RE: Authorization for Sole Source Certification for Clark Energy Electric to provide three phase electric service to the Haley Pike Compost Pad to support compost pond pump system.

Request: Council authorization to approve Sole Source Certification of Clark Energy Electric to establish 3 phase electric service at the Haley Pike Compost Pad for use in upgrading the existing pump system adjacent to the compost pond.

Authorization to: Procure three Phase electric service from Clark Energy Electric.

Why are you requesting? The existing diesel water pump unit at the compost pad has exceeded its life cycle. Electric service is needed to support a new pump system.

Department needs this action completed because: Our permit requires that we do not discharge the compost pond water to any streams; therefore, we must collect all runoff in a holding pond. The water is then discharged out via a controlled method utilizing an irrigation system which evenly spreads the water out over several acres of green space.

What is the cost in this budget year and future budget years? \$113,654

The cost for this FY is: \$113,654.00

The cost for future FY is: \$0

Are the funds budgeted? Yes.

The funds are budgeted or a budget amendment is in process: Yes.
