of porous paver from one source that has resources to provide materials and products of consistent quality in appearance and physical properties.

B. Mockups: Build mockups to verify selections made under sample submittals and to demonstrate aesthetic effects and set quality standards for materials and execution.

1. Approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.5 DELIVERY, STORAGE, AND HANDLING

A. Store pavers on elevated platforms in a dry location. If units are not stored in an enclosed location, cover tops and sides of stacks with waterproof sheeting, securely tied.

B. Store aggregates where grading and other required characteristics can be maintained and contamination can be avoided.

PART 2 - PRODUCTS

2.1 CONCRETE UNIT PAVERS

A. Solid Concrete Pavers for Porous Paving: Solid interlocking paving units of shapes that provide openings between units, complying with ASTM C 936, resistant to freezing and thawing when tested according to ASTM C 67, and made from normal-weight aggregates.

1. Basis-of-Design Product: Subject to compliance with requirements, provide “Hydra-bric” manufactured by Paverlock Corporation or one of the following products:
   a. Nitterhouse ‘Aquapave’
   b. Unilock ‘Eco Prioria’
2. Thickness: 3.125 inches.
3. Face Size and Shape: 3.88 inches x 8 inches.
4. Color: As selected by Architect from manufacturer's full range.
5. Unit pavers / porous unit paving system must comply with ADA / ADAAG requirements and tolerances for accessible pavements.
6. Herringbone pattern as indicated on drawings, with soldier edge course continuous around pavers.

2.2 AGGREGATE SETTING-BED MATERIALS

A. Graded Aggregate for Base Course: Requirements in Division 2 Section "Earthwork" for base material. Base material shall be roof top stone, which shall be #57’s as provided as part of roofing / Alternate No. 1 scope.

B. Graded Aggregate for Leveling Course: Sound crushed stone or gravel complying with ASTM D 448 for Size No. 10.

C. Graded Aggregate for Porous Paver Fill: Sound crushed stone or gravel complying with ASTM D 448 for Size No. 11.

D. Drainage Geotextile: Nonwoven needle-punched geotextile, manufactured for subsurface drainage applications, made from polyolefins or polyesters; with elongation greater than 50 percent; complying with AASHTO M 288 and the following, measured per test methods referenced:

1. Survivability: Class 2; AASHTO M 288.
2. Apparent Opening Size: No. 40 sieve, maximum; ASTM D 4751.
3. Permittivity: 0.5 per second, minimum; ASTM D 4491.
4. UV Stability: 50 percent after 500 hours' exposure; ASTM D 4355.

PART 3 - EXECUTION

3.1 PREPARATION

A. Proof-roll prepared subgrade according to requirements in Division 2 Section "Earthwork" to identify soft pockets and areas of excess yielding. Proceed with porous paver installation only after deficient subgrades have been corrected and are ready to receive base course for porous paving.

3.2 INSTALLATION, GENERAL

A. Do not use unit pavers with chips, cracks, voids, discolorations, and other defects that might be structurally unsound or visible in finished work.

B. Cut unit pavers with motor-driven masonry saw equipment to provide clean, sharp, unchipped edges. Cut units to provide pattern indicated and to fit adjoining work neatly. Use full units without cutting where possible. Hammer cutting is not acceptable.

C. Tolerances:

1. Variation in Plane between Adjacent Units (Lipping): Do not exceed 1/16-inch unit-to-unit offset from flush.
2. Variation from Level or Indicated Slope: Do not exceed 1/8 inch in 24 inches and 1/4 inch in 10 feet or a maximum of 1/2 inch.

D. Verify that curbs provided under Division 2 Section “Cement Concrete Paving” are in-place before placing unit pavers.

3.3 SETTING-BED INSTALLATION

A. Place drainage geotextile over compacted base course, overlapping ends and edges at least 12 inches.

B. Place leveling course and screed to a thickness of 1 to 1-1/2 inches, taking care that moisture content remains constant and density is loose and constant until pavers are set and compacted.

3.4 PAVER INSTALLATION

A. Set unit pavers on leveling course, being careful not to disturb leveling base. If pavers have lugs or spacer bars to control spacing, place pavers hand tight against lugs or spacer bars. If pavers do not have lugs or spacer bars, place pavers with a 1/16-inch- minimum and 1/8-inch-maximum joint width. Use string lines to keep straight lines. Fill gaps between units that exceed 3/8 inch with pieces cut to fit from full-size pavers.

1. When installation is performed with mechanical equipment, use only unit pavers with lugs or spacer bars on sides of each unit.

B. Compact pavers into leveling course with a low-amplitude plate vibrator capable of a 3500- to 5000-lbf compaction force at 80 to 90 Hz. Use vibrator with neoprene mat on face of plate or other means as needed to prevent cracking and chipping of pavers. Perform at least three passes across paving with vibrator.

1. Compact pavers when there is sufficient surface to accommodate operation of vibrator, leaving at least 36 inches of uncompacted pavers adjacent to temporary edges.
2. Before ending each day's work, compact installed concrete pavers except for 36-inch width of uncompacted pavers adjacent to temporary edges (laying faces).
3. As work progresses to perimeter of installation, compact installed pavers that are adjacent to permanent edges unless they are within 36 inches of laying face.
4. Before ending each day's work and when rain interrupts work, cover pavers that have not been compacted and leveling course on which pavers have not been placed with nonstaining plastic sheets to protect them from rain.

C. Place graded aggregate fill immediately after vibrating pavers into leveling course. Spread and screed aggregate fill level with tops of pavers.

1. Before ending each day's work, place aggregate fill in installed porous paving except for 42-inch width of unfilled paving adjacent to temporary edges (laying faces).
2. As work progresses to perimeter of installation, place aggregate fill in installed paving that is adjacent to permanent edges unless it is within 42 inches of laying face.
3. Before ending each day's work and when rain interrupts work, cover paving that has not been filled with nonstaining plastic sheets to protect it from rain.

D. Remove and replace pavers that are loose, chipped, broken, stained, or otherwise damaged or that do not match adjoining units. Provide new units to match adjoining units and install in same manner as original units, with same joint treatment and with no evidence of replacement.

END OF SECTION 321443

SECTION 323113 - CHAIN LINK FENCING AND GATES

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Special Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. This Section includes the following:

1. Chain-Link Fences: Light Industrial.

2. Chain-Link Gates: Light Industrial

3. Gate Operators: Light Industrial, compatible with the Using Agency's security system as specified elsewhere in the Contract Documents. Refer to Site Electrical Plans and Specifications for additional requirements.

B. Related Sections include the following:

1. Division 03 Section "Cast-in-Place Concrete" for concrete post concrete fill.
2. Division 31 Section "Earth Moving" for site excavation, fill, and backfill where chain-link fences and gates are located.

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at project site.
1. Review sequence of installation of fencing and gates and project coordination and requirements.

1.4 PERFORMANCE REQUIREMENTS

A. Structural Performance: Provide chain-link fences and gates capable of withstanding the effects of gravity loads and the following loads and stresses within limits and under conditions indicated:

1. Minimum Post Size and Maximum Spacing for Wind Velocity Pressure: Determine based on mesh size and pattern specified, and on the following minimum design wind pressures and according to CLFMI WLG 2445:

a. Wind Speed: 80 mph.
b. Fence Height: 10 feet.
c. Line Post Group: IA, ASTM F 1043, SS 40 steel pipe.
d. Wind Exposure Category: B.

2. Determine minimum post size, group, and section according to ASTM F 1043 for framework up to 12 feet high, and post spacing not to exceed 10 feet.

1.5 SUBMITTALS

A. Product Data: Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for chain-link fences and gates.

1. Fence and gate posts, rails, and fittings.
2. Chain-link fabric, reinforcements, and attachments.

B. Shop Drawings: Show locations of fences, gates, posts, rails, tension wires, details of extended posts, extension arms, gate swing, or other operation, hardware, and accessories. Indicate materials, dimensions, sizes, weights, and finishes of components. Include plans, gate elevations, sections, details of post anchorage, attachment, bracing, and other required installation and operational clearances.
1. Delegated-Design Submittal: For structural performance of chain-link fence and gate frameworks, including analysis data signed and sealed by the qualified professional engineer responsible for their preparation.

C. Samples for Verification: For each type of chain-link fence and gate indicated.
1. Galvanized steel wire (for fabric) in 6-inch lengths

D. Product Certificates: For each type of chain-link fence, and gate, signed by product manufacturer.

1. Strength test results for framing according to ASTM F 1043.

E. Qualification Data: For Installer.

F. Field quality-control test reports.

G. Sample Warranty: For special warranty.

H. Close-out submittal of Operation and Maintenance Data: For the following to include in maintenance manuals:
1. Galvanized finishes
2. Gates
3. Gate operators

1.6 QUALITY ASSURANCE

A. Installer Qualifications: An experienced installer who has completed chain-link fences and gates similar in material, design, and extent to those indicated for this Project and whose work

has resulted in construction with a record of successful in-service performance, minimum of five years of experience installing similar projects in accordance with ASTM F567.

1. Engineering Responsibility: Preparation of data for chain-link fences and gates, including Shop Drawings, based on testing and engineering analysis of manufacturer's standard units in assemblies similar to those indicated for this Project.

B. Single Source: To ensure system integrity obtain the chain link system, framework, fabric, fittings, gates and accessories from a single source.

1.7 PROJECT CONDITIONS

A. Field Measurements: Verify layout information for chain-link fences and gates shown on Drawings in relation to property survey and existing structures. Verify dimensions by field measurements.

1.8 WARRANTY

A. Special Warranty: Installer agrees to repair or replace components of chain-link fences and gates that fail in materials or workmanship within specified warranty period.

1. Failures include, but are not limited to, the following:

a. Failure to comply with performance requirements.
b. Deterioration of metals, metal finishes, and other materials beyond normal weathering.

2. Warranty Period: Five years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Structural Performance: Chain-link fence and gate frameworks shall withstand the design wind loads and stresses for fence height(s) and under exposure conditions indicated according to Kentucky Building Code and in compliance with local requirements.

1. Design Wind Speed: 80mph.

a. Minimum Post Size: Refer to Drawings
b. Minimum Post Size and Maximum Spacing: Refer to Drawings

B. Lightning Protection System: Maximum resistance-to-ground value of 25 ohms at each grounding location along fence under normal dry conditions.

2.2 MANUFACTURERS

A. Basis of Design: Basis of design product is Master Halco Galvanized Chain Link Fabric on Galvanized Framework and galvanized fabric and framework. Subject to compliance with requirements, manufacturers offering equivalent products that may be incorporated into the Work include but are not limited to the following:

1. Chain-Link Fences and Gates:

   a. Allied Tube & Conduit
   b. AMESCO Incorporated
   c. Boundary Fence Systems
   d. FRP Systems, Inc.
   e. Merchants Metals
   f. Hoover Fence Company
   g. Rio Grande Fence Company

2.3 CHAIN-LINK FENCE FABRIC

A. General: Height indicated on Drawings. Provide fabric in one-piece heights measured between top and bottom of outer edge of selvage knuckle. Comply with ASTM A 392, CLFMI CLF 2445, and requirements indicated below:

1. Steel Wire Fabric: Galvanized or Polymer-coated wire with a diameter of 0.148 inch. Refer to Drawings for type.

   a. Mesh Size: 2 inches.
   b. Weight of Metallic (Zinc) Coating: ASTM A 392, Type II, Class 2, 2.0 oz./sq. ft. with zinc coating applied after weaving.

   c. Coat selvage ends of fabric that is metallic coated before the weaving process with manufacturer's standard clear protective coating.

2. Selvage: knuckled top and knuckled bottom.

2.4 LIGHT INDUSTRIAL FENCE FRAMEWORK

A. Posts and Rails: Comply with ASTM F 1043 for framing, ASTM F 1083 for Group IC round pipe, and the following:

1. Group: IA, round steel pipe, SS 40.
2. Fence Height: 8 feet.
3. Strength Requirement: Light Industrial according to ASTM F 1043.
4. Post Diameter and Thickness: According to ASTM F 1043.

   a. Rail, line post, end, corner and pull posts as indicated on Drawings and per Manufacturer recommendations for conditions noted.

5. Coating for Steel Framing:

a. Galvanized zinc coating.

B. TENSION WIRE
1. General: Provide horizontal tension wire at the following locations:

2. Location: Where indicated on Drawings
3. Metallic-Coated Steel Wire: 0.177-inch- diameter, marcelled tension wire complying with ASTM A 817, ASTM A 824, and the following:

4. Metallic Coating: Type II, zinc coated (galvanized) by electrolytic process, with the following minimum coating weight:
a. Matching chain-link fabric coating weight.

C. Horizontal Framework Members: top rails according to ASTM F1043.
1. Top Rail: Refer to Drawings
2. Finish: Match Fence Framing and Fabric

3. Brace Rails: ASTM F1043.

2.5 CHAIN LINK SLIDE GATES

A. General: Slide gate dimensions and materials as indicated on plans.

B. Cantilever gate frames consist of minimum 2-1/2" O.D. horizontal rails, 2" O.D. vertical bracing, and 1-5/8" diagonal bracing; all are welded and galvanized for the longest lasting gate. Chain link is 9ga. 2" mesh (1.2 oz. zinc galvanized after weaving). Gates are fully stretched, including counterbalance as indicated on the Drawings.

C. The slide gate counterbalance should be approximately 1/2 the length of the gate opening. Minimum counter balance should be 4' long.

D. 4" O.D. steel posts up to 20' and 6-5/8" O.D. steel posts up to 32'. These specifications are for 6' high gates and shorter. For taller gates increase post sizes at each step.

E. Concrete footers shall be18" diameter x 42" deep for 3-4" posts, 24" diameter x 42" for 6-5/8" O.D. posts and 30" diameter x 48" for 8-5/8" O.D. posts. Increase bottom diameters 6"; creating a bell-shaped hole. The up and down stress with these type gates will 'work' even the largest posts out of the ground. Poor soil conditions, such as sand, will require larger footers. Always consult local building codes or practices prior to beginning any construction project. Call 811 prior to excavating post hole footers.

F. Finishes: To match specified fence finish.

G. Provide loop detection on the inside pavement / exiting side of the gate only. Use Manufacturer’s standard loop detection system for the gate type specified, to coordinate with the gate operator.

2.6 GATE OPERATORS

A. General: Provide factory-assembled automatic operating system designed for gate size, type, weight, and operation frequency. Provide operation control system with characteristics suitable for Project conditions, with remote-control stations, safety devices, and weatherproof enclosures; coordinate electrical requirements with building electrical system.
   1. Provide operator designed so motor may be removed without disturbing limit-switch adjustment and without affecting auxiliary emergency operator.
   2. Provide operator with UL -approved components.
   3. Provide electronic components with built-in troubleshooting diagnostic feature.
   4. Provide unit designed and wired for both right-hand/left-hand opening, permitting universal installation.
   5. Provide controllers, electrical devices, and wiring.
   6. Controller shall be capable of / integrated into building security and hardware system as specified in other areas of these Contact Documents.
   7. 110V AC, 1 HP operator suitable for size and specifications of sliding gate as indicated in Documents.

B. Motors: Comply with NEMA designation, temperature rating, service factor, enclosure type, and efficiency requirements for motors specified in Section 11005 "Common Motor Requirements for Equipment."
   1. Motor Sizes: Minimum size as indicated. If not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.

C. Gate Operators: Gate mounted and as follows:
   1. Mechanical Slide Gate Operators:
      a. Duty: Heavy duty, commercial/industrial.
      b. Gate Speed: Minimum 45 feet per minute.
      c. Frequency of Use: Continuous duty.
      d. Operating Type: Crank arm, Wheel, and rail drive Roller chain, with manual release.
      e. Drive Type: Enclosed worm gear and chain-and-sprocket reducers, roller-chain drive.

D. Remote Controls: Electric controls separated from gate and motor and drive mechanism, with NEMA ICS 6, Type 1, NEMA ICS 6, Type 4 enclosure for pedestal mounting, and with space for additional optional equipment. Provide the following remote-control device(s):
   1. Control Station: Momentary-contact, single three-button-operated with open, stop, and close function; located remotely from gate. Key switch to lock out open and close buttons.
   2. Card Reader: Card reader to be supplied by KSP. Contractor to provide power and data supply or conduit as indicated in Drawings, and provide and install card reader base and keypad.
   3. Digital Keypad Entry Unit: Multiple-programmable, code capability of not less than 500 possible individual codes, consisting of 1- to 7-digit codes, and permitting 4 different access time periods.
      a. Face-lighted unit with metal-keyed or keyless-membrane keypad fully visible at night.
   4. Vehicle Loop Detector: System including automatic closing timer with adjustable time delay before closing and loop detector designed to hold gate open until traffic clears. Provide electronic detector with adjustable detection patterns, adjustable sensitivity and

frequency settings, and panel indicator light designed to detect presence or transit of a vehicle over an embedded loop of wire and to emit a signal activating the gate operator. Provide number of loops consisting of multiple strands of wire, number of turns, loop size, and method of placement at location shown on Drawings, as recommended in writing by detection system manufacturer for function indicated.

a. Loop: Wire, in size indicated for field assembly, for saw cut with epoxy-grouted installation.

E. Obstruction Detection Devices: Provide each motorized gate with automatic safety sensor(s). Activation of sensor(s) causes operator to immediately function as follows:

1. Action: Stop gate in opening cycle and reverse gate in closing cycle and hold until clear of obstruction.
2. Internal Sensor: Built-in torque or current monitor senses gate is obstructed.

F. Limit Switches: Adjustable switches, interlocked with motor controls and set to automatically stop gate at fully retracted and fully extended positions.

G. Emergency Release Mechanism: Quick-disconnect release of operator drive system of the following type of mechanism, permitting manual operation if operator fails. Design system so control-circuit power is disconnected during manual operation.

1. Type: Integral fail-safe release, allowing gate to be pushed open without mechanical devices, keys, cranks, or special knowledge.

H. Operating Features:

1. System Integration: With controlling circuit board capable of accepting any type of input from external devices.
2. Master/Slave Capability: Control stations designed and wired for gate pair operation.
3. Automatic Closing Timer: With adjustable time delay before closing and timer cutoff switch.
4. Open Override Circuit: Designed to override closing commands.
5. Reversal Time Delay: Designed to protect gate system from shock load on reversal in both directions.
6. Maximum Run Timer: Designed to prevent damage to gate system by shutting down system if normal time to open gate is exceeded.
7. Clock Timer: 24-hour programmable for regular events.

I. Accessories:

1. Battery Backup System: Battery-powered drive and access-control system, independent of primary drive system:
   a. Fail Safe: Gate opens and remains open until power is restored.
   b. Fail Secure: Gate cycles on battery power, then fail safe when battery is discharged.

2.7 FITTINGS

A. General: Comply with ASTM F 626.

B. Post caps: Provide for each post.

1. Provide line post caps with loop to receive top rail.

2.8 CAST-IN-PLACE CONCRETE

A. Materials: Portland cement complying with ASTM C 150, Type I aggregates complying with ASTM C 33, and potable water for ready-mixed concrete complying with ASTM C 94/C 94M.

1. Concrete Mixes: Normal-weight concrete air entrained with not less than 3500-psi compressive strength (28 days), 3-inch slump, and 1-inch maximum size aggregate.

2.9 GROUT AND ANCHORING CEMENT

A. Nonshrink, Nonmetallic Grout: Factory-packaged, nonstaining, noncorrosive, nongaseous grout complying with ASTM C1107/C1107M. Provide grout, recommended in writing by manufacturer, for exterior applications.

B. Anchoring Cement: Factory-packaged, nonshrink, nonstaining, hydraulic-controlled expansion cement formulation for mixing with water at Project site to create pourable anchoring, patching, and grouting compound. Provide formulation that is resistant to erosion from water exposure without needing protection by a sealer or waterproof coating, and that is recommended in writing by manufacturer for exterior applications.

2.10 GROUNDING MATERIALS

A. Comply with requirements in Section 260526 "Grounding and Bonding for Electrical Systems."

B. Connectors and Grounding Rods: Listed and labeled for complying with UL 467.

1. Connectors for Below-Grade Use: Exothermic welded type.
2. Grounding Rods: Copper-clad steel, 5/8 by 96 inches (16 by 2440 mm).

2.11 PRIVACY SLATS

A. HDPE Privacy slats, 8’ to match fence height.

B. Privacy slats to be designed for 90% screening, for 2” chain link fence fabric, provided by the same manufacturer of the chain link fencing system and installed per Manufacturer specifications.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine areas and conditions, with Installer present, for compliance with requirements for a verified survey of property lines and legal boundaries, site clearing, earthwork, pavement work, and other conditions affecting performance.

1. Do not begin installation before final grading is completed, unless otherwise permitted by Architect.
2. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Stake locations of fence lines, gates, and terminal posts. Do not exceed intervals of 500 feet or line of sight between stakes. Indicate locations of utilities, lawn sprinkler system, underground structures, benchmarks, and property monuments.

3.3 INSTALLATION, GENERAL

A. Install chain-link fencing to comply with ASTM F 567 and more stringent requirements specified.

1. Install fencing on established boundary lines inside property line.

3.4 CHAIN-LINK FENCE INSTALLATION

A. Post Excavation: Drill or hand-excavate holes for posts to diameters and spacings indicated, in firm, undisturbed soil.

B. Post Setting: Set posts in concrete at indicated spacing into firm, undisturbed soil.

1. Verify that posts are set plumb, aligned, and at correct height and spacing, and hold in position during setting with concrete or mechanical devices.
2. Concrete Fill: Place concrete around posts to dimensions indicated and vibrate or tamp for consolidation. Protect aboveground portion of posts from concrete splatter.

    a. Exposed Concrete: Flush to adjacent surface, shape and smooth to shed water.

C. Terminal Posts: Locate terminal end, corner, and gate posts per ASTM F 567 and terminal pull posts at changes in horizontal or vertical alignment of 30 degrees or more.

D. Line Posts: Space line posts uniformly at 8 feet o.c., max.

E. Post Bracing and Intermediate Rails: Install according to ASTM F 567, maintaining plumb position and alignment of fencing. Install braces at end and gate posts and at both sides of corner and pull posts.

1. Locate horizontal braces at midheight of fabric 6 feet or higher, on fences with top rail and at 2/3 fabric height on fences without top rail. Install so posts are plumb when diagonal rod is under proper tension.

F. Top Rail: Install according to ASTM F567, maintaining plumb position and alignment of fence posts. Run rail continuously through line post caps, bending to radius for curved runs and terminating into rail end attached to posts or post caps fabricated to receive rail at terminal posts. Provide expansion couplings as recommended in writing by fencing manufacturer.

G. Tension Wire: Install according to ASTM F 567, maintaining plumb position and alignment of fencing. Pull wire taut, without sags. Fasten fabric to tension wire with 0.120-inch- diameter hog rings of same material and finish as fabric wire, spaced a maximum of 24 inches o.c. Install tension wire in locations indicated before stretching fabric.

1. Top Tension Wire where indicated: Install tension wire through post cap loops.
2. Bottom Tension Wire where indicated: Install tension wire within 6 inches of bottom of fabric and tie to each post with not less than same diameter and type of wire.

H. Chain-Link Fabric: Apply fabric to outside of enclosing framework. Leave 2 inches between finish grade or surface and bottom selvage, unless otherwise indicated. Pull fabric taut and tie to posts, rails, and tension wires. Anchor to framework so fabric remains under tension after pulling force is released.

I. Tension or Stretcher Bars: Thread through fabric and secure to end, corner, pull, and gate posts with tension bands spaced not more than 15 inches o.c.

J. Tie Wires: Use wire of proper length to firmly secure fabric to line posts and rails. Attach wire at 1 end to chain-link fabric, wrap wire around post a minimum of 180 degrees, and attach other end to chain-link fabric per ASTM F 626. Bend ends of wire to minimize hazard to individuals and clothing.

1. Maximum Spacing: Tie fabric to line posts at 12 inches o.c. and to braces at 24 inches o.c.

K. Fasteners: Install nuts for tension bands and carriage bolts on the side of the fence opposite the fabric side. Peen ends of bolts or score threads to prevent removal of nuts.

3.5 GATE INSTALLATION

A. Install gates according to manufacturer's written instructions, level, plumb, and secure for full opening without interference. Attach fabric as for fencing. Attach hardware using tamper-resistant or concealed means. Install ground-set items in concrete for anchorage. Adjust hardware for smooth operation.

3.6 GROUNDING AND BONDING

A. Fence and Gate Grounding:

1. Ground for fence and fence posts shall be a separate system from ground for gate and gate posts.
2. Install ground rods and connections at maximum intervals of 1500 feet
3. Fences within 100 Feet (30 m) of Buildings, Structures, Walkways, and Roadways: Ground at maximum intervals of 750 feet.
4. Ground fence on each side of gates and other fence openings.

    a. Bond metal gates to gate posts.

b. Bond across openings, with and without gates, except openings indicated as intentional fence discontinuities. Use No. 2 AWG wire and bury it at least 18 inches below finished grade.

B. Protection at Crossings of Overhead Electrical Power Lines: Ground fence at location of crossing and at a ground rod located a maximum distance of 150 feet on each side of crossing.

C. Fences Enclosing Electrical Power Distribution Equipment: Ground according to IEEE C2 unless otherwise indicated.

D. Grounding Method: At each grounding location, drive a grounding rod vertically until the top is 6 inches below finished grade. Connect rod to fence with No. 6 AWG conductor. Connect conductor to each fence component at grounding location.

1. Make grounding connections to each barbed wire strand with wire-to-wire connectors designed for this purpose.
2. Make grounding connections to each barbed tape coil with connectors designed for this purpose.

E. Connections:

1. Make connections with clean, bare metal at points of contact.
2. Make aluminum-to-steel connections with stainless-steel separators and mechanical clamps.
3. Make aluminum-to-galvanized-steel connections with tin-plated copper jumpers and mechanical clamps.
4. Make above-grade ground connections with mechanical fasteners.
5. Make below-grade ground connections with exothermic welds.
6. Coat and seal connections having dissimilar metals with inert material to prevent future penetration of moisture to contact surfaces.

F. Bonding to Lightning Protection System: Ground fence and bond fence grounding conductor to lightning protection down conductor or lightning protection grounding conductor according to NFPA 780.

3.7 ADJUSTING

A. Gates: Adjust gates to operate smoothly, easily, and quietly, free of binding, warp, excessive deflection, distortion, nonalignment, misplacement, disruption, or malfunction, throughout entire operational range. Confirm that latches and locks engage accurately and securely without forcing or binding.

B. Lubricate hardware and other moving parts.

3.8 DEMONSTRATION

A. Engage a factory-authorized service representative to train Owner's maintenance personnel to adjust, operate, and maintain chain-link fences and gates.

END OF SECTION 323113

SECTION 32 9200 - TURF AND GRASSES

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General, Supplementary and Special Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

1. Hydroseeding
2. Sodding.
3. Lawn renovation.
4. Erosion-control material(s).

B. Related Sections:

1. Division 31 Section "Site Clearing" for topsoil stripping and stockpiling.
2. Division 31 Section "Earth Moving" for excavation, filling and backfilling, and rough grading.

1.3 DEFINITIONS

A. Finish Grade: Elevation of finished surface of planting soil.

B. Planting Soil: Native or imported topsoil, manufactured topsoil, or surface soil modified to become topsoil; mixed with soil amendments.

C. Subgrade: Surface or elevation of subsoil remaining after completing excavation, or top surface of a fill or backfill immediately beneath planting soil.

D. Subsoil: All soil beneath the topsoil layer of the soil profile, and typified by the lack of organic matter and soil organisms.

1.4 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Certification of Grass Seed: From seed vendor for each grass-seed monostand or mixture stating the botanical and common name and percentage by weight of each species and variety, and percentage of purity, germination, and weed seed. Include the year of production and date of packaging.

1. Certification of each seed mixture for turfgrass sod, identifying source, including name and telephone number of supplier.

C. Qualification Data: For qualified landscape Installer.

D. Product Certificates: For soil amendments and fertilizers, from manufacturer.

E. Material Test Reports: For existing surface soil.

F. Samples for Verification: For each of the following:

1. Erosion Control Blanket: 12 by 12 inches.

G. Planting Schedule: Indicating anticipated planting dates for each type of planting.

1.5 QUALITY ASSURANCE

A. Installer Qualifications: A qualified landscape installer whose work has resulted in successful lawn and meadow establishment.

1. Installer's Field Supervision: Require Installer to maintain an experienced full-time supervisor on Project site when planting is in progress.
2. Maintenance Proximity: Not more than two hours' normal travel time from Installer's place of business to Project site.

B. Soil-Testing Laboratory Qualifications: An independent laboratory, recognized by the State Department of Agriculture, with the experience and capability to conduct the testing indicated and that specializes in types of tests to be performed.

C. Topsoil Analysis: Furnish soil analysis by a qualified soil-testing laboratory stating percentages of organic matter; gradation of sand, silt, and clay content; cation exchange capacity; deleterious material; pH; and mineral and plant-nutrient content of topsoil.

1. Report suitability of topsoil for lawn growth. State-recommended quantities of nitrogen, phosphorus, and potash nutrients and soil amendments to be added to produce satisfactory topsoil.

D. Preinstallation Conference: Conduct conference at Project site.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Seed: Deliver seed in original sealed, labeled, and undamaged containers.

B. Sod: Harvest, deliver, store, and handle sod according to requirements in TPI's "Specifications for Turfgrass Sod Materials" and "Specifications for Turfgrass Sod Transplanting and Installation" in its "Guideline Specifications to Turfgrass Sodding." Deliver sod in time for planting within 24 hours of harvesting. Protect sod from breakage and drying.

1.7 PROJECT CONDITIONS

A. Planting Restrictions: Plant during one of the following periods. Coordinate planting periods with initial maintenance periods to provide required maintenance from date of Substantial Completion.

1. Summer Planting: July 1st – September 1st

B. Weather Limitations: Proceed with planting only when existing and forecasted weather conditions permit.

1.8 MAINTENANCE SERVICE

A. Initial Lawn Maintenance Service: Provide full maintenance by skilled employees of landscape Installer. Maintain as required in Part 3. Begin maintenance immediately after each area is planted and continue until acceptable lawn is established, but for not less than the following periods:

1. Seeded Lawns: 60 days from date of Project Substantial Completion.

a. When initial maintenance period has not elapsed before end of planting season, or if lawn is not fully established, continue maintenance during next planting season.

2. Sodded Lawns: 60 days from date of Project Substantial Completion.

PART 2 - PRODUCTS

2.1 SEED FOR HYDROSEEDING

A. Grass Seed: Fresh, clean, dry, new-crop seed complying with AOSA's "Journal of Seed Technology; Rules for Testing Seeds" for purity and germination tolerances.

B. Seed Species: Seed of grass species as follows, with not less than 95 percent germination, not less than 85 percent pure seed, and not more than 0.5 percent weed seed:

1. Sun to Partial Shade: Proportioned by weight as follows:

a. 85 percent blend three species of Turf Type Tall Fescues. Cultivars shall be specifically tolerant for summer season seeding.
b. 15 percent perennial ryegrass.
2. Seed Grade: Certified Turf Quality.
3. Application Rate: 2.5 lbs/1000 sf
4. Seed shall be weed free, fresh, re-cleaned, Grade A, new crop.

C. Hydro-Mulch:
1. Cellulose wood fiber with no growth or germination inhibiting factors, dyed green. Material shall have equilibrium air-dry moisture content of twelve (12) percent, plus or minus two (2) percent, at time of manufacture.

2. Fiber shall disperse rapidly in water forming homogeneous slurry and remaining in such state when agitated in hydro-mulching equipment.

D. Binders:
1. Tackifier to bind soil and mulch together to prevent erosion.

E. Fungicide for use with Hydroseeding application.

F. Fertilizer: 16-20-0.

2.2 MIXES FOR HYDROSEEDING

A. General:
1. Amount of hydro-mulch shall be 1800 lbs per acre.
2. Add water as necessary to provide suitable slurry mixture.
3. Add fungicide at rates recommended by Manufacturer on installations made between 1st of June and 30 September.

2.3 TURFGRASS SOD

A. Turfgrass Sod: Certified, complying with TPI's "Specifications for Turfgrass Sod Materials" in its "Guideline Specifications to Turfgrass Sodding." Furnish viable sod of uniform density, color, and texture, strongly rooted, and capable of vigorous growth and development when planted. Do not use sod with netting.

B. Turfgrass Species: Sod of grass species as follows, with not less than 95 percent germination, not less than 85 percent pure seed, and not more than 0.5 percent weed seed:

1. Full Sun: Blend of three “fine blade turf type” Tall Fescue cultivars acceptable to the Architect.

2.4 TOPSOIL

A. Topsoil: ASTM D 5268, pH range of 5.5 to 7, a minimum of 2 percent organic material content; free of stones 1 inch or larger in any dimension and other extraneous materials harmful to plant growth.

1. Topsoil Source: Reuse surface soil stockpiled on-site. Verify suitability of stockpiled surface soil to produce topsoil. Clean surface soil of roots, plants, sod, stones, clay lumps, and other extraneous materials harmful to plant growth.

a. Supplement with imported or manufactured topsoil from off-site sources when quantities are insufficient. Obtain topsoil displaced from naturally well-drained construction or mining sites where topsoil occurs at least 4 inches deep; do not obtain from bogs or marshes.

2.5 INORGANIC SOIL AMENDMENTS

A. Lime: ASTM C 602, agricultural limestone containing a minimum of 80 percent calcium carbonate equivalent and as follows:

1. Class: T, with a minimum of 99 percent passing through No. 8 sieve and a minimum of 75 percent passing through No. 60 sieve.

2.6 PLANTING ACCESSORIES

A. Selective Herbicides: EPA registered and approved, of type recommended by manufacturer for application.

2.7 FERTILIZER

A. Commercial Fertilizer: Commercial-grade complete fertilizer of neutral character, consisting of fast- and slow-release nitrogen, 50 percent derived from natural organic sources of urea formaldehyde, phosphorous, and potassium in the following composition:

1. Composition: Nitrogen, phosphorous, and potassium in amounts recommended in soil reports from a qualified soil-testing agency.

2.8 MULCHES

A. Straw Mulch: Provide air-dry, clean, mildew- and seed-free, salt hay or threshed straw of wheat, rye, oats, or barley.

B. Asphalt Emulsion: ASTM D 977, Grade SS-1; nontoxic and free of plant-growth or germination inhibitors.

2.9 EROSION-CONTROL MATERIALS

A. Erosion Control Blankets: For slopes exceeding 6:1 and not indicated to be sodded. Short term, 100% biodegradable double net straw fiber erosion control blanket designed for use on moderate slopes for up to 1 year. Blanket shall be sewn together on 1.5” centers, FHWA FP-03, Type 2D erosion control blanket for slopes up to 2:1. 100% agricultural straw fiber matrix, straw applied at a rate of .5lbs/SY, top and bottom leno woven biodegradable nets with a mesh size of .5x1 inches, 100% biodegradable leno woven net, thread and matrix. Erosion Control Blanket S32BD or an equivalent product.

2.10 PLANTING SOIL MIX

A. Planting Soil Mix: Topsoil mixed with the following soil amendments and fertilizers in the following quantities:

1. Weight of Lime per 1000 Sq. Ft.: As determined by Soil Test.
2. Weight of Sulfur per 1000 Sq. Ft.: As determined by Soil Test..

3. Weight of Commercial Fertilizer per 1000 Sq. Ft.: As determined by Soil Test.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine areas to receive lawns and grass for compliance with requirements and other conditions affecting performance.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Protect structures, utilities, sidewalks, pavements, and other facilities, trees, shrubs, and plantings from damage caused by planting operations.

1. Protect adjacent and adjoining areas from hydroseeding and hydromulching overspray.
2. Protect grade stakes set by others until directed to remove them.

B. Provide erosion-control measures to prevent erosion or displacement of soils and discharge of soil-bearing water runoff or airborne dust to adjacent properties and walkways.

3.3 FIELD QUALITY CONTROL

A. Field Inspections:
1. Seeded areas will be accepted at final inspection if:
a. Seeded areas are properly established.
b. Lawn is free of bare and dead spots and is without weeds.
c. No surface soil is visible when grass has been cut to height of 2 inches.
d. Seeded areas have been mowed a minimum of twice.

3.4 LAWN PREPARATION

A. Limit lawn subgrade preparation to areas to be planted.

B. Newly Graded Subgrades: Loosen subgrade to a minimum depth of 6 inches. Remove stones larger than 1 inch in any dimension and sticks, roots, rubbish, and other extraneous matter and legally dispose of them off Owner's property.

1. Spread topsoil, apply soil amendments and fertilizer on surface, and thoroughly blend planting soil mix.

a. Delay mixing fertilizer with planting soil if planting will not proceed within a few days.
b. Mix lime with dry soil before mixing fertilizer.

2. Spread planting soil mix to a depth of 6 inches but not less than required to meet finish grades after light rolling and natural settlement. Do not spread if planting soil or subgrade is frozen, muddy, or excessively wet.

    a. Spread approximately 1/2 the thickness of planting soil mix over loosened subgrade. Mix thoroughly into top 2 inches of subgrade. Spread remainder of planting soil mix.
    b. Reduce elevation of planting soil to allow for soil thickness of sod.

C. Unchanged Subgrades: If lawns are to be planted in areas unaltered or undisturbed by excavating, grading, or surface-soil stripping operations, prepare surface soil as follows:

1. Remove existing grass, vegetation, and turf. Do not mix into surface soil.
2. Loosen surface soil to a depth of at least 6 inches. Apply soil amendments and fertilizers according to planting soil mix proportions and mix thoroughly into top 4 inches of soil. Till soil to a homogeneous mixture of fine texture.

    a. Apply fertilizer directly to surface soil before loosening.

3. Remove stones larger than 1 inch in any dimension and sticks, roots, trash, and other extraneous matter.
4. Legally dispose of waste material, including grass, vegetation, and turf, off Owner's property.

D. Finish Grading: Grade planting areas to a smooth, uniform surface plane with loose, uniformly fine texture. Grade to within plus or minus 1/2 inch of finish elevation. Roll and rake, remove ridges, and fill depressions to meet finish grades. Limit finish grading to areas that can be planted in the immediate future.

E. Moisten prepared lawn areas before planting if soil is dry. Water thoroughly and allow surface to dry before planting. Do not create muddy soil.

F. Before planting, restore areas if eroded or otherwise disturbed after finish grading.

3.5 PREPARATION FOR EROSION-CONTROL MATERIALS

A. Prepare area as specified in "Lawn Preparation" Article.

B. For erosion-control blanket and turf reinforcement mat, install from top of slope, working downward, and as recommended by material manufacturer for site conditions. Fasten as recommended by material manufacturer.

C. Moisten prepared area before planting if surface is dry. Water thoroughly and allow surface to dry before planting. Do not create muddy soil.

3.6 HYDROSEEDING

A. Interface With Other Work:
    1. Do not commence work of this Section until work of section 312000 Earth Moving has been completed and approved.

B. Tolerances:
   1. Final grade of soil after seeding of lawn areas is complete shall be one inch below top of adjacent pavement of any kind.

C. After lawn areas are graded, apply specified slurry mix with machine capable of continuously mixing slurry and providing an application meeting Contract Document requirements. Hydro-mulch shall form an absorptive mat, but not a plant inhibiting membrane, which will allow water to percolate into underlying soil.

D. Post Application Watering:
   1. Allow slurry mixture to 'set.'
   2. Water hydro-seeded areas sufficiently to insure proper seed germination, but not cause erosion or slope failure. Repeat watering at regular intervals to keep seed germinating and growing until plantings are established. Note hydroseeding will take place in summer months and Contractor shall water accordingly to provide establishment in hot, dry conditions.
   3. After plantings are established, decrease frequency and increase amount of water per application as necessary to meet plant water requirements.

E. If fungicide has been applied with slurry mix, make a second application of fungicide fourteen (14) days after initial application.

3.7 SODDING

A. Lay sod within 24 hours of harvesting. Do not lay sod if dormant or if ground is frozen or muddy.

B. Lay sod to form a solid mass with tightly fitted joints. Butt ends and sides of sod; do not stretch or overlap. Stagger sod strips or pads to offset joints in adjacent courses. Avoid damage to subgrade or sod during installation. Tamp and roll lightly to ensure contact with subgrade, eliminate air pockets, and form a smooth surface. Work sifted soil or fine sand into minor cracks between pieces of sod; remove excess to avoid smothering sod and adjacent grass.

   1. Lay sod across angle of slopes exceeding 1:3.
   2. Anchor sod on slopes exceeding 1:6 with wood pegs spaced as recommended by sod manufacturer but not less than 2 anchors per sod strip to prevent slippage.

C. Saturate sod with fine water spray within two hours of planting. During first week after planting, water daily or more frequently as necessary to maintain moist soil to a minimum depth of 1-1/2 inches below sod.

3.8 LAWN RENOVATION

A. Renovate existing lawn damaged by Contractor's operations, such as storage of materials or equipment and movement of vehicles.

   1. Reestablish lawn where settlement or washouts occur or where minor regrading is required.
   2. Provide new topsoil as required.

3. Lawn renovation shall be done by hydroseeding.

B. Remove sod and vegetation from diseased or unsatisfactory lawn areas; do not bury in soil.

C. Remove topsoil containing foreign materials resulting from Contractor's operations, including oil drippings, fuel spills, stone, gravel, and other construction materials, and replace with new topsoil.

D. Mow, dethatch, core aerate, and rake existing lawn.

E. Remove weeds before hydroseeding. Where weeds are extensive, apply selective herbicides as required. Do not use pre-emergence herbicides.

F. Remove waste and foreign materials, including weeds, soil cores, grass, vegetation, and turf, and legally dispose of them off Owner's property.

G. Till stripped, bare, and compacted areas thoroughly to a soil depth of 6 inches.

H. Apply soil amendments and initial fertilizers required for establishing new lawns and mix thoroughly into top 4 inches of existing soil. Provide new planting soil to fill low spots and meet finish grades.

I. Apply seed and protect with straw mulch as required for new lawns.

J. Water newly planted areas and keep moist until new lawn is established.

3.9 LAWN MAINTENANCE

A. Maintain and establish lawn by watering, fertilizing, weeding, mowing, trimming, replanting, and other operations. Roll, regrade, and replant bare or eroded areas and remulch to produce a uniformly smooth lawn. Provide materials and installation the same as those used in the original installation.

1. In areas where mulch has been disturbed by wind or maintenance operations, add new mulch and anchor as required to prevent displacement.

B. Watering: Provide and maintain temporary piping, hoses, and lawn-watering equipment to convey water from sources and to keep lawn uniformly moist to a depth of 4 inches.

1. Schedule watering to prevent wilting, puddling, erosion, and displacement of seed or mulch. Lay out temporary watering system to avoid walking over muddy or newly planted areas.
2. Water lawn with fine spray at a minimum rate of 1 inch per week unless rainfall precipitation is adequate.

C. Mow lawn as soon as top growth is tall enough to cut. Repeat mowing to maintain specified height without cutting more than 1/3 of grass height. Remove no more than 1/3 of grass-leaf growth in initial or subsequent mowings. Do not delay mowing until grass blades bend over and become matted. Do not mow when grass is wet. Schedule initial and subsequent mowings to maintain the following grass height:

1. Mow grass to a height of 2 to 3 inches.

D. Lawn Postfertilization: Apply fertilizer after initial mowing and when grass is dry.

1. Use fertilizer that will provide actual nitrogen of at least 1 lb/1000 sq. ft. to lawn area.

3.10 SATISFACTORY LAWNS

A. Lawn installations shall meet the following criteria as determined by Architect:

1. Satisfactory Seeded Lawn: At end of maintenance period, a healthy, uniform, close stand of grass has been established, free of weeds and surface irregularities, with coverage exceeding 90 percent over any 10 sq. ft. and bare spots not exceeding 5 by 5 inches.
2. Satisfactory Sodded Lawn: At end of maintenance period, a healthy, well-rooted, even-colored, viable lawn has been established, free of weeds, open joints, bare areas, and surface irregularities.

B. Use specified materials to reestablish lawns that do not comply with requirements and continue maintenance until lawns are satisfactory.

3.11 LAWN WARRANTY

A. Warranty for all seeded and sodded lawns shall be for one (1) year past the date of project Final Completion.

3.12 CLEANUP AND PROTECTION

A. Promptly remove soil and debris, created by lawn work, from paved areas. Clean wheels of vehicles before leaving site to avoid tracking soil onto roads, walks, or other paved areas.

B. Erect temporary fencing or barricades and warning signs as required to protect newly planted areas from traffic. Maintain fencing and barricades throughout initial maintenance period and remove after lawn is established.

C. Remove nondegradable erosion-control measures after grass establishment period.

END OF SECTION 32 92 00

SECTION 329300 – PLANTS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Special Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:
   1. Trees
   2. Shrubs
   3. Perennials
   4. Groundcovers

B. Related Sections:

   1. Division 31 Section "Site Clearing" for protection of existing trees and plantings, topsoil stripping and stockpiling, and site clearing.
   2. Division 31 Section "Earth Moving" for excavation, filling, and rough grading and for subsurface aggregate drainage and drainage backfill materials.
   3. Division 32 Section "Turf and Grasses" for lawn.
   4. Division 33 Section "Subdrainage" for below-grade drainage of landscaped areas, paved areas, and wall perimeters, if applicable.

1.3 DEFINITIONS

A. Backfill: The earth used to replace or the act of replacing earth in an excavation.

B. Balled and Burlapped Stock: Exterior plants dug with firm, natural balls of earth in which they are grown, with ball size not less than sizes indicated; wrapped, tied, rigidly supported, and drum laced as recommended by ANSI Z60.1.

C. Clump: Where three or more young trees were planted in a group and have grown together as a single tree having three or more main stems or trunks.

D. Container-Grown Stock: Healthy, vigorous, well-rooted exterior plants grown in a container with well-established root system reaching sides of container and maintaining a firm ball when removed from container. Container shall be rigid enough to hold ball shape and protect root mass during shipping and be sized according to ANSI Z60.1 for type and size of exterior plant required.

E. Finish Grade: Elevation of finished surface of planting soil.

F. Multi-Stem: Where three or more main stems arise from the ground from a single root crown or at a point right above the root crown.

G. Planting Soil: Native or imported topsoil, mixed with soil amendments.

H. Subgrade: Surface or elevation of subsoil remaining after completing excavation, or top surface of a fill or backfill, before placing planting soil.

I. Subsoil: All soil beneath the topsoil layer of the soil profile, and typified by the lack of organic matter and soil organisms.

1.4 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Samples for Verification: For each of the following:

1. Edging materials and accessories, of manufacturer's standard size, to verify color selected.

C. Qualification Data: For qualified landscape Installer.

D. Product Certificates: For each type of manufactured product, from manufacturer, and complying with the following:

1. Manufacturer's certified analysis for standard products.
2. Analysis of other materials by a recognized laboratory made according to methods established by the Association of Official Analytical Chemists, where applicable.

E. Material Test Reports: For existing surface soil and imported topsoil.

F. Planting Schedule: Indicating anticipated planting dates for exterior plants.

G. Warranty: Sample of special warranty.

1.5 QUALITY ASSURANCE

A. Installer Qualifications: A qualified landscape installer whose work has resulted in successful establishment of exterior plants.

1. Installer's Field Supervision: Require Installer to maintain an experienced full-time supervisor on Project site when planting is in progress.

B. Soil-Testing Laboratory Qualifications: An independent laboratory, recognized by the State Department of Agriculture, with the experience and capability to conduct the testing indicated and that specializes in types of tests to be performed.

C. Topsoil Analysis: Furnish soil analysis by a qualified soil-testing laboratory stating percentages of organic matter; gradation of sand, silt, and clay content; cation exchange capacity; deleterious material; pH; and mineral and plant-nutrient content of topsoil.

1. Report suitability of topsoil for plant growth. State-recommended quantities of nitrogen, phosphorus, and potash nutrients and soil amendments to be added to produce satisfactory topsoil.

D. Provide quality, size, genus, species, and variety of exterior plants indicated, complying with applicable requirements in ANSI Z60.1, "American Standard for Nursery Stock."

1. Selection of exterior plants purchased under allowances will be made by Architect, who will tag plants at their place of growth before they are prepared for transplanting.

E. Tree and Shrub Measurements: Measure according to ANSI Z60.1 with branches and trunks or canes in their normal position. Do not prune to obtain required sizes. Take caliper measurements 6 inches above the ground for trees up to 4-inch caliper size, and 12 inches above the ground for larger sizes. Measure main body of tree or shrub for height and spread; do not measure branches or roots tip-to-tip.

F. Observation: Architect may observe trees and shrubs either at place of growth or at site before planting for compliance with requirements for genus, species, variety, size, and quality. Architect retains right to observe trees and shrubs further for size and condition of balls and root systems, insects, injuries, and latent defects and to reject unsatisfactory or defective material at any time during progress of work. Remove rejected trees or shrubs immediately from Project site.

1. Notify Architect of sources of planting materials seven days in advance of delivery to site.

G. Preinstallation Conference: Conduct conference at Project site.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Deliver exterior plants freshly dug.

1. Immediately after digging up bare-root stock, pack root system in wet straw, hay, or other suitable material to keep root system moist until planting.

B. Do not prune trees and shrubs before delivery except as approved by Architect. Protect bark, branches, and root systems from sun scald, drying, sweating, whipping, and other handling and tying damage. Do not bend or bind-tie trees or shrubs in such a manner as to destroy their natural shape. Provide protective covering of exterior plants during delivery. Do not drop exterior plants during delivery and handling.

C. Handle planting stock by root ball.

D. Deliver exterior plants after preparations for planting have been completed and install immediately. If planting is delayed more than six hours after delivery, set exterior plants and trees in shade, protect from weather and mechanical damage, and keep roots moist.
1. Set balled stock on ground and cover ball with soil, peat moss, sawdust, or other acceptable material.
2. Do not remove container-grown stock from containers before time of planting.

3. Water root systems of exterior plants stored on-site with a fine-mist spray. Water as often as necessary to maintain root systems in a moist condition.

1.7 PROJECT CONDITIONS

A. Planting Restrictions: Plant during one of the following periods. Coordinate planting periods with maintenance periods to provide required maintenance from date of Substantial Completion.

1. Spring Planting: March 1st to May 15th.
2. Fall Planting: October 15th to December 1st.

B. Weather Limitations: Proceed with planting only when existing and forecasted weather conditions permit planting to be performed according to manufacturer's written instructions and warranty requirements.

C. Coordination with Lawns: Plant trees and shrubs after finish grades are established and before planting lawns unless otherwise acceptable to Architect.

1. When planting trees and shrubs after lawns, protect lawn areas and promptly repair damage caused by planting operations.

1.8 WARRANTY

A. Special Warranty: Installer's standard form in which Installer agrees to repair or replace plantings and accessories that fail in materials, workmanship, or growth within specified warranty period.

1. Failures include, but are not limited to, the following:

a. Death and unsatisfactory growth, except for defects resulting from lack of adequate maintenance, neglect, abuse by Owner, or incidents that are beyond Contractor's control.
b. Structural failures including plantings falling or blowing over.
c. Faulty operation of tree stabilization and edgings.
d. Deterioration of metals, metal finishes, and other materials beyond normal weathering.

2. Warranty Periods from Date of Substantial Completion:

a. Trees and Shrubs: One year.
b. Ground Cover and Plants: One year.

3. Include the following remedial actions as a minimum:

a. Remove dead exterior plants immediately. Replace immediately unless required to plant in the succeeding planting season.
b. Replace exterior plants that are more than 25 percent dead or in an unhealthy condition at end of warranty period.
c. A limit of one replacement of each exterior plant will be required except for losses or replacements due to failure to comply with requirements.

d. Provide extended warranty for replaced plant materials; warranty period equal to original warranty period.

1.9 MAINTENANCE SERVICE

A. Initial Maintenance Service for Trees, Shrubs, Ground Cover and Plants: Provide full maintenance by skilled employees of landscape Installer. Maintain as required in Part 3. Begin maintenance immediately after each area is planted and continue until plantings are acceptably healthy and well established, but for not less than 60 days past the date of Project Substantial Completion.

PART 2 - PRODUCTS

2.1 TREE AND SHRUB MATERIAL

A. General: Furnish nursery-grown trees and shrubs complying with ANSI Z60.1, with healthy root systems developed by transplanting or root pruning. Provide well-shaped, fully branched, healthy, vigorous stock free of disease, insects, eggs, larvae, and defects such as knots, sun scald, injuries, abrasions, and disfigurement.

B. Provide trees and shrubs of sizes, grades, and ball or container sizes complying with ANSI Z60.1 for types and form of trees and shrubs required. Trees and shrubs of a larger size may be used if acceptable to Architect, with a proportionate increase in size of roots or balls.

C. Root-Ball Depth: Furnish trees and shrubs with root balls measured from top of root ball, which shall begin at root flare according to ANSI Z60.1. Root flare shall be visible before planting.

D. Label each tree and shrub with securely attached, waterproof tag bearing legible designation of botanical and common name.

E. If formal arrangements or consecutive order of trees or shrubs is shown, select stock for uniform height and spread, and number label to assure symmetry in planting.

2.2 SHADE AND FLOWERING TREES

A. Type 1 or Type 2 (Slower Growth) Shade Trees: Single-stem trees with straight trunk, well-balanced crown, and intact leader, of height and caliper indicated, complying with ANSI Z60.1 for type of trees required.

1. Provide balled and burlapped trees.
2. Branching Height: One-half of tree height.

B. Small Upright Trees: Branched or pruned naturally according to species and type, with relationship of caliper, height, and branching according to ANSI Z60.1; stem form as follows:

1. Stem Form: Single trunk or multi-trunk clump as indicated.
2. Provide balled and burlapped trees.

C. Small Spreading Trees: Branched or pruned naturally according to species and type, with relationship of caliper, height, and branching according to ANSI Z60.1; stem form as follows:

1. Stem Form: Single trunk or multi-stem clump as indicated.
2. Provide balled and burlapped trees.

2.3 DECIDUOUS SHRUBS

A. Form and Size: Shrubs with not less than the minimum number of canes required by and measured according to ANSI Z60.1 for type, shape, and height of shrub.

1. Shrub sizes indicated are sizes after pruning.
2. Provide balled and burlapped or container-grown shrubs as indicated.

3. Provide balled and burlapped trees.

2.4 GROUND COVER PLANTS

A. Ground Cover: Provide ground cover of species indicated, established and well rooted in pots or similar containers, and complying with ANSI Z60.1 and the following requirements:

2.5 PLANTS

A. Perennials: Provide healthy, field-grown plants from a commercial nursery, of species and variety shown or listed, complying with requirements in ANSI Z60.1.

2.6 TOPSOIL

A. Topsoil: ASTM D 5268, pH range of 5.5 to 7, a minimum of 4 percent organic material content; free of stones 1 inch or larger in any dimension and other extraneous materials harmful to plant growth. Stones shall not exceed 10% by volume.

1. Topsoil Source: Import topsoil or manufactured topsoil from off-site sources. Obtain topsoil displaced from naturally well-drained construction or mining sites where topsoil occurs at least 4 inches deep; do not obtain from bogs or marshes.

2.7 INORGANIC SOIL AMENDMENTS

A. Aluminum Sulfate: Commercial grade, unadulterated.

2.8 ORGANIC SOIL AMENDMENTS

A. Compost: Well-composted, stable, and weed-free organic matter, pH range of 5.5 to 8; moisture content 35 to 55 percent by weight; 100 percent passing through 1/2-inch sieve; soluble salt content of 5 to 10 decisiemens/m; not exceeding 0.5 percent inert contaminants and free of substances toxic to plantings; and as follows:

1. Organic Matter Content: 50 to 60 percent of dry weight.
2. Feedstock: Agricultural, food, or industrial residuals; biosolids; yard trimmings; or source-separated or compostable mixed solid waste.

B. Peat: Sphagnum peat moss, partially decomposed, finely divided or granular texture, with a pH range of 3.4 to 4.8.

C. Manure: Well-rotted, composted, unleached, stable or cattle manure containing not more than 25 percent by volume of straw, sawdust, or other bedding materials; free of toxic substances, stones, sticks, soil, weed seed, and material harmful to plant growth.

2.9 FERTILIZER

A. Slow-Release Fertilizer: Granular or pelleted fertilizer consisting of 50 percent water-insoluble nitrogen, phosphorus, and potassium in the following composition:

1. Composition: Nitrogen, phosphorous, and potassium in amounts recommended in soil reports from a qualified soil-testing agency.

2.10 MULCHES

A. Organic Mulch: Free from deleterious materials and suitable as a top dressing of trees and shrubs, consisting of one of the following:

1. Type: Shredded pine bark.

2.11 TREE STABILIZATION MATERIALS

A. Stakes and Guys:

1. Upright and Guy Stakes: Rough-sawn, sound, new hardwood, redwood, or pressure-preservative-treated softwood, free of knots, holes, cross grain, and other defects, 2-by-2-inch nominal by length indicated, pointed at one end.
2. Flexible Ties: Wide rubber or elastic bands or straps of length required to reach stakes or compression springs.

2.12 MISCELLANEOUS PRODUCTS

A. Antidesiccant: Water-insoluble emulsion, permeable moisture retarder, film forming, for trees and shrubs. Deliver in original, sealed, and fully labeled containers and mix according to manufacturer's written instructions.

B. Trunk-Wrap Tape: Two layers of crinkled paper cemented together with bituminous material, 4-inch- wide minimum, with stretch factor of 33 percent.

2.13 PLANTING SOIL MIX

A. Planting Soil Mix: Mix topsoil with the following soil amendments and fertilizers in the following quantities:

1. Ratio of Loose Compost to Topsoil by Volume: 1:4.
2. Ratio of Loose Peat to Topsoil by Volume: 1:4.
3. Weight of Aluminum Sulfate per 1000 Sq. Ft.: As recommended by soil test.
4. Weight of Slow-Release Fertilizer per 1000 Sq. Ft.: As recommended by soil test.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine areas to receive exterior plants for compliance with requirements and conditions affecting installation and performance.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Protect structures, utilities, sidewalks, pavements, and other facilities, and lawns and existing exterior plants from damage caused by planting operations.

B. Provide erosion-control measures to prevent erosion or displacement of soils and discharge of soil-bearing water runoff or airborne dust to adjacent properties and walkways.

C. Lay out individual tree and shrub locations and areas for multiple plantings. Stake locations, outline areas, adjust locations when requested, and obtain Architect's acceptance of layout before planting. Make minor adjustments as required.

D. Lay out exterior plants at locations directed by Architect. Stake locations of individual trees and shrubs and outline areas for multiple plantings.

E. Trunk Wrapping: Inspect tree trunks for injury, improper pruning, and insect infestation; take corrective measures required before wrapping. Wrap trees of 2-inch caliper and larger with trunk-wrap tape. Start at base of trunk and spiral cover trunk to height of first branches. Overlap wrap, exposing half the width, and securely attach without causing girdling.

F. Apply antidesiccant to trees and shrubs using power spray to provide an adequate film over trunks (before wrapping), branches, stems, twigs, and foliage to protect during digging, handling, and transportation.

1. If deciduous trees or shrubs are moved in full leaf, spray with antidesiccant at nursery before moving and again two weeks after planting.

G. Wrap trees and shrubs with burlap fabric over trunks, branches, stems, twigs, and foliage to protect from wind and other damage during digging, handling, and transportation.

3.3 PLANTING BED ESTABLISHMENT

A. Loosen subgrade of planting beds to a minimum depth of 4 inches. Remove stones larger than 1 inch in any dimension and sticks, roots, rubbish, and other extraneous matter and legally dispose of them off Owner's property.

1. Thoroughly blend planting soil mix off-site before spreading or spread topsoil, apply soil amendments and fertilizer on surface, and thoroughly blend planting soil mix.

a. Delay mixing fertilizer with planting soil if planting will not proceed within a few days.
b. Mix lime with dry soil before mixing fertilizer.

2. Spread planting soil mix to a depth of 12 inches but not less than required to meet finish grades after natural settlement. Do not spread if planting soil or subgrade is frozen, muddy, or excessively wet.

a. Spread approximately one-half the thickness of planting soil mix over loosened subgrade. Mix thoroughly into top 2 inches of subgrade. Spread remainder of planting soil mix.

B. Finish Grading: Grade planting beds to a smooth, uniform surface plane with loose, uniformly fine texture. Roll and rake, remove ridges, and fill depressions to meet finish grades.

C. Before planting, restore planting beds if eroded or otherwise disturbed after finish grading.

3.4 EXCAVATION FOR TREES AND SHRUBS

A. Pits and Trenches: Excavate circular pits with sides sloped inward. Trim base leaving center area raised slightly to support root ball and assist in drainage. Do not further disturb base. Scarify sides of plant pit smeared or smoothed during excavation.

1. Excavate approximately three times as wide as ball diameter for balled and burlapped stock.

B. Subsoil removed from excavations may not be used as backfill.

C. Obstructions: Notify Architect if unexpected rock or obstructions detrimental to trees or shrubs are encountered in excavations.

1. Hardpan Layer: Drill 6-inch- diameter holes, 24 inches apart, into free-draining strata or to a depth of 10 feet, whichever is less, and backfill with free-draining material.

D. Drainage: Notify Architect if subsoil conditions evidence unexpected water seepage or retention in tree or shrub pits.

E. Fill excavations with water and allow to percolate away before positioning trees and shrubs.

3.5 TREE AND SHRUB PLANTING

A. Before planting, verify that root flare is visible at top of root ball according to ANSI Z60.1.

B. Set balled and burlapped stock plumb and in center of pit or trench with top of root ball flush with adjacent finish grades.

1. Remove burlap and wire baskets from tops of root balls and partially from sides, but do not remove from under root balls. Remove pallets, if any, before setting. Do not use planting stock if root ball is cracked or broken before or during planting operation.
2. Place planting soil mix around root ball in layers, tamping to settle mix and eliminate voids and air pockets. When pit is approximately one-half backfilled, water thoroughly before placing remainder of backfill. Repeat watering until no more water is absorbed. Water again after placing and tamping final layer of planting soil mix.

C. Set container-grown stock plumb and in center of pit or trench with top of root ball flush with adjacent finish grades.

1. Carefully remove root ball from container without damaging root ball or plant.
2. Place planting soil mix around root ball in layers, tamping to settle mix and eliminate voids and air pockets. When pit is approximately one-half backfilled, water thoroughly before placing remainder of backfill. Repeat watering until no more water is absorbed. Water again after placing and tamping final layer of planting soil mix.

D. Organic Mulching: Apply 2-inch minimum thickness of organic mulch extending 12 inches beyond edge of planting pit or trench. Do not place mulch within 3 inches of trunks or stems.

E. Trunk Wrapping: Inspect tree trunks for injury, improper pruning, and insect infestation; take corrective measures required before wrapping. Wrap trees of 2-inch caliper and larger with trunk-wrap tape. Start at base of trunk and spiral cover trunk to height of first branches. Overlap wrap, exposing half the width, and securely attach without causing girdling.

3.6 TREE AND SHRUB PRUNING

A. Remove only dead, dying, or broken branches. Do not prune for shape.

B. Prune, thin, and shape trees and shrubs according to standard horticultural practice. Prune trees to retain required height and spread. Unless otherwise indicated by Architect, do not cut tree leaders; remove only injured or dead branches from flowering trees. Prune shrubs to retain natural character.

3.7 TREE STABILIZATION

A. Trunk Stabilization: Unless otherwise indicated, provide trunk stabilization as follows:

1. Upright Staking and Tying: Stake trees of 2- through 5-inch caliper. Stake trees of less than 2-inch caliper only as required to prevent wind tip-out. Use a minimum of 2 stakes of length required to penetrate at least 18 inches below bottom of backfilled excavation

and to extend dimension shown above grade. Set vertical stakes and space to avoid penetrating root balls or root masses.

2. Use 2 stakes for trees up to 12 feet high and 2-1/2 inches or less in caliper; 3 stakes for trees less than 14 feet high and up to 4 inches in caliper. Space stakes equally around trees.
3. Support trees with bands of flexible ties at contact points with tree trunk. Allow enough slack to avoid rigid restraint of tree.

3.8 PLANTING BED MULCHING

A. Mulch backfilled surfaces of planting beds and other areas indicated. Provide mulch ring around trees in lawn areas.

1. Organic Mulch: Apply 2-inch minimum thickness of organic mulch, and finish level with adjacent finish grades. Do not place mulch against plant stems.

3.9 EDGING INSTALLATION

A. Aluminum Edging: Install aluminum edging where indicated according to manufacturer's written instructions. Anchor with aluminum stakes spaced approximately 36 inches apart, driven below top elevation of edging.

3.10 PLANT MAINTENANCE

A. Tree and Shrub Maintenance: Maintain plantings by pruning, cultivating, watering, weeding, fertilizing, restoring planting saucers, adjusting and repairing stakes and guy supports, and resetting to proper grades or vertical position, as required to establish healthy, viable plantings. Spray or treat as required to keep trees and shrubs free of insects and disease. Restore or replace damaged tree wrappings.

B. Ground Cover and Plant Maintenance: Maintain and establish plantings by watering, weeding, fertilizing, mulching, and other operations as required to establish healthy, viable plantings.

3.11 CLEANUP AND PROTECTION

A. During planting, keep adjacent paving and construction clean and work area in an orderly condition.

B. Protect exterior plants from damage due to landscape operations, operations by other contractors and trades, and others. Maintain protection during installation and maintenance periods. Treat, repair, or replace damaged plantings.

3.12 DISPOSAL

A. Disposal: Remove surplus soil and waste material, including excess subsoil, unsuitable soil, trash, and debris, and legally dispose of them off Owner's property.

END OF SECTION 329300

DIVISION 33

UTILITIES

SECTION 334100 - STORM UTILITY DRAINAGE PIPING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Special Conditions and Division 1 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:

1. Pipe and fittings.
2. Nonpressure transition couplings.
3. Cleanouts.
4. Storm Water Inlets
5. Water Quality Units
6. Pipe outlets.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product indicated.

B. Shop Drawings:

1. Manholes: Include plans, elevations, sections, details, frames, and covers.
2. Terrace drains, stormwater inlets, junction boxes, pipe outlets and cleanouts. Include plans, elevations, sections, details, frames, covers, and grates.

C. Product Certificates: For each type of cast-iron soil pipe and fitting, from manufacturer.

D. Field quality-control reports.

1.4 DELIVERY, STORAGE, AND HANDLING

A. Do not store plastic drainage structures, pipe, and fittings in direct sunlight.

B. Protect pipe, pipe fittings, and seals from dirt and damage.

C. Handle manholes according to manufacturer's written rigging instructions.

D. Handle stormwater inlets according to manufacturer's written rigging instructions.

PART 2 - PRODUCTS

2.1 PE PIPE AND FITTINGS

A. Corrugated PE Drainage Pipe and Fittings NPS 3 to NPS 10: AASHTO M 252M, Type S, with smooth waterway for coupling joints.

1. Silttight Couplings: PE sleeve with ASTM D 1056, Type 2, Class A, Grade 2 gasket material that mates with tube and fittings.

B. Corrugated PE Pipe and Fittings NPS 12 to NPS 60: AASHTO M 294M, Type S, with smooth waterway for coupling joints.

1. Silttight Couplings: PE sleeve with ASTM D 1056, Type 2, Class A, Grade 2 gasket material that mates with pipe and fittings.

2.2 CONCRETE PIPE AND FITTINGS

A. Reinforced-Concrete Sewer Pipe and Fittings: ASTM C 76.

1. Bell-and-spigot or tongue-and-groove ends and gasketed joints with ASTM C 443, rubber gaskets
2. Class III, Wall B.

2.3 NONPRESSURE TRANSITION COUPLINGS

A. Comply with ASTM C 1173, elastomeric, sleeve-type, reducing or transition coupling, for joining underground nonpressure piping. Include ends of same sizes as piping to be joined, and corrosion-resistant-metal tension band and tightening mechanism on each end.

B. Sleeve Materials:

1. For Concrete Pipes: ASTM C 443, rubber.
2. For Cast-Iron Soil Pipes: ASTM C 564, rubber.
3. For Fiberglass Pipes: ASTM F 477, elastomeric seal or ASTM D 5926, PVC.
4. For Plastic Pipes: ASTM F 477, elastomeric seal or ASTM D 5926, PVC.
5. For Dissimilar Pipes: ASTM D 5926, PVC or other material compatible with pipe materials being joined.

C. Shielded, Flexible Couplings:

1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

a. Cascade Waterworks Mfg.
b. Dallas Specialty & Mfg. Co.
c. Mission Rubber Company; a division of MCP Industries, Inc.

2. Description: ASTM C 1460, elastomeric or rubber sleeve with full-length, corrosion-resistant outer shield and corrosion-resistant-metal tension band and tightening mechanism on each end.

2.4 CLEANOUTS

A. Cast-Iron Cleanouts:

1. Manufacturers: Subject to compliance with requirements, provide products by one of the following:

    a. Josam Company.
    b. MIFAB, Inc.
    c. Smith, Jay R. Mfg. Co.
    d. Tyler Pipe.
    e. Watts Water Technologies, Inc.
    f. Zurn Specification Drainage Operation; Zurn Plumbing Products Group.

2. Description: ASME A112.36.2M, round, gray-iron housing with clamping device and round, secured, scoriated, polished bronze cover. Include gray-iron ferrule with inside calk or spigot connection and countersunk, tapered-thread, brass closure plug.
3. Top-Loading Classification(s): Heavy Duty.
4. Sewer Pipe Fitting and Riser to Cleanout: ASTM A 74, Service class, cast-iron soil pipe and fittings.

2.5 MANHOLES

A. Standard Precast Concrete Manholes:

1. Description: ASTM C 478, precast, reinforced concrete, of depth indicated, with provision for sealant joints.
2. Diameter: 48 inches minimum unless otherwise indicated.
3. Base Section: 6-inch minimum thickness for floor slab and 4-inch minimum thickness for walls and base riser section, and separate base slab or base section with integral floor.
4. Riser Sections: 4-inch minimum thickness, and lengths to provide depth indicated.
5. Top Section: Eccentric-cone type unless concentric-cone or flat-slab-top type is indicated, and top of cone of size that matches grade rings.
6. Joint Sealant: ASTM C 990, bitumen or butyl rubber.
7. Resilient Pipe Connectors: ASTM C 923, cast or fitted into manhole walls, for each pipe connection.
8. Steps: Individual FRP steps; FRP ladder; or ASTM A 615/A 615M, deformed, 1/2-inch steel reinforcing rods encased in ASTM D 4101, PP, wide enough to allow worker to place both feet on one step and designed to prevent lateral slippage off step. Cast or anchor steps into sidewalls at 12- to 16-inch intervals. Omit steps if total depth from floor of manhole to finished grade is less than 60 inches.
9. Adjusting Rings: Interlocking HDPE rings with level or sloped edge in thickness and diameter matching manhole frame and cover, and of height required to adjust manhole frame and cover to indicated elevation and slope. Include sealant recommended by ring manufacturer.

10. Grade Rings: Reinforced-concrete rings, 6- to 9-inch total thickness, to match diameter of manhole frame and cover, and height as required to adjust manhole frame and cover to indicated elevation and slope.

B. Manhole Frames and Covers:

1. Description: Ferrous; 24-inch ID by 7- to 9-inch riser with 4-inch- minimum width flange and 26-inch- diameter cover. Include indented top design with lettering cast into cover, using wording equivalent to "STORM SEWER."
2. Material: ASTM A 48/A 48M, Class 35 gray iron unless otherwise indicated.

2.6 CONCRETE

A. General: Cast-in-place concrete according to ACI 318, ACI 350/350R, and the following:

1. Cement: ASTM C 150, Type II.
2. Fine Aggregate: ASTM C 33, sand.
3. Coarse Aggregate: ASTM C 33, crushed gravel.
4. Water: Potable.

B. Portland Cement Design Mix: 4000 psi minimum, with 0.45 maximum water/cementitious materials ratio.

1. Reinforcing Fabric: ASTM A 185/A 185M, steel, welded wire fabric, plain.
2. Reinforcing Bars: ASTM A 615/A 615M, Grade 60 (420 MPa) deformed steel.

2.7 STORMWATER INLETS

A. Catch Basin: Precast or cast-in-place basin and heavy duty grate and frame, size as indicated. Round frame and grate unless otherwise indicated on plans.

B. Yard Inlet: Nyloplast “Drain Basin”, size as indicated with heavy duty cast iron grate and frame or approved similar product.

C. Curb Inlet: KYTC “Type F” inlet per KYTC standard drawings & specifications.

D. Slot drains: as indicated on Drawings.

2.8 WATER QUALITY UNITS

A. Self contained vortex separation unit from one of the following manufacturers: Hydro-International, Contech, Hancor.

B. Induced vortex to system used to separate pollutants from stormwater that removes greater than 90% of TSS based on TPS of 106 microns and / or 80% of TSS based on the TPS of 230 microns at .3 cfs and .53cfs.

C. Treatment system shall convey peak flow up to 15cfs without causing upstream surcharge.

D. Refer to Drawings for additional requirements, install per Manufacturer’s written instructions.

2.9 PIPE OUTLETS

A. Head Walls: KYDOH Sloped and Flared, size as indicated with precast or cast-in-place basin conforming with KYDOH Standard Drawing or RDH-020-03 with energy dissipators.

B. Class II Channel Lining at outlets, dimensions as indicated on drawings.

PART 3 - EXECUTION

3.1 EARTHWORK

A. Excavation, trenching, and backfilling are specified in Division 2 Section "Earthwork."

3.2 PIPING INSTALLATION

A. General Locations and Arrangements: Drawing plans and details indicate general location and arrangement of underground storm drainage piping. Location and arrangement of piping layout take into account design considerations. Install piping as indicated, to extent practical. Where specific installation is not indicated, follow piping manufacturer's written instructions.

B. Install piping beginning at low point, true to grades and alignment indicated with unbroken continuity of invert. Place bell ends of piping facing upstream. Install gaskets, seals, sleeves, and couplings according to manufacturer's written instructions for use of lubricants, cements, and other installation requirements.

C. Install manholes for changes in direction unless fittings are indicated. Use fittings for branch connections unless direct tap into existing sewer is indicated.

D. Install proper size increasers, reducers, and couplings where different sizes or materials of pipes and fittings are connected. Reducing size of piping in direction of flow is prohibited.

E. When installing pipe under streets or other obstructions that cannot be disturbed, use pipe-jacking process of microtunneling.

F. Install gravity-flow, nonpressure drainage piping according to the following:

1. Install piping pitched down in direction of flow.
2. Install piping with minimum cover as indicated.
3. Install PE corrugated sewer piping according to ASTM D 2321.
4. Install reinforced-concrete sewer piping according to ASTM C 1479 and ACPA's "Concrete Pipe Installation Manual."

3.3 PIPE JOINT CONSTRUCTION

A. Join gravity-flow, nonpressure drainage piping according to the following:

1. Join corrugated PE piping according to ASTM D 3212 for push-on joints.
2. Join reinforced-concrete sewer piping according to ACPA's "Concrete Pipe Installation Manual" for rubber-gasketed joints.
3. Join dissimilar pipe materials with nonpressure-type flexible couplings.

3.4 CLEANOUT INSTALLATION

A. Install cleanouts and riser extensions from sewer pipes to cleanouts at grade. Use cast-iron soil pipe fittings in sewer pipes at branches for cleanouts and cast-iron soil pipe for riser extensions to cleanouts. Install piping so cleanouts open in direction of flow in sewer pipe.

1. Use Heavy-Duty, top-loading classification cleanouts in all areas.

B. Set cleanout frames and covers in earth in cast-in-place concrete block, 12 by 12 by 12 inches deep. Set with tops 1 inch above surrounding earth grade.

C. Set cleanout frames and covers in concrete pavement and roads with tops flush with pavement surface.

3.5 DRAIN INSTALLATION

A. Install type of drains in locations indicated.

1. Use Heavy-Duty, top-loading classification drains in all areas.

B. Embed drains in 4-inch minimum concrete around bottom and sides.

C. Fasten grates to drains if indicated.

D. Set drain frames and covers with tops flush with pavement surface.

3.6 MANHOLE INSTALLATION

A. General: Install manholes, complete with appurtenances and accessories indicated.

B. Install precast concrete manhole sections with sealants according to ASTM C 891.

C. Where specific manhole construction is not indicated, follow manhole manufacturer's written instructions.

D. Set tops of frames and covers flush with finished surface of manholes that occur in pavements. Set tops 1 inch above finished surface elsewhere unless otherwise indicated.

3.7 CATCH BASIN INSTALLATION

A. Construct catch basins to sizes and shapes indicated.

B. Set frames and grates to elevations indicated.

3.8 STORMWATER INLET AND OUTLET INSTALLATION

A. Construct inlets, head walls, aprons, and sides of reinforced concrete, as indicated.

B. Set frames and grates to elevations indicated.

C. Place turf reinforcement mat as indicated.

D. Install outlets that spill onto grade, with flared end sections that match pipe, where indicated.

3.9 CONCRETE PLACEMENT

A. Place cast-in-place concrete according to ACI 318.

3.10 IDENTIFICATION

A. Materials and their installation are specified in Division 2 Section "Earthwork." Arrange for installation of green warning tape directly over piping and at outside edge of underground structures.

1. Use detectable warning tape over nonferrous piping and over edges of underground structures.

3.11 FIELD QUALITY CONTROL

A. Inspect interior of piping to determine whether line displacement or other damage has occurred. Inspect after approximately 24 inches of backfill is in place, and again at completion of Project.

1. Submit separate reports for each system inspection.
2. Defects requiring correction include the following:

    a. Alignment: Less than full diameter of inside of pipe is visible between structures.
    b. Deflection: Flexible piping with deflection that prevents passage of ball or cylinder of size not less than 92.5 percent of piping diameter.
    c. Damage: Crushed, broken, cracked, or otherwise damaged piping.
    d. Infiltration: Water leakage into piping.
    e. Exfiltration: Water leakage from or around piping.

3. Replace defective piping using new materials, and repeat inspections until defects are within allowances specified.
4. Reinspect and repeat procedure until results are satisfactory.

B. Test new piping systems, and parts of existing systems that have been altered, extended, or repaired, for leaks and defects.

1. Do not enclose, cover, or put into service before inspection and approval.
2. Test completed piping systems according to requirements of authorities having jurisdiction.
3. Schedule tests and inspections by authorities having jurisdiction with at least 24 hours' advance notice.
4. Submit separate report for each test.
5. Gravity-Flow Storm Drainage Piping: Test according to requirements of authorities having jurisdiction, UNI-B-6, and the following:

    a. Exception: Piping with soiltight joints unless required by authorities having jurisdiction.
    b. Option: Test plastic piping according to ASTM F 1417.
    c. Option: Test concrete piping according to ASTM C 924.

C. Leaks and loss in test pressure constitute defects that must be repaired.

D. Replace leaking piping using new materials, and repeat testing until leakage is within allowances specified.

3.12 CLEANING

A. Clean interior of piping of dirt and superfluous materials. Flush with water.

BUILDING SUMMARY

PROJECT INFORMATION

PROJECT NAME: LFUCG DWQ HEADQUARTERS & OPERATIONS FACILITY
ADDRESS: 130 WEST NEW CIRCLE ROAD, LEXINGTON KY 40505
USE GROUP: B, F-1, S-1, S-2
OWNER-CONTACT PERSON: RICHARD DUGAS

APPLICABLE CODES

2018 - KENTUCKY BUILDING CODE (BASED ON THE 2015 INTERNATIONAL BUILDING CODE)

2015 - INTERNATIONAL MECHANICAL CODE

2012 - NFPA 54 NATIONAL FUEL GAS CODE

2009 - ICC/ANSI A117.1 - ACCESSIBLE AND USABLE BUILDINGS AND FACILITIES

2012 - NFPA 1 FIRE PREVENTION CODE (AS DIRECTED BY 815 KAR 10:60 KENTUCKY STANDARDS OF SAFETY)

2012 - INTERNATIONAL ENERGY CONSERVATION CODE - (FOR USE WITH THE KBC ONLY)

2009 - INTERNATIONAL ENERGY CONSERVATION CODE - (FOR USE WITH THE KRC ONLY)

2013 - KENTUCKY RESIDENTIAL CODE (BASED ON THE 2012 INTERNATIONAL RESIDENTIAL CODE)

0000 - KENTUCKY STATE PLUMBING LAW, REGULATIONS & CODE (815 KAR CHAPTER 20)

0000 - STATE BOILER REGULATIONS (KRS 236, 815 KAR 15)

2017 - NFPA 70 NATIONAL ELECTRICAL CODE

2015 - INTERNATIONAL FIRE CODE (IFC) (NEW CONSTRUCTION PROJECTS, ONLY BY THE BODY OF KBC.)

