EQUAL OPPORTUNITY AGREEMENT

The Law

- Title VII of the Civil Rights Act of 1964 (amended 1972) states that it is unlawful for an employer to discriminate in employment because of race, color, religion, sex, age (40-70 years) or national origin.
- Executive Order No. 11246 on Nondiscrimination under Federal contract prohibits employment discrimination by contractor and sub-contractor doing business with the Federal Government or recipients of Federal funds. This order was later amended by Executive Order No. 11375 to prohibit discrimination on the basis of sex.
- Section 503 of the Rehabilitation Act of 1973 states:

The Contractor will not discriminate against any employee or applicant for employment because of physical or mental handicap.

- Section 2012 of the Vietnam Era Veterans Readjustment Act of 1973 requires Affirmative Action on behalf of disabled veterans and veterans of the Vietnam Era by contractors having Federal contracts.
- Section 206(A) of Executive Order 12086, Consolidation of Contract Compliance Functions for Equal Employment Opportunity, states:

The Secretary of Labor may investigate the employment practices of any Government contractor or sub-contractor to determine whether or not the contractual provisions specified in Section 202 of this order have been violated.

The Lexington-Fayette Urban County Government practices Equal Opportunity in recruiting, hiring and promoting. It is the Government's intent to affirmatively provide employment opportunities for those individuals who have previously not been allowed to enter into the mainstream of society. Because of its importance to the local Government, this policy carries the full endorsement of the Mayor, Commissioners, Directors and all supervisory personnel. In following this commitment to Equal Employment Opportunity and because the Government is the benefactor of the Federal funds, it is both against the Urban County Government policy and illegal for the Government to let contracts to companies which knowingly or unknowingly practice discrimination in their employment practices. Violation of the above mentioned ordinances may cause a contract to be canceled and the contractors may be declared ineligible for future consideration.

Please sign this statement in the appropriate space acknowledging that you have read and understand the provisions contained herein. Return this document as part of your application packet.

Bidders

I/We agree to comply with the Civil Rights Laws listed above that govern employment rights of minorities, women, Vietnam veterans, handicapped and aged persons.

1. Apply **superphosphate** fertilizer directly to subgrade before loosening. Till soil to a homogeneous mixture of fine texture.
 2. Thoroughly blend planting soil off-site before spreading or spread topsoil, apply soil amendments and fertilizer on surface, and thoroughly blend planting soil.
 3. Spread planting soil to a depth of 4 inches but not less than required to meet finish grades after light rolling and natural settlement. Do not spread if planting soil or subgrade is frozen, muddy, or excessively wet.
 4. Reduce elevation of planting soil to allow for soil thickness of sod.
- B. Finish Grading: Grade planting areas to a smooth, uniform surface plane with loose, uniformly fine texture. Grade to within plus or minus ½ inch (13 mm) of finish elevation. Roll and rake, remove ridges, and fill depressions to meet finish grades. Limit grading to areas that can be planted in the immediate future.
- C. Moisten prepared area before planting if soil is dry. Water thoroughly and allow surface to dry before planting. Do not create muddy soil.
- D. Before planting, obtain Owner's acceptance of finish grading; restore planting areas if eroded or otherwise disturbed after finish grading. Erect barriers to keep pedestrian and vehicular traffic off of areas to receive seed and cover.

3.2 SEEDING

- A. Do not broadcast or drop seed when wind velocity exceeds 5 mph (8 km/h). Evenly distribute seed by sowing equal quantities in two directions at right angles to each other. Do not seed against existing trees. Limit extent of seed to outside edge of planting saucer.
- B. Sow seed at a total rate of **300 lbs/acre onsite**.
- C. Rake seed lightly into top 1/8 inch (3 mm) of soil, roll lightly, and water with fine spray.
- D. Protect seeded areas with slopes not exceeding 1:6 by spreading straw mulch. Spread uniformly at a minimum rate of **1 bale/ 1,000 s.f.** thin enough to expose approximately 50% of the soil surface. Spread by hand, blower, or other suitable equipment.

Anchor straw mulch by crimping into soil with suitable mechanical equipment.

- E. Protect seeded areas from hot, dry weather or drying winds by applying **compost mulch** within 24 hours after completing seeding operations. Soak areas, scatter mulch uniformly to a thickness of **3/16** inch, and roll surface smooth.

3.3 TURF MAINTENANCE

- A. Maintain and establish turf by watering, fertilizing, weeding, mowing, trimming, replanting, and performing other operations as required to establish healthy, viable turf. Roll, regrade, and replant bare or eroded areas and re-mulch to produce a uniformly smooth turf. Provide materials and installation the same as those used in the original installation.
- B. Fill in as necessary soil subsidence that may occur because of settling or other processes. Replace materials and turf damaged or lost in areas of subsidence.
 - 1. In areas where mulch has been displaced by wind or maintenance operations, add new mulch and anchor as required to prevent displacement.
 - 2. Apply treatments as required to keep turf and soil free of pests and pathogens or disease. Use integrated pest management practices whenever possible to minimize the use of pesticides and reduces hazards.
- C. Apply pesticides and other chemical products and biological control agents in accordance with authorities having jurisdiction and manufacturer's written recommendations. Coordinate applications with Owner's operations and others in proximity to the Work. Notify Owner before each application is performed.
- D. Install and maintain temporary piping, hose, and turf watering equipment to convey water from sources and keep turf uniformly moist to a depth of 4".
 - 1. Schedule watering to prevent wilting, puddling, erosion, and displacement of seed or mulch. Place watering system so as to avoid walking over muddy or newly seeded areas.

