

PART III

Invitation to Bid No. 44-2013

2013 SANITARY SEWER CLEANING PROGRAM

1. FORM OF PROPOSAL

Place: Lexington, Kentucky

Date: 4/18/13

The following Form of Proposal shall be followed exactly in submitting a proposal for this Work.

This Proposal Submitted by ROBINSON PIPE CLEANING COMPANY

3330 CAMP GROUND ROAD, LOUISVILLE, KY 40211

(Name and Address of Bidding Contractor)

(Hereinafter called "Bidder"), organized and existing under the laws of the State of PENNSYLVANIA, doing business as A CORPORATION
"a corporation," "a partnership", or an "individual" as applicable.

To: Lexington-Fayette Urban County Government
(Hereinafter called "OWNER")
Office of the Director of Purchasing
200 East Main Street, 3rd Floor
Lexington, KY 40507

Gentlemen:

The Bidder, in compliance with your Invitation for Bids for the **2013 SANITARY SEWER CLEANING PROGRAM** having examined the Plans and Specifications with related documents, having examined the site for proposed Work, and being familiar with all of the conditions surrounding the construction of the proposed Project, including the availability of materials and labor, hereby proposes to furnish all labor, materials, and supplies, and to construct the Project in accordance with the Contract Documents, within the time set forth therein, and at the lump sum and/or unit prices stated hereinafter. These prices are to cover all expenses incurred in performing the Work required under the Contract Documents, of which this proposal is a part. The OWNER will issue work orders for work to be performed under this Contract.

BIDDER hereby agrees to commence work under this contract on or before a date to be specified in the Notice to Proceed and to fully complete the project within the time provided in the Purchase Order or Work Orders issued by the OWNER. BIDDER further agrees to pay liquidated damages, the sum of \$400.00 for each consecutive calendar day thereafter.

The Bidder hereby acknowledges receipt of the following addenda:

Addendum No. 1 Date 4/15/13

Addendum No. 2 Date 4/16/13

Addendum No. Date

Addendum No. Date

Addendum No. Date

Addendum No. Date

Addendum No. Date

ADDENDUM #1

Bid Number: **44-2013**

Date: April 15, 2013

Subject: **2013 Sanitary Sewer Cleaning Program**

Please address inquiries to:
Betty Landrum (859) 258-3320

TO ALL PROSPECTIVE BIDDERS:

Please be advised of the following clarifications to the above referenced bid:

- 1.) See Attached REVISED Risk Management Provisions that replace the ones shown in Part V of the original spec book (pages SC-2 – SC-5)
- 2.) Please note that the Bid Bond and Performance & Payment Bond requirements have been REMOVED from this bid.

Questions	Answers
Will lateral launch be required?	NO
Please provide the maps of the sewer sheds that will be part of this contract.	<p>The contract award will be given the actual maps (as in other contracts). The inspection areas are Cane Run & North Elkhorn, see the following:</p> <p><u>Cane Run</u> – 210,000 (8-12") 15,792 (15-24") 5,012 (27-36") PVC – 27% VCP – 73%</p> <p><u>North Elkhorn</u> – 175,186 (8-12") 8,371 (15-24") 0 (27-36") PVC – 76% VCP – 24%</p> <p><u>TOTAL</u> – 385,186 (8-12") 24,163 (15-24") 5,012 (27-36")</p>

	GRAND TOTAL ----- 414,361
Please define the conditions under which heavy cleaning will be required and authorized, e.g. "after 3 passes with a jetter, etc."	Heavy Cleaning could be authorized after ALL attempts within Section 2.01, Section B. are satisfied.
Please clarify the extent of the manhole inspection that must be completed.	At the start of an inspection, the camera should pan/tilt upwards towards the manhole opening. This should be done at the end of inspection. Also, all defects should be listed as (MGO).
There is conflicting language about the extent to which roots must be removed. One section states that all roots must be removed and another section states that the line must be restored to 95% hydraulic capacity. Please clarify.	PACP recommends & LFUCG requires that 95% of the pipe needs to be clean, including root removal to that level.
Please confirm that data will be uploaded into LFUCG's software on a monthly basis and that retainage will not be withheld until an entire sewer shed is uploaded.	Per our Database Administrator, uploading will take place once an entire sewer shed is completed. Ergo, the retainage will hold until confirmation.
Please reference KRS 371.410 regarding the maximum allowable retainage on a construction contract. http://www.lrc.ky.gov/krs/371-00/410.PDF	Since this contract is NOT actually considered construction and the accuracy and compatibility of the data is the driving force, it is recommended that the current rate of retainage remain "as is".
Please clarify if the contract deadline is for successful upload of data into LFUCG's software or for physical completion of inspection work.	Successful upload of data

Todd Slatin, Director
Division of Central Purchasing

All other terms and conditions of the Bid and specifications are unchanged. This letter should be signed, attached to and become a part of your Bid.