2012 - NFPA 101 LIFE SAFETY CODE (HEALTH CARE FACILITIES)

2006 - INTERNATIONAL FIRE CODE FOR PORTABLE EXTINGUISHERS (SECTION 906)

2013 - NFPA 13 INSTALLATION OF SPRINKLER SYSTEMS

2013 - NFPA 13D INSTALLATION OF SPRINKLER SYSTEMS - ONE/TWO FAMILY DWELLING

2013 - NFPA 13R INSTALLATION OF SPRINKLER SYSTEMS IN RESIDENTIAL OCCUPANCIES UP TO FOUR STORIES

2013 - NFPA 14 INSTALLATION OF STANDPIPE, HOSE SYSTEMS

2013 - NFPA 72 NATIONAL FIRE ALARM AND SIGNALING CODE

2007 - STRUCTURAL ENGINEERS ASSOCIATION OF KENTUCKY - SPECIAL INSPECTION GUIDELINES, THIRD EDITION

BUILDING PLANNING

OCCUPANCY: B, F-1, S-1

MIXED OCCUPANCY YES

REQUIRED FIRE SEPARATION: NO

TYPE OF CONSTRUCTION

CONSTRUCTION TYPE: 2B

ESSENTIAL FACILITY (CHAPTER 16, IBC)

ESSENTIAL FACILITY NO (TABLE 1604.5 RISK CATEGORY 2)

GENERAL BUILDING LIMITATIONS

- HEIGHT OF BUILDING: ALLOWED 75FT > ACTUAL 20'-0"FT (TABLE 503 2015 IBC)
- NUMBER OF STORIES: 1 STORY ACTUAL (3 STORY PER TABLE 503 2015 IBC)
- MAXIMUM SINGLE FLOOR AREA: 46,500SQFT. (PER TABLE 503 2015 IBC)
- TOTAL AREA OF BUILDING: 67,820 SQFT.
- PENTHOUSE AND ROOF STRUCTURE: NONE
- HIGH RISE: NO
- PARKING SPACES PROVIDED: SEE CIVIL PLANS
- PARKING SPACES REQUIRED: SEE CIVIL PLANS
- ACCESSIBLE PARKING SPACES PROVIDED: SEE CIVIL PLANS

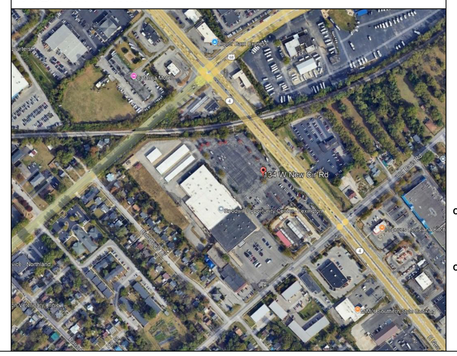
FIRE PROTECTION SYSTEMS

- FIRE EXTINGUISHING SYSTEM: YES
- STANDPIPE SYSTEM: NO TYPE
- SMOKE CONTROL: NO CLASS

FIRE-RESISTANCE RATING REQUIREMENTS FOR BUILDING ELEMENTS (HOURS)

BUILDING ELEMENT	REQ'D RATING / HR	UL/FM # WHERE APPLICABLE
PRIMARY STRUCTURAL FRAME	0 / HR	N/A
BEARING WALLS		
EXTERIOR	0 / HR	N/A
INTERIOR	0 / HR	N/A
NONBEARING WALLS AND PARTITIONS		
EXTERIOR 10' > SEPARATION DISTANCE	1/ HR	N/A
NONBEARING WALLS AND PARTITIONS		
INTERIOR	0 / HR	N/A
FLOOR CONSTRUCTION	0 / HR	N/A
ROOF CONSTRUCTION	0 / HR	N/A

VICINITY MAP



BUILDING CODE REVIEW - 2018 KBC

CHAPTER 3: USE AND OCCUPANCY CLASSIFICATION:

1. BUSINESS GROUP B (SECTION 304.1)
2. MODERATE-HAZARD FACTORY INDUSTRIAL, GROUP F-1 (SECTION 306.2)
3. MODERATE-HAZARD STORAGE, GROUP S-1 (SECTION 311.2)

CHAPTER 4: SPECIAL DETAILED REQUIREMENTS BASED ON USE AND OCCUPANCY:

1. ATRIUMS (SECTION 404.2)
2. MOTOR-VEHICLE-RELATED OCCUPANCIES (SECTION 406.8)

CHAPTER 5: GENERAL BUILDING HEIGHTS AND AREAS:

1. ASSEMBLY GROUP B (TYPE 2B CONSTRUCTION) HEIGHT 4 STORIES (75' H) @ 69,000 SQFT PER STORY. (SECTION 503, 504, 506)
2. ASSEMBLY GROUP F-1 (TYPE 2B CONSTRUCTION) HEIGHT 3 STORIES (75' H) @ 46,500 SQFT PER STORY. (SECTION 503, 504, 506)
3. ASSEMBLY GROUP S-1 (TYPE 2B CONSTRUCTION) HEIGHT 3 STORIES (75' H) @ 52,500 SQFT PER STORY. (SECTION 503, 504, 506)
4. SEPARATED OCCUPANCIES (TABLE 508.4) B, F-1, S-1 NO SEPARATION IS REQUIRED.
5. BUILDING AREA MODIFICATIONS: (SECTION 506.3)
   - A. If = [867/1093 - 0.25] 30/30 = .54
   - B. Aa = 46,500 sqft + [46,500sqft x .54] = 71,610 sqft > 70,431 sqft ACTUAL. (AREA IS UNDER ALLOWED.)
6. UNLIMITED AREA BUILDINGS: (SECTION 507.5 GROUP B, F-1, S-1 BUILDINGS OF TYPE 2 CONSTRUCTION)
   - A. BUILDING AREA NOT LIMITED WHERE EQUIPPED THROUGHOUT WITH AUTOMATIC SPRINKLER SYSTEM AND IS SURROUNDED AND ADJOINED BY PUBLIC WAYS OR YARDS NOT LESS THAN 60 FEET IN WIDTH. ACTUAL LESS THAN 60'
7. MIXED USE AND OCCUPANCY: (SECTION 508.3)
   - A. NONSEPARATED OCCUPANCIES:
   - B. 508.3.2 ALLOWABLE BUILDING AREA AND HEIGHT OF THE BUILDING BASED ON MOST RESTRICTIVE.
   - C. TABLE 508.4 REQUIRED SEPARATION OF OCCUPANCIES: OCCUPANCIES B, F-1, AND S-1 ARE NOT REQUIRED TO BE SEPARATED.
8. INCIDENTAL USES (SECTION 509)
   - A. N/A
9. SPECIAL PROVISIONS (SECTION 510)
   - A. N/A

CHAPTER 6: TYPES OF CONSTRUCTION:

1. CONSTRUCTION CLASSIFICATION:
   - A. TYPE 2B
2. SEE FIRE-RESISTANCE RATING REQUIREMENTS FOR BUILDING ELEMENTS HOURS (TABLE 601)
   - A. SEE TABLE THIS SHEET.
3. FIRE-RESISTANCE RATING REQUIREMENTS FOR EXTERIOR WALLS BASED ON FIRE SEPARATION DISTANCE
   - A. FIRE SEPARATION DISTANCE = 10 < x <30
   - B. TYPES OF CONSTRUCTION = 2B
   - C. OCCUPANCY GROUP = B, F-1, S-1
   - D. FIRE RATING REQUIRED = 1HR

CHAPTER 7: FIRE AND SMOKE PROTECTION FEATURES:

1. SHAFT ENCLOSURES:
   - A. 1 HOUR WHERE CONNECTING FOUR STORIES OR LESS. (713.4)
   - B. SHAFT ENCLOSURES SHALL BE CONSTRUCTED AS FIRE BARRIERS PER SECTION 707.

CHAPTER 8: INTERIOR FINISHES:

1. INTERIOR WALL AND FINISH MATERIAL (803.1.1)
   - A. CLASS C: – FLAME SPREAD INDEX 76-200; SMOKE DEVELOPMENT INDEX 0-450
2. INTERIOR WALL AND FINISH REQUIREMENTS BY OCCUPANCY: (TABLE 803.11 SPRINKLERED)
   - A. GROUP B = CLASS C
   - B. GROUP F = CLASS C
   - C. GROUP S = CLASS C
3. ACOUSTICAL CEILING SYSTEMS (808)
   - A. SUSPENDED ACOUSTICAL CEILINGS SHALL BE INSTALLED IN ACCORDANCE WITH PROVISIONS OF ASTM C 635 AND ASTM C 636.

CHAPTER 9: FIRE PROTECTION SYSTEMS:

1. AUTOMATIC SPRINKLER SYSTEMS: (SECTION 903)
   - A. GROUP F-1 (SECTION 903.2.4)
     - a. THE FIRE AREA EXCEEDS 12,000 SQUARE FEET > 3,180 ACTUAL.
     - b. THE COMBINED AREA OF F-1EXCEEDS 24,000 SQFT. > 3,180 SQFT.
   - B. GROUP F-1 WOODWORKING OPERATIONS: (903.2.4.1)
     - a. FIRE AREA EXCEEDS 2,500 SQFT. < 3,180 SQFT.
   - C. GROUP S-1 (SECTION 903.2.9)
     - a. THE FIRE AREA EXCEEDS 24,000 SQFT > 18,240 SQFT.
     - b. STORAGE OF COMMERCIAL MOTOR VEHICLES EXCEEDS 5,000 SQFT. < 18,240 SQFT
   - D. PORTABLE FIRE EXTINGUISHERS (SECTION 906)
     - a. PORTABLE FIRE EXTINGUISHERS SHALL BE INSTALLED IN GROUP B,F,S (SECTION 906.1)
     - b. INSTALL FIRE EXTINGUISHERS PER NFPA 10.
     - c. MIN. NUMBER OF EXTINGUISHERS = 67,873 / 3000 = 22.62 < ACTUAL 23
     - d. MAX. DISTANCE TO TRAVEL TO EXTINGUISHER = 75 FEET.
   - E. FIRE ALARM DETECTION SYSTEMS (907.2.2 GROUP B)
     - a. THE COMBINED GROUP B OCCUPANT LOAD EXCEEDS 500 < 493
     - b. THE COMBINED GROUP F OCCUPANT LOAD EXCEEDS 500 < 11

CHAPTER 10: MEANS OF EGRESS:

1. OCCUPANT LOAD (SECTION 1004)
   - A. TABLE 1004.1.2 MAXIMUM FLOOR AREA ALLOWANCE PER OCCUPANT.
     - a. BUSINESS AREAS 100 SQFT
     - b. INDUSTRIAL AREAS 100 SQFT
     - c. WAREHOUSE AREA 500 SQFT
     - d. STORAGE AREA 300 SQFT.
     - e. SEE PROGRAM SCHEDULE FOR OCCUPANCY LOADS
2. GUARDS (SECTION 1015)
   - A. GUARDS SHALL BE LOCATED ALONG OPEN SIDED WALKING SURFACES, INCLUDING MEZZANINES, EQUIPMENT PLATFORMS, STAIRS, RAMPS AND LANDINGS THAT ARE LOCATED MORE THAN 30 INCHES MEASURED VERTICALLY TO THE FLOOR OR GRADE BELOW WITHIN 36 INCHES HORIZONTALLY TO THE EDGE OF THE OPEN SIDE.
   - B. HEIGHT: 42"
   - C. OPENING LIMITATIONS: 21" AT AREAS NOT OPEN TO THE PUBLIC IN F AND S USE GROUP.
3. COMMON PATH OF EGRESS TRAVEL (SECTION 1014.3)
   - A. GROUP A-3: OCCUPANT LOAD GREATER THAN 30 WITHOUT SPRINKLER SYSTEM = 75 FEET.
4. EXIT ACCESS TRAVEL DISTANCE (SECTION 1017.2)
   - A. GROUP B = 300 FEET MAXIMUM WITH SPRINKLER SYSTEM.
   - B. GROUP F-1 AND S-1 = 250 FEET MAXIMUM WITH SPRINKLER SYSTEM.
5. CORRIDOR FIRE RESISTANCE RATING (1020.1)
   - A. GROUP B,F,S, WITH SPRINKLER SYSTEM REQUIRED RATED CORRIDOR = 0 HOURS.
   - B. MINIMUM CORRIDOR WIDTH 44 INCHES (1020.2)

CHAPTER 12: INTERIOR ENVIRONMENT:

1. LIGHTING (SECTION 1205.2)
   - A. THE MINIMUM NET GLAZED AREA SHALL BE NOT LESS THAN 8 PERCENT OF THE FLOOR AREA OF THE ROOM SERVED.
     - a. 67,873sqft x .08 = 5,430 sqft < 5,182 sqft.
2. TOILET AND BATHROOM REQUIREMENTS (SECTION 1210)
   - A. FLOORS AND WALL BASES (1210.2.1)
     - a. TOILET, BATHING, AND SHOWERS FLOOR FINISH AND 4" MIN. BASE MATERIAL SHALL HAVE A SMOOTH, HARD, NONABSORBENT SURFACE
     - b. WALLS AND PARTITIONS WITHIN 2 FEET OF SERVICE SINK, URINALS, AND WATER CLOSETS SHALL HAVE A SMOOTH, HARD NONABSORBENT SURFACE TO A HEIGHT OF NOT LESS THAN 4 FEET ABOVE THE FLOOR.
   - B. THE NUMBER AND TYPE OF PLUMBING FIXTURES PROVIDED IN ANY OCCUPANCY SHALL COMPLY WITH CHAPTER 29.
   - C. PLUMBING SYSTEMS (TABLE 2902.1)

a.	GROUP B = 2 FOR 50 + 1/50 OVER 50 (250 MALES)	6 MALE WC REQUIRED.
b.	GROUP B = 2 FOR 50 + 1/50 OVER 50 (250 FEMALES)	6 FEMALE WC REQUIRED.
c.	GROUP S = 1 PER 100 (50 MALES)	1 MALE WC REQUIRED.
d.	GROUP S = 1 PER 100 (50 FEMALES)	1 FEMALE WC REQUIRED
e.	GROUP B = 2 FOR 80 + 1/80 OVER 80 (250 MALES)	5 MALE LAVATORIES
f.	GROUP B = 2 FOR 80 + 1/80 OVER 80 (250 FEMALES)	5 FEMALE LAVATORIES
g.	GROUP S = 1 PER 100 (50 MALES)	1 MALE LAVATORIES.
h.	GROUP S = 1 PER 100 (50 FEMALES)	1 FEMALE LAVATORIES
i.	GROUP F = 2 FOR 51 TO 100 + 1 FOR 100 (250 MALES)	3 URINALS
j.	GROUP B = 1 DRINKING FOUNTAIN PER 100 (500)	5 ADA DRINKING FOUNTAIN.
k.	GROUP S = 1 DRINKING FOUNTAIN PER 1000 (500)	1 ADA DRINKING FOUNTAIN.
l.	GROUP B = TWO SERVICE SINK REQUIRED.	

CHAPTER 13: ENERGY EFFICIENCY

1. GENERAL (SECTION 1301)
   - A. BUILDINGS SHALL BE DESIGNED AND CONSTRUCTED IN ACCORDANCE WITH THE INTERNATIONAL ENERGY CONSERVATION CODE.

CHAPTER 16: STRUCTURAL DESIGN:

1. RISK CATEGORY OF BUILDINGS AND OTHER STRUCTURES (TABLE 1604.5.1)
   - A. RISK CATEGORY 2.

GENERAL NOTES:

A. THE EXISTING TOPOGRAPHIC AND SITE INFORMATION SHOWN IS FROM A SURVEY PROVIDED BY ENDRIS ENGINEERING. THIS INFORMATION IS PROVIDED FOR THE CONVENIENCE OF THE CONTRACTOR. THE ARCHITECT SHALL NOT BE RESPONSIBLE FOR THE ACCURACY OF THE INFORMATION SHOWN THEREON. CONTRACTOR TO VERIFY ALL INFORMATION SHOWN.CONTRACTOR TO VERIFY ALL INFORMATION SHOWN.

B. THE DRAWINGS SHOW THE APPROXIMATE LOCATION OF EXISTING AND PROPOSED UTILITY LINES. THESE LINES HAVE BEEN IDENTIFIED AND LOCATED AS ACCURATELY AS POSSIBLE USING AVAILABLE INFORMATION; THE CONTRACTOR IS RESPONSIBLE FOR VERIFYING ALL ACTUAL LOCATIONS.

C. PROTECT EXISTING TREES FROM POTENTIAL DAMAGE OF CONSTRUCTION OPERATIONS. STEEPEN GRADES UPHILL FROM EXISTING TREES TO A MAX. OF 2:1 TO AVOID FILLING SOILS ONTO TRUNKS.

D. UNLESS OTHERWISE INDICATED TO BE REMOVED, ALL ITEMS REMAINING WITHIN THE LIMIT OF CONTRACT ARE TO REMAIN AND BE PROTECTED FROM DAMAGE DURING CONSTRUCTION.

E. THE CONTRACTOR SHALL MAINTAIN STORM DRAINAGE SYSTEMS TO FUNCTION THROUGHOUT THE CONSTRUCTION PERIOD.

F. PROPOSED GRADES SHOWN ARE FINISHED GRADES. ELEVATIONS SHOWN AT CURBS ARE BOTTOM OF CURB UNLESS NOTED TC.

G. LIMIT OF GRADING EXTENTS TO INCLUDE ALL AREAS DISTURBED BY ALL SITE UTILITY WORK, REFER TO SITE UTILITY DRAWINGS FOR LOCATIONS OF PROPOSED SITE UTILITIES.

H. REFER TO SPECIFICATION / PROJECT MANUAL FOR ADDITIONAL REQUIREMENTS.

I. ADJUST RIM ELEVATIONS OF ALL EXISTING STRUCTURES TO MATCH PROPOSED FINISHED GRADES.

J. GRADE ALL NEW PAVEMENTS TO DRAIN. GRADE ALL NEW WALKS AT MAX. 2% CROSS SLOPE. GRADE ALL NEW WALKS TO MAX. 5% LONGITUDINAL SLOPE UNLESS OTHERWISE SPECIFICALLY INDICATED ON PLANS TO BE A RAMP.

CIVIL UTILITY LEGEND

- W — PROPOSED POTABLE WATER LINE
- PROPOSED FIRE PROTECTION SERVICE LINE
- STRM — PROPOSED STORM LINE- SEE L-300 FOR REQUIREMENTS
- PROPOSED WATER LINE VALVE
- FLUSHING HYDRANT
- S — MANHOLE

CIVIL UTILITY NOTES (1)

1. CONTRACTOR TO LOCATE EXISTING METER AND SERVICE LINE. CONNECT PROPOSED 2" WATER LINE TO EXISTING SERVICE LINE BETWEEN METER AND BUILDING
2. 2" PVC SDR-17 WATERLINE. REFER TO DETAIL A/C200. MAINTAIN 10 FEET SEPARATION FROM FORCE MAIN.
3. INSTALL FLUSH HYDRANT. REFER TO DETAIL D/C200.
4. PROPOSED WATER LINE VALVE. REFER TO DETAIL B/C200.
5. CONNECT FORCE MAIN TO THE BUILDING LIFT STATION. REFER TO MEP PLANS.
6. 2" HDPE FORCE MAIN. MAINTAIN 10 FEET SEPARATION FROM WATER LINE.
7. INSTALL MANHOLE TO ALLOW FOR FORCE MAIN TRANSITION TO GRAVITY FLOW. REFER TO DETAIL E/C200
8. INSTALL MANHOLE AT CONNECTION POINT TO EXISTING 8" SANITARY SEWER. FIELD VERIFY INVERT ELEVATION AT CONNECTION POINT PRIOR TO PURCHASING MANHOLE MATERIALS. PROVIDE ENGINEER WITH FIELD VERIFIED ELEVATIONS, REFER TO DETAIL E/C200.
9. FIELD VERIFY EXISTING UTILITY ELEVATIONS AND ADJUST PROPOSED UTILITY TO AVOID CONFLICT.
10. TAP EXISTING GAS LINE AND EXTEND 1" MDPE GAS LINE TO BUILDING POINT OF CONNECTION. REFER TO MEP PLANS FOR CONTINUATION.

THRUST BLOCK SCHEDULE

TYPICAL THRUST BLOCKING DETAIL

N.T.S.

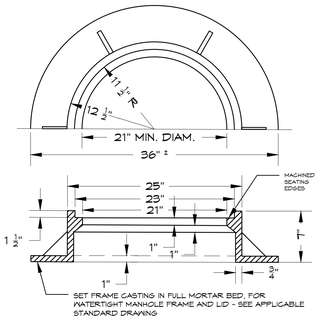
C

NOTES:
1. ALL BARREL JOINTS BETWEEN BASE AND BARREL, BETWEEN BARREL AND TOP, BETWEEN TOP AND ADJUSTING RINGS, BETWEEN ADJUSTING RINGS AND FRAME SHALL HAVE ONE OUTER MASTIC SEAL AND AN INNER SEAL OF NONSHRINK GROUT.
2. COAT OUTSIDE OF ADJUSTING RINGS WITH SEMIFIBRATED ASPHALT DAMPROOFING COMPOUND APPLIED BY BRUSH OR SPRAY.
3. WATER STOPS SHOULD BE PROVIDED FOR INLETS AND OUTLETS OF EVERY MANHOLE, DESIGNED FOR TYPE OF PIPE USED AND WITH EXPANSIVE GROUT. SEE STD DWG 213 FOR WATER STOP DETAIL.
4. NO REINFORCEMENT NEEDED IN BOTTOM SLAB AT DEPTHS UP TO 12'. AT DEPTHS GREATER THAN 12' REINFORCE WITH NO. 4 BARS - 12" C-C.
5. A DIFFERENCE OF FLOW ELEVATION MORE THAN 24" REQUIRES AND OUTSIDE DROP. (SEE STD. DWG. 212)
6. MANHOLE STEPS SHALL BE ALIGNED WITH STRAIGHT SIDE OF CONCENTRIC CONE SECTION, AND ALIGNED OVER THE OUTLET PIPE.
7. PIPES SHALL NOT ENTER THE CONE SECTION.
8. MANHOLES MUST PASS VACUUM TEST PER ASTM C-1244 PRIOR TO ACCEPTANCE.
9. NO NEW SANITARY MANHOLES ARE ANTICIPATED IN THIS PROJECT. DETAILS ARE SHOWN FOR REFERENCE SHOULD REVISIONS BE REQUIRED.

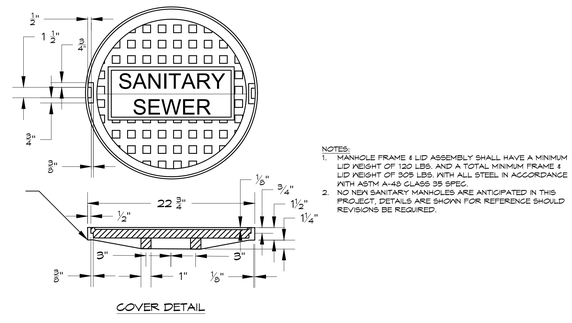
SANITARY SEWER MANHOLE FOR PIPES UP TO 24"

N.T.S.

E



FRAME DETAIL



COVER DETAIL

NOTES:
1. MANHOLE FRAME & LID ASSEMBLY SHALL HAVE A MINIMUM LID WEIGHT OF 120 LBS. AND A TOTAL MINIMUM FRAME & LID WEIGHT OF 305 LBS. WITH ALL STEEL IN ACCORDANCE WITH ASTM A-48 CLASS 35 SPEC.
2. NO NEW SANITARY MANHOLES ARE ANTICIPATED IN THIS PROJECT. DETAILS ARE SHOWN FOR REFERENCE SHOULD REVISIONS BE REQUIRED.

EPSC NOTES

A. THE EXISTING TOPOGRAPHIC AND SITE INFORMATION SHOWN HAS BEEN PROVIDED BY A SURVEY BY ENDRIS ENGINEERING. THIS INFORMATION IS PROVIDED FOR THE CONVENIENCE OF THE CONTRACTOR. THE ARCHITECT SHALL NOT BE RESPONSIBLE FOR THE ACCURACY OF THE INFORMATION SHOWN THEREON. CONTRACTOR TO VERIFY ALL INFORMATION SHOWN. THE CONTRACTOR SHALL VERIFY THE LOCATION OF AND PROTECT ALL UTILITIES PRIOR TO THE COMMENCEMENT OF DIGGING. NOTIFY THE LANDSCAPE ARCHITECT OF ANY CONFLICTS.

B. THE CONTRACT DRAWINGS SHOW THE APPROXIMATE LOCATION OF EXISTING AND PROPOSED UTILITY LINES. THESE LINES HAVE BEEN IDENTIFIED AND LOCATED AS ACCURATELY AS POSSIBLE USING AVAILABLE INFORMATION. THE CONTRACTOR IS RESPONSIBLE FOR VERIFYING ALL ACTUAL UTILITY LOCATIONS.

C. THE DESIGNATED CONCRETE WASH OUT PIT SHALL BE CLEANED AND ALL CONCRETE AND ASSOCIATED DEBRIS SHALL BE REMOVED AND HAULED OFF SITE AT THE CONCLUSION OF ALL CONCRETE CONSTRUCTION WORK.

D. LIMIT CONSTRUCTION ACCESS TO THE SITE TO THE LOCATION INDICATED AS AN ACCESS DRIVEWAY. TEMPORARY ACCESS DRIVEWAYS FOR CONSTRUCTION VEHICLES SHALL BE GRAVELED A MINIMUM OF 6" DEPTH WITH FILTER FABRIC PLACED BETWEEN SOIL AND STONE FOR A DISTANCE OF 100 FEET INTO THE SITE AND MAINTAINED IN GOOD CONDITION THROUGHOUT THE CONSTRUCTION PERIOD. THE ACCESS DRIVE TO THE SITE SHALL BE MAINTAINED BY THE CONTRACTOR TO MINIMIZE THE ACCUMULATION OF MUD, DIRT, DUST AND OTHER DEBRIS CAUSED BY THE CONTRACTOR'S OPERATIONS. THE DRIVE AND ROAD SHALL BE CHECKED DAILY AND CLEANED BY THE CONTRACTOR AS REQUIRED TO MAINTAIN THIS CONDITION THROUGHOUT THE CONSTRUCTION PERIOD.

E. PRIOR TO BEGINNING GRADING OPERATIONS, SURROUND ALL DRAINAGE INLET STRUCTURES WITH ROCK BAGS, STONE, OR TEMPORARY SILT FENCE FOR SILT CONTROL, SEE DETAIL A & B/L1000 AND PROVIDE CHECK DAMS AT ALL DRAINAGE SWALES. MAINTAIN IN GOOD OPERATING CONDITION THROUGHOUT THE CONSTRUCTION PERIOD. REMOVE AFTER SURROUNDING PERMANENT VEGETATION IS ESTABLISHED OR SURROUNDING PAVEMENT IS INSTALLED. THE CONTRACTOR SHALL MAINTAIN ALL STORM DRAINAGE SYSTEMS TO FUNCTION THROUGHOUT THE CONSTRUCTION PERIOD.

F. SILT FENCING SHALL BE INSTALLED PRIOR TO THE BEGINNING OF GRADING OPERATIONS AND MAINTAINED THROUGHOUT THE CONSTRUCTION PERIOD UNTIL PERMANENT VEGETATION IS ESTABLISHED, SEE DETAIL A/L000. REFER TO PLAN FOR APPROXIMATE LOCATIONS. MAINTENANCE INCLUDES INSPECTION ONCE PER WEEK, IMMEDIATELY AFTER EACH RAINFALL OF 1/2" OR MORE, AND AT LEAST DAILY DURING PROLONGED PERIODS OF RAIN. REPAIR ANY UNDERCUTTING OR END RUNS. REPLACE DAMAGED FABRIC SECTIONS PROMPTLY. REMOVE SEDIMENT DEPOSITS WHEN DEPOSITS REACH APPROXIMATELY 1/2 THE HEIGHT OF THE BARRIER. UPON FINAL REMOVAL OF BARRIER, GRADE OUT ANY DEPOSITS TO CONFORM TO EXISTING SURROUNDING GRADE, AND SOD THE AREA.

G. TO REDUCE EROSION, MUD AND DUST FROM EXPOSED SOIL AREAS, TEMPORARY SEEDING SHALL BE DONE ON EXPOSED SOIL SURFACES IN LAWN AND LANDSCAPE AREAS WHERE ADDITIONAL GRADING WORK IS NOT SCHEDULED FOR A PERIOD OF 14 DAYS OR MORE. MAINTAIN AND RE-SEED AS NEEDED THROUGHOUT CONSTRUCTION PERIOD UNTIL FINISH GRADES ARE ESTABLISHED.

H. STOCKPILED TOPSOIL SHALL BE PROTECTED FROM WIND AND WATER EROSION BY TEMPORARY VEGETATIVE SEEDING. IN ADDITION, PROVIDE SILT FENCING AT THE PERIMETER OF STOCKPILES TO PREVENT SEDIMENT RUNOFF. MAINTAIN VEGETATIVE COVER AND SILT FENCING UNTIL TOPSOIL STOCKPILES ARE REMOVED.

I. THE CONTRACTOR SHALL OBTAIN A STORM WATER PERMIT / SUBMITTING A NOTICE OF INTENT (NOI) TO THE KENTUCKY DIVISION OF WATER AND ANY APPLICABLE PERMITS FROM STATE AND LOCAL GOVERNING AGENCIES. IN ADDITION, THE CONTRACTOR SHALL PROVIDE ALL CONSTRUCTION AND MAINTENANCE SHOWN ON THIS PLAN AS PART OF THE CONTRACT SCOPE OF WORK.

J. THE CONTRACTOR IS RESPONSIBLE FOR KEEPING AN ON SITE MAINTENANCE LOG OF ALL EROSION CONTROL FEATURES AND BMP'S. DURING THE ENTIRE CONSTRUCTION PERIOD, THE CONTRACTOR'S SUPERINTENDENT OR OTHER DULY AUTHORIZED FIELD REPRESENTATIVE SHALL INSPECT ALL BMP'S AS LISTED IN THE LOG BOOK, NOTE THE CONDITION AND PERFORMANCE OF EACH BMP AND TAKE CORRECTIVE ACTION FOR EACH BMP AS REQUIRED.

K. BEST MANAGEMENT PRACTICES (BMP) MANUAL
IN ADDITION TO THIS PLAN, THE CONTRACTOR SHALL COMPLY WITH THE MANUAL ENTITLED 'KENTUCKY BEST MANAGEMENT PRACTICES FOR CONSTRUCTION ACTIVITIES', CURRENT ADDITION, PREPARED BY THE KENTUCKY DIVISION OF CONSERVATION AND OF WATER. THE CONTRACTOR SHALL ALSO COMPLY WITH THE KENTUCKY EROSION PREVENTION AND SEDIMENT CONTROL FIELD GUIDE, CURRENT EDITION. THE CONTRACTOR SHALL MAKE APPROPRIATE MODIFICATIONS TO THIS PLAN AS NECESSARY TO ACHIEVE THE PLAN GOAL OF MINIMIZING EROSION AND SEDIMENTATION. ANY SUCH CHANGES ARE SUBJECT TO REVIEW BY THE LANDSCAPE ARCHITECT.

L. DURING THE CONSTRUCTION PERIOD THE CONTRACTOR WILL PROMPTLY REPAIR, REBUILD, REPLACE, CLEAN OUT OR OTHERWISE MODIFY ANY BMP'S THAT REQUIRE ATTENTION OR THAT DO NOT PERFORM AS REQUIRED. THE CONTRACTOR WILL NOTE IN THE MAINTENANCE LOG WHAT MAINTENANCE OR RECONSTRUCTION WAS REQUIRED AND ANY ACTION TAKEN.

M. TO REDUCE EROSION, MUD AND DUST FROM EXPOSED SOIL AREAS, TEMPORARY SEEDING SHALL BE DONE ON EXPOSED SOILS. FOR ANY BMP'S THAT DO NOT APPEAR TO PERFORM AS DESIGNED, THE CONTRACTOR SHALL NOTIFY THE ARCHITECT/ENGINEER (A/E) FOR REVIEW. IF THE A/E AND OR STATE AND LOCAL GOVERNING AGENCY DETERMINE THAT A BMP NEEDS TO BE REDESIGNED OR REPLACED WITH ANOTHER MORE APPROPRIATE BMP BECAUSE OF ACTUAL FIELD PERFORMANCE OR OTHERWISE, UPON APPROVAL OF THE OWNER, THE A/E WILL MAKE THOSE DESIGN CHANGES AND PROVIDE TO THE CONTRACTOR FOR CONSTRUCTION. IF THIS REQUIRES MEASURABLE ADDITIONAL WORK ABOVE THE SPECIFIED SCOPE OF WORK, THE CONTRACTOR MAY REQUEST A CHANGE ORDER FOR THE WORK.

N. UPON COMPLETION OF THE PROJECT, AND ONCE FINAL VEGETATIVE COVER HAS BEEN ESTABLISHED TO THE SATISFACTION OF THE A/E THE CONTRACTOR WILL REMOVE ALL BMP'S AND SUBMIT A NOTICE OF TERMINATION (NOT) TO THE DIVISION OF WATER & APPLICABLE STATE AND LOCAL GOVERNING AGENCIES.

O. THE CONTRACTOR IS RESPONSIBLE FOR PROVIDING INLET PROTECTION FOR ALL EXISTING AND PROPOSED STORM STRUCTURES WITHIN THE LIMITS OF CONSTRUCTION.

P. THE CONTRACTOR SHALL COORDINATE ALL CONSTRUCTION ACTIVITIES AND AVAILABILITY OF SITES WITH THE OWNER PRIOR TO BEGINNING WORK AT ANY GIVEN SITE.

Q. ALL ROADS AND DRIVES USED TO ACCESS THE SITE SHALL BE KEPT CLEAN AND FREE OF MUD & SILT DURING THE CONSTRUCTION PERIOD. PERIODIC INSPECTION BY GOVERNING OFFICIALS WILL OCCUR. THE CONTRACTOR IS RESPONSIBLE FOR INSTALLING AND MAINTAINING THE VEHICLE WASH DOWN AREAS INDICATED ON THIS PLAN.

R. THE CONTRACTOR SHALL EXTEND THE LIMITS OF SILT FENCING AS REQUIRED BY EARTHWORK / SITE DISTURBANCE REQUIRED BY THE PROJECT DOCUMENTS.

S. SHOULD THE CONTRACTOR ELECT TO CHANGE / ALTER THE CONSTRUCTION SITE ENTRANCE LOCATION, THE CONTRACTOR SHALL COORDINATE THIS WITH PARKS AND THE LANDSCAPE ARCHITECT A MINIMUM OF 2 WEEKS IN ADVANCE. ALL EROSION CONTROL MEASURES INDICATED FOR THE ACCESS DRIVE ON THIS PLAN SHALL THEN BE INSTALLED AT ANY NEW ACCESS DRIVES.

EPSC SEQUENCE & SCHEDULE:

A. CONTACT LOCAL INSPECTOR FOR A PRECONSTRUCTION MEETING BEFORE INSTALLING ANY BMP'S

B. INSTALL & MAINTAIN CONSTRUCTION ENTRANCES. LIMIT CONSTRUCTION ACCESS TO THE SITE TO THE LOCATION INDICATED AS AN ACCESS DRIVEWAY.

C. INSTALL & MAINTAIN PERIMETER SILT FENCE. SILT FENCING SHALL BE INSTALLED PRIOR TO THE BEGINNING OF GRADING OPERATIONS AND MAINTAINED THROUGHOUT THE CONSTRUCTION PERIOD UNTIL PERMANENT VEGETATION IS ESTABLISHED. REFER TO PLAN FOR APPROXIMATE LOCATIONS.

D. INSTALL & MAINTAIN STONE BAG INLET PROTECTION FOR EXISTING INLETS. MAINTAIN IN GOOD OPERATING CONDITION THROUGHOUT THE CONSTRUCTION PERIOD OR IF BEING REMOVED UNTIL NEW STORM SYSTEM IS IN PLACE AND INLET IS REMOVED.

E. COMMENCE SITE DEMOLITION, GRADING, AND CONSTRUCTION ACTIVITIES. INSTALL STORM SYSTEM INLETS, WQU & BMP'S WHERE REQUIRED BY THE DOCUMENTS. BLOCK WQU FROM STORM SYSTEM UNTIL ALL CONSTRUCTION ACTIVITIES ARE COMPLETE AND THE SITE IS STABILIZED.

F. INSTALL & MAINTAIN STONE BAG INLET PROTECTION FOR NEW INLETS AS THEY ARE INSTALLED. INSTALL IN ACCORDANCE DETAIL. MAINTAIN IN GOOD OPERATING CONDITION THROUGHOUT THE CONSTRUCTION PERIOD.

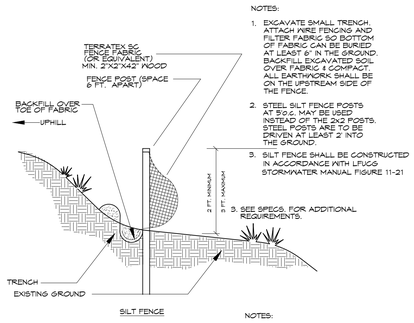
G. INSTALL PLANNED SURFACE STABILIZATION FEATURES AS WORK IS COMPLETED.

H. REMOVE ALL TEMPORARY BMP'S UPON FINAL INSPECTION AND APPROVAL BY GOVERNING AUTHORITIES.

I. INSPECT ALL SEDIMENT CONTROL BMP'S EVERY 7 DAYS AND AFTER EVERY RAINFALL EVENT GREATER THAN 1/2". ALL SEDIMENT CONTROL BMP'S SHALL BE CLEANED WHEN SEDIMENT REACHES 1/3 THE HEIGHT OF THE STRUCTURE.

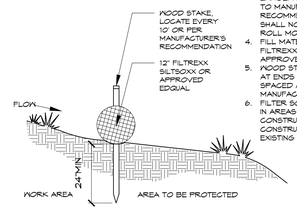
EPSC SCHEDULE

BMP SCHEDULE	
ELEMENT	TIMING / DURATION
Silt Fencing	Install at beginning of grading operations.
	Maintain until permanent vegetation is established.
Temporary Seeding	Immed. after rough grading, lawn & landscape areas.
	Maintain until permanent vegetation is established.
Temporary Topsoil Stockpile Seeding	Immed. after topsoil is stripped and stockpiled.
	Maintain until stockpiles are removed.
Silt Fencing at Stockpile Perimeters	Immed. after topsoil is stripped and stockpiled.
	Maintain until stockpiles are removed.
Drainage Swales	Create at beginning of grading operations.
	Permanent feature.
Check Dams in Swales	As soon as swales are created.
	Maintain until permanent vegetation is established.
Construction Access Drives	Install at beginning of grading operations.
	Maintain throughout construction period
Rock/Silt Fence Exist. Inlet Protection	Install at beginning of grading operations.
	Maintain until permanent vegetation is established.
Rock/Silt Fence New Inlet Protection	As soon as drainage inlets are installed.
	Maintain until permanent vegetation is established.
Sod/Seed	Immediately after finish grading.
	Permanent feature.



NOTES:
1. EXCAVATE SMALL TRENCH, ATTACH WIRE FENCING AND FILTER FABRIC SO BOTTOM OF FABRIC CAN BE BURIED AT LEAST 6" IN THE GROUND. BACKFILL EXCAVATED SOIL OVER FABRIC & COMPACT. ALL EARTHWORK SHALL BE ON THE UPSTREAM SIDE OF THE FENCE.
2. STEEL SILT FENCE POSTS AT 5'o.c. MAY BE USED INSTEAD OF THE 2x2 POSTS. STEEL POSTS ARE TO BE DRIVEN AT LEAST 2' INTO THE GROUND.
3. SILT FENCE SHALL BE CONSTRUCTED IN ACCORDANCE WITH LFUCG STORMWATER MANUAL FIGURE 11-21
3. SEE SPECS. FOR ADDITIONAL REQUIREMENTS.

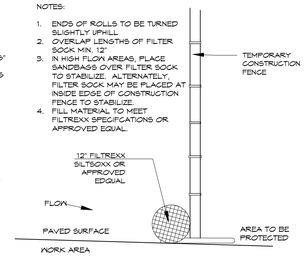
SILT FENCE



NOTES:
1. ENDS OF ROLLS TO BE TURNED SLIGHTLY UPHILL
2. OVERLAP LENGTHS OF FILTER SOCK MIN. 12'
3. 2" SQ. STAKES SHALL BE MIN. 36" LONG FOR 12" DIA. ROLL. IF LARGER ROLL, SIZE ACCORDING TO MANUFACTURER'S RECOMMENDATIONS. STAKES SHALL NOT EXTEND ABOVE THE ROLL MORE THAN 2".
4. FILL MATERIAL TO MEET FILTREXX SPECIFICATIONS OR APPROVED EQUAL.
5. WOOD STAKES TO BE LOCATED AT ENDS OF ROLL AND THEN SPACED AT 10' O.C. OR PER MANUFACTURER.
6. FILTER SOCK TO BE USED ALSO IN AREAS WHERE EDGE OF CONSTRUCTION AREA AND / OR CONSTRUCTION FENCE ABUT EXISTING PAVEMENT.

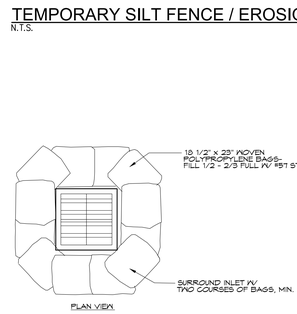
FILTER SOCK IN LANDSCAPE OR TURF AREAS

NOTES:
1. ENDS OF ROLLS TO BE TURNED SLIGHTLY UPHILL
2. OVERLAP LENGTHS OF FILTER SOCK MIN. 12'
3. IN HIGH FLOW AREAS, PLACE SANDBAGS OVER FILTER SOCK TO STABILIZE. ALTERNATELY, FILTER SOCK MAY BE PLACED AT INSIDE EDGE OF CONSTRUCTION FENCE TO STABILIZE.
4. FILL MATERIAL TO MEET FILTREXX SPECIFICATIONS OR APPROVED EQUAL.



FILTER SOCK ON PAVED SURFACES

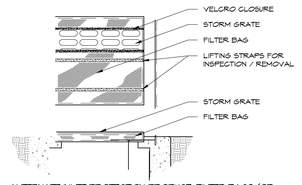
TEMPORARY SILT FENCE / EROSION BARRIER
N.T.S. A



NOTES:

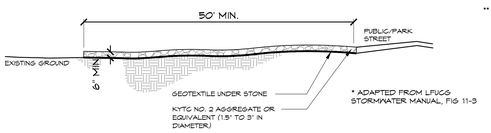
INSTALLATION:
STONE FILL BAGS SHALL BE WOVEN POLYPROPYLENE BAGS WITH APPROXIMATE DIMENSION 50# 18½" BY 28".
THE BAGS SHALL BE FILLED ½ TO ⅔ FULL WITH KTC #57 STONE. TIE THE ENDS OF FILLED BAGS USING EITHER DRAW STRINGS OR WIRE TIES.
INTERWEAVE THE LOOSE ENDS OF THE BAGS SO THAT THE GAPS BETWEEN BAGS ARE FILLED AND THE ENDS OF THE BAGS ARE SEALED.
COMPLETELY SURROUND THE INLET WITH A MINIMUM OF TWO (2) ROWS OF BAGS TO A MINIMUM OF 12" IN HEIGHT.
INSTALL AT ALL EXISTING STORM INLETS AND OUTLET STRUCTURES AND AT ALL NEWLY CONSTRUCTED STORM INLETS AND OUTLET STRUCTURES UNTIL PERMANENT STABILIZATION HAS BEEN ESTABLISHED.

INSPECTION & MAINTENANCE:
INSPECTIONS SHOULD BE MADE EVERY SEVEN (7) CALENDAR DAYS AND WITHIN 24 HOURS AFTER EACH RAINFALL EVENT THAT PRODUCES ½" OR MORE OF PRECIPITATION. ANY NEEDED REPAIRS SHOULD BE HANDLED IMMEDIATELY.
IF SEDIMENT ACCUMULATES, REMOVE IT FROM THE FACE OF THE BAGS BEFORE IT ACCUMULATES TO A HEIGHT EQUAL TO ½ THE STRUCTURE HEIGHT. ANY NEEDED REPAIRS SHOULD BE HANDLED IMMEDIATELY. TAKE CARE NOT TO DAMAGE OR UNDERCUT THE BAGS WHEN REMOVING SEDIMENT.
REMOVE AND REPLACE ANY DAMAGED BAGS AND DISPOSE OF THEM PROPERLY.
STORM DRAIN INLET PROTECTION STRUCTURES SHOULD BE REMOVED ONLY AFTER THE DISTURBED AREAS ARE PERMANENTLY STABILIZED. REMOVE ALL CONSTRUCTION MATERIAL AND SEDIMENT AND DISPOSE OF THEM PROPERLY. GRADE THE DISTURBED AREA TO THE ELEVATION OF THE DROP INLET STRUCTURE CREST. USE APPROPRIATE PERMANENT STABILIZATION METHODS TO STABILIZE BARE AREA AROUND THE INLET.



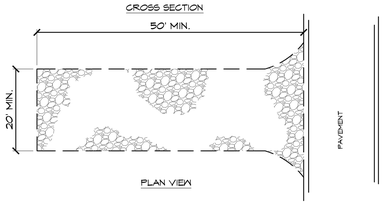
ALTERNATE INLET PROTECTION PRODUCT: FILTER BAGS (OR EQUAL) MAY BE USED INSTEAD OF STONE BAGS, WITH OWNER & ARCHITECTS APPROVAL. INSTALL PER MANUFACTURER'S SPECIFICATIONS.

TEMPORARY INLET PROTECTION
N.T.S. B

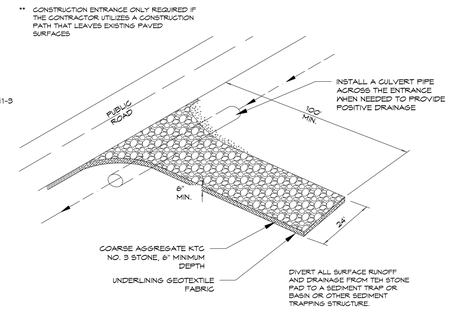


* ADAPTED FROM LFUCG STORMWATER MANUAL, FIG 11-3

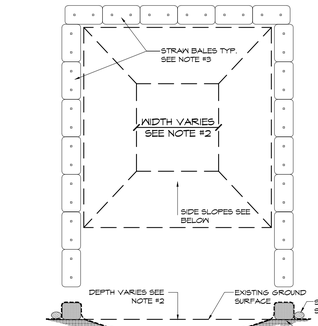
CROSS SECTION



** CONSTRUCTION ENTRANCE ONLY REQUIRED IF THE CONTRACTOR UTILIZES A CONSTRUCTION PATH THAT LEAVES EXISTING PAVED SURFACES



CONSTRUCTION ENTRANCE DETAIL
N.T.S. C



NOTES:
1. CONCRETE WASHOUT AREA(S) SHALL BE INSTALLED PRIOR TO ANY CONCRETE PLACEMENT ON SITE. THE CONCRETE WASHOUT AREA SHALL BE ENTIRELY SELF CONTAINED. LOCATION TO BE COORDINATED WITH THE ARCHITECT AND THE OWNER.
2. THE CONTRACTOR SHALL SUBMIT THE DESIGN, LOCATION AND SIZING OF THE CONCRETE WASHOUT AREAS TO THE ARCHITECT FOR APPROVAL PRIOR TO ANY CONCRETE PLACEMENT. COORDINATE LOCATION WITH THE EROSION POLLUTION AND SEDIMENT CONTROL PLAN. LOCATION: WASHOUT AREA(S) ARE TO BE LOCATED AT LEAST 50-FEET FROM AND STREAM, WETLAND, STORM DRAINS OR OTHER SENSITIVE RESOURCE. THE FLOOD CONTINGENCY PLAN MUST ADDRESS THE CONCRETE WASHOUT IF THE WASHOUT IS TO BE LOCATED WITHIN THE FLOOD PLANE. SIZE: THE WASHOUT MUST HAVE SUFFIGIENT VOLUME TO CONTAIN ALL LIQUID AND CONCRETE WASTE GENERATED BY WASHOUT OPERATIONS INCLUDING, BUT NOT LIMITED TO OPERATIONS ASSOCIATED WITH GROUT AND MORTAR.
3. SURFACE DISCHARGE IS UNACCEPTABLE. THEREFORE, STRAW BALES OR OTHER CONTROL MEASURES, AS APPROVED BY THE ARCHITECT, SHOULD BE USED AROUND THE PERIMETER OF THE CONCRETE WASHOUT AREA FOR CONTAINMENT.
4. SIGNS SHOULD BE PLACED AT THE CONSTRUCTION ENTRANCE, AT THE CONCRETE AREA(S) AND ELSEWHERE AS NECESSARY TO CLEARLY INDICATE THE LOCATION OF THE CONCRETE WASHOUT TO OPERATORS OF CONCRETE TRUCKS AND PUMP RIGS. WASHOUT AREA(S) SHOULD BE FLAGGED WITH SAFETY FENCING.
5. WASHOUT AREA(S) ARE TO BE INSPECTED, CLEANED AND REPAIRED AFTER EACH RAIN EVENT OF 0.5-INCHES OR MORE, BUT NO LESS THAN ONCE A WEEK FOR STRUCTURAL INTEGRITY, ADEQUATE HOLDING CAPACITY AND CHECKED FOR LEAKS, TEARS OR OVERFLOWS.
6. HARDENED CONCRETE WASTE SHOULD BE REMOVED AND DISPOSED OF IN A MANNER CONSISTENT WITH ALL 6+ APPLICABLE LAWS, REGULATIONS AND GUIDELINES WHEN THE WASTE HAS ACCUMULATED TO HALF OF THE CONCRETE WASHOUT'S HEIGHT.
7. THE STORMWATER QUALITY MANAGEMENT AND EROSION CONTROL PERMIT HOLDER IS RESPONSIBLE FOR HAVING A CONCRETE WASHOUT AREA PROVIDED IN A SUITABLE LOCATION WITH APPROPRIATE SIGNAGE. THIS CONCRETE WASHOUT SHALL BE MAINTAINED UNTIL THE 'STORMWATER QUALITY MANAGEMENT AND EROSION CONTROL' PERMIT IS TERMINATED, IN WRITING, BY THE AHJ. ONCE TERMINATED, THE CONCRETE WASHOUT MAY BE REMOVED.

EPSC PLAN

SCALE 1" = 30'-0"

0 15 30

EPSC PLAN LEGEND

- SILT FENCING SEE NOTES AND DETAIL A/L600
- SILT PROTECTION AT NEW STORM STRUCTURES SEE NOTES AND DETAIL B/L600
- CONCRETE WASH OUT PIT SEE NOTES FOR REQUIREMENTS
- CONSTRUCTION ACCESS DRIVE, SEE DETAIL C/L600. INSTALL CONSTRUCTION ACCESS DRIVE WHERE CONSTRUCTION VEHICLES MUST EXIT PAVEMENT INTO LANDSCAPE / TURF / AREAS OF BARE SOIL.
- CONSTRUCTION VEHICLE WASH DOWN AREA. ALL CONSTRUCTION VEHICLES / TRAFFIC SHALL BE WASHED DOWN PRIOR TO EXITING INTO THE PUBLIC ROW. CONTRACTOR IS RESPONSIBLE FOR KEEPING ALL OPEN SIDEWALKS AND PUBLIC STREETS CLEAN AND FREE OF CONSTRUCTION DEBRIS.

EPSC PLAN KEYNOTES (1)

1. SILT FENCING, SEE DETAIL A/L600. INSTALL SILT FENCE DOWNSLOPE OF ANY AREAS OF SOIL DISTURBANCE. SILT FENCE MAY BE INCORPORATED WITH CONSTRUCTION FENCE IN AREAS WHERE CONSTRUCTION FENCE WILL NOT BE MOVED, BUT MUST CONFORM TO REQUIREMENTS OF A/L600. ALTERNATELY, IN LIEU OF SILT FENCE AT CONSTRUCTION FENCE, COIR LOGS OR FILTER SOCKS MAY BE USED IF PROPERLY MAINTAINED THROUGHOUT CONSTRUCTION.
2. INLET PROTECTION AT EXISTING INLET TO BE REMOVED PROTECT UNTIL REMOVAL, IN WALKWAYS PROVIDE SILT FENCE MATERIAL AT INLET TO AVOID PEDESTRIAN HAZARDS. FOR INLETS IN PAVED VEHICULAR AREAS, PROVIDE ADJUSTABLE FRAME STORM DRAIN FILTER.
3. INLET PROTECTION AT NEW INLET, PROTECT WHEN INSTALLED UNTIL SITE IS ESTABLISHED.
4. CONSTRUCTION ENTRANCE. IF CONSTRUCTION TRAFFIC LEAVES EXISTING PAVED SURFACES, INSTALL CONSTRUCTION ENTRANCE AT UNPAVED ACCESS ROUTES PER DETAIL C/L600.
5. ADDITIVE ALTERNATE #1 STORM STRUCTURES - INCLUDE IN ADDITIVE ALTERNATE #1 COST FOR INLET PROTECTION AT NEW STORM STRUCTURES AT THIS LOCATION.
6. ADDITIVE ALTERNATE #1 SILT FENCE- INCLUDE IN ADDITIVE ALTERNATE #1 COST FOR SILT FENCING AT THIS LOCATION.

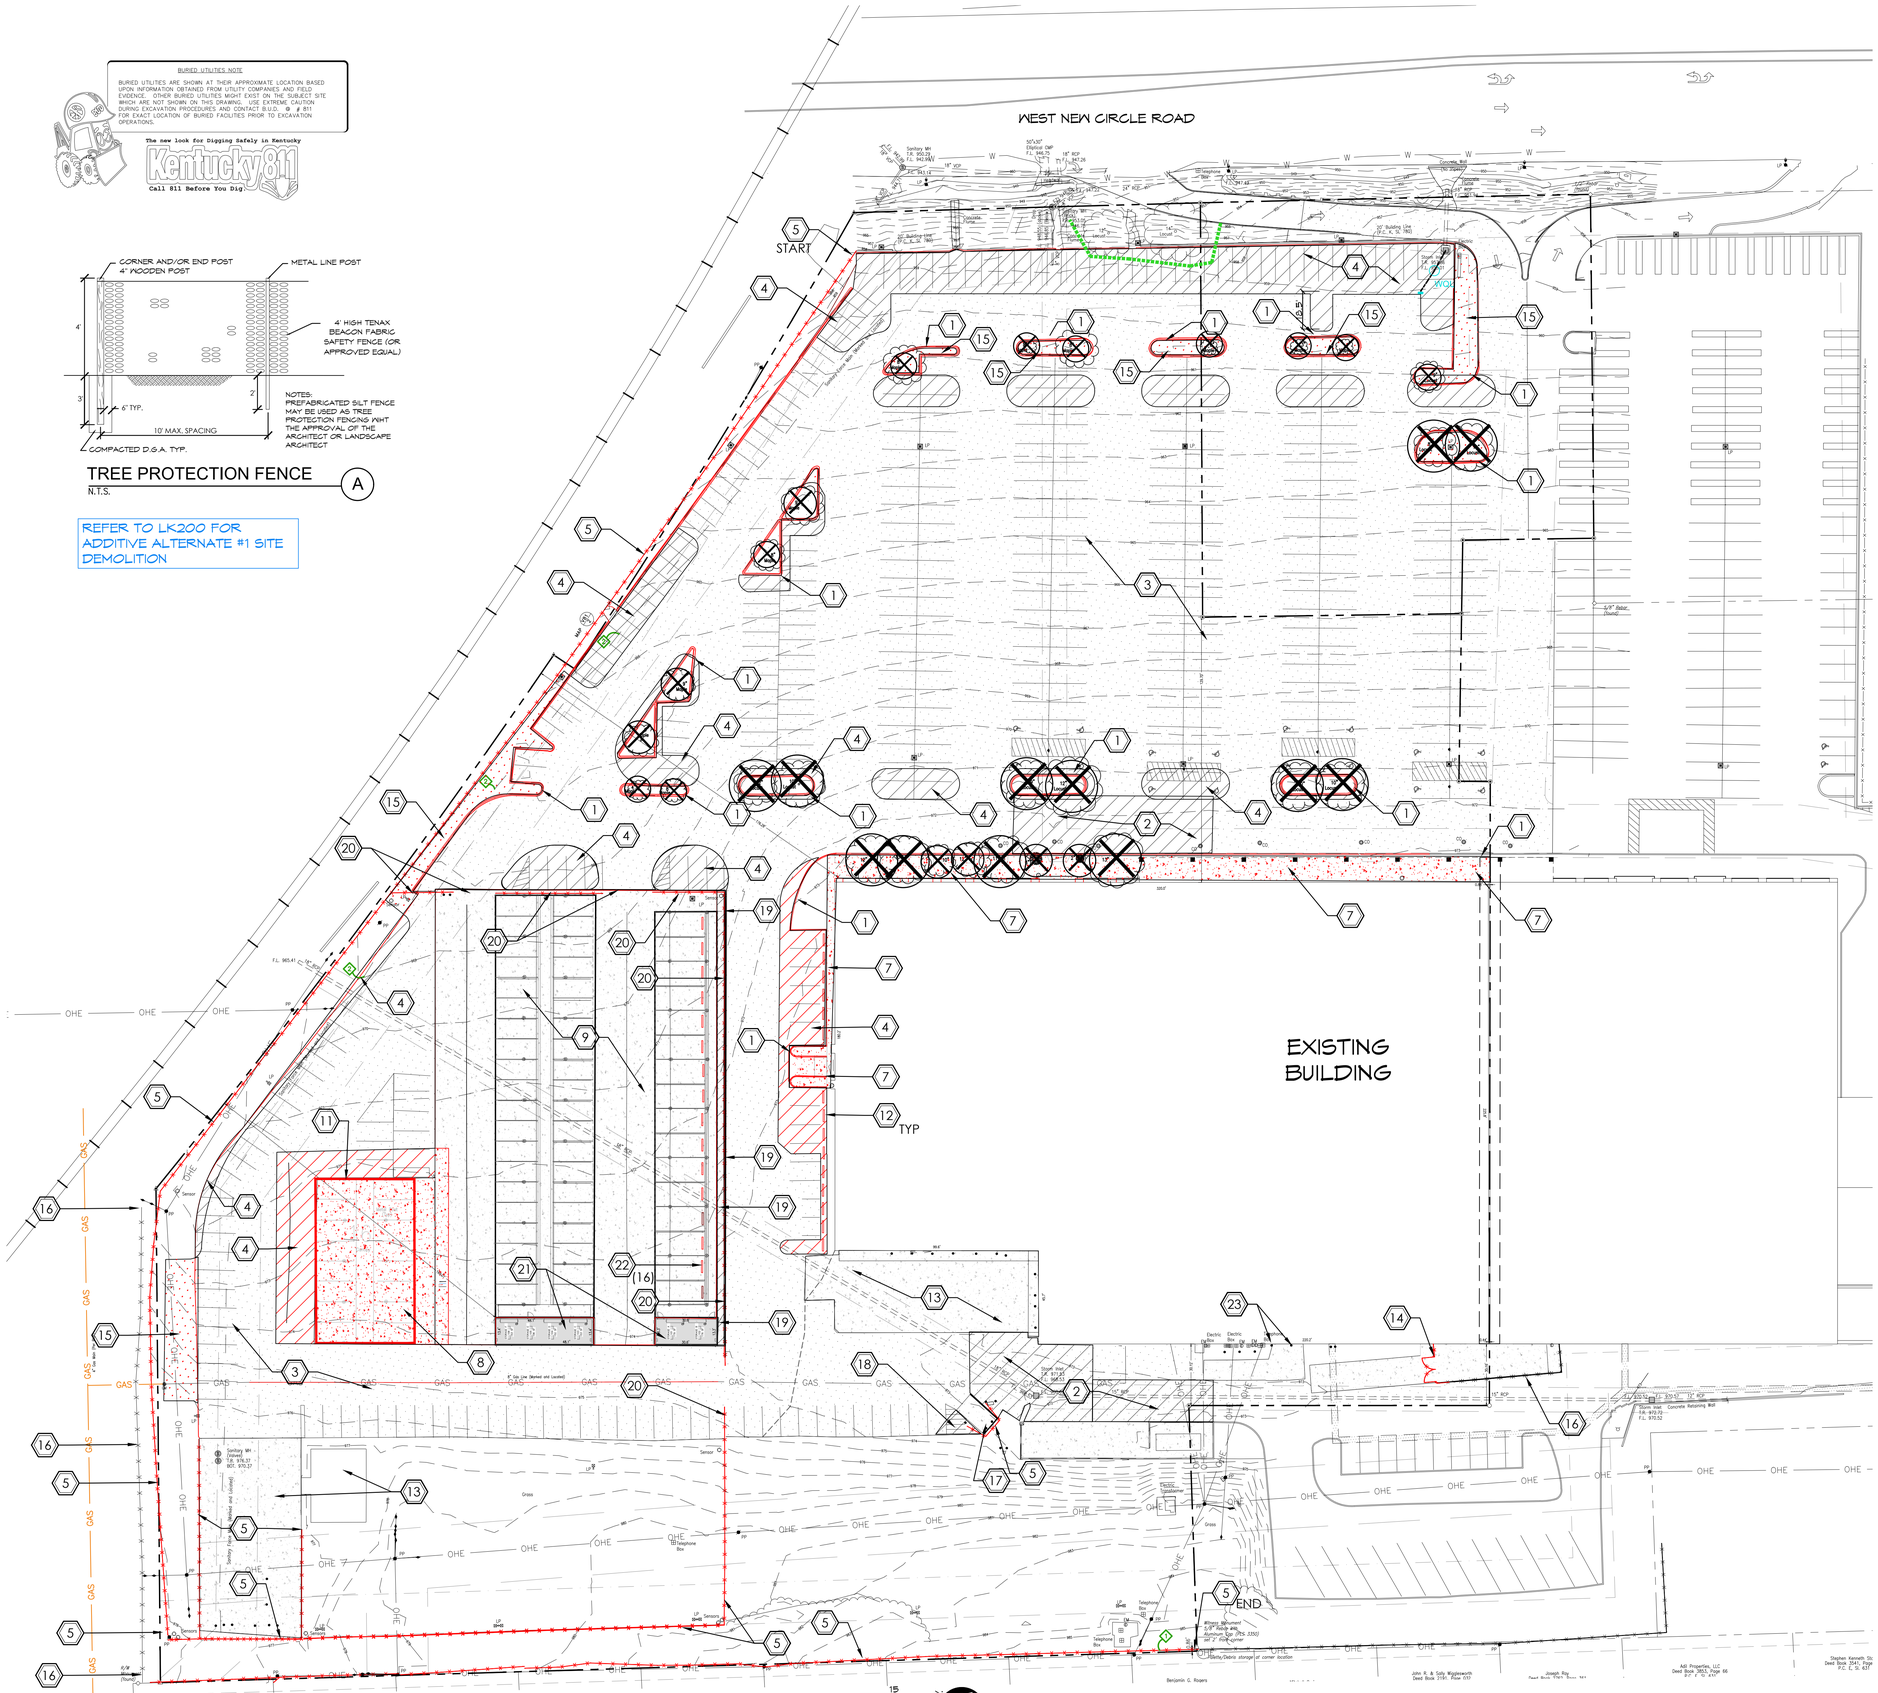
TREE PROTECTION FENCE
N.T.S. A

REFER TO LK200 FOR ADDITIVE ALTERNATE #1 SITE DEMOLITION



BASE BID SITE DEMOLITION PLAN
SCALE 1" = 30'-0"

DEMOLITION NOTES:

A. THE EXISTING TOPOGRAPHIC AND SITE INFORMATION SHOWN HAS BEEN PROVIDED FROM A SURVEY BY ENDRIS ENGINEERING. THIS INFORMATION IS PROVIDED FOR THE CONVENIENCE OF THE CONTRACTOR. THE ARCHITECT SHALL NOT BE RESPONSIBLE FOR THE ACCURACY OF THE INFORMATION SHOWN THEREON. CONTRACTOR TO VERIFY ALL INFORMATION SHOWN.
B. THE CONTRACT DRAWINGS SHOW THE APPROXIMATE LOCATION OF EXISTING AND PROPOSED UTILITY LINES. THESE LINES HAVE BEEN IDENTIFIED AND LOCATED AS ACCURATELY AS POSSIBLE USING AVAILABLE INFORMATION. THE CONTRACTOR IS RESPONSIBLE FOR VERIFYING ALL ACTUAL UTILITY LOCATIONS.
C. SAWCUT EDGES OF EXISTING PAVEMENT WHERE NEW PAVEMENT ABUTS AND / OR EXISTING PAVEMENT IS INDICATED TO BE REMOVED.
D. CONTRACTOR TO PROTECT ALL EXISTING TREES TO REMAIN- ALL TREES WITHIN THE LIMITS OF WORK SHALL BE PROTECTED. CONTRACTOR SHALL NOTIFY LANDSCAPE ARCHITECT IF ANY TREES ARE DAMAGED ON OR OFF SITE. NO MATERIALS ARE TO BE STORED UNDER A TREE IN ANY CIRCUMSTANCE. THE CONTRACTOR SHALL MAINTAIN TREE PROTECTION FENCING WHERE INDICATED AND FOR ALL EXISTING TREES WITHIN THE LIMITS OF THE CONSTRUCTION FENCING. TREE PROTECTION FENCING SHALL BE CONSTRUCTED OF SAFETY FENCE WITH STEEL T-SECTION FENCE POSTS SPACED AT 6' MAXIMUM; LIMIT OF FENCE TO ALIGN WITH CANOPY / DRIP EDGE OF TREES TO AVOID DAMAGE TO EXISTING TREES DURING CONSTRUCTION.
E. CONTRACTOR SHALL PROTECT ALL SURROUNDING AREAS. CONTRACTOR SHALL REPAIR ANY DAMAGES TO OFF OR ON SITE PROPERTY THAT IS NOT LISTED TO BE REMOVED AT NO ADDITIONAL COST TO OWNER.
F. SEE SPECIFICATIONS FOR OTHER DEMOLITION AND SITE CLEARING REQUIREMENTS.
G. CONTRACTOR SHALL PROTECT ALL UTILITY STRUCTURES. ANY DAMAGES TO UTILITIES ON OR OFF SITE SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR FOR REPAIR AT NO ADDITIONAL COST TO OWNER. THE CONTRACTOR SHALL SALVAGE AND REINSTALL ALL EXISTING UTILITY MARKERS IN NEW PAVEMENT.
H. PROTECT ALL WALKWAYS, WALLS, VEGETATION, TREES AND OTHER IMPROVEMENTS WITHIN THE CONSTRUCTION LIMITS THAT ARE NOT INDICATED FOR REMOVAL. ANY DAMAGE OR DESTRUCTION OF SUCH SHALL BE REPLACED BY THE CONTRACTOR AT NO COST TO THE OWNER.
I. WHERE ITEMS ARE INDICATED TO BE SALVAGED AND RETURNED TO OWNER, THE OWNER SHALL DESIGNATE A LOCATION FOR CONTRACTOR TO DELIVER AND OFFLOAD SALVAGED ITEMS.
J. FOR WORK SCOPE ITEMS OUTSIDE OF THE CONSTRUCTION FENCE, THE CONTRACTOR SHALL PROVIDE TEMPORARY FENCE AND SIGNAGE TO DIRECT PEDESTRIANS AROUND CONSTRUCTION AREAS AS NEEDED FOR DEMOLITION AND CONSTRUCTION IN THESE AREAS. CONTRACTOR SHALL MINIMIZE THE DURATION OF WORK OUTSIDE OF THE CONSTRUCTION FENCE AS MUCH AS FEASIBLE, AND SHALL NOTIFY OWNER OF ANY PROPOSED CHANGES TO THE CONSTRUCTION FENCE AND WORK OUTSIDE OF THE CONSTRUCTION FENCE A MINIMUM OF 72 HOURS IN ADVANCE.

SITE DEMOLITION LEGEND

- ASPHALT PAVEMENT TO BE MILLED 1 ½", SEE KEYNOTE 3
- EXISTING ASPHALT PAVEMENT TO BE REMOVED- FULL PAVEMENT SECTION- SEE KEYNOTES 2 & 4
- EXISTING CONCRETE PAVEMENT TO BE REMOVED TO STONE BASE, SEE KEYNOTE 7 AND 8 FOR TYPE
- EXISTING CONCRETE PAVEMENT TO REMAIN, SEE KEYNOTES 9 AND 13
- EXISTING TURF AREA TO BE CLEARED FOR NEW SITE IMPROVEMENTS, SEE KEYNOTE 15
- EXISTING CHAIN LINK FENCING TO BE REMOVED, SEE KEYNOTES 5 & 6
- EXISTING FENCING TO REMAIN, SEE KEYNOTE 16
- EXISTING CONCRETE CURB TO BE REMOVED, SEE KEYNOTE 1
- EXISTING TREE TO BE REMOVED, SEE KEYNOTES AND SPECIFICATIONS 'SITE CLEARING' FOR ADDITIONAL REQUIREMENTS
- EXISTING TREE TO BE PROTECTED WITH TREE PROTECTION FENCING, SEE GENERAL NOTES. EXTEND TREE FENCING TO DRIP LINE OF TREE- SEE DETAIL A/L200; NO PARKING, MATERIAL STORAGE OR GRADING TO TAKE PLACE WITHIN DRIPLINE OF EXISTING TREES

DEMOLITION KEYNOTES 1

1. EXISTING CURB AND GUTTER TO BE REMOVED, FULL SECTION.
2. EXISTING ASPHALT PAVEMENT TO BE REMOVED, FULL SECTION INCLUDING STONE BASE, WHERE ASPHALT PAVEMENT HAS FAILED. REMEDIATE BASE WITH 6" #2 STONE CHOKED WITH 4" DGA TO PAVEMENT SUBGRADE. FIELD VERIFY EXTENTS WITH OWNER AND ARCHITECT.
3. EXISTING ASPHALT PAVEMENT TO BE MILLED 1 ½" AND PREPARED FOR NEW ASPHALT SURFACE.
4. EXISTING ASPHALT PAVEMENT TO BE REMOVED, FULL PAVEMENT SECTION INCLUDING STONE BASE. SEE L401 FOR PROPOSED IMPROVEMENTS.
5. EXISTING FENCE TO BE REMOVED, FENCING, FABRIC, POSTS AND FOOTINGS.
6. EXISTING PERIMETER FENCING AT EXISTING COVERED PARKING, FENCING TO BE REMOVED INCLUDING FABRIC, POSTS AND FOOTINGS. CUT FOOTINGS OFF AT GRADE AND GROUT OPENING SOLID.
7. EXISTING CONCRETE PAVEMENT TO BE REMOVED.
8. EXISTING HEAVY DUTY CONCRETE PAVEMENT TO BE REMOVED TO CONSTRUCT NEW VACTOR BUILDING. SAWCUT AT NEAREST CONTROL JOINT AND REMOVE PAVEMENT AND STONE BASE.
9. EXISTING HEAVY DUTY CONCRETE PAVEMENT AT COVERED PARKING AREA, TO REMAIN. TREAT AND REMOVE WEEDS IN CRACKS AND PATCH CRACKS WITH CONCRETE FILLER. PROTECT CONCRETE AND CANOPIES TO REMAIN FROM CONSTRUCTION ACTIVITIES.
10. EXISTING ASPHALT PAVEMENT, SUBGRADE FAILURE. REMOVE FULL ASPHALT PAVEMENT SECTION AND STONE BASE TO ADDRESS SUBGRADE FAILURE.
11. EXISTING OVERHEAD CANOPY TO BE REMOVED TO CONSTRUCT NEW VACTOR BUILDING. REMOVE CANOPY, FRAMING, POSTS AND FOOTINGS IN THEIR ENTIRETY. BACKFILL FOOTINGS WITH COMPACTED DGA IN MAX. 8" LIFTS TO NEW PAVEMENT OR BUILDING SUBGRADE.
12. REMOVE ALL EXISTING WHEELSTOPS, TYPICAL.
13. EXISTING CONCRETE PAVEMENT TO REMAIN.
14. EXISTING FENCE / GATE TO BE REMOVED AND RELOCATED 10' BACK. FIELD VERIFY NEW GATE LOCATION WITH OWNER AND ARCHITECT.
15. EXISTING TURF OR LANDSCAPE AREA TO BE CLEARED, EXCAVATED AND COMPACTED / PREPARED FOR NEW CONCRETE CURB AND GUTTER AND / OR ASPHALT PAVEMENT, SEE L400 AND L401 FOR REQUIREMENTS.
16. EXISTING FENCE ON ADJACENT PROPERTY TO REMAIN IN PLACE.
17. EXISTING CONCRETE DUMPSTER PAD AND BOLLARDS TO REMAIN FOR REUSE.
18. AREA OF EXISTING ASPHALT PAVEMENT TO BE SAWCUT AND REMOVED FOR NEW HEAVY DUTY CONCRETE UTILITY PAD, SEE L400 AND L401 FOR ADDITIONAL NOTES.
19. EXISTING CURB AT EAST EDGE OF EXISTING COVERED PARKING AREA TO BE REMOVED. REMOVE CURB AND REMOVE ASPHALT STRIP BEHIND CURB / BETWEEN CURB AND EXISTING COVERED CONCRETE PAVEMENT THAT REMAINS. ASPHALT STRIP THAT IS REMOVED SHALL BE REPLACED WITH NEW ASPHALT PAVEMENT TRANSITION FROM ASPHALT DRIVE TO CONCRETE PAVEMENT.
20. EXISTING FENCE TO BE REMOVED AROUND COVERED PARKING. REMOVE FENCE, POSTS, GATES AND GATE OPERATORS AND ALL APPURTENANCES. WHERE EXISTING POSTS ARE EMBEDDED IN CONCRETE THAT REMAINS, CUT FENCE POST TO GRADE AND GROUT POST HOLES SOLID WITH NON-SHRINK GROUT.
21. EXISTING BUILDINGS TO REMAIN IN COVERED PARKING AREA.
22. REMOVE EXISTING WHEELSTOPS AND GROUT HOLES SOLID.
23. REMOVE EXISTING BOLLARD AND PATCH / GROUT HOLE SOLID.

SCALE 1" = 30'-0"

DEMOLITION NOTES:

A. THE EXISTING TOPOGRAPHIC AND SITE INFORMATION SHOWN HAS BEEN PROVIDED FROM A SURVEY BY ENDRIS ENGINEERING. THIS INFORMATION IS PROVIDED FOR THE CONVENIENCE OF THE CONTRACTOR. THE ARCHITECT SHALL NOT BE RESPONSIBLE FOR THE ACCURACY OF THE INFORMATION SHOWN THEREON. CONTRACTOR TO VERIFY ALL INFORMATION SHOWN.
B. THE CONTRACT DRAWINGS SHOW THE APPROXIMATE LOCATION OF EXISTING AND PROPOSED UTILITY LINES. THESE LINES HAVE BEEN IDENTIFIED AND LOCATED AS ACCURATELY AS POSSIBLE USING AVAILABLE INFORMATION. THE CONTRACTOR IS RESPONSIBLE FOR VERIFYING ALL ACTUAL UTILITY LOCATIONS.
C. SAWCUT EDGES OF EXISTING PAVEMENT WHERE NEW PAVEMENT ABUTS AND / OR EXISTING PAVEMENT IS INDICATED TO BE REMOVED.
D. CONTRACTOR TO PROTECT ALL EXISTING TREES TO REMAIN- ALL TREES WITHIN THE LIMITS OF WORK SHALL BE PROTECTED. CONTRACTOR SHALL NOTIFY LANDSCAPE ARCHITECT IF ANY TREES ARE DAMAGED ON OR OFF SITE. NO MATERIALS ARE TO BE STORED UNDER A TREE IN ANY CIRCUMSTANCE. THE CONTRACTOR SHALL MAINTAIN TREE PROTECTION FENCING WHERE INDICATED AND FOR ALL EXISTING TREES WITHIN THE LIMITS OF THE CONSTRUCTION FENCING. TREE PROTECTION FENCING SHALL BE CONSTRUCTED OF SAFETY FENCE WITH STEEL T-SECTION FENCE POSTS SPACED AT 6' MAXIMUM; LIMIT OF FENCE TO ALIGN WITH CANOPY / DRIP EDGE OF TREES TO AVOID DAMAGE TO EXISTING TREES DURING CONSTRUCTION.
E. CONTRACTOR SHALL PROTECT ALL SURROUNDING AREAS. CONTRACTOR SHALL REPAIR ANY DAMAGES TO OFF OR ON SITE PROPERTY THAT IS NOT LISTED TO BE REMOVED AT NO ADDITIONAL COST TO OWNER.
F. SEE SPECIFICATIONS FOR OTHER DEMOLITION AND SITE CLEARING REQUIREMENTS.
G. CONTRACTOR SHALL PROTECT ALL UTILITY STRUCTURES. ANY DAMAGES TO UTILITIES ON OR OFF SITE SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR FOR REPAIR AT NO ADDITIONAL COST TO OWNER. THE CONTRACTOR SHALL SALVAGE AND REINSTALL ALL EXISTING UTILITY MARKERS IN NEW PAVEMENT.
H. PROTECT ALL WALKWAYS, WALLS, VEGETATION, TREES AND OTHER IMPROVEMENTS WITHIN THE CONSTRUCTION LIMITS THAT ARE NOT INDICATED FOR REMOVAL. ANY DAMAGE OR DESTRUCTION OF SUCH SHALL BE REPLACED BY THE CONTRACTOR AT NO COST TO THE OWNER.
I. WHERE ITEMS ARE INDICATED TO BE SALVAGED AND RETURNED TO OWNER, THE OWNER SHALL DESIGNATE A LOCATION FOR CONTRACTOR TO DELIVER AND OFFLOAD SALVAGED ITEMS.
J. FOR WORK SCOPE ITEMS OUTSIDE OF THE CONSTRUCTION FENCE, THE CONTRACTOR SHALL PROVIDE TEMPORARY FENCE AND SIGNAGE TO DIRECT PEDESTRIANS AROUND CONSTRUCTION AREAS AS NEEDED FOR DEMOLITION AND CONSTRUCTION IN THESE AREAS. CONTRACTOR SHALL MINIMIZE THE DURATION OF WORK OUTSIDE OF THE CONSTRUCTION FENCE AS MUCH AS FEASIBLE, AND SHALL NOTIFY OWNER OF ANY PROPOSED CHANGES TO THE CONSTRUCTION FENCE AND WORK OUTSIDE OF THE CONSTRUCTION FENCE A MINIMUM OF 72 HOURS IN ADVANCE.

SITE DEMOLITION LEGEND

- ASPHALT PAVEMENT TO BE MILLED 1 ½", SEE KEYNOTE 3
- EXISTING ASPHALT PAVEMENT TO BE REMOVED- FULL PAVEMENT SECTION- SEE KEYNOTES 2 & 4
- EXISTING CONCRETE PAVEMENT TO BE REMOVED TO STONE BASE, SEE KEYNOTE 7 AND 8 FOR TYPE
- EXISTING CONCRETE PAVEMENT TO REMAIN, SEE KEYNOTES 9 AND 13
- EXISTING TURF AREA TO BE CLEARED FOR NEW SITE IMPROVEMENTS, SEE KEYNOTE 15
- EXISTING CHAIN LINK FENCING TO BE REMOVED, SEE KEYNOTES 5 & 6
- EXISTING FENCING TO REMAIN, SEE KEYNOTE 16
- EXISTING CONCRETE CURB TO BE REMOVED, SEE KEYNOTE 1
- EXISTING TREE TO BE REMOVED, SEE KEYNOTES AND SPECIFICATIONS 'SITE CLEARING' FOR ADDITIONAL REQUIREMENTS
- EXISTING TREE TO BE PROTECTED WITH TREE PROTECTION FENCING, SEE GENERAL NOTES. EXTEND TREE FENCING TO DRIP LINE OF TREE- SEE DETAIL A/L200; NO PARKING, MATERIAL STORAGE OR GRADING TO TAKE PLACE WITHIN DRIPLINE OF EXISTING TREES

DEMOLITION KEYNOTES (1)

1. EXISTING CURB AND GUTTER TO BE REMOVED, FULL SECTION.
2. EXISTING ASPHALT PAVEMENT TO BE REMOVED, FULL SECTION INCLUDING STONE BASE, WHERE ASPHALT PAVEMENT HAS FAILED. REMEDIATE BASE WITH 6" #2 STONE CHOKED WITH 4" DGA TO PAVEMENT SUBGRADE. FIELD VERIFY EXTENTS WITH OWNER AND ARCHITECT.
3. EXISTING ASPHALT PAVEMENT TO BE MILLED 1 ½" AND PREPARED FOR NEW ASPHALT SURFACE.
4. EXISTING ASPHALT PAVEMENT TO BE REMOVED, FULL PAVEMENT SECTION INCLUDING STONE BASE. SEE LK401 FOR PROPOSED IMPROVEMENTS.
5. EXISTING FENCE TO BE REMOVED, FENCING, FABRIC, POSTS AND FOOTINGS.
6. EXISTING PERIMETER FENCING AT EXISTING COVERED PARKING, FENCING TO BE REMOVED INCLUDING FABRIC, POSTS AND FOOTINGS. CUT FOOTINGS OFF AT GRADE AND GROUT OPENING SOLID.
7. EXISTING CONCRETE PAVEMENT TO BE REMOVED.
8. NOTE NOT USED THIS SHEET.
9. EXISTING HEAVY DUTY CONCRETE PAVEMENT AT COVERED PARKING AREA, TO REMAIN. TREAT AND REMOVE WEEDS IN CRACKS AND PATCH CRACKS WITH CONCRETE FILLER. PROTECT CONCRETE AND CANOPIES TO REMAIN FROM CONSTRUCTION ACTIVITIES.
10. EXISTING ASPHALT PAVEMENT, SUBGRADE FAILURE. REMOVE FULL ASPHALT PAVEMENT SECTION AND STONE BASE TO ADDRESS SUBGRADE FAILURE.
11. NOTE NOT USED THIS SHEET.
12. REMOVE ALL EXISTING WHEELSTOPS, TYPICAL.
13. EXISTING CONCRETE PAVEMENT TO REMAIN.
14. EXISTING FENCE / GATE TO BE REMOVED AND RELOCATED 10' BACK. FIELD VERIFY NEW GATE LOCATION WITH OWNER AND ARCHITECT.
15. EXISTING TURF OR LANDSCAPE AREA TO BE CLEARED, EXCAVATED AND COMPACTED / PREPARED FOR NEW CONCRETE CURB AND GUTTER AND / OR ASPHALT PAVEMENT, SEE L400 AND L401 FOR REQUIREMENTS.
16. EXISTING FENCE ON ADJACENT PROPERTY TO REMAIN IN PLACE.
17. EXISTING CONCRETE DUMPSTER PAD AND BOLLARDS TO REMAIN FOR REUSE.
18. AREA OF EXISTING ASPHALT PAVEMENT TO BE SAWCUT AND REMOVED FOR NEW HEAVY DUTY CONCRETE UTILITY PAD, SEE L400 AND L401 FOR ADDITIONAL NOTES.
19. EXISTING CURB AT EAST EDGE OF EXISTING COVERED PARKING AREA TO BE REMOVED. REMOVE CURB AND REMOVE ASPHALT STRIP BEHIND CURB / BETWEEN CURB AND EXISTING COVERED CONCRETE PAVEMENT THAT REMAINS. ASPHALT STRIP THAT IS REMOVED SHALL BE REPLACED WITH NEW ASPHALT PAVEMENT TRANSITION FROM ASPHALT DRIVE TO CONCRETE PAVEMENT.
20. EXISTING FENCE TO BE REMOVED AROUND COVERED PARKING. REMOVE FENCE, POSTS, GATES AND GATE OPERATORS AND ALL APPURTENANCES. WHERE EXISTING POSTS ARE EMBEDDED IN CONCRETE THAT REMAINS, CUT FENCE POST TO GRADE AND GROUT POST HOLES SOLID WITH NON-SHRINK GROUT.
21. EXISTING BUILDINGS TO REMAIN IN COVERED PARKING AREA.
22. REMOVE EXISTING WHEELSTOPS AND GROUT HOLES SOLID.
23. REMOVE EXISTING BOLLARD AND PATCH / GROUT HOLE SOLID.

BASE BID SITE MATERIALS PLAN

SCALE 1" = 30'-0"

LAYOUT & MATERIALS NOTES

A. EXISTING TOPOGRAPHIC AND SITE INFORMATION SHOWN HAS BEEN PROVIDED FROM A SURVEY BY ENDRIS ENGINEERING. THIS INFORMATION IS PROVIDED FOR THE CONVENIENCE OF THE CONTRACTOR. THE ARCHITECT SHALL NOT BE RESPONSIBLE FOR THE ACCURACY OF THE INFORMATION SHOWN THEREON. CONTRACTOR TO VERIFY ALL INFORMATION SHOWN. THE CONTRACTOR SHALL VERIFY THE LOCATION OF AND PROTECT ALL UTILITIES PRIOR TO THE COMMENCEMENT OF DIGGING. NOTIFY THE LANDSCAPE ARCHITECT OF ANY CONFLICTS.

B. DIMENSIONS GIVEN IN RELATIONSHIP TO BUILDINGS OR OTHER SITE ELEMENTS ARE MEASURED PERPENDICULAR FROM THE OUTSIDE FACE OF BRICK, STONE OR CONCRETE UNLESS OTHERWISE INDICATED. DIMENSIONS GIVEN AT ROADWAYS ARE FROM FACE OF CURB TO FACE OF CURB UNLESS OTHERWISE NOTED.

C. DIMENSIONS ARE REFERENCED AT 90 DEGREE ANGLES UNLESS OTHERWISE INDICATED. RADII ARE 5' UNLESS OTHERWISE INDICATED.

D. THE CONTRACTOR IS RESPONSIBLE FOR CONTACTING ALL INVOLVED UTILITY COMPANIES AND COORDINATING WITH THEM ALL CONSTRUCTION ACTIVITIES AND VERIFYING ALL SITE UTILITIES PRIOR TO CONSTRUCTION ACTIVITY.

