

## **LSC Stadium Company, LLC – Project Description**

The proposed stadium, located in the Athens-Boonesboro corridor adjacent to Interstate 75, will serve as the home of Lexington Sporting Club's professional men's and women's teams, hosting over thirty (30) home games each calendar year.

The stadium is projected to start with 5,400 seats with the ability to expand to 11,000 seats in future years. The stadium will also serve as the potential home of High School state championships and regional university conference championships. The stadium will serve as an economic driver for the entire region, creating demand in an under-developed part of Fayette County.

The \$35 million stadium will be part of an overall \$85 million investment in facilities, infrastructure and performance buildings to support the local youth and professional soccer eco-system.