ADDENDUM #2

Bid Number: **44-2013**

Date: April 16, 2013

Subject: **2013 Sanitary Sewer Cleaning Program**

Please address inquiries to:
Betty Landrum (859) 258-3320

TO ALL PROSPECTIVE BIDDERS:

Please be advised of the following clarifications to the above referenced bid:

Pages GC-41 – 42 - The maximum allowable retainage withheld has been changed to 10%; therefore the correct language for the section is to read as follows:

Monthly progress payments shall be ninety (90%) percent of the sum obtained by applying the respective bid unit prices to the approved estimated quantities of work completed by the Contractor during the preceding month. The remaining ten (10%) percent will be held by the Owner, as retainage.

Todd Slatin, Director
Division of Central Purchasing

All other terms and conditions of the Bid and specifications are unchanged. This letter should be signed, attached to and become a part of your Bid.

CHRIS TROBY on this the 18th day of April, 2013.

My Commission expires: _____

Lisa M Lombardo
NOTARY PUBLIC, STATE AT LARGE

4. BID SCHEDULE – SCHEDULE OF VALUES

The Bidder agrees to perform all the Work described in the Specifications and shown on the Plans for the following proposed lump sum and/or unit prices, if applicable, which shall include the furnishing of all labor, materials, supplies, equipment and/or vehicle usage, services, all items of cost, overhead, taxes (federal, state, local), and profit for the Contractor and any Subcontractor involved, within the time set forth herein. If unit prices are applicable, Bidder must make the extensions and additions showing the total amount of bid.

The contract, if awarded, will be on the basis of materials and equipment specified in the specifications without consideration of possible substitute or “or equal” items.

The estimated quantities of items of unit price work are not guaranteed and are solely for the purpose of comparison of bids and determining an initial Contract price. Determination of the actual quantities and classification of unit price work performed by the Contractor will be made by the Engineer in accordance with the General Conditions.

All Bidders must submit Bid prices for all items below, to be considered.

Sewer Line Investigation Work

11. LFUCG STATEMENT OF GOOD FAITH EFFORTS

Bid Reference # 44-2013

By the signature below of an authorized company representative, we certify that we have utilized the following methods to obtain the maximum practicable participation by minority and women owned business enterprises on the project. Please indicate which methods you used by placing an X in the appropriate place.

- Attended LFUCG Central Purchasing Economic Inclusion Outreach Event
- Sponsored Economic Inclusion event to provide networking opportunities
- Requested a list of MBE/WBE subcontractors or suppliers from LFUCG Economic Engine
- Advertised for MBE/WBE subcontractors or suppliers in local or regional newspapers
- Showed evidence of written notice of contracting and/or supplier opportunities to MBE/WBE firms at least seven days prior to the bid opening date
- Provided copies of quotations submitted by MBE/WBE firms which were not used and/or responses from firms indicating they would not be submitting a quote
- Provided plans, specifications, and requirements to interested MBE/WBE subcontractors
- Other
Please list any other methods utilized that aren't covered above.

The undersigned acknowledges that all information is accurate. Any misrepresentations may result termination of the contract and/or be subject to applicable Federal and State laws concerning false statements and claims.

TITLE: VICE PRESIDENT

* Include all officers, office management's, Affirmative Action officials, and field management personnel. (Attach separate sheets if necessary.)

14. EQUAL OPPORTUNITY AGREEMENT

The Law

- * Title VII of the Civil Rights Act of 1964 (amended 1972) states that it is unlawful for an employer to discriminate in employment because of race, color, religion, sex, age (40-70 years) or national origin.
- * Executive Order No. 11246 on Nondiscrimination under Federal contract prohibits employment discrimination by contractor and subcontractor doing business with the Federal Government or recipients of Federal funds. This order was later amended by Executive Order No. 11375 to prohibit discrimination on the basis of sex.
- * Section 503 of the Rehabilitation Act of 1973 States:
The Contractor will not discriminate against any employee or applicant for employment because of physical or mental handicap.
- * Section 2012 of the Vietnam Era Veterans Readjustment Act of 1973 requires Affirmative Action on behalf of disabled veterans and veterans of the Vietnam Era by contractors having Federal Contracts.
- * Section 206 (A) of Executive Order 12086, Consolidation of Contract Compliance Functions for Equal Employment Opportunity, states:
The Secretary of Labor may investigate the employment practices of any Government contractor or sub-contractor to determine whether or not the contractual provisions specified in Section 202 of this order have been violated.

The Lexington-Fayette Urban County Government practices Equal Opportunity in recruiting, hiring and promoting. It is the Government's intent to affirmatively provide employment opportunities for those individuals who have previously not been allowed to enter into the mainstream of society. Because of its importance to the local Government, this policy carries the full endorsement of the Mayor, Commissioners, Directors, and all supervisory personnel. In following this commitment to Equal Employment Opportunity and because the Government is the benefactor of the Federal funds, it is both against the Urban County Government policy and illegal for the Government to let contracts to companies which knowingly or unknowingly practice discrimination in their employment practices. Violation of the above mentioned ordinances may cause a contract to be canceled and the contractor may be declared ineligible for future consideration.

