

R 704-2014

**SECOND AMENDMENT TO THE
AGREEMENT**

THIS SECOND AMENDMENT TO THE AGREEMENT ("Amendment") is made and entered into this 4th day of December 2014 ("Effective Date"), by and among Airbus DS Communication (f/k/a "Cassidian Communications, Inc.") and the Lexington-Fayette Urban County Government ("LFUCG"). LFUCG may be referred to herein as the "Customer". Unless otherwise defined herein, all capitalized terms shall have the meaning set for the in the Agreement (as defined below).

RECITALS

A. WHEREAS, Cassidian Communications and LFUCG and the Lexington Fayette Urban County Airport Corporation ("Airport") entered into that certain Purchase Agreement dated May 17, 2012, whereby Cassidian Communications agreed to provide the LFUCG and Airport a new 800 MHz digital simulcast trunked radio network compliant with the Association of Public Safety Communications Officials (APCO) Project-25 standards ("System");

B. WHEREAS, the parties also previously entered into an Amended Agreement entitled "First Amendment to the Purchase Agreement" dated May 30, 2013, which provides Hardware and licensing of Software will be made available for purchase by any other governmental entity or subdivision, and which together with the original agreement shall hereinafter be referred to as the "Agreement";

C. WHEREAS, in accordance with Section 8 of the Agreement, Customer and Airbus DS Communications desire to memorialize the Change Notice and amend the Agreement consistent with the foregoing to provide four (4) additional Avtec Scout Console Positions to the LFUCG Division of Enhanced 911 for use in the Fire Department Communications Center, and provide for other changes to the Agreement, all on the terms and conditions as set forth herein.

AGREEMENT

NOW THEREFORE, for and in consideration of the above premises, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Customer and Airbus DS Communications hereto agree as follows:

1. Airbus DS Communications shall supply and install four (4) Avtec Scout Console Positions at the LFUCG Fire Department Communications Center pursuant to the terms in the Proposal ("**Exhibit A**") at a price not to exceed \$276,401. The Proposal for Addition of Four Avtec Scout Console Positions is hereby added and incorporated into the Agreement.

2. In the event of a conflict between the terms of this Amendment and the terms of the Agreement, this Amendment shall control. All other terms of the Agreement shall remain unchanged and remain in full force and effect.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be signed by their authorized representatives as of the Effective Date.

Airbus DS Communications is pleased to propose a binding commercial offer for the delivery of four (4) new Avtec Scout console positions to the Lexington Fire Department (FD) Communications Center.

These New Avtec Scout Consoles are to operate in parallel with the Legacy EDACS Maestro Consoles while the LFUCG FD transitions from the Legacy EDACS System to the VESTA Radio System. The previously developed and deployed LFUCG Dispatch Screens will be used for the four (4) New LFUCG FD Dispatch Consoles with the modification that the Intercom Window will be modified to reflect the four (4) New LFUCG FD Dispatch Consoles.

The proposal includes needed network equipment to deploy the consoles at the LFUCG FD Communications Center and to connect into the CORP25 system. LFUCG will be providing the network connectivity between the LFUCG Police Department Headquarters (PDHQ) and the LFUCG FD Communications Center. Console Connectivity will be accomplished via a direct connection to the LFUCG Network.

The Transportable Avtec Scout Dispatch Console currently deployed at the Rear of the LFUCG FD Fire Communications Center will be connected to the VESTA Radio network directly, eliminating the current VPN as a primary connection. The VPN appliance and configuration will remain as a contingency in case of console deployment. Changes to the NEC and As Built Documentation will be made as appropriate and necessary.

Requirements

Airbus DS Communications will deploy the LFUCG FD Consoles in a comparable configuration to those deployed for the LFUCG PD. During the installation, testing and commissioning of the Avtec Scout Dispatch Consoles, Airbus DS Communications will configure the Headset Jack for 4-wire or 6-wire as determined by the complement of Legacy LFUCG FD Headsets. Also during this effort, the Select and Unselect Speakers will be positioned as specified by the authorized LFUCG FD Representative.

Airbus DS Communications Personnel will require unfettered access to the LFUCG FD Communications Center, the Equipment Room immediately beneath the LFUCG FD Communications Center and the LFUCG PD Equipment Room immediately adjacent to the PD Communications Center. Airbus DS Communications will also require access to the Conduits running between the LFUCG FD Communications Center and the Equipment Room immediately beneath it.

Unauthorized reproduction, use, or distribution of this document, or any portion of it, may result in severe civil and criminal penalties, and will be prosecuted to the maximum extent possible under the law. All other trademarks used herein are the property of their respective owners and are used for identification purposes only.

LFUCG will need to advise Airbus DS Communications on which Terminals of the 66-Block connected to the Legacy FD Voice Logging Recorder to terminate (Punch Down) the Baseband Select & Un-Select Audio Cables from New Four (4) FD Dispatch Consoles. LFUCG is responsible for the cross connects and the programming of the Legacy FD Voice Logging Recorder as appropriate and necessary.

The Airbus DS Communications proposal includes Small Form-factor Pluggable (SFP) connections at both the LFUCG FD Communications Center and the LFUCG PD HQ to terminate the LFUCG Dark Fiber Facilities between locations. The SFP Cards shall be installed directly in the Router at PDHQ and the Switch that will be installed at the FD Communications Center.

In conjunction with this offer, Airbus DS Communications will connect, configure, and activate the Transportable consoles that shall have been relocated to E911 Dispatch Center positions #5 and #7 by LFUCG personnel.

Airbus DS Communications will be responsible for the installation, cross connection, testing and commissioning of the Console Station Radios (CSR) associated with Console #5 & #7 and the connections to the Legacy LFUCG PD Logger. No new talk groups are required. For this relocation task no additional VPGates are required, nor are there changes required in the existing VPGate failover configuration. There are no licensing impacts associated with this relocation.

Assumptions

Successful completion of the work described in this proposal is based on and dependent upon the following assumptions:

- There is already a pull string in place to assist with the pulling of any new cabling associated with the new FD Dispatch Consoles
- LFUCG technical personnel will be reasonably available for collaboration and consultation throughout the installation, testing and commissioning phases.
- As there is no new functionality being added to the Avtec Scout Dispatch Consoles, there is no requirement to change to the current Dispatch Screens.
- LFUCG shall be responsible for the connectivity from the LFUCG FD Communications Center to the LFUCG PD Communications Center Equipment Room or to one of the LFUCG VESTA Radio Sites.

- LFUCG shall provide the cable (fiber optic OR electrical) from the LFUCG Equipment to the VESTA Radio System.

Pricing Information

Model Number	Description	Qty	List Price	Discount	Discounted Unit Price	Discounted Extended Price
T3-SCOUT-STD	Tier 3 Scout Standard Console Package. Includes standard Scout Media Workstation, dual speakers, and serial cable.