E. ANY EXISTING SIGNAGE ALONG SHILLITO PARK ROAD THAT IS DISTURBED BY CONSTRUCTION ACTIVITIES SHALL BE REPLACED AT NOT ADDITIONAL COST TO THE OWNER.

F. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

MATERIALS LEGEND:

- NEW 1 ½" ASPHALT SURFACE OVERLAY OVER MILLED PAVEMENT BASE
- NEW FULL ASPHALT PAVEMENT SECTION, SEE KEYNOTES 6 & 11
- AREA OF EXISTING ASPHALT PAVEMENT TO BE OVERLAID TO MEET FINISH GRADES INDICATED, SEE KEYNOTE 23
- NEW BROOMED 4" CONCRETE PAVEMENT WITH TOOLED CONTROL JTS SEE KEYNOTE 6
- NEW BROOMED HEAVY DUTY 5" CONCRETE PAVEMENT WITH TOOLED CONTROL JTS SEE KEYNOTES AND DETAIL P/L601
- NEW LANDSCAPE AREA, SEE L300
- NEW CONCRETE CURB & GUTTER - SEE KEYNOTE 1
- NEW HEADER CURB
- CURB TRANSITION FROM 6" TO FLUSH CURB CONDITION
- NEW CURB RAMP
- EJ EXPANSION JOINT- SEE DETAIL E/L601
- CONTROL JOINT- SEE DETAIL D/L601
- NEW THERMOPLASTIC STRIPING AND ARROWS, SEE DETAIL D/L6.1 AND SPECIFICATIONS FOR REQUIREMENTS. COMPLY FHWA STANDARDS FOR DIRECTIONAL AND TURN ARROWS
- NEW WHEELSTOP, SEE DETAIL L/L601
- STOP STOP SIGN AND STOP BAR, SEE DETAIL M/L601 FIELD VERIFY FINAL LOCATION
- NO THRU TRAFFIC NO THRU TRAFFIC, SEE DETAIL M/L601 FIELD VERIFY FINAL LOCATION WITH LFUCG, SEE KEYNOTE 31
- PARKING SPACE STRIPING - 4" X 18' THERMOPLASTIC STRIPING TYPICAL FOR STANDARD SPACES
- TRASH RECEPTACLE BY OWNER AND NIC, SEE KEYNOTE 12
- MOVABLE TABLE AND CHAIR BY OWNER AND NIC, SEE KEYNOTE 13

SITE MATERIALS KEYNOTES

1. NEW CONCRETE CURB AND GUTTER, SEE DETAIL A/L601.
2. NEW FLUSH CONCRETE CURB AND GUTTER, SEE DETAIL A/L601.
3. NEW 6" HEADER CURB.SEE DETAIL A/L601.
4. NEW CURB RAMP, SEE DETAIL F/L601.
5. NEW 1 ½" ASPHALT SURFACE OVER MILLED ASPHALT BASE, SEE DETAIL H/L601.
6. NEW FULL ASPHALT PAVEMENT SECTION, SEE DETAIL H/L601. FULLY COMPACT SUB BASE PRIOR TO INSTALLING NEW DGA STONE BASE.
7. NEW LIGHT DUTY CONCRETE PAVEMENT, SEE DETAIL B/L601.
8. NEW PROTECTIVE BOLLARD, SEE DETAIL E/L602.
9. EXISTING CHAIN LINK FENCE / GATES TO BE RELOCATED APPROXIMATELY 10' BACK IN EXISTING PAVEMENT. FIELD VERIFY NEW GATE LOCATION WITH OWNER AND ARCHITECT.
10. NEW PERIMETER SECURITY FENCE, SEE DETAIL A/L602.
11. NEW 16' WIDE SLIDING VEHICULAR SECURITY GATE, SEE DETAIL B/L602. PROVIDE LEVEL GATE RETURN AREA AS REQUIRED BY MANUFACTURER (MIN. 24' LONG COUNTERBALANCE PANELS).
12. NEW TRASH RECEPTACLE SHOWN FOR REFERENCE ONLY. PROVIDED AND INSTALLED BY OWNER, NOT IN CONTRACT.
13. NEW MOVABLE TABLE AND CHAIR SET SHOWN FOR REFERENCE ONLY. PROVIDED AND INSTALLED BY OWNER, NOT IN CONTRACT.
14. NEW ADA PARKING SPACE, SEE DETAIL I/L601 AND J/L602 FOR ADA PARKING SIGNS.
15. NEW HEAVY DUTY CONCRETE PAVEMENT APRON AT ENTRANCE TO VACTOR BULDING, SEE DETAIL P/L601, SEE ALSO N/L601 FOR WHERE NEW APRON MEETS BULDING AT OVERHEAD DOORS.
16. NEW PROTECTIVE BOLLARDS AT ENTRANCE TO VACTOR BULDING / OVERHEAD DOORS, SEE DETAIL E/L602.
17. NEW HEAVY DUTY ASPHALT PAVEMENT, FULL SECTION, IN AREA OF PREVIOUS SUBGRADE FAILURE. PLACE 8" #2 STONE CHOKED OFF WITH 4" DGA AND COMPACT PRIOR TO PLACING PAVEMENT DGA BASE. SEE DETAIL H/L601 FOR ASPHALT PAVEMENT SECTION.
18. NEW RECYCLED RUBBER WHEELSTOP WHERE INDICATED, SEE DETAIL L/L601.
19. NEW PARKING SPACES / FUTURE LOCATION FOR EV CHARGERS (EV CHARGERS ARE NOT IN CONTRACT).
20. NEW 36' WIDE CHAIN LINK PEDESTRIAN GATE WITH PANIC HARDWARE. REFER TO MEP PLANS FOR POWER SUPPLY. SEE DETAIL C/L602.
21. NEW 8' TALL CHAIN LINK SCREEN FENCE WITH PRIVACY SLATS, SEE DETAIL D/L602.
22. NEW HEAVY DUTY CONCRETE UTILITY PAD, SEE DETAIL P/L601.
23. AREA OF EXISTING ASPHALT PAVEMENT TO BE OVERLAID TO MEET FINISH GRADES INDICATED, SEE L300 FOR FINISH GRADES.
24. THERMOPLASTIC CROSSWALK STRIPING, SEE DETAIL M/L601.
25. NEW HEADER CURB IN PARKING ISLAND TO FORM CHANNEL FOR SLIDING GATE RETURN, SEE DETAIL A/L601.
26. CURB CUT AND CONCRETE FLUME DRAINAGE CHANNEL, SEE DETAIL D/L601.
27. NEW HEAVY DUTY CONCRETE COLLAR AROUND EXISTING CATCH BASIN, SEE L300.
28. AT AREA OF REMOVED CURB AND ASPHALT STRIP, INSTALL NEW ASPHALT PAVEMENT, FULL SECTION. ASPHALT SHALL TRANSITION FROM GRADE AT EDGE OF EXISTING DRIVE TO EXISTING GRADE AT CONCRETE PAVEMENT IN COVERED PARKING AREA.
29. NEW SECURITY FENCE WITH PRIVACY SLATS ALONG SOUTH PROPERTY BOUNDARY. SEE DETAIL A/L602, PRIVACY SLAT CONDITION.
30. WHERE NEW SECURITY FENCE SPANS OVER CONCRETE FLUMES AND RIP RAP, LOCATE FENCE POSTS EQUALLY TO EITHER SIDE OF FLUME AND SPAN OVER FLUME WITH FENCE PANEL.
31. NO THRU TRAFFIC SIGN TO BE LOCATED EAST OF PROJECT SITE, TWO SIGNS. ONE AT LOCATION SHOWN BEHIND EXISTING GOODWILL BUILDING, THE SECOND SHALL BE LOCATED NEAR LIMESTONE STREET, TO PREVENT VEHICLES FROM DRIVING THROUGH / USING SERVICE DRIVE. FIELD VERIFY FINAL LOCATION WITH LFUCG.

LANDSCAPE GENERAL NOTES

A. THE EXISTING TOPOGRAPHIC AND SITE INFORMATION SHOWN HAS BEEN PROVIDED FROM A SURVEY BY ENDRIS ENGINEERING. THIS INFORMATION IS PROVIDED FOR THE CONVENIENCE OF THE CONTRACTOR. THE ARCHITECT SHALL NOT BE RESPONSIBLE FOR THE ACCURACY OF THE INFORMATION SHOWN THEREON. CONTRACTOR TO VERIFY ALL INFORMATION SHOWN.

B. THE CONTRACTOR SHALL BE RESPONSIBLE FOR STAKING AND LAYOUT OF THE PLANTINGS ON THIS PROJECT. SECURE APPROVAL OF THE PLANTING LAYOUT IN THE FIELD WITH THE LANDSCAPE ARCHITECT PRIOR TO OPENING ANY PLANTING PITS OR BEDS.

C. SEE SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

D. THE CONTRACTOR SHALL PREPARE A CULTIVATED BED AROUND EACH GROUP OF SHRUBS &/OR GROUND COVER BEDS, THE SAME SHAPE AND SIZE AS SHOWN ON THE PLAN. THE ENTIRE BED SHALL BE MULCHED. A CRISP, WELL DEFINED EDGE SHALL BE DEVELOPED BETWEEN ANY SHRUB &/OR GROUND COVER BED AND THE ADJOINING LAWN AREA.

E. ONLY NURSERY GROWN PLANT MATERIAL SHALL BE USED. COLLECTED PLANT MATERIAL IS NOT ACCEPTABLE AND WILL BE REJECTED BY THE LANDSCAPE ARCHITECT. MATERIAL SHALL BE OF HIGH QUALITY, EXCELLENT FORM AND TO THE SIZES AND SPECIFICATIONS INDICATED HEREIN. MATERIAL THAT DOES NOT MEET THE SPECIFICATIONS SHALL BE REJECTED.

F. UNLESS OTHERWISE INDICATED, NATURAL DYE-FREE SHREDDED BARK MULCH SHALL BE USED IN ALL SHRUB AND/OR GROUND COVER BEDS AND AROUND ALL TREES PLANTED WITHIN OR BEYOND THE CONFINES OF THE PLANTING BEDS. CONTRACTOR SHALL PROVIDE MULCH SAMPLE FOR LANDSCAPE ARCHITECTS APPROVAL PRIOR TO CONSTRUCTION.

G. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE COMPLETE REMOVAL OF ALL BINDING CORDS AND ROPES FROM THE TRUNKS OF ALL SHADE AND ORNAMENTAL TREES IMMEDIATELY AFTER PLANTING. IDENTIFICATION TAGS AND RIBBONS SHALL BE REMOVED FROM ALL PLANT MATERIAL AT THE TIME OF PLANTING. TREE BASKETS SHALL BE CUT FROM THE TOP 1/3 OF THE ROOT BALL PRIOR TO PLANTING.

H. ALL PLANT MATERIAL SHALL BE APPROVED BY THE LANDSCAPE ARCHITECT PRIOR TO DELIVERY TO THE SITE OR IF AGREED UPON BY LANDSCAPE ARCHITECT, MAY BE REVIEWED AT THE CONTRACTOR'S HOLDING YARD OR THE SITE PRIOR TO PLANTING.

I. THE LANDSCAPE ARCHITECT RESERVES THE RIGHT TO RELOCATE AND ADJUST ALL PLANT MATERIAL IN THE FIELD PRIOR TO PLANTING. THE CONTRACTOR SHALL COORDINATE ALL PLANTING EFFORTS WITH THE LANDSCAPE ARCHITECT PRIOR TO PLANTING. CONTRACTOR SHALL CONTACT AND NOTIFY LANDSCAPE ARCHITECT 2 WEEKS PRIOR TO PLANT INSTALLATION.

J. ALL PLANT QUANTITIES ARE GIVEN AS A REFERENCE ONLY. THE CONTRACTOR IS RESPONSIBLE FOR VERIFYING ALL QUANTITIES PRIOR TO PLANTING.

K. SOD ALL DISTURBED AND NEW LAWN AREAS. NETTED SOD IS NOT ACCEPTABLE.

LANDSCAPE LEGEND

- NEW SHADE TREE, SEE DETAIL A/L501
- NEW ORNAMENTAL TREE, SEE DETAIL B/L501
- NEW EVERGREEN TREE, SEE DETAIL F/L501
- NEW SHRUB,GRASS, & PERENNIAL. SEE DETAIL C/L501
- AREA OF PERENNIALS, SEE DETAIL D/L501
- AREA OF GROUNDCOVER, SEE DETAIL D/L501
- AREA OF MULCH AT LANDSCAPE ISLANDS, SEE DETAIL D/L501, FOR MULCH REQUIREMENTS

LANDSCAPE KEYNOTES (1)

1. NEW LANDSCAPE AREA, PLACE MIN. 18" PLANTING SOIL MIX COMPRISED OF 4:1 MIX OF AMENDED TOPSOIL AND SPAGHNUM PEAT MOSS. SEE SPECIFICATIONS SECTION 'PLANTS' FOR ADDITIONAL REQUIREMENTS.
2. DO NOT DISTURB EXISTING SHRUB / TREE MASS EXCEPT AS NEEDED TO INSTALL NEW PERIMETER SECURITY FENCING.

PLANT LIST:

KEY	Botanical Name	Common Name	Caliper	Ball Size	Height	Spread	Canes	Notes / Requirements

PIPE LAID IN ROCK OR SOIL TRENCH

STANDARD CONCRETE ENCASEMENT (NOTE: AS REQUIRED BY DESIGN)

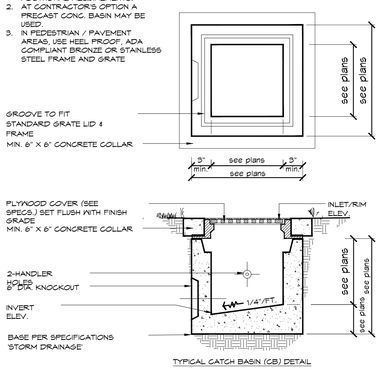
PIPE BACKFILL DESCRIPTIONS	
ZONE 1	NO. 9 STONE
ZONE 2	NO. 9 OR NO. 57 STONE
ZONE 3	COMPACTED DGA
ZONE 4	CONSOLIDATED SOIL, (NO ROCK GREATER THAN 8" DIAMETER) NO. 9, OR NO. 57 STONE
ZONE 5	12" MAX. TOPSOIL NO ROCK ALLOWED

NOTES:
1. COVER, UP TO AND INCLUDING ZONE 4, SHALL BE ESTABLISHED BEFORE TRENCH EXCAVATION.
2. ALL SANITARY SEWER LINES CONSTRUCTED FROM NON-METALLIC MATERIALS SHALL HAVE MAGNETIC MARKER TAPE INSTALLED IN THE TRENCH ABOVE THE SANITARY SEWER LINE.
3. MAGNETIC MARKER TAPE FOR SANITARY SEWER ONLY.

TYPICAL BEDDING FOR STORM PIPE
N.T.S.

D

NOTE:
1. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.
2. AT CONTRACTOR'S OPTION A PRECAST CONC. BASIN MAY BE USED.
3. IN PEDESTRIAN / PAVEMENT AREAS, USE HEEL PROOF, ADA COMPLIANT BRONZE OR STAINLESS STEEL FRAME AND GRATE

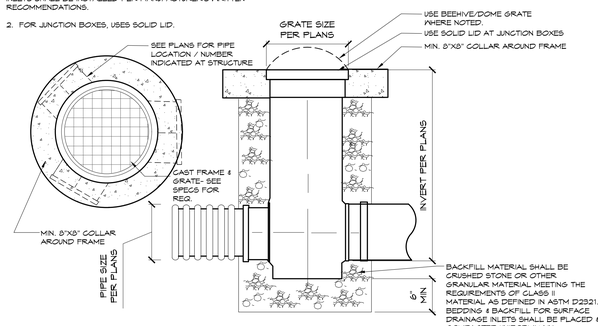


TYPICAL CATCH BASIN (CB) DETAIL

CONCRETE CATCH BASIN
NOT TO SCALE

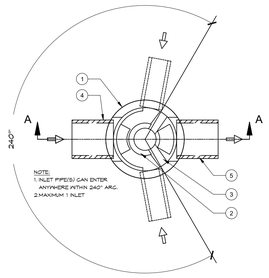
E

NOTES:
1. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS. ALL INLETS SHALL BE INSTALLED PER MANUFACTURER'S WRITTEN RECOMMENDATIONS.
2. FOR JUNCTION BOXES, USES SOLID LID.



YARD INLET
N.T.S.

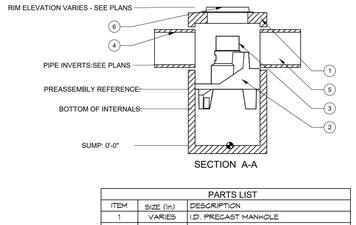
F



NOTE:
1. INLET PIPE(S) CAN ENTER ANYWHERE WITHIN 240° ARC.
2. MAXIMUM 1 INLET

CAPACITIES:

1. PEAK TREATMENT FLOW (WQU 2.40 CFS @ 80% TSS REMOVAL PER CITY OF INDIANAPOLIS STORMWATER QUALITY UNIT (SQU) SELECTION GUIDE AND NJDEP
2. SEDIMENT STORAGE CAPACITY: PER LOCAL REQUIREMENTS
3. OIL STORAGE CAPACITY: PER LOCAL REQUIREMENTS
4. MAXIMUM INLET/OUTLET PIPE DIAMETERS: 24 IN. (600 MM)



SECTION A-A

PARTS LIST		
ITEM	SIZE (in)	DESCRIPTION
1	VARIES	I.D. PRECAST MANHOLE
2		INTERNAL COMPONENTS (PRE-INSTALLED)
3		SEPARATION MODULE
4	PER PLANS	INLET PIPE (BY OTHERS)
5	PER PLANS	OUTLET PIPE (BY OTHERS)
6	30	FRAME AND COVER (OR GRATE) (ROUND)

BASIS OF DESIGN:
HYDRO INTERNATIONAL FIRST DEFENSE HIGH CAPACITY.
REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

GENERAL NOTES:

1. GENERAL ARRANGEMENT DRAWINGS ONLY.
2. THE DIAMETER OF THE INLET & OUTLET PIPES MAY BE NO MORE THAN 24".
3. INLET/OUTLET PIPE ANGLE CAN VARY TO ALIGN WITH DRAINAGE NETWORK (REFER TO PROJECT PLANS).
4. PEAK FLOW RATE AND MINIMUM HEIGHT LIMITED BY AVAILABLE COVER AND PIPE DIAMETER.
5. LARGER SEDIMENT STORAGE CAPACITY MAY BE PROVIDED WITH A DEEPER SUMP DEPTH.

PRODUCT SPECIFICATIONS:

THE TREATMENT SYSTEM SHALL FIT WITHIN THE LIMITS OF EXCAVATION (AREA AND DEPTH) AS SHOWN IN THE PROJECT PLANS.
THE TREATMENT SYSTEM SHALL BE CAPABLE OF CAPTURING AND RETAINING FINE SILT AND SAND SIZE PARTICLES. ANALYSIS OF CAPTURED SEDIMENT FROM FULL-SCALE FIELD INSTALLATIONS SHALL DEMONSTRATE PARTICLE SIZES PREDOMINATELY IN THE 20-MICRON RANGE

WATER QUALITY UNIT- TYP

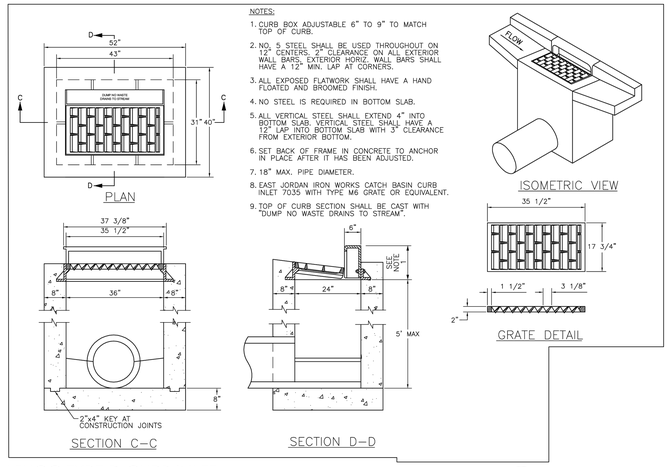
CURB INLET (C.I.) (GRATE ONLY)
N.T.S.

H

NOTES:
1. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.
2. CURB BOX ADJUSTABLE 6" TO 9" TO MATCH TOP OF CURB.
3. NO. 5 STEEL SHALL BE USED THROUGHOUT ON 12" CENTERS. 2" CLEARANCE ON ALL EXTERIOR WALL BARS. EXTERIOR HORIZ. WALL BARS SHALL HAVE A 12" MIN. LAP AT CORNERS.
4. ALL EXPOSED FLATWORK SHALL HAVE A HAND FLOATED AND BROOMED FINISH.
5. NO STEEL IS REQUIRED IN BOTTOM SLAB.
6. ALL VERTICAL STEEL SHALL EXTEND 4" INTO BOTTOM SLAB. VERTICAL STEEL SHALL HAVE A 12" LAP INTO BOTTOM SLAB WITH 3" CLEARANCE FROM EXTERIOR BOTTOM.
7. SET BACK OF FRAME IN CONCRETE TO ANCHOR IN PLACE AFTER IT HAS BEEN ADJUSTED.
8. 18" MAX. PIPE DIAMETER.
9. EAST JORDAN IRON WORKS CATCH BASIN CURB INLET 7035 WITH TYPE M6 GRATE OR EQUIVALENT.
10. TOP OF CURB SECTION SHALL BE CAST WITH "DUMP NO WASTE DRAINS TO STREAM".



LFUCG TYPE D CURB INLET
N.T.S.

I

NOTE:
1. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.
2. AT CONTRACTOR'S OPTION A PRECAST CONC. BASIN MAY BE USED
3. IN PEDESTRIAN / PAVEMENT AREAS, USE HEEL PROOF, ADA COMPLIANT BRONZE OR STAINLESS STEEL FRAME AND GRATE

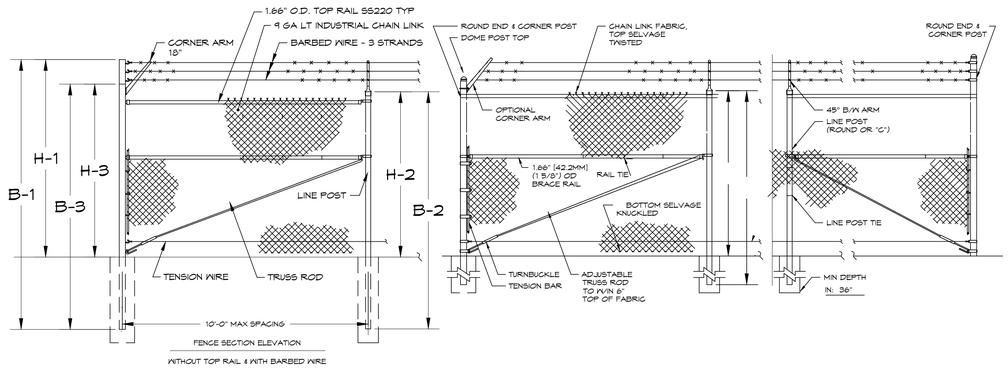
DATE: AUGUST 15, 2025
SCALE: Refer to Plan
SHEET NO. L601

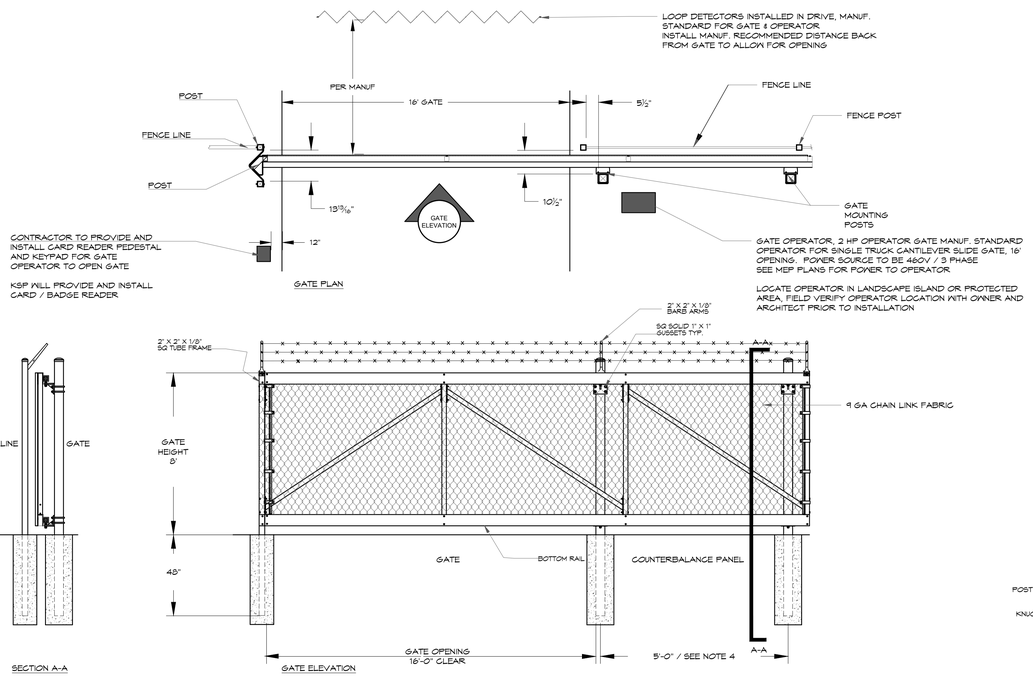


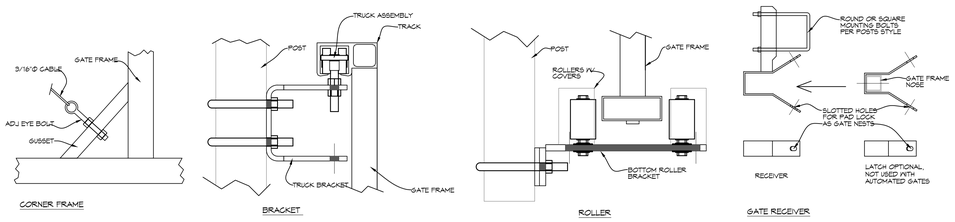
NOTE:
1. SEE SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.
2. FINAL FOOTING DEPTH AND WIDTH PER MANUFACTURER'S WRITTEN RECOMMENDATIONS FOR GIVEN FENCE HEIGHT.
3. EXTEND FABRIC TO WITHIN 2" OF FINISH GRADE.

FENCE HEIGHT	UPRIGHT END & CORNER POSTS		LINE POSTS		CORNER POSTS WITH CORNER ARM	
NOM HT INCLUDING BARBED WIRE	B-1 BAR LENGTH	H-1 HEIGHT ABOVE GRADE	B-2 BAR LENGTH	H-2 HEIGHT ABOVE GRADE	B-3 BAR LENGTH	H-3 HEIGHT ABOVE GRADE
8'-0" [2438MM]	11'-0" [3353MM]	8'-0 5/8" [2454MM]	9'-8" [2946MM]	8'-5 7/8" [2564MM]	10'-0" [3048MM]	7'-0 5/8" [2150MM]

8' GALVANIZED LIGHT INDUSTRIAL CHAIN LINK FENCE WITH BARBED WIRE

N.T.S. A



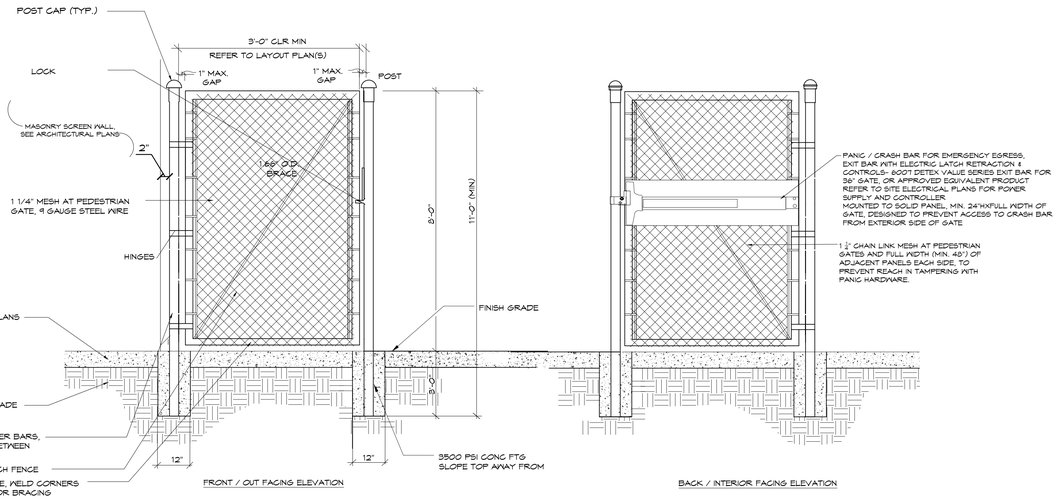


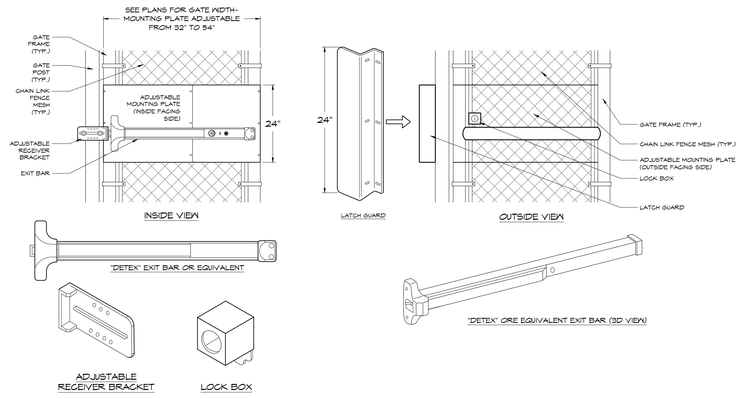
NOTES:

1. INSTALL GATE PER MANUFACTURER'S INSTRUCTIONS. FIELD VERIFY ALL MEASUREMENTS. REFER TO SPECIFICATIONS FOR ADDITIONAL INFORMATION.
2. INSTALL MANUFACTURER'S STANDARD GATE OPERATOR FOR SLIDE GATE, OPENING 16', 2 HP WITH BATTERY BACKUP AND EMERGENCY EXIT.
3. MINIMUM GAP BETWEEN FINISHED GRADE AND BOTTOM OF GATE SHALL BE 2" AND MAXIMUM GAP BETWEEN FINISHED GRADE AND BOTTOM OF GATE SHALL BE 5"

8' GALVANIZED CHAIN LINK SLIDE GATE WITH BARBED WIRE

N.T.S. B



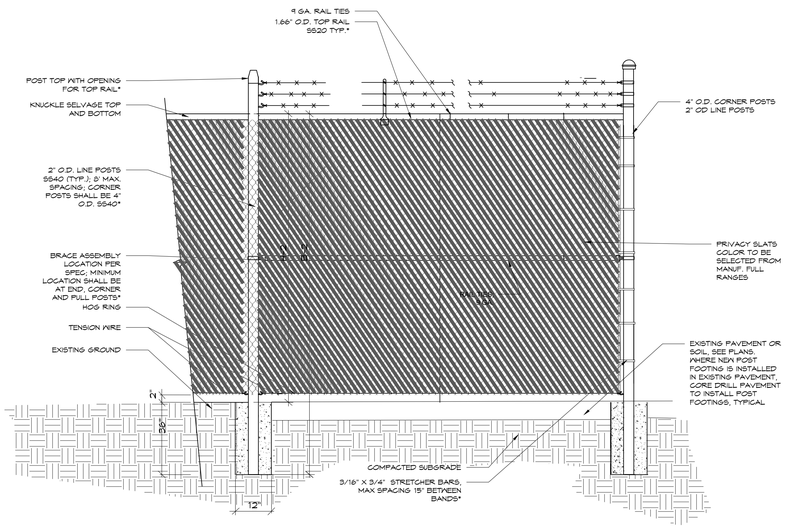


NOTES:

1. ALL FRAMEWORK SHALL BE GALVANIZED STEEL PIPE.
2. INSTALL BRACE ASSEMBLY AT ALL GATE, CORNER AND TERMINAL POSTS.
3. SET POST IN CONCRETE PIER. FOOTING WIDTH TO BE (4)X POST WIDTH. MINIMUM DEPTH 36".
4. SEE SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.
5. GATES TO BE SINGLE SWING GATE PER LAYOUT PLAN AND SCHEDULE. MANUFACTURER'S STANDARD GATES.
6. COORDINATE GATE HARDWARE WITH DOOR SCHEDULE ON ARCHITECTURAL PLANS / DOOR HARDWARE SCHEDULE. PROVIDE HASP FOR LOCK INDICATED ON HARDWARE SCHEDULE

CHAIN LINK PEDESTRIAN GATE WITH PANIC HARDWARE

N.T.S. C



FENCE HEIGHT	END & CORNER POSTS		LINE POSTS	
NOMINAL HEIGHT	B-1 BAR LENGTH	H-1 HEIGHT ABOVE GRADE	B-2 BAR LENGTH	H-2 HEIGHT ABOVE GRADE
8'-0"	11'-0"	8'-0 5/8"	10'-8"	7'-8 7/8"

SCALE: Refer to Plan

SHEET NO. L602

00.AB CODE CRITERIA FOR DESIGN

A. THESE STRUCTURAL DRAWINGS ARE TO BE USED IN CONJUNCTION WITH ALL OTHER DRAWINGS, SPECIFICATIONS & CONTRACT DOCUMENTS.

B. THE DESIGN, CONSTRUCTION, QUALITY CONTROL AND SAFETY OF ALL WORK PERFORMED ON THE PROJECT SHALL CONFORM TO THE REFERENCED CODES AND STANDARDS, INCLUDING ALL SPECIFICATIONS REFERENCED WITH THE LATEST EDITIONS SHALL APPLY UNLESS NOTED.

C. BUILDING CODE: INTERNATIONAL BUILDING CODE - 2015, INTERNATIONAL EXISTING BUILDING CODE – 2015

D. COUNTY/STATE: FAYETTE / KENTUCKY

E. RISK CATEGORY: II

F. DEAD LOADS

1. ROOFS = 2 PSF
2. COLLATERAL = 2 PSF
3. MISC. MECH/ELEC = XX PSF
4. SOLAR PANELS = 5PSF

G. DESIGN LIVE LOADS

1. ROOF = 20 PSF
2. ROOF LIVE LOAD = 25 PSF MIN
3. CORRIDORS = 80 PSF
4. LOBBY/PUBLIC AREA = 100 PSF
5. OFFICE = 50 PSF
6. STORAGE = 125 PSF
7. MECHANICAL EQUIP RM = XX PSF
8. CRANES = 3 T

H. ROOF SNOW LOAD

1. GROUND SNOW LOAD (p_g) = 15 PSF
2. SNOW EXPOSURE FACTOR (C_e) = 0.9
3. THERMAL FACTOR (C_T) = 1.0
4. SLOPE FACTOR (C_S) = 1.0
5. IMPORTANCE FACTOR (I_S) = 1.0
6. RAIN ON SNOW SURCHARGE (P_{RS}) = 5 PSF
7. FLAT ROOF SNOW LOAD (p_f) = 9.45 PSF
8. SLOPED ROOF SNOW LOAD (p_s) = 9.45 PSF PLUS DRIFTS AS APPLICABLE
9. MINIMUM ROOF SNOW LOAD (p_m) = 15 psf

I. LATERAL LOADS

1. WIND
   a. BASIC WIND SPEED: 115 MPH
   b. EXPOSURE CATEGORY: B
   c. WIND IMPORTANCE FACTOR: Iw = 1.0
   d. NOTE: THE MAIN WIND FORCE RESISTING SYSTEM OF THESE STRUCTURES WERE NOT MODIFIED BY THIS RENOVATION, NOR WERE THE WIND AREAS OR LOADS ON IT INCREASED BY MORE THAN 5%. THEREFORE, WIND DESIGN WAS ONLY PERFORMED ON THE COMPONENTS THAT WERE MODIFIED AND THE OVERALL EXISTING MAIN WIND FORCE RESISITING SYSTEM WAS NOT ANALYZED.
2. SEISMIC
   a. MAPPED SHORT PERIOD SPECTRAL RESPONSE ACCELERATION (S_S) = 0.189g
   b. MAPPED 1 SECOND SPECTRAL RESPONSE ACCELERATION (S_1) = 0.091g
   c. DESIGN SHORT PERIOD SPECTRAL RESPONSE ACCELERATION (S_{DS}) = 0.151
   d. DESIGN 1 SECOND SPECTRAL RESPONSE ACCELERATION (S_{D1}) = 0.103
   e. SEISMIC IMPORTANCE FACTOR (I_e) = 1.0
   f. SEISMIC RESPONSE FACTOR (R) = 1.0
   g. SEISMIC COEFFICIENT (C_S) = 1.0
   h. SOIL SITE CLASS: C
   i. SEISMIC DESIGN CATEGORY: B
   j. BASIC SEISMIC FORCE RESISTING SYSTEM: ORDINARY REINFORCED MASONRY SHEAR WALL
   k. DESIGN BASE SHEAR = $W \times C_s$
   l. NOTE: THE MAIN SEISMIC FORCE RESISTING SYSTEM OF THIS STRUCTURE WAS NOT MODIFIED BY THIS RENOVATION, NOR WERE THE SEISMIC LOADS ON IT INCREASED BY MORE THAN 5%. THEREFORE, SEISMIC DESIGN WAS ONLY PERFORMED ON THE COMPONENTS THAT WERE MODIFIED AND THE OVERALL EXISTING MAIN SEISMIC FORCE RESISITING SYSTEM WAS NOT ANALYZED.

J. INFORMATION OF EXISTING CONSTRUCTION, INCLUDING CONSTRUCTION COMPOSITION AND DIMENSIONS, WAS TAKEN FROM OWNER FURNISHED DRAWINGS OF PAST CONSTRUCTION AND SHALL BE FIELD VERIFIED. DEVIATIONS FROM THOSE SHOWN SHALL BE FURNISHED TO THE ARCHITECT AND ENGINEER.

K. ALL CONTRACTOR PROPOSED STRUCTURAL SUBSTITUTIONS, INCLUDING CONCRETE ADDITIVES, SHALL BE SUBMITTED TO THE ENGINEER FOR REVIEW AND APPROVAL PRIOR TO ANY PERTINENT WORK AND PRIOR TO THE AWARD OF A SUBCONTRACTOR.

L. SHOP DRAWINGS, TEST REPORTS, AND CERTIFICATIONS ARE REQUIRED FOR THE FOLLOWING STRUCTURAL ITEMS:

1. MISCELLANEOUS AND STRUCTURAL STEEL SHOP DRAWINGS
2. CONCRETE MASONRY UNIT CERTIFICATION AND DATA
3. MORTAR CERTIFICATION AND DATA
4. WALL REINFORCING DATA

M. THE SHOP DRAWINGS SPECIFIED BY THE ENGINEER ARE AN INTEGRAL PART OF THE COMPLETE DESIGN. THEY SERVE AS BOTH A CHECK ON THE CONTRACTOR'S INTERPRETATION OF THE ENGINEER'S DRAWINGS AND SPECIFICATIONS AND AS A FINAL CHECK ON THE COORDINATED, DETAILED DESIGN PRIOR TO CONSTRUCTION. THEREFORE, ANY MATERIAL ORDERED OR WORK PERFORMED PRIOR TO THE ENGINEER'S REVIEW AND APPROVAL OF THE SHOP DRAWINGS ARE DONE AT THE CONTRACTOR'S SOLE FINANCIAL RISK. THIS MEANS THAT WHERE DIFFERENCES OF INTERPRETATION EXIST, WORK DONE PRIOR TO THE APPROVAL OF THE SHOP DRAWINGS THAT IS ADJUDGED BY THE ENGINEER TO BE NOT IN CONFORMANCE WITH THE DRAWINGS AND SPECIFICATIONS MAY BE SUBJECT TO REMOVAL AND REPLACEMENT AT THE CONTRACTORS SOLE EXPENSE. AT A MINIMUM, WHERE REASONABLE ADDITIONS TO THE WORK ARE INDICATED ON THE SHOP DRAWINGS, THE ADDITIONAL COST OF THE REMOVAL AND REWORK THAT WOULD NOT HAVE BEEN REQUIRED HAD THE CONTRACTOR NOT PROCEEDED PRIOR TO SHOP DRAWING APPROVAL SHALL BE AT THE CONTRACTOR'S SOLE EXPENSE.

N. CONSTRUCTION METHODS, PROCEDURES, AND SEQUENCES ARE THE RESPONSIBILITY OF THE CONTRACTOR. THE CONTRACTOR SHALL TAKE ALL NECESSARY MEANS TO MAINTAIN AND PROTECT THE STRUCTURAL INTEGRITY OF ALL CONSTRUCTION AT ALL STAGES.

O. COORDINATION WITH THE ARCHITECTURAL, MECHANICAL, PLUMBING AND ELECTRICAL DRAWINGS TO VERIFY THE LOCATIONS AND SIZES OF ALL CHASES, INSERTS, OPENINGS, SLEEVES, FINISHES, DEPRESSIONS, AND OTHER PROJECT REQUIREMENTS ARE THE CONTRACTOR'S RESPONSIBILITY. ALL REQUIRED OPENINGS, SLEEVES, OR OTHER COMPONENTS MAY NOT BE SHOWN ON THE STRUCTURAL DRAWINGS.

P. IMPOSED CONSTRUCTION LOADS, INCLUDING CRANE LOADS, IN EXCESS OF THE STATED DESIGN LOADS MUST BE SUBMITTED TO THE ENGINEER FOR REVIEW PRIOR TO THE IMPOSITION OF SUCH LOADS.

Q. IMPLEMENTING JOB SITE SAFETY AND CONSTRUCTION PROCEDURES ARE THE SOLE RESPONSIBILITY OF THE CONTRACTOR.

R. IN CASE OF CONFLICT BETWEEN THE GENERAL NOTES, DETAILS AND SPECIFICATIONS, THE MOST RIGID REQUIREMENTS SHALL GOVERN.

01.41.AB SPECIAL INSPECTIONS

A. SPECIAL INSPECTION IS REQUIRED ACCORDING TO CHAPTER 17 OF THE 2015 INTERNATIONAL BUILDING CODE.

B. SPECIAL INSPECTIONS SHALL BE PERFORMED FOR THE FOLLOWING WORK AS REQUIRED IN THE 2015 INTERNATIONAL BUILDING CODE:

1. STEEL CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.02
2. CONCRETE CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.3
3. MASONRY CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.4
4. WOOD CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.5
5. SOILS CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.6
6. DRIVEN DEEP FOUNDATION CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.7
7. CAST-IN-PLACE DEEP FOUNDATION CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.8
8. HELICAL PILE FOUNDATION CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.9
9. FABRICATED ITEMS IN ACCORDANCE WITH SECTION 1705.10
10. THE TYPE AND EXTENT OF EACH TEST AND INSPECTION REQUIRED FOR EACH TYPE OF WORK SHALL BE AS INDICATED IN THE BUILDING CODE AND THE REFERENCES INCORPORATED THEREIN.

C. SPECIAL INSPECTION SERVICES SHALL BE CONTRACTED AND PAID FOR BY THE OWNER.

D. WORK REQUIRING SPECIAL INSPECTION SHALL BE INSPECTED BY THE SPECIAL INSPECTOR FOR CONFORMANCE WITH THE APPROVED DRAWINGS AND SPECIFICATIONS. INSPECTION REPORTS INDICATING THE RESULTS OF SPECIAL INSPECTIONS SHALL BE PROMPTLY SUBMITTED TO THE CONTRACTOR, THE ARCHITECT, AND THE STRUCTURAL ENGINEER.

E. ALL SPECIAL INSPECTIONS INDICATING NON-CONFORMING WORK SHALL BE REPORTED IMMEDIATELY TO THE CONTRACTOR, THE ARCHITECT AND THE STRUCTURAL ENGINEER. IMPENDING CONSTRUCTION WORK THAT WOULD IMPEDE ECONOMICAL CORRECTION OF NON-CONFORMING WORK SHALL NOT PROCEED WITHOUT WRITTEN APPROVAL.

F. A FINAL REPORT DOCUMENTING COMPLETION OF ALL REQUIRED SPECIAL INSPECTIONS AND CORRECTION OF ANY NON-CONFORMING WORK NOTED IN THE INSPECTIONS SHALL BE SUBMITTED BY THE SPECIAL INSPECTOR AT THE COMPLETION OF THE PROJECT.

G. THE SPECIAL INSPECTION AGENCY SHALL NOT BE ENGAGED BY THE CONTRACTOR FOR OTHER TESTING OR INSPECTION SERVICES ON THIS PROJECT.

H. SPECIAL INSPECTION SHALL BE PERFORMED BY A QUALIFIED INSPECTION AND TESTING AGENCY APPROVED BY THE BUILDING OFFICIAL, THE ARCHITECT, AND THE STRUCTURAL ENGINEER.

01.45.30 STRUCTURAL TESTS & INSPECTIONS

A. STRUCTURAL TESTS AND INSPECTIONS SHALL BE PERFORMED FOR THE FOLLOWING WORK AS REQUIRED FOR GENERAL CONFORMANCE WITH THE ADMINISTRATIVE AND PROCEDURAL REQUIREMENTS DETERMINED TO BE NECESSARY BY THE DESIGNATED INSPECTING PROFESSIONAL FOR COMPLIANCE WITH THE KENTUCKY BUILDING CODE, ITS REFERENCED STANDARDS, AND GENERAL ADMINISTRATIVE RULES IN THE STATE OF KENTUCKY:

1. SOILS
2. CONCRETE CONSTRUCTION
3. PRECAST CONCRETE CONSTRUCTION
4. STRUCTURAL STEEL CONSTRUCTION
5. MASONRY CONSTRUCTION
6. COLD-FORMED METAL FRAMING CONSTRUCTION
7. WOOD CONSTRUCTION
8. DRIVEN DEEP FOUNDATION CONSTRUCTION
9. CAST-IN-PLACE DEEP FOUNDATION CONSTRUCTION
10. HELICAL PILE FOUNDATION CONSTRUCTION
11. MICRO PILE FOUNDAITON CONSTRCUTION
12. FABRICATED ITEMS
13. SPRAY-APPLIED FIREPROOFING

B. THE TYPE AND EXTENT OF EACH STRUCTURAL TEST AND INSPECTION REQUIRED FOR EACH TYPE OF WORK SHALL BE AS INDICATED IN THE BUILDING CODE AND THE REFERENCES INCORPORATED THEREIN. REFER TO SPECIFICATION 014530 FOR SPECIFIC TESTING AND INSPECTION REQUIREMENTS FOR THIS STRUCTURE.

02.41 STRUCTURAL DEMOLITION

A. CONTRACTOR SHALL MAINTAIN THE STRUCTURAL INTEGRITY OF THE EXISTING BUILDING AND ITS STRUCTURAL ELEMENTS DURING THE DEMOLITION AND STRUCTURAL ELEMENT MODIFICATION PROCESS.

B. IDENTIFY LOAD BEARING WALLS THAT ARE TO RECEIVE NEW PENETRATIONS AND TEMPORARILY SHORE ADJACENT FLOOR OR ROOF FRAMING WHILE DEMOLITION AND STRUCTURAL ELEMENT MODIFICATION OPERATIONS ARE ONGOING.

C. SHORING SHALL SUPPORT ALL STRUCTURAL ELEMENTS SUPPORTED BY ELEMENTS BEING DEMOLISHED, AND SHALL EXTEND TO THE LOWEST AT GRADE WORKING SURFACE, UNLESS NOTED OTHERWISE ON THE CONSTRUCTION DRAWINGS.

D. SHORING LOADS ON THE AT GRADE WORKING SURFACE SHALL BE DISTRIBUTED SUCH THAT CONCENTRATED LOADS DO NOT CRACK, PUNCH THROUGH, OR CAUSE LOCALIZED SETTLEMENT CONDITIONS UNDER THAT WORKING SURFACE. LOADS CAUSING STRUCTURAL OR COSMETIC DAMAGE TO THE AT GRADE WORKING SURFACE DUE TO SHORING LOADS, MUST BE REPAIRED BY AN APPROVED REPAIRED METHOD.

04 STRUCTURAL MASONRY

A. ALL MATERIALS AND WORKMANSHIP SHALL COMPLY WITH THE REQUIREMENTS OF THE FOLLOWING CODES ANDSTANDARDS:

1. "BUILDING CODE REQUIREMENTS AND SPECIFICATION FOR MASONRY STRUCTURES", (ACI 530-11/ASCE 5-11/TMS 402-11) AND "SPECIFICATION FOR MASONRY STRUCTURES", (ACI 530. 1-11/ASCE 6-11/TMS 602-11).
2. LOAD BEARING CONCRETE MASONRY UNITS: ASTM C90, TYPE I, GRADE N (MIN. COMPRESSIVE STRENGTH ON NET AREA = 1900 PSI) NORMAL (MEDIUM-LIGHT) WEIGHT
3. NON-LOAD BEARING CONCRETE MASONRY UNITS: ASTM C129, TYPE II
4. IVANY OPEN END BLOCK: ASTM C901 (MIN. COMPRESSIVE STRENGTH ON NET AREA = 3000 psi)
5. MORTAR: ASTM C270, TYPE S ABOVE GRADE/BELOW GRADE
6. CONCRETE BUILDING BRICK: ASTM C55, GRADE N (MIN. COMPRESSIVE STRENGTH ON NET AREA = 3500 PSI
7. CMU GROUT: ASTM C476, (MIN. COMPRESSIVE STRENGTH AT 28 DAYS = 2000 PSI)
8. CMU PRISM STRENGTH: F'm = 1500 PSI PER ACI 530/ASCE 5/TMS 402 UNIT STRENGTH METHOD
9. HORIZONTAL JOINT REINFORCING: ASTM A951, HOT DIPPED GALVANIZED
10. PLAIN REINFORCING BARS: ASTM A615, GRADE 60
11. WELDABLE REINFORCING BARS: ASTM A706, GRADE 60

B. CONCRETE MASONRY WALLS SHOWN ON STRUCTURAL DRAWINGS SHALL BE CONSTRUCTED IN ACCORDANCE WITH ACI 530.1 "SPECIFICATIONS FOR MASONRY STRUCTURES".

C. INSTALLATION DRAWINGS SHALL BE SUBMITTED FOR APPROVAL BY THE STRUCTURAL ENGINEER. THE INSTALLATION DRAWINGS SHALL INDICATE:

1. THE MATERIALS USED, THEIR SPECIFICATIONS, AND THEIR DESIGN STRENGTHS.
2. ELEVATIONS OF ALL STRUCTURAL CONCRETE MASONRY WALLS SHOWING THE LAYOUT, INCLUDING OPENINGS AND JOINTS, REINFORCING, ACCESSORIES, BOND BEAMS, LINTELS AND EMBEDDED ITEMS.

D. PRODUCT DATA AND MATERIAL CERTIFICATIONS FOR MASONRY MATERIALS AND ACCESSORIES SHALL BE SUBMITTED FOR APPROVAL IN SHOP DRAWING FORMAT.

E. MORTAR CEMENT SHALL BE PORTLAND-LIME CEMENT. MASONRY CEMENT SHALL NOT BE USED.

F. THE TYPICAL DETAILS ON THE DRAWINGS CONTAIN ADDITIONAL GENERAL MASONRY NOTES AND DETAILS.

G. BEARING WALLS SHALL BE ANCHORED AT INTERSECTIONS BY GALVANIZED STEEL STRAPS 1 1/2" X 1/4" X 24" WITH 2" BEND AT 90 DEGREES EACH END. INSTALL STRAPS INTO GROUTED CORES OF C.M.U. AT 24" MAXIMUM VERTICAL SPACING. DO NOT INSTALL ANCHORS AT CONTROL JOINTS.

H. CORNERS OF LOAD BEARING CONCRETE MASONRY WALLS SHALL BE LAID IN RUNNING BOND.

I. PROVIDE SOLID GROUTED CONCRETE MASONRY AROUND BEARING ENDS OF ALL BEAMS AND JOISTS.

J. NO OPENINGS FOR TRADES SHALL OCCUR IN CONCRETE MASONRY WALLS WITHIN 16 INCHES OF BEAM BEARING CENTERLINES.

K. EMBEDDED ITEM LOCATIONS SHALL BE COORDINATED WITH THE APPROVED SHOP DRAWINGS OF THE TRADES.

L. PROVIDE GALVANIZED HORIZONTAL JOINT REINFORCING IN ALL WALLS AT 16" O.C. PROVIDE ONE-PEICE PREFABRICATED "T" AND "L" SHAPED UNITS AT ALL WALL CORNERS AND INTERSECTIONS.

M. ONLY WELDABLE REINFORCING BARS MAY BE WELDED.

N. CONCRETE MASONRY IS SUPPOSED TO ABSORB WATER FROM MORTAR AND GROUT. DO NOT PLACE OR GROUT WET CONCRETE MASONRY UNITS.

O. WEBS OF MASONRY UNITS FOR PIERS, COLUMNS, PILASTERS, AND THE STARTER COURSE SHALL BE MORTARED. WEBS OF MASONRY UNITS SHALL ALSO BE MORTARED WHERE REQUIRED TO CONFINE GROUT.

P. IN GROUTED AND/OR REINFORCED MASONRY WALLS, USE MASONRY UNITS WITH CORES THAT ALIGN VERTICALLY. PROVIDE CONTINUOUS UNOBSTRUCTED CELLS FOR REINFORCEMENT PLACEMENT AND GROUTING.

Q. SPACES TO BE FILLED WITH GROUT SHALL BE KEPT CLEAN AND FREE FROM PROTRUSIONS OF MASONRY OR MORTAR.

R. ALL CELLS OF BELOW-GRADE CONCRETE MASONRY UNITS SHALL BE GROUTED.

S. THE MAXIMUM GROUT POUR HEIGHT FOR EACH SPECIFIC TYPE AND SIZE OF CONCRETE MASONRY UNIT SHALL NOT EXCEED THE LIMITS SPECIFIED IN ACI 530.1.

T. GROUT POURS SHALL BE CONSOLIDATED ADEQUATELY DURING PLACEMENT BY MECHANICAL VIBRATION IN ACCORDANCE WITH PUBLISHED PRACTICES.

U. PROVIDE VERTICAL MASONRY CONTROL JOINTS AT APPROXIMATELY 20'-0" O.C., AND IN ACCORDANCE WITH RECOMMENDATIONS IN THE "MASONRY DESIGNER'S GUIDE". REFER TO ARCHITECTURAL PLANS FOR LOCATIONS, OR IF NOT SHOWN, COORDINATE LOCATIONS WITH THE ARCHITECT.

V. SPLICE LAP LENGTHS FOR REINFORCING SHALL BE IN ACCORDANCE WITH THE FOLLOWING TABLE, U.N.O. ON THE PLANS:

	BAR SIZE	LAP LENGTH
a.	#3	24"
b.	#4	36"
c.	#5	48"
d.	#6	60"

W. DO NOT EMBED ANY NON-STRUCTURAL ITEMS IN STRUCTURAL MASONRY WITHOUT WRITTEN PERMISSION FROM THE STRUCTURAL ENGINEER.

X. ALL REINFORCING STEEL SHALL BE PLACED AND TIED IN THE PROPER POSITION AS THE WALLS ARE CONSTRUCTED. LOWERING THE BARS IN FROM THE TOP OF A COMPLETED WALL OR SECTION OF WALL IS NOT ALLOWED.

Y. CONTRACTOR SHALL PROVIDE BRACING AND SUPPORT FOR ALL MASONRY WORK UNTIL PERMANENT ROOF/FLOOR FRAMING IS IN PLACE.

Z. DO NOT APPLY UNIFORM FLOOR OR ROOF LOADS FOR AT LEAST 12 HOURS AND CONCENTRATED LOADS FOR AT LEAST 3 DAYS AFTER BUILDING MASONRY WALLS OR COLUMNS.

05.12 STRUCTURAL STEEL FRAMING

A. ALL MATERIALS AND WORKMANSHIP SHALL COMPLY WITH THE REQUIREMENTS OF THE FOLLOWING CODES AND STANDARDS:

B. "MANUAL OF STEEL CONSTRUCTION - AISC 360-10 FOURTEENTH EDITION, 2010, AMERICAN INSTITUTE OF STEEL CONSTRUCTION (INCLUDING SPECIFICATIONS FOR STRUCTURAL STEEL BUILDINGS, SPECIFICATIONS FOR STRUCTURAL JOINTS USING ASTM A325 OR A490 BOLTS, AND AISC CODE OF STANDARD PRACTICE).

1. "DETAILING FOR STEEL CONSTRUCTION" AISC 326-09, AMERICAN INSTITUTE OF STEEL CONSTRUCTION.
2. "SEISMIC PROVISIONS FOR STRUCTURAL STEEL BUILDINGS, ANSI/AISC 341-05"" AMERICAN INSTITUTE OF STEEL CONSTRUCTIONS.
3. "STRUCTURAL WELDING CODE ANSI/AWS D1.1/D1.1M-2004", AMERICAN WELDING SOCIETY.
4. MEMBER TYPE — SPECIFICATION
   a. W SHAPES — ASTM A992, Fy = 50 KSI
   b. CHANNELS — ASTM A36, Fy = 36 KSI
   c. PLATES — ASTM A572, Fy = 50 KSI
   d. ANGLES — ASTM A36, Fy = 36 KSI
   e. BARS AND RODS — ASTM A36, Fy = 36 KSI
   f. HSS SECTIONS — ASTM A500, GRADE B, Fy = 46 KSI
   g. STRUCTURAL PIPE — ASTM A53, GRADE B, Fy = 35 KSI
   h. THREADED RODS — ASTM A36, Fy = 36 KSI, Fu = 58 KSI
   i. ANCHOR RODS — ASTM F 1554 GR 36, (50), (105)
   j. HIGH-STRENGTH BOLTS FOR 1/2" TO 1", Fu = 105 KSI >1" — ASTM A325-N, Fu = 120 KSI
   k. NUTS — ASTM A563
   l. HEADED SHEAR STUDS — ASTM A108, Fu = 65 KSI
   m. WELDING ELECTRODES — AWS A5.1 OR A5.5 E70XX

C. THE FRAMING SHOWN ON THE COMPLETED DRAWINGS HAS BEEN DESIGNED FOR THE LOADS INDICATED ON THE DRAWINGS. THE FABRICATOR AND ERECTOR ARE SOLELY RESPONSIBLE FOR THE DESIGN OF TEMPORARY BRACING AND RECOMMENDED ERECTION PROCEDURES.

D. THE TYPICAL DETAILS ON THE DRAWINGS CONTAIN ADDITIONAL GENERAL STEEL CONSTRUCTION NOTES AND DETAILS.

E. DESIGN OF ALL STRUCTURAL STEEL CONNECTIONS IS HEREBY DELEGATED. THE DESIGN OF ALL SUCH CONNECTIONS SHALL BE PERFORMED UNDER THE DIRECT SUPERVISION OF A LICENSED KENTUCKY PROFESSIONAL ENGINEER QUALIFIED AND EXPERIENCED IN THE DESIGN OF STRUCTURAL STEEL CONNECTIONS.

F. ALL SHOP AND FIELD CONNECTIONS SHALL BE MADE WITH HIGH STRENGTH BOLTS OR WELDS. ALL BOLTS AND NUTS SHALL BE CLEARLY MARKED AS REQUIRED BY AISC SPECIFICATIONS. ALL CONNECTIONS MADE WITH UNMARKED NUTS AND BOLTS WILL BE REJECTED. ALL BOLTED CONNECTIONS SHALL HAVE A MINIMUM OF 2 BOLTS.

G. THE DESIGN OF ALL STRUCTURAL STEEL CONNECTIONS SHALL BE AS FOLLOWS:

1. ALL CONNECTIONS SHALL CONFORM TO AISC REQUIREMENTS AND SHALL BE DESIGNED FOR THE GREATER OF 50% OF THE MAXIMUM UNIFORM DESIGN LOAD PER AISC TABLES, OR AS INDICATED ON THE DRAWINGS.
2. BRACE MEMBER CONNECTIONS SHALL BE DESIGNED FOR THE FORCES INDICATED ON EACH MEMBER, IF SHOWN.
3. IF BRACE MEMBER FORCES ARE NOT SHOWN, BRACE MEMBER CONNECTIONS SHALL BE DESIGNED TO DEVELOP THE FULL TENSILE YIELD STRENGTH OF THE BRACE MEMBER.
4. CONNECTION DESIGN SHALL BE IN ACCORDANCE WITH PROVISIONS OF THE AISC "STEEL CONSTRUCTION MANUAL", 14TH EDITION AND THE AISC MANUAL "DETAILING FOR STEEL CONSTRUCTION".

H. SHOP DRAWINGS AND CONNECTION CALCULATIONS SHALL BE SUBMITTED FOR APPROVAL PRIOR TO FABRICATION OF STRUCTURAL STEEL.

1. SHOP DRAWINGS SHALL CONTAIN ERECTION DRAWINGS AND DETAIL DRAWINGS.
2. ERECTION DRAWING SHALL SHOW THE LAYOUT AND PIECEMARK OF ALL STRUCTURAL STEEL MEMBERS AND ALL CONNECTIONS OF STRUCTURAL STEEL. SHOP-MADE AND FIELD-MADE CONNECTIONS SHALL BE INDICATED ON THE ERECTION DRAWINGS. ERECTION DRAWINGS SHALL INCLUDE SETTING DRAWINGS FOR ALL ANCHORAGES FOR STRUCTURAL STEEL.
3. CONNECTIONS BETWEEN STRUCTURAL STEEL AND STEEL JOIST FRAMING SHALL BE COORDINATED ON THE STRUCTURAL STEEL ERECTION DRAWINGS.
4. THE ERECTION DRAWINGS SHALL BEAR THE SEAL OF THE LICENSED ENGINEER UNDER WHOSE SUPERVISION THE CONNECTIONS WERE DESIGNED.
5. DETAIL DRAWINGS SHALL SHOW THE DIMENSIONS OF EACH PIECE INCLUDING THE DIMENSIONS OF ALL HOLES, SLOTS, COPES, CUTS ETC.
6. WHERE PIECES ARE SHIPPED AS ASSEMBLIES, THE ASSEMBLIES SHALL BE DETAILED SHOWING CONNECTIONS BETWEEN THE INDIVIDUAL PIECES. WELDS AND BOLTS SHALL BE INDICATED FOR ALL CONNECTIONS.
7. DETAIL DRAWINGS SHALL SHOW THE TYPE AND EXTENT OF PRIME PAINTING FOR EACH PIECE AND/OR ASSEMBLY.
8. CONNECTION DESIGN CALCULATIONS SHALL BEAR THE SEAL OF THE LICENSED ENGINEER UNDER WHOSE SUPERVISION THEY WERE PREPARED.

I. GROUT SHALL BE NON-METALLIC, NON-CORROSIVE, NON-SHRINK, NON-STAINING CONFORMING TO ASTM C 1107 WITH A 28 DAY COMPRESSIVE STRENGTH OF 5,000 PSI.

J. EXISTING STEEL SHALL NOT BE WELDED UNLESS INDICATED OR APPROVED IN WRITING.

K. ALL SHOP AND FIELD WELDING SHALL BE DONE BY A CERTIFIED WELDER USING QUALIFIED WELDING PROCEDURES.

L. ALL STEEL SURFACES SHALL BE PREPARED ACCORDING TO SSPC SP-3, "POWER TOOL CLEANING" UNLESS NOTED OR REQUIRED OTHERWISE.

M. CUTTING OR BURNING OF STRUCTURAL STEEL IN THE FIELD IS NOT ALLOWED, UNLESS BY WRITTEN APPROVAL BY THE ENGINEER.

N. PAINTING OF STRUCTURAL STEEL SHALL BE IN ACCORDANCE WITH THE PAINTING SPECIFICATIONS. ONE SHOP COAT OF PAINT SHALL BE APPLIED TO ALL STRUCTURAL MEMBERS EXCEPT:

1. MEMBERS ENCASED IN CONCRETE
2. MEMBERS RECEIVING SPRAY FIREPROOFING
3. SURFACES TO BE FIELD WELDED
4. GALVANIZED SURFACES
5. ALL STEEL AT AND BELOW FINISHED GRADE OR FLOOR SLAB SHALL RECEIVE TWO COATS OF BITUMINOUS PAINT OR 3" MINIMUM CONCRETE COVER.
6. STEEL EXPOSED TO VIEW SHALL BE FABRICATED WITH SURFACES THAT ARE TRUE, SMOOTH AND FREE OF BLEMISHES IN ACCORDANCE WITH INDUSTRY STANDARDS. COPES AND CUTS SHALL BE TRUE, SQUARE AND PROPERLY RADIUSED AS INDICATED ON THE SHOP DETAIL DRAWINGS.
7. ALL STEEL LINTELS IN EXTERIOR WALLS SHALL BE GALVANIZED. HOT-DIPPED GALVANIZING OF STRUCTURAL STEEL SHALL CONFORM TO ASTM A123, A153 OR A385 AS APPROPRIATE WHERE GALVANIZING IS INDICATED ON THE PLANS.
8. FOR MISCELLANEOUS STEEL NOT SHOWN ON THESE DRAWINGS, SEE ARCHITECTURAL AND OTHER ENGINEERING DRAWINGS.
9. THE GENERAL CONTRACTOR SHALL NOTIFY THE STRUCTURAL ENGINEER OF ANY FABRICATION OR ERECTION ERRORS OR DEVIATIONS AND RECEIVE WRITTEN APPROVAL BEFORE ANY FIELD CORRECTIONS ARE MADE.
10. CONTRACTOR AND ERECTOR ARE RESPONSIBLE FOR COMPLYING WITH ALL OSHA REGULATIONS.

O. SEE SPECIFICATIONS FOR SPECIFIC REQUIREMENTS FOR ARCHITECTURALLY EXPOSED STRUCTURAL STEEL (AESS) REQUIREMENTS.

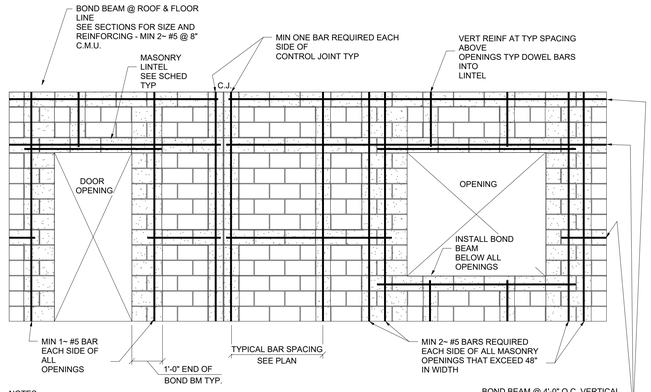
TYPICAL C.M.U. LINTEL DETAIL

MASONRY LINTEL SCHEDULE					
MARK	MAX OPENING SIZE	D	BOTTOM REINF	TOP REINF	STIRRUPS
ML-1	5'-0"	8"	2~#5	NONE	NONE
ML-2	8'-0"	16"	2~#5	NONE	NONE
ML-3	11'-8"	24"	2~#6 (12" C.M.U.)	NONE	NONE
ML-4	18'-0"	40"	4~#6 SQ (12" C.M.U)	2~#5	#3 U-SHAPE 8" O.C

NOTES:

1. IN LIEU OF USING LINTEL BLOCK ON THE BOTTOM OF LINTELS WHICH, REQUIRES SHORING DURING CONSTRUCTION, CONTRACTOR MAY USE PRESTRESSED, PRECAST CONCRETE LINTELS BY "CAST-CRETE" (WWW.CASTCRETE.COM) OR APPROVED EQUAL. SUBMIT PRODUCT DATA AND A PLAN AND SCHEDULE OF LINTEL LOCATIONS AND SIZES FOR APPROVAL FOR THIS OPTION.

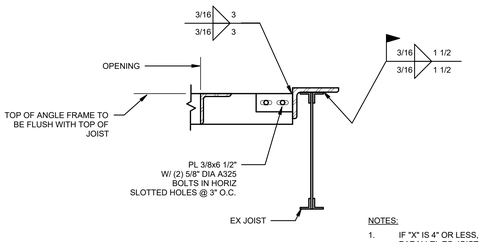
MASONRY LINTEL SCHEDULE



NOTES:

1. MINIMUM VERTICAL WALL REINFORCING SHALL BE #5 @ 2'-0" UNLESS NOTED OTHERWISE.
2. VERTICAL WALL REINFORCING SHALL BE CONTINUOUS.
3. SEE TYPICAL DETAIL FOR DOWELS REQUIRED AT BASE OF WALLS.
4. CENTER REINFORCING BARS IN GROUTED CELLS UNLESS NOTED OTHERWISE.
5. USE BAR POSITIONERS AT MINIMUM 4'-0" SPACING TO SUPPORT REINFORCING BARS.
6. FOLLOW SPECIFIED GROUTING PROCEDURES.
7. CLEAN MORTAR FROM EDGES OF CELLS SO GROUT CAN FLOW SMOOTHLY AND FILL ENTIRE CELL.
8. USE LINTEL BLOCK OVER OPENINGS AND CONTINUE WITH OPEN-BOTTOM BOND BEAM FROM EDGE OF OPENING INTO WALL SO THAT VERTICAL REINFORCING AT JAMB CAN PASS.
9. CONTROL JOINTS SHALL EXTEND FULL HEIGHT OF WALL AND ALIGN FROM FLOOR TO FLOOR.
10. WHERE A CONTROL JOINT OCCURS THROUGH A BOND BEAM OR LINTEL BEARING, PROVIDE 2 ~ 1/2" DOWELS ACROSS JOINT WITH GREASE ON ONE SIDE. DO NOT CONTINUE HORIZONTAL REINFORCING ACROSS CONTROL JOINT.

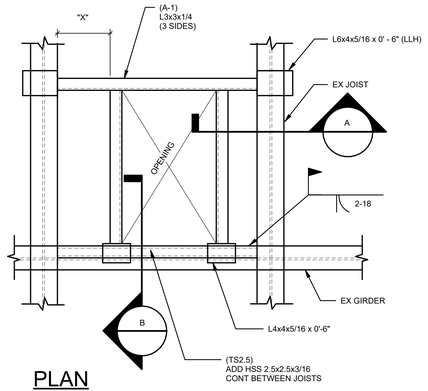
TYPICAL C.M.U. WALL REINFORCEMENT DETAILS



SECTION A

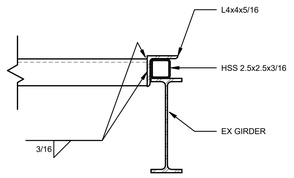
NOTES:

1. IF "X" IS 4" OR LESS, ELIMINATE ANGLE PARALLEL TO JOIST OR BEAM.
2. PROVIDE ANGLE FRAME FOR ALL OPENINGS GREATER THAN 10" DIAMETER OR SQUARE.
3. CONTRACTOR TO VERIFY SIZE AND LOCATION OF ALL OPENINGS. COORDINATE WITH ARCHITECTURAL AND MECHANICAL DWGS.

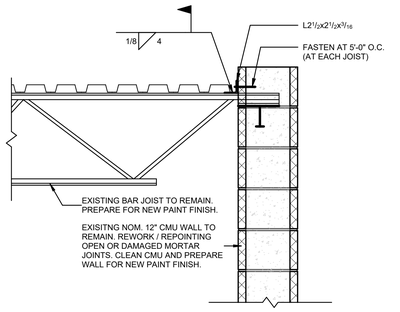


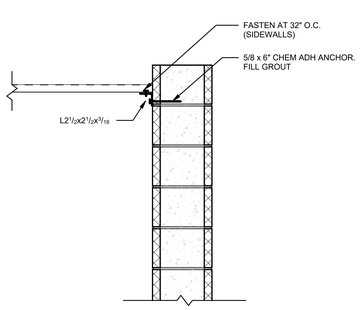
PLAN

TYPICAL ROOF FRAME OPENING DETAIL

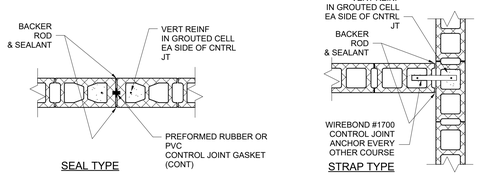


SECTION B





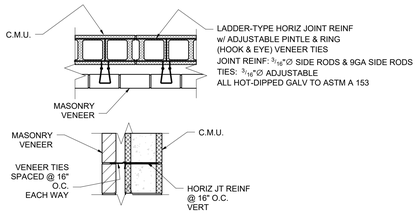
TYPICAL PERIMETER ANGLE DETAILS



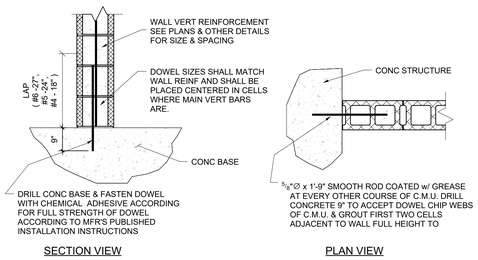
NOTES:

1. ARCHITECTURAL AND/OR STRUCTURAL DRAWINGS FOR CONTROL JOINT LOCATIONS.
2. DISCONTINUE HORIZONTAL JOINT REINFORCEMENT AND BOND BEAMS REINFORCEMENT AT CONTROL JOINTS.
3. UNLESS OTHERWISE SHOWN OR NOTED, SPACING OF CONTROL JOINTS SHALL NOT EXCEED 24 FEET.

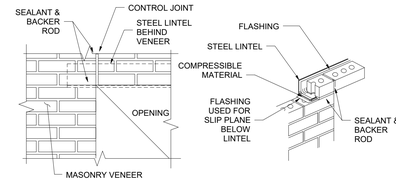
TYPICAL C.M.U. CONTROL JOINT DETAIL



TYPICAL HORIZ JOINT REINF AND VENEER DETAIL



TYPICAL C.M.U. WALL DOWELS DETAIL



LOOSE LINTEL SCHEDULE (FOR MASONRY VENEER)

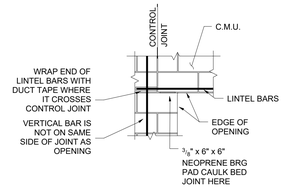
THIS SCHEDULE IS FOR LINTELS OVER MASONRY OPENINGS NOT OTHERWISE SHOWN OR NOTED ON DRAWINGS.

SPAN	ANGLE SIZE	PLAN MARK
UP TO 4'-0"	L3x 3 1/2 x 5/16 LLV	AL-1
UP TO 5'-6"	L4x 3 1/2 x 5/16 LLV	AL-2
UP TO 7'-6"	L5x 3 1/2 x 5/16 LLV	AL-3
UP TO 9'-6"	L6x 3 1/2 x 5/16 LLV	AL-4

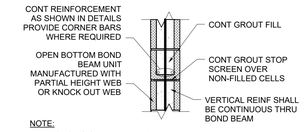
NOTES:

1. PROVIDE ONE ANGLE FOR EACH 4" OF MASONRY WALL.
2. ANGLES EXPOSED TO WEATHER SHALL BE GALVANIZED.
3. MINIMUM BEARING LENGTH SHALL BE 4" EACH END.

TYPICAL MASONRY VENEER LINTEL DETAIL

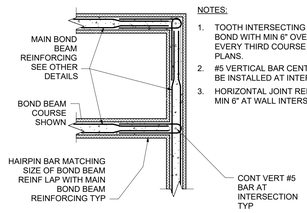


TYPICAL C.M.U. CONTROL JT @ OPENING



NOTE:
REINFORCING SHALL HAVE 3/4" MINIMUM GROUT COVER TO ALL C.M.U. SURFACES.

TYPICAL C.M.U. BOND BEAM DETAIL



NOTES:

1. TOOTH INTERSECTING WALLS TOGETHER IN RUNNING BOND WITH MIN 6" OVERLAP OR USE MASONRY STRAP EVERY THIRD COURSE UNLESS NOTED OTHERWISE ON PLANS.
2. #5 VERTICAL BAR CENTERED IN GROUTED CELL SHALL BE INSTALLED AT INTERSECTION.
3. HORIZONTAL JOINT REINFORCEMENT SHALL BE LAPPED MIN 6" AT WALL INTERSECTION.

TYPICAL MASONRY WALL INTERSECTION DETAIL

GENERAL NOTES:

1. SEE AREA OF DETAIL DEMOLITION PLANS INDICATED ON THIS SHEET FOR ADDITIONAL REQUIREMENTS. SHEETS AD409, AD410, AD411, AD412.
2. SEE STRUCTURAL DEMOLITION PLANS FOR ADDITIONAL REQUIREMENTS.
3. SEE PLUMBING DEMOLITION PLANS FOR ADDITIONAL REQUIREMENTS.
4. SEE MECHANICAL DEMOLITION PLANS FOR ADDITIONAL REQUIREMENTS.
5. SEE ELECTRICAL DEMOLITION PLANS FOR ADDITIONAL REQUIREMENTS.
6. EXISTING CEILINGS SCHEDULED TO REMAIN MAY HAVE TO BE REMOVED AND REINSTALLED IN COORDINATION WITH NEW DUCTWORK. SEE MECHANICAL PLANS FOR COORDINATION.

SHEET KEYNOTES:

1	SELECTIVE DEMOLITION - EXISTING 2X4 ACOUSTICAL PANEL CEILING TO BE REMOVED.
2	SELECTIVE DEMOLITION - EXISTING LIGHT FIXTURE TO BE REMOVED. SEE ELECTRICAL PLANS.
3	EXISTING EXTERIOR FRAMING WITH EFIS FINISH TO REMAIN. PATCH AND REPAIR DAMAGED EFIS SYSTEM. PREPARE FOR NEW PAINT FINISH.
4	EXISTING 2X2 ACOUSTICAL PANEL CEILING TO REMAIN.
5	SELECTIVE DEMOLITION - REMOVE EXISTING NON-STRUCTURAL METAL FRAMED AND GYPSUM BOARD WALL.
6	SALVAGE - EXISTING 2X2 ACOUSTICAL PANEL CEILING TO BE SALVAGED. USE EXISTING 2X2 CEILINE TILES TO REPLACE EXISTING DAMAGED CEILING TILES SCHEDUELD TO REMAIN.
7	SELECTIVE DEMOLITION - EXISTING 2X2 ACOUSTICAL PANEL CEILING TO BE REMOVED.
8	EXISTING GYPSUM BOARD ON METAL STUD TO REMAIN.
9	SELECTIVE DEMOLITION - EXISTING CMU WALL TO BE REMOVED. PREPARE OPENING FOR NEW OVERHEAD DOOR. SEE STRUCTURAL PLANS.
10	EXISTING NON-STRUCTURAL METAL FRAMED AND GYPSUM BOARD WALL TO REMAIN.
11	EXISTING STRUCTURAL COLUMN TO REMAIN.
12	SELECTIVE DEMOLITION - EXISTING GYPSUM BOARD ON METAL STUD TO BE REMOVED.
13	EXISTING ALUMINUM SOFFIT TO REMAIN. REMOVE DIRT AND CLEAN.
14	EXISTING BAR JOIST TO REMAIN. PREPARE FOR NEW PAINT FINISH.
15	EXISTING W SHAPE BEAM. PREPARE FOR NEW PAINT FINISH.
16	EXISTING INSULATION BOARD AND LIGHTWEIGHT CONCRETE ROOF STRUCTURE TO REMAIN. REPAIR / REPLACE DAMAGED INSULATION BOARD WHERE EXPOSED TO VIEW. PROVIDE NEW PAINT FINISH. ADD ALTERNATE #2, REMOVE EXISTING ROOF STRUCTURE PREPARE EXISTING JOIST FOR NEW METAL DECK.
17	EXISTING ALUMINUM AWNING TO REMAIN. REMOVE AND REINSTALL AS REQUIRED FOR INSTALATION OF NEW WORK.

1 ROOF LEVEL
SCALE: 1/16" = 1'-0"

GENERAL NOTES:

1. SEE AREA OF DETAIL ROOF LEVEL PLANS INDICATED ON THIS SHEET FOR ADDITIONAL REQUIREMENTS. SHEETS AE405, AE406, AE407, AE408.
2. SEE CORRESPONDING BUILDING SECTIONS INDICATED ON THIS SHEET FOR ADDITIONAL REQUIREMENTS.
3. SEE STRUCTURAL PLANS FOR ADDITIONAL REQUIREMENTS.
4. SEE PLUMBING PLANS FOR ADDITIONAL REQUIREMENTS.
5. SEE MECHANICAL PLANS FOR ADDITIONAL REQUIREMENTS.
6. SEE ELECTRICAL PLANS FOR ADDITIONAL REQUIREMENTS.
7. SEE STANDARD ROOFING DETAILS FOR ADDITIONAL REQUIREMENTS.
8. ADD ALTERNATE #1 - REMOVE EXISTING INSULATION BOARD AND LIGHTWEIGHT CONCRETE ROOF STRUCTURE. PREPARE EXISTING JOIST FOR NEW METAL DECKING. PROVIDE NEW METAL ROOF DECKING OVER EXISTING BAR JOIST.

SHEET KEYNOTES:

1	NEW RTU AND ROOF CURB EXTENSION OVER EXISTING ROOF CURB. ADD ALTERNATE #2 - REMOVE EXISTING ROOF CURB PROVIDE NEW ROOF CURB OVER NEW METAL ROOF DECKING. SEE MECHANICAL PLANS.
2	SBS MODIFIED BITUMINOUS MEMBRANE ROOFING - FINISH PLY.
3	CONTINUOUS PRE-FINISHED METAL GUTTER AND DOWNSPOUTS.
4	SELECTIVE DEMOLITION - EXISTING WALL COPING AND WOOD BLOCKING TO BE REMOVED. PROVIDE NEW WOOD BLOCKING AND WALL COPING.
5	EXISTING ALUMINUM AWNING TO REMAIN. REMOVE AND REINSTALL AS REQUIRED FOR INSTALATION OF NEW WORK.
6	EXISTING EXTERIOR FRAMING WITH EFIS FINISH TO REMAIN. PATCH AND REPAIR DAMAGED EFIS SYSTEM. PREPARE FOR NEW PAINT FINISH.
7	SELECTIVE DEMOLITION - EXISTING LAYERS OF ROOFING TO BE REMOVED TO ROOF STRUCTURE. PREPARE ROOF STRUCTURE FOR NEW RIGID INSULATION AND SBS MODIFIED ROOFING. (ADD ALTERNATE #2 - REMOVE EXISTING ROOF SLAB. PROVIDE METAL DECKING OVER EXISTING JOIST.