Please sign this statement in the appropriate space acknowledging that you have read and understand the provisions contained herein. Return this document as part of your application packet.

Bidders

I/We agree to comply with the Civil Rights Laws listed above that govern employment rights of minorities, women, Vietnam veterans, handicapped, and aged persons.

Signature CHRIS TRUBY,
VICE PRESIDENT

ROBINSON PIPE CLEANING COMPANY
Name of Business

The Entity (regardless of whether construction contractor, non-construction contractor or supplier) agrees to provide equal opportunity in employment for all qualified persons, to prohibit discrimination in employment because of race, color, creed, national origin, sex or age, and to promote equal employment through a positive, continuing program from itself and each of its sub-contracting agents. This program of equal employment opportunity shall apply to every aspect of its employment policies and practices.

The Kentucky equal Employment Opportunity Act of 1978 (KRS 45.560-45.640) requires that any count, city, town, school district, water district, hospital district, or other political subdivision of the state shall include in directly or indirectly publicly funded contracts for supplies, materials, services, or equipment hereinafter entered into the following provisions:

During the performance of this contract, the contractor agrees as follows:

- (1) *The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, age or national origin;*
- (2) *The contractor will state in all solicitations or advertisements for employees placed by or on behalf of the contractors that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, age or national origin;*
- (3) *The contract will post notices in conspicuous places, available to employees and applicants for employment, setting forth the provisions of the non-discrimination clauses required by this section; and*
- (4) *The contractor will send a notice to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding advising the labor union or workers' representative of the contractor's commitments under the nondiscrimination clauses.*

The Act further provides:

KRS 45.610. Hiring minorities – Information required

- (1) *For the length of the contract, each contractor shall hire minorities from other sources within the drawing area, should the union with which he has collective bargaining agreements be unwilling to supply sufficient minorities to satisfy the agreed upon goals and timetable.*
- (2) *Each contractor shall, for the length of the contract, furnish such information as required by KRS 45.560 to KRS 45.640 and by such rules, regulations and orders issued pursuant thereto and will permit access to all books and records pertaining to his employment practices and work sites by the contracting agency and the department for purposes of investigation to ascertain compliance with KRS 45.560 to 45.640 and such rules, regulations and orders issued pursuant thereto.*

KRS 45.620. Action against contractor – Hiring of minority contractor or subcontractor

- (1) *If any contractor is found by the department to have engaged in an unlawful practice under this chapter during the course of performing under a contract or subcontract covered under KRS 45.560 to 45.640, the department shall so certify to the contracting agency and such certification shall be binding upon the contracting agency unless it is reversed in the course of judicial review.*
- (2) *If the contractor is found to have committed an unlawful practice under KRS 45.560 to 45.640, the contracting agency may cancel or terminate the contract, conditioned upon a program for future compliance approved by the contracting agency and the department. The contracting agency may declare such a contractor ineligible to bid on further contracts with that agency until such time as the contractor complies in full with the requirements of KRS 45.560 – 45.640.*
- (3) *The equal employment provisions of KRS 45.560 to 45.640 may be met in part by a contractor by subcontracting to a minority contractor or subcontractor. For the provisions of KRS 45.560 to 45.640, a minority contractor or subcontractor shall mean a business that is owned and controlled by one or more persons disadvantaged by racial or ethnic circumstances.*

KRS 45.630 Termination of existing employee not required, when

Any provision of KRS 45.560 to 45.640 notwithstanding, no contractor shall be required to terminate an existing employee upon proof that that employee was employed prior to the date of the contract.

KRS 45.640 Minimum skills

Nothing in KRS 45.560 to 45.640 shall require a contractor to hire anyone who fails to demonstrate the minimum skills required to perform a particular job.

It is recommended that all of the provisions quoted above to be included as special conditions in each contract. In the case of a contract exceeding \$250,000, the contractor is required to furnish evidence that his work-force in Kentucky is representative of the available work-force in the area from which he draws employees, or to supply an Affirmative Action plan which will achieve such representation during the life of the contract.

15. EQUAL EMPLOYMENT OPPORTUNITY AFFIRMATIVE ACTION POLICY

It is the policy of ROBINSON PIPE CLEANING COMPANY
to assure that all applicants for employment and all employees are treated on a fair and equitable basis without regard to their race, religion, sex, color, handicap, natural origin or age.

Such action shall include employment, promotion, demotion, recruitment or recruitment advertising, layoff or termination, rates of pay and other forms of compensation, and selection for training, whether apprenticeship and/or on-the-job-training.

Furthermore, this company agrees to make special recruitment efforts to hire the protected class whenever feasible. This company also agrees to adhere to all applicable federal, state, and local laws relating to Equal Employment Opportunity for all individuals.

