- Executive Order No. 11246 on Nondiscrimination under Federal contract prohibits employment discrimination by contractor and sub-contractor doing business with the Federal Government or recipients of Federal funds. This order was later amended by Executive Order No. 11375 to prohibit discrimination on the basis of sex.
- Section 503 of the Rehabilitation Act of 1973 states: The Contractor will not discriminate against any employee or applicant for employment because of physical or mental disability.
- Section 2012 of the Vietnam Era Veterans Readjustment Act of 1973 requires Affirmative Action on behalf of disabled veterans and veterans of the Vietnam Era by contractors having Federal contracts.
- Section 206(A) of Executive Order 12086, Consolidation of Contract Compliance Functions for Equal Employment Opportunity, states: The Secretary of Labor may investigate the employment practices of any Government contractor or sub-contractor to determine whether or not the contractual provisions specified in Section 202 of this order have been violated.

The Lexington-Fayette Urban County Government practices Equal Opportunity in recruiting, hiring and promoting. It is the Government's intent to affirmatively provide employment opportunities for those individuals who have previously not been allowed to enter into the mainstream of society. Because of its importance to the local Government, this policy carries the full endorsement of the Mayor, Commissioners, Directors and all supervisory personnel. In following this commitment to Equal Employment Opportunity and because the Government is the benefactor of the Federal funds, it is both against the Urban County Government policy and illegal for the Government to let contracts to companies which knowingly or unknowingly practice discrimination in their employment practices. Violation of the above mentioned ordinances may cause a contract to be canceled and the contractors may be declared ineligible for future consideration.

As affirmed in Resolution Number 272-2024, the Urban County Council has adopted an annual aspirational goal of utilizing at least seventeen percent (17%) of public funds spend from certain discretionary agreements with certified Minority Business Enterprises (MBEs) and certified Woman Business Enterprises (WBEs); utilizing at least three percent (3%) of public funds from certain discretionary agreements with Certified Veteran-Owned Small Business and Certified Service-Disabled Veteran-Owned Small Businesses (VOSBs); and utilizing Disadvantaged Business Enterprises (DBEs) where applicable. Bidders should make every effort to achieve these goals.

Therefore, as an element of the responsiveness of the bid, all Bidders are required to submit documentation of their good faith and outreach efforts to ensure all businesses, including small and disadvantaged businesses such as minority-, woman-, and veteran-owned businesses, have an equal opportunity to compete for and participate in the performance of any subcontracts resulting from this procurement. Examples of good faith and outreach efforts that satisfy this requirement to encourage the participation of, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs include:

- 1. Advertised opportunities to participate in the contract in at least two (2) publications of general circulation media; trade and professional association publications; small and minority business or trade publications; and publications or trades targeting minority, women, and disadvantaged businesses not less than fifteen (15) days prior to the deadline for submission of bids to allow, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs to participate.
- 2. Attended LFUCG Procurement Economic Inclusion Outreach event(s) within the past year to meet new small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs to partner with on LFUCG contracts and procurements.

- Sent written notices, by certified mail, email, or facsimile, to qualified, certified small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs soliciting their participation in the contract not less than seven (7) days prior to the deadline for submission of bids to allow them to participate effectively.

- 10. Selected portions of the work to be performed by small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs in order to increase the likelihood of subcontracting participation. The fact that the bidder has the ability and/or desire to perform the contract work with its own forces will not be considered a sound reason for rejecting a small business', DBE's MBE's, WBE's, VOSB's and/or SDVOSB's quote. Nothing in this provision shall be construed to require the bidder to accept unreasonable quotes in order to satisfy the participation goals.
- 13. Made an effort to offer assistance to or refer interested small businesses, DBEs, MBEs, WBEs, VOSBs and/or SDVOSBs to obtain the necessary equipment, supplies, materials, insurance and/or bonding to satisfy the work requirements of the bid proposal.

Additionally, pilot testing will allow the LFUCG to assess compatibility of proposed chemicals with existing infrastructure and processes.

### Our History

**1931** - Charles Irving Thornburg created the C.I. Thornburg Company as the experts for pipe, Valves, and fittings in Huntington, West Virginia.

**1958** - Web Morrison purchased the company with the vision of providing contractors and municipalities everything they need to take water from the source, deliver it to the consumer, and return it back to the source.