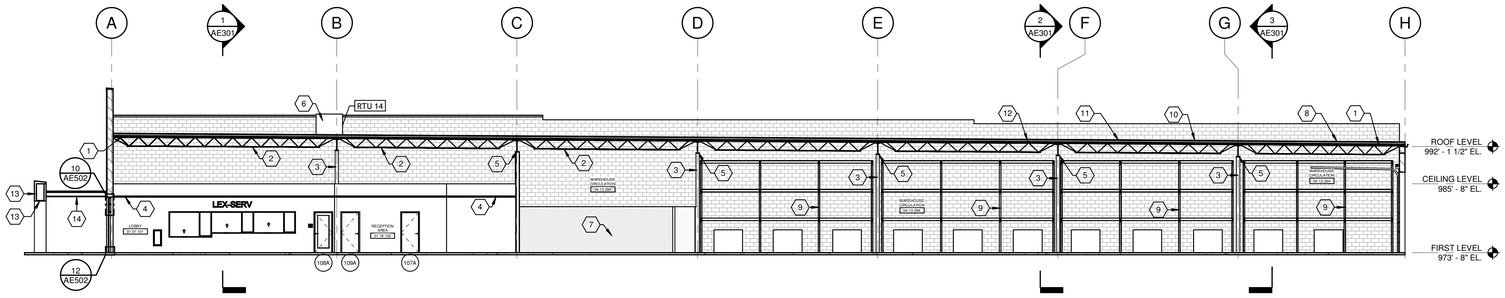
SCALE CHECK — THIS MARK SHOULD MEASURE EXACTLY 1" WHEN PLOTTED

DATE: AUGUST 15, 2025

SCALE: 3/32" = 1'-0"

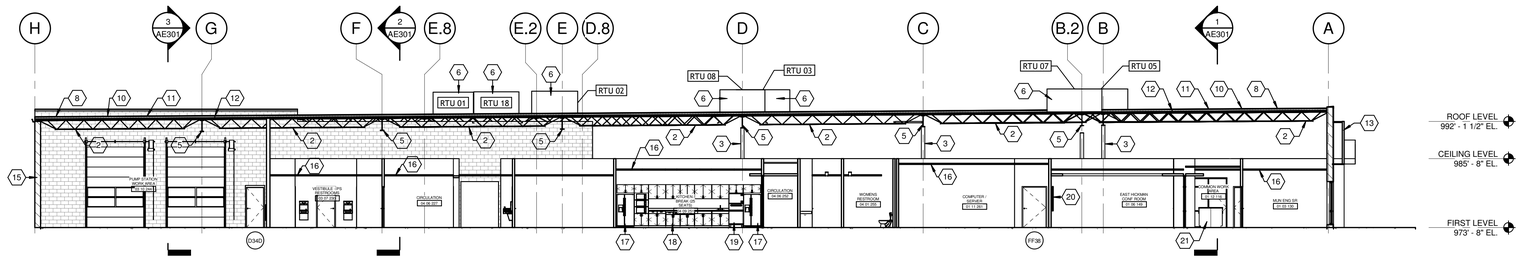
SHEET NO.: AE301 01

8/13/2025 11:45:51 AM J:\05247\1.0\1.0.CWD\1.0\CAD Working Drawings\Sheet Set\Current Sheet\05247-AE30[01].rvt



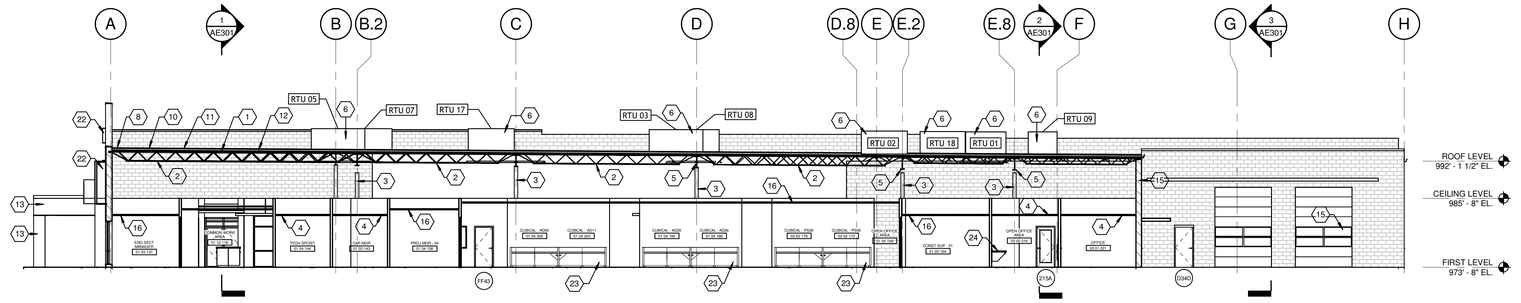
1 TRANSVERSE BUILDING SECTION 01

SCALE: 3/32" = 1'-0"



2 TRANSVERSE BUILDING SECTION 02

SCALE: 3/32" = 1'-0"



3 TRANSVERSE BUILDING SECTION 03

SCALE: 3/32" = 1'-0"

GENERAL NOTES:

1. SEE CORRESPONDING BUILDING SECTIONS INDICATED ON THIS SHEET FOR ADDITIONAL REQUIREMENTS.
2. SEE CORRESPONDING WALL SECTIONS INDICATED ON THIS SHEET FOR ADDITIONAL REQUIREMENTS.
3. SEE STRUCTURAL PLANS FOR ADDITIONAL REQUIREMENTS.
4. SEE PLUMBING PLANS FOR ADDITIONAL REQUIREMENTS.
5. SEE MECHANICAL PLANS FOR ADDITIONAL REQUIREMENTS.
6. SEE ELECTRICAL PLANS FOR ADDITIONAL REQUIREMENTS.

SHEET KEYNOTES:

1	EXISTING INSULATION BOARD AND LIGHTWEIGHT CONCRETE ROOF STRUCTURE TO REMAIN. REPAIR / REPLACE DAMAGED INSULATION BOARD WHERE EXPOSED TO VIEW. PROVIDE NEW PAINT FINISH. ADD ALTERNATE #2 - REMOVE EXISTING ROOF CURB PROVIDE NEW ROOF CURB OVER NEW METAL ROOF DECKING. SEE MECHANICAL PLANS.
2	EXISTING BAR JOIST TO REMAIN. PREPARE FOR NEW PAINT FINISH.
3	EXISTING STRUCTURAL COLUMN TO REMAIN.
4	NEW ACOUSTICAL PANEL CEILING.
5	EXISTING W SHAPE BEAM. PREPARE FOR NEW PAINT FINISH.
6	NEW RTU AND ROOF CURB EXTENSION OVER EXISTING ROOF CURB. ADD ALTERNATE #2 - REMOVE EXISTING ROOF CURB PROVIDE NEW ROOF CURB OVER NEW METAL ROOF DECKING. SEE MECHANICAL PLANS.
7	CHAIN LINK FENCE PARTITION. 8'-0" HIGH.
8	SBS MODIFIED BITUMINOUS MEMBRANE ROOFING - FINISH PLY.
9	EQUIPMENT - PALLET RACK SHELVING. (CFCI) FIRST RACK OF SHELVING SHALL BE 8'-0" A.F.F.
10	SBS MODIFIED BITUMINOUS MEMBRANE ROOFING - BASE PLY.
11	1/2" PROTECTION BOARD.
12	4" BASE POLYISOCYANURATE RIGID INSULATION.
13	EXISTING EXTERIOR FRAMING WITH EFIS FINISH TO REMAIN. PATCH AND REPAIR DAMAGED EFIS SYSTEM. PREPARE FOR NEW PAINT FINISH.
14	EXISTING ALUMINUM SOFFIT TO REMAIN. REMOVE DIRT AND CLEAN.
15	EXISITNG NOM. 12" CMU WALL TO REMAIN. REWORK / REPOINTING OPEN OR DAMAGED MORTAR JOINTS. CLEAN CMU AND PREPARE WALL FOR NEW PAINT FINISH.
16	EXISTING 2X2 ACOUSTICAL PANEL CEILING TO REMAIN.
17	REFRIGERATOR - (OFOI) SEE PLUMBING / ELECTRICAL PLANS FOR ADDITIONAL REQUIREMENTS.
18	EXISTING PLASTIC LAMINATE CABINET TO REMAIN.
19	ICE MACHINE (OFOI) SEE PLUMBING / ELECTRICAL PLANS FOR ADDITIONAL REQUIREMENTS.
20	EQUIPMENT - WALL MOUNTED TELEVISION. (OFOI) PROVIDE WOOD BLOCKING FOR TV MOUNTING. SEE ELECTRICAL PLANS FOR ADDITIONAL REQUIREMENTS.
21	PLASTIC LAMINATE CLAD ARCHITECTURAL CABINETS.
22	DIMENSIONAL LETTER SIGNAGE - 30" HIGH.
23	INTERIOR FURNISHINGS OFFICE FURNITURE SYSTEMS.
24	SOLID SURFACE COUNTERTOPS.

2. THE CARPENTRY AND METAL WORK SHOWN DEPICT SHOP FABRICATION AND JOB-SITE ASSEMBLY. THESE COMPONENTS SHOULD BE DESIGNED/FABRICATED/INSTALLED ACCORDING TO GENERALLY ACCEPTED INDUSTRY PRACTICES, STANDARDS, AND APPROVALS.
3. DISSIMILAR METAL TYPES SUBJECT TO ELECTROLYTIC REACTION SHOULD BE PHYSICALLY SEPARATED.
4. PA-1021 PLASTIC CEMENT, PA-828 FLASHING CEMENT, SFT CEMENT, OR PS-715 NS ELASTOMERIC SEALANT IS REQUIRED WHERE MASTIC IS INDICATED.
5. REQUIREMENTS AND RECOMMENDATIONS DETAILED IN CURRENT SIPLAST SPECIFICATIONS SHALL APPLY IN ADDITION TO THE ABOVE DRAWING.

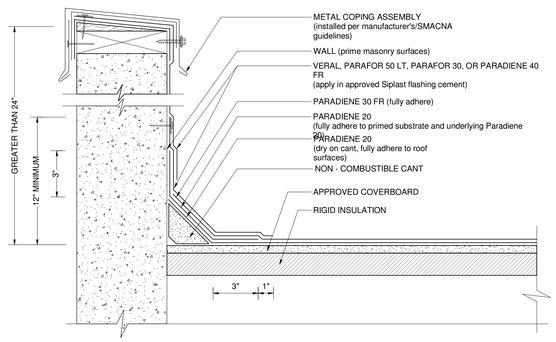
CAUTION: SIPLAST RECOMMENDS THAT ALL PRACTICES PERTAINING TO NRCA CERTA GUIDELINES BE FOLLOWED WHEN TORCHING METHODS ARE EMPLOYED. THIS INCLUDES PERFORMING A FIRE WATCH FOLLOWING ANY TORCH APPLICATIONS. ALWAYS HAVE APPROVED FIRE-EXTINGUISHING EQUIPMENT NEARBY.

7 EQUIPMENT FRAME - 2030 - RIGID

SCALE: 3" = 1'-0"

HIGH PARAPET with ADHESIVE-APPLIED FLASHING

PARADIENE 20/30 FR - RIGID INSULATION



NOTES:
1. APPLY GRANULE SURFACED FLASHING SHEETS IN PA-828 FLASHING CEMENT OR SFT CEMENT. SFT CEMENT IS REQUIRED FOR VERAL FLASHING SHEETS.
2. WHERE PRIMER IS INDICATED TO MAINTAIN PROPER ADHESION, USE PA-1125 OR PA-917 LS PRIMER. CONTACT SIPLAST FOR SPECIFIC REQUIREMENTS.
3. PREPARE GRANULE SURFACES UNDER FLASHING BY TORCH PREPARATION.
4. THE CARPENTRY SHOWN DEPICTS JOB-SITE ASSEMBLY AND SHOULD BE CONSTRUCTED ACCORDING TO GENERALLY ACCEPTED PRACTICES, STANDARDS, AND APPROVALS.
5. PA-1021 PLASTIC CEMENT, PA-828 FLASHING CEMENT, SFT CEMENT, OR PS-715 NS ELASTOMERIC SEALANT IS REQUIRED WHERE MASTIC IS INDICATED.
6. REQUIREMENTS AND RECOMMENDATIONS DETAILED IN CURRENT SIPLAST SPECIFICATIONS SHALL APPLY IN ADDITION TO THE ABOVE DRAWING.

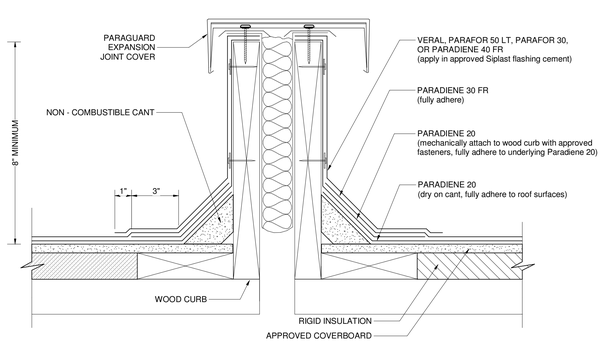
CAUTION: SIPLAST RECOMMENDS THAT ALL PRACTICES PERTAINING TO NRCA CERTA GUIDELINES BE FOLLOWED WHEN TORCHING METHODS ARE EMPLOYED. THIS INCLUDES PERFORMING A FIRE WATCH FOLLOWING ANY TORCH APPLICATIONS. ALWAYS HAVE APPROVED FIRE-EXTINGUISHING EQUIPMENT NEARBY.

2 HIGH PARAPET - 2030 - RIGID

SCALE: 3" = 1'-0"

PARAGUARD EXPANSION JOINT (ROOF-TO-ROOF) with ADHESIVE-APPLIED FLASHING

PARADIENE 20/30 FR - RIGID INSULATION



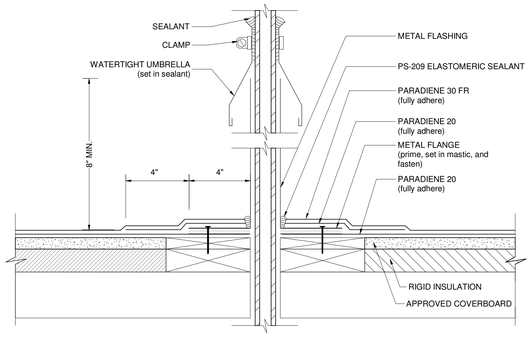
NOTES:
1. APPLY GRANULE SURFACED FLASHING SHEETS IN PA-828 FLASHING CEMENT OR SFT CEMENT. SFT CEMENT IS REQUIRED FOR VERAL FLASHING SHEETS .
2. THE CARPENTRY AND METAL WORK SHOWN DEPICTS SHOP FABRICATION AND JOB-SITE ASSEMBLY. THESE COMPONENTS SHOULD BE DESIGNED/FABRICATED/INSTALLED ACCORDING TO GENERALLY ACCEPTED INDUSTRY PRACTICES, STANDARDS, AND APPROVALS.
3. DISSIMILAR METAL TYPES SUBJECT TO ELECTROLYTIC REACTION SHOULD BE PHYSICALLY SEPARATED.
4. REFER TO THE PARAGUARD ROOF PERIMETER SYSTEM INSTALLER'S GUIDE FOR INFORMATION ON PRODUCTS, SIZING, AND INSTALLATION OF THE PARAGUARD SYSTEM.
5. REQUIREMENTS AND RECOMMENDATIONS DETAILED IN CURRENT SIPLAST SPECIFICATIONS SHALL APPLY IN ADDITION TO THE ABOVE DRAWING.

5 PGUARD EXPANSION JOINT - 2030 - RIGID

SCALE: 3" = 1'-0"

SMALL PIPE PENETRATION

PARADIENE 20/30 FR - RIGID INSULATION



NOTES:
1. WHERE PRIMER IS INDICATED TO MAINTAIN PROPER ADHESION, USE PA-1125 OR PA-917 LS PRIMER. CONTACT SIPLAST FOR SPECIFIC REQUIREMENTS.
2. THE CARPENTRY AND METAL WORK SHOWN DEPICT SHOP FABRICATION AND JOB-SITE ASSEMBLY. THESE COMPONENTS SHOULD BE DESIGNED/FABRICATED/INSTALLED ACCORDING TO GENERALLY ACCEPTED INDUSTRY PRACTICES, STANDARDS, AND APPROVALS.
3. DISSIMILAR METAL TYPES SUBJECT TO ELECTROLYTIC REACTION SHOULD BE PHYSICALLY SEPARATED.
4. PA-1021 PLASTIC CEMENT, PA-828 FLASHING CEMENT, SFT CEMENT, OR PS-715 NS ELASTOMERIC SEALANT IS REQUIRED WHERE MASTIC IS INDICATED.
5. REQUIREMENTS AND RECOMMENDATIONS DETAILED IN CURRENT SIPLAST SPECIFICATIONS SHALL APPLY IN ADDITION TO THE ABOVE DRAWING.

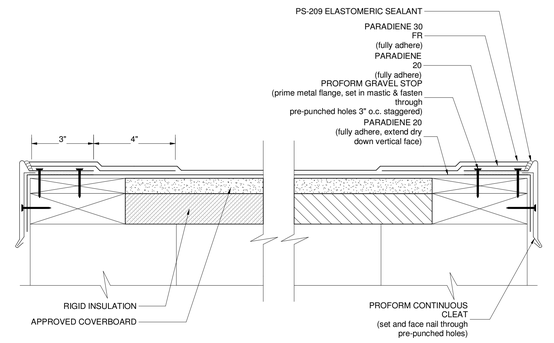
CAUTION: SIPLAST RECOMMENDS THAT ALL PRACTICES PERTAINING TO NRCA CERTA GUIDELINES BE FOLLOWED WHEN TORCHING METHODS ARE EMPLOYED. THIS INCLUDES PERFORMING A FIRE WATCH FOLLOWING ANY TORCH APPLICATIONS. ALWAYS HAVE APPROVED FIRE-EXTINGUISHING EQUIPMENT NEARBY.

8 SMALL PIPE PENETRATION - 2030 - RIGID

SCALE: 3" = 1'-0"

PROFORM GRAVEL STOP

PARADIENE 20/30 FR - RIGID INSULATION



NOTES:
1. REFER TO THE PARAGUARD ROOF PERIMETER SYSTEMS INSTALLER'S GUIDE FOR INFORMATION ON PRODUCTS, SIZING, AND INSTALLATION OF THE PARAGUARD SYSTEM.
2. WHERE PRIMER IS INDICATED TO MAINTAIN PROPER ADHESION, USE PA-1125 OR PA-917 LS PRIMER. CONTACT SIPLAST FOR SPECIFIC REQUIREMENTS.
3. PREPARE GRANULE SURFACES UNDER FLASHING BY TORCH PREPARATION.
4. THE CARPENTRY SHOWN DEPICTS JOB-SITE ASSEMBLY AND SHOULD BE CONSTRUCTED ACCORDING TO GENERALLY ACCEPTED PRACTICES, STANDARDS, AND APPROVALS.
5. PA-1021 PLASTIC CEMENT, PA-828 FLASHING CEMENT, SFT CEMENT, OR PS-715 NS ELASTOMERIC SEALANT IS REQUIRED WHERE MASTIC IS INDICATED.

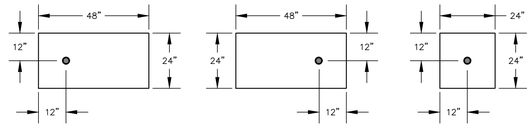
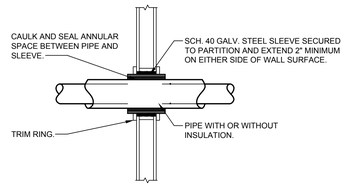
NOTE: LEGENDS ALSO APPEAR ON INDIVIDUAL PLANS, SCHEDULES AND DETAILS.

FIRE PROTECTION GENERAL NOTES:

1. PROVIDE ALL WORK NECESSARY FOR THE COMPLETE FIRE PROTECTION SYSTEM AS INDICATED AND NOTED, INCLUDING ALL CONNECTIONS TO EXISTING WORK, NEW PIPING AND ACCESSORIES AND FINAL FINISH MOUNTING OF SPRINKLERS IN LOCATIONS INDICATED AND TESTING, ALL AS REQUIRED TO MEET ALL PROVISIONS OF NFPA-13 AND THE KY BUILDING CODE. WORK SHALL BE PERFORMED BY A LICENSED SPRINKLER CONTRACTOR AND SHALL BE ACCOMPANIED BY CERTIFICATIONS OF INSPECTION AND APPROVAL BY THE DEPT. OF HOUSING, BUILDINGS AND CONSTRUCTION. ALL SCREWED PIPING SHALL BE MINIMUM SCH 40 STEEL. ALL VICTAULIC TYPE PIPING SHALL BE MINIMUM SCH 10 STEEL.
2. FIRE PROTECTION COMPONENTS, INCLUDING BUT NOT LIMITED TO PUMPS, VALVES, PIPE & FITTINGS, CONTROL SYSTEMS AND TRIM SHALL BE UL AND/OR FM LISTED FOR FIRE SERVICE, WHERE SUCH LISTING EXISTS.
3. PROVIDE LISTED AIR RELEASE FOR ALL TRAPPED RUNS OF FIRE PROTECTION PIPING.
4. ALL FERROUS FIRE PROTECTION PIPING SHALL BE PAINTED RED WHERE EXPOSED TO VIEW; SHADE TO BE APPROVED BY ENGINEER.
5. ALL FIRE PROTECTION SHUTOFF VALVES SHALL BE SUPERVISED BY THE ALARM SYSTEM EXCEPT ON JOCKEY PUMP AND BYPASS.
6. FIRE PROTECTION PIPING CONNECTIONS MAY BE WELDED, FLANGED, SCREWED OR GROOVE-JOINT TYPE PER NFPA-13, 14, 20 AND THE SPECIFICATIONS FOR THIS PROJECT. NO SCREWED PIPING LARGER THAN 2 INCHES. PITCH ALL PIPING TO DRAIN.
7. SPRINKLERS SHALL BE CENTERED IN 2' x 2' SPACE IN EITHER 2' x 2' OR 2' x 4' GRID LAYOUT.
8. COORDINATE ALL WORK. COORDINATE ALL PIPING AND ACCESSORIES WITH BOTH NEW AND EXISTING MECHANICAL AND ELECTRICAL WORK INCLUDING HVAC, PLUMBING, ELECTRICAL, FIRE ALARM AND COMMUNICATIONS. DO NOT MOUNT SPRINKLERS OR HANG PIPING SUCH AS TO BLOCK ACCESS TO HVAC OR ELECTRICAL EQUIPMENT OR THE CHANGEOUT OF EQUIPMENT WHEN NECESSARY.
9. PROVIDE SPECIAL SPRINKLERS AS REQUIRED FOR COMPLETE DESIGN. PROVIDE HIGH TEMPERATURE HEADS FOR AREAS NEAR SPACE HEATING OUTLETS AND EQUIPMENT.
10. HAZARD CLASSIFICATION IS BASED ON INFORMATION KNOWN AT THE TIME OF DESIGN. HAZARD CLASSIFICATION MAY CHANGE AS BUILDING PROGRESSES.
11. FIRE SYSTEM EXTERIOR APPURTENANCES SHALL BE FINISHED IN EITHER BRASS OR FACTORY FINISH RED (SIAMESE, WATER GONG, TRIM RING, ETC.) PER THE BASE STANDARD FINISH STYLE.
12. A TEST VALVE (INSPECTORS TEST STATION) SHALL BE INSTALLED FOR EACH WET PIPE SYSTEM AND DRY PIPE SYSTEM. PROVIDE SMOOTH BORE STEEL ORIFICE GIVING A FLOW RATE EQUIVALENT TO ONE SPRINKLER.
13. PROVIDE HEAVY GAUGE GALVANIZED STEEL HOODS AND SHIELDS (OR STAINLESS STEEL) THAT ARE SHOP FABRICATED FOR ELECTRICAL ROOMS AND COMMUNICATION ROOMS TO PROTECT ELECTRICAL EQUIPMENT FROM WATER SPRAY WHERE A SPRINKLER SYSTEM IS INSTALLED. DRAINAGE FROM THESE HOODS SHALL BE DIRECTED TO FLOOR DRAINS.
14. ANY AND ALL DAMAGE DUE TO DEMOLITION OR CONSTRUCTION IS TO BE REPAIRED OR REPLACED AS APPROPRIATE, SUBJECT TO ENGINEER'S APPROVAL, AND AT NO ADDITIONAL COST TO THE OWNER.
15. SEE ALSO DIAGRAMS, DETAILS OR SECTIONS FOR SIZES NOT SHOWN ON PLANS.
16. ALL EXISTING EQUIPMENT SHUTDOWNS OR INTERRUPTIONS OF UTILITY SERVICE REQUIRED FOR COMPLETION OF THE WORK SHALL BE SCHEDULED IN ADVANCE, AS REQUIRED BY THE OWNER.
17. CONTRACTOR IS RESPONSIBLE FOR MAKING ALL REQUIRED CONNECTIONS FOR A COMPLETE SYSTEM. SYMBOLS MISSING FROM THE DRAWINGS DO NOT EXCUSE THE CONTRACTOR FROM PROVIDING THE WORK.
18. ALL FIRE PROTECTION PIPING, FITTINGS, RESTRAINTS, HANGERS AND FASTENERS SHALL BE INSTALLED FOR SEISMIC PROTECTION IN ACCORDANCE WITH NFPA-13 AS REQUIRED.
19. EXAMINE THE CONTRACT DOCUMENTS AND IMMEDIATELY REPORT ANY ERROR, DISCREPANCY OR OMISSION. THE ENGINEER WILL DETERMINE WHICH INTERPRETATION TAKES PRECEDENCE WHERE TWO OR MORE CONFLICTING STATEMENTS OCCUR. OTHERWISE, THE CONTRACTOR IS RESPONSIBLE FOR THE MORE STRINGENT (OR EXPENSIVE) INTERPRETATION. IN GENERAL, SCHEDULES, WHEREVER THEY APPEAR, SUPERSEDE SPECIFICATIONS AND SPECIFICATIONS SUPERSEDE PLANS.
20. GENERAL NOTES, WHEREVER THEY ARE FOUND, APPLY TO ALL WORK IN THE PROJECT, UNLESS OTHERWISE INDICATED. SHEET NOTES, UTILIZING NOTE SYMBOLS, APPLY ONLY TO THE SHEET ON WHICH THEY ARE FOUND, UNLESS OTHERWISE STATED. THE MEANING OF NOTE SYMBOLS AND NUMBERS VARIES FROM SHEET TO SHEET.
21. CONTRACTOR SHALL UTILIZE ALL INFORMATION IN THE CONTRACT DOCUMENTS FOR PROVIDING THE WORK. CONTRACTOR SHALL UTILIZE DETAILS AND FLOW DIAGRAMS FOR THE WORK WHERE APPROPRIATE, WHETHER OR NOT THEY ARE SPECIFICALLY REFERENCED ON THE PLANS OR SUPPORTING DRAWINGS.
22. CONTRACTOR SHALL FIELD VERIFY ALL EXISTING CONDITIONS. ANY DISCREPANCIES BETWEEN EXISTING CONDITIONS AND CONTRACT DOCUMENTS ARE TO BE BROUGHT TO THE ATTENTION OF THE ENGINEER BEFORE ANY WORK RELATING TO THOSE CONDITIONS IS PERFORMED.
23. LEGENDS OR LISTS OF SYMBOLS AND ABBREVIATIONS ARE GENERAL IN NATURE AND MAY CONTAIN ITEMS NOT USED IN THE CONTRACT DOCUMENTS. IF ANY SUCH ITEMS ARE FOUND WHICH ARE NOT DEFINED ON THE PLANS OR IN THE SPECIFICATIONS, THE ENGINEER SHALL BE CONTACTED FOR CLARIFICATION BEFORE THE BID.
24. CONTRACTOR SHALL MAINTAIN A SET OF PROJECT RECORD DRAWINGS AT THE JOB SITE AND SHALL BE RESPONSIBLE FOR MAKING CLEAR, NEAT CHANGES TO THE DRAWINGS, REFLECTING CHANGES TO THE WORK AND VARIANCE IN EXISTING CONDITIONS.
25. PROVIDE ALL MISCELLANEOUS STEEL, AS REQUIRED, TO SUPPORT ALL PIPING SYSTEMS AND EQUIPMENT. DO NOT HANG ANYTHING FROM STEEL, COMPOSITION OR WOODEN DECKS. NON-ROOF CONCRETE DECKS MAY BE USED ONLY WITH PERMISSION OF THE ENGINEER. DO NOT HANG ANYTHING FROM MECHANICAL OR ELECTRICAL ITEMS.
26. NO STEEL STRUCTURAL MEMBERS SHALL BE CUT, BURNED, WELDED OR DRILLED WITHOUT SPECIFIC PERMISSION OF THE ENGINEER.
27. ALL EQUIPMENT, ACCESSORIES, PIPING, WIRING, AND OTHER WORK, WHICH IS INSTALLED IN FINISHED SPACES SHALL BE CONCEALED IN WALLS, FLOORS, FURRED CHASES OR SUSPENDED CEILINGS, EXCEPT WHERE OTHERWISE INDICATED.
28. PROVIDE ALL ACCESS DOORS AS SHOWN, EXCEPT THOSE SPECIFIED UNDER OTHER DIVISIONS. IN ADDITION, PROVIDE ANY OTHER ACCESS DOORS WHETHER OR NOT SHOWN ON PLANS, NECESSARY FOR ACCESS TO CONCEALED EQUIPMENT, VALVES, ALARM ACTUATORS, JUNCTION BOXES, CONTROLS OR OTHER OPERATIONAL OR SERVICEABLE ITEMS, UNLESS ITEM IS REASONABLY ACCESSIBLE THROUGH LAY-IN CEILING PANELS.



1 HEAD PLACEMENT IN ACOUSTICAL TILE DETAIL
NOT TO SCALE



NOTES:
1. TYPICAL FOR NON-INSULATED PIPE AND CONDUIT.
2. ALL CAULKING AND SEALANT SHALL BE FIRE RATED (SEE SPECIFICATIONS).

2 TYPICAL PIPE PENETRATION THRU INTERIOR WALLS

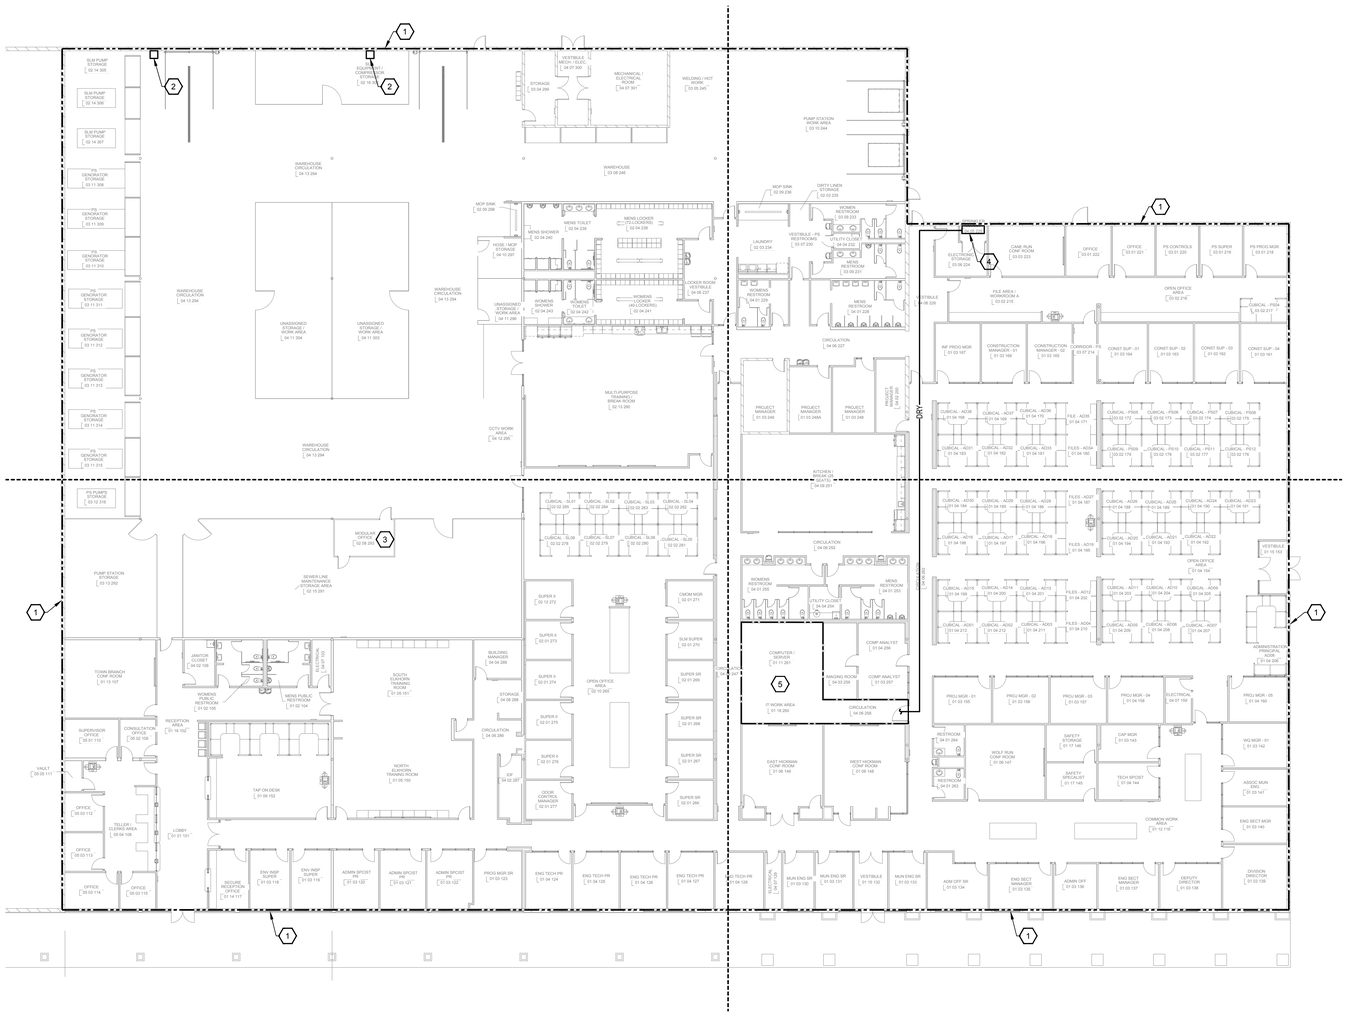
FILE NAME: G:\5247-1\LFUCG DWQ HQB\Working Drawings\AutoCAD\5247-01-FP001-01.dwg



GENERAL NOTES:

1. PROVIDE ALL WORK NECESSARY FOR THE COMPLETE FIRE PROTECTION SYSTEM AS INDICATED AND NOTED, INCLUDING ALL CONNECTIONS TO EXISTING WORK. NEW PIPING AND ACCESSORIES AND FINAL FINISH MOUNTING OF SPRINKLERS IN LOCATIONS INDICATED AND TESTING, ALL AS REQUIRED TO MEET ALL PROVISIONS OF NFPA-13 AND THE KY BUILDING CODE. WORK SHALL BE PERFORMED BY A LICENSED SPRINKLER CONTRACTOR AND SHALL BE ACCOMPANIED BY CERTIFICATIONS OF INSPECTION AND APPROVAL BY THE DEPT. OF HOUSING, BUILDINGS AND CONSTRUCTION. ALL SCREWED PIPING SHALL BE MINIMUM SCH 40 STEEL. ALL VICTAULIC TYPE PIPING SHALL BE MINIMUM SCH 10 STEEL.
2. THE FIRE SUPPRESSION CONTRACTOR SHALL CONDUCT HIS OWN FLOW TEST FOR USE IN SHOP DRAWING/HYDRAULIC CALCULATIONS. THE TEST SHALL BE FULLY COORDINATED WITH THE OWNER AND WITNESSED BY THE UTILITY COMPANY REPRESENTATIVE.
3. ALL FIRE PROTECTION COMPONENTS, INCLUDING BUT NOT LIMITED TO PUMPS, VALVES, PIPE & FITTINGS, CONTROL SYSTEMS AND TRIM SHALL BE UL AND/OR FM LISTED FOR FIRE SERVICE, WHERE SUCH LISTING EXISTS.
4. PROVIDE LISTED AIR RELEASE FOR ALL TRAPPED RUNS OF FIRE PROTECTION PIPING.
5. ALL FERROUS FIRE PROTECTION PIPING SHALL BE PAINTED RED WHERE EXPOSED TO VIEW; SHADE TO BE APPROVED BY ENGINEER.
6. ALL FIRE PROTECTION SHUTOFF VALVES SHALL BE SUPERVISED BY THE ALARM SYSTEM EXCEPT ON JOCKEY PUMP AND BYPASS.
7. FIRE PROTECTION PIPING CONNECTIONS MAY BE WELDED, FLANGED, SCREWED OR GROOVE-JOINT TYPE PER NFPA-13, 14, 20 AND THE SPECIFICATIONS FOR THIS PROJECT. NO SCREWED PIPING LARGER THAN 2 INCHES. PITCH ALL PIPING TO DRAIN.
8. CONSULT ARCHITECTURAL REFLECTED CEILING PLAN FOR PLACEMENT OF SPRINKLER HEADS IN FINISHED CEILINGS AND CEILING GRIDS. CONTRACTOR SHALL PROVIDE HYDRAULICALLY-DESIGNED PIPING SYSTEM.
9. SPRINKLERS SHALL BE CENTERED IN 2' x 2' SPACE IN EITHER 2' x 2' OR 2' x 4' GRID LAYOUT.
10. COORDINATE ALL WORK. DO NOT MOUNT SPRINKLERS OR HANG PIPING SUCH AS TO BLOCK ACCESS TO HVAC OR ELECTRICAL EQUIPMENT OR THE CHANGEOUT OF EQUIPMENT WHEN NECESSARY.
11. PROVIDE SPECIAL SPRINKLERS AS REQUIRED FOR COMPLETE DESIGN. PROVIDE HIGH TEMPERATURE HEADS FOR AREAS NEAR SPACE HEATING OUTLETS AND EQUIPMENT.
12. HAZARD CLASSIFICATION IS BASED ON INFORMATION KNOWN AT THE TIME OF DESIGN.
13. A TEST VALVE (INSPECTORS TEST STATION) SHALL BE INSTALLED FOR EACH WET PIPE SYSTEM AND DRY PIPE SYSTEM. PROVIDE SMOOTH BORE STEEL ORIFICE GIVING A FLOW RATE EQUIVALENT TO ONE SPRINKLER.
14. PROVIDE HEAVY GAUGE GALVANIZED STEEL HOODS AND SHIELDS (OR STAINLESS STEEL) THAT ARE SHOP FABRICATED FOR ELECTRICAL ROOMS AND COMMUNICATION ROOMS TO PROTECT ELECTRICAL EQUIPMENT FROM WATER SPRAY WHERE A SPRINKLER SYSTEM IS INSTALLED. DIRECT DRAIN TO NEAREST RECEPTOR.
15. ANY AND ALL DAMAGE DUE TO DEMOLITION OR CONSTRUCTION IS TO BE REPAIRED OR REPLACED AS APPROPRIATE, SUBJECT TO ENGINEER'S APPROVAL, AND AT NO ADDITIONAL COST TO THE OWNER.

⬡ SHEET KEYNOTES:

1. REWORK EXISTING FIRE PROTECTION PIPING IN OUTLINED AREA TO MATCH NEW CEILING GRID LAYOUT. SPRINKLER SYSTEM SHALL BE INSTALLED IN ACCORDANCE WITH NFPA 13.
2. EXISTING FIRE PROTECTION ENTRANCE RISER FOR WET SYSTEM SHALL REMAIN IN PLACE AND BE REUSED. REPAIR/REPLACE ANY COMPONENTS AS NEEDED.
3. SPRINKLER ABOVE AND BELOW MODULAR OFFICE CEILING AS REQUIRED.
4. EXISTING FIRE PROTECTION ENTRANCE RISER FOR DRY SYSTEM SHALL REMAIN IN PLACE AND BE REUSED. REPAIR/REPLACE ANY COMPONENTS AS NEEDED.
5. DRY SPRINKLER SYSTEM FOR COMPUTER/SERVER ROOM SHALL REMAIN IN PLACE AND BE REUSED. REPAIR/REPLACE ANY COMPONENTS AS NEEDED.

FIRST LEVEL - FIRE RPROTECTION PLAN

LFUCG DWQ HEADQUARTERS & OPERATIONS FACILITY
134 WEST NEW CIRCLE ROAD

DESIGNED:	CVS
DRAWN:	SPB
REVIEWED:	CVS
APPROVED:	CVS

NO.	DESCRIPTION	DATE	BY

THIS MARK SHOULD MEASURE EXACTLY 1" WHEN PLOTTED
SCALE CHECK

DATE: AUGUST 15, 2025
SCALE: 1/16" - 1'0"
SHEET NO.: FP101 01

PRINTED: 8/15/2025 @ 4:16PM
FILE NAME: G:\5247-1\FUCG DWQ HQB\Working Drawings\AutoCAD\5247-01-FP101-01.dwg

GENERAL LEGEND

B / E3.1 — B / M-4 — APPEARS ON SHEET WHERE SECTION IS CUT; SECTION IDENTIFICATION LETTER; SHEET WHERE SECTION IS DRAWN

B / E3.1 — B / M-4 — APPEARS ON THE SHEET WHERE SECTION IS DRAWN; SECTION OR DETAIL IDENTIFICATION LETTER; SHEET WHERE DRAWN

M1.2 / M2.1 — B — B / M1.2 / M2.1 — SECTION SYMBOL ON SHEET WHERE CUT; SHEET WHERE SECTION IS CUT; SHEET WHERE SECTION IS DRAWN

C / H1.1 / H2.2 — D / H1.1 / H2.2 — ELEVATION SYMBOL ON SHEET WHERE INDICATED; SHEET WHERE INDICATED; SHEET WHERE DRAWN

B / M1.2 / M2.1 — SECTION, ELEVATION OR DETAIL IDENTIFICATION ON SHEET WHERE DRAWN; SHEET WHERE INDICATED OR CUT; SHEET WHERE DRAWN

B / P3.2 — ENLARGED AREA OR PARTIAL PLAN SYMBOL (ON SHEET WHERE INDICATED AND SHEET WHERE DRAWN); IDENTIFICATION LETTER; SHEET WHERE DRAWN

A — PLAN MATCH LINE SYMBOL

CONNECTION OF NEW WORK TO EXISTING

LINE OR EQUIPMENT TO BE REMOVED

123 — ROOM NUMBER

9'-6" — CEILING HEIGHT

AFF	ABOVE FINISHED FLOOR
AFG	ABOVE FINISHED GRADE
TOS, BOS	TOP OF STEEL, BOTTOM
TOB, BOB	TOP OF BEAM, BOTTOM
TOJ, BOJ	TOP OF JOIST, BOTTOM
TOC, BOC	TOP OF CONCRETE, BOTTOM
TOP, BOP	TOP OF PIPE, BOTTOM
BOD	BOTTOM OF

NOTE: LEGENDS ALSO APPEAR ON INDIVIDUAL PLANS, SCHEDULES AND DETAILS.

PLUMBING LEGEND

- A DIRECTION OF PIPE FLOW
- DIRECTION OF PIPE PITCH
- D — EQUIPMENT OR SYSTEM DRAIN PIPING
- E — EXPANSION LINE
- R — SAFETY OR RELIEF VALVE DISCHARGE PIPING
- CD — CONDENSATE DRAIN PIPING
- S — EXISTING SANITARY SEWER PIPING (SITE)
- SS — EXISTING STORM SEWER PIPING (SITE)
- S — SANITARY SEWER PIPING (SITE)
- SS — STORM SEWER PIPING (SITE)
- SOIL & WASTE PIPING
- DWV VENT PIPING
- RL — ROOF LEADER PIPING
- FD — FOUNDATION DRAIN PIPING
- DCW — DOMESTIC COLD WATER PIPING
- DHW — DOMESTIC HOT WATER (140°F) PIPING
- DRW — DOMESTIC RECIRCULATING HOT WATER PIPING
- 105 — DOMESTIC HOT WATER (105°F) PIPING
- HOT WATER PIPING (FOR EXAMPLE) HEAT TRACED
- W — WATER SERVICE PIPING (EXTERIOR)
- V — VENT PIPING
- VAC — VACUUM PIPING
- A — COMPRESSED AIR PIPING
- G — NATURAL GAS PIPING

- VALVE (IN GENERAL - SEE SPECS)
- GATE VALVES (GV)
- GLOBE VALVES
- CHECK VALVE
- BALANCING VALVE (WITH READ OUT)
- BALANCING COCK ONLY (NON-SHUTOFF)
- HOSE CONNECTION, BOILER DRAIN
- BALL VALVES (BV)
- PLUG COCKS, BALANCING COCKS
- SILENT CHECK VALVE
- BUTTERFLY VALVES (BFV)
- SOLENOID OR QUICK-OPENING VALVE
- SELF REGULATING FLOW CONTROL VALVE
- RELIEF VALVE; PLAN, ELEVATION
- PRESSURE REDUCING VALVE (PRV)
- STRAINER; STRAINER WITH BLOW DOWN.
- FLEXIBLE CONNECTOR
- BACKFLOW PREVENTER, REDUCED PRESSURE (STRAINER NOT SHOWN) (BFP - RPZ)
- DOUBLE CK. VALVE ASSEMBLY (DCA)
- REDUCING BUSHING
- COUPLING, JOINT
- CAP
- PLUG
- 90° ELBOW
- 90° ELBOW TURNED UP
- 90° ELBOW TURNED DOWN
- 45° ELBOW
- TEE OR SIDE CONNECTION
- TEE OUTLET UP
- TEE OUTLET DOWN
- CROSS
- TOP / BOT. — UNCONNECTED CROSSING PIPES
- RISE OR DROP IN PIPE
- LPS — RISER ONLY, SERVICE (LPS) SHOWN
- BOTTOM CONNECTION TO LINE
- TOP CONNECTION TO LINE
- RISER IN SLEEVE
- UNION

- STRUCTURAL PIPE ANCHOR
- BUILDING ENTRANCE PIPE ANCHOR
- PIPE GUIDE
- EXPANSION JOINT
- THRUST BLOCK
- WALL SLEEVE
- CONCENTRIC REDUCER
- ECCENTRIC REDUCER
- VTR — VENT THROUGH ROOF, PLAN & RISER
- THROUGH ROOF
- THROUGH FLOOR
- THROUGH WALL
- T — THERMOMETERS
- THERMOMETER WELL
- P — PRESSURE GAUGES
- V / C — VACUUM AND COMPOUND GAUGES
- P/T — PRESSURE/TEMPERATURE TEST PLUG
- M — METER: WATER, CONDENSATE OR GAS
- R — REGULATOR
- VACUUM BREAKER
- P — PUMP
- VALVE IN PIT
- WATER HAMMER ARRESTOR

WHA-A	WATER HAMMER ARRESTOR: PDI SIZE A
EWC-1	PLUMBING FIXTURE DESIGNATOR - ELECTRIC WATER COOLER
L-1	PLUMBING FIXTURE DESIGNATOR - LAVATORY
SH-1	PLUMBING FIXTURE DESIGNATOR - SHOWER
S-1	PLUMBING FIXTURE DESIGNATOR - SINK
UR-1	PLUMBING FIXTURE DESIGNATOR - URINAL
WB-1	PLUMBING FIXTURE DESIGNATOR - WASHER BOX
WC-1	PLUMBING FIXTURE DESIGNATOR - WATER CLOSET
FD-1	FLOOR DRAIN I.D. NUMBER; PLAN & RISER
OR	OPEN RECEPTACLE
HB	HOSE BIBB
WH	WALL HYDRANT
CO	CLEAN OUT
FCO	FLOOR CLEAN OUT
GCO	GRADE CLEAN OUT
PCO	PIPE CLEAN OUT
WCO	WALL CLEAN OUT
AD	ACCESS DOOR
VTR	VENT THRU ROOF; PLAN & RISER
DCW	DOMESTIC COLD WATER
DHW	DOMESTIC HOT WATER
DRW	DOMESTIC RECIRCULATING HOT WATER

PLUMBING GENERAL NOTES:

1. GENERAL NOTES, WHEREVER THEY ARE FOUND, APPLY TO ALL WORK IN THE PROJECT, UNLESS OTHERWISE INDICATED. CONFLICTS BETWEEN GENERAL NOTES AND SPECIFICATIONS SHALL BE CALLED TO THE ATTENTION OF THE ENGINEER - THE MORE STRINGENT REQUIREMENT SHALL APPLY. SHEET KEYNOTES, UTILIZING NOTE SYMBOLS, APPLY ONLY TO THE SHEET ON WHICH THEY ARE FOUND, UNLESS OTHERWISE STATED. THE MEANING OF NOTE SYMBOLS AND NUMBERS VARIES FROM SHEET TO SHEET.
2. CONTRACTOR SHALL UTILIZE ALL INFORMATION IN THE CONTRACT DOCUMENTS FOR PROVIDING THE WORK. CONTRACTOR SHALL UTILIZE DETAILS AND RISER DIAGRAMS FOR THE WORK WHERE APPROPRIATE, WHETHER OR NOT THEY ARE SPECIFICALLY REFERENCED ON THE PLAN OR SUPPORTING DRAWINGS.
3. CONTRACTOR SHALL FIELD VERIFY ALL EXISTING CONDITIONS. ANY DISCREPANCIES BETWEEN EXISTING CONDITIONS AND CONTRACT DOCUMENTS ARE TO BE BROUGHT TO THE ATTENTION OF THE ENGINEER BEFORE ANY WORK RELATING TO THOSE CONDITIONS IS PERFORMED.
4. LEGENDS OR LISTS OF SYMBOLS AND ABBREVIATIONS ARE GENERAL IN NATURE AND MAY CONTAIN ITEMS NOT USED IN THE CONTRACT DOCUMENTS. IF ANY SUCH ITEMS ARE FOUND WHICH ARE NOT DEFINED ON THE PLANS OR IN THE SPECIFICATIONS, THE ENGINEER SHALL BE CONTACTED FOR CLARIFICATION BEFORE THE BID.
5. CONTRACTOR SHALL MAINTAIN A SET OF PROJECT RECORD DRAWINGS AT THE JOB SITE AND SHALL BE RESPONSIBLE FOR MAKING CLEAR, NEAT CHANGES TO THE DRAWINGS, REFLECTING CHANGES TO THE WORK AND VARIANCE IN EXISTING CONDITIONS.
6. PROVIDE ALL MISCELLANEOUS STEEL, AS REQUIRED, TO SUPPORT ALL PIPING SYSTEMS, FIXTURES AND EQUIPMENT. DO NOT HANG ANYTHING FROM MECHANICAL OR ELECTRICAL ITEMS.
7. NO STRUCTURAL MEMBERS SHALL BE CUT, BURNED, WELDED OR DRILLED WITHOUT SPECIFIC PERMISSION OF THE ENGINEER.
8. DO NOT CHANGE PATH OF PIPING, ADD TURNS OR OFFSETS OR PIPE SIZE WITHOUT FIRST CONSULTING THE ENGINEER. PIPE SIZES SHOWN ON DRAWINGS ARE NOMINAL UNLESS OTHERWISE INDICATED.
9. CONTRACTOR SHALL MAKE MINOR OFFSETS AND LOCATION CHANGES IN PIPE AS REQUIRED IN CONGESTED CEILING OR MECHANICAL SPACES. GENERALLY, THESE WILL BE AT NO COST TO THE OWNER AND APPROVED BY THE ENGINEER WITHOUT FORMAL DOCUMENTS. MAJOR REROUTING OF LINES OR MAJOR ADDITION OF FITTINGS WILL BE REVIEWED AND APPROVED AS A CHANGE ORDER OR A FORMAL DIRECTIVE. ENGINEER ALONE SHALL CLASSIFY CHANGES AS MAJOR OR MINOR.
10. ALL COPPER PIPING SHALL BE ASSEMBLED WITH WROUGHT COPPER OR CAST COPPER ALLOY FITTINGS AND 95/5 TIN ANTIMONY SOLDER OR SILVER BRAZING. NO SOLDER CONTAINING MORE THAN 0.2% LEAD SHALL BE USED IN MANUFACTURING OR IN FIELD ASSEMBLY OF POTABLE WATER SYSTEM COMPONENTS. ALL PIPING, FITTINGS, FIXTURES AND EQUIPMENT IN CONTACT WITH POTABLE WATER SHALL BE CERTIFIED BY THE SOURCE OF THE PRODUCT TO BE 'LEAD-FREE' (TO CONTAIN LESS THAN 0.25% LEAD) IN COMPLIANCE WITH THE EPA AND SDWA (SAFE DRINKING WATER ACT AND U.S. PUBLIC LAW 111-380).
11. ALL INTERRUPTIONS OF UTILITY SERVICE REQUIRED FOR COMPLETION OF THE WORK SHALL BE SCHEDULED 7 DAYS IN ADVANCE.
12. COORDINATE ALL PLUMBING WITH NEW MECHANICAL AND ELECTRICAL WORK, INCLUDING HVAC, PLUMBING, FIRE PROTECTION, ELECTRICAL, FIRE ALARM AND COMMUNICATIONS.
13. DO NOT USE BULL-HEADED TEE FITTINGS ON PIPE, UNLESS SPECIFICALLY SHOWN.
14. PROVIDE ALL PLUMBING CONNECTIONS, PIPING, FIXTURES AND EQUIPMENT AS INDICATED, NOTED AND SCHEDULED, FOR A COMPLETE WORKING SYSTEM. WORK SHALL BE PROVIDED BY A LICENSED PLUMBING CONTRACTOR, IN ACCORDANCE WITH KENTUCKY PLUMBING CODE, AND SHALL BE ACCOMPANIED BY A CERTIFICATE OF INSPECTION AND APPROVAL.
15. ALL EQUIPMENT, ACCESSORIES, PIPING, AND OTHER WORK, WHICH IS INSTALLED IN FINISHED SPACES SHALL BE CONCEALED IN WALLS, FLOORS, CHASES OR SUSPENDED CEILINGS, UNLESS OTHERWISE INSTRUCTED ON PLANS.
16. PROVIDE ALL ACCESS DOORS AS SHOWN, EXCEPT THOSE SPECIFIED UNDER OTHER DIVISIONS. IN ADDITION, PROVIDE ANY OTHER ACCESS DOORS (WHETHER OR NOT SHOWN ON PLANS) NECESSARY FOR ACCESS TO CONCEALED EQUIPMENT, VALVES OR OTHER OPERATIONAL OR SERVICEABLE ITEMS, UNLESS ITEM IS REASONABLY ACCESSIBLE THROUGH LAY-IN CEILING PANELS.
17. SEE RISER DIAGRAMS FOR SIZES NOT SHOWN ON PLANS.
18. THE CONTRACTOR SHALL NOT REMOVE OR DISTURB ANY SUSPECTED HAZARDOUS MATERIALS, INCLUDING ASBESTOS-CONTAINING MATERIALS (ACM), LEAD-BASED PAINTS EXCEPT AS INSTRUCTED IN THIS CONTRACT. IF ANY MATERIAL NOT COVERED BY THE CONTRACT IS ENCOUNTERED, NOTIFY THE ENGINEER AT ONCE.
19. ALL DEMOLISHED OR REMOVED EQUIPMENT, PIPING, FIXTURES, SUPPORTS, AND THE LIKE SHALL BECOME THE PROPERTY OF THE CONTRACTOR AND SHALL BE REMOVED FROM THE SITE UNLESS OTHERWISE NOTED.
20. REINSULATE ALL PIPE, VALVES AND FITTINGS WHERE EXISTING INSULATION HAS BEEN REMOVED OR DAMAGED DURING THE PROJECT.
21. FINAL PRODUCT SHALL BE A COMPLETE AND FUNCTIONING SYSTEM CONFORMING TO ALL REQUIREMENTS OF THE CURRENT BUILDING CODES OF KENTUCKY. CONTRACTOR IS RESPONSIBLE FOR MAKING ALL REQUIRED CONNECTIONS FOR A COMPLETE SYSTEM.
22. EXAMINE THE CONTRACT DOCUMENTS AND IMMEDIATELY REPORT ANY ERROR, DISCREPANCY OR OMISSION. THE ENGINEER WILL DETERMINE WHICH INTERPRETATION TAKES PRECEDENCE WHERE TWO OR MORE CONFLICTING STATEMENTS OCCUR. OTHERWISE, THE CONTRACTOR IS RESPONSIBLE FOR THE MORE STRINGENT (OR EXPENSIVE) INTERPRETATION. IN GENERAL, SCHEDULES, WHEREVER THEY APPEAR, SUPERSEDE SPECIFICATIONS AND SPECIFICATIONS SUPERSEDE PLANS.
23. APPLICABLE KENTUCKY CODES ARE:
KENTUCKY STATE PLUMBING LAW, REGULATIONS & CODE (815 KAR CHAPTER 20)
STATE BOILER REGULATION
2018 KENTUCKY BUILDING CODE
2015 INTERNATIONAL EXISTING BUILDING CODE
2015 INTERNATIONAL MECHANICAL CODE
2015 INTERNATIONAL FIRE CODE
2012 INTERNATIONAL ENERGY CONSERVATION CODE
2012 NFPA NATIONAL FUEL GAS CODE

GENERAL NOTES:

1. SEE SHEET P-001 FOR PLUMBING LEGEND AND GENERAL NOTES.
2. SEE ARCHITECTURAL PLANS AND SPECIFICATIONS FOR FINISHES WHERE PLUMBING FIXTURES ARE REMOVED.

SHEET KEYNOTES:

1. DEMOLISH ALL EXISTING GAS PIPING ON ROOF.
2. THIS SIDE OF THE PARAPET WALL DOES NOT BELONG TO LFUCG. IT BELONGS TO GOODWILL KENTUCKY. GAS PIPING ON THIS SIDE SERVING THE RTU'S OF GOODWILL KENTUCKY IS EXISTING TO REMAIN. COORDINATE ALL DEMOLITION AND NEW GAS PIPING MODIFICATIONS WITH GOODWILL KENTUCKY KEEPING SHUTDOWN OF GOODWILL KENTUCKY'S GAS SUPPLY TO A MINIMUM.
3. EXISTING GAS PIPING ON SIDE OF BUILDING TO REMAIN.
4. GAS PIPING MAIN TO GOODWILL KENTUCKY ROOF.
5. GAS PIPING MAIN TO LFUCG ROOF.

GENERAL NOTES:

1. SEE SHEET P-001 FOR PLUMBING LEGEND AND GENERAL NOTES.
2. SEE ARCHITECTURAL PLANS AND SPECIFICATIONS FOR FINISHES WHERE PLUMBING FIXTURES ARE REMOVED.

SHEET KEYNOTES:

1. EXISTING PLUMBING FIXTURES IN THIS AREA SHALL REMAIN IN PLACE AND BE REUSED.
2. EXISTING GAS-FIRED WATER HEATER SHALL REMAIN IN PLACE AND BE REUSED.
3. NOTE NOT USED.
4. EXISTING DOMESTIC WATER PIPING SHALL REMAIN IN PLACE AND BE REUSED.
5. EXISTING EXPANSION TANK SHALL REMAIN IN PLACE AND BE REUSED.
6. EXISTING DOMESTIC HOT WATER RECIRCULATION PUMP SHALL REMAIN IN PLACE AND BE REUSED.
7. EXISTING MOP BASIN SHALL REMAIN IN PLACE AND BE REUSED.
8. EXISTING ELECTRIC WATER COOLER TO BE REMOVED AND REPLACED WITH NEW IN SAME LOCATION. CONNECT BACK TO EXISTING PIPING.
9. REFER TO SHEET P403 FOR CONTINUATION OF NEW COLD WATER, HOT WATER & RECIRCLUATING HOT WATER PIPING.

GENERAL NOTES:

1. FURNISH ALL LABOR, MATERIAL, AND EQUIPMENT REQUIRED FOR THE COMPLETION & OPERATION OF ALL SYSTEMS IN THIS SECTION OF WORK IN ACCORDANCE WITH ALL APPLICABLE CODES, ASHRAE, SMACNA, NFPA, EPA, ETC.
2. REFER TO ALL PROJECT DRAWINGS FOR DETAILS OF CONSTRUCTION AND INSTALLATION REQUIREMENTS.
3. CONTRACTOR SHALL BECOME, PRIOR TO BID, THOROUGHLY FAMILIAR WITH THE REQUIREMENTS OF THESE NOTES AS WELL AS OTHER NOTES SHOWN ON THE CONTRACT DOCUMENTS.
4. THESE DRAWINGS REFLECT A SYSTEM DESIGNED AROUND SPECIFIC REFERENCE PRODUCTS (SEE SCHEDULES). THE SELECTION OF WHICH HAS INFLUENCED THE DESIGNS OF OTHER TRADES (ELECTRICAL, STRUCTURAL, ETC.) IF SUBSTITUTE MANUFACTURERS, SIZES, OR MODEL NUMBERS ARE BID, SUBMITTED OR INSTALLED, IT IS THE RESPONSIBILITY OF THE MECHANICAL CONTRACTOR AND ALL HIS SUBCONTRACTORS TO COORDINATE ALL DIFFERENCES PRIOR TO BID. ALL COSTS OF ALL TRADES ASSOCIATED WITH THE SUBSTITUTION SHALL BE INCLUDED IN THE BID.
5. COORDINATION OF ALL MODIFICATIONS TO EACH DISCIPLINE WHICH RESULT FROM SUBSTITUTION OF EQUIPMENT OR MATERIALS SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR. SUBSTITUTIONS WHICH ARE INSTALLED AND SUBSEQUENTLY ARE PROVEN UNSATISFACTORY BY OWNER AND/OR ENGINEER, WITHIN THE WARRANTY PERIOD, SHALL BE REMOVED COMPLETELY BY THE CONTRACTOR AND REPLACED WITH THE ORIGINAL DESIGN OR CORRECTED AS DIRECTED BY THE ENGINEER WITHOUT ADDITIONAL COST TO THE OWNER.
6. ALL DRAWINGS ARE DIAGRAMMATIC AND INDICATE THE GENERAL ARRANGEMENTS OR GEOMETRICAL RELATIONSHIPS OF EQUIPMENT AND SERVICES. THEY ARE NOT INTENDED TO SPECIFY OR SHOW EVERY OFFSET, SEQUENCE, DEVICE, OPTION, FITTING, VALVE, OR COMPONENT.
7. INFORMATION AND COMPONENTS SHOWN ON RISER DIAGRAMS OR DETAILS, BUT NOT SHOWN ON PLANS, AND VICE VERSA, SHALL BE PROVIDED AS IF EXPRESSLY REQUIRED BY BOTH.
8. CONTRACTOR SHALL NOT SCALE DRAWINGS. DRAWINGS SPECIFIC TO THIS DISCIPLINE DO NOT LIMIT THE RESPONSIBILITY OF WORK REQUIRED BY THE CONTRACT DOCUMENTS.
9. EXACT LOCATIONS OF ALL EQUIPMENT, DUCTS, DIFFUSERS, ETC. SHALL BE COORDINATED WITH OTHER TRADES. CEILING MOUNTED LIGHTING, AND ELECTRICAL REQUIREMENTS TAKE PRECEDENCE OVER CEILING MOUNTED MECHANICAL REQUIREMENTS.
10. CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING ALL WORK WITH THAT OF OTHER TRADES. REFER TO ELECTRICAL AND OTHER DRAWINGS FOR COMPLETE INFORMATION PRIOR TO BID.
11. ALL MECHANICAL CONSTRUCTION DETAILS SHALL BE AS SHOWN AND AS REQUIRED TO MAINTAIN "UL" ASSEMBLY RATINGS. SEAL AROUND ALL PENETRATIONS THROUGH ALL "UL" RATED ASSEMBLIES, FIRE, AND SMOKE WALLS. COORDINATE WITH GENERAL CONTRACTOR.
12. NO OTHER TRADES, I.E., ELECTRICAL, CEILING, PLUMBING, ETC., SHALL BE SUSPENDED, HUNG, OR SUPPORTED FROM DUCTWORK OR PIPING.
13. ALL BUILDING PENETRATIONS MUST BE COORDINATED WITH ENGINEER AND SHALL BE FLASHED AND SEALED WEATHERTIGHT. ALL MATERIALS AND COLORS MUST BE PRE-APPROVED BY ENGINEER.
14. ROUTE DUCTWORK AS HIGH AS POSSIBLE TO FACILITATE ACCESS TO ABOVE CEILING SPACE. COORDINATE ROUTING WITH OTHER SERVICES AND TRADES.
15. ALL DUCTWORK AND PIPING SHALL BE SUPPORTED FROM STRUCTURE.
16. ALL DUCTWORK SHALL BE CONSTRUCTED AND INSTALLED PER SMACNA HVAC DUCT CONSTRUCTION STANDARDS.
17. MAXIMUM FLEXIBLE DUCT LENGTH SHALL BE 5'-0". ALL FLEXIBLE DUCT SHALL CONFORM TO THE REQUIREMENTS OF U.L. 181 FOR CLASS 1 FLEXIBLE AIR DUCTS. SUPPORT TO ELIMINATE SAGGING & KINKING.
18. ALL HVAC EQUIPMENT TO BE INSTALLED PER MANUFACTURER'S REQUIREMENTS AS SHOWN. UTILIZE FACTORY FILTERS DURING CONSTRUCTION.
19. ALL PIPING, DUCTS, VENTS, ETC., EXTENDING THROUGH WALLS SHALL BE FLASHED, COUNTER FLASHED IN WATERPROOF MANNER W/LEAD ROOF JACK.
20. CONTRACTOR TO COORDINATE DUCTWORK WITH OTHER TRADES, OFF-SET AS REQUIRED, RUN DUCTWORK BETWEEN JOIST WHERE POSSIBLE.
21. CONTRACTOR SHALL VISIT THE JOB SITE & BE FAMILIAR WITH ALL PROJECT CONDITIONS PRIOR TO FABRICATING ANY EQUIPMENT, DUCTWORK, ETC. NO ALLOWANCES WILL BE MADE FOR CONTRACTOR UNFAMILIARITY WITH PROJECT CONDITIONS.
22. MECHANICAL CONTRACTOR SHALL BALANCE SYSTEM TO AIR QUANTITIES INDICATED ON PLANS AND PROVIDE OWNERS REPRESENTATIVES WITH COMPLETE NEBB/AABC BALANCE REPORT.
23. ALL SQUARE ELBOWS SHALL HAVE TURNING VANES. NO EXCEPTIONS.
24. PROVIDE A MANUAL VOLUME DAMPER AT ALL BRANCH TAKE-OFFS.
25. ALL DUCT DIMENSIONS SHOWN ARE INTERIOR CLEAR DUCT DIMENSIONS.
26. ALL CONTROL WIRING & CONDUIT SHALL COMPLY WITH NEC.
27. PIPE AND DUCT ROUTING SHOWN IS SCHEMATIC. HVAC CONTRACTOR SHALL PROVIDE ANY ADDITIONAL OFFSETS AND FITTINGS, INCLUDING DIVIDED DUCTS, REQUIRED FOR PROPER INSTALLATION AND TO MAINTAIN CLEARANCES AS ENCOUNTERED IN THE FIELD.
28. MECHANICAL CONTRACTOR SHALL COORDINATE WITH ELECTRICAL CONTRACTOR AND DRAWINGS FOR CONNECTIONS AND LOCATION OF ALL EQUIPMENT.
29. CONTRACTOR SHALL MAINTAIN A SET OF PROJECT RECORD DRAWINGS AT THE JOB SITE AND SHALL BE RESPONSIBLE FOR MAKING CLEAR, NEAT CHANGES TO THE DRAWINGS, REFLECTING CHANGES TO THE WORK AND VARIANCE IN EXISTING CONDITIONS.
30. CONSULT ROOF PLAN AND STRUCTURAL DRAWINGS FOR PLACEMENT OF ROOF MOUNTED EQUIPMENT. PROVIDE ALL NECESSARY ROOF CURBS, EQUIPMENT RAILS AND BASES AND ANY ADDITIONAL REQUIRED FRAMING IN COORDINATION WITH STRUCTURAL AND ROOFING WORK.
31. ALL EQUIPMENT, DUCT, PIPING AND ACCESSORIES INSTALLED OUTSIDE OR OTHERWISE EXPOSED TO THE ELEMENTS SHALL BE ADEQUATELY WEATHERPROOFED, IN KEEPING WITH THE SPECIFICATIONS. ALL FERROUS METAL FRAMING COMPONENTS SHALL BE STAINLESS STEEL OR HOT-DIP GALVANIZED.
32. PROVIDE ALL ACCESS DOORS AS SHOWN, EXCEPT THOSE SPECIFIED UNDER OTHER DIVISIONS. IN ADDITION, PROVIDE ANY OTHER ACCESS DOORS WHETHER OR NOT SHOWN ON PLANS, NECESSARY FOR ACCESS TO CONCEALED EQUIPMENT, VALVES, DAMPERS, ACTUATORS, JUNCTION BOXES, CONTROLS OR OTHER OPERATIONAL OR SERVICEABLE ITEMS, UNLESS ITEM IS REASONABLY ACCESSIBLE THROUGH LAY-IN CEILING PANELS.
33. PROVIDE LINTELS AS REQUIRED FOR ALL NEW OPENINGS GREATER THAN 12" WIDE IN MASONRY OR LOAD-BEARING WALLS, MATERIAL TO BE APPROVED BY ENGINEER.
34. ANY AND ALL DAMAGE DUE TO DEMOLITION OR CONSTRUCTION IS TO BE REPAIRED OR REPLACED AS APPROPRIATE, SUBJECT TO ENGINEER'S APPROVAL, AND AT NO ADDITIONAL COST TO THE OWNER.
35. THE CONTRACTOR SHALL NOT REMOVE OR DISTURB ANY SUSPECTED HAZARDOUS MATERIALS, INCLUDING ASBESTOS-CONTAINING MATERIALS (ACM), LEAD-BASED PAINTS, ELECTRICAL GEAR CONTAINING PCB'S OR ANY OTHER, EXCEPT AS INSTRUCTED IN THIS CONTRACT. IF ANY MATERIAL NOT COVERED BY THE CONTRACT IS ENCOUNTERED, NOTIFY THE ENGINEER AT ONCE.
36. ALL DEMOLISHED OR REMOVED EQUIPMENT, PIPING, DUCTWORK, SUPPORTS, CONTROLS AND THE LIKE SHALL BECOME THE PROPERTY OF THE CONTRACTOR AND SHALL BE REMOVED FROM THE SITE UNLESS OTHERWISE NOTED.
37. ALL EQUIPMENT PROVIDED WITH FILTERS SHALL HAVE FILTERS IN PLACE AT THE TIME OF STARTUP. ALL NEW FILTERS SHALL BE INSTALLED AT THE TIME OF OWNER OCCUPANCY, AND A COMPLETE SET OF EXTRA FILTERS SHALL BE TURNED OVER TO THE OWNER AT THIS TIME. IN THE EVENT THAT CARE IS NOT TAKEN DURING INITIAL OPERATION TO PREVENT CONTAMINATION OF THE FILTERS WITH CONSTRUCTION DUST, ADDITIONAL SETS OF FILTERS SHALL BE PROVIDED TO PROTECT THE EQUIPMENT.
38. PROVIDE ADDITIONAL INPUT/OUTPUT POINTS REQUIRED TO IMPLEMENT CONTROL SEQUENCES SPECIFIED.
39. PAINT ALL EXPOSED PLENUMS AND DUCTWORK BEHIND GRILLES AND DIFFUSERS WITH FLAT BLACK PAINT.

– – – – – – – – – – – – – –	DEMOLITION TO BE REMOVED
————————————	EXISTING TO REMAIN

ADD ALTERNATE #2:

REFER TO ARCHITECTURAL DRAWINGS FOR FURTHER DETAILS. ADD ALT #2 INCLUDES REPLACING THE EXISTING ROOF DECK. MECHANICAL CONTRACTOR SHALL INCLUDE IN ADD ALT #2 PRICING TO REMOVE ALL EXISTING RTU ROOF CURBS AND REPLACE WITH NEW CURBS FOR ALL NEW UNITS.

GENERAL NOTES:

1. DEMOLITION PLAN HAS BEEN DEVELOPED FROM EXISTING PLANS AND VISITING SITE. SOME MECHANICAL EQUIPMENT, DUCTWORK, REGISTERS AND PIPING SIZES MAY NOT BE INDICATED.
2. IT SHALL BE THE RESPONSIBILITY OF ALL CONTRACTORS WHO SUBMIT BIDS FOR THIS PROJECT TO VISIT THE JOB PREMISES PRIOR TO BIDDING IN ORDER THAT THEY MAY DETERMINE THE TYPE, QUANTITY, LOCATIONS AND ANY HARDSHIPS INVOLVED WITH THE REMOVAL OF EQUIPMENT.
3. CONTRACTOR UNDER THIS DIVISION IS FINANCIALLY RESPONSIBLE TO REPAIR AND PATCH FLOORS, WALLS, CEILING AND ROOF TO MATCH EXISTING CONDITION WHERE DEMOLITION WORK HAS BEEN DONE. COORDINATE ALL WORK WITH OWNER/ENGINEER.

SHEET KEYNOTES:

1. EXISTING ROOFTOP UNIT SHALL BE REMOVED. EXISTING ROOF CURB SHALL REMAIN IN PLACE. DISCONNECT ALL DUCTWORK AND ANY GAS PIPING IF APPLICABLE. A NEW ROOFTOP UNIT SHALL BE INSTALLED IN SAME LOCATION REUSING EXISTING ROOF CURB WITH NEW ROOF CURB ADAPTER. SEE NEW WORK PLAN FOR MORE INFORMATION.
2. EXISTING EXHAUST FAN SERVING EXISTING WAREHOUSE AREA SHALL BE REMOVED. EXISTING ROOF CURB SHALL REMAIN IN PLACE AND BE REUSED FOR NEW EXHAUST FAN. SEE NEW WORK PLAN FOR MORE INFORMATION.
3. EXISTING GRAVITY VENT ON ROOF TO REMAIN AND NOT BE REUSED.
4. EXISTING ROOF MOUNTED MAKEUP AIR UNIT TO BE REMOVED. CAP EXISTING ROOF CURB.
5. EXISTING VENT STACK TO BE REMOVED. CAP EXISTING ROOF CURB.
6. EXISTING EQUIPMENT RAIL STRUCTURE FROM CRU SHALL BE REMOVED COMPLETE.
7. EXISTING EQUIPMENT RAIL STRUCTURE SHALL BE REMOVED COMPLETE.
8. EXISTING ROOFTOP UNIT SHALL BE REMOVED COMPLETE. EXISTING CURB WILL REMAIN AND NOT BE USED. EXISTING CURB SHALL BE CAPPED WATER TIGHT.
9. EXISTING EXHAUST FAN SHALL BE REMOVED COMPLETE. EXISTING CURB WILL REMAIN AND NOT BE USED. EXISTING CURB SHALL BE CAPPED WATER TIGHT.

1. DEMOLITION PLAN HAS BEEN DEVELOPED FROM EXISTING PLANS AND VISITING SITE. SOME MECHANICAL EQUIPMENT, DUCTWORK, REGISTERS AND PIPING SIZES MAY NOT BE INDICATED.
2. IT SHALL BE THE RESPONSIBILITY OF ALL CONTRACTORS WHO SUBMIT BIDS FOR THIS PROJECT TO VISIT THE JOB PREMISES PRIOR TO BIDDING IN ORDER THAT THEY MAY DETERMINE THE TYPE, QUANTITY, LOCATIONS AND ANY HARDSHIPS INVOLVED WITH THE REMOVAL OF EQUIPMENT.
3. CONTRACTOR UNDER THIS DIVISION IS FINANCIALLY RESPONSIBLE TO REPAIR AND PATCH FLOORS, WALLS, CEILING AND ROOF TO MATCH EXISTING CONDITION WHERE DEMOLITION WORK HAS BEEN DONE. COORDINATE ALL WORK WITH OWNER/ENGINEER.

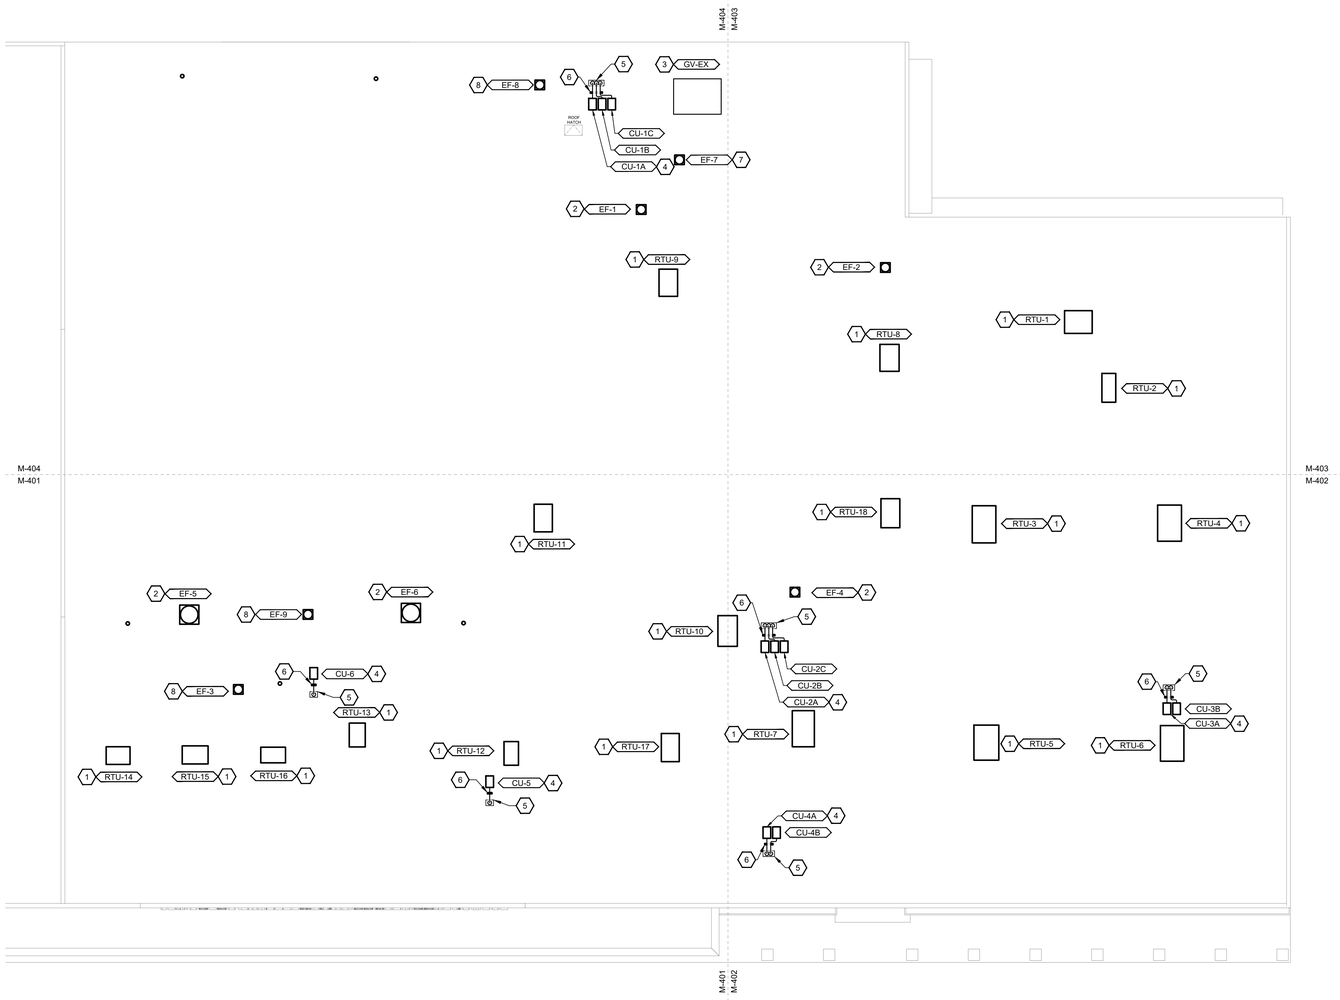
ADD ALTERNATE #2:

REFER TO ARCHITECTURAL DRAWINGS FOR FURTHER DETAILS. ADD ALT #2 INCLUDES REPLACING THE EXISTING ROOF DECK. MECHANICAL CONTRACTOR SHALL INCLUDE IN ADD ALT #2 PRICING TO REMOVE ALL EXISTING RTU ROOF CURBS AND REPLACE WITH NEW CURBS FOR ALL NEW UNITS.



GENERAL NOTES:

1. MECHANICAL CONTRACTOR SHALL COORDINATE ALL ROOF WORK WITH GENERAL CONTRACTOR AND THE NEW ROOF SYSTEM AS TO NOT VOID ANY ROOF WARRANTY.
2. MECHANICAL CONTRACTOR SHALL ENSURE ALL OUTSIDE AIR INTAKES ARE MINIMUM OF 10-FEET AWAY FROM ANY EXHAUST DISCHARGE OR PLUMBING VENT.
3. MECHANICAL CONTRACTOR SHALL ENSURE ALL NEW EQUIPMENT IS INSTALLED AT LEAST 10-FEET AWAY FROM ANY ROOF EDGE.
4. REFER TO PLUMBING PLANS FOR GAS PIPING LAYOUT/CONNECTIONS TO NEW EQUIPMENT.

SHEET KEYNOTES:

1. PROVIDE AND INSTALL NEW ROOFTOP UNIT IN SAME LOCATION AS EXISTING, REUSING EXISTING ROOF CURB. PROVIDE AND INSTALL WITH NEW ROOF CURB ADAPTER AS NEEDED. REFER TO UNIT SCHEDULE FOR ADDITIONAL INFORMATION. REFER TO ADD ALTERNATE #2 FOR REVISED ROOF CURB DETAILS.
2. PROVIDE AND INSTALL NEW EXHAUST FAN IN SAME LOCATION AS EXISTING, REUSING EXISTING ROOF CURB. SEE NEW WORK PLAN FOR MORE INFORMATION.
3. EXISTING GRAVITY VENT ON ROOF TO REMAIN AND NOT BE REUSED..
4. PROVIDE AND INSTALL CONDENSING UNIT ON ROOF PER DETAIL ON M-502-01. TYPICAL OF ALL.
5. ROUTE REFRIGERANT PIPING DOWN THROUGH ROOF VIA PIPE PORTAL. REFER TO DETAIL ON M-502-01
6. PROVIDE REFRIGERANT PIPING SUPPORTS ON ROOF. SUPPORTS SHALL BE MIRO INDUSTRIES PILLOW BLOCK OR EQUAL.
7. PROVIDE AND INSTALL EXHAUST FAN ON ROOF, REUSING EXISTING ROOF CURB. CONNECT TO EXISTING EXHAUST DUCT BELOW & TRANSITION SIZING AS NEEDED.
8. PROVIDE AND INSTALL NEW EXHAUST FAN IN NEW LOCATION ON ROOF. PROVIDE NEW ROOF CURB. SEE NEW WORK PLAN FOR MORE INFORMATION.

GENERAL NOTES:

1. COORDINATE ALL PIPE ROUTING WITH DUCTWORK, CABLE TRAY, LIGHTING, ETC. CONTRACTOR SHALL MAKE ALL OFFSETS REQUIRED AT NO ADDITIONAL COST TO OWNER.
2. DO NOT ROUTE ANY DUCTWORK OR PIPING ABOVE ELECTRICAL PANELS, TRANSFORMERS, OR DISCONNECTS.
3. CONTRACTOR SHALL ENSURE ALL MANUAL AND BALANCING DAMPERS ARE ACCESSIBLE.
4. BALANCE ALL SUPPLY, RETURN, & EXHAUST DIFFUSERS TO CFM VALUES SHOWN.
5. ALL SUPPLY DUCTWORK SHALL BE INSULATED AND IDENTIFIED PER SPECIFICATIONS.
6. MECHANICAL CONTRACTOR SHALL ENSURE ALL RETURN AIR HAS OPEN PATH BACK TO RETURN AIR DUCTWORK IN PLENUM SPACE. IF ANY WALLS EXTEND TO DECK, PROVIDE TRANSFER OPENINGS TO ALLOW FOR RETURN AIR PATH.