Bid No. 44-2013**

Carylon Corporation
The Environmental Protection Specialists

PROFILE

Robison Pipe Cleaning proposes to use Strong Seal product MS 2A as needed. Certification is attached.

Robinson Pipe Cleaning Company is a privately owned company that is part of the Carylon Corporation. Our main operating facility is located in Pittsburgh, PA, and we operate satellite facilities in and Cincinnati, OH. The Carylon Corporation is based in Chicago, IL and owns 14 additional companies throughout the United States. All of the Carylon companies are engaged in similar businesses and share common equipment resources that can be mobilized as necessary for various projects throughout the country.

Long before "environment" became a household word, Carylon Companies were busy providing vital environmental maintenance services to the majority of municipalities and utilities and to more than half of the Fortune 500 companies throughout the United States.

A Pioneer

Carylon Corporation
The Environmental Protection Specialists

PROFILE

In 1949, National Power Rodding Corp. (the first of the Carylon companies) saw a need for better sewer cleaning equipment than was available at that time. As a result, they developed and patented the world's first heavy-duty "continuous rod" power rodder; an exceptional piece of machinery that proved to be far superior to anything on the market.

Innovative Solutions

Industrial plants and utility companies quickly saw the applications and benefits of our power-rodding service. They began contracting with us for the cleaning of blast-furnace stoves and rodding of underground utility ducts.

This added fuel to our enthusiasm for innovation. Soon thereafter, we became the first to research, develop and successfully use closed-circuit television to inspect sewers. By sending a specially designed television camera through the sewer we were able to locate causes of leaks and blockages without any excavation whatsoever. This new method of sewer inspection literally revolutionized the industry and is the basis for the present day maintenance of the world's sewer infrastructure.

Often, while televising a sewer, it was apparent to us that the pipeline was structurally sound and didn't need to be replaced if only its leaks could be successfully repaired from inside the pipe. This led us to design our own machines for still another innovative sewer maintenance procedure — internal pressure chemical grouting. Now, we not only could see the problem, we could solve it from inside the pipe without costly excavation.

Leading the Field

With the passing of the Water Pollution Control Act (PL 92-500) of 1972, our companies were again at the right place, at the right time. Our years of experience on-the-job and in designing special equipment proved to be invaluable. We knew what to do, how to do it, and had the physical resources already in place to ensure the work would be performed correctly, economically and on time. In the 1980s when laws were passed prohibiting the dumping of sludge into the oceans, our already equipped companies were among the first to provide municipalities with alternative dewatering and biosolids land application disposal methods.

Responsive

Carylon companies were among the first to provide privatized disaster response; giving top priority to requests for assistance following any natural or man-made disaster. The first news flashes had hardly aired when all of our available men and equipment were mobilized and ready for the massive cleanup operations that followed the Johnstown, PA; New Orleans, LA; Waterbury, CT; and Salt Lake City, UT floods; the Los Angeles, CA earthquake; Galveston, TX hurricane; and Mt. St. Helen volcanic eruption.

We were among the first private contractors to respond when a tunnel beneath Chicago's Loop was breached, causing the flooding of the city's entire downtown area. When the call for help came, our response was swift and sure. We knew after such disasters one of the most important and difficult tasks facing a municipality was the rapid cleanup and restoration of its municipal services. Our vast resource of men, equipment and experience helped these and other disaster-stricken communities restore normality to the lives of their residents in the shortest time possible. Our men and equipment were also deployed to "ground zero" to aid in the mammoth cleanup operation following the devastating September 11, 2001, terrorist attack on the World Trade Center.

Committed

With its network of companies located throughout the U.S.A., the Carylon Corporation has grown to become the largest and most experienced industrial & municipal specialized maintenance contractor in the country. More than 50 years later,

Carylon Corporation

The Environmental Protection Specialists

PROFILE

we are still operating under the same principles as when we first opened our doors. We are committed to providing our customers with the best possible service available anywhere, and approach each and every job with the same enthusiasm and pride as if it were our first.

Guaranteed Results

When you select a Carylon company to solve your environmental maintenance problems, you can rest assured you made the correct choice. Whether your project calls for the use of one man and one piece of equipment, or multi-disciplinary crews and a fleet of specialized equipment, we can do the job, and do it right. And, we don't just say we can — we guarantee it. All of our work is backed by a guarantee that is unmatched in our industry: You must be completely satisfied or you pay absolutely nothing.

Carylon Corporation

The Environmental Protection Specialists

SERVICES AND CAPABILITIES

The Carylon Corporation provides the following environmental maintenance services to industries, municipalities and utilities throughout the United States and Canada:

SEWER CLEANING

Sewers are quickly and thoroughly cleaned using high-velocity jetting equipment operating at pressures up to 2,500 psi and specially-designed, machine-driven buckets and scrapers that are specifically sized for the pipe being cleaned.

