Re: Relocation Agreement for 12" HP Natural Gas Pipeline

Dear Mr. Fischer:

We have considered your request to relocate the 12 inch natural gas pipeline that Columbia owns and operates, to accommodate the installation of sewer system on the property of 4191 Tates Creek Centre Drive. The cost of the relocation work for which you will be responsible is \$120,311.00. This amount includes, but is not limited to, material, contract labor, company labor, engineering, surveying, vehicles, sampling & analysis, and overheads for both installing the new pipe and retiring the old pipe. Once on site, Columbia personnel will explore ways to minimize the actual cost of the relocation. An itemized account of these costs is detailed in Attachment One.

Columbia structures its agreements so that a deposit in the amount of the estimate is required of the party seeking relocation, subject to final reconciliation after all costs have been booked. It should be noted that Columbia intends to abandon this existing line in place; however, under certain conditions Columbia is required to collect a wipe sample, analyze, and possibly decontaminate or remove the old pipe. Any necessary pipeline mitigation costs have **not** been included in this estimate, but would be included in the final reconciliation as a relocation/retirement cost.

If you elect to proceed, in accordance with the above, please sign the bottom portion of this letter and return with Purchase Order showing "Columbia Gas of Kentucky" for \$120,311.00. This signed letter and Purchase Order become an agreement between you and Columbia upon receipt by the Company.

Best regards,

David N. Lemons
Field Engineer