**2020** - With Web's vision achieved, we renamed the company CITCO Water to reflect our growth and experience in the water and wastewater industry.

**2025** - It's an exciting position to be in-offering our customers a vast array of products and services, from chemicals, supplies, design expertise, smart technology, upgrades, repairs, to even investing in their infrastructure at no cost to them. We now have over 180 employees and eleven full-service branches that serve West Virginia, Kentucky, Tennessee, Indiana, North and South Carolina, and Southern Ohio.

**Tomorrow** - We will continue to expand our products and solutions to meet our customers ever-evolving needs.

### Solutions driven.

For the past 60 years, the Morrison family and generations of employees have carried out the goal by consistently developing new solutions for our customers.

Not only has CITCO Water remained family-owned and operated, we have continued the personal face-to-face customer relationships that we were founded on.

### Commitment given.

At CITCO Water, we listen to our customers. We know their problems and what keeps them awake at night. We strive to develop solutions to those challenges and more. After decades of experience, we are able to anticipate problems and develop unique solutions you don't even know you need yet.

Today, if you are in the water or wastewater business, we have every solution you need—chemicals, meters, engineering and technology, inventory management, Smart City capabilities, hardware, and repair.

### Sul-Fight FX

### Next Generation Odor Control Chemistry

Sul-Fight FX was designed to treat hydrogen sulfide odor and corrosion issues in wastewater collection systems. As other chemistries focus on treating hydrogen sulfide, CITCO Water understands as collection systems expand and new 'low pressure' force main technologies increase the anaerobic environment of the wastewater, hydrogen sulfide problems continue to rise.

Sul-Fight FX works in difficult treatment environments where hydrogen sulfide and sulfates exist. CITCO Water's focus when designing Sul-Fight FX was to ensure that there is no ill effect on the wastewater treatment process.

### Hydrogen Sulfide

Hydrogen sulfide is an organic acid, produced in the anaerobic digestion process. Bacteria in wastewater is searching for available oxygen for respiration. Once the environment is anaerobic and absent of available oxygen, the next available oxygen source are sulfate (SO4) compounds...

### SUL-FIGHTFX

### Sul-Fight FX

### Next Generation Odor Control Chemistry

Sul-Fight FX is a proprietary blend of iron and nitrates. This gives Sul-Fight FX the unique ability to react in 2 specific ways.

- 1. It first reacts immediately with existing hydrogen sulfide producing a non-odorous byproduct. This is where technology of old stopped. As our research has proven, the conversion to hydrogen sulfide is not immediate but continuous.
- 2. The reaction that occurs is a preventive action of offering an oxygen compound with lesser bond strength than the S-O bond in sulfates. The anaerobic bacteria will select the most available oxygen source.

### Specifications

- Specific gravity: 11.8 PPG
- Boiling point: 212 to 370°F
- pH: 4.0 4.4

Feed Rate

Sul-Fight FX feed varies depending on the unique needs of each specific wastewater collection system.

### Availability

Sul-Fight FX is available in 5gallon pails, 55-gallon drums, 330-gallon totes, and bulk tanker deliveries.

### 4.0 Procedure

### 4.1 General Chemical Storage Guidelines

- Keep chemical stocks to a minimum and do not order or maintain excess quantities of any hazardous chemicals.
- When ordering new hazardous chemicals, make sure you have the capability of storing those chemicals safely. Review Safety Data Sheets (SDS) before ordering for information on storage.
- Store all hazardous chemicals in their proper containers and ensure they are in good condition (i.e. Valves, lids and bungs are checked).
- Make sure all containers are labeled properly and are oriented so label is visible.
- Document the date of chemicals such as peroxide formers or chemicals that degrade over time when received. Look at labels for expiration date.
- Store hazardous chemicals in groups based on compatibility:
  - Compatibility guidance is located in JJ Keller Chemical Segregation Chart.
- Read chemical labels and the SDS for specific storage instructions.

### 5.0 Chemical Segregation

- Group chemicals according to their hazard category (i.e., corrosives, flammables, toxins, etc.) not alphabetically, and separated by some sort of physical barrier.
- Separate acids from bases and inorganic acids or bases from organic acids or bases.
- Time sensitive chemicals, such as those that form peroxides, should not be kept longer than twelve months from purchase or six months after opening.
- Refer to JJ Keller Chemical Segregation Chart.