COLOR TV INSPECTION

Specially designed mini, crawler Pan and Tilt color cameras are used to pinpoint problems in sewer and process pipelines and potentially explosive and/or hazardous atmospheres. Includes narrated videotape and computer-generated report of the inspection.

PRESSURE CHEMICAL GROUTING

Custom-built pressure chemical grouting equipment is used by trained technicians to stop infiltration/inflow by isolating and internally sealing leaks in sewers. Operation is handled entirely from above ground without any excavation, blockage of sewers or by-passing of sewage.

SEWER REHABILITATION

Lining of sewers using cured-in-place slip lining methods as well as various point repair technologies.

MANHOLE REHABILITATION

Specialists trained in our Spray-Seal method of manhole rehabilitation restore manholes and other structures to "better than new" condition in less time than it would cost to replace them--and at a fraction of the cost.

SLUDGE REMOVAL

Sediment and oily wastes are removed using industrial vacuum equipment, specialized pumps, and mechanical equipment.

HYDRAULIC DREDGING

Hydraulic dredging equipment is used to remove sediment, sludge, and other material from lined and unlined ponds, treatment ponds or basins, lakes, river inlets or discharge points, and stormwater surge basins.

SLUDGE DEWATERING

Mobile dewatering equipment, including belt filter presses, recessed chamber plate and frame presses, centrifuges and transportable treatment units (for hazardous wastes) are used to reduce sludge to a dry cake-like material that is suitable for landfill disposal, incineration, recycling/recovery or beneficial reuse.

BIOSOLIDS LAND APPLICATION

Liquid and dewatered biosolids are transported and land applied to permitted land application sites. Site acquisition, permitting, soil sampling, site monitoring and reporting services are provided in the biosolids application program.

SITE REMEDIATION

Experienced 40 Hour OSHA trained heavy equipment operators complete site remediation projects such as lagoon closures, cappings, removal of contaminated soils/sludges and underground storage tanks, EPA regulated site closures and oil spill cleanups.

Carylon Corporation
The Environmental Protection Specialists

SERVICES AND CAPABILITIES

HAZARDOUS WASTE ON-SITE TREATMENT

Transportable treatment units (TTU's) process and neutralize acid/caustic wastes and chemically fixed wastes. Treated filtrate can be discharged into an industrial/sanitary sewer. The residual dewatered filter cake is suitable for recycling, incineration, or landfill disposal.

HYDRO-VAC EXCAVATION

Everything from pilot holes and slot-trenching to major excavations can be safely performed in inaccessible areas and in areas where underground utilities, pressure gas lines and pipelines are present. Method is recognized as "non-mechanical" excavation, allowing equipment to work within 5 feet of hotline buffer zone boundaries. Will not rupture underground pipelines, cut through buried cables or damage any infrastructure whatsoever. Dangerous gases that may already be leaking are safely mixed with the water stream and vacuumed away.

WET/DRY INDUSTRIAL VACUUM CLEANING

Using custom-built mobile vacuum units, trained operators quickly remove dirt, metal chips, slag, steel shot, wood chips, sawdust, grain, mill scale, slurries, water and other wastes and debris without stirring up dangerous particles or emitting annoying dust into the atmosphere.

HIGH PRESSURE WATER BLASTING

Using specialized equipment operating at pressures up to 35,000 psi, trained operators remove scale and product build-up in boiler and heat exchanger tubes; old paint, dirt and rust from structures, machinery and equipment; and literally peel away soft or hardened deposits from chemical processing equipment without any damage to original surfaces.

OTHER SERVICES INCLUDE:

General Plant Maintenance; Catch Basin Cleaning; Duct Rodding; Sewer System Studies; Steel Mill Blast Furnace Stove Cleaning; Tank, Pit & Digester Cleaning; Roll-Off Containers; Storage Tank Rental.

Robinson Pipe Cleaning Company
The Environmental Protection Specialists

EQUIPMENT RESOURCES

INDUSTRIAL WET/DRY VACUUM LOADERS

10 4,500 CFM to 7,500 CFM, 8" TO 10" Suction Inlets - 16 to 20 yards capacity
1 High-Rail Vacuum Loader

HYDROBLASTERS

2 Trailer/Truck Mounted Units - ranging 22 GPM to 60 GPM @ 10,000 PSI
1 Trailer/Truck Mounted Units @ 20,000 PSI or above

D.O.T. VACUUM TANKERS

2 1,600 TO 8,000 gallon Tank Wagon Trailers w/Product Pump

JETTER/VACUUM COMBINATION SEWER CLEANING

8 80 GPM @ 3,500 TO 5,200 CPM 8" suction inlets - 8 to 16 yard capacity
6 125 -175 GPM @ 3,500 TO 5,200 CPM 8" suction inlets - 8 to 16 yard capacity

JETTING TRUCKS

7 80 GPM @ 2,000 PSI
1 Hi-Rail Jetter

HOT WATER HIGH PRESSURE CLEANERS

2 Up to 2,000 PSI @ 210 F

PUMPS 2" - 12"