2. Water turf with fine spray at a minimum rate of 1" per week unless rainfall precipitation is adequate.
- E. Mow new turf as soon as top growth is tall enough to cut. Repeat mowing to maintain specified height without cutting more than 1/3 of grass height. Do not delay mowing until grass blades lay over and become matted. Do not mow when grass is wet.

3.4 SATISFACTORY TURF

- A. Turf installation shall meet the following criteria as determined by owner:
1. Satisfactory Seeded Turf: At end of maintenance period, a healthy, uniform, close stand of grass has been established, free of weeds and surface irregularities, with coverage exceeding **90 percent over any 10 sq. ft. and bare spots not exceeding 5 by 5 inches.**
- B. Use specified materials to reestablish turf that does not comply with requirements and continue maintenance until turf is satisfactory.
- C. Final payment for this portion of the bid will be held until turf is established according to the previous specifications.
- D. Price shall include all associated costs for turf establishment.

5 Year PIP Warranty

Due to the many, sometimes conflicting, standards imposed by different regulatory bodies, federal, state, local, private and public, A.S.S., Inc and the Contractor give no opinion or advice concerning fall-zone dimensions or minimum safety clearances from existing or proposed structures; However A.S.S, Inc and the Contractor will furnish ASTM F1292 Fall Height Test reports to confirm that MaxPlay PIP meets or exceeds a particular fall height. It is the owner's responsibility to determine the standards that must be met in his or her area. The owner assumes full responsibility and agrees to hold harmless, defend, and indemnify A.S.S., Inc. and the Contractor from all claims, suits, or causes of action for personal injury, death, and property damage to employees, customers, trespassers, or invitees of the Owner arising out of any allegations of negligence, fault, or strict liability on the part of A.S.S , Inc or the Contractor.

Scheduling: The Contractor shall install the MaxPlay PIP as described in this contract in a timely fashion; however the parties recognize that any number of factors, including but not limited to, weather, improper site preparation, delays in the supply chain, and/or prior contracts, may delay commencement and/or completion of the contracted work. The Owner is responsible to notify the Contractor if the site will not be ready for safety surface construction to begin.

Unknown Conditions: Contract price may be adjusted because of unknown conditions including but not limited to abnormal and/or unexpected site conditions which were not disclosed by the Owner and/or were not included in the plans and specifications.

Warranty & Other Liability Provisions: the Contractor warrants the MaxPlay PIP installation under this agreement for a period of 5 years commencing from the date of substantial completion.

This limited warranty covers only the Contractor's obligation to replace or repair (at the Contractor's discretion) any failure of the system, not cosmetic in nature, during the warranty period. The Contractor is under no obligation to replace or repair any portion of the surface damaged by vandalism, product misuse, abuse, alteration, failure of the base or sub-base; damage caused by sharp or blunt objects (high heels, spikes, etc.), improper drainage, normal wear and tear, including but not limited to scuffing which should be expected especially under swings and in high

traffic areas; damage caused by earth movement, including but not limited to sink holes, earthquakes, and/or other acts of God. This warranty does not include discoloration or damage caused by chemical spills, unapproved cleaners, or ultraviolet rays. Do not put objects on the surfacing which might puncture the surface, including but not limited to picnic tables and chairs. This warranty is expressly made in lieu of any other warranties. Any alteration of the safety surface will null and void this warranty. If the contract is not paid in a timely fashion, in accordance with the terms and conditions of this contract, the warranty shall be automatically voided. Drainage issues are the responsibility of the Owner. If the play area has drainage problems including, but not limited to, being located within a drainage through-fare, a low lying or flood prone area, or an improper grade (2% minimum), these issues should be remedied before the Contractor's PIP installation crew arrives at the site. The installation crew will not evaluate the site for drainage. They will install the MaxPlay PIP at the contracted thickness (some slight variations are normal) over the existing grade. If drains, ditches, and/or dikes need to be installed, they should be constructed before the PIP installation crew arrives at the site.

Cancellation of this Agreement: If this contract is canceled by the customer for any reason, customer shall

immediately notify: American Safety Surface, LLC., 2500 Brookpark Rd Cleveland, Ohio 44134 and reimburse them for all costs to date.

Entire Agreement: This contract represents the full and complete agreement between the parties and no other warranty is being offered other than the one described herein. No other representations, understandings, or agreements have been made, or relied upon, other than those set forth herein. The rights and obligations contained herein may be modified in writing when agreed upon by both parties, and are for the benefit of, and are enforceable by the parties, their heirs, their personal representatives, successors and/or assignees.

2012 Price List

To price a size not listed, simply multiply the width by the length to get the S.F. Then use the price of the next highest S.F. unit within that structure type.

4P PYR example: 21' x 23' x 8' EH = 483 S.F. PYR unit. Therefore the next highest S.F. PYR unit with an 8' EH = \$4,884

4P HIP example: 19' x 24' x 8' EH = 456 S.F. HIP unit. Therefore the next highest S.F. HIP unit with an 8' EH = \$4,170

As a general rule of thumb, rectangles will have a HIP roof and squares will have a PYR roof

All Prices are based on Soil profile type (Section 1615.1.1, IBC2006) "D". Whenever the soil encountered appears to vary from assumed type or expansive soil or local fill is found at the site, a geotechnical engineering analysis may need to be performed at the expense of the customer.