SHEET KEYNOTES:

1. ROUTE SUPPLY AND RETURN AIR DUCTWORK UP TO ROOF ABOVE AND TRANSITION AS NEEDED TO CONNECT UNIT OPENINGS.
2. FURNISH & INSTALL NEW SOUND TRAP ON RETURN AIR GRILLES AS SHOWN. TYPICAL FOR ALL PLENUM RETURN GRILLES. REFER TO DETAIL ON DETAIL SHEETS.
3. INSTALL HIGH EFFICIENCY TAKEOFF AT EACH GRD BRANCH TAKEOFF AS SHOWN ON DETAILS. TYPICAL OF ALL
4. ROUTE EXHAUST DUCT UP TO FAN ON ROOF ABOVE AND TRANSITION SIZE TO MATCH UNIT OPENING SIZE.
5. ROUTE PUMPED CONDENSATE TO MOP BASIN IN JANITOR CLOSET - 106.
6. EXTEND EXHAUST DUCTWORK DOWN FROM FAN ON ROOF APPROXIMATELY 4-FT BELOW ROOF SURFACE. PROVIDE STEEL MESH SCREEN OVER DUCT OPENING. DUCT SIZE SHALL MATCH FAN INLET SIZE.
7. FURNISH AND INSTALL HIGH VOLUME LOW SPEED (HVLS) FAN AT THIS LOCATION. INSTALL PER MANUFACTURER'S REQUIREMENTS AND MAINTAIN ALL SERVICE REQUIREMENTS.
8. PROVIDE TEMPERATURE SENSOR CONNECTED TO BAS TO MONITOR AIR TEMPERATURE IN ROOM. REFER TO CONTROLS DRAWINGS FOR ADDITIONAL INFORMATION.
9. FURNISH AND INSTALL INDOOR DUCTLESS SPLIT UNIT AS HIGH ON WALL AS POSSIBLE. ROUTE REFRIGERANT PIPING UP TO OUTDOOR UNIT ON ROOF.

GENERAL NOTES:

1. COORDINATE ALL PIPE ROUTING WITH DUCTWORK, CABLE TRAY, LIGHTING, ETC. CONTRACTOR SHALL MAKE ALL OFFSETS REQUIRED AT NO ADDITIONAL COST TO OWNER.
2. DO NOT ROUTE ANY DUCTWORK OR PIPING ABOVE ELECTRICAL PANELS, TRANSFORMERS, OR DISCONNECTS.
3. CONTRACTOR SHALL ENSURE ALL MANUAL AND BALANCING DAMPERS ARE ACCESSIBLE.
4. BALANCE ALL SUPPLY & EXHAUST DIFFUSERS TO CFM VALUES SHOWN.
5. ALL SUPPLY DUCTWORK SHALL BE INSULATED AND IDENTIFIED PER SPECIFICATIONS.
6. MECHANICAL CONTRACTOR SHALL ENSURE ALL RETURN AIR HAS OPEN PATH BACK TO RETURN AIR DUCTWORK IN PLENUM SPACE. IF ANY WALLS EXTEND TO DECK, PROVIDE TRANSFER OPENINGS TO ALLOW FOR RETURN AIR PATH.

SHEET KEYNOTES:

1. ROUTE SUPPLY AND RETURN AIR DUCTWORK UP TO ROOF ABOVE AND TRANSITION AS NEEDED TO CONNECT TO UNIT OPENINGS.
2. FURNISH & INSTALL NEW SOUND TRAP ON RETURN AIR GRILLES AS SHOWN. TYPICAL FOR ALL PLENUM RETURN GRILLES. REFER TO DETAIL ON DETAIL SHEETS.
3. PROVIDE AND INSTALL MAIN BAS CONTROL PANEL IN LOCATION SHOWN BELOW. COORDINATE LOCATION WITH OWNER AND OWNER'S IT DEPARTMENT. ALSO COORDINATE WITH ELECTRICAL AND CONTROLS CONTRACTORS.
4. ROUTE PUMPED CONDENSATE PIPING TO MOP BASIN IN UTILITY CLOSET - 254.
5. ROUTE EXHAUST DUCT UP TO FAN ON ROOF ABOVE AND TRANSITION SIZE TO MATCH UNIT OPENING SIZE.
6. FURNISH AND INSTALL INDOOR DUCTLESS SPLIT UNIT AS HIGH ON WALL AS POSSIBLE. ROUTE REFRIGERANT PIPING UP TO OUTDOOR UNIT ON ROOF.

GENERAL NOTES:

1. COORDINATE ALL PIPE ROUTING WITH DUCTWORK, CABLE TRAY, LIGHTING, ETC. CONTRACTOR SHALL MAKE ALL OFFSETS REQUIRED AT NO ADDITIONAL COST TO OWNER.
2. DO NOT ROUTE ANY DUCTWORK OR PIPING ABOVE ELECTRICAL PANELS, TRANSFORMERS, OR DISCONNECTS.
3. CONTRACTOR SHALL ENSURE ALL MANUAL AND BALANCING DAMPERS ARE ACCESSIBLE.
4. BALANCE ALL SUPPLY, RETURN & EXHAUST DIFFUSERS TO CFM VALUES SHOWN.
5. ALL SUPPLY DUCTWORK SHALL BE INSULATED AND IDENTIFIED PER SPECIFICATIONS.
6. MECHANICAL CONTRACTOR SHALL ENSURE ALL RETURN AIR HAS OPEN PATH BACK TO RETURN AIR DUCTWORK IN PLENUM SPACE. IF ANY WALLS EXTEND TO DECK, PROVIDE TRANSFER OPENINGS TO ALLOW FOR RETURN AIR PATH.

SHEET KEYNOTES:

1. ROUTE SUPPLY AND RETURN AIR DUCTWORK UP TO ROOF ABOVE AND TRANSITION AS NEEDED TO CONNECT TO UNIT OPENINGS.
2. EXISTING UNIT HEATER TO REMAIN.
3. EXISTING EXHAUST DUCTWORK SHALL BE CONNECTED TO NEW EXHAUST FAN ON ROOF. TRANSITION DUCTWORK AS NEEDED TO CONNECT TO FAN.
4. FURNISH AND INSTALL HIGH-VOLUME, LOW-SPEED (HVLS) FAN AT THIS LOCATION. INSTALL PER MANUFACTURER'S REQUIREMENTS AND MAINTAIN ALL SERVICE REQUIREMENTS.
5. EXISTING INTAKE LOUVER AND EXISTING MOTORIZED DAMPER TO REMAIN IN PLACE AND BE REUSED FOR VENTILATION SYSTEM IN WAREHOUSE AREA.
6. PROVIDE AND INSTALL HVLS CONTROLLER AT LOCATION SHOWN. COORDINATE POWER REQUIREMENTS WITH ELECTRICAL CONTRACTOR.
7. INSTALL NEW EXHAUST GRILLE AT BOTTOM OF VERTICAL DUCT, AT SIMILAR HEIGHT TO EXISTING.
8. ROUTE PUMPED CONDENSATE TO MOP BASIN IN MOP STORAGE - 279.
9. EXTEND EXHAUST DUCTWORK DOWN FROM FAN ON ROOF APPROXIMATELY 4-FT BELOW ROOF SURFACE. PROVIDE STEEL MESH SCREEN OVER DUCT OPENING. DUCT SIZE SHALL MATCH FAN INLET SIZE.
10. ROUTE EXHAUST DUCT UP TO FAN ON ROOF ABOVE AND TRANSITION SIZE TO MATCH UNIT OPENING SIZE.
11. FURNISH AND INSTALL INDOOR DUCTLESS SPLIT UNIT AS HIGH ON WALL AS POSSIBLE. ROUTE REFRIGERANT PIPING UP TO OUTDOOR UNIT ON ROOF.

DUCT SMOKE LOCATION PERQUISITES:

1. A UNIFORM NON TURBULENT AIRFLOW BETWEEN 142 LPS MIN TO 1888 LPS MUST BE PRESENT IN THE HVAC DUCT. TO DETERMINE THE DUCT VELOCITIES EXAMINE THE ENGINEERING SPECIFICATIONS THAT DEFINE THE EXPECTED VELOCITIES OR USE AN ALNOR MODEL 6000P VELOCITY/METER (OR EQUIVALENT).
2. IN ORDER TO PREVENT STRATIFICATION, DUCT SMOKE UNITS, WHERE POSSIBLE, MUST BE LOCATED AT A MINIMUM OF 6 DUCT WIDTHS DOWN STREAM FROM A SOURCE OF TURBULENCE I.E. ELBOWS, DEFLECTOR PLATES, DAMPERS, AND INLETS. IN INSTALLATIONS WHERE IT IS IMPOSSIBLE TO ADHERE TO THE SIX DUCT WIDTH REQUIREMENT, UNITS CAN BE INSTALLED CLOSER BUT AS FAR FROM INLETS, BENDS OR DEFLECTOR PLATES AS POSSIBLE. SHOULD THIS SITUATION ARISE, CHECK VELOCITY READINGS IN THE DUCT PRIOR TO THE DUCT SMOKE UNIT INSTALLATION. ENSURE THE DUCT SMOKE UNIT PRESSURE DIFFERENTIAL BETWEEN COMPLIES WITH THE UNIT SPECIFICATIONS. THE PRESSURE DIFFERENTIAL BETWEEN THE INLET SAMPLING TUBE AND EXHAUST TUBE FOR THE FIREX SERIES SMOKE UNIT SHOULD BE GREATER THAN 2.491 PASCALS AND LESS THAN 298.92 PASCALS.
3. IDENTIFY A LOCATION FOR THE INSTALLATION OF THE DUCT UNIT THAT WILL PERMIT EASY ACCESS FOR VIEWING AND SERVICEABILITY.
4. INSTALL DUCT UNITS IN THE RETURN AIR SIDE OF AN HVAC UNIT PRIOR TO THE AIR BEING EXHAUSTED FROM THE BUILDING OR DILUTED WITH OUTSIDE AIR.
5. LOCATE DETECTOR ON THE SIDE OR TOP OF DUCT.
6. TO PREVENT FALSE ALARMS, THE DUCT DETECTOR SHOULD NOT BE MOUNTED IN AREAS OF EXTREME HIGH OR LOW TEMPERATURES, IN AREAS WHERE HIGH HUMIDITY EXISTS OR IN AREAS WHERE THE DUCT MAY CONTAIN GASSES OR EXCESS DUST.
7. PROVIDE DUCT ACCESS DOOR FOR SERVICEABILITY.

REMARKS:
1. COOLING DESIGN CONDITIONS: 95F DB / 78F WB AMBIENT.
2. PROVIDE ROOF TOP UNIT WITH ROOF CURB ADAPTER TO INSTALL UNIT ON EXISTING ROOF CURB.
3. SINGLE POINT POWER CONNECTION WITH FACTORY INSTALLED DISCONNECT SWITCH AND 115V GFI CONVENIENCE OUTLET.
4. PROVIDE UNIT WITH STAINLESS STEEL GAS-FIRED HEAT EXCHANGER.
5. PROVIDE WITH FAN CYCLING CONTROL OPTION.
6. PROVIDE WITH HIGH AND LOW PRESSURE SWITCH.
7. PROVIDE COMPRESSOR SHORT CYCLE TIMER.
8. PROVIDE WITH HAIL GUARDS AND HINGED ACCESS DOORS.
9. PROVIDE UNIT WITH FACTORY MOUNTED DDC CONTROLLER WITH BACNET INTERFACE TO TIE INTO BUILDING AUTOMATION SYSTEM.
10. PROVIDE WITH FULLY MODULATING HOT GAS REHEAT CONTROL.
11. SUPPLY FANS SHALL BE PREMIUM EFFICIENT ECM FAN MOTORS OR PREMIUM EFFICIENT MOTORS WITH FACTORY VFD.
12. PROVIDE WITH PHASE PROTECTION.
13. PROVIDE WITH SMOKE DETECTOR SHUT DOWN. COORDINATE WITH ELECTRICAL CONTRACTOR.
14. PROVIDE UNIT WITH 2" MERV 13 FILTERS.
15. PROVIDE UNIT WITH HIGH EFFICIENCY SCROLL COMPRESSORS.
16. PROVIDE UNIT WITH AIRSIDE ECONOMIZER WITH ENTHALPY CONTROL AND FULLY MODULATING, LOW-LEAK OUTSIDE AIR AND RETURN AIR DAMPERS.
17. PROVIDE UNIT WITH POWERED EXHAUST FAN.
18. REFER TO ADD ALTERNATE ON DRAWINGS. PROVIDE NEW INSULATED ROOF CURB FOR ALL UNITS IF ADD ALTERNATE IS CHOSEN.

OTHER ACCEPTABLE MANUFACTURERS INCLUDE: DAIKIN, TRANE, YORK/JCI, CARRIER, MCQUAY. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

REMARKS:
1. DESIGN CONDITIONS: 95DB/75WB SUMMER OUTDOOR AND 80DB/67WB INDOOR.
2. COOLING ONLY UNIT. AIRFLOW SHOWN IS FOR HIGH FAN SPEED SETTING. INDOOR UNIT SHALL BE WALL MOUNTED UNIT.
3. FURNISH WITH WIRED REMOTE CONTROLLER / THERMOSTAT INSTALLED ON WALL. UNIT SHALL ALSO INTERFACE WITH BAS. COORDINATE WITH TCC.
4. PROVIDE WITH LOW AMBIENT COOLING CONTROL DOWN TO -4F, WASHABLE FILTER AND R-32 REFRIGERANT OR R-454B REFRIGERANT.
5. PROVIDE WITH FACTORY CONDENSATE PUMP AND FACTORY COVER. CONDENSATE PUMP SHALL BE POWERED BY INDOOR INDOOR UNIT.
6. INDOOR UNIT SHALL BE POWERED BY OUTDOOR UNIT. DISCONNECT SWITCH SHALL BE PROVIDED BY ELECTRICAL CONTRACTOR. COORDINATE ELECTRICAL LOAD WITH ELECTRICAL CONTRACTOR.
7. OUTDOOR UNIT SHALL BE INSTALLED ON ROOF CURB PER DETAIL. REFER TO DRAWINGS.

OTHER ACCEPTABLE MANUFACTURERS INCLUDE: DAIKIN, LG, MITSUBISHI, SAMSUNG. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

REMARKS:
1. LAY-IN TYPE
2. SIDE WALL TYPE
3. ALUMINUM CONSTRUCTION
4. COORDINATE AIR DEVICE LOCATIONS WITH REFLECTED CEILING PLANS PRIOR TO INSTALLATION. LIGHTING HAS PRIORITY OVER HVAC
5. COLOR BY ARCHITECT
6. PROVIDE WITH OPPOSED BLADE DAMPER
7. PROVIDE AND INSTALL FACTORY MOLDED INSULATION BLANKET ON ALL SUPPLY DIFFUSERS
8. PROVIDE WITH INLET TRANSITION BOX, ROUND TO RECTANGULAR

OTHER ACCEPTABLE MANUFACTURERS INCLUDE: LAUREN COOK, PRICE. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

REMARKS:
1. PROVIDE WITH UNIT MOUNTED DISCONNECT
2. PROVIDE WITH UNIT MOUNTED SPEED CONTROL
3. PROVIDE WITH GRAVITY BACKDRAFT DAMPER
4. PROVIDE WITH HIGH EFFICIENCY ECM FAN MOTOR AND MOTOR STARTERS
5. FAN SHALL OPERATE CONTINUOUS PER BAS OCCUPIED SCHEDULE
6. PROVIDE FAN WITH BIRD SCREEN
7. ROOF MOUNTED, DOWN-BLAST, PROVIDE WITH APPROPRIATE ROOF CURB (MIN. 12"). ROOF SLOPE SHALL BE CONFIRMED PRIOR TO ORDERING ROOF CURB
8. ROOF MOUNTED, UP-BLAST, PROVIDE WITH APPROPRIATE ROOF CURB (MIN. 12"). ROOF SLOPE SHALL BE CONFIRMED PRIOR TO ORDERING ROOF CURB
9. FAN SHALL BE CONTROLLED VIA WALL MOUNTED THERMOSTAT DURING OCCUPIED HOURS FROM BAS. REFER TO CONTROL DRAWINGS. PROVIDE LOW VOLTAGE TRANSFORMER AS NEEDED FOR THERMOSTAT CONTROL.
10. PROVIDE FAN WITH ON/OFF TOGGLE WALL SWITCH. COORDINATE WITH ELECTRICAL CONTRACTOR. WALL SWITCH SHALL HAVE SIGN STATING "WELDING EXHAUST FAN CONTROL"

OTHER ACCEPTABLE MANUFACTURERS INCLUDE: CARNES, COOK. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

REMARKS:
1. COLOR SELECTED BY ARCHITECT.
2. PROVIDE WITH WALL MOUNTED ADVANCED TOUCHSCREEN CONTROLLER. CONTROLLER SHALL BE ABLE TO SET DIRECTION AND FAN SPEED ON EACH FAN SEPARETLEY. CONTROLLER SHALL ALSO HAVE ABILITY TO GROUP AND OPERATE FANS TOGETHER. CONTROLLER IS 120V, COORDINATE POWER WITH ELECTRICAL CONTRACTOR.
3. VERIFY EXTENSION TUBE LENGTH AND MOUNTING BRACKET WITH MANUFACTURER PRIOR TO ORDERING.
4. SUPPORT FROM STRUCTURE ABOVE. VERIFY INSTALLATION HEIGHT WITH ARCHITECT/GENERAL CONTRACTOR.
5. MAINTAIN FACTORY CLEARANCE REQUIREMENTS.
6. PROVIDE FORWARD AND REVERSE OPERATION.
7. HVLS CONTROLLER SHALL TIE INTO BUILDING AUTOMATION SYSTEM. COORDINATE CONTROLS WORK WITH TCC.

REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

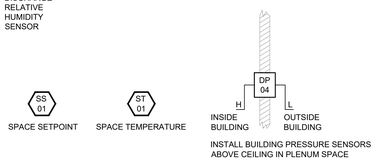
Note 1: Outside air temperature, and humidity readings can be a global point.

NOTE:

RTU-3, RTU-4, AND RTU-18 HAVE TWO THERMOSTATS FOR EACH ZONE AND THE UNIT SHALL OPERATE BASED ON ZONE TEMPERATURE AVERAGING WITH THESE TWO THERMOSTATS



SEQUENCE OF OPERATION - RTU

ROOFTOP UNITS

FANS
SUPPLY FAN SHALL RUN AT CONSTANT VOLUME AS COOLING/HEATING IS NEEDED DURING OCCUPIED HOURS. TCC SHALL CONFIRM OCCUPIED AND UNOCCUPIED HOURS WITH BUILDING OWNER. RELIEF FAN SHALL MODULATE AS REQUIRED TO MAINTAIN BUILDING PRESSURIZATION.

DAMPER CONTROL
OUTSIDE AIR DAMPER, RETURN AIR DAMPER, AND RELIEF/EXHAUST AIR DAMPER SHALL MODULATE AS NEEDED TO MAINTAIN MINIMUM OUTDOOR AIRFLOW RATE DURING OCCUPIED HOURS. OUTSIDE AIR DAMPER SHALL CLOSE IF SUPPLY FAN IS OFF OR DURING UNOCCUPIED HOURS. RELIEF/EXHAUST AIR DAMPER SHALL CLOSE IF RELIEF FAN IS OFF OR DURING UNOCCUPIED HOURS.

DX COOLING COIL CONTROL
IN COOLING MODE THE DX COOLING COIL AND COMPRESSORS SHALL ENERGIZE AND MODULATE AS REQUIRED TO MAINTAIN COOLING SPACE TEMPERATURE SETPOINT.

DEHUMIDIFICATION HOT GAS REHEAT COIL CONTROL
THE HOT GAS REHEAT COIL SHALL BE ENERGIZED IF THE RELATIVE HUMIDITY MEASURED FROM THE RETURN DUCT HUMIDITY SENSOR RISES ABOVE 50% RH (ADJ). THE COOLING COIL SHALL ACTIVATE TO PROVIDE 55°F COIL LEAVING AIR TEMPERATURE AND THE HOT GAS REHEAT COIL SHALL MODULATE CAPACITY AS NEEDED TO ACHIEVE COOLING SPACE TEMPERATURE SETPOINT AND RETURN RELATIVE HUMIDITY SETPOINT OF 50% RH (ADJ) AND THEN SHALL DE-ACTIVATE UNTIL HUMIDITY RISES ABOVE SETPOINT (ADJ).

GAS HEATING CONTROL
IN HEATING MODE THE MODULATING GAS HEATING SECTION SHALL BE ENERGIZED AND MODULATE AS NEEDED IN ORDER TO MAINTAIN SPACE TEMPERATURE. AN AIRFLOW PROVING SWITCH SHALL BE PROVIDED IN UNIT TO PREVENT GAS HEATING SECTION FROM OPERATING IN THE EVENT OF NO AIRFLOW.

ECONOMIZER
ENABLE ECONOMIZER CYCLE WITH ENTHALPY CONTROL WHEN OUTSIDE AIR TEMPERATURE IS EQUAL TO OR LESS THAN THE ECONOMIZER COOLING SWITCHOVER SETPOINT. DX COOLING SHALL BE OFF. EXHAUST (RELIEF) AIR DAMPER SHALL OPEN AND OUTSIDE AIR AND RETURN AIR DAMPERS SHALL MODULATE TO MAINTAIN MIXED AIR TEMPERATURE SETPOINT. EXHAUST FAN SHALL OPERATE TO MAINTAIN BUILDING PRESSURE AND PREVENT OVER-PRESSURIZATION. WHEN THE OUTSIDE AIR TEMPERATURE IS GREATER THAN THE SWITCHOVER SETPOINT ECONOMIZER OPERATION SHALL BE DISABLED.

UNOCCUPIED MODE / NIGHT SETBACK MODE (TIMEFRAME USER DEFINED, CONFIRM WITH OWNER)
DURING UNOCCUPIED MODE (TCC SHALL CONFIRM TIME SCHEDULES WITH BUILDING OWNER) THE OUTSIDE AIR AND RELIEF AIR DAMPERS SHALL BE FULLY CLOSED, THE SUPPLY FAN AND RELIEF FAN SHALL BE TURNED OFF. IF SPACE TEMPERATURE RISES OR FALLS OUTSIDE OF NIGHT SETBACK TEMPERATURE SETTINGS, THE UNIT SUPPLY FAN SHALL ACTIVATE AND THE UNIT SHALL OPERATE IN COOLING OR HEATING MODES TO MAINTAIN THE SETBACK SPACE TEMPERATURES. THE OUTSIDE AIR DAMPER SHALL REMAIN FULLY CLOSED AND THE RETURN DAMPER SHALL FULLY OPEN. EXHAUST FAN SHALL REMAIN OFF.

MORNING WARM-UP / COOL-DOWN (IF NEEDED BASED ON UNOCCUPIED SCHEDULE)
DEPENDING ON THE SEASON DDC SHALL CALCULATE OPTIMAL START TIME FOR OBTAINING OCCUPIED SPACE TEMPERATURE SETPOINT AS SCHEDULED. OUTSIDE AIR AND RELIEF / EXHAUST DAMPERS SHALL REMAIN CLOSED AND RETURN DAMPER SHALL REMAIN OPEN. SUPPLY FAN AND HEATING OR COOLING CONTROL SHALL MODULATE AS NEEDED TO MAINTAIN SPACE TEMPERATURE.

SMOKE / FIRE ALARMS
ACTIVATION OF ROOFTOP UNIT DUCT SMOKE DETECTOR SHALL DE-ENERGIZE ASSOCIATED ROOFTOP UNIT AND SEND AN ALARM SIGNAL TO THE FIRE ALARM SYSTEM. FIRE ALARM SYSTEM SHALL SEND A SUPERVISORY SIGNAL TO THE ROOFTOP UNIT CONTROL SYSTEM.

OVER PRESSURIZATION CONTROL
A STATIC PRESSURE SENSOR SHALL BE LOCATED IMMEDIATELY UPSTREAM OF THE SUPPLY AIR FAN AND DOWNSTREAM OF THE RETURN AIR FAN, BEFORE ANY FIRE DAMPERS OR SMOKE DAMPERS. IF THE PRESSURE IN THE SUPPLY AIR DUCT EXCEEDS 2.5" W.G. (ADJ) OR -2.0" W.G. (ADJ) IN THE RETURN AIR DUCT, BOTH FANS SHALL BE DE-ACTIVATED. UPON CORRECTION OF THE PROBLEM, THE SYSTEM SHALL BE RESET AND UNIT SHALL RETURN TO NORMAL OPERATION.

OPERATING PARAMETERS: UH

FUNCTION	SET POINT ADJUSTABLE	REMARKS
TEMPERATURE SETPOINT	65 F (ADJ)	SEND ALARM TO DDC SYSTEM IF SPACE TEMPERATURE FALLS BELOW 60F (ADJ).
BAS INTERFACE		-ON/OFF STATUS TO BAS MONITORING SYSTEM. -HEAT STATUS TO BAS MONITORING SYSTEM. -SPACE TEMPERATURE TO BAS MONITORING SYSTEM.

SEQUENCE OF OPERATION - EF

EXHAUST FANS - EF-1, EF-2, EF-3, EF-4, EF-8
EXHAUST FANS SHALL RUN CONTINUOUS DURING OCCUPIED HOURS. FAN SHALL BE OFF DURING UNOCCUPIED HOURS. VERIFY OCCUPIED HOURS WITH OWNER.

UNOCCUPIED HOURS OPERATION: THE OCCUPANCY SENSOR IN EACH RESTROOM SHALL ALSO BE CONNECTED TO BAS. IF ANY OCCUPANCY SENSOR IS ACTIVATED DURING UNOCCUPIED HOURS, THE ASSOCIATED EXHAUST FAN SHALL TURN ON AND RUN FOR 60 MINUTES, THEN TURN OFF.

EXHAUST FANS - EF-5, EF-6, EF-9
EF-9 SHALL RUN CONTINUOUS DURING OCCUPIED HOURS. FAN SHALL BE OFF DURING UNOCCUPIED HOURS. VERIFY OCCUPIED HOURS WITH OWNER. MOTORIZED CONTROL DAMPERS ON LOUVERS SHALL BE INTERLOCKED WITH FAN STATUS. IF ANY FAN IS ON, THEN LOUVER DAMPERS SHALL OPEN. IF FANS ARE OFF, THEN LOUVER DAMPERS SHALL BE CLOSED. FAN ON/OFF STATUS SHALL TIE INTO BAS MONITORING SYSTEM.

EF-5,6 SHALL BE CONTROLLED VIA WALL MOUNTED THERMOSTAT. WHEN SPACE TEMPERATURE IS 65F (ADJ) OR BELOW, FANS SHALL BE OFF. WHEN SPACE TEMPERATURE RISES ABOVE 65F (ADJ), FANS SHALL RUN CONTINUOUS DURING OCCUPIED HOURS. DURING UNOCCUPIED HOURS, FANS SHALL BE OFF.

LOUVER CONTROL DAMPER OPEN/CLOSE STATUS SHALL BE VIEWABLE AND CONNECT TO BAS.

EMERGENCY SHUTOFF: IF SPACE TEMPERATURE DROPS TO 45F (ADJ) OR BELOW, EF-1 AND EF-2 SHALL TURN OFF AND THE LOUVER MOTORIZED DAMPERS SHALL CLOSE. WHEN SPACE TEMPERATURE RISES ABOVE 45F (ADJ), FANS SHALL RESUME NORMAL OPERATION.

EXHAUST FANS - EF-7
EF-7 SHALL BE CONTROLLED VIA DEDICATED ON/OFF WALL SWITCH. IF SWITCH IS SELECTED ON, THEN FAN SHALL RUN CONTINUOUS. IF SWITCH IS OFF, FAN SHALL TURN OFF. IF FAN IS SWITCHED ON BUT DOESNT ACTIVATE, IT SHALL ALARM TO BAS.

OPERATING PARAMETERS: DSS/CU-1 THRU 6

FUNCTION	SET POINT ADJUSTABLE	REMARKS
TEMPERATURE SETPOINT	75 F (ADJ)	SEND ALARM TO DDC SYSTEM IF SPACE TEMPERATURE GOES ABOVE 85F (ADJ).
BAS INTERFACE		-ON/OFF STATUS TO BAS MONITORING SYSTEM. -HEAT/COOL STATUS TO BAS MONITORING SYSTEM. -SPACE TEMPERATURE TO BAS MONITORING SYSTEM.

DSS/CU POINTS LIST (DSS/CU 1 THRU 6)

TAG	POINT DESCRIPTION	UNITS	DI	DO	AI	AO	ALARM	TREND
TS-1	ROOM THERMOSTAT	DEG F				X	X	6 MO
OA-1	GLOBAL OUTSIDE AIR TEMPERATURE	DEG F (DEG C)			X			6 MO
RH-1	GLOBAL OUTSIDE AIR HUMIDITY	% RH			X			6 MO

Note 1: Outside air temperature, and humidity readings can be a global point.

SEQUENCE OF OPERATION - DSS

DUCTLESS SPLIT SYSTEM UNITS

FANS
SUPPLY FAN SHALL OPERATE AS NEEDED TO MAINTAIN SPACE TEMPERATURE.

COOLING COIL CONTROL
IN COOLING MODE THE DX COOLING COIL AND CONDENSING UNIT SHALL ACTIVATE AS REQUIRED TO MAINTAIN SPACE TEMPERATURE.

SEQUENCE OF OPERATION: HVLS FANS

FANS SHALL BE CONNECTED AND COMMUNICATE TO BAS. FANS SHALL BE ENABLED UNDER FACTORY HAND-OFF-AUTOMATIC (H-O-A) CONTROL OR PER BAS OCCUPIED/UNOCCUPIED SCHEDULE. FANS SHALL HAVE ABILITY TO BE PROGRAMMED SEPARATELY OR GROUPED TOGETHER.

PROVIDE FAN STATUS AND ALARM STATUS TO DDC MONITORING SYSTEM.

MODULAR OFFICE TEMPERATURE SENSOR

TEMPERATURE SENSOR SHALL BE CONNECTED TO BAS TO MONITOR SPACE TEMPERATURE INSIDE ROOM.

BAS SHALL ALARM IF SPACE TEMPERATURE RISES ABOVE 85F (ADJ) OR FALLS BELOW 55F (ADJ).

NOTE:

PER DIRECTION FROM OWNER, ALL CONTROL WIRING SHALL BE ORANGE AND SHALL NOT CONFLICT WITH OTHER SYSTEM'S WIRING. TCC SHALL COORDINATE WIRING COLOR WITH OWNER AND OWNER'S IT DEPARTMENT PRIOR TO INSTALLATION.

- CABLE TRAY
- PLUGIN OR FEEDER BUSWAY
- WALL MTD SINGLE FACE CLOCK
- WALL MTD DOUBLE FACE CLOCK

POWER DEVICES

- MOTOR CONNECTION (5 HP INDICATED)
- DISCONNECT SWITCH (ENCLOSURE TYPE, SIZE, AND FUSING, IF REQUIRED, DESIGNATED ON DRAWINGS)
- PANELBOARD, SURFACE MOUNTED
- PANELBOARD, RECESSED
- ENCLOSED CIRCUIT BREAKER (ENCLOSURE TYPE, SIZE DESIGNATED ON DRAWINGS)
- MOTOR CONTROLLER (ENCLOSURE TYPE, SIZE DESIGNATED ON DRAWINGS)
- COMBINATION STARTER/CIRCUIT BREAKER (ENCLOSURE TYPE, SIZE DESIGNATED ON DRAWINGS)
- VARIABLE FREQUENCY DRIVE (ENCLOSURE TYPE, SIZE DESIGNATED ON DRAWINGS)
- DRY TYPE TRANSFORMER - FLOOR MOUNTED ON 4" HIGH HOUSEKEEPING PAD
- MAGNETIC CONTACT, DOOR MOUNTED
- MAGNETIC CONTACT, WINDOW MOUNTED
- PASSIVE INFRARED MOTION DETECTOR, ARROW DENOTES CURTAIN DIRECTION

TELECOMMUNICATIONS

SUBSCRIPTS INDICATE THE FOLLOWING:

X	=	DATA AND/OR VOICE OUTLET
AV	=	AUDIO VISUAL OUTLET

FACEPLATE CONFIGURATION TYPE - SEE DETAIL SHEETS

- RJ-45 OUTLET - WALL-MOUNTED, MOUNT 18" AFF, UNLESS OTHERWISE NOTED
- RJ-45 OUTLET - FLOOR MOUNTED
- ONE POSITION VOICE OUTLET (RJ-45) - WHITE JACK - WALL-MOUNTED AT 48" AFF, UNLESS OTHERWISE NOTED
- AUDIO VISUAL OUTLET, MOUNT AT HEIGHT INDICATED ON FLOOR PLANS - REQUIRES TYPE F COMPRESSION CONNECTOR + EMPTY BOX FOR OWNER PROVIDED DATA CABLING

SECURITY SYSTEMS

- CR — CARD READER (OWNER FURNISHED / DIVISION 28 INSTALLED)
- ES — ELECTRIC STRIKE (DIVISION 08 FURNISHED / DIVISION 08 INSTALLED)
- ED — ELECTRIFIED EXIT DEVICE (DIVISION 08 FURNISHED / DIVISION 08 INSTALLED)
- MD — MAGNETIC LOCK (DIVISION 08 FURNISHED / DIVISION 28 INSTALLED)
- GATE OPERATOR (DIVISION 32 FURNISHED / DIVISION 32 INSTALLED)
- MD — REX MOTION DETECTOR (OWNER FURNISHED / DIVISION 28 INSTALLED)
- PB — REX PUSHBUTTON (OWNER FURNISHED / DIVISION 28 INSTALLED)
- BMS — BALANCED MAGNETIC SWITCH (OWNER FURNISHED / DIVISION 28 INSTALLED)
- CAMERA (OWNER FURNISHED / OWNER INSTALLED)
- IC — INTERCOM CALL STATION (OWNER FURNISHED / DIVISION 28 INSTALLED)
- PS — POWER SUPPLY (DIVISION 08 FURNISHED / DIVISION 28 INSTALLED)
- HC — HANDICAP DOOR ACTUATOR (DIVISION 08 FURNISHED / DIVISION 28 INSTALLED)
- X — DOOR NUMBER

FIRE ALARM/SUPPRESSION SYSTEM DEVICES

- END OF LINE RESISTOR
- FACP — FIRE ALARM CONTROL PANEL
- FSA — FIRE ALARM ANNUNICATOR PANEL
- FAC — FIRE ALARM COMMUNICATOR
- MIC — REMOTE MIC
- FIRE ALARM MANUAL STATION
  - X= A- CLEAN AGENT, C- CARBON DIOXIDE, D- DRY CHEMICAL, F- FOAM, W- WET CHEMICAL, P- MANUAL PULL STATION
- FIRE ALARM SPEAKER-HORN/STROBE LIGHT
- FIRE ALARM HORN OR SPEAKER
- FIRE ALARM BELL/LIGHT
- WATER MOTOR GONG
- FIRE ALARM STROBE LIGHT
- SMOKE DETECTOR
  - X= P- PHOTOELECTRIC, I- IONIZATION, BT- BEAM TRANSMITTER, BR- BEAM RECEIVER
- DUCT MOUNTED SMOKE DETECTOR
- DUCT DETECTOR REMOTE TEST SWITCH
- HEAT DETECTOR, SUBSCRIPT DENOTES THE FOLLOWING:
  - X= F-FIXED TEMPERATURE, R-RATE OF RISE, R/F-COMBINATION RATE OF RISE AND FIXED
- TAMPER SWITCH CONNECTION
- FLOW SWITCH CONNECTION
- DOOR HOLDER
- PRESSURE SWITCH
- LEVEL SWITCH
- VALVE WITH TAMPER SWITCH
- MUSHROOM HEAD EMERGENCY PUSHBUTTON SWITCH
- FIRE FIGHTER'S TELEPHONE STATION
- CO_2 FIRE EXTINGUISHER
- AMM — ADDRESSABLE MONITOR MODULE
- CO — CARBON MONOXIDE DETECTOR

EXISTING / EXTERIOR / NEW

EXISTING	EXTERIOR	NEW

DEMOLITION

- ITEMS / AREAS THAT ARE TO BE DEMOLISHED ARE INDICATED WITHIN A HATCH PATTERN

SINGLE LINE DIAGRAMS/CONTROLS

- ETM — ELAPSED TIME METER
- TM — TIMER MOTOR
- R OR CR# — CONTROL RELAY
- SV — SOLENOID VALVE CONNECTION
- LS — LIMIT SWITCH CONNECTION
- T — THERMOSTAT CONNECTION
- PC OR — PHOTOCELL
- PS — PRESSURE SWITCH CONNECTION
- A — AMMETER
- DM — DAMPER MOTOR ACTUATOR, SPRING RETURN
- EF — EXHAUST FAN MOTOR
- V — VOLTMETER
- W — WATTMETER
- WH — WATTHOUR METER
- M — MOTOR STARTER COIL
- M / OL — MOTOR CONTACTOR / MOTOR OVERLOAD
- INDICATOR LIGHT (CONTROL CIRCUIT)
- PUSH TO TEST — INDICATOR LIGHT W/PUSH TO TEST (CONTROL CIRCUIT)
- ON / OFF — 2 POSITION SELECTOR SWITCH: ON-OFF
- L / O / R — 3 POSITION SELECTOR SWITCH: LOCAL-OFF-REMOTE HAND-OFF-AUTOMATIC
- L / O / R / A — 4 POSITION SELECTOR SWITCH: LOCAL-OFF-REMOTE-AUTOMATIC
- STOP / START / M — START-STOP PUSHBUTTON (NON-MAINTAINED CONTACT)
- OFF / ON — ON-OFF PUSHBUTTON (MAINTAINED CONTACT)
- CONTROL PANEL HEATER/COOLING FAN
- E-STOP — EMERGENCY STOP PUSHBUTTON STATION
- SWITCH, NONFUSED
- FUSED SWITCH
- OR — FUSE
- MAGNETIC ONLY CIRCUIT BREAKER (SINGLE POLE SHOWN)
- THERMAL-MAGNETIC CIRCUIT BREAKER (SINGLE POLE SHOWN)
- CIRCUIT BREAKER GENERIC
- GF — GROUND FAULT PROTECTED BREAKER
- LINE REACTOR
- CURRENT TRANSFORMER
- POTENTIAL TRANSFORMER
- SPD — SURGE PROTECTIVE DEVICE, TYPE 1 OR TYPE 2
- TS OR — LIGHTNING ARRESTOR (GROWBAR STYLE)
- CAPACITOR
- GROUND
- TRANSFORMER
- RELAY CONTACT (NORMALLY OPEN)
- RELAY CONTACT (NORMALLY CLOSED)
- TIMER CONTACT - NORMAL OPEN, TIME CLOSE — N.O.T.C.
- TIMER CONTACT - NORMAL CLOSE, TIME OPEN — N.C.T.O.
- TIMER CONTACT - NORMAL OPEN, TIME OPEN — N.O.T.O.
- TIMER CONTACT - NORMAL CLOSE, TIME CLOSE — N.C.T.C.
- KEY INTERLOCK
- THERMAL OVERLOAD PROTECTION
- BATTERY
- AUTOTRANSFORMER
- DOUBLE THROW SWITCH OR TRANSFER SWITCH
- FLOAT SWITCH (NORMALLY CLOSED)
- THERMOSTATIC SWITCH
- PRESSURE SWITCH
- LIMIT SWITCH OR TORQUE SWITCH
- DOT INDICATES CONNECTION OF WIRES
- 1 2 — TERMINALS FOR WIRE CONNECTIONS FROM REMOTE DEVICE

GENERAL NOTES:

1. THE MINIMUM STANDARD FOR ALL WORK SHALL BE THE LATEST EDITION OF THE INTERNATIONAL BUILDING CODE WITH IN STATE AMENDMENTS AND THE NATIONAL ELECTRICAL CODE (NEC).
2. ALL ELECTRICAL WORK SHALL BE PERFORMED BY AN IN-STATE LICENSED ELECTRICIAN.
3. ALL PERMITS NEEDED TO LEGALLY PERFORM THE ELECTRICAL WORK SHALL BE OBTAINED BY THE CONTRACTOR PRIOR TO START OF WORK. COST OF PERMITTING IS BY THE CONTRACTOR.
4. AT COMPLETION OF THE WORK, A CERTIFICATE OF COMPLIANCE FROM THE LOCAL AHJ OVER THE ELECTRICAL WORK SHALL BE PROVIDED TO THE ENGINEER AND OWNER. COST OF ELECTRICAL INSPECTION IS BY THE CONTRACTOR.
5. ALL MATERIALS USED IN THE PROJECT GENERALLY SHALL BE NEW AND UNUSED. UNLESS OTHERWISE NOTED ON THE DRAWINGS. ALL NEW MATERIALS SHALL BE LISTED AND LABELED BY UL OR OTHER ACCEPTABLE LISTING AGENCY, WHERE A LISTING EXISTS.
6. THE CONTRACTOR SHALL VISIT THE SITE(S) PRIOR TO BIDDING TO FAMILIARIZE THEMSELVES WITH PROJECT REQUIREMENTS AND EXISTING CONDITIONS.
7. FIRESTOP ALL NEW CONDUIT INSTALLED THROUGH EXISTING OR NEW FIRE RATED ASSEMBLIES.
8. SHOP DRAWINGS SHALL BE SUBMITTED ON ALL ELECTRICAL MATERIALS AND EQUIPMENT FOR ACCEPTANCE PRIOR TO PURCHASE BY THE CONTRACTOR.
9. WHEN AN ITEM DEMOLISHED IS REMOVED, REMOVE ALL CONCRETE PADS, FASTENERS, CONDUIT AND WIRING. SCARIFY SURFACE AND RESTORE TO MATCH EXISTING SURROUNDING SURFACE, INCLUDING PAINTING TO MATCH.
10. ALL NEW WIRING SHALL BE ENCLOSED IN AN APPROVED RACEWAY SYSTEM. OPEN WIRING IS PROHIBITED.
11. CIRCUIT BREAKERS USED FOR HVAC EQUIPMENT LOADS SHALL BE HACR TYPE.
12. ENSURE DEDICATED ELECTRICAL SPACE IS PROVIDED AT ELECTRICAL EQUIPMENT IN ACCORDANCE WITH NEC ARTICLE 110.26.
13. UP TO 3 CIRCUITS MAY BE COMBINED IN ONE CONDUIT, AS LONG AS NEC DERATING RULES ARE FOLLOWED.
14. ALL CIRCUITS SHALL HAVE A DEDICATED NEUTRAL. SHARED NEUTRALS AND MULTI-WIRE CIRCUITS ARE NOT TO BE USED EXCEPT POSSIBLY TO COORDINATE WITH SYSTEMS FURNITURE. SEE POWER PLAN.
15. 120 VOLT CIRCUITS THAT EXCEED 75 LINEAR CIRCUIT FEET SHALL BE INCREASED TO #10 AWG AS A GENERAL RULE. OTHER CIRCUITS WILL BE DESIGNED SPECIFICALLY WITH VOLTAGE DROP CONSIDERED IN CONDUCTOR SIZING.
16. COORDINATE ALL MOTOR STARTERS, FEEDERS AND DISCONNECT SWITCHES FOR HVAC AND OTHER UTILIZATION EQUIPMENT ACTUALLY PROVIDED IN ACCEPTED SHOP DRAWINGS.
17. IN ORDER TO COMPLY WITH OSHA REQUIREMENTS, NO OPERATOR DEVICE OF ANY PANEL OR DISCONNECT OR MOTOR CONTROL SHALL BE HIGHER THAN 6'-6" AFF.
18. PROVIDE AN EXTERIOR RATED SERVICE RECEPTACLE WITHIN 25 FEET HORIZONTALLY OF ANY EXTERIOR OR ROOFTOP HVAC OUTDOOR UNIT (HEATING OR AIR CONDITIONING ONLY).
19. INSTALL A NYLON PULLSTRING IN ALL SPARE CONDUITS, ACCESSIBLE AT BOTH ENDS. CAP OFF SPARE CONDUITS ON BOTH ENDS.
20. DEVICE PLATES SHALL BE INSTALLED PLUMB. JUMBO OR OVERSIZED PLATES SHALL NOT BE USED.
21. NEW RECEPTACLES SHALL BE INSTALLED WITH GROUND PIN ORIENTATION TO MATCH EXISTING. IN NEW CONSTRUCTION, GROUND PIN DOWN ABOVE COUNTERS OR WORK BENCHES AND UP FOR LOW WALL MOUNTED DEVICES.
22. AT COMPLETION OF PROJECT, ALL ELECTRICAL, TELECOMMUNICATIONS, AND ELECTRONIC SAFETY SYSTEMS SHALL BE FULLY OPERATIONAL.
23. EGRESS LUMINAIRES AND EXIT SIGNS REQUIRE UNSWITCHED LIGHTING CONDUCTOR.
24. SUPPORT ALL LUMINAIRES FROM THE STRUCTURE, NOT FROM THE SUSPENDED CEILING GRID. ALSO ATTACH THE LUMINAIRES TO THE GRID SYSTEM USING EARTHQUAKE CLIPS (SIMILAR TO ERICO/CADDY FASTENERS OR T&B/STEEL CITY).
25. WHERE DUPLEX RECEPTACLES ARE INDICATED GENERALLY BACK TO BACK ON OPPOSITE SIDES OF A PARTY WALL, THE RECEPTACLES SHALL NOT BE INSTALLED IN THE SAME STUD SPACE, BUT SHALL BE SEPARATED BY AT LEAST ONE STUD SPACE.
26. PROVIDE LABEL WITH ESTIMATED FAULT CURRENT AND DATE CALCULATED ON THE MAIN SERVICE DISCONNECT ENCLOSURE. PROVIDE COORDINATION STUDY AND ARC FLASH STUDY, AND APPLY JOB SPECIFIC ARC FLASH HAZARD WARNING LABELS ON ALL SWITCHBOARDS, SWITCHGEAR, MCC'S AND PANELBOARDS.
27. CIRCUIT BREAKERS, 1200 AMPERE OR LARGER, SHALL COMPLY WITH NEC ARTICLE 240.87, ARC ENERGY REDUCTION.

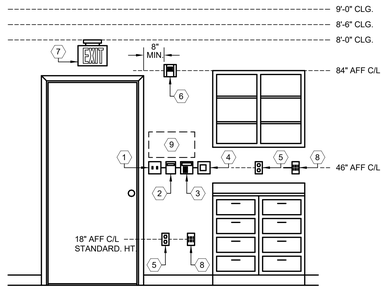
1 DEDICATED ELECTRICAL SPACE DETAIL

NOT TO SCALE



SHEET KEYNOTES:

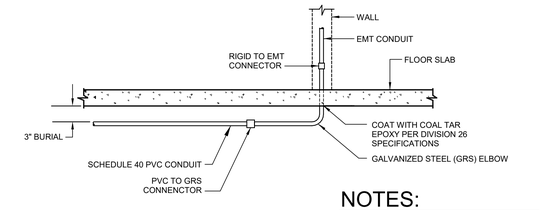
1. MOUNT EDGE OF LIGHTING CONTROL DEVICES CLOSEST TO DOOR AT A DISTANCE OF TWO INCHES FROM THE EDGE OF THE FACE PLATE TO THE DOOR FRAME INCLUDING ALL APPLIED TRIM UNLESS OTHERWISE NOTED. MOUNT REMAINING DEVICES IN THE FOLLOWING ORDER:

   A. FIRE ALARM INITIATION DEVICES.
   B. SECURITY/ACCESS CONTROL DEVICES.
   C. HVAC THERMOSTAT/HUMIDISTAT DEVICES.
   D. OTHER DEVICES.

   MOUNT THE EDGE OF DEVICE OR DEVICE FACE PLATES TWO INCHES APART. PROVIDE BLOCKING AS NECESSARY IN THE WALL OR PROVIDE MANUFACTURED SUPPORTS SIMILAR TO CADDY 'RB' SERIES OR EQUAL. ALL DEVICES TO BE MOUNTED WITH CENTER LINE AT HEIGHT INDICATED.
2. FIRE ALARM INITIATING DEVICE.
3. SECURITY/ACCESS CONTROL KEYPAD.
4. HVAC THERMOSTAT/HUMIDISTAT CONTROL DEVICE.
5. ABOVE COUNTER ELECTRICAL/COMMUNICATIONS DEVICE, COORDINATE MOUNTING HEIGHT WITH ARCHITECTURAL INTERIOR ELEVATIONS. SHOWN AT TYPICAL HEIGHT.
6. FIRE ALARM NOTIFICATION APPLIANCE.
7. INSTALL WALL MOUNTED EXIT SIGNS WITH BOTTOM EDGE OF SIGN APPROXIMATELY FOUR INCHES FROM TOP OF DOOR FRAME.
8. COMMUNICATIONS OUTLET.
9. WHEN SIGNAGE WITH TACTILE CHARACTERS ARE TO BE INSTALLED, THE BOTTOM OF TACTILE SIGNAGE SHALL BE MOUNTED AT 50" AFF MINIMUM WITH THE TOP MOUNTED AT A MAXIMUM OF 60" AFF. PROVIDE A CLEAR SPACE OF 18" IN FRONT OF SIGNAGE. ALL OTHER PROVISIONS AND SPACINGS REQUIRED BY A.D.A. SHALL BE FOLLOWED.

2 DEVICE MOUNTING COORDINATION DETAIL

NOT TO SCALE

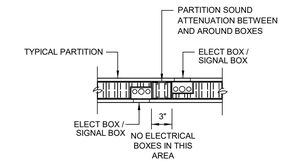


NOTES:

1. THIS DETAIL APPLIES TO ALL RISERS THROUGH SLAB ON GRADE, EITHER IN WALL OR EXPOSED.

3 THROUGH-SLAB CONDUIT DETAIL

NOT TO SCALE

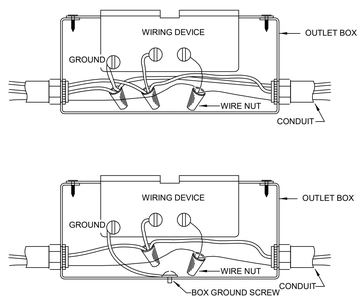


NOTES:

1. ROUGH-IN BOXES MAY BE MOUNTED IN ADJACENT STUD SPACE ONLY IF THE BOXES FACE THE SAME DIRECTION. BACK-TO-BACK BOXES MUST BE SEPARATED PER THIS DETAIL.
2. DO NOT PLACE BOXES BACK-TO-BACK EVEN IF SHOWN GRAPHICALLY ON DRAWINGS AS BACK-TO-BACK. BOXES SHALL BE INSTALLED SEPARATED PER THIS DETAIL. PROVIDE ADDITIONAL METAL FRAMING AS NECESSARY TO INSTALL BOXES SEPARATED AS INDICATED.
3. ELEC/SIGNAL BOXES WITH OPENING AREAS NOT EXCEEDING 16 SQUARE INCHES PLACED IN RATED WALLS FACING IN OPPOSITE DIRECTIONS SHALL BE SEPARATED A MINIMUM OF 24 INCHES. INSTALLATION SHALL BE IN ACCORDANCE WITH KENTUCKY BUILDING CODE SECTION 711.3.2 "MEMBRANE PENETRATIONS".

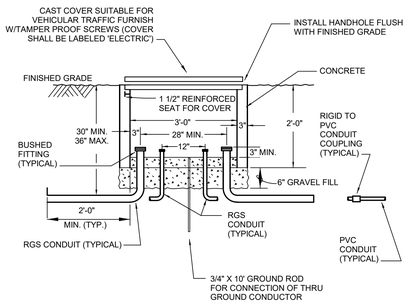
4 BACK-TO-BACK BOX MOUNTING DETAIL

NOT TO SCALE



5 WIRING DEVICE CONNECTION DETAIL

NOT TO SCALE



NOTES:

1. THIS DETAIL ALSO APPLIES FOR COMMUNICATIONS (SIGNAL WIRING) WHERE SHOWN ON DRAWINGS. COVER SHALL BE LABELED 'COMMUNICATIONS' WHERE UTILIZED FOR SIGNAL WIRING.
2. DIMENSIONS ARE FOR REFERENCE ONLY. PULL BOXES SHALL BE SIZED PER NEC.

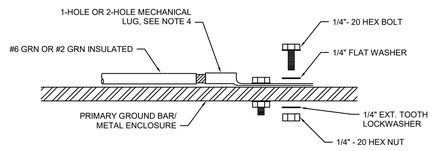
1 GROUND BAR DETAIL

NOT TO SCALE

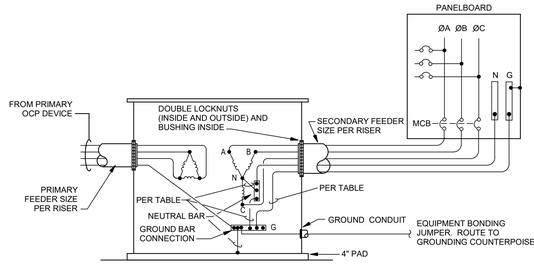


INSTALLATION NOTES

1. SELECT BOLT LENGTH TO PROVIDE A MINIMUM OF TWO EXPOSED THREADS.
2. FURNISH MOUNTING SURFACE TO REMOVE PAINT IN THE AREA OF LUG CONTACT.
3. APPLY ANTI-OXIDANT COMPOUND TO MATING SURFACE OF LUG AND WIPE CLEAN EXCESS COMPOUND.
4. USE SOLID COPPER WIRE AND MECHANICAL 2-HOLE LUG FOR ALL EXTERIOR GROUNDING.
5. PROVIDE NUMBER AND SIZE OF CONNECTORS AND GROUND CONDUCTORS AS REQUIRED FOR EACH GROUND BAR LOCATION.

2 GROUNDING CONNECTION

NOT TO SCALE

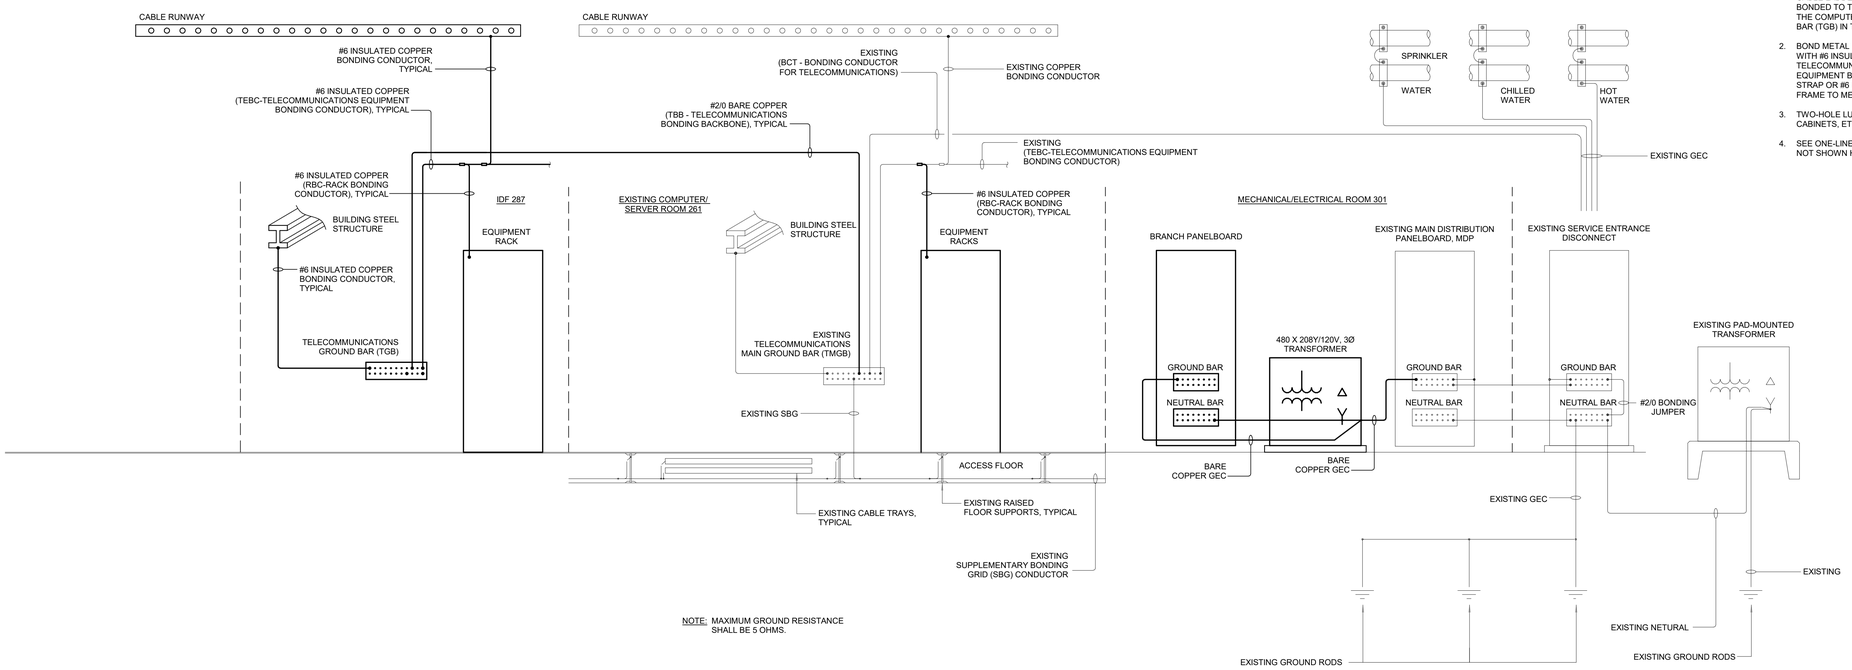


NOTES:

1. DETAIL IS FOR 3-PHASE DRY-TYPE TRANSFORMERS WITH PRIMARY 480-VOLTS DELTA AND SECONDARY 208/120-VOLT WYE.
2. BOND JUMPER AND GROUNDING ELECTRODE CONDUCTOR SHALL BE SIZED PER TABLE 250.66 OF NEC 2017.
3. BOND JUMPER AND REQUIRED GROUNDING ELECTRODE CONDUCTOR SHALL BE SAME SIZE. IF THE SECONDARY FEEDER CONDUCTORS ARE GREATER THAN 1100 MCM COPPER OR 1750MCM ALUMINUM, THE BOND JUMPER SHALL BE INCREASED IN SIZE TO 12.5 PERCENT OF THE CROSS-SECTIONAL AREA OF THE SECONDARY PHASE CONDUCTOR.

3 GROUNDING FOR DRY-TYPE (600V OR LESS) TRANSFORMER

NOT TO SCALE



4 GROUNDING SCHEMATIC

NOT TO SCALE

GENERAL NOTES:

1. ALL NON-CURRENT CARRYING METAL OBJECTS (EQUIPMENT RACKS, CABLE LADDER, CONDUIT, LIGHTS, HVAC EQUIPMENT, ETC.) SHALL BE BONDED TO THE TELECOMMUNICATIONS MAIN GROUND BAR (TMGB) IN THE COMPUTER/SERVER RM 261 AND THE TELECOMMUNICATIONS GROUND BAR (TGB) IN THE IT RM 287.
2. BOND METAL DOOR FRAMES,LIGHTS, HVAC EQUIPMENT (NOT SHOWN) WITH #6 INSULATED COPPER CONDUCTOR TO NEAREST TELECOMMUNICATIONS GROUND BAR OR TO TELECOMMUNICATIONS EQUIPMENT BONDING CONDUCTOR (TEBC). PROVIDE FLEXIBLE COOPER STRAP OR #6 INSULATED GROUND CONDUCTOR JUMPER FROM DOOR FRAME TO METAL DOORS.
3. TWO-HOLE LUGS SHALL BE USED TO BOND TO BUSBARS, RACKS, CABINETS, ETC. COMPRESSION STYLE SHALL BE USED FOR ALL BUSBARS.
4. SEE ONE-LINE DIAGRAMS AND FLOOR PLANS FOR CONDUCTOR SIZES NOT SHOWN HERE.

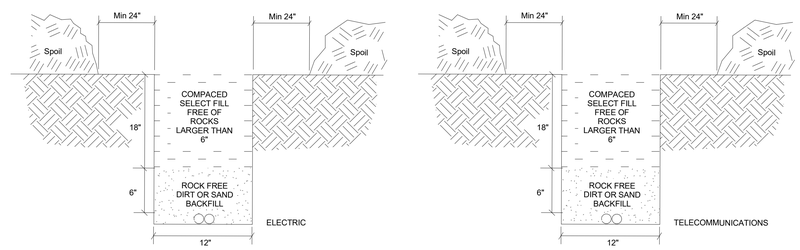
NOTES:

1. FIELD WIRING IS REQUIRED FROM DOOR OPERATOR PANEL FOR THE FOLLOWING:
   - 2#14 FOR SENSING EDGE SWITCH
   - 5#14 FOR PUSHBUTTON STATION
   - 2#14 FOR EACH PHOTOEYE SNESOR
2. ALL WIRING SHALL BE IN CONDUIT.
3. CONTRACTOR SHALL VERIFY EXACT FIELD WIRING REQUIREMENTS WITH ARCHITECT / ENGINEER APPROVED SHOP DRAWINGS.

1 FIELD CONNECTIONS - SECTIONAL DOOR

NOT TO SCALE

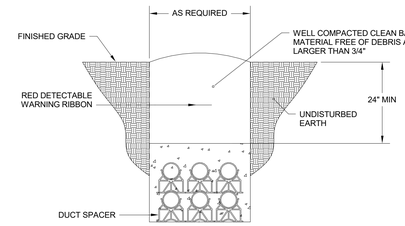


NOTES:

1. ALL EMPTY UTILITY CONDUITS SHALL HAVE PULL LINE INSTALLED.
2. CONTRACTOR RESPONSIBLE FOR ALL EXISTING UNDERGROUND WORK LOCATES.
3. INSTALL PVC SCHEDULE 80 CONDUIT UNDER PAVEMENT. CONDUIT SHALL BE CONCRETE ENCASED WITH FLOWABLE FILL.
4. ALL TURNS TO BE RIGID METALLIC LONG SWEEPING ELBOWS.
5. WARNING TAPE REQUIRED. INSTALL 12" ABOVE CONDUITS.

2 STANDARD DITCH DETAILS

NOT TO SCALE



NOTES:

1. PROVIDE A MINIMUM OF 2 INCHES OF CONCRETE AROUND ALL SIDES OF DUCT BANKS.
2. SPACING BETWEEN DUCTS SHALL BE 3 INCHES.
3. PROVIDE SPACERS EVERY 10 LINEAR FEET OF CONDUIT, MINIMUM. COORDINATE WITH MANUFACTURER'S RECOMMENDATIONS.
4. PROVIDE TIE WIRE, HOLD DOWNS, TIE WRAPS, ETC. AS REQUIRED FOR DUCT BANK CONSTRUCTION.

3 CONCRETE ENCASED CONDUIT TRENCH

SHEET KEYNOTES:

1	REMOVE AND PROPERLY DISPOSE OF EXISTING BRANCH PANELBOARD. REMOVE AND PEROPERLY DISPOE OF THE PANELBOARD'S ELECTRICAL FEEDER.
2	INDICATED BRANCH CIRCUIT(S) SHALL BE REMOVED AS PART OF THE DEMOLITON PHASE. WHERE NOT REUSED, CONTRACTOR SHALL REMOVE AND PROPERLY DISPOSE OF BRANCH CIRCUIT.
3	NEW ELECTRICAL LOAD(S).
4	HVAC UNIT SHALL BE REMOVED. DISCONNECT EXISTING HVAC UNIT AND PREP FOR NEW HVAC UNIT.

1 SITE PLAN - ELECTRICAL DEMOLITION
SCALE: 1" = 30'-0"

PLAN NORTH

GENERAL NOTES:

1	CONTRACTOR SHALL VERIFY LOCATION OF ALL EXISTING UTILITIES PRIOR TO STARTING WORK.
2	COORDINATE WITH OWNER FOR EQUIPMENT BEING DEMOLISHED. OWNER MAY REQUEST CERTAIN ITEMS BE TURNED OVER INTO THEIR POSSESSION ONCE DISCONNECTED AND REMOVED. EQUIPMENT NOT BEING SALVAGED SHALL BE PROPERLY DISPOSED BY THE CONTRACTOR.

SHEET KEYNOTES

1	EXISTING UTILITY POLE AND ASSOCIATED GUY WIRE(S) TO REMAIN.
2	EXISTING OVERHEAD UTILITIES TO REMAIN.
3	EXISTING PAD-MOUNTED TRANSFORMER TO REMAIN.
4	EXISTING OVERHEAD ELECTRICAL SECONDARY SERVING THE FACILITY SHALL REMAIN.
5	CONTRACTOR SHALL COORDINATE WITH KENTUCKY UTILITIES TO HAVE ALL ELECTRICAL SERVICES DISCONNECTED WITH EXCEPTION OF THE 1200AMP SERVICE. CONTRACTOR SHALL REMOVE ALL ASSOCIATED WIREWAYS, DISCONNECT SWITCHES, PANELBOARD, AND CONDUIT AND WIRING COMPLETE. REFER TO ELECTRICAL ONE-LINE DIAGRAMS ON SHEET E-601 AND E-602 FOR ADDITIONAL INFORMATION.
6	EXISTING 1200A ENCLOSED CIRCUIT BREAKER (SERVICE ENTRANCE RATED) SHALL REMAIN.
7	EXISTING ELECTRICAL METER SHALL REMAIN.
8	EXISTING OVERHEAD TELEPHONE AND OPTICAL FIBER SERVICES SHALL BE REMOVED. CONTRACTOR SHALL COORDINATE WITH ASSOCIATED UTILITY COMPANIES.
9	EXISTING POLE-MOUNTED LUMINAIRE SHALL REMAIN.
10	REMOVE AND PROPERLY DISPOSE OF EXISTING POLE-MOUNTED LUMINAIRE AND ASSOCIATED POLE BASE.
11	REMOVE AND PROPERLY DISPOSE OF EXISTING CARD READER PEDESTALS AND ASSOCIATED BOLLARDS.
12	REMOVE AND PROPERLY DISPOSE OF EXISTING FENCE DETECTION PHOTO SENSORS AND ASSOCIATED POST AND CONCRETE BASE.
13	REMOVE AND PROPERLY DISPOSE OF EXISTING CAMERA POLE AND CAMERAS.
14	EXISTING TELEPHONE CABINET(S) SHALL REMAIN.
15	REMOVE AND PROPERLY DISPOSE OF EXISTING SLIDE GATE CONTROLLER AND REMOVE ALL ASSOCIATED DEVICES (INCLUDING MOUNTING RACK).
16	REMOVE AND PROPERLY DISPOSE OF EXISTING ABOVE-GRADE JUNCTION BOX.
17	EXISTING SIGN SHALL REMAIN.

SHEET KEYNOTES

1	EXISTING UTILITY POLE AND ASSOCIATED GUY WIRE(S) SHALL REMAIN.
2	EXISTING OVERHEAD UTILITIES SHALL REMAIN.
3	EXISTING PAD-MOUNTED TRANSFORMER SHALL REMAIN.
4	EXISTING OVERHEAD ELECTRICAL SECONDARY SERVING THE FACILITY SHALL REMAIN.
5	EXISTING 1200A ENCLOSED CIRCUIT BREAKER (SERVICE ENTRANCE RATED) SHALL REMAIN.
6	EXISTING ELECTRICAL METER SHALL REMAIN.
7	EXISTING POLE-MOUNTED LUMINAIRE SHALL REMAIN.
8	EXISTING TELEPHONE CABINET(S) SHALL REMAIN.
9	EXISTING FACILITY SIGN SHALL REMAIN.
10	PANELBOARD VL1 ELECTRICAL FEEDER - ROUTED FROM DISTRIBUTION PANELBOARD DP ("LFUCG DWQ HEADQUARTERS & OPERATIONS FACILITY", SHEET EP404 01) TO PANELBOARD VL1 ("LFUCG VACTOR BUILDING", SHEET EP101 03). REFER TO CONDUIT/CONDUCTOR INFORMATION ON ELECTRICAL ONE-LINE DIAGRAM III - NEW WORK, SHEET E-606 01).
11	PROVIDE 3/4" X 10' COPPER GROUND RODS IN TRIAD CONFIGURATION, MINIMUM 10' APART.
12	BARE #2 COPPER GROUNDING ELECTRODE CONDUCTOR - EXTEND FROM PANELBOARD VL1 ("LFUCG VACTOR BUILDING", SHEET EP101 03).
13	PANELBOARD SR1 ELECTRICAL FEEDER - ROUTED FROM PANELBOARD VL1 ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO PANELBOARD SR1 ("LFUCG EXTERIOR STRUCTURES", EP101 02). REFER TO CONDUIT/CONDUCTOR INFORMATION ON ELECTRICAL ONE-LINE DIAGRAM - VACTOR BUILDING, SHEET E-601 03).
14	PANELBOARD SR2 ELECTRICAL FEEDER - ROUTED FROM PANELBOARD VL1 ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO PANELBOARD SR2 ("LFUCG EXTERIOR STRUCTURES", EP101 02). REFER TO CONDUIT/CONDUCTOR INFORMATION ON ELECTRICAL ONE-LINE DIAGRAM - VACTOR BUILDING, SHEET E-601 03).
15	BARE #2 COPPER GROUNDING CONDUCTOR - EXTEND FROM PANELBOARD VR1 TRANSFORMER ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO GROUNDING ELECTRODE CONDUCTOR.
16	BARE #6 COPPER GROUNDING CONDUCTOR - EXTEND FROM PANELBOARD VR2 TRANSFORMER ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO GROUNDING ELECTRODE CONDUCTOR.
17	BARE #6 GROUND FROM TMGB ("LFCUG VACTOR BUILDING", SHEET ET101 03) TO GROUNDING ELECTRODE CONDUCTOR.
18	PROVIDE 2" CONDUIT WITH 12-STRAND SINGLEMODE (OS2) OPTICAL FIBER FROM TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER/SERVER 261 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET ET402 01) TO TELECOMMUNICATIONS EQUIPMENT CABINET (PRE-MANUFACTURED STORAGE UNIT 102 - "LFUCG VACTOR BUILDING", SHEET ET101 03).
19	PROVIDE CAT 6, 1"C FROM TELECOMMUNICATIONS EQUIPMENT CABINET (PRE-MANUFACTURED STORAGE UNIT 102 - "LFUCG VACTOR BUILDING", SHEET ET101 03) TO ACCESS CONTROL PANEL (STORAGE 105 - "LFUCG EXTERIOR STRUCTURES", SHEET EY101 02).
20	PROVIDE 1-1/2" CONDUIT WITH PULL STRING FROM THE VACTOR STORAGE 101 ("LFUCG VACTOR BUILDING", SHEET EY101 03) TO SM STORAGE F 106 ("LFUCG EXTERIOR STRUCTURES", SHEET EY101 02). CONTROLS CONTRACTOR SHALL UTILIZE FOR BAS NETWORK CABLING.
21	PROVIDE FIVE (5) CAT 6 CABLES (CAMERAS) IN 1-1/2"C FROM TELECOMMUNICATIONS EQUIPMENT RACK (PRE-MANUFACTURED STORAGE UNIT 102 - "LFUCG VACTOR BUILDING", SHEET EY101 03) TO CAMERAS AT THE EXTERIOR STRUCTURES (COLUMN G8 - "LFUCG EXTERIOR STRUCTURES", SHEET EY 101 02).
22	PROVIDE SIX (6) CAT 6 CABLES (CAMERAS) IN 1-1/2"C FROM TELECOMMUNICATIONS EQUIPMENT RACK (PRE-MANUFACTURED STORAGE UNIT 102 - "LFUCG VACTOR BUILDING", SHEET EY101 03) TO CAMERAS AT THE EXTERIOR STRUCTURES (COLUMN E18 - "LFUCG EXTERIOR STRUCTURES", SHEET EY 101 02).
23	POLE-MOUNTED SECURITY CAMERA(S) AND NEMA 4X SURVEILLANCE CABINET (CAMERA, CAMERA MOUNT, AND NEMA 4X SURVEILLANCE CABINET PROVIDED BY OWNER AS PART OF A SEPARATE CONTRACT). REFER TO DETAIL 1, SHEET EY502 01 FOR ADDITIONAL INFORMATION.
24	POLE-MOUNTED SECURITY CAMERA(S) - CAMERA AND CAMERA MOUNT PROVIDED BY OWNER AS PART OF A SEPARATE CONTRACT. REFER TO DETAIL 2, SHEET EY502 01 FOR ADDITIONAL INFORMATION.
25	PROVIDE ONE (1) 4-STRAND SINGLEMODE (OS2) OPTICAL FIBER IN 1"C FROM POLE-MOUNTED SECURITY CAMERAS TO TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER/SERVER 261 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET ET402 01).
26	PROVIDE CAT 6, 1" C FROM POLE-MOUNTED SECURITY CAMERAS TO TELECOMMUNICATIONS EQUIPMENT RACK (IDF 287 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET ET401 01).
27	REFER TO ENLARGED DETAIL FOR ADDITIONAL WORK WITHIN THIS AREA.
28	SLIDE GATE NO. 1 CARD READERS (ACCESS CONTROL) - TWO (2) 6C#18 SHIELDED CABLE, 1-1/4"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (IDF 287 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET EY402 01).
29	SLIDE GATE NO. 1 OPERATOR BRANCH CIRCUIT (480V) FROM PANELBOARD L1 (ELECTRICAL ROOM 129 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET EP402 01). UTILIZE 3#12, 1#12 GND, 1"C.
30	SLIDE GATE NO. 1 OPERATOR CONTROL (REMOTE / ACCESS CONTROL) - 2#12, 1#12 GND, 1"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (ELECTRICAL ROOM 129 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET EY402 01).
31	PROVIDE 2" CONDUIT WITH 12-STRAND SINGLEMODE (OS2) OPTICAL FIBER FROM TELECOMMUNICATIONS EQUIPMENT CABINET (SITE) TO THE TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER / SERVER 261 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING" - SHEET ET402 01).
32	AS A RESULT OF THE DEMOLITION PHASE, IT IS ANTICIPATED THAT THE EXISTING CIRCUIT SERVING THE FACILITY SIGN WILL BE DEMOLISHED. CONTRACTOR SHALL PROVIDE NEW CONDUIT/WIRING (MATCH EXISTING) TO BACKFEED FROM CIRCUIT INDICATED. ROUTE NEW WIRING THROUGH A NEW LIGHTING CONTACTOR INSTALLED IN ELECTRICAL ROOM 129 (SHEET EL402). REFER TO EXTERIOR LIGHTING CONTROLS - DETAIL LC-17, SHEET EL503.
33	POE INJECTOR CIRCUIT (120V) FROM INDICATED PANELBOARD. UTILIZE FOR POLE-MOUNTED CAMERA.
34	ROUTE CONDUIT WITHIN EFIS SYSTEM AT COLUMN. PATCH, REPAIR, AND PAINT AS REQUIRED, COORDINATE WITH GENERAL CONTRACTOR.
35	EXTEND CONDUIT ABOVE EXISTING SOFFIT TO DESIGNATED EQUIPMENT (PANELBOARDS, EQUIPMENT RACKS, AND ACCESS CONTROL PANELS) AS NOTED.
36	120V CIRCUIT FOR TELECOMMUNICATIONS EQUIPMENT CABINET (SITE). CONNECT TO 20A/1P BREAKER IN PANELBOARD RP1B - UTILIZE 2#6, 1#6 GND, 1"C.
37	PROVIDE 4" CONDUIT WITH PULL STRING FROM PROPERTY LINE TO ELECTRICAL ROOM 129 ("LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET ET402 01) FOR OPTICAL FIBER SERVICE. CONTRACTOR SHALL CONCRETE ENCASE UNDER DRIVE; HOWEVER CONCRETE ENCASEMENT IS NOT REQUIRED BELOW THE SIDEWALK. REFER TO TRENCHING DETAILS ON SHEET E-504. LFUCG WILL PROVIDE AND INSTALL OPTICAL FIBER CABLE.
38	CAP 4" CONDUIT AT PROPERTY LINE.
39	PROVIDE A 36" X 36" CONCRETE HANDHOLE FOR OPTICAL FIBER CONDUIT. REFER TO DETAIL 7, SHEET E-501 FOR ADDITIONAL INFORMATION.
40	CONTRACTOR SHALL CORE DRILL BUILDING FOUNDATION AS REQUIRED TO ENTER BUILDING.
41	RACK-MOUNTED TELECOMMUNICATIONS EQUIPMENT CABINET (SITE). REFER TO SHEET ET604 AND DIVISION 27 SPECIFICATIONS FOR ADDITIONAL INFORMATION.
42	PROVIDE CAT 6, 1"C FROM CAMERA TO TELECOMMUNICATIONS EQUIPMENT CABINET (SITE).
43	PROVIDE TWO (2) CAT 6 CABLES FROM CAMERAS TO TELECOMMUNICATIONS EQUIPMENT CABINET (SITE).
44	PROVIDE TWO (2) 120V CONNECTIONS TO THE NEW POST/PANEL SIGNAGE PROVIDED AS PART OF THIS PROJECT. ROUTE CIRCUITS THROUGH A NEW LIGHTING CONTACTOR INSTALLED IN ELECTRICAL ROOM 129 (SHEET EL402). REFER TO EXTERIOR LIGHTING CONTROLS - DETAIL LC-17, SHEET EL503.
45	REFER TO SHEET ES103 FOR MODIFICATIONS REQUIRED AS PART OF ADD ALTERNATE #1 FOR THIS AREA.
46	PROVIDE TWO (2) 36" X 36" CONCRETE HANDHOLES FOR POWER AND OPTICAL FIBER CONDUIT. LOCATE OUTSIDE VEHICULAR TRAFFIC. REFER TO DETAIL 7, SHEET E-501 FOR ADDITIONAL INFORMATION.

GENERAL NOTES:

1	MINIMUM BURY FOR ALL SITE CONDUITS SHALL BE 24". UNLESS OTHERWISE NOTED. REFER TO TRENCHING DETALS ON SHEET E-504 FOR ADDITIONAL INFORMATION.
2	SEE INDIVIDUAL BUILDING/STRUCTURE DRAWINGS FOR ALL REQUIRED CONDUITS/CONDUCTORS/CABLES ENTERING AND LEAVING AREAS.
3	LOCATE ALL EXISTING UNDERGROUND UTILITIES AND COORDINATE WITH GENERAL CONTRACTOR FOR ALL UNDERGROUND WORK PRIOR TO ANY EXCAVATION OR TRENCHING. MAINTAIN A MINIMUM 12" SEPARATION FROM OTHER UTILITIES, UNLESS OTHERWISE NOTED.
6	CONTRACTOR SHALL SAWCUT EXISTING PAVEMENT / DRIVEWAYS AS REQUIRED FOR NEW UNDERGROUND CONDUITS.
7	ALL EXPOSED CONDUIT SHALL BE GALVANIZED RIGID STEEL AND UNDERGROUND CONDUIT SHALL BE SCHEDULE 80 PVC.
8	PROVIDE CONCRETE BASE AND GROUNDING FOR ALL POLE-MOUNTED LUMINAIRES. REFER TO DETAIL 8, SHEET E-502.