8 Trash
4 Submersible
4 Hydraulic

UTILITY TRUCKS

17 Various Pick-up, Stake Body, Dump Trucks

TV TRUCKS & GROUTING RIGS

10 Outfitted with the Wincan software and Pan and Tilt cameras. Capable of sealing pipe joints in pipe 6" diameter and larger
(special consideration for pipe under 6" diameter)
2 Lateral inspection capabilities

RODDING UNITS

2 Truck-mounted Rodders
10 Trailer-mounted Rodders

BUCKET WINCHES

2 2 Cylinder Winches
11 4 Cylinder Winches

MISCELLANEOUS EQUIPMENT

6,000-8,000 gallon sludge trailers, generators, air compressors; storage silos; frac tanks; gas testing equipment; explosion-proof lighting; airline respirators, SCBA's.

INDUSTRIAL WET/DRY VACUUM LOADERS

144 4,500 CFM to 7,500 CFM, 8" TO 10" Suction Inlets - 16 to 20 yards capacity
1 High-Rail Vacuum Loader

HYDROBLASTERS

68 Trailer/Truck Mounted Units - ranging 22 GPM to 60 GPM @ 10,000 PSI
14 Trailer/Truck Mounted Units @ 20,000 PSI or above

HYDRO EXCAVATION UNITS

14 Special hydro-vac non-mechanical excavation units with hydro-auger attachments

D.O.T. VACUUM TANKERS

71 1,600 TO 8,000 gallon Tank Wagon Trailers w/Product Pump

MOBILE DEWATERING UNITS

50 Twin belt filter presses
5 Centrifuge
28 Plate and frame filter presses
5 Transportable treatment units

JETTER/VACUUM COMBINATION SEWER CLEANING

86 80 GPM @ 3,500 TO 5,200 CPM 8" suction inlets - 8 to 16 yard capacity
6 125 -175 GPM @ 3,500 TO 5,200 CPM 8" suction inlets - 8 to 16 yard capacity

JETTING TRUCKS

82 80 GPM @ 2,000 PSI
1 Hi-Rail Jetter

CHEMICAL CIRCULATING UNITS

4 80 GPM, 600' head recirculating units

DREDGES

24 Hydraulic low-profile dredges with 8 to 12-inch pumps capable of dredging depths of 1 to 35 feet

HOT WATER HIGH PRESSURE CLEANERS

92 Up to 2,000 PSI @ 210 F

PUMPS 2" - 12"

102 Trash
128 Submersible
31 Dewatering
48 Pressure
43 Hydraulic

UTILITY TRUCKS

345 Various Pick-up, Stake Body, Dump Trucks

TV PIPELINE INSPECTION UNITS

46 Capable of internal inspection of 4-inch diameter and larger pipes

TV & GROUTING UNITS

20 Capable of sealing pipes in 6-inch diameter and larger pipes

RODDING UNITS

11 Truck-mounted Rodders
20 Trailer-mounted Rodders

BUCKET WINCHES

12 2 Cylinder Winches
26 4 Cylinder Winches

MISCELLANEOUS EQUIPMENT

6,000-8,000 gallon sludge trailers, generators, air compressors; storage silos; frac tanks; gas testing equipment; explosion-proof lighting; airline respirators, SCBA's.

WILLIAM BURCHELL – PRESIDENT

Mr. Burchell joined the Carylton Corporation in 1986 with Robinson Pipe Cleaning Company. Prior to this, he acquired 12 years of experience servicing industrial, steel, coke, power and chemical plants. His positions included Laborer, Operator, Foreman, Superintendent and Manager.

Currently, Mr. Burchell serves as President of Robinson Pipe Cleaning Company. His responsibilities include managing day-to-day operations, bidding and negotiating contracts, overseeing equipment maintenance programs, purchasing equipment, and hiring and training a workforce of over 60 laborers and operators.

In addition to his responsibilities with Robinson Pipe Cleaning Company, Mr. Burchell also oversees the operation of two other Carylton companies in Ohio and Michigan.

SIGNIFICANT PROJECTS

Love Canal - Superfund clean up of PCB contaminated pipe in Niagara Falls, New York.
City of Lynchburg, Virginia - cleaning and televising of sanitary sewers up to 60" to assess flood damage.
Involvement in the continuous operation of full service environmental contracting operations at:
 US Steel Clairton Works, Irvin Works and Edgar Thomson Works
 Wheeling-Pittsburgh Steel Corporation
 City of Pittsburgh, Pennsylvania
 City of Johnstown, Pennsylvania

