200 East Main Street
Lexington, KY 40507

To Whom It May Concern:

Excellance is pleased to submit the attached quotation in response to your "Request for Bid" for an Emergency Care Unit.

Excellance was founded in 1975 for the specific purpose of designing and manufacturing the finest emergency vehicles available. Excellance emergency vehicles are built using fully welded construction, including the interior cabinetry. There is no other manufacturer who can match the structural integrity and quality of an Excellance.

"We certify and guarantee that we have read and understand the requirements set forth in the RFB and the vehicle we are proposing conforms in every way and in every detail to these requirements."

We look forward to working with you on this project. Thomas Pugh will be your Regional Account Representative and primary point of contact. Christina Biller will be the Project Manager during the construction process. If you have any questions please feel free to contact us at 1-800-882-9799.

We look forward to the opportunity to exceed your expectations on this project!

Sincerely,

Steve Vaughan
Vice President

EXCELLANCE, INC.

CUSTOMER SUPPLIED PARTS

It is Excellence policy for all parts to be supplied by Excellence. The reasons for this policy are to allow Excellence: (1) to better engineer and manufacture the vehicle by obtaining the parts in advance, (2) provide better control over tracking the delivery of all parts and getting the part to the correct vehicle for which it is intended, and (3) it allows Excellence to better adhere to its production schedule. Disruptions in our production schedule are very costly and wasteful in terms of labor. Therefore, exceptions to this policy will result in a charge of \$250.00 *per part* supplied by any dealer or customer PLUS the appropriate labor charge for installing any such part. Note: Excellence does not warrant the installation of customer supplied parts installed by Excellence! Excellence waives the \$250 "parts charge" for two-way radio equipment, radio antenna, and cots.

FACTORY PAID TRANSPORTATION: OPTIONS

It is Excellence's preference for the customer to make their own transportation arrangements. However, Excellence appreciates the "budgeting" requirements of some organizations and will be delighted to assist the customer with their transportation needs. Excellence has over 25 highly customized vehicles in various stages of production at all times. Unfortunately, there are too many variables affecting the flow of production to allow Excellence to obtain the least expensive air fare with a "30-day advance purchase". This, combined with the impossibility of forecasting the future cost of airline tickets today, results in what may seem like an unusually expensive quote for airline tickets. Be assured Excellence will gladly refund any savings that may result from lower air fares. The transportation costs will be divided by the number of units ordered. However, the customer is responsible for paying the difference if fewer units are ordered than what is specified at line 236

Payment Terms:

Payment to be Cash Upon Delivery F.O.B. Excellence, Madison, Alabama.

PERFORMANCE BOND

The cost for providing a performance bond is \$11 per \$1,000 on the total price of the unit.
(1) Enter the number "1" here if Purchaser requires Excellence to provide a performance bond for this order. 2,666.01

NOTE: IT IS EXPRESSLY UNDERSTOOD THAT ANY PERFORMANCE BOND IS SUBJECT TO THE TIMELY RECEIPT OF ANY AND ALL CUSTOMER SUPPLIED PARTS AND ALL OTHER TERMS AND PROVISIONS OF THIS ORDER. IT IS AGREED THAT FAILURE TO RECEIVE ANY DOCUMENTATION OR SUPPLIED PART(S) TO EXCELLANCE IN A TIMELY MANNER SHALL NOT BE GROUNDS FOR FAILURE TO PERFORM PURSUANT TO ANY PERFORMANCE BOND.

CHECKLIST

Send invoices to:
Lexington Fayette Urban County Government
200 East Main St. Lexington, KY 40507

Specify to whom the MSO is to be assigned:
Lexington Fayette Urban County Government

The vehicle will be ready for delivery with electrical diagrams, cleaned, inspected, fuel tanks full, vehicle serviced, certified weight ticket, and copies of all warranties and owners manuals.

The effective date of this contract is the day this order is accepted by Excellance as evidenced by the date this contract is executed by an officer of Excellance.

Construction will begin only after all questions have been resolved. Once the unit is in production, each change will result in an engineering fee of \$250 in addition to the price for the change.

Failure to select an option on this order form will result in: (i) no charge to the customer, (ii) no obligation by Excellance for that item, and (iii) the possibility of a \$250 charge for changes or additions that occur after production begins on a vehicle. To select any option you must either: (a) enter "1" in the "()", OR (b) enter a specific number in the "()" when instructed to do so.

Review this order carefully. Changes, alterations or additional work ordered shall be charged for at current rates with additional time being allowed Excellance for delivery.

Price is exclusive of taxes, licenses, etc. which shall be the responsibility of purchaser. All delivery dates are approximate unless otherwise indicated and are subject to and dependent upon the Purchaser furnishing all required information to Excellance in a timely manner.

Fulfillment of this order by Excellance shall be contingent upon strikes, lock-outs, fires, accidents, Government regulations, inability to secure materials or other causes beyond Excellance's control. Excellance may substitute comparable parts if the specified part is not available. If colors are not specified, Excellance retains the right to assign colors based upon availability.

In the event Purchaser cancels this order prior to Excellance beginning production on the unit(s) covered hereunder, then Excellance shall be entitled to receive from Purchaser the greater of (a) 15% of the contract price, or (b) all deposits paid by Purchaser hereunder. In the event Purchaser cancels this order after Excellance begins production on the unit(s) covered hereunder, then Excellance shall be entitled to receive from Purchaser the full contract price less the amount of money saved by Excellance by reason of the cancellation (e.g., actual costs incurred) plus 15% of the contract price.

Any warranties on the products sold hereunder are those made by the manufacturer of said products. Excellance, as the seller of such products, expressly disclaims all warranties, either expressed or implied, including any implied warranty of merchantability or fitness for a particular purpose, and neither assumes nor authorizes any other person to assume for it any liability in connection with the sale of such products.

In the event there is a "trade-in" unit that Excellance agreed to take "in trade" as partial consideration of the purchase price hereunder, Excellance shall be under no obligation to tender the MSO/title for the new unit to the purchaser until Excellance (a) receives the MSO/title for the unit to be "traded in", and (b) has possession of the unit "traded in".

This contract contains the entire understanding between the parties, supersedes any previous agreement or understanding, and any changes to this contract must be in writing and signed by Purchaser and Excellance.

Arbitration provision: The laws of the state of Alabama, as applicable to contracts to be performed entirely within that state, shall govern this agreement. Any controversy or claim arising out of or relating to this agreement, or the breach thereof, shall be settled by binding arbitration in accordance with the rules of the American Arbitration Association and any judgment on the award rendered by the arbitrator may be entered in any court having jurisdiction thereof.

REMOUNT PROGRAM VERSUS REPLACEMENT												
Analysis assumptions:												
4	Remount Excellence modules every "X" years (e.g., how often "generic" ambulances are replaced)											
\$ 30,000	Current cost to "remount" without chassis (Increase the cost 150% for non-Excellence units)											
\$ 5,000	Current chassis trade-in value (e.g., value of old chassis when ambulance is remounted)											
\$ 185,000	Current cost per new "generic" ambulance (chassis included)											
\$ 10,000	Current trade-in value for the old "generic" ambulance when it is replaced											
2.5%	Rate of inflation / Cost-of-living / price increase per year