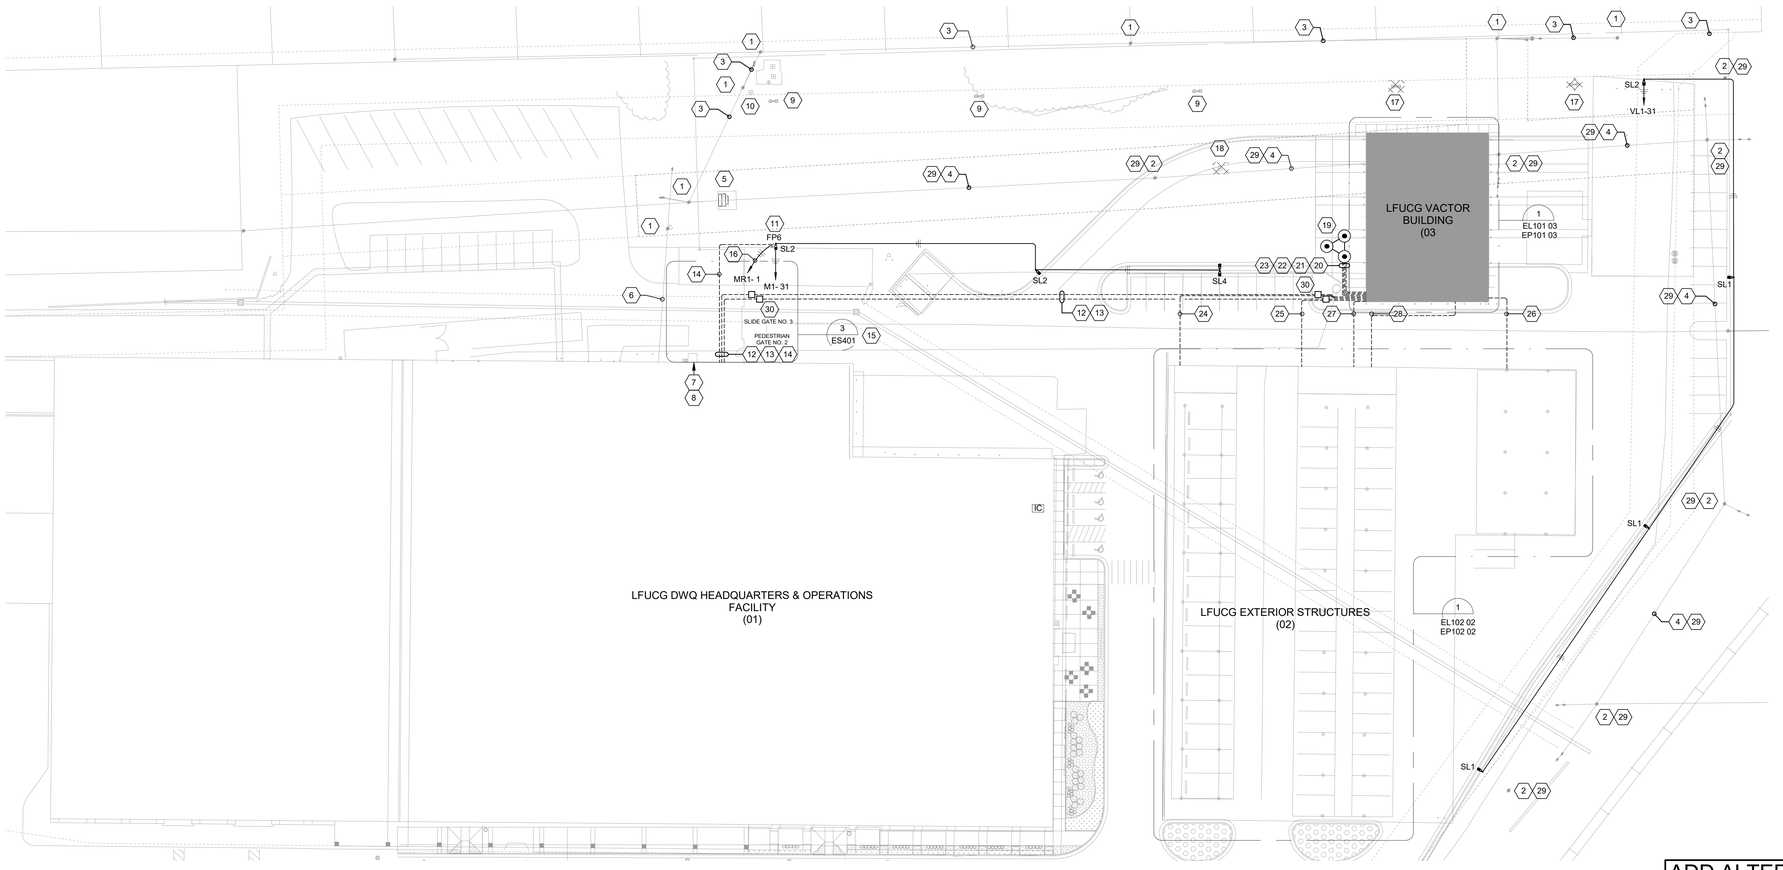
DATE: AUGUST 15, 2025
SCALE: 1" = 30'-0"
SHEET NO.: ES102 01

8/13/2025 1:59:31 PM G:\0247-LFUCG\DWQ HCB\Working Drawings\RevitFiles\Central Model\05247-E_R25E201.rvt



SHEET KEYNOTES

1	EXISTING UTILITY POLE AND ASSOCIATED GUY WIRE(S) SHALL REMAIN.
2	KENTUCKY UTILITIES (KU) WILL REMOVE THE EXISTING UTILITY POLE AND ASSOCIATED GUY WIRE(S).
3	EXISTING OVERHEAD UTILITIES SHALL REMAIN.
4	KENTUCKY UTILITIES (KU) WILL RELOCATE THE EXISTING OVERHEAD ELECTRICAL PRIMARY.
5	EXISTING PAD-MOUNTED TRANSFORMER SHALL REMAIN.
6	EXISTING OVERHEAD ELECTRICAL SECONDARY SERVING THE FACILITY SHALL REMAIN.
7	EXISTING 1200A ENCLOSED CIRCUIT BREAKER (SERVICE ENTRANCE RATED) SHALL REMAIN.
8	EXISTING ELECTRICAL METER SHALL REMAIN.
9	EXISTING POLE-MOUNTED LUMINAIRE SHALL REMAIN.
10	EXISTING TELEPHONE CABINET(S) SHALL REMAIN.
11	POLE-MOUNTED SECURITY CAMERA(S) AND NEMA 4X SURVEILLANCE CABINET (CAMERA, CAMERA MOUNT, AND NEMA 4X SURVEILLANCE CABINET PROVIDED BY OWNER AS PART OF A SEPARATE CONTRACT). REFER TO DETAIL 1, SHEET EY502 01 FOR ADDITIONAL INFORMATION.
12	PANELBOARD VL1 ELECTRICAL FEEDER - ROUTED FROM DISTRIBUTION PANELBOARD DP ("LFUCG DWQ HEADQUARTERS & OPERATIONS FACILITY", SHEET EP404 01) TO PANELBOARD VL1 ("LFUCG VACTOR BUILDING", SHEET EP101 03). REFER TO CONDUIT/CONDUCTOR INFORMATION ON ELECTRICAL ONE-LINE DIAGRAM III - NEW WORK, SHEET E-606 01).
13	PROVIDE 2" CONDUIT WITH 12-STRAND SINGLEMODE (OS2) OPTICAL FIBER FROM TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER/SERVER 261 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET ET402 01) TO TELECOMMUNICATIONS EQUIPMENT CABINET (PRE-MANUFACTURED STORAGE UNIT 102 - "LFUCG VACTOR BUILDING", SHEET ET101 03).
14	PROVIDE ONE (1) 4-STRAND SINGLEMODE (OS2) OPTICAL FIBER IN 1"C FROM POLE-MOUNTED SECURITY CAMERAS TO TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER/SERVER 261 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING", SHEET ET402 01).
15	REFER TO ENLARGED DETAIL FOR ADDITIONAL WORK WITHIN THIS AREA.
16	POE INJECTOR CIRCUIT (120V) FROM INDICATED PANELBOARD. UTILIZE FOR POLE-MOUNTED CAMERA.
17	REMOVE AND PROPERLY DISPOSE OF EXISTING POLE-MOUNTED LUMINAIRE AND ASSOCIATED POLE BASE.
18	REMOVE AND PROPERLY DISPOSE OF THE EXISTING TELEPHONE CABINET.
19	PROVIDE 3/4" X 10' COPPER GROUND RODS IN TRIAD CONFIGURATION, MINIMUM 10' APART.
20	BARE #2 COPPER GROUNDING ELECTRODE CONDUCTOR - EXTEND FROM PANELBOARD VL1 ("LFUCG VACTOR BUILDING", SHEET EP101 03).
21	BARE #2 COPPER GROUNDING CONDUCTOR - EXTEND FROM PANELBOARD VR1 TRANSFORMER ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO GROUNDING ELECTRODE CONDUCTOR.
22	BARE #6 COPPER GROUNDING CONDUCTOR - EXTEND FROM PANELBOARD VR2 TRANSFORMER ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO GROUNDING ELECTRODE CONDUCTOR.
23	BARE #6 GROUND FROM TMGB ("LFUCG VACTOR BUILDING", SHEET ET101 03) TO GROUNDING ELECTRODE CONDUCTOR.
24	PANELBOARD SR1 ELECTRICAL FEEDER - ROUTED FROM PANELOBARD VL1 ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO PANELBOARD SR1 ("LFUCG EXTERIOR STRUCTURES", EP102 02). REFER TO CONDUIT/CONDUCTOR INFORMATION ON ELECTRICAL ONE-LINE DIAGRAM - VACTOR BUILDING, SHEET E-601 03).
25	PANELBOARD SR2 ELECTRICAL FEEDER - ROUTED FROM PANELOBARD VL1 ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO PANELBOARD SR2 ("LFUCG EXTERIOR STRUCTURES", EP102 02). REFER TO CONDUIT/CONDUCTOR INFORMATION ON ELECTRICAL ONE-LINE DIAGRAM - VACTOR BUILDING, SHEET E-601 03).
26	PANELBOARD SR3 ELECTRICAL FEEDER - ROUTED FROM PANELOBARD VL1 ("LFUCG VACTOR BUILDING", SHEET EP101 03) TO PANELBOARD SR3 ("LFUCG EXTERIOR STRUCTURES", EP102 02). REFER TO CONDUIT/CONDUCTOR INFORMATION ON ELECTRICAL ONE-LINE DIAGRAM - VACTOR BUILDING, SHEET E-601 03).
27	PROVIDE 1-1/2" CONDUIT WITH PULL STRING FROM THE VACTOR STORAGE 101 ("LFUCG VACTOR BUILDING", SHEET EY101 03) TO STORAGE C 103 ("LFUCG EXTERIOR STRUCTURES", SHEET EY102 02). CONTROLS CONTRACTOR SHALL UTILIZE FOR BAS NETWORK CABLING.
28	PROVIDE 2" CONDUIT WITH 12-STRAND SINGLEMODE (OS2) OPTICAL FIBER FROM TELECOMMUNICATIONS EQUIPMENT CABINET (PRE-MANUFACTURED STORAGE UNIT 102 - "LFUCG VACTOR BUILDING", SHEET ET101 03) TO TELECOMMUNICATIONS EQUIPMENT CABINET (SM STORAGE E 105 - "LFUCG EXTERIOR STRUCTURES", SHEET EY102 02).
29	LFUCG WILL PAY KU DIRECTLY FOR THEIR WORK. CONTRACTOR DOES NOT NEED TO INCLUDE THIS COST.
30	PROVIDE TWO (2) 36" X 36" CONCRETE HANDHOLES FOR POWER AND OPTICAL FIBER CONDUIT. LOCATE OUTSIDE VEHICULAR TRAFFIC. REFER TO DETAIL 7, SHEET E-501 FOR ADDITIONAL INFORMATION.

ADD ALTERNATE #1

1	ADD ALTERNATE #1 WILL REQUIRE THE WORK SHOWN ON THE BASE BID DRAWINGS (SHEET ES102 AND ES401). HOWEVER, WORK SHALL BE MODIFIED AS SHOWN ON THIS DRAWING FOR THE ALTERNATE LOCATION OF THE "LFUCG VACTOR BUILDING".

GENERAL NOTES:

1	MINIMUM BURY FOR ALL SITE CONDUITS SHALL BE 24". UNLESS OTHERWISE NOTED. REFER TO TRENCHING DETAILS ON SHEET E-504 FOR ADDITIONAL INFORMATION.
2	SEE INDIVIDUAL BUILDING/STRUCTURE DRAWINGS FOR ALL REQUIRED CONDUITS/CONDUCTORS/CABLES ENTERING AND LEAVING AREAS.
3	LOCATE ALL EXISTING UNDERGROUND UTILITIES AND COORDINATE WITH GENERAL CONTRACTOR FOR ALL UNDERGROUND WORK PRIOR TO ANY EXCAVATION OR TRENCHING. MAINTAIN A MINIMUM 12" SEPARATION FROM OTHER UTILITIES, UNLESS OTHERWISE NOTED.
6	CONTRACTOR SHALL SAWCUT EXISTING PAVEMENT / DRIVEWAYS AS REQUIRED FOR NEW UNDERGROUND CONDUITS.
7	ALL EXPOSED CONDUIT SHALL BE GALVANIZED RIGID STEEL AND UNDERGROUND CONDUIT SHALL BE SCHEDULE 80 PVC.
8	PROVIDE CONCRETE BASE AND GROUNDING FOR ALL POLE-MOUNTED LUMINAIRES. REFER TO DETAIL 8, SHEET E-502.

6	CONTRACTOR SHALL SAWCUT EXISTING PAVEMENT / DRIVEWAYS AS REQUIRED FOR NEW UNDERGROUND CONDUITS.
7	ALL EXPOSED CONDUIT SHALL BE GALVANIZED RIGID STEEL AND UNDERGROUND CONDUIT SHALL BE SCHEDULE 80 PVC.
8	PROVIDE CONCRETE BASE AND GROUNDING FOR ALL POLE-MOUNTED LUMINAIRES. REFER TO DETAIL 8, SHEET E-502.

SHEET KEYNOTES

1	SLIDE GATE OPERATOR BRANCH CIRCUIT (480V) FROM PANELBOARD L1 (SHEET EP402) - UTILIZE 3#12, 1#12 GND, 1"C.
2	SLIDE GATE OPERATOR CONTROL (REMOTE / ACCESS CONTROL) - 6#12, 1#12 GND, 1"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (IDF 287 - SHEET EY401).
3	SLIDE GATE OPERATOR (2HP, 460V/3-PHASE). PROVIDE 20'W X 30"L X 15"D CONCRETE PAD (COORDINATE REQUIREMENTS WITH MANUFACTURER AND PROVIDE COMPLETE).
4	3/4" X 10' GROUND ROD WITH #6 AWG COPPER GROUND CONDUCTOR. PROVIDE 1" PVC SLEEVE. TERMINATE ON GROUND LUG WITHIN OPERATOR.
5	PHOTO EYE SENSOR (TRANSMITTER OR RECEIVER) FOR LEADING END PROTECTION. COORDINATE LOCATION WITH GATE OPERATOR INSTALLER. MOUNT SIMILAR TO DETAIL 8, SHEET E-501.
6	PHOTO EYE SENSOR (TRANSMITTER OR RECEIVER) FOR TRAILING END PROTECTION. COORDINATE LOCATION WITH GATE OPERATOR INSTALLER. MOUNT SIMILAR TO DETAIL 8, SHEET E-501.
7	PROVIDE 3#12, 1#12 GND, 1"C FROM PHOTO EYE SENSOR TO THE GATE OPERATOR.
8	WIRED EDGE ENTRAPMENT SENSOR ON POST.
9	PROVIDE 3#12, 1#12 GND, 1"C FROM WIRED EDGE SENSOR TO THE GATE OPERATOR.
10	OBSTRUCTION LOOP (OR RESET LOOP). CONTRACTOR TO PROVIDE 1"C FROM OPERATOR TO LOOP.
11	DUAL HEIGHT CARD READER/INTERCOM PEDESTAL WITH PROTECTION BOLLARD. REFER TO DETAIL 1, SHEET ET503 FOR ADDITIONAL INFORMATION.
12	CARD READERS (ACCESS CONTROL) - TWO (2) 6C#18 SHIELDED CABLE, 1-1/4"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (IDF 287 - SHEET EY401).
13	INTERCOM DOOR STATIONS - PROVIDE TWO (2) CAT 6 IN 1"C FROM CARD READER/INTERCOM PEDESTAL TO IDF 287 (SHEET ET401).
14	SLIDE GATE OPERATOR BRANCH CIRCUIT (480V) FROM PANELBOARD M1 (SHEET EP404) - UTILIZE 3#12, 1#12 GND, 1"C.
15	SLIDE GATE OPERATOR CONTROL (REMOTE / ACCESS CONTROL) - 2#12, 1#12 GND, 1"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (COMPUTER/SERVER 261 - SHEET EY402).
16	ROUTE CONDUIT WITHIN EFIS SYSTEM AT COLUMN. PATCH, REPAIR, AND PAINT AS REQUIRED, COORDINATE WITH GENERAL CONTRACTOR.
17	EXTEND CONDUIT ABOVE EXISTING SOFFIT TO DESIGNATED EQUIPMENT (PANELBOARDS, EQUIPMENT RACKS, AND ACCESS CONTROL PANELS) AS NOTED.
18	CARD READERS (ACCESS CONTROL) - TWO (2) 6C#18 SHIELDED CABLE, 1-1/4"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (COMPUTER/SERVER 261 - SHEET EY402).
19	INTERCOM DOOR STATIONS - PROVIDE TWO (2) CAT 6 IN 1"C FROM CARD READER/INTERCOM PEDESTAL TO COMPUTER/SERVER 261 (SHEET ET402).
20	PEDESTRIAN GATE WITH ELECTRIFIED LATCH RETRACTION, POSITION SWITCH, AND CARD READER. PROVIDE CONDUIT/WIRING BACK TO POWER SUPPLY AND ASSOCIATED ACCESS CONTROL PANEL (COMPUTER/SERVER 261 - SHEET EY402). REFER TO DETAIL 2, SHEET EY503.
21	CARD READER/INTERCOM PEDESTAL. REFER TO DETAIL 3, SHEET EY503 FOR ADDITIONAL INFORMATION.
22	PEDESTRIAN GATE CONTROL (REMOTE / ACCESS CONTROL) - 4#14, 2#18, 1"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (COMPUTER/SERVER 261 - SHEET EY402).
23	BALANCED MAGNETIC SWITCH (MONITORING) - 2#18, 1"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (COMPUTER/SERVER 261 - SHEET EY402).
24	CARD READER (ACCESS CONTROL) - 6C#18 SHIELDED CABLE, 1"C. CONNECT TO ASSOCIATED ACCESS CONTROL PANEL (COMPUTER/SERVER 261 - SHEET EY402).
25	INTERCOM DOOR STATION - PROVIDE CAT 6 IN 1"C FROM CARD READER/INTERCOM PEDESTAL TO COMPUTER/SERVER 261 (SHEET ET402).
26	RACK-MOUNTED TELECOMMUNICATIONS EQUIPMENT CABINET (SITE). REFER TO SHEET ET604 AND DIVISION 27 SPECIFICATIONS FOR ADDITIONAL INFORMATION.
27	PROVIDE EQUIPMENT RACK SIMILAR TO DETAIL 9, SHEET E-501 FOR MOUNTING OF TELECOMMUNICATIONS EQUIPMENT CABINET.
28	PROVIDE 2" CONDUIT WITH 12-STRAND SINGLEMODE (OS2) OPTICAL FIBER FROM TELECOMMUNICATIONS EQUIPMENT CABINET (SITE) TO THE TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER / SERVER 261 - "LFUCG DWQ HEADQUARTERS & OPERATIONS BUILDING" - SHEET ET402 01).
29	INTERCOM DOOR STATIONS - PROVIDE TWO (2) CAT 6 IN 1"C FROM CARD READER/INTERCOM PEDESTAL TO TELECOMMUNICATIONS EQUIPMENT CABINET (SITE).
30	MOUNT 120V RECEPTACLE IN TELECOMMUNICATIONS EQUIPMENT CABINET.
31	120V CIRCUIT FOR TELECOMMUNICATIONS EQUIPMENT CABINET (SITE). CONNECT TO 20A/1P BREAKER IN PANELBOARD RP1B - UTILIZE 2#8, 1#8 GND, 1"C.

GENERAL NOTES:

1. AN EFFORT HAS BEEN MADE TO DOCUMENT MAJOR ELECTRICAL EQUIPMENT / DEVICES FOR REMOVAL; HOWEVER, CONTRACTOR SHALL BE RESPONSIBLE FOR THE COMPLETE DEMOLITION AND PROPER DISPOSAL OF THE INDICATED PANELBOARDS, DISCONNECTS, LIGHTING, LIGHTING CONTROLS, ACCESS CONTROL DEVICES, INTRUSION DETECTION DEVICES, AND ELECTRICAL CONNECTIONS TO HVAC / PLUMBING EQUIPMENT WITHIN THE RENOVATED AREAS.
2. CONTRACTOR SHALL FIELD VERIFY ALL EXISTING CONDITIONS BEFORE DEMOLITION OF ANY WORK.
3. ALL DEMOLITION WORK SHALL BE COORDINATED WITH ALL OTHER WORK AND EXISTING CONDITIONS TO ASSURE PROPER REMOVAL OF EXISTING ELECTRICAL WORK.
4. WHERE CONDUIT HAS BEEN REMOVED THROUGH AN EXISTING FIRE RATED CONSTRUCTION, THE CONTRACTOR SHALL PROPERLY SEAL UNUSED PENETRATIONS TO MAINTAIN EXISTING FIRE RATINGS.
5. EXISTING CIRCUITS NOT REUSED SHALL BE REMOVED BACK TO THE ASSOCIATED ELECTRICAL PANEL.
6. WHERE DRAWINGS REFERENCE REMOVING CONDUIT / WIRING BACK TO SOURCE, THIS MEANS BACK TO THE LAST REMAINING DEVICE OR PANELBOARD. MAINTAIN ALL CONNECTIONS TO "DEVICES TO REMAIN", WHERE LOCATED "DOWNSTREAM" FROM THE REMOVED DEVICES (THIS SHALL BE FIELD VERIFIED).
7. REFER TO ARCHITECTURAL, MECHANICAL, AND PLUMBING DEMOLITION DRAWINGS (AD, MD, PD SHEETES) FOR PLUMBING AND HVAC EQUIPMENT THAT WILL BE REMOVED AND WILL REQUIRE DISCONNECTION.

SHEET KEYNOTES

1. REMOVE AND PROPERLY DISPOSE OF LUMINAIRES AND ASSOCIATED LIGHTING CONTROLS WITHIN THIS SPACE. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
2. REMOVE AND PROPERLY DISPOSE OF EXISTING RECEPTACLE(S). REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
3. REMOVE AND PROPERLY DISPOSE OF EXISTING PANELBOARD AND ASSOCIATED ELECTRICAL FEEDER COMPLETE - PANEL DESIGNATION IS SHOWN ADJACENT TO PANEL.
4. REMOVE AND PROPERLY DISPOSE OF EXISTING TRANSFORMER AND ASSOCIATED ELECTRICAL FEEDER - TRANSFORMER DESIGNATION IS SHOWN ADJACENT TO TRANSFORMER.
5. REMOVE AND PROPERLY DISPOSE OF EXISTING RECEPTACLE(S) AND TELECOMMUNICATIONS OUTLET(S). REMOVE ASSOCIATED CONDUIT/WIRING/CABLING BACK TO SOURCE.
6. REMOVE AND PROPERLY DISPOSE OF EXISTING EXTERIOR LIGHTING. REMOVE ASSOCIATED CONDUIT/CABLING BACK TO SOURCE.
7. REMOVE AND PROPERLY DISPOSE OF EXISTING EMERGENCY LIGHT. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
8. REMOVE AND PROPERLY DISPOSE OF EXISTING INTRUSION DETECTION SYSTEM KEYPAD. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
9. REMOVE AND PROPERLY DISPOSE OF EXISTING INTRUSION DETECTION SYSTEM ALARM. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
10. REMOVE AND PROPERLY DISPOSE OF EXISTING INTRUSION DETECTION SYSTEM GLASS BREAK SENSOR. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
11. REMOVE AND PROPERLY DISPOSE OF EXISTING PROJECTOR SCREEN AND ASSOCIATED UP/DOWN/STOP CONTROL STATION. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
12. REMOVE AND PROPERLY DISPOSE OF EXISTING FLOOR BOXES (POWER AND TELECOMMUNICATIONS). REMOVE ASSOCIATED WIRING/CABLING BACK TO SOURCE. PATCH FLOOR SLAB BACK TO MATCH SURROUNDINGS.
13. REMOVE AND PROPERLY DISPOSE OF EXISTING INTRUSION DETECTION SYSTEM MOTION DETECTOR. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
14. REMOVE AND PROPERLY DISPOSE OF EXISTING FIRE ALARM AUDIO/VISUAL DEVICE. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
15. REMOVE AND PROPERLY DISPOSE OF EXISTING SURFACE-MOUNTED WIREWAY (POWER AND TELECOMMUNICATIONS OUTLETS). REMOVE ASSOCIATED CONDUIT/WIRING/CABLINE BACK TO SOURCE.
16. DUE TO CEILING HEIGHT CHANGE, REMOVE EXISTING LINEAR PENDANT LUMINAIRE AND REINSTALL IN SAME LOCATION (REFER TO SHEETS EL401 FOR ADDITIONAL INFORMATION).
17. REMOVE AND PROPERLY DISPOSE OF EXISTING BACKBOXES (QTY 3) FOR POWER AND DATA CONNECTIONS TO PREVIOUSLY REMOVED MODULAR FURNITURE (3-120V CIRCUITS AND X DATA/VOICE CABLES). REMOVE ASSOCIATED CONDUIT/WIRING/CABLING BACK TO SOURCE. PATCH WALL BACK TO MATCH EXISTING.
18. REMOVE AND PROPERLY DISPOSE OF EXISTING TELEPHONE EQUIPMENT AND TELEPHONE BACKBOARD.
19. REMOVE EXISTING LINEAR PENDANT LUMINAIRE. LUMINAIRE SHALL BE RE-INSTALLED IN OPEN OFFICE AREA ROOM 154 (REFER TO SHEETS EL402 AND EL403 FOR ADDITIONAL INFORMATION).
20. REMOVE AND PROPERLY DISPOSE OF THE EXISTING ELECTRICAL FEEDER FOR PANELBOARD AL1 BACK TO THE DISCONNECT SWITCH ON THE EXTERIOR OF BUILDING (REFER TO SHEET ED404 FOR LOCATION). PANELBOARD AL1 SHALL BE REFED FROM A NEW DISTRIBUTION PANELBOARD, DP, LOCATED WITHIN THE MECHANICAL/ELECTRICAL ROOM 301 (REFER TO NEW WORK PLANS FOR ADDITIONAL INFORMATION). CONTRACTOR MAY REUSE THE EXISTING ELECTRICAL FEEDER CONDUIT AND EXTEND TO DISTRIBUTION PANELBOARD, DP LOCATION.
21. DISCONNECT EXISTING WATER HEATER (LOCATED ABOVE CEILING). CONTRACTOR SHALL REMOVE AND PROPERLY DISPOSE OF ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
22. REMOVE AND PROPERLY DISPOSE OF EXISTING FIRE ALARM REMOTE TEST SWITCH AND ASSOCIATED DUCT SMOKE DETECTOR. DUCT SMOKE DETECTOR NOT SHOWN.
23. MAINTAIN ELECTRICAL CONNECTION TO EXISTING UNIT HEATER.

GENERAL NOTES:

1	AN EFFORT HAS BEEN MADE TO DOCUMENT MAJOR ELECTRICAL EQUIPMENT / DEVICES FOR REMOVAL; HOWEVER, CONTRACTOR SHALL BE RESPONSIBLE FOR THE COMPLETE DEMOLITION AND PROPER DISPOSAL OF THE INDICATED PANELBOARDS, DISCONNECTS, LIGHTING, LIGHTING CONTROLS, ACCESS CONTROL DEVICES, INTRUSION DETECTION DEVICES, AND ELECTRICAL CONNECTIONS TO HVAC / PLUMBING EQUIPMENT WITHIN THE RENOVATED AREAS.
2	CONTRACTOR SHALL FIELD VERIFY ALL EXISTING CONDITIONS BEFORE DEMOLITION OF ANY WORK.
3	ALL DEMOLITION WORK SHALL BE COORDINATED WITH ALL OTHER WORK AND EXISTING CONDITIONS TO ASSURE PROPER REMOVAL OF EXISTING ELECTRICAL WORK.
4	WHERE CONDUIT HAS BEEN REMOVED THROUGH AN EXISTING FIRE RATED CONSTRUCTION, THE CONTRACTOR SHALL PROPERLY SEAL UNUSED PENETRATIONS TO MAINTAIN EXISTING FIRE RATINGS.
5	EXISTING CIRCUITS NOT REUSED SHALL BE REMOVED BACK TO THE ASSOCIATED ELECTRICAL PANEL.
6	WHERE DRAWINGS REFERENCE REMOVING CONDUIT / WIRING BACK TO SOURCE, THIS MEANS BACK TO THE LAST REMAINING DEVICE OR PANELBOARD. MAINTAIN ALL CONNECTIONS TO "DEVICES TO REMAIN", WHERE LOCATED "DOWNSTREAM" FROM THE REMOVED DEVICES (THIS SHALL BE FIELD VERIFIED).
7	REFER TO ARCHITECTURAL, MECHANICAL, AND PLUMBING DEMOLITION DRAWINGS (AD, MD, PD SHEETES) FOR PLUMBING AND HVAC EQUIPMENT THAT WILL BE REMOVED AND WILL REQUIRE DISCONNECTION.

SHEET KEYNOTES

1	REMOVE AND PROPERLY DISPOSE OF LUMINAIRES AND ASSOCIATED LIGHTING CONTROLS WITHIN THIS SPACE. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
2	REMOVE AND PROPERLY DISPOSE OF EXISTING PROJECTOR SCREEN AND ASSOCIATED UP/DOWN/STOP CONTROL STATION. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
3	REMOVE AND PROPERLY DISPOSE OF EXISTING RECEPTACLE(S). REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
4	REMOVE AND PROPERLY DISPOSE OF EXISTING RECEPTACLE(S) AND TELECOMMUNICATIONS OUTLET(S). REMOVE ASSOCIATED CONDUIT/WIRING/CABLING BACK TO SOURCE.
5	REMOVE AND PROPERLY DISPOSE OF EXISTING FIRE ALARM AUDIO/VISUAL DEVICE. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
6	REMOVE AND PROPERLY DISPOSE OF EXISTING TELECOMMUNICATIONS OUTLET. REMOVE ASSOCIATED CONDUIT/CABLING BACK TO ASSOCIATED EQUIPMENT RACK.
7	REMOVE AND PROPERLY DISPOSE OF EXISTING EXTERIOR LIGHTING. REMOVE ASSOCIATED CONDUIT/CABLING BACK TO SOURCE.
8	REMOVE AND PROPERLY DISPOSE OF EXISTING INTERCOM STATION. REMOVE ASSOCIATED CONDUIT/CABLING BACK TO SOURCE.
9	EXISTING FIRE ALARM REMOTE ANNUNCIATOR PANEL TO BE RELOCATED. REFER TO SHEET TY402 FOR NEW LOCATION.
10	REMOVE AND PROPERLY DISPOSE OF EXISTING SECURITY SYSTEM KEYPAD. REMOVE ASSOCIATED CONDUIT/CABLING BACK TO SOURCE.
11	REMOVE AND PROPERLY DISPOSE OF EXISTING SECURITY SYSTEM MOTION DETECTOR. REMOVE ASSOCIATED CONDUIT/CABLING BACK TO SOURCE.
12	EXISTING DOWNLIGHT SHALL REMAIN; HOWEVER CONTRACTOR SHALL REMOVE AND PROPERLY DISPOSE OF EXISTING LAMP AND REFLECTOR AS REQUIRED FOR NEW LED RETROFIT KIT. REFER TO SHEET EL402 FOR ADDITIONAL INFORMATION.
13	EXISTING FIVE (5) PANELBOARDS SHALL REMAIN - PANEL DESIGNATION IS SHOWN ADJACENT TO PANEL.
14	EXISTING TRANSFORMER SHALL REMAIN - TRANSFORMER DESIGNATION IS SHOWN ADJACENT TO TRANSFORMER.
15	EXISTING PANELBOARD TC SHALL REMAIN; HOWEVER, THIS PANELBOARD IS NOT CURRENTLY ENERGIZED DUE TO THE PREVIOUSLY REMOVED UPS. REFER TO NEW WORK PLANS FOR THE NEW ELECTRICAL FEEDER FOR PANELBOAD TC.
16	AN EXISTING UPS HAS BEEN PREVIOUSLY REMOVED FROM THIS APPROXIMATE LOCATION, THE ASSOCIATED 125A, 480V, 3-PHASE ELECTRICAL FEDER HAS BEEN DISCONNECTED AND ABANDONED BELOW THE EXISTING RAISED FLOOR. CONTRACTOR SHALL REMOVE THE ASSOCIATED CONDUCTORS BACK TO EXISTING EMERGENCY MAIN DISTRIBUATION PANELBARD, EMDP (SHEET ED403).
17	REMOVE AND PROPERLY DISPOSE OF EXISTING LIGHTING CONTROL PANEL, WHICH SERVED LIGHTING FOR SALES & MARKETING RM 11FF29 (SHEET ED401).
18	EXISTING PANELBOARD SHALL REMAIN - PANEL DESIGNATION IS SHOWN ADJACENT TO PANEL.
19	EXISTING LINEAR PENDANT LUMINAIRE TO REMAIN. REFER TO NEW WORK PLANS FOR RETROFFITING WITH LED REPLACEMENT KIT.
20	REMOVE AND PROPERLY DISPOSE OF EXISTING LINEAR PENDANT LUMINAIRE. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
21	REMOVE AND PROPERLY DISPOSE OF EXISTING FLOOR BOXES (POWER AND TELECOMMUNICATIONS). REMOVE ASSOCIATED WIRING/CABLING BACK TO SOURCE. PATCH FLOOR SLAB BACK TO MATCH SURROUNDINGS.
22	REMOVE AND PROPERLY DISPOSE OF EXISTING SURFACE-MOUNTED WIREWAY (POWER AND TELECOMMUNICATIONS OUTLETS). REMOVE ASSOCIATED CONDUIT/WIRING/CABLINE BACK TO SOURCE.
23	REMOVE AND PROPERLY DISPOSE OF EXISTING RECEPTACLE (OR JUNCTION BOX). REMOVE ASSOCIATED CONDUCTORS BACK TO SOURCE. EXISTING CONDUIT MAY BE REUSED TO SERVE NEW RECEPTACLES.
24	REMOVE AND PROPERLY DISPOSE OF EXISTING AUDIO/VISUAL OUTLET AND ALL ASSOCIATED CABLING.
25	REMOVE AND PROPERLY DISPOSE OF EXISTING RECEPTACLE, AUDIO/VISUAL OUTLET, ETC. AND ALL ASSOCIATED CABLING.
26	REMOVE AND PROPERLY DISPOSE OF EXISTING CEILING-MOUNTED SPEAKERS. REMOVE AND PROPERLY DISPOSE OF ASSOCIATED CONDUIT/CABLING BACK TO SOURCE.
27	REMOVE AND PROPERLY DISPOSE OF EXISTING FIRE ALARM PULL STATION. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
28	REMOVE AND PROPERLY DISPOSE OF EXISTING FIRE ALARM REMOTE TEST SWITCH AND ASSOCIATED DUCT SMOKE DETECTOR. DUCT SMOKE DETECTOR NOT SHOWN.
29	REMOVE AND PROPERLY DISPOSE OF EXISTING 100-PAIR ENTRANCE PROTECTORS, 66-PUNCHDOWN BLOCKS, 110-PUNCHDOWN BLOCKS, AND ASSOCIATED CABLING. REFER TO SHEET ET601 FOR ADDITIONAL INFORMATION.
30	REMOVE AND PROPERLY DISPOSE OF EXISTING ACCESS CONTROL PANELS, POWER SUPPLIES, AND WIREWAY.
31	REMOVE AND PROPERLY DISPOSE OF EXISTING CAT 3/5 HORIZONTAL CABLING [WHITE] THROUGHOUT THE FACILITY. EXISTING CAT 6 HORIZONTAL CABLING [BLUE AND YELLOW] SHALL REMAIN, EXCEPT CABLING ASSOCIATED WITH TELECOMMUNICATIONS OUTLETS REMOVED.
32	EXISTING FIRE ALARM NAC POWER EXTENDER TO REMAIN.
33	REMOVE AND PROPERLY DISPOSE OF EXISTING BACKBOXES (QTY 3) FOR POWER AND DATA CONNECTIONS TO PREVIOUSLY REMOVED MODULAR FURNITURE (3-120V CIRCUITS AND X DATA/VOICE CABLES). REMOVE ASSOCIATED CONDUIT/WIRING/CABLING BACK TO SOURCE. PATCH WALL BACK TO MATCH EXISTING.
34	REMOVE AND PROPERLY DISPOSE OF EXISTING DOWNLIGHTS AND ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
35	EXISTING FIRE ALARM AUDIO/VISUAL DEVICE TO BE RELOCATED. REFER TO SHEET TY402 FOR NEW LOCATION.
36	APPROXIMATE ROUTING OF EXISTING TELECOMMUNICATIONS CONDUITS ROUTED THROUGH THE FACILITY (CONTRACTOR TO FIELD VERIFY) FOR ENTRANCE SERVICES. CONTRACTOR SHALL REMOVE CABLING, COORDINATE REMOVAL WITH THE LFUCG.

GENERAL NOTES:

1. AN EFFORT HAS BEEN MADE TO DOCUMENT MAJOR ELECTRICAL EQUIPMENT / DEVICES FOR REMOVAL; HOWEVER, CONTRACTOR SHALL BE RESPONSIBLE FOR THE COMPLETE DEMOLITION AND PROPER DISPOSAL OF THE INDICATED PANELBOARDS, DISCONNECTS, LIGHTING, LIGHTING CONTROLS, ACCESS CONTROL DEVICES, INTRUSION DETECTION DEVICES, AND ELECTRICAL CONNECTIONS TO HVAC / PLUMBING EQUIPMENT WITHIN THE RENOVATED AREAS.
2. CONTRACTOR SHALL FIELD VERIFY ALL EXISTING CONDITIONS BEFORE DEMOLITION OF ANY WORK.
3. ALL DEMOLITION WORK SHALL BE COORDINATED WITH ALL OTHER WORK AND EXISTING CONDITIONS TO ASSURE PROPER REMOVAL OF EXISTING ELECTRICAL WORK.
4. WHERE CONDUIT HAS BEEN REMOVED THROUGH AN EXISTING FIRE RATED CONSTRUCTION, THE CONTRACTOR SHALL PROPERLY SEAL UNUSED PENETRATIONS TO MAINTAIN EXISTING FIRE RATINGS.
5. EXISTING CIRCUITS NOT REUSED SHALL BE REMOVED BACK TO THE ASSOCIATED ELECTRICAL PANEL.
6. WHERE DRAWINGS REFERENCE REMOVING CONDUIT / WIRING BACK TO SOURCE, THIS MEANS BACK TO THE LAST REMAINING DEVICE OR PANELBOARD. MAINTAIN ALL CONNECTIONS TO "DEVICES TO REMAIN", WHERE LOCATED "DOWNSTREAM" FROM THE REMOVED DEVICES (THIS SHALL BE FIELD VERIFIED).
7. REFER TO ARCHITECTURAL, MECHANICAL, AND PLUMBING DEMOLITION DRAWINGS (AD, MD, PD SHEETES) FOR PLUMBING AND HVAC EQUIPMENT THAT WILL BE REMOVED AND WILL REQUIRE DISCONNECTION.

SHEET KEYNOTES

1. REMOVE AND PROPERLY DISPOSE OF LUMINAIRES AND ASSOCIATED LIGHTING CONTROLS WITHIN THIS SPACE. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
2. EXISTING LINEAR PENDANT LUMINAIRE TO REMAIN. REFER TO NEW WORK PLANS FOR RETROFITTING WITH LED REPLACEMENT KIT.
3. REMOVE AND PROPERLY DISPOSE OF EXISTING LINEAR PENDANT LUMINAIRE. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
4. REMOVE AND PROPERLY DISPOSE OF EXISTING BACKBOXES (QTY 2) FOR POWER AND DATA CONNECTIONS TO PREVIOUSLY REMOVED MODULAR FURNITURE (3-120V CIRCUITS AND X DATA/VOICE CABLES). REMOVE ASSOCIATED CONDUIT/WIRING/CABLING BACK TO SOURCE. PATCH WALL BACK TO MATCH EXISTING.
5. REMOVE AND PROPERLY DISPOSE OF EXISTING SURFACE-MOUNTED WIREWAY (POWER AND TELECOMMUNICATIONS OUTLETS). REMOVE ASSOCIATED CONDUIT/WIRING/CABLINE BACK TO SOURCE.
6. REMOVE AND PROPERLY DISPOSE OF EXISTING EMERGENCY LIGHT. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
7. REMOVE AND PROPERLY DISPOSE OF EXISTING BACKBOXES (QTY 3) FOR POWER AND DATA CONNECTIONS TO PREVIOUSLY REMOVED MODULAR FURNITURE (3-120V CIRCUITS AND X DATA/VOICE CABLES). REMOVE ASSOCIATED CONDUIT/WIRING/CABLING BACK TO SOURCE. PATCH WALL BACK TO MATCH EXISTING.
8. REMOVE AND PROPERLY DISPOSE OF EXISTING INTRUSION DETECTION DEVICES ON EXTERIOR DOOR. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
9. REMOVE AND PROPERLY DISPOSE OF EXISTING DOOR BELL AND ASSOCIATED DOOR BELL PUSHBUTTON.
10. REMOVE AND PROPERLY DISPOSE OF EXISTING EXTERIOR LIGHTING. REMOVE ASSOCIATED CONDUIT/CABLING BACK TO SOURCE.
11. REMOVE AND PROPERLY DISPOSE OF EXISTING RECEPTACLE(S). REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
12. EXISTING FIRE ALARM DEVICES FOR EXISTING DRY PIPE FIRE SUPPRESSION SYSTEM RISER TO REMAIN.
13. REMOVE AND PROPERLY DISPOSE OF EXISTING RECEPTACLE(S) AND TELECOMMUNICATIONS OUTLET(S). REMOVE ASSOCIATED CONDUIT/WIRING/CABLING BACK TO SOURCE.
14. REMOVE AND PROPERLY DISPOSE OF EXISTING FIRE ALARM PULL STATION. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
15. REMOVE AND PROPERLY DISPOSE OF EXISTING FIRE ALARM AUDIO/VISUAL DEVICE. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
16. EXISTING FIRE ALARM AUDIO/VISUAL DEVICE TO BE RELOCATED. REFER TO SHEET TY403 FOR NEW LOCATION.
17. EXISTING FIRE ALARM AUDIO/VISUAL DEVICE SHALL BE REPLACED WITH A VISUAL ONLY DEVICE.
18. DISCONNECT EXISTING OVERHEAD DOOR OPERATOR. CONTRACTOR SHALL REMOVE AND PROPERLY DISPOSE OF ASSOCIATED DISCONNECT, CONTROLS, AND CONDUIT/WIRING BACK TO SOURCE.
19. EXISTING HYDRAULIC LIFT AND ASSOCIATED RAISE/LOWER PUSHBUTTON TO REMAIN.
20. EXISTING STARTERS AND PUMPS FOR HYDRAULIC LIFTS SHALL REMAIN.
21. REMOVE AND PROPERLY DISPOSE OF EXISTING FIRE ALARM REMOTE TEST SWITCH AND ASSOCIATED DUCT SMOKE DETECTOR. DUCT SMOKE DETECTOR NOT SHOWN.
22. REMOVE AND PROPERLY DISPOSE OF EXISTING TELECOMMUNICATIONS OUTLET. REMOVE ASSOCIATED CONDUIT/CABLING BACK TO ASSOCIATED EQUIPMENT RACK.
23. REMOVE AND PROPERLY DISPOSE OF EXISTING SECURITY SYSTEM KEYPAD. REMOVE ASSOCIATED CONDUIT/CABLING BACK TO SOURCE.
24. APPROXIMATE ROUTING OF EXISTING TELECOMMUNICATIONS CONDUITS ROUTED THROUGH THE FACILITY (CONTRACTOR TO FIELD VERIFY) FOR ENTRANCE SERVICES. CONTRACTOR SHALL REMOVE CABLING. COORDINATE REMOVAL WITH THE LFUCG.
25. REMOVE AND PROPERLY DISPOSE OF EXISTING SATELITTE DISH AND ASSOCIATED MOUNTING BRACKET.
26. MAINTAIN ELECTRICAL CONNECTION TO EXISTING UNIT HEATER.

GENERAL NOTES:

1	AN EFFORT HAS BEEN MADE TO DOCUMENT MAJOR ELECTRICAL EQUIPMENT / DEVICES FOR REMOVAL; HOWEVER, CONTRACTOR SHALL BE RESPONSIBLE FOR THE COMPLETE DEMOLITION AND PROPER DISPOSAL OF THE INDICATED PANELBOARDS, DISCONNECTS, LIGHTING, LIGHTING CONTROLS, ACCESS CONTROL DEVICES, INTRUSION DETECTION DEVICES, AND ELECTRICAL CONNECTIONS TO HVAC / PLUMBING EQUIPMENT WITHIN THE RENOVATED AREAS.
2	CONTRACTOR SHALL FIELD VERIFY ALL EXISTING CONDITIONS BEFORE DEMOLITION OF ANY WORK.
3	ALL DEMOLITION WORK SHALL BE COORDINATED WITH ALL OTHER WORK AND EXISTING CONDITIONS TO ASSURE PROPER REMOVAL OF EXISTING ELECTRICAL WORK.
4	WHERE CONDUIT HAS BEEN REMOVED THROUGH AN EXISTING FIRE RATED CONSTRUCTION, THE CONTRACTOR SHALL PROPERLY SEAL UNUSED PENETRATIONS TO MAINTAIN EXISTING FIRE RATINGS.
5	EXISTING CIRCUITS NOT REUSED SHALL BE REMOVED BACK TO THE ASSOCIATED ELECTRICAL PANEL.
6	WHERE DRAWINGS REFERENCE REMOVING CONDUIT / WIRING BACK TO SOURCE, THIS MEANS BACK TO THE LAST REMAINING DEVICE OR PANELBOARD. MAINTAIN ALL CONNECTIONS TO "DEVICES TO REMAIN"; WHERE LOCATED "DOWNSTREAM" FROM THE REMOVED DEVICES (THIS SHALL BE FIELD VERIFIED).
7	REFER TO ARCHITECTURAL, MECHANICAL, AND PLUMBING DEMOLITION DRAWINGS (AD, MD, PD SHEETES) FOR PLUMBING AND HVAC EQUIPMENT THAT WILL BE REMOVED AND WILL REQUIRE DISCONNECTION.

SHEET KEYNOTES

1	REMOVE AND PROPERLY DISPOSE OF LUMINAIRES AND ASSOCIATED LIGHTING CONTROLS WITHIN THIS SPACE. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
2	REMOVE AND PROPERLY DISPOSE OF EXISTING EMERGENCY LIGHT. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
3	REMOVE AND PROPERLY DISPOSE OF EXISTING RECEPTACLE(S). REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
4	REMOVE AND PROPERLY DISPOSE OF EXISTING RECEPTACLE(S) AND TELECOMMUNICATIONS OUTLET(S). REMOVE ASSOCIATED CONDUIT/WIRING/CABLING BACK TO SOURCE.
5	REMOVE AND PROPERLY DISPOSE OF EXISTING BACKBOXES (QTY 2) FOR POWER AND DATA CONNECTIONS TO PREVIOUSLY REMOVED MODULAR FURNITURE (3-120V CIRCUITS AND X DATA/VOICE CABLES). REMOVE ASSOCIATED CONDUIT/WIRING/CABLING BACK TO SOURCE. PATCH WALL BACK TO MATCH EXISTING.
6	REMOVE AND PROPERLY DISPOSE OF EXISTING FLOOR BOXES (POWER AND TELECOMMUNICATIONS). REMOVE ASSOCIATED WIRING/CABLING BACK TO SOURCE. PATCH FLOOR SLAB BACK TO MATCH SURROUNDINGS.
7	REMOVE AND PROPERLY DISPOSE OF EXISTING TELECOMMUNICATIONS OUTLET. REMOVE ASSOCIATED CONDUIT/CABLING BACK TO ASSOCIATED EQUIPMENT RACK.
8	REMOVE AND PROPERLY DISPOSE OF EXISTING PROJECTOR SCREEN AND ASSOCIATED UP/DOWN/STOP CONTROL STATION. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
9	REMOVE AND PROPERLY DISPOSE OF EXISTING SURFACE-MOUNTED WIREWAY (POWER AND TELECOMMUNICATIONS OUTLETS). REMOVE ASSOCIATED CONDUIT/WIRING/CABLINE BACK TO SOURCE.
10	EXISTING 1200A ENCLOSED CIRCUIT BREAKER (SERVICE ENTRANCE RATED) SHALL REMAIN.
11	EXISTING ELECTRICAL METER SHALL REMAIN.
12	EXISTING MAIN DISTRIBUTION PANELBOARD, MDP SHALL REMAIN.
13	EXISTING EMERGENCY MAIN DISTRIBUTION PANELBOARD, EMDP SHALL REMAIN.
14	EXISTING FIRE ALARM CONTROL PANEL AND ASSOCIATED FIRE ALARM COMMUNICATOR SHALL REMAIN.
15	EXISTING PANELBOARD SHALL REMAIN - PANEL DESIGNATION IS SHOWN ADJACENT TO PANEL.
16	EXISTING TRANSFORMER SHALL REMAIN - TRANSFORMER DESIGNATION IS SHOWN ADJACENT TO TRANSFORMER.
17	REMOVE AND PROPERLY DISPOSE OF EXISTING EXTERIOR LIGHTING. REMOVE ASSOCIATED CONDUIT/CABLING BACK TO SOURCE.
18	REMOVE AND PROPERLY DISPOSE OF THREE (3) EXISTING SERVICE ENTRANCE DISCONNECT SWITCHES AND ASSOCIATED ELECTRICAL FEEDERS.
19	REMOVE AND PROPERLY DISPOSE OF EXISTING SERVICE ENTRANCE DISCONNECT SWITCH AND ASSOCIATED ELECTRICAL FEEDERS.
20	REMOVE AND PROPERLY DISPOSE OF TWO (2) EXISTING ELECTRICAL METERS AND ASSOCIATED CONDUIT/WIRING COMPLETE.
21	CONTRACTOR SHALL COORDINATE WITH KENTUCKY UTILITIES TO HAVE ALL ELECTRICAL SERVICES DISCONNECTED WITH EXCEPTION OF THE 1200AMP SERVICE. CONTRACTOR SHALL REMOVE ALL ASSOCIATED WIREWAYS, DISCONNECT SWITCHES, PANELBOARD, AND CONDUIT AND WIRING COMPLETE. REFER TO ELECTRICAL ONE-LINE DIAGRAMS ON SHEET E-601 AND E-602 FOR ADDITIONAL INFORMATION.
22	REMOVE AND PROPERLY DISPOSE OF EXISTING INTRUSION DETECTION DEVICES ON EXTERIOR DOOR. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
23	REMOVE AND PROPERLY DISPOSE OF EXISTING DOOR BELL AND ASSOCIATED DOOR BELL PUSHBUTTON.
24	EXISTING FIRE ALARM MANUAL PULL STATION TO BE RELOCATED. REFER TO SHEET TY404 FOR NEW LOCATION.
25	REMOVE AND PROPERLY DISPOSE OF EXISTING INTRUSION DETECTION SYSTEM DOOR CONTACT SWITCH MOUNTED ON HATCH. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
26	EXISTING FIRE ALARM DEVICES FOR EXISTING WET PIPE FIRE SUPPRESSION SYSTEM RISER TO REMAIN.
27	EXISTING-TO-REMAIN WALL-MOUNTED ELECTRIC HEATER.
28	REMOVE AND PROPERLY DISPOSE OF EXISTING FIRE ALARM AUDIO/VISUAL DEVICE. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
29	REMOVE AND PROPERLY DISPOSE OF EXISTING STARTERS AND SWITCHES FOR WAREHOUSE EXHAUST FANS (LOCATED ABOVE WHR TRANSFORMER). REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
30	REMOVE AND PROPERLY DISPOSE OF EXISTING FIRE ALARM REMOTE TEST SWITCH AND ASSOCIATED DUCT SMOKE DETECTOR. DUCT SMOKE DETECTOR NOT SHOWN.
31	APPROXIMATE ROUTING OF EXISTING TELECOMMUNICATIONS CONDUITS ROUTED THROUGH THE FACILITY (CONTRACTOR TO FIELD VERIFY) FOR ENTRANCE SERVICES. CONTRACTOR SHALL REMOVE CABLING, COORDINATE REMOVAL WITH THE LFUCG.
32	MAINTAIN ELECTRICAL CONNECTION TO EXISTING UNIT HEATER.
33	REMOVE AND PROPERLY DISPOSE OF EXISTING TELE-POWER POLE. REMOVE ASSOCIATED CONDUIT/WIRING/CABLING BACK TO SOURCE.
34	EXISTING BRANCH CIRCUITS WITHIN PANELBOARD HOUSE SHALL BE REFED FROM PANELBOARD M1. MAINTAIN CONNECTIONS TO EXISTING LIGHTING CONTACTOR.
35	EXISTING LIGHTING CONTACTOR SHALL REMAIN. CONTRACTOR SHALL RELOCATE PHOTOCELL TO CONTACTOR ENCLOSURE.

1 FIRST LEVEL - LIGHTING PLAN - AREA A
SCALE: 1/8" = 1'-0"

GENERAL NOTES:

1	REFER TO POWER PLANS FOR PANELBOARD LOCATIONS.
2	REFER TO LIGHTING CONTROL DETAILS ON SHEET EL501 THROUGH EL503.
3	PROVIDE AN UNSWITCHED LIGHTING CONDUCTOR TO EACH LUMINAIRE CONTAINING AN EMERGENCY BATTERY DRIVER.
4	0-10VDC DIMMING CONDUCTORS (CLASS 2) HAVE NOT BEEN SHOWN; HOWEVER, SHALL BE PROVIDED AS REQUIRED BY SHEET KEYNOTES AND/OR THE CONTROL DETAILS FOR EACH ROOM / AREA. DIMMING CONDUCTORS SHALL BE ROUTED IN SEPARATE CONDUIT FROM POWER CONDUCTORS.
5	OCCUPANCY SENSORS SHALL BE MOUNTED ON A VIBRATION FREE SURFACE AND SHALL BE LOCATED AT LEAST 6'-0" FROM DIFFUSERS.
6	REFER TO SPECIFICATION SECTION 265100 FOR MOUNTING / SUPPORT REQUIREMENTS FOR LUMINAIRES.
7	LUMINAIRES DESIGNATED AS "NL" SHALL BE CONSTANT ON LUMINAIRES, ALL OTHER EGRESS LUMINAIRES SHALL BE SWITCHED WITH THE NORMAL LIGHTING WITHIN THE SAME SPACE.

SHEET KEYNOTES

1	EXISTING LUMINAIRE SHALL BE REINSTALLED IN NEW CEILING. IN ADDITION, LUMINAIRE SHALL BE RETROFITTED WITH LED LIGHTBAR KITS (QUANTITY AS REQUIRED BASED ON LUMINAIRE LENGTH). REFER TO LUMINAIRE SCHEDULE FOR ADDITIONAL INFORMATION.
2	ROUTE CIRCUIT THROUGH A DEDICATED LIGHTING RELAY PACK MOUNTED ADJACENT TO PANELBOARD WH (REFER TO LOCATION ON SHEET EL404).
3	REMOTE MOUNTED BATTERY INVERTER FOR OL3E LUMINAIRE. TYPICAL OF 3.
4	PROVIDE AIRCRAFT CABLE AS REQUIRED FOR SUSPENDING LUMINAIRES L9/L9E AT 17' 0" AFF.
5	REFER TO SITE PLANS (SHEETS ES102 AND ES401) FOR CONDUITS ASSOCIATED WITH SITE LIGHTING, ACCESS CONTROL, INTERCOM, VIDEO SURVEILANCE, AND GATE BRANCH POWER ENTERING THE BUILDING VIA THE INDICATED COLUMN. PATCH, REPAIR, AND PAINT AS REQUIRED (COORDINATE WITH GENERAL CONTRACTOR).
6	EXTEND CONDUIT OVERHEAD TO DESIGNATED EQUIPMENT (PANELBOARDS, EQUIPMENT RACKS AND ACCESS CONTROL PANELS) AS NOTED.
7	ROUTE CIRCUIT THROUGH LIGHTING CONTACTOR (ELECTRICAL ROOM 129). PROVIDE UNSWITCHED CONDUCTOR FOR BATTERY INVERTERS.
8	AS PART OF THE LIGHITNG CONTROLS, PROVIDE AN AUXILARY RELAY WITH "RESTROOM OCCUPIED" STATUS OUTPUT TO THE BAS CONTROL PANEL (COMPUTER/SERVER 261). COORDINATE REQUIREMENTS WITH THE TEMPERATURE CONTROLS CONTRACTOR.
9	ROUTE CIRCUIT THROUGH LIGHTING CONTACTOR (ELECTRICAL ROOM 129).
10	JUNCTION BOXES FOR OL7 LUMINAIRES WILL BE LOCATED BEHIND PARAPET WALL ON ROOF.
11	MOUNT OL7 LUMINAIRES 2' AFF TOP OF BUILDING SIGNAGE.

NOTES:

1. ARCHITECT TO SELECT COLOR/FINISH DURING SHOP DRAWING PHASE.
2. INTEGRAL CONTROLS SHALL INCLUDE PHOTOCELL FOR ON/OFF CONTROL AND MOTION SENSOR FOR AUTOMATICALLY DIMMING. LIGHTING POWER SHALL DIM BY 30% WHEN NO ACTIVITY HAS BEEN DETECTED FOR A TIME NO LONGER THAN 15 MINUTES.
3. PROVIDE 24VDC LED TAPE LIGHT (LENGTH AS REQUIRED) WITH POWER SUPPLY (ULV96), WIRE LEAD CONNECTORS (UNI-WL-I-WL12-6), CORNER CONNECTORS (UNI-WL-I-CC12-3I), AND EXTRUDED ALUMINUM MOUNTING CHANNEL (CH-014-C).
4. MODEL NUMBER REFERENCED IS BASED OFF THE ORIGINAL CONSTRUCTION DOCUMENTS. CONTRACTOR SHALL REPLACE EXISTING LAMPS AND BALLASTS WITH A 4FT, 3 BAR, 40K LED LIGHTBAR KIT - EQUIVALENT TO LITHONIA LIGHTING #LBK 4FT 3 6000LMHE 80CRI 40K MIN1 EZT MVOLT. PROVIDE QUANTITY AS REQUIRED BASED ON LUMINAIRE LENGTH.

1 FIRST LEVEL - LIGHTING CONTROL PLAN - AREA A

SCALE: 1/8" = 1'-0"

GENERAL NOTES:

1	LIGHTING CONTROL IS DESIGNATED WITH A CIRCULAR SYMBOL WITH "LC-#". REFER TO LIGHTING CONTROL DETAILS ON SHEET EL501 THROUGH EL503.
2	LIGHTING CONTROL CABLES HAVE NOT BEEN SHOWN; HOWEVER, SHALL BE PROVIDED AS REQUIRED BASED ON SPECIFIC LIGHTING CONTROL UTILIZED.
3	LIGHTING CONTROL CABLES SHALL BE CAT 6 WITHIN AN OVERALL WHITE COLORED JACKET. RJ45 MODULAR JACKS SHALL BE CRIMPED ON AND TESTED FOR OPENS, CROSS CONNECTS, AND MISMATCHED PAIRS. COLOR CONFIGURATION SHALL BE ACCORDING TO TIA/EIA 568B COLOR CODING STANDARD.
4	LIGHTING CONTROL CABLES SHALL BE "DAISY CHAINED" BETWEEN LIGHTING CONTROL DEVICES (OCCUPANCY SENSOR, POWER/RELAY PACKS, WALLPODS, ETC.) WITHIN EACH ROOM. CABLING SHALL BE ROUTED ABOVE CEILING AND SECURED BY BRIDAL RINGS (OR EQUIVALENT).
5	OCCUPANCY SENSORS SHALL BE MOUNTED ON A VIBRATION FREE SURFACE AND SHALL BE LOCATED AT LEAST 6'-0" FROM DIFFUSERS.

SHEET KEYNOTES

1	ROOM/AREA CONTROLLED BY LINE VOLTAGE SWITCH.

GENERAL NOTES:

1	WORK SHOWN IN LIGHT PEN (SHADED) IS EXISTING TO REMAIN EQUIPMENT / DEVICES. WORK SHOWN IN HEAVY PEN (BOLD) IS NEW WORK; HOWEVER, MAY BE NEW EQUIPMENT OR REINSTALLATION OF EXISTING DEVICES (AS NOTED).
2	REFER TO ONE-LINE DIAGRAMS (AND/OR PANELBOARD SCHEDULES) FOR CONDUIT/CONDUCTOR SIZES FOR BRANCH PANELBOARD FEEDERS AND INDICATED BRANCH CIRCUITS.
3	INDIVIDUAL HOMERUNS HAVE BEEN SHOWN FOR EACH CIRCUIT FOR CLARITY. CONTRACTOR MAY CHOOSE TO COMBINE UP TO THREE (3) 20A/120V BRANCH CIRCUITS IN A COMMON CONDUIT WITHOUT UPSIZING CONDUCTORS. EACH CIRCUIT SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR-CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.
4	COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.
5	COORDINATE EXACT LOCATION OF RECEPTACLES, EQUIPMENT CONNECTIONS, DEVICES, ETC. WITH ARCHITECT APPROVED CASEWORK / EQUIPMENT SHOP DAWINGS PRIOR TO ROUGH-IN.
6	PROVIDE FIRE STOP FOR PENETRATIONS OF FIRE RATED WALLS AND FLOORS. REFER TO LOCATIONS ON ARCITECTURAL DRAWINGS.

SHEET KEYNOTES

1	EXISTING PANELBOARD AL1 (225A MLO, 480Y/277V, 3-PHASE, 4-WIRE).
2	EXISTING PANELBOARD AR1 TRANSFORMER (30KVA, 480V X 208Y/120V, 3-PHASE, 4-WIRE).
3	EXISTING PANELBOARD AR1 (100A MLO, 208Y/120V, 3-PHASE, 4-WIRE).
4	EXISTING 100A DISCONNET SWITCH.
5	MOUNT RECEPTACLE IN KNEESPACE OF CASEWORK. COORDINATE WITH ARCHITECTURAL DRAWINGS AND ARCHITECT APPROVED CASEWORK SHOP DRAWINGS.
6	MOUNT RECEPTACLE 4" ABOVE COUNTERTOP / BACKSPLASH. COORDINATE WITH ARCHITECTURAL DRAWINGS AND APPROVED CASEWORK SHOP DRAWINGS PRIOR TO ROUGH-IN.
7	DEDICATED RECEPTACLES FOR ELECTRIC WATER COOLER. COORDINATE REQUIREMENTS AND MOUNTING HEIGHT WITH PLUMBING CONTRACTOR PRIOR TO ROUGH-IN. REFER TO DETAIL 6, SHEET 501 FOR ADDITIONAL INFORMATION.
8	DEDICATED RECEPTACLE FOR COPIER MACHINE.
9	DEDICATED RECEPTACLE FOR WALL-MOUNTED TV. MOUNT RECEPTACLE AT 72" AFF.
10	PANELBOARD AL1 SHALL BE REFED FROM THE NEW DISTRIBUTION PANELBOARD, DP. REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-604.
11	MANUAL MOTOR STARTER FOR HVLS FAN (LOCATE OUTSIDE FOOTPRINT OF FAN'S BLADES). CONTRACTOR SHALL PROVIDE FINAL CONNECTION.
12	INSTALL AND TERMINATE CONTROL CABLING BETWEEN HVLS FANS. ROUTE IN 3/4"C. CONTROL CABLING (SHIELDED CAT 5E CABLE) IS PROVIDED WITH FANS.
13	NEW BRANCH PANELBOARD AR2 (110A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
14	NEW PANELBOARD AR2 TRANSFORMER (30KVA, 480V X 208/120V, 3-PHASE, 4-WIRE DRY-TYPE TRANSFORMER - RACK MOUNT ABOVE THE EXISTING AR1 TRANSFORMER). REFER TO DETAIL 4, SHEET E-502.
15	CONTRACTOR SHALL PROVIDE AN ALUMINUM TELE-POWER POLE FOR SERVING THE ADJACENT WORKSTATIONS/DESKS. PROVIDE FLEXIBLE CONNECTION FROM POWER TELE-POWER POLE TO WORKSTATION RECEPTACLES (UTILIZE CIRCUITS SHOWN). TELE-POWER POLE SHALL INCLUDE MOUNTING HARDWARE, KO FOR WORKSTATION CONNECTIONS, ENTRANCE END CAPS, AND CEILING TRIM PLATES (EQUIVALENT TO WIREMOLD AMTC-4).
16	PROVIDE AND INSTALL RECEPTACLE WITHIN WORKSTATION/DESK. COORDINATE WITH APPROVED WORKSTATION SHOP DRAWINGS.
17	EXISTING PANELBOARD MOR (100A MLO, 120/240V, 1-PHASE, 3-WIRE). PANELBOARD WILL BE PROVIDED WITH THE PRE-MANUFACTURERED STORAGE UNIT.
18	PROVIDE AND INSTALL A NEW PANELBOARD MOR ELECTRICAL FEEDER FROM NEW PANELBOARD WHR2 (SHEET EP404). REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-606.
19	PROVIDE 120V CONNECTION TO TRAP PRIMER. COORDINATE EXACT LOCATION WITH PLUMBING CONTRACTOR.
20	30A/240V/1-PHASE NON-FUSED DISCONNECT SWITCH (NEMA 1 ENCLOSURE).
21	INDOOR UNIT, DSS-6 SHALL BE FED ELECTRICALLY FROM THE CORRESPONDING OUTDOOR UNIT, CU-6. UTILIZE 2#12, 1#12 GND, 3/4"C AND TERMINATE ON TERMINAL BLOCKS WITHIN BOTH UNITS.
22	INDOOR UNIT, DSS-5 SHALL BE FED ELECTRICALLY FROM THE CORRESPONDING OUTDOOR UNIT, CU-5. UTILIZE 2#12, 1#12 GND, 3/4"C AND TERMINATE ON TERMINAL BLOCKS WITHIN BOTH UNITS.
23	PROVIDE DEDICATED RECEPTACLE (NEMA L5-20R) FOR TELECOMMUNICATIONS EQUIPMENT.
24	REFER TO SITE PLANS (SHEETS ES102 AND ES401) FOR CONDUITS ASSOCIATED WITH SITE LIGHTING, ACCESS CONTROL, INTERCOM, VIDEO SURVEILLANCE, AND GATE BRANCH POWER ENTERING THE BUILDING VIA THE INDICATED COLUMN. PATCH, REPAIR, AND PAINT AS REQUIRED (COORDINATE WITH GENERAL CONTRACTOR).
25	EXTEND CONDUIT OVERHEAD TO DESIGNATED EQUIPMENT (PANELBOARDS, EQUIPMENT RACKS AND ACCESS CONTROL PANELS) AS NOTED.
26	MOUNT INDICATED RECEPTACLE AT 46" AFF.
27	CONTRACTOR SHALL PROVIDE AN ALUMINUM TELE-POWER POLE. PROVIDE RECEPTACLE MOUNTED AT 46" AFF. TELE-POWER POLE SHALL INCLUDE MOUNTING HARDWARE, KO FOR WORKSTATION CONNECTIONS, ENTRANCE END CAPS, AND CEILING TRIM PLATES (EQUIVALENT TO WIREMOLD AMTC-4).

SCALE: 1/8" = 1'-0"

PLAN NORTH

GENERAL NOTES:

1	WORK SHOWN IN LIGHT PEN (SHADED) IS EXISTING TO REMAIN EQUIPMENT / DEVICES. WORK SHOWN IN HEAVY PEN (BOLD) IS NEW WORK; HOWEVER, MAY BE NEW EQUIPMENT OR REINSTALLATION OF EXISTING DEVICES (AS NOTED).
2	REFER TO ONE-LINE DIAGRAMS (AND/OR PANELBOARD SCHEDULES) FOR CONDUIT/CONDUCTOR SIZES FOR BRANCH PANELBOARD FEEDERS AND INDICATED BRANCH CIRCUITS.
3	INDIVIDUAL HOMERUNS HAVE BEEN SHOWN FOR EACH CIRCUIT FOR CLARITY. CONTRACTOR MAY CHOOSE TO COMBINE UP TO THREE (3) 20A/120V BRANCH CIRCUITS IN A COMMON CONDUIT WITHOUT UPSIZING CONDUCTORS. EACH CIRCUIT SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR-CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.
4	COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.
5	COORDINATE EXACT LOCATION OF RECEPTACLES, EQUIPMENT CONNECTIONS, DEVICES, ETC. WITH ARCHITECT APPROVED CASEWORK / EQUIPMENT SHOP DAWINGS PRIOR TO ROUGH-IN.
6	PROVIDE FIRE STOP FOR PENETRATIONS OF FIRE RATED WALLS AND FLOORS. REFER TO LOCATIONS ON ARCITECTURAL DRAWINGS.

SHEET KEYNOTES

1	EXISTING PANELBOARD EML1 (100A MLO, 480Y/277V, 3-PHASE, 4-WIRE).
2	EXISTING PANELBOARD EMR1 TRANSFORMER (30KVA, 480V X 208Y/120V, 3-PHASE, 4-WIRE).
3	EXISTING PANELBOARD EMR1 (100A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
4	EXISTING PANELBOARD L1 (225A MLO, 480Y/277V, 3-PHASE, 4-WIRE).
5	EXISTING PANELBOARD R1A TRANSFORMER (45KVA, 480V X 208Y/120V, 3-PHASE, 4-WIRE).
6	EXISTING PANELBOARD R1A (150A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
7	EXISTING PANELBOARD R1B TRANSFORMER (45KVA, 480V X 208Y/120V, 3-PHASE, 4-WIRE).
8	EXISTING PANELBOARD R1B (150A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
9	DEDICATED RECEPTACLE FOR COPIER MACHINE.
10	EXISTING PANELBOARD EML2 (125A MLO, 480Y/277V, 3-PHASE, 4-WIRE).
11	EXISTING PANELBOARD EMR2 TRANSFORMER (30KVA, 480V X 208Y/120V, 3-PHASE, 4-WIRE).
12	EXISTING PANELBOARD EMR2 (100A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
13	EXISTING PANELBOARD L2 (100A MLO, 480Y/277V, 3-PHASE, 4-WIRE).
14	EXISTING PANELBOARD R2 TRANSFORMER (45KVA, 480V X 208Y/120V, 3-PHASE, 4-WIRE).
15	EXISTING PANELBOARD R2 (150A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
16	EXISTING PANELBOARD TC (200A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
17	CONNECT NEW RECEPTACLE TO EXISTING RECEPACLE CIRCUIT AS SHOWN.
18	DEDICATED RECEPTACLE FOR WALL-MOUNTED TV. MOUNT RECEPTACLE AT 72" AFF.
19	CONTRACTOR SHALL PROVIDE RECESSED JUNCTION BOX WITH BLANK COVERPLATE. PROVIDE COVERPLATE WITH KO FOR FLEXIBLE CONNECTION TO WORKSTATION RECEPTACLES (UTILIZE CIRCUITS SHOWN).
20	PROVIDE AND INSTALL RECEPTACLE WITHIN WORKSTATION/DESK. COORDINATE WITH APPROVED WORKSTATION SHOP DRAWINGS.
21	NEW BRANCH PANELBOARD R2A (110A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
22	NEW PANELBOARD R2A TRANSFORMER (30KVA, 480V X 208/120V, 3-PHASE, 4-WIRE DRY-TYPE TRANSFORMER - RACK MOUNT ABOVE THE EXSTING R2 TRANSFORMER). REFER TO DETAIL 4, SHEET E-502.
23	MOUNT RECEPTACLE 4" ABOVE COUNTERTOP / BACKSPLASH. COORDINATE WITH ARCHITECTURAL DRAWINGS AND APPROVED CASEWORK SHOP DRAWINGS PRIOR TO ROUGH-IN.
24	THE EXISTING EWC DOES NOT APPEAR TO BE GFCI PROTECTED. PROVIDE A BLANK FACE GFCI RECEPTACLE. INTERCEPT THE EXISTING CIRCUIT AND REFED THE EXISTING RECEPTACLE(S) FROM THIS NEW GFCI RECEPTACLE.
25	30A/240V/1-PHASE NON-FUSED DISCONNECT SWITCH (NEMA 1 ENCLOSURE).
26	INDOOR UNIT, DSS-4A (OR DSS-4B) SHALL BE FED ELECTRICALLY FROM THE CORRESPONDING OUTDOOR UNIT, CU-4A (OR CU-4B). UTILIZE 2#12, 1#12 GND, 3/4"C AND TERMINATE ON TERMINAL BLOCKS WITHIN BOTH UNITS.
27	INDOOR UNIT, DSS-3A (OR DSS-3B) SHALL BE FED ELECTRICALLY FROM THE CORRESPONDING OUTDOOR UNIT, CU-3A (OR CU-3B). UTILIZE 2#12, 1#12 GND, 3/4"C AND TERMINATE ON TERMINAL BLOCKS WITHIN BOTH UNITS.
28	INDOOR UNIT, DSS-2A (OR DSS-2B/2C) SHALL BE FED ELECTRICALLY FROM THE CORRESPONDING OUTDOOR UNIT, CU-2A (OR CU-2B/2C). UTILIZE 2#12, 1#12 GND, 3/4"C AND TERMINATE ON TERMINAL BLOCKS WITHIN BOTH UNITS.
29	PROVIDE DEDICATED RECEPTACLE (NEMA L6-30R) FOR TELECOMMUNICATIONS EQUIPMENT. LOCATE BELOW RAISED FLOOR.
30	PROVIDE 120V CONNECTION TO THE BAS CONTROL PANEL. COORDINATE LOCATION OF CONTROL PANEL WITH MECHANICAL CONTROLS CONTRACTOR.
31	PANELBOARD TC SHALL BE REFED FROM PANELBOARD DP. ROUTE VIA TRANSFORMER AND DISCONNECT SWITCH (SHEET EP404).

6	PROVIDE FIRE STOP FOR PENETRATIONS OF FIRE RATED WALLS AND FLOORS. REFER TO LOCATIONS ON ARCITECTURAL DRAWINGS.

SHEET KEYNOTES

1	DEDICATED RECEPTACLE FOR COPIER MACHINE.
2	DRYER RECEPTACLE - PROVIDE 30AMP, 125/250V, 3-POLE, 4-WIRE RECEPTACLE (NEMA 14-30R). CONTRACTOR SHALL PROVIDE MATCHING DRYER POWER SUPPLY CORD COMPLETE WITH PLUG (NEMA 14-30P).
3	DEDICATED WASHER RECEPTACLE.
4	30A/600V/3-PHASE NON-FUSED DISCONNECT SWITCH (NEMA 1 ENCLOSURE). PROVIDE CONNECTION TO OVERHEAD DOOR CONTROLLER, AS REQUIRED. COORDINATE REQUIREMENTS WITH OVERHEAD DOOR INSTALLER. REFER TO FIELD CONNECTION DETAIL 1 ON SHEET E-504 FOR ADDITIONAL INFORMATION.
5	UP/DOWN/STOP PUSHBUTTON FOR OVERHEAD DOOR. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
6	PROVIDE CONNECTION TO OVERHEAD DOOR SAFETY BEAM PHOTO SENSOR. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
7	PROVIDE CONNECTION TO OVERHEAD DOOR SENSING EDGE. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
8	MOUNT RECEPTACLE 4" ABOVE COUNTERTOP / BACKSPLASH. COORDINATE WITH ARCHITECTURAL DRAWINGS AND APPROVED CASEWORK SHOP DRAWINGS PRIOR TO ROUGH-IN.
9	CONTRACTOR SHALL PROVIDE RECESSED JUNCTION BOX WITH BLANK COVERPLATE. PROVIDE COVERPLATE WITH KO FOR FLEXIBLE CONNECTION TO WORKSTATION RECEPTACLES (UTILIZE CIRCUITS SHOWN).
10	PROVIDE AND INSTALL RECEPTACLE WITHIN WORKSTATION/DESK. COORDINATE WITH APPROVED WORKSTATION SHOP DRAWINGS.
11	BACKFEED EXISTING RECEPTACLES FROM A NEW 120V CIRCUIT.
12	DEDICATED RECEPTACLE FOR WALL-MOUNTED TV. MOUNT RECEPTACLE AT 72" AFF.
13	THE EXISTING EWC DOES NOT APPEAR TO BE GFCI PROTECTED. PROVIDE A BLANK FACE GFCI RECEPTACLE. INTERCEPT THE EXISTING CIRCUIT AND REFED THE EXISTING RECEPTACLE(S) FROM THIS NEW GFCI RECEPTACLE.
14	DEDICATED RECEPTACLE FOR WORKBENCH. MOUNT RECEPTACLE AT 48" AFF.
15	DEDICATED SIMPLEX RECEPTACLE (NEMA L5-30R) FOR WORKBENCH. MOUNT RECEPTACLE AT 48" AFF.
16	WELDING / HOT WORK AREA - COORDINATE RECEPTACLES AND DISCONNECT SWITCHES FOR AIR COMPRESSOR, WELDERS, AND WORKBENCH TOOLS WITH LFUCG PRIOR TO ROUGH-IN.
17	ROUTE THE 120V CIRCUIT THROUGH A CONTROL MODULE PROVIDED AS PART OF THE BAS SYSTEM.
18	NEW PANELBOARD WHR2 TRANSFORMER (45KVA, 480V X 240Y/120V, 3-PHASE, 4-WIRE).
19	4" CONCRETE HOUSEKEEPING PAD.
20	MIG WELDER - 60A/240V/3-PHASE FUSED DISCONNECT SWITCH (NEMA 1 ENCLOSURE). FUSED AT 40 AMPS. ALSO, PROVIDE 50A, 250V, 2-POLE, 3-WIRE RECEPTACLE (NEMA 6-50R).
21	MOUNT INDICATED RECEPTACLE AT 72" AFF.

5. COORDINATE EXACT LOCATION OF RECEPTACLES, EQUIPMENT CONNECTIONS, DEVICES, ETC. WITH ARCHITECT APPROVED CASEWORK / EQUIPMENT SHOP DAWINGS PRIOR TO ROUGH-IN.
6. PROVIDE FIRE STOP FOR PENETRATIONS OF FIRE RATED WALLS AND FLOORS. REFER TO LOCATIONS ON ARCITECTURAL DRAWINGS.

SHEET KEYNOTES

1. EXISTING 1200A, 480Y/277V, 3-PHASE SERVICE ENTRANCE RATED CIRCUIT BREAKER W/ NEMA 3R ENCLOSURE.
2. EXISTING UTILITY METER.
3. EXISTING MAIN DISTRIBUTION BOARD, MDB (1200A MLO, 480Y/277V, 3-PHASE, 4-WIRE).
4. EXISTING PANELBOARD M1 (200A MLO, 480Y/277V, 3-PHASE, 4-WIRE).
5. EXISTING EMERGENCY MAIN DISTRIBUTION PANELBOARD, EMDP (600A MLO, 480Y/277V, 3-PHASE, 4-WIRE).
6. EXISTING PANELBOARD EML3 (125A MLO, 480Y/277V, 3-PHASE, 4-WIRE).
7. EXISTING PANELBOARD EMR3 (100A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
8. EXISTING PANELBOARD EMR3 TRANSFORMER (30KVA, 480V X 208Y/120V, 3-PHASE, 4-WIRE).
9. EXISTING PANELBOARD WH (400A MLO, 480Y/277V, 3-PHASE, 4-WIRE).
10. EXISTING PANELBOARD WHR TRANSFORMER (30KVA, 480V X 208Y/120V, 3-PHASE, 4-WIRE).
11. EXISTING PANELBOARD WHR (125A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
12. 30A/600V/3-PHASE NON-FUSED DISCONNECT SWITCH (NEMA 1 ENCLOSURE). PROVIDE CONNECTION TO OVERHEAD DOOR CONTROLLER, AS REQUIRED. COORDINATE REQUIREMENTS WITH OVERHEAD DOOR INSTALLER. REFER TO FIELD CONNECTION DETAIL 1 ON SHEET E-504 FOR ADDITIONAL INFORMATION.
13. UP/DOWN/STOP PUSHBUTTON FOR OVERHEAD DOOR. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
14. PROVIDE CONNECTION TO OVERHEAD DOOR SAFETY BEAM PHOTO SENSOR. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
15. PROVIDE CONNECTION TO OVERHEAD DOOR SENSING EDGE. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
16. MOUNT INDICATED RECEPTACLE AT 46" AFF.
17. DEDICATED RECEPTACLE FOR WALL-MOUNTED TV. MOUNT RECEPTACLE AT 72" AFF.
18. DEDICATED RECEPTACLES FOR ELECTRIC WATER COOLER. COORDINATE REQUIREMENTS AND MOUNTING HEIGHT WITH PLUMBING CONTRACTOR PRIOR TO ROUGH-IN. REFER TO DETAIL 6, SHEET 501 FOR ADDITIONAL INFORMATION.
19. EXISTING PANELBOARD BC (125A MLO, 480Y/277V, 3-PHASE, 4-WIRE).
20. MANUAL MOTOR STARTER FOR HVLS FAN (LOCATE OUTSIDE FOOTPRINT OF FAN'S BLADES). CONTRACTOR SHALL PROVIDE FINAL CONNECTION.
21. INSTALL AND TERMINATE CONTROL CABLING BETWEEN HVLS FANS. ROUTE IN 3/4"C. CONTROL CABLING (SHIELDED CAT 5E CABLE) IS PROVIDED WITH FANS.
22. HVLS FAN CONTROL PANEL AND TOUCHSCREEN.
23. EXTEND THE HVLS FAN CONTROL CABLING (CAT 5E CABLE) TO THE HVLS FAN CONTROL PANEL. ROUTE IN 3/4"C. CONTROL CABLING (SHIELDED CAT 5E CABLE) IS PROVIDED WITH FANS.
24. PROVIDE 120V CONNECTION TO WATER HEATER. COORDINATE EXACT LOCATION WITH PLUMBING CONTRACTOR.
25. PROVIDE 120V CONNECTION TO RECIRCULATION PUMP. COORDINATE EXACT LOCATION WITH PLUMBING CONTRACTOR.
26. PROVIDE 120V CONNECTION TO TRAP PRIMER. COORDINATE EXACT LOCATION WITH PLUMBING CONTRACTOR.
27. DEDICATED RECEPTACLE FOR TV TRUCKS.
28. 30A/240V/1-PHASE NON-FUSED DISCONNECT SWITCH (NEMA 1 ENCLOSURE).
29. INDOOR UNIT, DSS-1A (OR DSS-1B/1C) SHALL BE FED ELECTRICALLY FROM THE CORRESPONDING OUTDOOR UNIT, CU-1A (OR CU-1B/1C). UTILIZE 2#12, 1#12 GND, 3/4"C AND TERMINATE ON TERMINAL BLOCKS WITHIN BOTH UNITS.
30. SWITCH FOR CONTROL OF EXHAUST FAN, EF-7. LABEL SWITCH AS "FAN CONTROL".
31. PROVIDE DEDICATED RECEPTACLE (NEMA L5-30R) FOR TV TRUCK.
32. SUMP PUMP CONTROL PANEL (FURNISHED/INSTALLED BY DIV 23). PROVIDE TWO (2) 120V CIRCUITS FOR PUMP POWER.
33. PROVIDE 120V CONNNECTION TO SUMP PUMP CONTROL PANEL FOR CONTROL/ALARM POWER. ROUTE THROUGH ADJACENT SWITCH.
34. REFER TO SITE PLANS (SHEETS ES102 AND ES401) FOR CONDUITS ASSOCIATED WITH SITE LIGHTING, ACCESS CONTROL, INTERCOM, VIDEO SURVEILLANCE, AND GATE BRANCH POWER ENTERING THE BUILDING WITHIN THIS AREA. LB CONDUIT INTO BUILDING. PATCH/SEAL CONDUIT PENETRATIONS ON EXTERIOR WALL.
35. EXTEND CONDUIT OVERHEAD TO DESIGNATED EQUIPMENT (PANELBOARDS, EQUIPMENT RACKS AND ACCESS CONTROL PANELS) AS NOTED.
36. PLASMA CUTTER - 100A/240V/3-PHASE FUSED DISCONNECT SWITCH (NEMA 1 ENCLOSURE). FUSED AT 80 AMPS. ALSO, PROVIDE RECEPTACLE (COORDINATE RECEPTACLE CONFIGURATION WITH LFUCG).
37. AIR COMPREESOR - PROVIDE DIRECT CONNECTION.
38. TIG WELDER - 60A/240V/3-PHASE FUSED DISCONNECT SWITCH (NEMA 1 ENCLOSURE). FUSED AT 50 AMPS. ALSO, PROVIDE RECEPTACLE (COORDINATE CONFIGURATION WITH LFUCG).
39. WELDING / HOT WORK AREA - COORDINATE RECEPTACLES AND DISCONNECT SWITCHES FOR AIR COMPRESSOR, WELDERS, AND WORKBENCH TOOLS WITH LFUCG PRIOR TO ROUGH-IN.
40. NEW DISTRIBUTION PANELBOARD DP (400A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
41. NEW PANELBOARD TC TRANSFORMER (75KVA, 480V X 208/120V, 3-PHASE, 4-WIRE DRY-TYPE TRANSFORMER - FLOOR MOUNTED).
42. 200A/240V/3-PHASE FUSIBLE DISCONNECT SWITCH (NEMA 1 ENCLOSURE) FOR SECONDARY OVERCURRENT PROTECTION OF PANELBOARD TC TRANSFORMER. FUSE AT 200 AMPS.
43. NEW PANELBOARD MR1 TRANSFORMER (75KVA, 480V X 208Y/120V, 3-PHASE, 4-WIRE).
44. NEW BRANCH PANELBOARD MR1 (200A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
45. 4" CONCRETE HOUSEKEEPING PAD.
46. NEW BRANCH PANELBOARD WHR2 (150A, 240/120V, 3-PHASE, 4-WIRE).
47. RECEPTACLE MOUNTED ON COLUMN. CONTRACTOR SHALL COORDINATE ORIENTATION AND HEIGHT WITH LFUCG.
48. ROUTE THE 120V CIRCUIT THROUGH A CONTROL MODULE PROVIDED AS PART OF THE BAS SYSTEM.
49. EXISTING CONTACTOR AND PHOTOCELL TO REMAIN. REFED FROM EXISTING PANELBOARD WH.
50. REFED EXISTING CIRCUITS WHICH WERE FED FROM PANELBOARD HOUSE. IT IS ASSUMED THE EXISTING CIRCUITS WERE CONTROLLED BY THE EXISTING LIGHTING CONTACTOR. CONTRACTOR TO FIELD VERIFY WHETHER ALL CIRCUITS ARE REQUIRED.
51. PROVIDE 2" CONDUIT FROM SUMP PUMP BASIN TO SUMP PUMP CONTROL PANEL (COORDINATE WITH PLUMBING CONTRACTOR). PROVIDE SEAL OFF FITTING IN CONDUIT WITH FIBER FILLER AND SEALING CEMENT (INSTALL PER NEC 500 AND 502). CONDUIT SHALL BE USED FOR FACTORY PUMP AND FLOAT CABLES.