SPECIAL TRAINING, CONTINUING EDUCATION AND CERTIFICATIONS

40 Hour HAZWOPER Training in accordance with OSHA - 29 CFR 1910.120
10 Hour OSHA Construction Industry Safety and Health Training
8 Hour training update in accordance with OSHA - 29 CFR 1910-120
Permit Required Confined Space Entry in accordance with OSHA-29 CFR 1910.146
Hearing Conservation Training in accordance with OSHA 29 CFR 1926.52 & 1910.95
Lock-Out/Tag-Out Safety Training in accordance with the OSHA 29 CFR 1910.147
Respiratory Protection Training in accordance with OSHA 1910.134
Fall Protection Training in accordance with OSHA 29 CFR 1926.500, 1926.501, 1926.502, 1926.503
Hazard Communication/Right to Know Safety Training in accordance with OSHA 1926.59

MICHAEL LONG, JR. – BUSINESS DEVELOPMENT MANAGER

Mr. Long joined the Carylton Corporation in 1991 with Robinson Pipe Cleaning Company. Prior to this, he acquired 6 years of experience in the trenchless pipe rehabilitation industry. His positions included Laborer, Operator, Foreman, Superintendent and General Manager.

Mr. Long currently serves as the Business Development Manager for all of Robinson Pipe Cleaning Company. His responsibilities include pursuing new business opportunities, developing new and existing customers, researching new products and services, developing cost estimates for bids and proposals, and managing the sales staff. Mr. Long also has extensive experience with the operational aspects of the company and continues to assist with hiring and training field employees and providing technical and project management expertise on our larger projects.

BARRY GOBLE – TECHNICAL MANAGER

Mr. Goble joined the Carylton Corporation in 2003 with the acquisition of Basic Technical Services by Robinson Pipe Cleaning Company. He served as General Manager with Basic Technical Sales and Service, Inc., Prior to this, Mr. Goble acquired 31 years of experience in the field of pipeline system inspection and rehabilitation involving approximately 30 million feet of pipe. His positions included Technician, Field Manager, Project Manager, Manager of Operations and General Manager.

Mr. Goble's current responsibilities include developing cost estimates for bids and proposals, using his technical expertise to develop business with new technologies, interpreting data from flow monitoring and sonar inspection projects, managing projects that are technologically complicated, and providing expertise with the pursuit of new technologies.

EDUCATION

Coursework in Environmental Science, Pollution Control and Hydrology – Edinboro University of Pennsylvania

JOHN KOFOD – SAFETY DIRECTOR, CARYLON CORPORATION

Mr. Kofod has been with the Carylton Corporation since 1986. Prior to this, he acquired 9 years of experience as a National Accounts Risk Control Coordinator with Commercial Union Insurance Company. His responsibilities included drafting multi-location/national accounts service instructions, conducting carrier risk control audits, scheduling audits and confirming recommendation compliance for national account subsidiary locations, meeting with insurance risk managers to establish risk control objectives for each policy year (i.e., frequency of audits, safety training, IH audits, etc.), drafting annual account review reports for the national account underwriting staff, and completing prospective insured initial safety audits to allow the underwriting staff to determine desirability of risk.

Mr. Kofod is currently serving as the Safety Director for the Carylton Corporation. Under his direction, the corporation initiated a two-part Management Accountability Program, creating strong financial incentives for subsidiary companies to continually strive for safety record improvement. Additionally, the corporation's present claims management philosophy was adopted under his recommendations. Mr. Kofod's routine duties include administering the Carylton Corporation's loss prevention program, maintaining and updating the corporate safety manual, distributing applicable rules and regulations to subsidiary operations, audits of subsidiary locations, accident record keeping, and other related tasks. Mr. Kofod also provides HAZWOPER and confined space training for subsidiary operations.

EDUCATION

MS, Occupational Health and Safety – Northern Illinois University, School of Industry and Technology

RANDY ALEXANDER - FOREMAN

RESPONSIBILITIES

Mr. Alexander's primary area of concern involves investigative studies utilizing internal inspection equipment, rehabilitation and maintenance of sewer collection systems and the repair of underground piping systems via no-dig or trenchless pipeline repair technology, collection of data from networks of flow monitoring, sampling, and other scientific equipment utilized in environment planning studies in municipal settings.

The scope of his responsibilities include CCTV inspection of underground pipelines and structures, the installation of gauging equipment and the calibration and maintenance; flow quantification utilizing various methods; the quantification and quantitative sampling of waster discharges; and waste water sampling programs. rehabilitation of structures and pipelines via chemical pressure grouting techniques and cured in-place sectional liners, rainfall simulation studies utilizing smoke and dyed water trace test methods, infiltration/inflow flow studies and flow quantification utilizing various scientific methods.

HISTORY

Mr. Alexander has been involved in all phases of the work performed by Robinson Pipe Cleaning, including sewer system flow isolation programs, rehabilitation and maintenance programs, flow monitoring, and treatment plant sludge press operations. With over 20 years of experience in the field of pipeline system investigations and rehabilitation, he has supervised the execution of major sewer system rehabilitation projects and sewer system investigations involving approximately 11.0 MM lineal feet of piping. Prior to his employment, Mr. Alexander was employed by J & L Steel and has extensive in-plant experience in the iron and steel industry and is familiar with manufacturing processes, layouts and environments. He was previously employed by Environmental Technical Services, a division of Chester Engineers, Inc.

