RE: Vendor Selection for Information Technology Services and Consulting

An RFP selection committee has identified and chosen twelve vendors that may be leveraged to provide IT services if internal resources are unavailable. Selected vendors include: Apax, CTC Technology, DLZP Group, DMD Data Systems, Leverage Partners, Metaformers, Next Century, Objective Results, Pomeroy, SDGblue, Solarity, and Swova.

LFUCG supports a wide range of technologies that are process and mission critical. Due to the volume of IT projects and required availability of existing IT services, vendors can be utilized to enhance the quality of service, minimize downtime, and maximize investment in IT.

The vendor selection does not guarantee work, but positions LFUCG IT to engage appropriate IT services in a timely manner. If LFUCG utilizes any selected vendor for IT services a statement of work will be generated. Vendors selected for IT services from this RFP process will remain valid for three years.