EACH CIRCUIT SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR-CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.
4	COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.
5	COORDINATE EXACT LOCATION OF RECEPTACLES, EQUIPMENT CONNECTIONS, DEVICES, ETC. WITH ARCHITECT APPROVED CASEWORK / EQUIPMENT SHOP DAWINGS PRIOR TO ROUGH-IN.
6	PROVIDE FIRE STOP FOR PENETRATIONS OF FIRE RATED WALLS AND FLOORS. REFER TO LOCATIONS ON ARCITECTURAL DRAWINGS.

SHEET KEYNOTES

1	HVAC UNIT IS PROVIDED WITH FACTORY MOUNTED DISCONNECT SWITCH.
2	PROVIDE 120V CIRCUIT AND CONNECT TO HVAC UNIT RECEPTACLES. RECEPTACLES SHOWN AT RTUs ARE INTEGRAL TO UNIT, OTHERWISE CONTRACTOR SHALL PROVIDE AND INSTALL. ROUTE CONDUIT ABOVE LAY-IN CEILING AND NOT ON ROOF.
3	CONTRACTOR MAY REUSE EXISTING ELECTRICAL FEEDER WHICH SERVED THE REMOVED HVAC UNIT.
4	CONTRACTOR MAY REUSE EXISTING ELECTRICAL FEEDER CONDUIT; HOWEVER, SHALL PROVIDE NEW CONDUCTORS FOR CONNECTION TO THE NEW HVAC UNIT.
5	30A/240V/1-PHASE FUSIBLE DISCONNECT SWITCH (NEMA 4X ENCLOSURE). FUSE AT 15AMPS. MOUNT SIMILAR TO DETAIL 1, SHEET E-501.
6	OUTDOOR UNIT SHALL PROVIDE POWER TO THE INDICATED INDOOR UNIT. UTILIZE 2#12, 1#12 GND, 3/4"C AND TERMINATE ON TERMINAL BLOCKS WITHIN BOTH UNITS.
7	30A/240V/1-PHASE FUSIBLE DISCONNECT SWITCH (NEMA 4X ENCLOSURE). FUSE AT 20AMPS. MOUNT SIMILAR TO DETAIL 1, SHEET E-501.
8	CONTRACTOR SHALL PROVIDE AND INSTALL WEATHERPROOF GFCI RECEPTACLE. MOUNT ON EQUIPMENT RACK WITH DISCONNECT SWITCH.

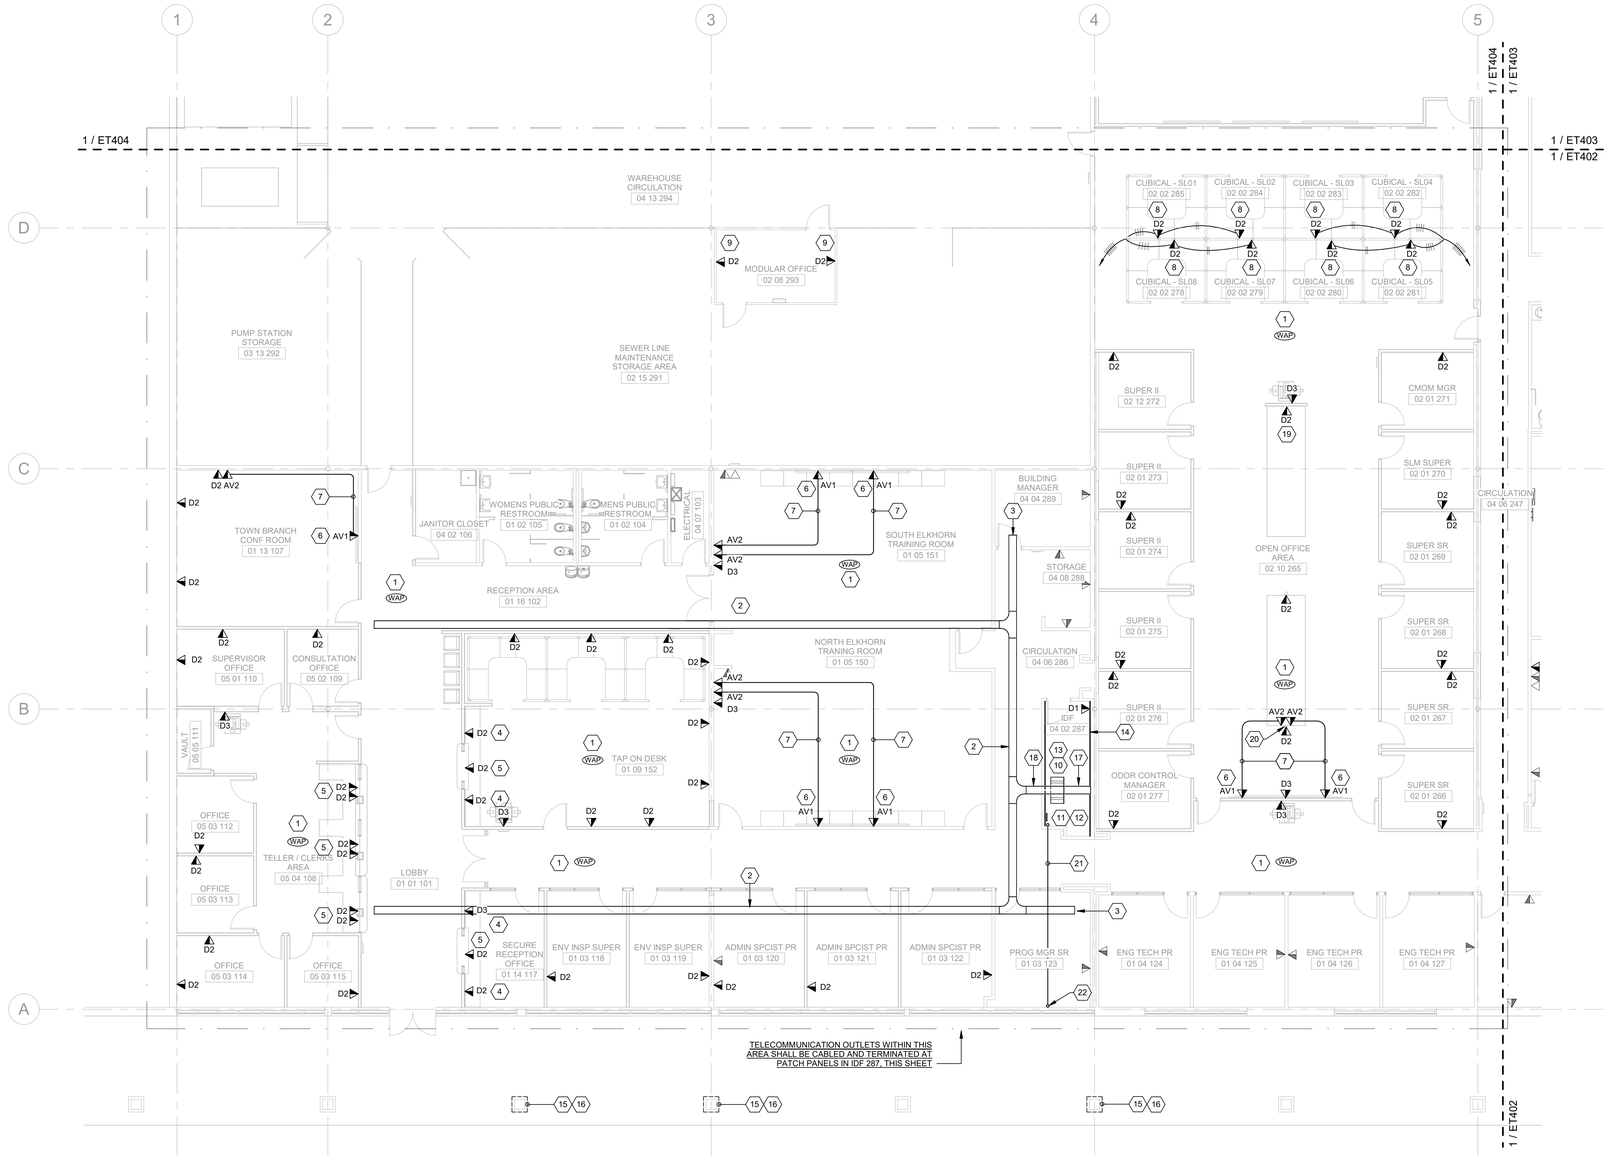
8/11/2025 7:46:41 PM C:\DATA\LFUCG DWQ HDQ\Working Drawings\Revit Files\Central Model\24-ITE-308301.rvt



GENERAL NOTES:

1	WORK SHOWN IN LIGHT PEN (SHADED) IS EXISTING TO REMAIN EQUIPMENT / DEVICES. WORK SHOWN IN HEAVY PEN (BOLD) IS NEW WORK; HOWEVER, MAY BE NEW EQUIPMENT OR REINSTALLATION OF EXISTING DEVICES (AS NOTED).
2	TELECOMMUNICATION DEVICE TAGS INDICATE THE ASSOCIATED CONFIGURATION TYPE. REFER TO SHEET ET501 FOR ADDITIONAL INFORMATION.
3	CONDUIT SHALL BE UTILIZED FOR HORIZONTAL CABLING TO ABOVE LAY-IN CEILINGS. CONTRACTOR SHALL TRANSITION FROM CONDUIT TO J-HOOKS / BRIDAL RINGS FOR ROUTING TO CABLE TRAY OR EQUIPMENT ROOM. CABLE TRAY AND J-HOOK / BRIDAL RING PATH SHALL BE COORDINATED WITH OTHER TRADES.
4	THE ENTIRE TELECOMMUNICATIONS SYSTEM INCLUDING OUTLETS, PATCH PANELS, ETC. SHALL BE LABELED IN ACCORANCE WITH TIA/EIA-606-A. LABELS SHALL BE MACHINE GENERATED.
5	CONDUIT ONLY SHALL BE UTILIZED ABOVE INACCESSIBLE CEILINGS AND EXPOSED STRUCTURES.
6	INSTALL NYLON BUSHINGS ON ALL CONDUITS TERMINATIONS FOR CABLE PROTECTION.
7	REFER TO DIVISION 27 SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

SHEET KEYNOTES

1	LOCATION OF OWNER PROVIDED / CONTRACTOR INSTALLED WIRELESS ACCESS POINT. PROVIDE 1-PORT KEYSTONE SURFACE MOUNTED BOX ABOVE CEILING.
2	12" WIDE X 6" DEEP CABLE TRAY - MOUNTED ABOVE CEILING. COORDINATE ROUTING WITH OTHER TRADES AND EXISTING CONDITIONS.
3	ROUTE NEW CABLE TRAY UP TO AND CONNECT TO THE EXISTING CABLE TRAY. CONTRACTOR SHALL FIELD COORDINATE EXISTING CABLE TRAY LAYOUT.
4	MOUNT TELECOMMUNICATIONS OUTLET 4" ABOVE COUNTERTOP / BACKSPLASH. COORDINATE WITH ARCHITECTURAL DRAWINGS AND APPROVED CASEWORK SHOP DRAWINGS PRIOR TO ROUGH-IN.
5	MOUNT TELECOMMUNICATIONS OUTLET IN KNEESPACE OF CASEWORK. COORDINATE WITH ARCHITECTURAL DRAWINGS AND ARCHITECT APPROVED CASEWORK SHOP DRAWINGS.
6	TELECOMMUNICATIONS OUTLET FOR WALL-MOUNTED TV. MOUNT OUTLET AT 72" AFF.
7	PROVIDE 1-1/2"C WITH HDMI AND CAT 6 CABLES BETWEEN THE TELECOMMUNICATIONS OUTLETS (AV1/AV2).
8	PROVIDE AND INSTALL TELECOMMUNICATIONS OUTLET WITHIN WORKSTATION/DESK. COORDINATE WITH APPROVED WORKSTATION SHOP DRAWINGS.
9	LOCATE TELECOMMUNICATIONS OUTLET WITHIN THE MODULAR OFFICE. COORDINATE FINAL LOCATION WITH EXISTING FURNITURE LAYOUT.
10	45RU HIGH FOUR-POST TELECOMMUNICATIONS EQUIPMENT RACK WITH VERTICAL AND HORIZONTAL CABLE MANAGEMENT. REFER TO SHEET ET603 FOR ADDITIONAL INFORMATION.
11	PROVIDE A 1/4" X 4" X 24" (MIN.) TELECOMMUNICATIONS GROUND BAR (TGB). MOUNT TO WALL WITH NON-CONDUCTIVE MATERIAL.
12	PROVIDE #3/0 AWG (MIN.) GROUND FROM THE TGB TO THE TMGB (COMPUTER / SERVER, SHEET ET402).
13	PROVIDE TWO (2) 2" TELECOMMUNICATIONS CONDUIT SLEEVE FROM TELECOMMUNICATIONS EQUIPMENT CABINET TO CABLE TRAY. UTILIZE FOR OPTICAL FIBER BACKBONE CABLING FROM THE COMPUTER / SERVER 261, SHEET ET402. REFER TO SHEET ET504 FOR OPTICAL FIBER CABLE REQUIREMENTS.
14	TELECOMMUNICATIONS PLYWOOD BACKBOARD COVERING AND RIGIDLY ATTACHED TO ALL WALLS. PLYWOOD SHALL BE FIRE-RATED AND TIA/EIA APPROVED.
15	REFER TO SITE PLANS (SHEETS ES102 AND ES401) FOR CONDUITS ASSOCIATED WITH SITE LIGHTING, ACCESS CONTROL, INTERCOM, VIDEO SURVEILLANCE, AND GATE BRANCH POWER ENTERING THE BUILDING VIA THE INDICATED COLUMN. PATCH, REPAIR, AND PAINT AS REQUIRED (COORDINATE WITH GENERAL CONTRACTOR).
16	EXTEND CONDUIT OVERHEAD TO DESIGNATED EQUIPMENT (PANELBOARDS, EQUIPMENT RACKS AND ACCESS CONTROL PANELS) AS NOTED.
17	12" CABLE RUNWAY - REFER TO DETAILS ON SHEET ET502. EXTEND BETWEEN WALLS AND BELOW CEILING.
18	TERMINATE CABLE TRAY ABOVE CEILING AND ABOVE EQUIPMENT RACK. TRANSITION CABLING FROM CABLE TRAY TO CABLE RUNWAY BELOW CEILING. BUNDLE CABLING TOGETHER FOR ROUTING THROUGH LAY-IN CEILING.
19	MOUNT TELECOMMUNICATIONS OUTLET AT 40" AFF.
20	CONTRACTOR SHALL PROVIDE AN ALUMINUM TELE-POWER POLE. PROVIDE INDICATED TELECOMMUNICATIONS OUTLETS (D2 AND 2-AV2) MOUNTED AT 46" AFF. REFER TO TELE-POWER POLE REQUIREMENTS ON "FIRST LEVEL - POWER PLAN - AREA A", SHEET EP401.
21	PROVIDE 2" CONDUIT WITH PULL STRING FROM IDF 287 TO ROOF FOR FUTURE ANTENNA CABLING.
22	STUB CONDUIT UP THROUGH ROOF ON BACKSIDE OF PARAPET WALL.

5	CONDUIT ONLY SHALL BE UTILIZED ABOVE INACCESSIBLE CEILINGS AND EXPOSED STRUCTURES.
6	INSTALL NYLON BUSHINGS ON ALL CONDUITS TERMINATIONS FOR CABLE PROTECTION.
7	REFER TO DIVISION 27 SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

SHEET KEYNOTES

1	APPROXIMATE LOCATION OF EXISTING TELECOMMUNICATIONS EQUIPMENT RACK.
2	EXISTING TELECOMMUNICATIONS GROUNDING BUSBAR (TGB).
3	LOCATION OF OWNER PROVIDED / CONTRACTOR INSTALLED WIRELESS ACCESS POINT. PROVIDE 1-PORT KEYSTONE SURFACE MOUNTED BOX ABOVE CEILING.
4	MOUNT TELECOMMUNICATIONS OUTLET 4" ABOVE COUNTERTOP / BACKSPLASH. COORDINATE WITH ARCHITECTURAL DRAWINGS AND APPROVED CASEWORK SHOP DRAWINGS PRIOR TO ROUGH-IN.
5	TELECOMMUNICATIONS OUTLET FOR WALL-MOUNTED TV. MOUNT OUTLET AT 72" AFF.
6	PROVIDE 1-1/2"C WITH HDMI AND CAT 6 CABLES BETWEEN THE TELECOMMUNICATIONS OUTLETS (AV1/AV2).
7	CONTRACTOR SHALL PROVIDE RECESSED JUNCTION BOX WITH BLANK COVERPLATE. PROVIDE COVERPLATE WITH KO FOR FLEXIBLE CONNECTION TO WORKSTATION TELECOMMUNICATIONS OUTLETS.
8	PROVIDE AND INSTALL TELECOMMUNICATIONS OUTLET WITHIN WORKSTATION/DESK. COORDINATE WITH APPROVED WORKSTATION SHOP DRAWINGS.
9	45RU HIGH FOUR-POST TELECOMMUNICATIONS EQUIPMENT RACK WITH VERTICAL AND HORIZONTAL CABLE MANAGEMENT. REFER TO SHEET ET602 FOR ADDITIONAL INFORMATION. REFER TO DETAIL 4, SHEET ET502 FOR RACK SUPPORTS.
10	12" WIDE X 4" DEEP CABLE TRAY - MOUNTED BELOW ACCESS FLOORING. COORDINATE ROUTING WITH EXISTING CONDITIONS. REFER TO DETAIL 3, SHEET ET502 FOR ADDITONAL INFORMATION.
11	PROVIDE DATA NETWORK CONNECTION TO BAS CONTROL PANEL.
12	PROVIDE DATA OUTLET FOR A BAS WORKSTATION. PROVIDE A TELECOMMUNICATIONS OUTLET WITH ONE (1) RJ45 JACK AND CAT 6 CABLING TO THE BAS NETWORK CONTROLLER (LOCATED WITHIN THE BAS CONTROL PANEL). COORDINATE COLOR OF CABLING AND JACK WITH LFUCG.
13	APPROXIMATE ROUTING OF THREE (3) EXISTING TELECOMMUNICATIONS CONDUITS (4"). CONTRACTOR MAY UTILIZE FOR THE 12-STRAND SINGLE-MODE OPTICAL FIBER (OS2) ROUTED TO THE "LFUCG VACTOR BUILDING". REFER TO SITE PLAN - ELECTRICAL NEW WORK, SHEET ES102 AND "LFUCG VACTOR BUILDING" - FIRST LEVEL - TELECOMMUNICATIONS PLAN, SHEET ET101 03 FOR CONTINUATION.
14	CONTRACTOR SHALL SAW CUT FLOOR AS REQUIRED FOR INSTALLATION OF THE 4" CONDUIT (OPTICAL FIBER).
15	STUB UP LOCATION OF 4" CONDUIT (OPTICAL FIBER) FROM SITE PLAN. REFER TO SHEET ES 102 FOR CONTINUATION.
16	PROVIDE 4" CONDUIT WITH PULL STRING FROM ELECTRICAL ROOM 129 TO COMPUTER / SERVER 261 FOR OPTICAL FIBER SERVICE. LFUCG WILL PROVIDE AND INSTALL OPTICAL FIBER CABLE.
17	PROVIDE PULLBOX FOR NEW OPTICAL FIBER CONDUIT. SIZE PER NEC.

3	PROVIDE 1-1/2"C WITH HDMI AND CAT 6 CABLES BETWEEN THE TELECOMMUNICATIONS OUTLETS (AV1/AV2).
4	LOCATION OF OWNER PROVIDED / CONTRACTOR INSTALLED WIRELESS ACCESS POINT. PROVIDE 1-PORT KEYSTONE SURFACE MOUNTED BOX - MOUNT TO BOTTOM OF STRUCTURE.
5	REFER TO SITE PLANS (SHEETS ES102 AND ES401) FOR CONDUITS ASSOCIATED WITH SITE LIGHTING, ACCESS CONTROL, INTERCOM, VIDEO SURVEILLANCE, AND GATE BRANCH POWER ENTERING THE BUILDING WITHIN THIS AREA. LB CONDUIT INTO BUILDING. PATCHSEAL CONDUIT PENETRATIONS ON EXTERIOR WALL.
6	EXTEND CONDUIT OVERHEAD TO DESIGNATED EQUIPMENT (PANELBOARDS, EQUIPMENT RACKS AND ACCESS CONTROL PANELS) AS NOTED.
7	APPROXIMATE ROUTING OF THREE (3) EXISTING TELECOMMUNICATIONS CONDUITS (4"). CONTRACTOR MAY UTILIZE FOR THE 12-STRAND SINGLE-MODE OPTICAL FIBER (OS2) ROUTED TO THE "LFUCG VACTOR BUILDING". REFER TO SITE PLAN - ELECTRICAL NEW WORK, SHEET ES102 AND "LFUCG VACTOR BUILDING" - FIRST LEVEL - TELECOMMUNICATIONS PLAN, SHEET ET101 03 FOR CONTINUATION.

SYSTEM LABELING / WIRING SPECIFICATION

DATA LABELING:

F:XY-R:P

F = IDENTIFIES FLOOR OF TELECOMMUNICATION SPACE
XY = RACK IDENTIFIER
R = PATCH PANEL IDENTIFER
P = PATCH PANEL PORT IDENTIFIER

PATCH PANEL TYPES:

TYPE A - FOR TERMINATION OF DATA CABLES ONLY (ORANGE JACKS)
TYPE B - FOR TERMINATON OF VOICE CABLES ONLY (ORANGE JACKS)
TYPE C - FOR TERMINATION OF SECURITY CABLES ONLY (PURPLE JACKS)

COLOR CODE TELECOMMUNICATION OUTLETS AND CABLING AS FOLLOWS:

DATA - BLUE CABLING (ORANGE JACKS)
WAP - BLUE CABLING (ORANGE JACKS)
SECURITY - PURPLE CABLING (PURPLE JACKS)
AUDIO/VISUAL - BLACK

NOTES:

1. DATA/VOICE: CATEGORY 6 UTP CABLE (JACKET COLOR AS INDICATED OR SPECIFIED ELSEWHERE)
2. HDMI CABLING: HIGH DEFINITION MULTIMEDIA CABLE (BLACK JACKET)

GENERAL NOTES:

1. WORK SHOWN IN LIGHT PEN (SHADED) IS EXISTING TO REMAIN EQUIPMENT / DEVICES. WORK SHOWN IN HEAVY PEN (BOLD) IS NEW WORK; HOWEVER, MAY BE NEW EQUIPMENT OR REINSTALLATION OF EXISTING DEVICES (AS NOTED).
2. FIRE ALARM SYSTEM SHALL BE CONNECTED AS SHOWN ON THE MANUFACTURER'S SUBMITTAL DRAWINGS, WITH NUMBER OF WIRES AND CONDUIT SIZED AS REQUIRED.
3. THE FIRE ALARM SYSTEM SHALL BE MONITORED BY A U.L. APPROVED CENTRAL MONITORING STATION. THE MONITORING STATION INFORMATION AND CORRESPONDING U.L. FILE NUMBER SHALL BE PROVIDED TO THE PROPER APPROVAL AGENCIES BY THE SUCCESSFUL FIRE ALARM MANUFACTURER / SUPPLIER.
4. ANY DUCT SMOKE DETECTOR FOR A HVAC UNIT THAT IS NOT DIRECTLY ACCESSIBLE SHALL BE PROVIDED WITH A REMOTE-MOUNTED TEST SWITCH THAT IS MOUNTED IN AN ACCESSIBLE LOCATION AND LABELED AS TO WHICH UNIT THEY MONITOR.
5. ALL FIRE ALARM INDICATING DEVICES ARE TO BE INSTALLED AT 80" AFF OR 6" BELOW CEILING, WHICHEVER IS LOWER.
6. MANUAL PULL STATIONS ARE TO BE INSTALLED NOT LESS THAN 42" AFF OR MORE THAN 48" AFF (TO OPERATING HANDLE).
7. ALL FIRE ALARM CABLING SHALL BE INSTALLED IN CONDUIT.
8. UNLESS OTHERWISE NOTED, SECURITY EQUIPMENT/DEVICES AND INTERCOM EQUIPMENT/DEVICES WILL BE PROVIDED AS PART OF A SEPARATE CONTRACT. CONTRACTOR SHALL PROVIDE AND INSTALL ALL ASSOCIATED CONDUIT, BACKBOXES, CABLING, CABLING TERMINATIONS, AND PATCH PANELS.
9. ALL ACCESS CONTROL, VIDEO SURVEILLANCE, AND INTERCOM SYSTEM CABLING SHALL BE INSTALLED IN CONDUIT.
10. REFER TO ACCESS CONTROL, VIDEO SURVEILLANCE, AND INTERCOM SYSTEM RISER DIAGRAMS ON SHEETS EY602 THROUGH EY609 FOR ADDITIONAL REQUIREMENTS.
11. COORDINATE WITH DOOR HARDWARE INSTALLER FOR ALL REQUIRED ACCESS CONTROL SYSTEM CONNECTIONS AND ROUGH-IN REQUIREMENTS.

SHEET KEYNOTES

1. SINGLE DOOR WITH ELECTRIC STRIKE. PROVIDE CONDUIT/WIRING BACK TO POWER SUPPLY AND ACCESS CONTROL PANEL. REFER TO DETAIL 1, SHEET EY501.
2. DOUBLE DOOR WITH ELECTRIFIED EXIT DEVICE AND HANDICAP OPERATOR. PROVIDE CONDUIT/WIRING BACK TO POWER SUPPLY AND ACCESS CONTROL PANEL. REFER TO DETAIL 4, SHEET EY503.
3. DOUBLE DOOR WITH ELECTRIFIED EXIT DEVICE. PROVIDE CONDUIT/WIRING BACK TO POWER SUPPLY AND ACCESS CONTROL PANEL. REFER TO DETAIL 3, SHEET EY501.
4. ACCESS CONTROL PANEL AND POWER SUPPLY. REFER TO ACCESS CONTROL SYSTEM RISER DIAGRAM ON SHEET EY601 FOR ADDITIONAL INFORMATION.
5. PROVIDE CAT 6, 1"C FROM ACCESS CONTROL PANEL TO TELECOMMUNICATIONS EQUIPMENT RACK, IDF 287.
6. PROVIDE AND INSTALL DUCT SMOKE DETECTOR INSTALLED IN RETURN AIR DUCT OF INDICATED HVAC UNIT. COORDINATE LOCATION WITH MECHANICAL CONTRACTOR.
7. ADDRESSABLE FIRE ALARM CONTROL RELAY MODULE FOR DUCT SMOKE DETECTOR. PROVIDE FIRE ALARM SIGNALING LINE CIRCUIT (SLC WIRING) TO THE FIRE ALARM CONTROL PANEL. PROVIDE CONDUIT/WIRING TO HVAC UNIT CONTROLS FOR UNIT SHUTDOWN UPON ACTIVATION OF ASSOCIATED DUCT SMOKE DETECTOR.
8. PROVIDE AND INSTALL REMOTE TEST STATION FOR DUCT SMOKE DETECTOR. PROVIDE CONDUIT/WIRING AS REQUIRED.
9. ADDRESSABLE FIRE ALARM CONTROL RELAY MODULE FOR HVLS FAN. PROVIDE FIRE ALARM SIGNALING LINE CIRCUIT (SLC WIRING) TO THE FIRE ALARM CONTROL PANEL. PROVIDE CONDUIT/WIRING TO HVLS FAN (FIRE ALARM INPUT) FOR UNIT SHUTDOWN UPON WATER FLOW SIGNAL FROM SPRINKLER FLOW SWITCH (SERVING THE AREA WHERE THE HVLS ARE LOCATED).
10. PROVIDE AND INSTALL A NEW SEMI-RECESSED FIRE ALARM REMOTE ANNUNCIATOR PANEL. PROVIDE CONDUIT/WIRING AND CONNECTION TO THE EXISTING FIRE ALARM CONTROL PANEL (REFER TO LOCATION ON SHEET EY404).
11. PROVIDE AND INSTALL A NEW FIRE ALARM NAC BOOSTER POWER SUPPLY.
12. OWNER FURNISHED/OWNER INSTALLED CEILING-MOUNTED CAMERA (REFER TO DETAIL 4, SHEET EY502). CONTRACTOR SHALL PROVIDE CAT 6 CABLE, 1"C BACK TO A DEDICATED SECURITY PATCH PANEL IN TELECOMMUNICATIONS EQUIPMENT RACK (IDF 287).
13. OWNER FURNISHED/OWNER INSTALLED SOFFIT-MOUNTED CAMERA (SIMILAR TO DETAIL 4, SHEET EY502). CONTRACTOR SHALL PROVIDE CAT 6 CABLE, 1"C BACK TO A DEDICATED SECURITY PATCH PANEL IN TELECOMMUNICATIONS EQUIPMENT RACK (IDF 287).
14. INTERCOM/VIDEO STATION. MOUNT AT 46" AFF TO CENTERLINE. PROVIDE CAT 6 CABLING, 1"C TO NEAREST TELECOMMUNICATIONS ROOM.
15. IP INTERCOM/VIDEO MASTER STATION - DESK MOUNTED. PROVIDE CAT 6, 1"C TO NEAREST TELECOMMUNICATIONS ROOM.
16. REFER TO SITE PLANS (SHEETS ES102 AND ES401) FOR CONDUITS ASSOCIATED WITH SITE LIGHTING, ACCESS CONTROL, INTERCOM, VIDEO SURVEILLANCE, AND GATE BRANCH POWER ENTERING THE BUILDING VIA THE INDICATED COLUMN. PATCH, REPAIR, AND PAINT AS REQUIRED (COORDINATE WITH GENERAL CONTRACTOR).
17. EXTEND CONDUIT OVERHEAD TO DESIGNATED EQUIPMENT (PANELBOARDS, EQUIPMENT RACKS AND ACCESS CONTROL PANELS) AS NOTED.
18. PROVIDE CONDUIT/WIRING BETWEEN INTERCOM STATION (SECURITY RELAY) AND ASSOCIATED ACCESS CONTROL PANEL FOR REMOTE CONTROL OF DOOR.
19. HANDICAP DOOR ACTUATOR.
20. PROVIDE 120V POWER TO POWER SUPPLY FOR ELECTRIFIED DOOR HARDWARE AND HANDICAP DOOR OPERATORS.

7	ADDRESSABLE FIRE ALARM CONTROL RELAY MODULE FOR DUCT SMOKE DETECTOR. PROVIDE FIRE ALARM SIGNALING LINE CIRCUIT (SLC WIRING) TO THE FIRE ALARM CONTROL PANEL. PROVIDE CONDUIT/WIRING TO HVAC UNIT CONTROLS FOR UNIT SHUTDOWN UPON ACTIVATION OF ASSOCIATED DUCT SMOKE DETECTOR.
8	PROVIDE AND INSTALL REMOTE TEST STATION FOR DUCT SMOKE DETECTOR. PROVIDE CONDUIT/WIRING AS REQUIRED.
9	EXISTING FIRE ALARM NAC POWER EXTENDER.
10	OWNER FURNISHED/OWNER INSTALLED CEILING-MOUNTED CAMERA (REFER TO DETAIL 4, SHEET EY502). CONTRACTOR SHALL PROVIDE CAT 6 CABLE, 1"C BACK TO A DEDICATED SECURITY PATCH PANEL IN TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER/SERVER 261).
11	OWNER FURNISHED/OWNER INSTALLED WALL-MOUNTED EXTERIOR CAMERA (REFER TO DETAIL 5, SHEET EY502). CONTRACTOR SHALL PROVIDE CAT 6 CABLE, 1"C BACK TO A DEDICATED SECURITY PATCH PANEL IN TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER/SERVER 261).
12	NEW LOCATION OF EXISTING FIRE ALARM AUDIO/VISUAL DEVICE. PROVIDE CONDUIT/WIRING AS REQUIRED FOR NEW LOCATION.
13	INTERCOM/VIDEO STATION. MOUNT AT 46" AFF TO CENTERLINE. PROVIDE CAT 6 CABLING, 1"C TO NEAREST TELECOMMUNICATIONS ROOM.
14	IP INTERCOM/VIDEO MASTER STATION - DESK MOUNTED. PROVIDE CAT 6, 1"C TO NEAREST TELECOMMUNICATIONS ROOM.
15	PROVIDE CONDUIT/WIRING BETWEEN INTERCOM STATION (SECURITY RELAY) AND ASSOCIATED ACCESS CONTROL PANEL FOR REMOTE CONTROL OF DOOR.
16	PROVIDE CAT 6, 1"C FROM ACCESS CONTROL PANEL TO TELECOMMUNICATIONS EQUIPMENT RACK IN COMPUTER / SERVER 261.
17	OWNER FURNISHED/OWNER INSTALLED CORNER-MOUNTED EXTERIOR CAMERA (REFER TO DETAIL 6, SHEET EY502). CONTRACTOR SHALL PROVIDE CAT 6 CABLE, 1"C BACK TO A DEDICATED SECURITY PATCH PANEL IN TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER/SERVER 261).

GENERAL NOTES:

1	WORK SHOWN IN LIGHT PEN (SHADED) IS EXISTING TO REMAIN EQUIPMENT / DEVICES. WORK SHOWN IN HEAVY PEN (BOLD) IS NEW WORK; HOWEVER, MAY BE NEW EQUIPMENT OR REINSTALLATION OF EXISTING DEVICES (AS NOTED).
2	FIRE ALARM SYSTEM SHALL BE CONNECTED AS SHOWN ON THE MANUFACTURER'S SUBMITTAL DRAWINGS, WITH NUMBER OF WIRES AND CONDUIT SIZED AS REQUIRED.
3	THE FIRE ALARM SYSTEM SHALL BE MONITORED BY A U.L. APPROVED CENTRAL MONITORING STATION. THE MONITORING STATION INFORMATION AND CORRESPONDING U.L. FILE NUMBER SHALL BE PROVIDED TO THE PROPER APPROVAL AGENCIES BY THE SUCCESSFUL FIRE ALARM MANUFACTURER / SUPPLIER.
4	ANY DUCT SMOKE DETECTOR FOR A HVAC UNIT THAT IS NOT DIRECTLY ACCESSIBLE SHALL BE PROVIDED WITH A REMOTE-MOUNTED TEST SWITCH THAT IS MOUNTED IN AN ACCESSIBLE LOCATION AND LABELED AS TO WHICH UNIT THEY MONITOR.
5	ALL FIRE ALARM INDICATING DEVICES ARE TO BE INSTALLED AT 80" AFF OR 6" BELOW CEILING, WHICHEVER IS LOWER.
6	MANUAL PULL STATIONS ARE TO BE INSTALLED NOT LESS THAN 42" AFF OR MORE THAN 48" AFF (TO OPERATING HANDLE).
7	ALL FIRE ALARM CABLING SHALL BE INSTALLED IN CONDUIT.
8	UNLESS OTHERWISE NOTED, SECURITY EQUIPMENT/DEVICES AND INTERCOM EQUIPMENT/DEVICES WILL BE PROVIDED AS PART OF A SEPARATE CONTRACT. CONTRACTOR SHALL PROVIDE AND INSTALL ALL ASSOCIATED CONDUIT, BACKBOXES, CABLING, CABLING TERMINATIONS, AND PATCH PANELS.
9	ALL ACCESS CONTROL, VIDEO SURVEILLANCE, AND INTERCOM SYSTEM CABLING SHALL BE INSTALLED IN CONDUIT.
10	REFER TO ACCESS CONTROL, VIDEO SURVEILLANCE, AND INTERCOM SYSTEM RISER DIAGRAMS ON SHEETS EY602 THROUGH EY609 FOR ADDITIONAL REQUIREMENTS.
11	COORDINATE WITH DOOR HARDWARE INSTALLER FOR ALL REQUIRED ACCESS CONTROL SYSTEM CONNECTIONS AND ROUGH-IN REQUIREMENTS.

SHEET KEYNOTES

1	SINGLE DOOR WITH ELECTRIC STRIKE. PROVIDE CONDUIT/WIRING BACK TO POWER SUPPLY AND ACCESS CONTROL PANEL. REFER TO DETAIL 1, SHEET EY501.
2	SINGLE DOOR WITH MONITORING ONLY. PROVIDE CONDUIT/WIRING BACK TO ACCESS CONTROL PANEL. REFER TO DETAIL 2, SHEET EY501.
3	CARD READER SHALL CONTROL ADJACENT DOORS (D34D AND M45B).
4	NEW LOCATION OF EXISTING FIRE ALARM AUDIO/VISUAL DEVICE. PROVIDE CONDUIT/WIRING AS REQUIRED FOR NEW LOCATION.
5	NEW FIRE ALARM VISUAL ONLY DEVICE TO REPLACE EXISTING AUDIO/VISUAL DEVICE.
6	PROVIDE AND INSTALL A NEW FIRE ALARM NAC BOOSTER POWER SUPPLY.
7	OWNER FURNISHED/OWNER INSTALLED CEILING-MOUNTED CAMERA (REFER TO DETAIL 4, SHEET EY502). CONTRACTOR SHALL PROVIDE CAT 6 CABLE, 1"C BACK TO A DEDICATED SECURITY PATCH PANEL IN TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER/SERVER 261).
8	OWNER FURNISHED/OWNER INSTALLED WALL-MOUNTED CAMERA (REFER TO DETAIL 5, SHEET EY502). CONTRACTOR SHALL PROVIDE CAT 6 CABLE, 1"C BACK TO A DEDICATED SECURITY PATCH PANEL IN TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER/SERVER 261).
9	OWNER FURNISHED/OWNER INSTALLED PENDANT-MOUNTED CAMERA (REFER TO DETAIL 3, SHEET EY502). CONTRACTOR SHALL PROVIDE CAT 6 CABLE, 1"C BACK TO A DEDICATED SECURITY PATCH PANEL IN TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER/SERVER 261).
10	OWNER FURNISHED/OWNER INSTALLED WALL-MOUNTED EXTERIOR CAMERA (REFER TO DETAIL 5, SHEET EY502). CONTRACTOR SHALL PROVIDE CAT 6 CABLE, 1"C BACK TO A DEDICATED SECURITY PATCH PANEL IN TELECOMMUNICATIONS EQUIPMENT RACK (COMPUTER/SERVER 261).
11	IP INTERCOM/VIDEO MASTER STATION - DESK MOUNTED. PROVIDE CAT 6, 1"C TO NEAREST TELECOMMUNICATIONS ROOM.

SHEET KEYNOTES

1	SINGLE DOOR WITH ELECTRIC STRIKE. PROVIDE CONDUIT/WIRING BACK TO POWER SUPPLY AND ACCESS CONTROL PANEL. REFER TO DETAIL 1, SHEET EY501.
2	SINGLE DOOR WITH WITH LOCAL ALARM (INCLUDES CARD READER BOTH SIDES). PROVIDE CONDUIT/WIRING BACK TO POWER SUPPLY AND ACCESS CONTROL PANEL. REFER TO DETAIL 4, SHEET EY501.
3	DOUBLE DOOR WITH MONITORING ONLY. PROVIDE CONDUIT/WIRING BACK TO ACCESS CONTROL PANEL. REFER TO DETAIL 5, SHEET EY501.
4	PROVIDE BALANCED MAGNETIC SWITCH FOR ROOF HATCH. PROVIDE CONDUIT/WIRING BACK TO ACCESS CONTROL PANEL.
5	EXISTING FIRE ALARM CONTROL PANEL (EDWARDS EST) AND ASSOCIATED FIRE ALARM COMMUNICATOR (HONEYWELL HW-AV-LTE-M). PROVIDE EXPANSION MODULES, ETC. AS REQUIRED FOR NEW DEVICES. REPROGRAM AND RECERTIFY THE FIRE ALARM CONTROL PANEL.
6	PROVIDE AND INSTALL REMOTE TEST STATION FOR DUCT SMOKE DETECTOR. PROVIDE CONDUIT/WIRING AS REQUIRED.
7	NEW LOCATION OF EXISTING FIRE ALARM AUDIO/VISUAL DEVICE. PROVIDE CONDUIT/WIRING AS REQUIRED FOR NEW LOCATION.
8	ADDRESSABLE FIRE ALARM CONTROL RELAY MODULE FOR HVLS FAN. PROVIDE FIRE ALARM SIGNALING LINE CIRCUIT (SLC WIRING) TO THE FIRE ALARM CONTROL PANEL. PROVIDE CONDUIT/WIRING TO HVLS FAN (FIRE ALARM INPUT) FOR UNIT SHUTDOWN UPON WATER FLOW SIGNAL FROM SPRINKLER FLOW SWITCH (SERVING THE AREA WHERE THE HVLS ARE LOCATED).
9	OWNER FURNISHED/OWNER INSTALLED WALL-MOUNTED CAMERA (REFER TO DETAIL 5, SHEET EY502). CONTRACTOR SHALL PROVIDE CAT 6 CABLE, 1"C BACK TO A DEDICATED SECURITY PATCH PANEL IN TELECOMMUNICATIONS EQUIPMENT RACK (IDF 287).
10	OWNER FURNISHED/OWNER INSTALLED PENDANT-MOUNTED CAMERA (REFER TO DETAIL 3, SHEET EY502). CONTRACTOR SHALL PROVIDE CAT 6 CABLE, 1"C BACK TO A DEDICATED SECURITY PATCH PANEL IN TELECOMMUNICATIONS EQUIPMENT RACK (IDF 287).
11	OWNER FURNISHED/OWNER INSTALLED WALL-MOUNTED EXTERIOR CAMERA (REFER TO DETAIL 5, SHEET EY502). CONTRACTOR SHALL PROVIDE CAT 6 CABLE, 1"C BACK TO A DEDICATED SECURITY PATCH PANEL IN TELECOMMUNICATIONS EQUIPMENT RACK (IDF 287).
12	REFER TO SITE PLANS (SHEETS ES102 AND ES401) FOR CONDUITS ASSOCIATED WITH SITE LIGHTING, ACCESS CONTROL, INTERCOM, VIDEO SURVEILLANCE, AND GATE BRANCH POWER ENTERING THE BUILDING WITHIN THIS AREA. LB CONDUIT INTO BUILDING. PATCH/SEAL CONDUIT PENETRATIONS ON EXTERIOR WALL.
13	EXTEND CONDUIT OVERHEAD TO DESIGNATED EQUIPMENT (PANELBOARDS, EQUIPMENT RACKS AND ACCESS CONTROL PANELS) AS NOTED.
14	PROVIDE NEMA 1 SURVEILLANCE CABINET WITH MEDIA CONVERTER SWITCH, POE INJECTOR, AND 12VDC POWER SUPPL.Y.
15	PROVIDE 4-STRAND SINGLEMODE (OS2) OPTICAL FIBER IN 1"CONDUIT BACK TO A DEDICATED SECURITY PATCH PANEL IN TELECOMMUNICATIONS EQUIPMENT RACK (IDF 287).
16	PROVIDE 120V CONNECTION TO MEDIA CONVERTER SWITCH AND POWER SUPPLY IN SURVEILLANCE CABINET.

FIRE ALARM ADDRESS DESIGNATIONS

GENERAL NOTES:

1. REFER TO SPECIFICATION SECTION 283103 FIRE ALARM SYSTEM MODIFICATIONS FOR ADDITIONAL INFORMATION.
2. THE FIRE ALARM RISER DIAGRAM IS AN ATTEMPT TO PROVIDE INFORMATION WITH REGARD TO EXISTING FIRE ALARM SYSTEM. THE EXISTING WIRING CONFIGURATION IS NOT KNOWN; HOWEVER THIS RISER DIGRAM IS AN ATTEMPT TO SHOW HOW NEW DEVICES WILL NEED TO BE INCORPORATED INTO THE EXISTING FIRE ALARM SYSTEM.

   WORK SHOWN IN LIGH PEN (SHADED) IS EXISTING TO REMAIN EQUIPMENT/DEVICES. WORK SHOWN IN HEAVY PEN (BOLD) IS NEW WORK.
3. ACTUAL WIRING CONFIGURATION AND TYPE/SIZE OF CONDUCTORS SHALL BE AS RECOMMENDED BY THE FIRE ALARM MANUFACTURER WITH MINIMUM REQUIREMENTS STATED WITHIN THE SPECIFICATIONS.
4. PROVIDE ALL NECESSARY PROGRAMMING, MODULES, ACCESSORIES, ETC., AS REQUIRED TO ACHIEVE CORRECT OPTION OF THE FIRE ALARM SYSTEM. PROVIDE RECERTIFICATION OF SYSTEM AS REQUIRED.
5. PROVIDE SURGE SUPPRESSION FOR ALL EXTERIOR CIRCUITS.
6. CANDELA RATINGS OF ALL VISUAL NOTIFICATION APPLIANCES SHALL BE AS DETERMINED BY THE FIRE ALARM MANUFACTURER/SUPPLIER WITH MINIMUM REQUIRMENTS STATED WITHIN THE SPECIFICATIONS.

SHEET KEYNOTES:

1. PROVIDE AND INSTALL A NEW REMOTE ANNUNCIATOR PANEL. PROVIDE CONNECTION TO EXISTING FIRE ALARM CONTROL PANEL.
2. THE EXISTING REMOTE ANNUNCIATOR PANEL WILL NEED TO BE RELOCATED AS A RESULT OF THIS PROJECT.
3. PROVIDE A NEW NAC BOOSTER POWER SUPPLY .
4. EXISTING FIRE ALARM AUDIO/VISUAL DEVICE WILL NEED TO BE RELOCATED AS A RESULT OF THIS PROJECT.
5. EXISTING FIRE ALARM AUDIO/VISUAL DEVICE TO BE REPLACED WITH A NEW VISUAL ONLY DEVICE AT SAME LOCATION.

DATE: AUGUST 15, 2025
SCALE: NOT TO SCALE
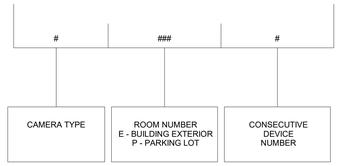
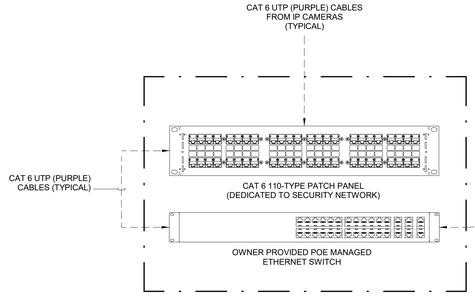
SHEET NO. EY604 01



VIDEO SURVEILLANCE SYSTEM ADDRESS DESIGNATONS



GENERAL NOTES:

1. ETHERNET SWITCH AND CAMERAS SHALL BE PROVIDED AND INSTALLED BY THE OWNER VIA A SEPARATE CONTRACT. CONTRACTOR SHALL PROVIDE AND INSTALL ALL ASSOCIATED CONDUIT, BACKBOXES, CABLING, CABLING TERMINATIONS AND PATCH PANELS.
2. ACTUAL WIRING CONFIGURATION AND TYPE/SIZE OF CABLING SHALL BE AS RECOMMENDED BY THE VASS MANUFACTURER/ SUPPLIER WITHIN MINIMUM REQUIREMENTS STATED IN SPECIFICATIONS. CONTRACTOR SHALL COORDINATE WITH THE VASS MANUFACTURER/SUPPLIER FOR REQUIREMENTS.
3. VASS MANUFACTURER/SUPPLIER SHALL INTEGRAGE THE NEW VASS CAMERAS INTO THE OWNER'S EXISTING SECURITY NETWORK AS REQUIRED FOR MONITORING, CONTROLLING, PROGRAMMING, AND SERVICE.
4. CATEGORY 6, UNSHIELDED TWISTED PAIR (UTP) WITH OVERALL PURPLE JACKET. TERMINATE ALL ENDS WITH A RJ45 MODULAR PLUG USING THE TIA/EIA 568B COLOR CODING STANDARD.
5. PROVIDE SURGE SUPPRESION FOR ALL EXTERIOR CABLING.
6. TERMINATE SECURITY HORIZONTAL CABLING AT A DEDICATED SECURITY NETWORK PATCH PANEL. REFER TO TELECOMMUNICATIONS RISER DIAGRAM - COMPUTER ROOM 261 - NEW WORK, SHEET ET602.

BUILDING PLANNING

OCCUPANCY: S-1
MIXED OCCUPANCY NO
REQUIRED FIRE SEPARATION: NO

TYPE OF CONSTRUCTION

CONSTRUCTION TYPE: 2B; EXISTING

ESSENTIAL FACILITY (CHAPTER 16, IBC)

ESSENTIAL FACILITY NO (TABLE 1604.5 RISK CATEGORY 1)

GENERAL BUILDING LIMITATIONS

- HEIGHT OF BUILDING: ALLOWED 55FT > ACTUAL 16'-0"FT (TABLE 503 2015 IBC)
- NUMBER OF STORIES: 1 STORY ACTUAL (2 STORY PER TABLE 503 2015 IBC)
- MAXIMUM SINGLE FLOOR AREA: 17,500SQFT. (PER TABLE 503 2015 IBC)
- TOTAL AREA OF BUILDING: 10,690 SQFT / 6,510 SQFT
- PENTHOUSE AND ROOF STRUCTURE: NONE
- HIGH RISE: NO
- PARKING SPACES PROVIDED: N/A
- PARKING SPACES REQUIRED: N/A
- ACCESSIBLE PARKING SPACES PROVIDED: N/A

FIRE PROTECTION SYSTEMS

- FIRE EXTINGUISHING SYSTEM: NO
- STANDPIPE SYSTEM: NO TYPE
- SMOKE CONTROL: NO CLASS

FIRE-RESISTANCE RATING REQUIREMENTS FOR BUILDING ELEMENTS (HOURS)

BUILDING ELEMENT	REQ'D RATING / HR	UL/FM # WHERE APPLICABLE

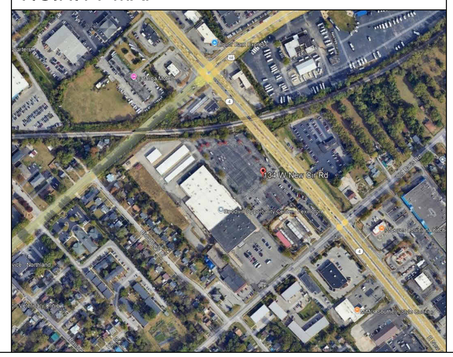
VICINITY MAP



BUILDING CODE REVIEW - 2018 KBC

CHAPTER 3: USE AND OCCUPANCY CLASSIFICATION:

1. MODERATE-HAZARD STORAGE, GROUP S-1 (SECTION 311.2)

CHAPTER 4: SPECIAL DETAILED REQUIREMENTS BASED ON USE AND OCCUPANCY:

1. MOTOR-VEHICLE-RELATED OCCUPANCIES (SECTION 406.8)

CHAPTER 5: GENERAL BUILDING HEIGHTS AND AREAS:

1. ASSEMBLY GROUP S-1 (TYPE 2B CONSTRUCTION) HEIGHT 3 STORIES (75' H) @ 52,500 SQFT PER STORY. (SECTION 503, 504, 506)
2. BUILDING AREA MODIFICATIONS: (SECTION 506.3)
   A. If = [500/(500 - 0.25) 30/30 = 0.75 AND
      If = [486/486 - 0.25]30/30 = 0.75
      Aa = 17,500sqft + [17,500sqft x 0.75] = 30,625 sqft > 10,690 sqft AND 6,590 sqft (AREA IS UNDER ALLOWED. SEE UNLIMITED AREA BUILDINGS BELOW)
3. UNLIMITED AREA BUILDINGS: (SECTION 507.5 GROUP S-1 BUILDINGS OF TYPE 2 CONSTRUCTION)
   A. BUILDING AREA NOT LIMITED WHERE EQUIPPED THROUGHOUT WITH AUTOMATIC SPRINKLER SYSTEM AND IS SURROUNDED AND ADJOINED BY PUBLIC WAYS OR YARDS NOT LESS THAN 60 FEET IN WIDTH. SEE SITE PLAN FOR 60 FOOT MINIMUM WIDTH.
4. MIXED USE AND OCCUPANCY: (SECTION 508.3)
   A. N/A.
5. INCIDENTAL USES (SECTION 509)
   A. N/A
6. SPECIAL PROVISIONS (SECTION 510)
   A. N/A

CHAPTER 6: TYPES OF CONSTRUCTION:

1. CONSTRUCTION CLASSIFICATION:
   A. TYPE 2B
2. SEE FIRE-RESISTANCE RATING REQUIREMENTS FOR BUILDING ELEMENTS HOURS (TABLE 601)
   A. SEE TABLE THIS SHEET.
3. FIRE-RESISTANCE RATING REQUIREMENTS FOR EXTERIOR WALLS BASED ON FIRE SEPARATION DISTANCE
   A. FIRE SEPARATION DISTANCE = 10 < x <30
   B. TYPES OF CONSTRUCTION = 2B
   C. OCCUPANCY GROUP = S-1
   D. FIRE RATING REQUIRED = 0

CHAPTER 7: FIRE AND SMOKE PROTECTION FEATURES:

1. SHAFT ENCLOSURES:
   A. 1 HOUR WHERE CONNECTING FOUR STORIES OR LESS. (713.4)
   B. SHAFT ENCLOSURES SHALL BE CONSTRUCTED AS FIRE BARRIERS PER SECTION 707.

CHAPTER 8: INTERIOR FINISHES:

1. INTERIOR WALL AND FINISH MATERIAL (803.1.1)
   A. CLASS C: = FLAME SPREAD INDEX 76-200; SMOKE DEVELOPMENT INDEX 0-450
2. INTERIOR WALL AND FINISH REQUIREMENTS BY OCCUPANCY: (TABLE 803.11 SPRINKLERED)
   A. GROUP S = CLASS C

CHAPTER 9: FIRE PROTECTION SYSTEMS:

1. AUTOMATIC SPRINKLER SYSTEMS: (SECTION 903)
   A. GROUP S-1 (SECTION 903.2.9)
      a. THE FIRE AREA FOR EITHER STRUCTURE DOES NOT EXCEED 12,000 SQFT > 10,690 / 6,510 SQFT.
   B. PORTABLE FIRE EXTINGUISHERS (SECTION 906)
      a. PORTABLE FIRE EXTINGUISHERS SHALL BE INSTALLED IN GROUP S (SECTION 906.1)
      b. INSTALL FIRE EXTINGUISHERS PER NFPA 10.
      c. MIN. NUMBER OF EXTINGUISHERS = 10,690 / 3000 = 3.56 < ACTUAL 4
         MIN. NUMBER OF EXTINGUISHERS = 6,510 / 3000 = 2.17 < ACTUAL 3
      d. MAX. DISTANCE TO TRAVEL TO EXTINGUISHER = 75 FEET.
   C. FIRE ALARM DETECTION SYSTEMS (907.2)
      a. N/A - EXISTING

CHAPTER 10: MEANS OF EGRESS:

1. OCCUPANT LOAD (SECTION 1004)
   A. TABLE 1004.1.2 MAXIMUM FLOOR AREA ALLOWANCE PER OCCUPANT.
      a. STORAGE AREA 300 SQFT.
      b. 10,690 SQFT/300 SQFT = 35 OCCUPANTS TOTAL
         564 SQFT/300 SQFT = 1 OCCUPANT IN ENCLOSED CMU AREA
         6,510 SQFT/300 SQFT = 21 OCCUPANTS TOTAL
         389 SQFT/300 SQFT = 1 OCCUPANT IN ENCLOSED CMU AREA
2. COMMON PATH OF EGRESS TRAVEL (SECTION 1006.2.1)
   A. GROUP S: OCCUPANT LOAD LESS/GREATER THAN 30 WITHOUT SPRINKLER SYSTEM = 100 FEET / 75 FEET.
3. EXIT ACCESS TRAVEL DISTANCE (SECTION 1017.2)
   A. GROUP S-1 = 200 FEET MAXIMUM WITHOUT SPRINKLER SYSTEM.
4. CORRIDOR FIRE RESISTANCE RATING (1020.1)
   A. GROUP S WITH SPRINKLER SYSTEM REQUIRED RATED CORRIDOR = 1 HOURS.
   B. MINIMUM CORRIDOR WIDTH 36 INCHES (1020.2)

CHAPTER 12: INTERIOR ENVIRONMENT:

1. LIGHTING (SECTION 1205.2)
   A. THE MINIMUM NET GLAZED AREA SHALL BE NOT LESS THAN 8 PERCENT OF THE FLOOR AREA OF THE ROOM SERVED.
      a. N/A - EXISTING
2. TOILET AND BATHROOM REQUIREMENTS (SECTION 1210)
      a. N/A - EXISTING, ACCESSORY BUILDING
   A. THE NUMBER AND TYPE OF PLUMBING FIXTURES PROVIDED IN ANY OCCUPANCY SHALL COMPLY WITH CHAPTER 29.
      a. N/A - EXISTING, ACCESSORY BUILDING

CHAPTER 13: ENERGY EFFICIENCY

1. GENERAL (SECTION 1301)
   A. EXISTING BUILDING

CHAPTER 16: STRUCTURAL DESIGN:

1. RISK CATEGORY OF BUILDINGS AND OTHER STRUCTURES (TABLE 1604.5.1)
   A. RISK CATEGORY I.

JAMES K. PIPER — REGISTERED NO. 44471 — COMMONWEALTH OF KENTUCKY — 8/15/25

00.AB CODE CRITERIA FOR DESIGN

A. THESE STRUCTURAL DRAWINGS ARE TO BE USED IN CONJUNCTION WITH ALL OTHER DRAWINGS, SPECIFICATIONS & CONTRACT DOCUMENTS.

B. THE DESIGN, CONSTRUCTION, QUALITY CONTROL AND SAFETY OF ALL WORK PERFORMED ON THE PROJECT SHALL CONFORM TO THE REFERENCED CODES AND STANDARDS, INCLUDING ALL SPECIFICATIONS REFERENCED WITH THE LATEST EDITIONS SHALL APPLY UNLESS NOTED.

C. BUILDING CODE: KENTUCKY BUILDING CODE - 2018, 4TH EDITION
INTERNATIONAL EXISTING BUILDING CODE – 2015

D. COUNTY/STATE: FAYETTE / KENTUCKY

E. RISK CATEGORY: I

F. DEAD LOADS

1. ROOFS = 2 PSF
2. COLLATERAL = 2 PSF
3. SOLAR PANEL = 5 PSF

G. DESIGN LIVE LOADS

1. ROOF = 20 PSF
2. ROOF LIVE LOAD = 25 PSF MIN

H. ROOF SNOW LOAD

a. GROUND SNOW LOAD (p_g) = 15 PSF
b. SNOW EXPOSURE FACTOR (C_e) = 0.9
c. THERMAL FACTOR (C_T) = 1.2
d. SLOPE FACTOR (C_S) = 1.0
e. IMPORTANCE FACTOR (I_S) = 0.8
f. RAIN ON SNOW SURCHARGE (P_R) = 5 PSF
g. FLAT ROOF SNOW LOAD (p_f) = 9.07 PSF
h. SLOPED ROOF SNOW LOAD (p_s) = 9.07 PSF PLUS DRIFTS AS APPLICABLE
i. MINIMUM ROOF SNOW LOAD (p_m) = 12 psf

I. LATERAL LOADS

1. WIND

a. BASIC WIND SPEED: 90 MPH
b. EXPOSURE CATEGORY: B
c. WIND IMPORTANCE FACTOR: Iw = 1.0
d. NOTE: THE MAIN WIND FORCE RESISTING SYSTEM OF THESE STRUCTURES WERE NOT MODIFIED BY THIS RENOVATION, NOR WERE THE WIND AREAS OR LOADS ON IT INCREASED BY MORE THAN 5%. THEREFORE, WIND DESIGN WAS ONLY PERFORMED ON THE COMPONENTS THAT WERE MODIFIED AND THE OVERALL EXISTING MAIN WIND FORCE RESISITING SYSTEM WAS NOT ANALYZED.

2. SEISMIC

a. SEISMIC SITE CLASS: C
b. MAPPED SHORT PERIOD SPECTRAL RESPONSE ACCELERATION: Ss = 0.189
c. MAPPED 1 SECOND SPECTRAL RESPONSE ACCELERATION: S1 = 0.091
d. DESIGN SHORT PERIOD SPECTRAL RESPONSE ACCELERATION: Sds = 0.151
e. DESIGN 1 SECOND PERIOD SPECTRAL RESPONSE ACCELERATION: Sd1 = 0.103
f. SEISMIC DESIGN CATEGORY: B
g. SEISMIC IMPORTANCE FACTOR: Ie = 1.0
h. BASIC STRUCTURAL SYSTEM: BUILDING FRAME SYSTEM
i. NOTE: THE MAIN SEISMIC FORCE RESISTING SYSTEM OF THESE STRUCTURES WERE NOT MODIFIED BY THIS RENOVATION, NOR WERE THE SEISMIC LOADS ON IT INCREASED BY MORE THAN 5%. THEREFORE, SEISMIC DESIGN WAS ONLY PERFORMED ON THE COMPONENTS THAT WERE MODIFIED AND THE OVERALL EXISTING MAIN SEISMIC FORCE RESISITING SYSTEM WAS NOT ANALYZED.

J. INFORMATION OF EXISTING CONSTRUCTION, INCLUDING CONSTRUCTION COMPOSITION AND DIMENSIONS, WAS TAKEN FROM OWNER FURNISHED DRAWINGS OF PAST CONSTRUCTION AND SHALL BE FIELD VERIFIED. DEVIATIONS FROM THOSE SHOWN SHALL BE FURNISHED TO THE ARCHITECT AND ENGINEER.

K. ALL CONTRACTOR PROPOSED STRUCTURAL SUBSTITUTIONS, INCLUDING CONCRETE ADDITIVES, SHALL BE SUBMITTED TO THE ENGINEER FOR REVIEW AND APPROVAL PRIOR TO ANY PERTINENT WORK AND PRIOR TO THE AWARD OF A SUBCONTRACTOR.

L. CONSTRUCTION METHODS, PROCEDURES, AND SEQUENCES ARE THE RESPONSIBILITY OF THE CONTRACTOR. THE CONTRACTOR SHALL TAKE ALL NECESSARY MEANS TO MAINTAIN AND PROTECT THE STRUCTURAL INTEGRITY OF ALL CONSTRUCTION AT ALL STAGES.

M. COORDINATION WITH THE ARCHITECTURAL, MECHANICAL, PLUMBING AND ELECTRICAL DRAWINGS TO VERIFY THE LOCATIONS AND SIZES OF ALL CHASES, INSERTS, OPENINGS, SLEEVES, FINISHES, DEPRESSIONS, AND OTHER PROJECT REQUIREMENTS ARE THE CONTRACTOR'S RESPONSIBILITY. ALL REQUIRED OPENINGS, SLEEVES, OR OTHER COMPONENTS MAY NOT BE SHOWN ON THE STRUCTURAL DRAWINGS.

N. IMPOSED CONSTRUCTION LOADS, INCLUDING CRANE LOADS, IN EXCESS OF THE STATED DESIGN LOADS MUST BE SUBMITTED TO THE ENGINEER FOR REVIEW PRIOR TO THE IMPOSITION OF SUCH LOADS.

O. IMPLEMENTING JOB SITE SAFETY AND CONSTRUCTION PROCEDURES ARE THE SOLE RESPONSIBILITY OF THE CONTRACTOR.

P. IN CASE OF CONFLICT BETWEEN THE GENERAL NOTES, DETAILS AND SPECIFICATIONS, THE MOST RIGID REQUIREMENTS SHALL GOVERN.

00.31.32 GENERAL FOUNDATION INFORMATION

A. ASSUMED BEARING CAPACITIES:
a. 2000 PSF FOR UNDISTURBED NATIVE SOIL
b. 3000 PSF FOR ENGINEERED FILL
c. 6000 PSF FOR COMPETENT BEDROCK

B. EXISTING FOUNDATION SIZES, ELEVATIONS, LOCATIONS, ETC., SHOWN ARE FROM ORIGINAL DRAWINGS FURNISHED BY THE OWNER AND MAY NOT BE THE ACTUAL CONDITIONS ENCOUNTERED.

C. IF REQUIRED, UNDERPINNING OF EXISTING FOOTINGS SHALL BE PERFORMED IN SUCH A MANNER SO AS TO MAINTAIN THE STRUCTURAL INTEGRITY OF THE EXISTING BUILDING. CONTRACTOR SHALL INCLUDE ANY ASSOCIATED COSTS OF UNDERPINNING IN HIS BID.

D. VERIFY LOCATIONS OF COLUMNS, UNDERGROUND UTILITIES, ETC., WITH ARCHITECTURAL, MECHANICAL, ELECTRICAL, AND CIVIL DRAWINGS PRIOR TO PLACEMENT OF FOUNDATIONS. APPROPRIATE MEASURES SHALL BE TAKEN TO AVOID DAMAGE TO EXISTING UTILITIES AND TO ENSURE ADEQUATE FOUNDATION BEARING AROUND UTILITIES.

E. ALL FOUNDATION AND SLAB-ON-GRADE SUB GRADES ARE TO BE FIELD INSPECTED BY AN EXPERIENCED QUALIFIED GEOTECHNICAL ENGINEER TO VERIFY THAT THE ALLOWABLE BEARING PRESSURE IS ACHIEVED AND THAT THE SUB GRADES ARE SUITABLE FOR SUPPORT OF THE FOUNDATIONS AND SLAB-ON-GRADE. THE GEOTECHNICAL ENGINEER SHALL ALSO VERIFY FOUNDATION ELEVATIONS PRIOR TO PLACEMENT OF FOUNDATION ELEMENTS.

F. UNLESS DETERMINED OTHERWISE BY GEOTECHNICAL EVALUATION, FILL MATERIAL FOR SLAB AND FOOTING AREAS SHALL BE PLACED IN LAYERS NOT EXCEEDING 8 INCHES (UNCOMPACTED THICKNESS) AND COMPACTED TO 98% OF MAXIMUM DRY DENSITY AS DETERMINED BY ASTM D698.

G. THE CONTRACTOR SHALL TAKE ALL NECESSARY PRECAUTIONS TO BRACE FOUNDATION WALLS WHEN BACK FILLING AND WHEN THERE IS A POSSIBILITY OF DAMAGE BY EXCESS WATER.

H. COMPACTION OF BACKFILL WITHIN 2 FEET OF FOUNDATION WALLS SHALL BE ACCOMPLISHED WITH HAND EQUIPMENT. WHERE FILL IS REQUIRED ON BOTH SIDES OF FOUNDATION WALL, BRING THE FILL UP EACH SIDE SIMULTANEOUSLY AND UNIFORMLY.

I. THE SURFACE AREA ADJACENT TO THE FOUNDATION WALL SHALL BE PROVIDED WITH ADEQUATE DRAINAGE AND SHALL BE GRADED SO AS TO DRAIN SURFACE WATER AWAY FROM FOUNDATION WALLS.

J. WHEN USING GEOFOAM FOR STRUCTURAL BACKFILL, CONTRACTOR SHALL PROVIDE A DETAILED LAYOUT OF BLOCKS SEALED BY AN ENGINEER IN THE STATE OF KENTUCKY

K. IF FOOTING EXCAVATIONS ENCOUNTER ISOLATED AREAS OF RELATIVELY HARD ROCK AT OR ABOVE THE PLANNED FOOTING ELEVATIONS, THE ROCK SHALL BE OVER EXCAVATED TO A DEPTH OF APPROXIMATELY ONE FOOT BELOW THE FOUNDATION BEARING ELEVATION AND BACKFILLED WITH STRUCTURAL FILL.

L. FOUNDATIONS SHALL NOT BE PLACED ON MUD OR MUCK, SOFT OR LOOSE SOIL, IN STANDING WATER OR ON FROZEN GROUND.

M. ALL NON-CANTILEVER WALLS SHALL BE BE ADEQUATELY BRACED PRIOR TO BACKFILL.

N. CANTILEVER RETAINING WALLS SHALL NOT BE BACKFILLED UNTIL THE CONCRETE HAS DEVELOPED 100% OF THE REQUIRED 28-DAY COMPRESSIVE STRENGTH FOR THE CLASS OF CONCRETE SPECIFIED.

01.41.AB SPECIAL INSPECTIONS

A. SPECIAL INSPECTION IS REQUIRED ACCORDING TO CHAPTER 17 OF THE 2015 INTERNATIONAL BUILDING CODE.

B. SPECIAL INSPECTIONS SHALL BE PERFORMED FOR THE FOLLOWING WORK AS REQUIRED IN THE 2015 INTERNATIONAL BUILDING CODE:

1. STEEL CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.02
2. CONCRETE CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.3
3. MASONRY CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.4
4. WOOD CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.5
5. SOILS CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.6
6. DRIVEN DEEP FOUNDATION CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.7
7. CAST-IN-PLACE DEEP FOUNDATION CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.8
8. HELICAL PILE FOUNDATION CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.9
9. FABRICATED ITEMS IN ACCORDANCE WITH SECTION 1705.10
10. THE TYPE AND EXTENT OF EACH TEST AND INSPECTION REQUIRED FOR EACH TYPE OF WORK SHALL BE AS INDICATED IN THE BUILDING CODE AND THE REFERENCES INCORPORATED THEREIN.

C. SPECIAL INSPECTION SERVICES SHALL BE CONTRACTED AND PAID FOR BY THE OWNER.

D. WORK REQUIRING SPECIAL INSPECTION SHALL BE INSPECTED BY THE SPECIAL INSPECTOR FOR CONFORMANCE WITH THE APPROVED DRAWINGS AND SPECIFICATIONS. INSPECTION REPORTS INDICATING THE RESULTS OF SPECIAL INSPECTIONS SHALL BE PROMPTLY SUBMITTED TO THE CONTRACTOR, THE ARCHITECT, AND THE STRUCTURAL ENGINEER.

E. ALL SPECIAL INSPECTIONS INDICATING NON-CONFORMING WORK SHALL BE REPORTED IMMEDIATELY TO THE CONTRACTOR, THE ARCHITECT AND THE STRUCTURAL ENGINEER. IMPENDING CONSTRUCTION WORK THAT WOULD IMPEDE ECONOMICAL CORRECTION OF NON-CONFORMING WORK SHALL NOT PROCEED WITHOUT WRITTEN APPROVAL.

F. A FINAL REPORT DOCUMENTING COMPLETION OF ALL REQUIRED SPECIAL INSPECTIONS AND CORRECTION OF ANY NON-CONFORMING WORK NOTED IN THE INSPECTIONS SHALL BE SUBMITTED BY THE SPECIAL INSPECTOR AT THE COMPLETION OF THE PROJECT.

G. THE SPECIAL INSPECTION AGENCY SHALL NOT BE ENGAGED BY THE CONTRACTOR FOR OTHER TESTING OR INSPECTION SERVICES ON THIS PROJECT.

H. SPECIAL INSPECTION SHALL BE PERFORMED BY A QUALIFIED INSPECTION AND TESTING AGENCY APPROVED BY THE BUILDING OFFICIAL, THE ARCHITECT, AND THE STRUCTURAL ENGINEER.

02.41 STRUCTURAL DEMOLITION

A. CONTRACTOR SHALL MAINTAIN THE STRUCTURAL INTEGRITY OF THE EXISTING BUILDING AND ITS STRUCTURAL ELEMENTS DURING THE DEMOLITION AND STRUCTURAL ELEMENT MODIFICATION PROCESS.

B. IDENTIFY LOAD BEARING WALLS THAT ARE TO RECEIVE NEW PENETRATIONS AND TEMPORARILY SHORE ADJACENT FLOOR OR ROOF FRAMING WHILE DEMOLITION AND STRUCTURAL ELEMENT MODIFICATION OPERATIONS ARE ONGOING.

C. SHORING SHALL SUPPORT ALL STRUCTURAL ELEMENTS SUPPORTED BY ELEMENTS BEING DEMOLISHED, AND SHALL EXTEND TO THE LOWEST AT GRADE WORKING SURFACE, UNLESS NOTED OTHERWISE ON THE CONSTRUCTION DRAWINGS.

D. SHORING LOADS ON THE AT GRADE WORKING SURFACE SHALL BE DISTRIBUTED SUCH THAT CONCENTRATED LOADS DO NOT CRACK, PUNCH THROUGH, OR CAUSE LOCALIZED SETTLEMENT CONDITIONS UNDER THAT WORKING SURFACE. LOADS CAUSING STRUCTURAL OR COSMETIC DAMAGE TO THE AT GRADE WORKING SURFACE DUE TO SHORING LOADS, MUST BE REPAIRED BY AN APPROVED REPAIRED METHOD.

04 STRUCTURAL MASONRY

A. ALL MATERIALS AND WORKMANSHIP SHALL COMPLY WITH THE REQUIREMENTS OF THE FOLLOWING CODES ANDSTANDARDS:

1. "BUILDING CODE REQUIREMENTS AND SPECIFICATION FOR MASONRY STRUCTURES", (ACI 530-11/ASCE 5-11/TMS 402-11) AND "SPECIFICATION FOR MASONRY STRUCTURES", (ACI 530. 1-11/ASCE 6-11/TMS 602-11).
2. LOAD BEARING CONCRETE MASONRY UNITS: ASTM C90, TYPE I, GRADE N (MIN. COMPRESSIVE STRENGTH ON NET AREA = 1900 PSI) NORMAL (MEDIUM-LIGHT) WEIGHT
3. NON-LOAD BEARING CONCRETE MASONRY UNITS: ASTM C129, TYPE II
4. IVANY OPEN END BLOCK: ASTM C901 (MIN. COMPRESSIVE STRENGTH ON NET AREA = 3000 psi)
5. MORTAR: ASTM C270, TYPE S ABOVE GRADE/BELOW GRADE
6. CONCRETE BUILDING BRICK: ASTM C55, GRADE N (MIN. COMPRESSIVE STRENGTH ON NET AREA = 3500 PSI
7. CMU GROUT: ASTM C476, (MIN. COMPRESSIVE STRENGTH AT 28 DAYS = 2000 PSI)
8. CMU PRISM STRENGTH: F'm = 1500 PSI PER ACI 530/ASCE 5/TMS 402 UNIT STRENGTH METHOD
9. HORIZONTAL JOINT REINFORCING: ASTM A951, HOT DIPPED GALVANIZED
10. PLAIN REINFORCING BARS: ASTM A615, GRADE 60
11. WELDABLE REINFORCING BARS: ASTM A706, GRADE 60

B. CONCRETE MASONRY WALLS SHOWN ON STRUCTURAL DRAWINGS SHALL BE CONSTRUCTED IN ACCORDANCE WITH ACI 530.1 "SPECIFICATIONS FOR MASONRY STRUCTURES".

C. INSTALLATION DRAWINGS SHALL BE SUBMITTED FOR APPROVAL BY THE STRUCTURAL ENGINEER. THE INSTALLATION DRAWINGS SHALL INDICATE:

1. THE MATERIALS USED, THEIR SPECIFICATIONS, AND THEIR DESIGN STRENGTHS.
2. ELEVATIONS OF ALL STRUCTURAL CONCRETE MASONRY WALLS SHOWING THE LAYOUT, INCLUDING OPENINGS AND JOINTS, REINFORCING, ACCESSORIES, BOND BEAMS, LINTELS AND EMBEDDED ITEMS.

D. PRODUCT DATA AND MATERIAL CERTIFICATIONS FOR MASONRY MATERIALS AND ACCESSORIES SHALL BE SUBMITTED FOR APPROVAL IN SHOP DRAWING FORMAT.

E. MORTAR CEMENT SHALL BE PORTLAND-LIME CEMENT. MASONRY CEMENT SHALL NOT BE USED.

F. THE TYPICAL DETAILS ON THE DRAWINGS CONTAIN ADDITIONAL GENERAL MASONRY NOTES AND DETAILS.

G. BEARING WALLS SHALL BE ANCHORED AT INTERSECTIONS BY GALVANIZED STEEL STRAPS 1 1/2" X 1/4" X 24" WITH 2" BEND AT 90 DEGREES EACH END. INSTALL STRAPS INTO GROUTED CORES OF C.M.U. AT 24" MAXIMUM VERTICAL SPACING. DO NOT INSTALL ANCHORS AT CONTROL JOINTS.

H. CORNERS OF LOAD BEARING CONCRETE MASONRY WALLS SHALL BE LAID IN RUNNING BOND.

I. PROVIDE SOLID GROUTED CONCRETE MASONRY AROUND BEARING ENDS OF ALL BEAMS AND JOISTS.

J. NO OPENINGS FOR TRADES SHALL OCCUR IN CONCRETE MASONRY WALLS WITHIN 16 INCHES OF BEAM BEARING CENTERLINES.

K. EMBEDDED ITEM LOCATIONS SHALL BE COORDINATED WITH THE APPROVED SHOP DRAWINGS OF THE TRADES.

L. PROVIDE GALVANIZED HORIZONTAL JOINT REINFORCING IN ALL WALLS AT 16" O.C. PROVIDE ONE-PIECE PREFABRICATED "T" AND "L" SHAPED UNITS AT ALL WALL CORNERS AND INTERSECTIONS.

M. ONLY WELDABLE REINFORCING BARS MAY BE WELDED.

N. CONCRETE MASONRY IS SUPPOSED TO ABSORB WATER FROM MORTAR AND GROUT. DO NOT PLACE OR GROUT WET CONCRETE MASONRY UNITS.

O. WEBS OF MASONRY UNITS FOR PIERS, COLUMNS, PILASTERS, AND THE STARTER COURSE SHALL BE MORTARED. WEBS OF MASONRY UNITS SHALL ALSO BE MORTARED WHERE REQUIRED TO CONFINE GROUT.

P. IN GROUTED AND/OR REINFORCED MASONRY WALLS, USE MASONRY UNITS WITH CORES THAT ALIGN VERTICALLY. PROVIDE CONTINUOUS UNOBSTRUCTED CELLS FOR REINFORCEMENT PLACEMENT AND GROUTING.

Q. SPACES TO BE FILLED WITH GROUT SHALL BE KEPT CLEAN AND FREE FROM PROTRUSIONS OF MASONRY OR MORTAR.

R. ALL CELLS OF BELOW-GRADE CONCRETE MASONRY UNITS SHALL BE GROUTED.

S. THE MAXIMUM GROUT POUR HEIGHT FOR EACH SPECIFIC TYPE AND SIZE OF CONCRETE MASONRY UNIT SHALL NOT EXCEED THE LIMITS SPECIFIED IN ACI 530.1.

T. GROUT POURS SHALL BE CONSOLIDATED ADEQUATELY DURING PLACEMENT BY MECHANICAL VIBRATION IN ACCORDANCE WITH PUBLISHED PRACTICES.

U. PROVIDE VERTICAL MASONRY CONTROL JOINTS AT APPROXIMATELY 20'-0" O.C., AND IN ACCORDANCE WITH RECOMMENDATIONS IN THE "MASONRY DESIGNER'S GUIDE". REFER TO ARCHITECTURAL PLANS FOR LOCATIONS, OR IF NOT SHOWN, COORDINATE LOCATIONS WITH THE ARCHITECT.

V. SPLICE LAP LENGTHS FOR REINFORCING SHALL BE IN ACCORDANCE WITH THE FOLLOWING TABLE, U.N.O. ON THE PLANS:

1.	BAR SIZE	LAP LENGTH
a.	#3	24"
b.	#4	36"
c.	#5	48"
d.	#6	60"

W. DO NOT EMBED ANY NON-STRUCTURAL ITEMS IN STRUCTURAL MASONRY WITHOUT WRITTEN PERMISSION FROM THE STRUCTURAL ENGINEER.

X. ALL REINFORCING STEEL SHALL BE PLACED AND TIED IN THE PROPER POSITION AS THE WALLS ARE CONSTRUCTED. LOWERING THE BARS IN FROM THE TOP OF A COMPLETED WALL OR SECTION OF WALL IS NOT ALLOWED.

Y. CONTRACTOR SHALL PROVIDE BRACING AND SUPPORT FOR ALL MASONRY WORK UNTIL PERMANENT ROOF/FLOOR FRAMING IS IN PLACE.

Z. DO NOT APPLY UNIFORM FLOOR OR ROOF LOADS FOR AT LEAST 12 HOURS AND CONCENTRATED LOADS FOR AT LEAST 3 DAYS AFTER BUILDING MASONRY WALLS OR COLUMNS.

STRUCTURAL GENERAL NOTES

LFUCG EXTERIOR STRUCTURES
134 WEST NEW CIRCLE ROAD

DESIGNED: MWC
DRAWN: NEK
REVIEWED: MWC
APPROVED: MWC

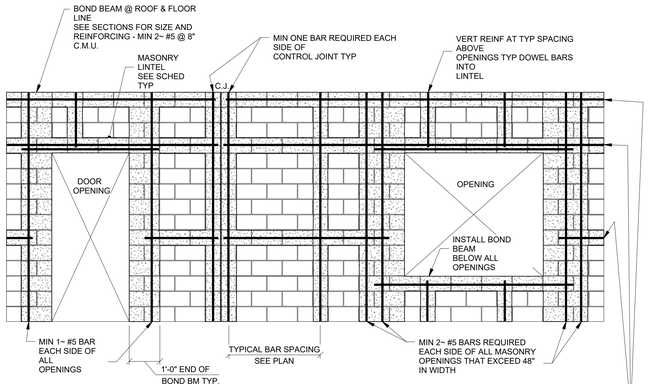
REVISIONS

NO	REVISION DESCRIPTION	DATE	BY

SCALE CHECK — THIS MARK SHOULD MEASURE EXACTLY 1" WHEN PLOTTED

DATE: AUGUST 15, 2025
SCALE: 12" = 1'-0"
SHEET NO.: S-001 02

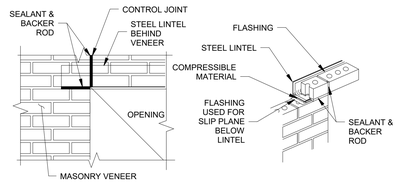
8/14/2025 2:49:48 PM G:\2024\-01\CS_DWG_HCB\Working Drawings\RevitArch\Central Model\24C1CS08002.rvt



NOTES:

1. MINIMUM VERTICAL WALL REINFORCING SHALL BE #5 @ 2'-0" UNLESS NOTED OTHERWISE.
2. VERTICAL WALL REINFORCING SHALL BE CONTINUOUS.
3. SEE TYPICAL DETAIL FOR DOWELS REQUIRED AT BASE OF WALLS.
4. CENTER REINFORCING BARS IN GROUTED CELLS UNLESS NOTED OTHERWISE.
5. USE BAR POSITIONERS AT MINIMUM 4'-0" SPACING TO SUPPORT REINFORCING BARS.
6. FOLLOW SPECIFIED GROUTING PROCEDURES.
7. CLEAN MORTAR FROM EDGES OF CELLS SO GROUT CAN FLOW SMOOTHLY AND FILL ENTIRE CELL.
8. USE LINTEL BLOCK OVER OPENINGS AND CONTINUE WITH OPEN-BOTTOM BOND BEAM FROM EDGE OF OPENING INTO WALL SO THAT VERTICAL REINFORCING AT JAMB CAN PASS.
9. CONTROL JOINTS SHALL EXTEND FULL HEIGHT OF WALL AND ALIGN FROM FLOOR TO FLOOR.
10. WHERE A CONTROL JOINT OCCURS THROUGH A BOND BEAM OR LINTEL BEARING, PROVIDE 2 ~ 1/2" DOWELS ACROSS JOINT WITH GREASE ON ONE SIDE. DO NOT CONTINUE HORIZONTAL REINFORCING ACROSS CONTROL JOINT.