Mr. Alexander is computer literate and is familiar with various flow data formats and various spreadsheets.

CERTIFICATIONS

- Certified in Health and Safety Training for working in Hazardous Waste Sites that complies with OSHA 1910.120(e)(2).
- Certified Chemical Handler, Cues, Inc.
- Approved Chemical Handler, Avanti International

EQUIPMENT AND SKILLS

- Cues, Cherne, UEMSI, Rigid, Aries, Ferret, Buchen and Pearpoint CCTV systems.
- Aquatech, Myers, Vactor, Guzzler, Super Products and Sreco hydrojets and vacuum units.
- Marsh-McBirney, ISCO, Sigma, Belfort, Stevens flow monitoring and sampling systems.
- Electronic location devices, acoustical water line leak detection, audio/video recording.
- Survey, staking, elevational and distance measurements.
- Scientific instrumentation, fluorometers, conductivity, pH, chlorine, dissolved oxygen, sulfide and atmospheric measurements such as, CO, O2, benzene, toluene, H2SO4, HCL, combustible gas and methane utilizing electronic and air aspirated detection devices.

ROBB HARTWICK- Scheduler/ Planner

RESPONSIBILITIES

Mr. Hartwick in his capacity as Scheduler/Planner of Robinson Pipe Cleaning is responsible for the daily preparations, scheduling and dispatching of equipment and manpower to satisfy the daily work loads. Mr. Hartwick works directly with our residential, construction, industrial and municipal clients as well as Robinson Pipe Cleaning's full compliment of trained personal.

HISTORY

Mr. Hartwick has extensive hands-on experience in planning, budgeting and performing complex projects. With over 15 years of experience in the field of residential, commercial, institutional pipeline and structure system investigations and rehabilitation, he has supervised the execution of numerous system rehabilitation projects and system investigations.

CERTIFICATIONS

- Certified in Health and Safety Training for working in Hazardous Waste Sites that complies with OSHA 1910.120(e)(2).
- Certified Site Safety Supervisor that complies with OSHA 1910.120(e)(2).

WILLIAM J. GAUGHAN - FOREMAN

RESPONSIBILITIES

Mr. Gaughan's primary area of concern involves investigative studies utilizing internal inspection equipment, rehabilitation and maintenance of sewer collection systems and the repair of underground piping systems via no-dig or trenchless pipeline repair technology. The scope of his responsibilities include CCTV inspection of underground pipelines and structures, rehabilitation of structures and pipelines via chemical pressure grouting techniques and cured in-place sectional liners, rainfall simulation studies utilizing smoke and dyed water trace test methods, infiltration/inflow flow studies and flow quantification utilizing various scientific methods.

HISTORY

Mr. Gaughan has been involved in all phases of the work performed by Robinson Pipe Cleaning, including sewer system flow isolation programs, rehabilitation and maintenance programs and flow monitoring programs. With over 15 years of experience in the field of pipeline system investigations and rehabilitation, he has supervised the execution of major sewer system rehabilitation projects and sewer system investigations involving approximately 5.0 MM lineal feet of piping. Prior to his employment, Mr. Gaughan was employed by Traco Industries as a materials handler and assistant operator of the industrial waster treatment facilities. He was previously employed by Environmental Technical Services, a division of Chester Engineers, Inc.

Mr. Gaughan is computer literate and familiar with various flow data formats and various spreadsheets.

CERTIFICATIONS

- Certified in Health and Safety Training for working in Hazardous Waste Sites that complies with OSHA 1910.120(e)(2).
- Certified Chemical Handler, Cues, Inc.
- Approved Chemical Handler, Avanti International
- Certified and Approved Installation Technician, New Life Liner Systems

EQUIPMENT AND SKILLS

- Cues, UEMSI, Rigid, Aries, Ferret, and Pearpoint CCTV systems.
- Aquatech, Myers, Vactor, Guzzler, Super Products and Sreco hydrojets and vacuum units.
- Marsh-McBirney, ISCO, Sigma, Belfort, flow monitoring and sampling systems.
- Electronic location devices, acoustical water line leak detection, audio/video recording.
- Survey, staking, elevational and distance measurements.
- Scientific instrumentation, fluorometers, conductivity, pH, chlorine, dissolved oxygen, sulfide and atmospheric measurements such as, CO, O2, benzene, toluene, H2SO4, HCL, combustible gas and methane utilizing electronic and air aspirated detection devices.

BRIAN MCKNIGHT – GENERAL SUPERINTENDENT

Mr. McKnight joined the Carylton Corporation in 1984 with Robinson Pipe Cleaning Company. Starting as a Laborer, he advanced through the ranks of Operator, Foreman and Field Superintendent.