TYPICAL C.M.U. WALL REINFORCEMENT DETAILS



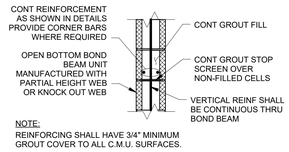
LOOSE LINTEL SCHEDULE (FOR MASONRY VENEER)

THIS SCHEDULE IS FOR LINTELS OVER MASONRY OPENINGS NOT OTHERWISE SHOWN OR NOTED ON DRAWINGS.

SPAN	ANGLE SIZE	PLAN MARK
UP TO 4'-0"	L3x 3 1/2 x 5/16 LLV	AL-1
UP TO 5'-6"	L4x 3 1/2 x 5/16 LLV	AL-2
UP TO 7'-6"	L5x 3 1/2 x 5/16 LLV	AL-3
UP TO 9'-6"	L6x 3 1/2 x 5/16 LLV	AL-4

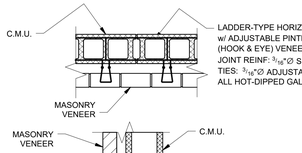
NOTES:
1. PROVIDE ONE ANGLE FOR EACH 4" OF MASONRY WALL.
2. ANGLES EXPOSED TO WEATHER SHALL BE GALVANIZED.
3. MINIMUM BEARING LENGTH SHALL BE 4" EACH END.

TYPICAL MASONRY VENEER LINTEL DETAIL

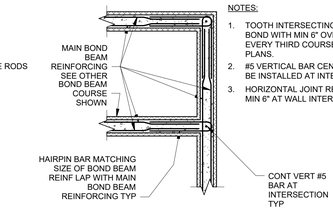


NOTE:
REINFORCING SHALL HAVE 3/4" MINIMUM GROUT COVER TO ALL C.M.U. SURFACES.

TYPICAL C.M.U. BOND BEAM DETAIL

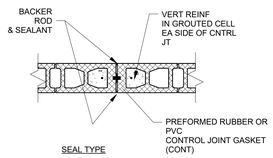


TYPICAL HORIZ JOINT REINF AND VENEER DETAIL

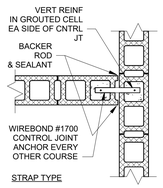


NOTES:
1. TOOTH INTERSECTING WALLS TOGETHER IN RUNNING BOND WITH MIN 6" OVERLAP OR USE MASONRY STRAP EVERY THIRD COURSE UNLESS NOTED OTHERWISE ON PLANS.
2. #5 VERTICAL BAR CENTERED IN GROUTED CELL SHALL BE INSTALLED AT INTERSECTION.
3. HORIZONTAL JOINT REINFORCEMENT SHALL BE LAPPED MIN 6" AT WALL INTERSECTION.

TYPICAL MASONRY WALL INTERSECTION DETAIL



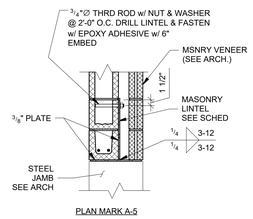
SEAL TYPE



STRAP TYPE

NOTES:
1. ARCHITECTURAL AND/OR STRUCTURAL DRAWINGS FOR CONTROL JOINT LOCATIONS.
2. DISCONTINUE HORIZONTAL JOINT REINFORCEMENT AND BOND BEAMS REINFORCEMENT AT CONTROL JOINTS.
3. UNLESS OTHERWISE SHOWN OR NOTED, SPACING OF CONTROL JOINTS SHALL NOT EXCEED 24 FEET.

TYPICAL C.M.U. CONTROL JOINT DETAIL



PLAN MARK A-5

TYP MASONRY VNR LINTEL FOR OPNGS > = 10' W

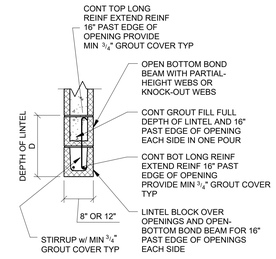
SECTION VIEW

PLAN VIEW

TYPICAL C.M.U. WALL DOWELS DETAIL



TYPICAL C.M.U. LINTEL DETAIL

MASONRY LINTEL SCHEDULE

MARK	MAX OPENING SIZE	D	BOTTOM REINF	TOP REINF	STIRRUPS
ML-1	5'-0"	8"	2~#5	NONE	NONE
ML-2	8'-0"	16"	2~#5	NONE	NONE
ML-3	11'-8"	24"	2~#5 (8" C.M.U.) 2~#6 (10" C.M.U.)	NONE	NONE
ML-4	18'-0"	24"	2~#5 (8" C.M.U.) 2~#6 (10" C.M.U.)	2~#5	#3@8"

NOTES:
1. DO NOT USE THIS SCHEDULE IF CONCENTRATED LOAD IS APPLIED TO THE LINTEL AT A HEIGHT LESS THAN HALF THE SPAN ABOVE THE LINTEL OR IF STACK BOND IS SPECIFIED.
2. IN LIEU OF USING LINTEL BLOCK ON THE BOTTOM OF LINTELS WHICH, REQUIRES SHORING DURING CONSTRUCTION, CONTRACTOR MAY USE PRESTRESSED, PRECAST CONCRETE LINTELS BY "CAST-CRETE" (WWW.CASTCRETE.COM) OR APPROVED EQUAL. SUBMIT PRODUCT DATA AND A PLAN AND SCHEDULE OF LINTEL LOCATIONS AND SIZES FOR APPROVAL FOR THIS OPTION.

GENERAL NOTES:

ADD ALTERNATE #1: ALL CANOPIES TO REMAIN IN PLACE. NO DEMOLITION WORK ON SMALLEST CANOPY. ALL CANOPY STEEL STRUCTURES AND ROOF DRAINAGE TO BE CLEANED. ALL EXISTING CONCRETE PIERS TO BE REPAINTED. ALL EXISTING PARKING LINES TO BE REPAINTED. PROVIDE NEW WORK FOR LARGER TWO CANOPIES AS SHOWN. VACTOR BUILDING TO BE RELOCATED, SEE CIVIL FOR COORDINATION. SEE MEP FOR ADDITIONAL REQUIREMENTS

SHEET KEYNOTES:

1	EXISTING CMU. REWORK / REPOINTING OPEN OR DAMAGED MORTAR JOINTS. CLEAN CMU AND PREPARE WALL FOR NEW PAINT FINISH. SEE RFS.
2	FINISH PER RFS. SEE SPECS FOR INTERIOR AND EXTERIOR PAINT REQ'S.
3	REPAINT EXISTING PARKING LINES
4	INFILL WALL WHERE HVAC UNIT WAS REMOVED. SEE TYP MASONRY DETAILS SHEET S-002.
5	PROVIDE DOWNSPOUT, MATCH EXISTING
6	REPLACE DOWNSPOUT IF NECESSARY, MATCH EXISTING. TYP.
7	PROVIDE SURFACE-MOUNTED FIRE EXTINGUISHER CABINET. SEE SPECS. FIRE EXTINGUISHER OFCI. COODRINATE CABINET WITH OWNER PROVIDED FIRE EXTINGUISHER.
8	PAINT EXISTING CONCRETE CASING, SEE SPECS.
9	DEMO AND REPLACE EXISTING DOOR AND HARDWARE. PROTECT FRAME. SEE DOOR SCHEDULE.
10	NEW INSULATED OVERHEAD DOOR, MOTOR AND FRAME. SEE SPECS.
11	FIRE EXTINGUISHER, OFCI. TO BE MOUNTED TO CONCRETE COLUMN CASING. T.O. EXTINGUISHER TO BE AT 4'-0".
12	ADD ALTERNATE #1. CANOPY TO REMAIN. CLEAN STEEL STRUCTURE, REPAINT CONCRETE PIERS AND PARKING LINES. SEE SPECS.

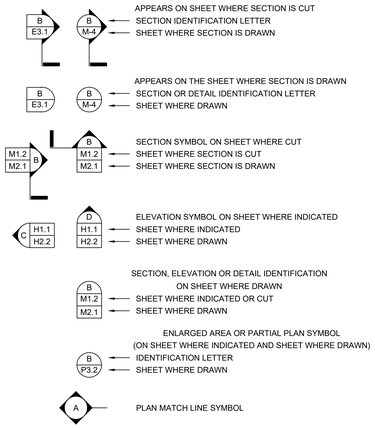
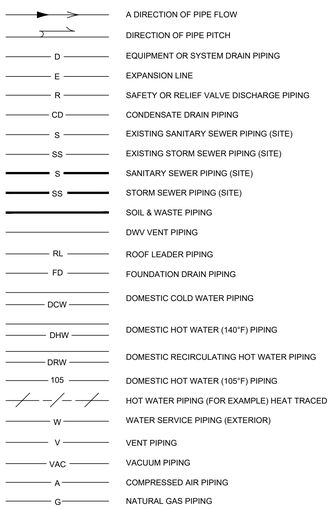
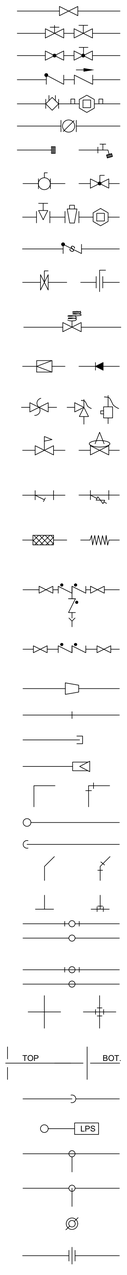
GENERAL LEGEND

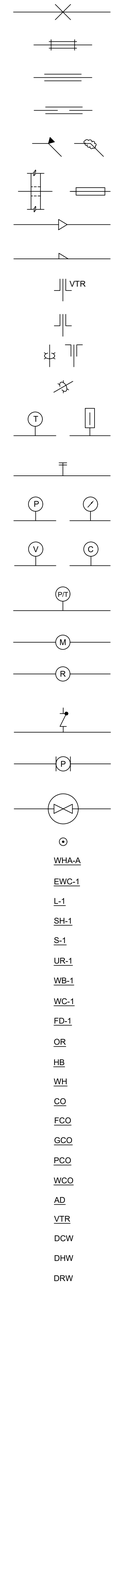


NOTE: LEGENDS ALSO APPEAR ON INDIVIDUAL PLANS, SCHEDULES AND DETAILS.

PLUMBING LEGEND







PLUMBING GENERAL NOTES:

1. GENERAL NOTES, WHEREVER THEY ARE FOUND, APPLY TO ALL WORK IN THE PROJECT, UNLESS OTHERWISE INDICATED. CONFLICTS BETWEEN GENERAL NOTES AND SPECIFICATIONS SHALL BE CALLED TO THE ATTENTION OF THE ENGINEER - THE MORE STRINGENT REQUIREMENT SHALL APPLY. SHEET KEYNOTES, UTILIZING NOTE SYMBOLS, APPLY ONLY TO THE SHEET ON WHICH THEY ARE FOUND, UNLESS OTHERWISE STATED. THE MEANING OF NOTE SYMBOLS AND NUMBERS VARIES FROM SHEET TO SHEET.
2. CONTRACTOR SHALL UTILIZE ALL INFORMATION IN THE CONTRACT DOCUMENTS FOR PROVIDING THE WORK. CONTRACTOR SHALL UTILIZE DETAILS AND RISER DIAGRAMS FOR THE WORK WHERE APPROPRIATE, WHETHER OR NOT THEY ARE SPECIFICALLY REFERENCED ON THE PLAN OR SUPPORTING DRAWINGS.
3. CONTRACTOR SHALL FIELD VERIFY ALL EXISTING CONDITIONS. ANY DISCREPANCIES BETWEEN EXISTING CONDITIONS AND CONTRACT DOCUMENTS ARE TO BE BROUGHT TO THE ATTENTION OF THE ENGINEER BEFORE ANY WORK RELATING TO THOSE CONDITIONS IS PERFORMED.
4. LEGENDS OR LISTS OF SYMBOLS AND ABBREVIATIONS ARE GENERAL IN NATURE AND MAY CONTAIN ITEMS NOT USED IN THE CONTRACT DOCUMENTS. IF ANY SUCH ITEMS ARE FOUND WHICH ARE NOT DEFINED ON THE PLANS OR IN THE SPECIFICATIONS, THE ENGINEER SHALL BE CONTACTED FOR CLARIFICATION BEFORE THE BID.
5. CONTRACTOR SHALL MAINTAIN A SET OF PROJECT RECORD DRAWINGS AT THE JOB SITE AND SHALL BE RESPONSIBLE FOR MAKING CLEAR, NEAT CHANGES TO THE DRAWINGS, REFLECTING CHANGES TO THE WORK AND VARIANCE IN EXISTING CONDITIONS.
6. PROVIDE ALL MISCELLANEOUS STEEL, AS REQUIRED, TO SUPPORT ALL PIPING SYSTEMS, FIXTURES AND EQUIPMENT. DO NOT HANG ANYTHING FROM MECHANICAL OR ELECTRICAL ITEMS.
7. NO STRUCTURAL MEMBERS SHALL BE CUT, BURNED, WELDED OR DRILLED WITHOUT SPECIFIC PERMISSION OF THE ENGINEER.
8. DO NOT CHANGE PATH OF PIPING, ADD TURNS OR OFFSETS OR PIPE SIZE WITHOUT FIRST CONSULTING THE ENGINEER. PIPE SIZES SHOWN ON DRAWINGS ARE NOMINAL UNLESS OTHERWISE INDICATED.
9. CONTRACTOR SHALL MAKE MINOR OFFSETS AND LOCATION CHANGES IN PIPE AS REQUIRED IN CONGESTED CEILING OR MECHANICAL SPACES. GENERALLY, THESE WILL BE AT NO COST TO THE OWNER AND APPROVED BY THE ENGINEER WITHOUT FORMAL DOCUMENTS. MAJOR REROUTING OF LINES OR MAJOR ADDITION OF FITTINGS WILL BE REVIEWED AND APPROVED AS A CHANGE ORDER OR A FORMAL DIRECTIVE. ENGINEER ALONE SHALL CLASSIFY CHANGES AS MAJOR OR MINOR.
10. ALL COPPER PIPING SHALL BE ASSEMBLED WITH WROUGHT COPPER OR CAST COPPER ALLOY FITTINGS AND 95/5 TIN ANTIMONY SOLDER OR SILVER BRAZING. NO SOLDER CONTAINING MORE THAN 0.2% LEAD SHALL BE USED IN MANUFACTURING OR IN FIELD ASSEMBLY OF POTABLE WATER SYSTEM COMPONENTS. ALL PIPING, FITTINGS, FIXTURES AND EQUIPMENT IN CONTACT WITH POTABLE WATER SHALL BE CERTIFIED BY THE SOURCE OF THE PRODUCT TO BE 'LEAD-FREE' (TO CONTAIN LESS THAN 0.25% LEAD) IN COMPLIANCE WITH THE EPA AND SDWA (SAFE DRINKING WATER ACT AND U.S. PUBLIC LAW 111-380).
11. ALL INTERRUPTIONS OF UTILITY SERVICE REQUIRED FOR COMPLETION OF THE WORK SHALL BE SCHEDULED 7 DAYS IN ADVANCE.
12. COORDINATE ALL PLUMBING WITH NEW MECHANICAL AND ELECTRICAL WORK, INCLUDING HVAC, PLUMBING, FIRE PROTECTION, ELECTRICAL, FIRE ALARM AND COMMUNICATIONS.
13. DO NOT USE BULL-HEADED TEE FITTINGS ON PIPE, UNLESS SPECIFICALLY SHOWN.
14. PROVIDE ALL PLUMBING CONNECTIONS, PIPING, FIXTURES AND EQUIPMENT AS INDICATED, NOTED AND SCHEDULED, FOR A COMPLETE WORKING SYSTEM. WORK SHALL BE PROVIDED BY A LICENSED PLUMBING CONTRACTOR, IN ACCORDANCE WITH KENTUCKY PLUMBING CODE, AND SHALL BE ACCOMPANIED BY A CERTIFICATE OF INSPECTION AND APPROVAL.
15. ALL EQUIPMENT, ACCESSORIES, PIPING, AND OTHER WORK, WHICH IS INSTALLED IN FINISHED SPACES SHALL BE CONCEALED IN WALLS, FLOORS, CHASES OR SUSPENDED CEILINGS, UNLESS OTHERWISE INSTRUCTED ON PLANS.
16. PROVIDE ALL ACCESS DOORS AS SHOWN, EXCEPT THOSE SPECIFIED UNDER OTHER DIVISIONS. IN ADDITION, PROVIDE ANY OTHER ACCESS DOORS (WHETHER OR NOT SHOWN ON PLANS) NECESSARY FOR ACCESS TO CONCEALED EQUIPMENT, VALVES OR OTHER OPERATIONAL OR SERVICEABLE ITEMS, UNLESS ITEM IS REASONABLY ACCESSIBLE THROUGH LAY-IN CEILING PANELS.
17. SEE RISER DIAGRAMS FOR SIZES NOT SHOWN ON PLANS.
18. THE CONTRACTOR SHALL NOT REMOVE OR DISTURB ANY SUSPECTED HAZARDOUS MATERIALS, INCLUDING ASBESTOS-CONTAINING MATERIALS (ACM), LEAD-BASED PAINTS EXCEPT AS INSTRUCTED IN THIS CONTRACT. IF ANY MATERIAL NOT COVERED BY THE CONTRACT IS ENCOUNTERED, NOTIFY THE ENGINEER AT ONCE.
19. ALL DEMOLISHED OR REMOVED EQUIPMENT, PIPING, FIXTURES, SUPPORTS, AND THE LIKE SHALL BECOME THE PROPERTY OF THE CONTRACTOR AND SHALL BE REMOVED FROM THE SITE UNLESS OTHERWISE NOTED.
20. REINSULATE ALL PIPE, VALVES AND FITTINGS WHERE EXISTING INSULATION HAS BEEN REMOVED OR DAMAGED DURING THE PROJECT.
21. FINAL PRODUCT SHALL BE A COMPLETE AND FUNCTIONING SYSTEM CONFORMING TO ALL REQUIREMENTS OF THE CURRENT BUILDING CODES OF KENTUCKY. CONTRACTOR IS RESPONSIBLE FOR MAKING ALL REQUIRED CONNECTIONS FOR A COMPLETE SYSTEM.
22. EXAMINE THE CONTRACT DOCUMENTS AND IMMEDIATELY REPORT ANY ERROR, DISCREPANCY OR OMISSION. THE ENGINEER WILL DETERMINE WHICH INTERPRETATION TAKES PRECEDENCE WHERE TWO OR MORE CONFLICTING STATEMENTS OCCUR. OTHERWISE, THE CONTRACTOR IS RESPONSIBLE FOR THE MORE STRINGENT (OR EXPENSIVE) INTERPRETATION. IN GENERAL, SCHEDULES, WHEREVER THEY APPEAR, SUPERSEDE SPECIFICATIONS AND SPECIFICATIONS SUPERSEDE PLANS.
23. APPLICABLE KENTUCKY CODES ARE:
    KENTUCKY STATE PLUMBING LAW, REGULATIONS & CODE (815 KAR CHAPTER 20)
    STATE BOILER REGULATION
    2018 KENTUCKY BUILDING CODE
    2015 INTERNATIONAL EXISTING BUILDING CODE
    2015 INTERNATIONAL MECHANICAL CODE

GENERAL NOTES:

1. FURNISH ALL LABOR, MATERIAL, AND EQUIPMENT REQUIRED FOR THE COMPLETION & OPERATION OF ALL SYSTEMS IN THIS SECTION OF WORK IN ACCORDANCE WITH ALL APPLICABLE CODES, ASHRAE, SMACNA, NFPA, EPA, ETC.
2. REFER TO ALL PROJECT DRAWINGS FOR DETAILS OF CONSTRUCTION AND INSTALLATION REQUIREMENTS.
3. CONTRACTOR SHALL BECOME, PRIOR TO BID, THOROUGHLY FAMILIAR WITH THE REQUIREMENTS OF THESE NOTES AS WELL AS OTHER NOTES SHOWN ON THE CONTRACT DOCUMENTS.
4. THESE DRAWINGS REFLECT A SYSTEM DESIGNED AROUND SPECIFIC REFERENCE PRODUCTS (SEE SCHEDULES). THE SELECTION OF WHICH HAS INFLUENCED THE DESIGNS OF OTHER TRADES (ELECTRICAL, STRUCTURAL, ETC.) IF SUBSTITUTE MANUFACTURERS, SIZES, OR MODEL NUMBERS ARE BID, SUBMITTED OR INSTALLED, IT IS THE RESPONSIBILITY OF THE MECHANICAL CONTRACTOR AND ALL HIS SUBCONTRACTORS TO COORDINATE ALL DIFFERENCES PRIOR TO BID. ALL COSTS OF ALL TRADES ASSOCIATED WITH THE SUBSTITUTION SHALL BE INCLUDED IN THE BID.
5. COORDINATION OF ALL MODIFICATIONS TO EACH DISCIPLINE WHICH RESULT FROM SUBSTITUTION OF EQUIPMENT OR MATERIALS SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR. SUBSTITUTIONS WHICH ARE INSTALLED AND SUBSEQUENTLY ARE PROVEN UNSATISFACTORY BY OWNER AND/OR ENGINEER, WITHIN THE WARRANTY PERIOD, SHALL BE REMOVED COMPLETELY BY THE CONTRACTOR AND REPLACED WITH THE ORIGINAL DESIGN OR CORRECTED AS DIRECTED BY THE ENGINEER WITHOUT ADDITIONAL COST TO THE OWNER.
6. ALL DRAWINGS ARE DIAGRAMMATIC AND INDICATE THE GENERAL ARRANGEMENTS OR GEOMETRICAL RELATIONSHIPS OF EQUIPMENT AND SERVICES. THEY ARE NOT INTENDED TO SPECIFY OR SHOW EVERY OFFSET, SEQUENCE, DEVICE, OPTION, FITTING, VALVE, OR COMPONENT.
7. INFORMATION AND COMPONENTS SHOWN ON RISER DIAGRAMS OR DETAILS, BUT NOT SHOWN ON PLANS, AND VICE VERSA, SHALL BE PROVIDED AS IF EXPRESSLY REQUIRED BY BOTH.
8. CONTRACTOR SHALL NOT SCALE DRAWINGS. DRAWINGS SPECIFIC TO THIS DISCIPLINE DO NOT LIMIT THE RESPONSIBILITY OF WORK REQUIRED BY THE CONTRACT DOCUMENTS.
9. EXACT LOCATIONS OF ALL EQUIPMENT, DUCTS, DIFFUSERS, ETC. SHALL BE COORDINATED WITH OTHER TRADES. CEILING MOUNTED LIGHTING, AND ELECTRICAL REQUIREMENTS TAKE PRECEDENCE OVER CEILING MOUNTED MECHANICAL REQUIREMENTS.
10. CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING ALL WORK WITH THAT OF OTHER TRADES. REFER TO ELECTRICAL AND OTHER DRAWINGS FOR COMPLETE INFORMATION PRIOR TO BID.
11. ALL MECHANICAL CONSTRUCTION DETAILS SHALL BE AS SHOWN AND AS REQUIRED TO MAINTAIN "UL" ASSEMBLY RATINGS. SEAL AROUND ALL PENETRATIONS THROUGH ALL "UL" RATED ASSEMBLIES, FIRE, AND SMOKE WALLS. COORDINATE WITH GENERAL CONTRACTOR.
12. NO OTHER TRADES, I.E., ELECTRICAL, CEILING, PLUMBING, ETC., SHALL BE SUSPENDED, HUNG, OR SUPPORTED FROM DUCTWORK OR PIPING.
13. ALL BUILDING PENETRATIONS MUST BE COORDINATED WITH ENGINEER AND SHALL BE FLASHED AND SEALED WEATHERTIGHT. ALL MATERIALS AND COLORS MUST BE PRE-APPROVED BY ENGINEER.
14. ROUTE DUCTWORK AS HIGH AS POSSIBLE TO FACILITATE ACCESS TO ABOVE CEILING SPACE. COORDINATE ROUTING WITH OTHER SERVICES AND TRADES.
15. ALL DUCTWORK AND PIPING SHALL BE SUPPORTED FROM STRUCTURE.
16. ALL DUCTWORK SHALL BE CONSTRUCTED AND INSTALLED PER SMACNA HVAC DUCT CONSTRUCTION STANDARDS.
17. MAXIMUM FLEXIBLE DUCT LENGTH SHALL BE 5'-0". ALL FLEXIBLE DUCT SHALL CONFORM TO THE REQUIREMENTS OF U.L. 181 FOR CLASS 1 FLEXIBLE AIR DUCTS. SUPPORT TO ELIMINATE SAGGING & KINKING.
18. ALL HVAC EQUIPMENT TO BE INSTALLED PER MANUFACTURER'S REQUIREMENTS AS SHOWN. UTILIZE FACTORY FILTERS DURING CONSTRUCTION.
19. ALL PIPING, DUCTS, VENTS, ETC., EXTENDING THROUGH WALLS SHALL BE FLASHED, COUNTER FLASHED IN WATERPROOF MANNER W/LEAD ROOF JACK.
20. CONTRACTOR TO COORDINATE DUCTWORK WITH OTHER TRADES, OFF-SET AS REQUIRED, RUN DUCTWORK BETWEEN JOIST WHERE POSSIBLE.
21. CONTRACTOR SHALL VISIT THE JOB SITE & BE FAMILIAR WITH ALL PROJECT CONDITIONS PRIOR TO FABRICATING ANY EQUIPMENT, DUCTWORK, ETC. NO ALLOWANCES WILL BE MADE FOR CONTRACTOR UNFAMILIARITY WITH PROJECT CONDITIONS.
22. MECHANICAL CONTRACTOR SHALL BALANCE SYSTEM TO AIR QUANTITIES INDICATED ON PLANS AND PROVIDE OWNERS REPRESENTATIVES WITH COMPLETE NEBB/AABC BALANCE REPORT.
23. ALL SQUARE ELBOWS SHALL HAVE TURNING VANES. NO EXCEPTIONS.
24. PROVIDE A MANUAL VOLUME DAMPER AT ALL BRANCH TAKE-OFFS.
25. ALL DUCT DIMENSIONS SHOWN ARE INTERIOR CLEAR DUCT DIMENSIONS.
26. ALL CONTROL WIRING & CONDUIT SHALL COMPLY WITH NEC.
27. PIPE AND DUCT ROUTING SHOWN IS SCHEMATIC. HVAC CONTRACTOR SHALL PROVIDE ANY ADDITIONAL OFFSETS AND FITTINGS, INCLUDING DIVIDED DUCTS, REQUIRED FOR PROPER INSTALLATION AND TO MAINTAIN CLEARANCES AS ENCOUNTERED IN THE FIELD.
28. MECHANICAL CONTRACTOR SHALL COORDINATE WITH ELECTRICAL CONTRACTOR AND DRAWINGS FOR CONNECTIONS AND LOCATION OF ALL EQUIPMENT.
29. CONTRACTOR SHALL MAINTAIN A SET OF PROJECT RECORD DRAWINGS AT THE JOB SITE AND SHALL BE RESPONSIBLE FOR MAKING CLEAR, NEAT CHANGES TO THE DRAWINGS, REFLECTING CHANGES TO THE WORK AND VARIANCE IN EXISTING CONDITIONS.
30. CONSULT ROOF PLAN AND STRUCTURAL DRAWINGS FOR PLACEMENT OF ROOF MOUNTED EQUIPMENT. PROVIDE ALL NECESSARY ROOF CURBS, EQUIPMENT RAILS AND BASES AND ANY ADDITIONAL REQUIRED FRAMING IN COORDINATION WITH STRUCTURAL AND ROOFING WORK.
31. ALL EQUIPMENT, DUCT, PIPING AND ACCESSORIES INSTALLED OUTSIDE OR OTHERWISE EXPOSED TO THE ELEMENTS SHALL BE ADEQUATELY WEATHERPROOFED, IN KEEPING WITH THE SPECIFICATIONS. ALL FERROUS METAL FRAMING COMPONENTS SHALL BE STAINLESS STEEL OR HOT-DIP GALVANIZED.
32. PROVIDE ALL ACCESS DOORS AS SHOWN, EXCEPT THOSE SPECIFIED UNDER OTHER DIVISIONS. IN ADDITION, PROVIDE ANY OTHER ACCESS DOORS WHETHER OR NOT SHOWN ON PLANS, NECESSARY FOR ACCESS TO CONCEALED EQUIPMENT, VALVES, DAMPERS, ACTUATORS, JUNCTION BOXES, CONTROLS OR OTHER OPERATIONAL OR SERVICEABLE ITEMS, UNLESS ITEM IS REASONABLY ACCESSIBLE THROUGH LAY-IN CEILING PANELS.
33. PROVIDE LINTELS AS REQUIRED FOR ALL NEW OPENINGS GREATER THAN 12" WIDE IN MASONRY OR LOAD-BEARING WALLS, MATERIAL TO BE APPROVED BY ENGINEER.
34. ANY AND ALL DAMAGE DUE TO DEMOLITION OR CONSTRUCTION IS TO BE REPAIRED OR REPLACED AS APPROPRIATE, SUBJECT TO ENGINEER'S APPROVAL, AND AT NO ADDITIONAL COST TO THE OWNER.
35. THE CONTRACTOR SHALL NOT REMOVE OR DISTURB ANY SUSPECTED HAZARDOUS MATERIALS, INCLUDING ASBESTOS-CONTAINING MATERIALS (ACM), LEAD-BASED PAINTS, ELECTRICAL GEAR CONTAINING PCB'S OR ANY OTHER, EXCEPT AS INSTRUCTED IN THIS CONTRACT. IF ANY MATERIAL NOT COVERED BY THE CONTRACT IS ENCOUNTERED, NOTIFY THE ENGINEER AT ONCE.
36. ALL DEMOLISHED OR REMOVED EQUIPMENT, PIPING, DUCTWORK, SUPPORTS, CONTROLS AND THE LIKE SHALL BECOME THE PROPERTY OF THE CONTRACTOR AND SHALL BE REMOVED FROM THE SITE UNLESS OTHERWISE NOTED.
37. ALL EQUIPMENT PROVIDED WITH FILTERS SHALL HAVE FILTERS IN PLACE AT THE TIME OF STARTUP. ALL NEW FILTERS SHALL BE INSTALLED AT THE TIME OF OWNER OCCUPANCY, AND A COMPLETE SET OF EXTRA FILTERS SHALL BE TURNED OVER TO THE OWNER AT THIS TIME. IN THE EVENT THAT CARE IS NOT TAKEN DURING INITIAL OPERATION TO PREVENT CONTAMINATION OF THE FILTERS WITH CONSTRUCTION DUST, ADDITIONAL SETS OF FILTERS SHALL BE PROVIDED TO PROTECT THE EQUIPMENT.
38. PROVIDE ADDITIONAL INPUT/OUTPUT POINTS REQUIRED TO IMPLEMENT CONTROL SEQUENCES SPECIFIED.
39. PAINT ALL EXPOSED PLENUMS AND DUCTWORK BEHIND GRILLES AND DIFFUSERS WITH FLAT BLACK PAINT.

EF POINTS LIST								
TAG	POINT DESCRIPTION	UNITS	DI	DO	AI	AO	ALARM	TREND
FS-1	FAN STATUS	ON/OFF	X				X	

SEQUENCE OF OPERATION - EF

EXHAUST FANS - EF-1 AND EF-2

FANS
EF-1 AND EF-2 SHALL BE CONTROLLED VIA WALL MOUNTED THERMOSTAT. WHEN SPACE TEMPERATURE IS 65F (ADJ) OR BELOW, FAN SHALL RUN CONTINUOUS DURING OCCUPIED HOURS AT LOW FAN SPEED (125 CFM). WHEN SPACE TEMPERATURE RISES ABOVE 65F (ADJ), FAN SHALL RUN CONTINUOUS DURING OCCUPIED HOURS AT HIGH FAN SPEED (600 CFM).

FAN SHALL BE OFF DURING UNOCCUPIED HOURS.

VERIFY OCCUPIED HOURS WITH OWNER. MOTORIZED CONTROL DAMPER ON LOUVER SHALL BE INTERLOCKED WITH FAN STATUS. IF FAN IS ON, THEN LOUVER DAMPER SHALL OPEN. IF FAN IS OFF, THEN LOUVER DAMPER SHALL BE CLOSED. FAN ON/OFF STATUS SHALL TIE INTO BAS MONITORING SYSTEM.

LOUVER CONTROL DAMPER OPEN/CLOSE STATUS SHALL BE VIEWABLE AND CONNECT TO BAS.

EMERGENCY SHUTOFF: IF SPACE TEMPERATURE DROPS TO 45F (ADJ) OR BELOW, EF-1 AND EF-2 SHALL TURN OFF AND THE LOUVER MOTORIZED DAMPER SHALL CLOSE. WHEN SPACE TEMPERATURE RISES ABOVE 45F (ADJ), FANS SHALL RESUME NORMAL OPERATION.

OPERATING PARAMETERS: UH

FUNCTION	SET POINT ADJUSTABLE	REMARKS
TEMPERATURE SETPOINT	65 F (ADJ)	SEND ALARM TO DDC SYSTEM IF SPACE TEMPERATURE FALLS BELOW 50F (ADJ).
BAS INTERFACE		-ON/OFF STATUS TO BAS MONITORING SYSTEM. -HEAT STATUS TO BAS MONITORING SYSTEM. -SPACE TEMPERATURE TO BAS MONITORING SYSTEM.

1 CONTROL NETWORK COMMUNICATIONS DIAGRAM
NOT TO SCALE

NOTE:

PER DIRECTION FROM OWNER, ALL CONTROL WIRING SHALL BE ORANGE AND SHALL NOT CONFLICT WITH OTHER SYSTEM'S WIRING. TCC SHALL COORDINATE WIRING COLOR WITH OWNER AND OWNER'S IT DEPARTMENT PRIOR TO INSTALLATION.

NOTE:

CONTROL WIRING CONDUIT IS BEING PROVIDED AND INSTALLED BY ELECTRICAL CONTRACTOR FROM VACTOR BUILDING TO THESE STORAGE BUILDINGS. TEMPERATURE CONTROLS CONTRACTOR SHALL PULL ALL CONTROL WIRING NEEDED FROM CONTROL PANEL IN VACTOR BUILDING TO THESE STORAGE BUILDINGS.

GENERAL NOTES:

1. THE MINIMUM STANDARD FOR ALL WORK SHALL BE THE LATEST EDITION OF THE INTERNATIONAL BUILDING CODE WITH IN STATE AMENDMENTS AND THE NATIONAL ELECTRICAL CODE (NEC).
2. ALL ELECTRICAL WORK SHALL BE PERFORMED BY AN IN-STATE LICENSED ELECTRICIAN.
3. ALL PERMITS NEEDED TO LEGALLY PERFORM THE ELECTRICAL WORK SHALL BE OBTAINED BY THE CONTRACTOR PRIOR TO START OF WORK. COST OF PERMITTING IS BY THE CONTRACTOR.
4. AT COMPLETION OF THE WORK, A CERTIFICATE OF COMPLIANCE FROM THE LOCAL AHJ OVER THE ELECTRICAL WORK SHALL BE PROVIDED TO THE ENGINEER AND OWNER. COST OF ELECTRICAL INSPECTION IS BY THE CONTRACTOR.
5. ALL MATERIALS USED IN THE PROJECT GENERALLY SHALL BE NEW AND UNUSED, UNLESS OTHERWISE NOTED ON THE DRAWINGS. ALL NEW MATERIALS SHALL BE LISTED AND LABELED BY UL OR OTHER ACCEPTABLE LISTING AGENCY, WHERE A LISTING EXISTS.
6. THE CONTRACTOR SHALL VISIT THE SITE(S) PRIOR TO BIDDING TO FAMILIARIZE THEMSELVES WITH PROJECT REQUIREMENTS AND EXISTING CONDITIONS.
7. FIRESTOP ALL NEW CONDUIT INSTALLED THROUGH EXISTING OR NEW FIRE RATED ASSEMBLIES.
8. SHOP DRAWINGS SHALL BE SUBMITTED ON ALL ELECTRICAL MATERIALS AND EQUIPMENT FOR ACCEPTANCE PRIOR TO PURCHASE BY THE CONTRACTOR.
9. WHEN AN ITEM DEMOLISHED IS REMOVED, REMOVE ALL CONCRETE PADS, FASTENERS, CONDUIT AND WIRING. SCARIFY SURFACE AND RESTORE TO MATCH EXISTING SURROUNDING SURFACE, INCLUDING PAINTING TO MATCH.
10. ALL NEW WIRING SHALL BE ENCLOSED IN AN APPROVED RACEWAY SYSTEM. OPEN WIRING IS PROHIBITED.
11. CIRCUIT BREAKERS USED FOR HVAC EQUIPMENT LOADS SHALL BE HACR TYPE.
12. ENSURE DEDICATED ELECTRICAL SPACE IS PROVIDED AT ELECTRICAL EQUIPMENT IN ACCORDANCE WITH NEC ARTICLE 110.26.
13. UP TO 3 CIRCUITS MAY BE COMBINED IN ONE CONDUIT, AS LONG AS NEC DERATING RULES ARE FOLLOWED.
14. ALL CIRCUITS SHALL HAVE A DEDICATED NEUTRAL. SHARED NEUTRALS AND MULTI-WIRE CIRCUITS ARE NOT TO BE USED EXCEPT POSSIBLY TO COORDINATE WITH SYSTEMS FURNITURE. SEE POWER PLAN.
15. 120 VOLT CIRCUITS THAT EXCEED 75 LINEAR CIRCUIT FEET SHALL BE INCREASED TO #10 AWG AS A GENERAL RULE. OTHER CIRCUITS WILL BE DESIGNED SPECIFICALLY WITH VOLTAGE DROP CONSIDERED IN CONDUCTOR SIZING.
16. COORDINATE ALL MOTOR STARTERS, FEEDERS AND DISCONNECT SWITCHES FOR HVAC AND OTHER UTILIZATION EQUIPMENT ACTUALLY PROVIDED IN ACCEPTED SHOP DRAWINGS.
17. IN ORDER TO COMPLY WITH OSHA REQUIREMENTS, NO OPERATOR DEVICE OF ANY PANEL OR DISCONNECT OR MOTOR CONTROL SHALL BE HIGHER THAN 6'-6" AFF.
18. PROVIDE AN EXTERIOR RATED SERVICE RECEPTACLE WITHIN 25 FEET HORIZONTALLY OF ANY EXTERIOR OR ROOFTOP HVAC OUTDOOR UNIT (HEATING OR AIR CONDITIONING ONLY).
19. INSTALL A NYLON PULLSTRING IN ALL SPARE CONDUITS, ACCESSIBLE AT BOTH ENDS. CAP OFF SPARE CONDUITS ON BOTH ENDS.
20. DEVICE PLATES SHALL BE INSTALLED PLUMB. JUMBO OR OVERSIZED PLATES SHALL NOT BE USED.
21. NEW RECEPTACLES SHALL BE INSTALLED WITH GROUND PIN ORIENTATION TO MATCH EXISTING. IN NEW CONSTRUCTION, GROUND PIN DOWN ABOVE COUNTERS OR WORK BENCHES AND UP FOR LOW WALL MOUNTED DEVICES.
22. AT COMPLETION OF PROJECT, ALL ELECTRICAL, TELECOMMUNICATIONS, AND ELECTRONIC SAFETY SYSTEMS SHALL BE FULLY OPERATIONAL.
23. EGRESS LUMINAIRES AND EXIT SIGNS REQUIRE UNSWITCHED LIGHTING CONDUCTOR.
24. SUPPORT ALL LUMINAIRES FROM THE STRUCTURE, NOT FROM THE SUSPENDED CEILING GRID. ALSO ATTACH THE LUMINAIRES TO THE GRID SYSTEM USING EARTHQUAKE CLIPS (SIMILAR TO ERICO/CADDY FASTENERS OR T&B/STEEL CITY).
25. WHERE DUPLEX RECEPTACLES ARE INDICATED GENERALLY BACK TO BACK ON OPPOSITE SIDES OF A PARTY WALL, THE RECEPTACLES SHALL NOT BE INSTALLED IN THE SAME STUD SPACE, BUT SHALL BE SEPARATED BY AT LEAST ONE STUD SPACE.
26. PROVIDE LABEL WITH ESTIMATED FAULT CURRENT AND DATE CALCULATED ON THE MAIN SERVICE DISCONNECT ENCLOSURE. PROVIDE COORDINATION STUDY AND ARC FLASH STUDY, AND APPLY JOB SPECIFIC ARC FLASH HAZARD WARNING LABELS ON ALL SWITCHBOARDS, SWITCHGEAR, MCC'S AND PANELBOARDS.
27. CIRCUIT BREAKERS, 1200 AMPERE OR LARGER, SHALL COMPLY WITH NEC ARTICLE 240.87, ARC ENERGY REDUCTION.

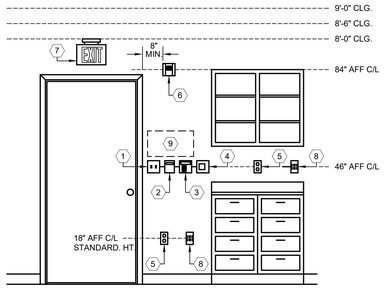
1 DEDICATED ELECTRICAL SPACE DETAIL

NOT TO SCALE



SHEET KEYNOTES:

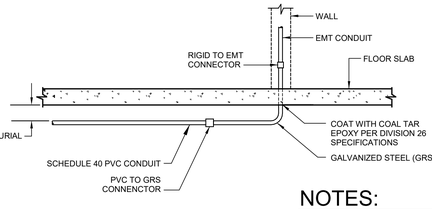
1. MOUNT EDGE OF LIGHTING CONTROL DEVICES CLOSEST TO DOOR AT A DISTANCE OF TWO INCHES FROM THE EDGE OF THE FACE PLATE TO THE DOOR FRAME INCLUDING ALL APPLIED TRIM UNLESS OTHERWISE NOTED. MOUNT REMAINING DEVICES IN THE FOLLOWING ORDER:

   A. FIRE ALARM INITIATION DEVICES.
   B. SECURITY/ACCESS CONTROL DEVICES.
   C. HVAC THERMOSTAT/HUMIDISTAT DEVICES.
   D. OTHER DEVICES.

   MOUNT THE EDGE OF DEVICE OR DEVICE FACE PLATES TWO INCHES APART. PROVIDE BLOCKING AS NECESSARY IN THE WALL OR PROVIDE MANUFACTURED SUPPORTS SIMILAR TO CADDY "RB" SERIES OR EQUAL. ALL DEVICES TO BE MOUNTED WITH CENTER LINE AT HEIGHT INDICATED.
2. FIRE ALARM INITIATING DEVICE.
3. SECURITY/ACCESS CONTROL KEYPAD.
4. HVAC THERMOSTAT/HUMIDISTAT CONTROL DEVICE.
5. ABOVE COUNTER ELECTRICAL/COMMUNICATIONS DEVICE, COORDINATE MOUNTING HEIGHT WITH ARCHITECTURAL INTERIOR ELEVATIONS. SHOWN AT TYPICAL HEIGHT.
6. FIRE ALARM NOTIFICATION APPLIANCE.
7. INSTALL WALL MOUNTED EXIT SIGNS WITH BOTTOM EDGE OF SIGN APPROXIMATELY FOUR INCHES FROM TOP OF DOOR FRAME.
8. COMMUNICATIONS OUTLET.
9. WHEN SIGNAGE WITH TACTILE CHARACTERS ARE TO BE INSTALLED, THE BOTTOM OF TACTILE SIGNAGE SHALL BE MOUNTED AT 50" AFF MINIMUM WITH THE TOP MOUNTED AT A MAXIMUM OF 60" AFF. PROVIDE A CLEAR SPACE OF 18" IN FRONT OF SIGNAGE. ALL OTHER PROVISIONS AND SPACINGS REQUIRED BY A.D.A. SHALL BE FOLLOWED.

2 DEVICE MOUNTING COORDINATION DETAIL

NOT TO SCALE

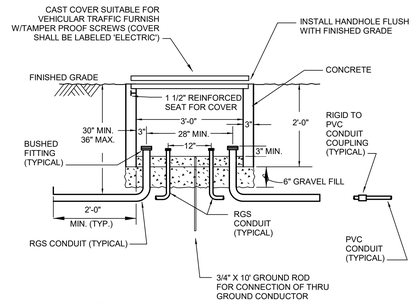


NOTES:

1. THIS DETAIL APPLIES TO ALL RISERS THROUGH SLAB ON GRADE, EITHER IN WALL OR EXPOSED.

3 THROUGH-SLAB CONDUIT DETAIL

NOT TO SCALE

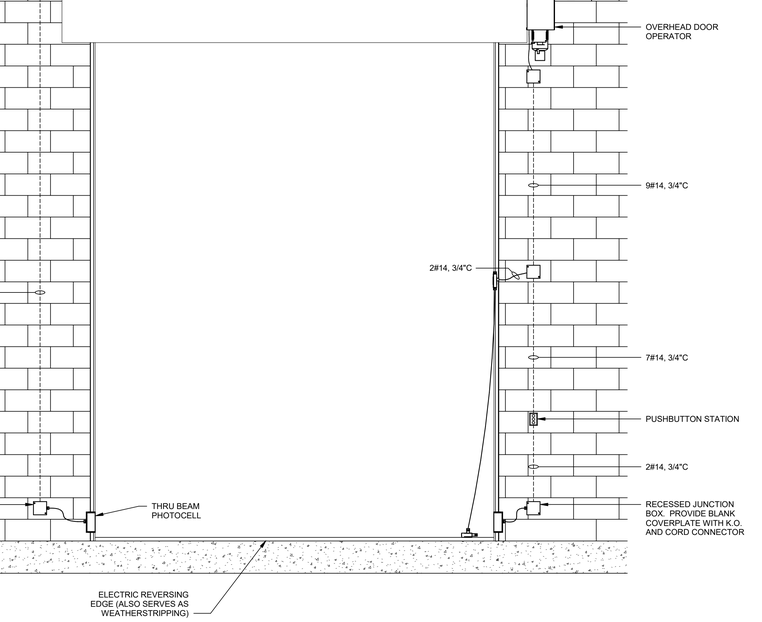


NOTES:

1. THIS DETAIL ALSO APPLIES FOR COMMUNICATIONS (SIGNAL WIRING) WHERE SHOWN ON DRAWINGS. COVER SHALL BE LABELED 'COMMUNICATIONS' WHERE UTILIZED FOR SIGNAL WIRING.
2. DIMENSIONS ARE FOR REFERENCE ONLY. PULL BOXES SHALL BE SIZED PER NEC.

4 ELECTRICAL HANDHOLE DETAIL

NOT TO SCALE



NOTES:

1. FIELD WIRING IS REQUIRED FROM DOOR OPERATOR PANEL FOR THE FOLLOWING:
   - 2#14 FOR SENSING EDGE SWITCH
   - 5#14 FOR PUSHBUTTON STATION
   - 2#14 FOR EACH PHOTOEYE SNESOR
2. ALL WIRING SHALL BE IN CONDUIT.
3. CONTRACTOR SHALL VERIFY EXACT FIELD WIRING REQUIREMENTS WITH ARCHITECT / ENGINEER APPROVED SHOP DRAWINGS.

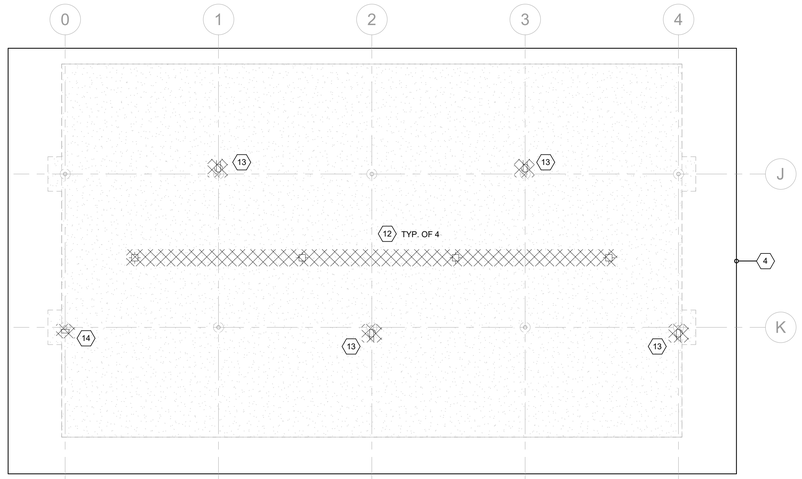
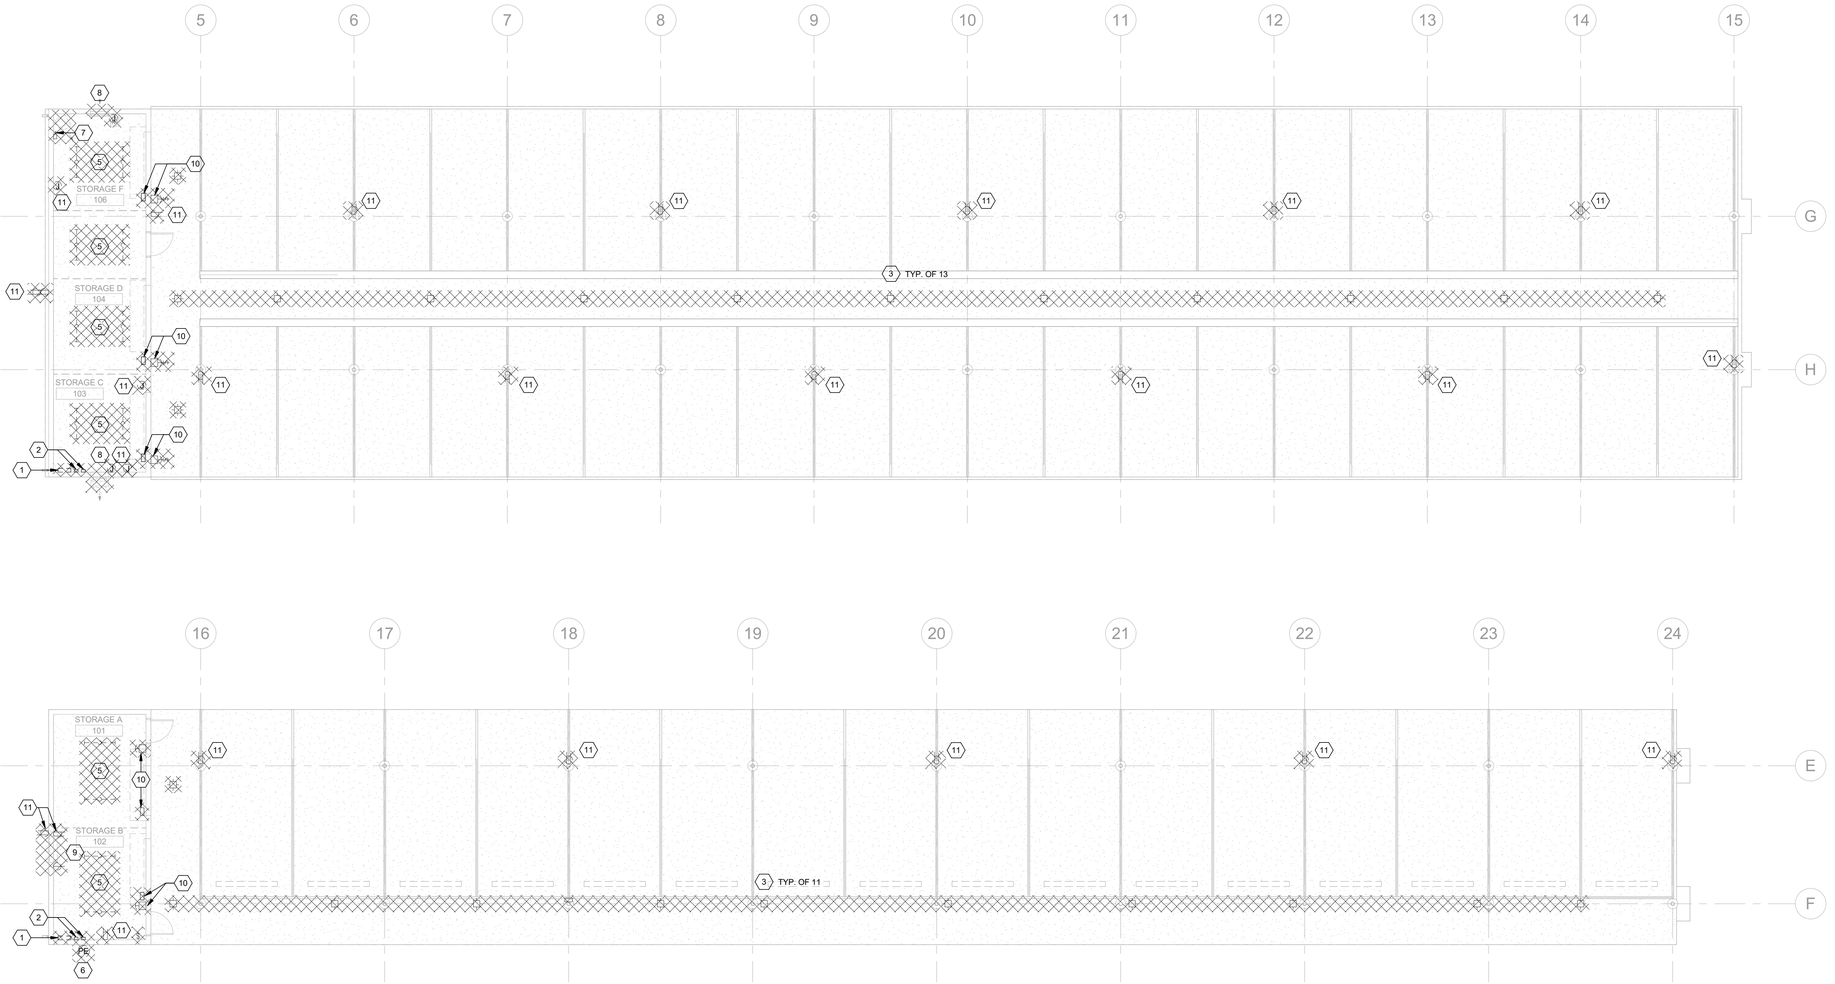
SCALE CHECK: 1 THIS MARK SHOULD MEASURE EXACTLY 1" WHEN PLOTTED

DATE: AUGUST 15, 2025
SCALE: NOT TO SCALE
SHEET NO.: E-601 02

8/13/2025 8:35:03 PM C:\GAF-LFUCG\LFUCG_WORK\Working Drawings\Revit Files\Central Models\LFUCG Exterior (Structures)24725_v23DW20.rvt





GENERAL NOTES:

1	AN EFFORT HAS BEEN MADE TO DOCUMENT MAJOR ELECTRICAL EQUIPMENT / DEVICES FOR REMOVAL; HOWEVER, CONTRACTOR SHALL BE RESPONSIBLE FOR THE COMPLETE DEMOLITION AND PROPER DISPOSAL OF THE INDICATED PANELBOARDS, DISCONNECTS, LIGHTING, LIGHTING CONTROLS, ACCESS CONTROL DEVICES, INTRUSION DETECTION DEVICES, AND ELECTRICAL CONNECTIONS TO HVAC / PLUMBING EQUIPMENT WITHIN THE FACILITY.
2	CONTRACTOR SHALL FIELD VERIFY ALL EXISTING CONDITIONS BEFORE DEMOLITION OF ANY WORK.
3	ALL DEMOLITION WORK SHALL BE COORDINATED WITH ALL OTHER WORK AND EXISTING CONDITIONS TO ASSURE PROPER REMOVAL OF EXISTING ELECTRICAL WORK.
4	WHERE CONDUIT HAS BEEN REMOVED THROUGH AN EXISTING FIRE RATED CONSTRUCTION, THE CONTRACTOR SHALL PROPERLY SEAL UNUSED PENETRATIONS TO MAINTAIN EXISTING FIRE RATINGS.
5	EXISTING CIRCUITS NOT REUSED SHALL BE REMOVED BACK TO THE ASSOCIATED ELECTRICAL PANEL.
6	WHERE DRAWINGS REFERENCE REMOVING CONDUIT / WIRING BACK TO SOURCE, THIS MEANS BACK TO THE LAST REMAINING DEVICE OR PANELBOARD. MAINTAIN ALL CONNECTIONS TO "DEVICES TO REMAIN", WHERE LOCATED "DOWNSTREAM" FROM THE REMOVED DEVICES (THIS SHALL BE FIELD VERIFIED).
7	REFER TO ARCHITECTURAL, MECHANICAL, AND PLUMBING DEMOLITION DRAWINGS (AD, MD, PD SHEETES) FOR PLUMBING AND HVAC EQUIPMENT THAT WILL BE REMOVED AND WILL REQUIRE DISCONNECTION.

SHEET KEYNOTES

1	REMOVE AND PROPERLY DISPOSE OF EXISTING BRANCH PANELBOARD.
2	REMOVE AND PROPERLY DISPOSE OF EXISTING LIGHTING CONTRACTOR AND TIME CLOCK. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
3	REMOVE AND PROPERLY DISPOSE OF EXISTING CANOPY LIGHTING. REMOVE ASSOCIATED CONDUCTORS BACK TO SOURCE. EXISTING CONDUIT MAY BE REUSED TO SERVE NEW CANOPY LIGHTING.
4	AS PART OF BASE BID, THE EXISTING CANOPY SHALL BE DEMOLISHED, CONTRACTOR SHALL REMOVE AND PROPERLY DISPOSE OF ALL ASSOCIATED ELECTRICAL EQUIPMENT/DEVICES.
5	REMOVE AND PROPERLY DISPOSE OF LUMINAIRES AND ASSOCIATED LIGHTING CONTROLS WITHIN THIS SPACE. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
6	REMOVE AND PROPERLY DISPOSE OF EXISTING PHOTO EYE. REMOVE ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
7	DISCONNECT EXISTING HVAC UNIT. CONTRACTOR SHALL REMOVE AND PROPERLY DISPOSE OF EXISTING DISCONNECT SWITCH AND ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
8	DISCONNECT EXISTING HVAC UNIT. CONTRACTOR SHALL REMOVE AND PROPERLY DISPOSE OF ASSOCIATED CONDUIT/WIRING BACK TO SOURCE.
9	DISCONNECT EXISTING HVAC UNIT. CONTRACTOR SHALL REMOVE AND PROPERLY DISPOSE OF ASSOCIATED RECEPTACLE AND CONDUIT/WIRING BACK TO SOURCE.
10	DISCONNECT EXISTING OVERHEAD DOOR OPERATOR. CONTRACTOR SHALL REMOVE AND PROPERLY DISPOSE OF ASSOCIATED DISCONNECT, CONTROLS, AND CONDUIT/WIRING BACK TO SOURCE.
11	REMOVE AND PROPERLY DISPOSE OF EXISTING RECEPTACLE (OR JUNCTION BOX). REMOVE ASSOCIATED CONDUCTORS BACK TO SOURCE. EXISTING CONDUIT MAY BE REUSED TO SERVE NEW RECEPTACLES.
12	AS PART OF ADD ALTERNATE #1, REMOVE AND PROPERLY DISPOSE OF EXISTING CANOPY LIGHTING. REMOVE ASSOCIATED CONDUCTORS BACK TO SOURCE. EXISTING CONDUIT MAY BE REUSED TO SERVE NEW CANOPY LIGHTING.
13	AS PART OF ADD ALTERNATE #1, REMOVE AND PROPERLY DISPOSE OF EXISTING RECEPTACLE (OR JUNCTION BOX). REMOVE ASSOCIATED CONDUCTORS BACK TO SOURCE. EXISTING CONDUIT MAY BE REUSED TO SERVE NEW RECEPTACLES.
14	AS PART OF ADD ALTERNATE #1, REMOVE AND PROPERLY DISPOSE OF EXISTING LOAD CENTER. REMOVE ASSOCIATED CONDUCTORS BACK TO SOURCE. REMOVE EXPOSED CONDUIT NOT REUSED FOR NEW CANOPY LIGHTING OR RECEPTACLES.

1 FIRST LEVEL - POWER PLAN

SCALE: 1/8" = 1'-0"

PLAN NORTH

GENERAL NOTES:

1	REFER TO ONE-LINE DIAGRAMS (AND/OR PANELBOARD SCHEDULES) FOR CONDUIT/CONDUCTOR SIZES FOR BRANCH PANELBOARD FEEDERS AND INDICATED BRANCH CIRCUITS.
2	INDIVIDUAL HOMERUNS HAVE BEEN SHOWN FOR EACH CIRCUIT FOR CLARITY. CONTRACTOR MAY CHOOSE TO COMBINE UP TO THREE (3) 20A/120V BRANCH CIRCUITS IN A COMMON CONDUIT WITHOUT UPSIZING CONDUCTORS. EACH CIRCUIT SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR-CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.
3	COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.

SHEET KEYNOTES

1	NEW BRANCH PANELBOARD SR1 (100A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
2	NEW BRANCH PANELBOARD SR2 (200A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
3	NEW BRANCH PANELBOARD SR1 ELECTRICAL FEEDER. REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-601.
4	NEW BRANCH PANELBOARD SR2 ELECTRICAL FEEDER. REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-601.
5	PROVIDE 3/4" X 10' COPPER GROUND RODS IN TRIAD CONFIGURATION, MINIMUM 10' APART.
6	BARE #6 COPPER GROUNDING ELECTRODE CONDUCTOR - EXTEND FROM PANELBOARD SR1 TO GROUNDING TRIAD.
7	BARE #4 COPPER GROUNDING ELECTRODE CONDUCTOR - EXTEND FROM PANELBOARD SR2 TO GROUNDING TRIAD.
8	PROVIDE MANUAL MOTOR STARTER FOR THE NEW OVERHEAD DOOR OPERATOR. PROVIDE CONNECTION TO OVERHEAD DOOR CONTROLLER, AS REQUIRED. COORDINATE WITH OVERHEAD DOOR INSTALLER. REFER TO FIELD CONNECTION DETAIL 5 ON SHEET E-501 FOR ADDITIONAL INFORMATION.
9	UP/DOWN/STOP PUSHBUTTON FOR OVERHEAD DOOR. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
10	PROVIDE CONNECTION TO OVERHEAD DOOR SAFETY BEAM PHOTO SENSOR. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
11	PROVIDE CONNECTION TO OVERHEAD DOOR SENSING EDGE. PROVIDE CONDUIT/WIRING BACK TO OVERHEAD DOOR CONTROLLER, AS REQUIRED.
12	MOUNT RECEPTACLES WITHIN THIS SPACE AT 46"AFF.
13	ROUTE THE 120V CIRCUIT SERVING THE EXHAUST FAN THROUGH A N.O. CONTACT ON THE FACTORY MOUNTED DAMPER CONTROL TRANFORMER INTEGRAL TO THE ASSOCIATED EXHAUST FAN AND PROVIDE CONNECTION TO THE MOTORIZED DAMPER.
14	PROVIDE JUNCTION BOX MOUNTED ON COLUMN ABOVE CONCRETE BASE. PROVIDE ONE BLOCK HEATER RECEPTACLE DROP. REFER TO DETAIL 6, SHEET E-501.
15	PROVIDE JUNCTION BOX MOUNTED ON COLUMN ABOVE CONCRETE BASE. PROVIDE TWO BLOCK HEATER RECEPTACLE DROPS. REFER TO DETAIL 6, SHEET E-501.

1	NEW BRANCH PANELBOARD SR1 ELECTRICAL FEEDER. REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-601.
2	NEW BRANCH PANELBOARD SR2 ELECTRICAL FEEDER. REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-601.
3	NEW BRANCH PANELBOARD SR3 (60A MCB, 208Y/120V, 3-PHASE, 4-WIRE).
4	NEW BRANCH PANELBOARD SR3 ELECTRICAL FEEDER. REFER TO CONDUIT/CONDUCTOR INFORMATION ON SHEET E-601.
5	PROVIDE 3/4" X 10' COPPER GROUND RODS IN TRIAD CONFIGURATION, MINIMUM 10' APART.
6	BARE #8 COPPER GROUNDING ELECTRODE CONDUCTOR - EXTEND FROM PANELBOARD SR3 TO GROUNDING TRIAD.
7	MOUNT CANOPY RECEPTACLES ON COLUMN ABOVE CONCRETE BASE
8	MOUNT RECEPTACLE IN TELECOMMUNICATIONS CABINET.

1 FIRST LEVEL - SECURITY PLAN

SCALE: 1/8" = 1'-0"

PLAN NORTH

GENERAL NOTES:

1	UNLESS OTHERWISE NOTED, SECURITY EQUIPMENT AND DEVICES WILL BE PROVIDED AS PART OF A SEPARATE CONTRACT. CONTRACTOR SHALL PROVIDE AND INSTALL ALL ASSOCIATED CONDUIT, BACKBOXES, CABLING, CABLING TERMINATIONS, AND PATCH PANELS.
2	ALL ACCESS CONTROL SYSTEM AND VIDEO SURVEILLANCE SYSTEM CABLING SHALL BE INSTALLED IN CONDUIT.
3	REFER TO ACCESS CONTROL SYSTEM AND VIDEO SURVEILLANCE SYSTEM RISER DIAGRAMS ON SHEET EY601 AND EY602 FOR ADDITIONAL REQUIREMENTS.
4	COORDINATE WITH DOOR HARDWARE INSTALLER FOR ALL REQUIRED ACCESS CONTROL SYSTEM CONNECTIONS AND ROUGH-IN REQUIREMENTS.
5	LOCATE ALL EXISTING UNDERGROUND UTILITIES FOR UNDERGROUND WORK PRIOR TO EXCAVATION OR TRENCHING. HAND DIG WITHIN 10' OF UTILITY CROSSING.
6	MINIMUM BURY FOR SITE CONDUITS SHALL BE 24", UNLESS OTHERWISE NOTED. CONTRACTOR IS RESPONSIBLE FOR ALL SITE TRENCHING, BACKFILL, AND CONCRETE ENCASEMENT.

SHEET KEYNOTES

1	ACCESS CONTROL PANEL AND POWER SUPPLY.
2	SINGLE DOOR WITH ELECTRIC STRIKE. PROVIDE CONDUIT/WIRING BACK TO POWER SUPPLY AND ACCESS CONTROL PANEL. REFER TO DETAIL 2, SHEET TY601.
3	PROVIDE CAT 6, 1"C FROM CAMERA LOCATION TO NEMA 4 ENCLOSURE AT COLUMN E18 AND EXTEND TO TELECOMMUNICATIONS EQUIPMENT CABINET (PRE-MANF. STORAGE UNIT 102 - "LFUCG VACTOR BUILDING" - SHEET EY101 03).
4	PROVIDE CAT 6, 1" C FROM ACCESS CONTROL PANEL TO TELECOMMUNICATIONS EQUIPMENT CABINET (PRE-MANF. STORAGE UNIT 102 - "LFUCG VACTOR BUILDING" - SHEET EY101 03).
5	PROVIDE 1-1/2"C FROM NEMA 4 ENCLOSURE AT STORAGE BUILDING TO TELECOMMUNICATIONS EQUIPMENT CABINET (PRE-MAN. STORAGE UNIT 102 - "LFUCG VACTOR BUILDING" - SHEET EY101 03). USE FOR CAT 6 CABLES ASSOCIATED WITH CAMERAS.
6	PROVIDE CAT 6, 1"C FROM CAMERA LOCATION TO NEMA 4 ENCLOSURE AT COLUMN G8 AND EXTEND TO TELECOMMUNICATIONS EQUIPMENT CABINET (PRE-MANF. STORAGE UNIT 102 - "LFUCG VACTOR BUILDING" - SHEET EY101 03).
7	PROVIDE TWO (2) 1-1/2" CONDUITS FOR ACCESS CONTROL CABLING REQUIRED FROM PUMP STATION STORAGE TO ACCESS CONTROL PANEL (SM STORAGE E 105).
8	LB CONDUIT INTO BUILDING. PATCH/SEAL CONDUIT PENETRATION OF EXTERIOR WALL.
9	PROVIDE PULLBOX FOR ACCESS CONTROL CONDUITS.
10	PROVIDE NEMA 4 ENCLOSURE ON COLUMN FOR CAMERA CABLING.
11	PROVIDE 1-1/2" CONDUIT W/ PULL STRING FROM THE EXTERIOR STRUCTURES TO THE "LFUCG VACTOR BUILDING" (SHEET EY101 03) FOR BAS CABLING. CABLING BY THE CONTROLS CONTRACTOR
12	PROVIDE 1-1/2" CONDUIT W/ PULL STRING BETWEEN EXTERIOR STRUCTURES FOR BAS CABLING. CABLING BY THE CONTROLS CONTRACTOR.
13	PROVIDE PULLBOX FOR BAS CONDUIT.
14	TELECOMMUNICATIONS PLYWOOD BACKBOARD RIGIDLY ATTACHED TO WALL. PLYWOOD SHALL BE FIRE-RATED AND TIA/EIA APPROVED.

ADD ALTERNATE #1

1	ADD ALTERNATE #1 WILL REQUIRE THE WORK SHOWN ON THE BASE BID DRAWING (SHEET EY101) AND THE ADDITIONAL WORK SHOWN ON THIS SHEET FOR THE THIRD CANOPY. THIS SHEET INCLUDES UTILIZING OPTICAL FIBER TO A TELECOMMUNICATIONS EQUIPMENT CABINET (CAMERAS AND ACCESS CONTROL) AND ALTERNATE ROUTING OF BAS CONDUITS BACK TO THE "LFUCG VACTOR BUILDING".

GENERAL NOTES:

1	UNLESS OTHERWISE NOTED, SECURITY EQUIPMENT AND DEVICES WILL BE PROVIDED AS PART OF A SEPARATE CONTRACT. CONTRACTOR SHALL PROVIDE AND INSTALL ALL ASSOCIATED CONDUIT, BACKBOXES, CABLING, CABLING TERMINATIONS, AND PATCH PANELS.
2	ALL ACCESS CONTROL SYSTEM AND VIDEO SURVEILLANCE SYSTEM CABLING SHALL BE INSTALLED IN CONDUIT.

SHEET KEYNOTES

1	WALL-MOUNTED TELECOMMUNICATIONS EQUIPMENT CABINET. REFER TO SHEET EY603 AND DIVISION 27 SPECIFICATIONS FOR ADDITIONAL INFORMATION.
2	PROVIDE CAT 6, 1"C FROM ACCESS CONTROL PANEL TO TELECOMMUNICATIONS EQUIPMENT CABINET.
3	PROVIDE 2" CONDUIT WITH 12-STRAND SINGLEMODE (OS2) OPTICAL FIBER FROM TELECOMMUNICATIONS EQUIPMENT CABINET TO THE TELECOMMUNICATIONS EQUIPMENT CABINET (PRE-MANF. STORAGE UNIT 102 - "LFUCG VACTOR BUILDING" - SHEET EY101 03).
4	PROVIDE 1-1/2"C FROM NEMA 4 ENCLOSURE IN PS STORAGE A 101 TO TELECOMMUNICATIONS EQUIPMENT CABINET (SM STORAGE E 105). USE FOR CAT 6 CABLES SERVING CAMERAS AT PUMP STATION STORAGE.
5	PROVIDE CAT 6, 1"C FROM CAMERA LOCATION TO TELECOMMUNICATIONS EQUIPMENT CABINET (SM STORAGE E 105).
6	PROVIDE CAT 6, 1"C FROM CAMERA LOCATION TO NEMA 4 ENCLOSURE IN PS STORAGE 101 AND EXTEND TO TELECOMMUNICATIONS EQUIPMENT CABINET (SM STORAGE E 105).
7	PROVIDE TWO (2) 1-1/2" CONDUITS FOR ACCESS CONTROL CABLING REQUIRED FROM PUMP STATION STORAGE TO ACCESS CONTROL PANEL (SM STORAGE E 105).
8	LB CONDUIT INTO BUILDING. PATCH/SEAL CONDUIT PENETRATION OF EXTERIOR WALL.
9	PROVIDE PULLBOX FOR ACCESS CONTROL CONDUITS.
10	PROVIDE 1-1/2" CONDUIT W/ PULL STRING FROM THE EXTERIOR STRUCTURES TO THE VACTOR BUILDING (SHEET EY102 03) FOR BAS CABLING. CABLING BY THE CONTROLS CONTRACTOR.
11	PROVIDE 1-1/2" CONDUIT W/ PULL STRING BETWEEN EXTERIOR STRUCTURES FOR BAS CABLING. CABLING BY THE CONTROLS CONTRACTOR.
12	PROVIDE PULLBOX FOR BAS CONDUIT.
13	PROVIDE CAT 6, 1"C FROM CAMERA LOCATION TO NEMA 4 ENCLOSURE AT COLUMN K9 AND EXTEND TO TELECOMMUNICATIONS EQUIPMENT CABINET (SM STORAGE E 105).
14	PROVIDE NEMA 4 ENCLOSURE ON COLUMN FOR CAMERA CABLING.
15	PROVIDE 1-1/2"C FROM NEMA 4 ENCLOSURE AT THE THIRD CANOPY STRUCTURE TO TELECOMMUNICATIONS EQUIPMENT CABINET (SM STORAGE E 105). USE FOR CAT 6 CABLES SERVING CAMERAS AT THIRD STRUCTURE.
16	PROVIDE NEMA 4 ENCLOSURE IN STORAGE ROOM FOR CAMERA CABLING.
17	PROVIDE #6 AWG (MIN.) GROUND FROM TMGB TO GROUNDING ELECTRODE CONDUCTOR (SHEET EP101 02).

GENERAL NOTES:

1. ACCESS CONTROL EQUIPMENT/DEVICES (ACCESS CONTROL PANELS, CARD READERS, BALANCED MAGNETIC SWITCHES, REX PUSHBUTTONS, REX MOTION SENSORS, AND ASSOCIATED POWER SUPPLIES) SHALL BE PROVIDED BY THE OWNER VIA A SEPARATE CONTRACT. CONTRACTOR SHALL BE RESPONSIBLE FOR INSTALLATION OF THE ACCESS CONTROL EQUIPMENT/DEVICES AND SHALL PROVIDE AND INSTALL ALL ASSOCAITED CONDUIT, BACKBOXES, CABLING, CABLING TERMINATIONS AND PATCH PANELS.
2. ACTUAL WIRING CONFIGURATION AND TYPE/SIZE OF CONDUCTORS SHALL BE AS RECOMMENDED BY THE ACS MANUFACTURER/SUPPLIER WITHIN MINIMUM REQUIREMENTS STATED IN SPECIFICATIONS. CONTRACTOR SHALL COORDINATE WITH THE ACCESS CONTROL SYSTEM MANUFACTURER/SUPPLIER FOR REQUIREMENTS.
3. ACS COMPONENTS SHOWN CONSTITUTE THE TYPE, PRODUCT QUALITY, MATERIAL AND DESIRED OPERATING FEATURES REQUIRED. CONTRACTOR SHALL COORDINATE WITH THE ACCESS CONTROL SYSTEM MANUFACTURER/SUPPLIER FOR ANY ADDITIONAL REQUIREMENTS.
4. REFER TO ARCHITECTURAL DRAWINGS AND SPECIFICATIONS FOR ADDITIONAL INFORMATION RELATING TO ELECTRIFIED DOOR HARDWARE. EXIT DEVICES, ELECTRIC LOCKS, LATCHBOLT/DOOR STATUS SWITCHES, POWER SUPPLIES, ETC. ARE FURNISHED AND INSTALLED BY THE DOOR HARDWARE CONTRACTOR. WIRING FROM ELECTRIFIED DOOR HARDWARE WILL BE INSTALLED COMPLETE TO JUNCTION BOX LOCATED ABOVE CEILING. CONTRACTOR SHALL PROVIDE ALL OTHER REQUIRED CONNECTIONS.
6. ACS MANUFACTURER/SUPPLIER SHALL INTEGRATE THE NEW ACS CONTROLLERS AND FIELD DEVICES INTO THE OWNER'S EXISTING SECURITY NETWORK AS REQUIRED FOR ALL MONITORING, CONTROLLING, PROGRAMMING AND SERVICE.
7. CATEGORY 6, UNSHIELDED TWISTED PAIR (UTP) WITH OVERALL PURPLE JACKET. TERMINATE ALL ENDS WITH A RJ45 MODULAR PLUG USING THE TIA/EIA 568B COLOR CODING STANDARD.
8. TERMINATE SECURITY HORIZONTAL CABLING AT A DEDICATED SECURITY NETWORK PATCH PANEL. BASE BID - REFER TO TELECOMMUNICATIONS RISER DIAGRAM - VACTOR BUILDING, SHEET ET503.

SHEET NUMBERING

AE101-R1

- LEVEL ONE DISCIPLINE:
  - C - CIVIL
  - L - LANDSCAPE
  - A - ARCHITECTURE
  - M - MECHANICAL
  - E - ELECTRICAL
  - P - PLUMBING
  - S - STRUCTURAL
  - K - FOOD SERVICE
- LEVEL TWO DISCIPLINE: IF USED
- SHEET TYPE DESIGNATOR:
  - 0 - GENERAL
  - 1 - PLANS
  - 2 - ELEVATIONS
  - 3 - SECTIONS
  - 4 - LARGE SCALE VIEWS
  - 5 - DETAILS
  - 6 - SCHEDULES AND DIAGRAMS
  - 7 - USER DEFINED
  - 8 - USER DEFINED
  - 9 - 3D REPRESENTATIONS
- REVISION SEQUENCE NUMBER
- REVISION TYPE:
  - R - PARTIALLY REVISED SHEET
  - X - TOTALLY REVISED SHEET
- SHEET SEQUENCE NUMBER

LEGEND

MATERIALS

- CONCRETE/ PRECAST CONCRETE
- SOIL
- SAND, EIFS FINISH COAT, OR CEMENT PLASTER
- BRICK
- CMU
- STONE
- FIBERGLASS BATT INSULATION
- FIBERGLASS SEMI RIGID INSULATION
- MINERAL WOOL SEMI RIGID INSULATION
- EXPANDED POLYSTYRENE RIGID INSULATION
- EXTRUDED POLYSTYRENE RIGID INSULATION
- POLYISOCYANURATE RIGID INSULATION
- GYPSUM BOARD
- EXTERIOR GYPSUM SHEATHING
- EXTERIOR CEMENT BOARD
- COATED GLASS MAT WATER RESISTANT GYP BD
- PLYWOOD
- COVER BOARD

FIRE RATED WALL SYMBOLS:

- 1 HR FIRE
- 2 HR FIRE
- 3 HR FIRE
- 4 HR FIRE
- S 1 HR FIRE/SMOKE WALL
- S 2 HR FIRE/SMOKE WALL
- S 3 HR FIRE/SMOKE WALL
- S 4 HR FIRE/SMOKE WALL

ANNOTATION CALLOUTS/DRAWING SYMBOLS

- 1 / Ref / A101 — INTERIOR ELEVATION; PLATE NUMBER WHERE SECTION/DETAIL IS DRAWN
- 1 / Ref / A101 — EXTERIOR ELEVATION; PLATE NUMBER WHERE SECTION/DETAIL IS DRAWN
- 1 / SIM / A101 — SECTION; PLATE NUMBER WHERE SECTION/DETAIL IS DRAWN
- 1 / SIM / A-101 — PLAN, BLOW-UP DETAIL; PLATE NUMBER WHERE SECTION/DETAIL IS DRAWN
- SPOT ELEVATION
- Name / Elevation — FLOOR LEVEL & NAME
- 1 — SHEET KEYNOTE

Room name
101 — ROOM NAME/NUMBER

- 01 — WINDOW TYPE
- 1| — WALL TYPE
- 0 — GRID / COLUMN LINE DESIGNATOR
- 1i — EQUIPMENT NUMBER
- 101 — DOOR NUMBER
- 1 — REVISION TAG

PLAN NORTH — NORTH ARROW w/ TRUE NORTH INDICATION

Room
Rm_Occupancy
101 — ROOM OCCUPANCY & AREA
150 SF

EGRESS :Egress_ID
Egress_Length — EGRESS ROUTE ID AND SECTION LENGTH

CEILING SYMBOLS

- 2' x 2' ACT CEILING
- 4' x 4' ACT CEILING
- 1' x 1' ACT CEILING
- GYP. BD. CEILING
- 2 X 4 LIGHT FIXTURE
- RETURN AIR GRILLE
- SUPPLY AIR GRILLE
- EXHAUST AIR GRILLE
- EXIT LIGHT
- 2 x 2 LIGHT FIXTURE
- SUSP. FLUORESCENT LIGHT

BUILDING SUMMARY

PROJECT INFORMATION

PROJECT NAME: LFUCG DWQ HEADQUARTERS & OPERATIONS FACILITY
ADDRESS: 130 WEST NEW CIRCLE ROAD, LEXINGTON KY 40505
USE GROUP: S-1
OWNER-CONTACT PERSON: RICHARD DUGAS

APPLICABLE CODES

2018 - KENTUCKY BUILDING CODE (BASED ON THE 2015 INTERNATIONAL BUILDING CODE)
2015 - INTERNATIONAL MECHANICAL CODE
2012 - NFPA 54 NATIONAL FUEL GAS CODE
2009 - ICC/ANSI A117.1 - ACCESSIBLE AND USABLE BUILDINGS AND FACILITIES
2012 - NFPA 1 FIRE PREVENTION CODE (AS DIRECTED BY 815 KAR 10:60 KENTUCKY STANDARDS OF SAFETY)
2012 - INTERNATIONAL ENERGY CONSERVATION CODE - (FOR USE WITH THE KBC ONLY)
2009 - INTERNATIONAL ENERGY CONSERVATION CODE - (FOR USE WITH THE KRC ONLY)
2013 - KENTUCKY RESIDENTIAL CODE (BASED ON THE 2012 INTERNATIONAL RESIDENTIAL CODE)
0000 - KENTUCKY STATE PLUMBING LAW, REGULATIONS & CODE (815 KAR CHAPTER 20)
0000 - STATE BOILER REGULATIONS (KRS 236, 815 KAR 15)
2017 - NFPA 70 NATIONAL ELECTRICAL CODE
2015 - INTERNATIONAL FIRE CODE (IFC) (NEW CONSTRUCTION PROJECTS, ONLY BY THE BODY OF KBC.)
2012 - NFPA 101 LIFE SAFETY CODE (HEALTH CARE FACILITIES)
